The following-named U.S. Navy officers to be appointed permanent lieutenant in the Judge Advocate General's Corps of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Clement, David B.,
Ingoglia, Teresa M.

The following-named U.S. Navy officers to be appointed permanent chief warrant officer, W-3, in the U.S. Navy, pursuant to title 10, United States Code, section 555:

Fowler, Gene G.
McAllister, Archibald A.

The following-named U.S. Navy officer to be appointed permanent chief warrant officer, W-4, in the U.S. Navy, pursuant to title 10, United States Code, section 555:

Burbach, Donald E.

DEPARTMENT OF LABOR

William Emerson Brock III, of Tennessee, to be Secretary of Labor.

CONFIRMATION

Executive nomination confirmed by the Senate April 17, 1985:

EXECUTIVE OFFICE OF THE PRESIDENT

Beryl Wayne Sprinkel, of Virginia, to be a member of the Council of Economic Advisers.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Wednesday, April 17, 1985*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

As the Sun gives light to our world so may Your good Word, O God, give light to our hearts and minds. Take away the darkness of selfish thinking or petty concerns and instead renew our hearts that we will be sensitive to the needs of people everywhere. Open our minds that we may truly hear the call of the poor, the neglected, the injured, those who stand alone, the homeless, the refugee, and the lonely. Give us all a glimpse of Your will for our world, where truth and justice are honored, and love and mercy are the marks of our lines. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Sanders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On April 15, 1985:

H.R. 730. An act to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, AZ; and

H.R. 1847. An act to amend title 28, United States Code, with respect to the U.S. Sentencing Commission.

THE FOOD SECURITY ACT OF 1985

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute.)

Mr. DE LA GARZA. Mr. Speaker, the Food Security Act of 1985 (H.R. 2000) that I introduced on April 4 contains provisions dealing with the peanut program. These provisions, in common with other provisions of the bill, are designed to serve as a framework for consideration, by the Committee on Agriculture and its subcommittees, of omnibus farm legislation.

Section 703 of H.R. 2000, which pertains to transfer of poundage quotas for peanuts, could be read as generally permitting transfers of quotas to farms within the same State. This is incorrect. The intent of the bill, in this regard, is to maintain the status quo—that is, generally to restrict transfers of quotas to farms within the same county.

As I have indicated, the Food Security Act of 1985 is to be used as the markup vehicle during committee consideration of omnibus farm legislation this year. Therefore, I am introducing a clean bill that will not only clearly reflect the intent of the peanut provisions that I have discussed, but will also correct various typographical and technical errors that appear in H.R. 2000, as printed. The clean bill, together with H.R. 2000, will thus accurately fulfill the objective that I have envisioned.

A MESSAGE TO THE PRESIDENT ON THE HANDICAPPED

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, this morning I sent the following letter to President Reagan:

DEAR MR. PRESIDENT: Your Education Secretary, William Bennett, is doing his best to fill Jim Watt's shoes as the most fanatical of your appointees.

As Senator Weicker revealed yesterday, he has appointed someone to "set the tone for the department" whose views on the handicapped are so outrageous they defy explanation.

This appointee, Eileen Gardner, has written that handicapped persons are themselves responsible for their conditions. They "summoned" and "created" their handicaps, she believes, and they "falsely assume that the lottery of life has penalized them at random." As a result, the handicapped become "ineffective malcontents."

Secretary Bennett contends that these beliefs are "respected" religious doctrine. I don't know what church he goes to, but I doubt seriously that America's 25,000 disabled veterans "respect" these beliefs. And neither do the two million Americans who, like myself, have epilepsy, or the 33 million who have some other type of handicap.

As one of her so-called "malcontents," I find these beliefs totally unacceptable, and as President of all Americans, including the handicapped, I call on you to withdraw her appointment.

Does this country really need or want someone in charge of handicapped programs who believes that children born with Downs Syndrome or born blind are to blame for their own conditions and therefore not worthy of any help from society?

To make matters worse, Ms. Gardner says the handicapped are selfish individuals because they don't appreciate the hardship they inflict on the "general population." Mr. President, the handicapped have enough problems; we don't need someone else who believes that life is simply a case of the haves vs. the have nots.

Sincerely,

TONY COELHO,
Member of Congress.

SENSE-OF-CONGRESS RESOLUTION CONDEMNING SOVIETS PULLED FROM CALENDAR

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, on March 24 an American soldier, Maj. Arthur D. Nicholson, Jr., was cruelly murdered by a Soviet guard in Germany. After a sufficient time had passed for us to investigate the incident and find out the conditions, I introduced a resolution in the House to condemn the Soviets for that cruel murder. That resolution obtained 66 cosponsors, including 18 members of the Committee on Foreign Affairs, made its way through the committee, and was brought to the floor of the House on the calendar for yesterday.

Early yesterday morning we were informed, without any prior notification, that the resolution had been pulled. After an entire day of investigation and inquiry, we were finally told, and I read today in the Washington Times, that the bill was pulled not by a Member of Congress but, without any congressional authorization, by a Mr. Brady, a staff member of the Committee on Foreign Affairs.

Mr. Speaker, I find this unacceptable. A staff member is not authorized to pull a bill off the calendar without any authorization or even any consultation with a Member of Congress. This cannot be accepted. Too much time had already passed. The Soviets' cruel punishment of killing a man for being, as Mr. Gorbachev has said, "in the wrong place" is something we must speak to.

The SPEAKER. The time of the gentleman from Texas [Mr. ARMEY] has expired.

□ 1210

SOVIET RECIPROCITY

(Mr. HUTTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUTTO. Mr. Speaker, today I am introducing a House joint resolution that directs the President to ensure that Soviet Union Government personnel in the United States are subject to the same requirements that the United States personnel in the Soviet Union are subject to.

Specifically, my resolution will require that conditions imposed upon U.S. Government personnel in the Soviet Union; that is, status, privileges, immunities, accommodations, travel, and facilities and so forth, of employees of the U.S. Government, will be imposed upon Soviet Union Government personnel in the United States.

According to the FBI, 40 percent of Soviet Union Government personnel in the United States are well-trained professional employees of the KGB and Soviet military intelligence officers of the GRU. Furthermore, the United States does not have an elaborate complex in the Soviet Union such as the Soviet Union has in the United States at Glen Cove, Long Island. The U.S. Government personnel in the Soviet Union are not allowed to purposefully travel where they choose while the Soviet Union Government personnel in the United States can travel virtually any where they desire—unrestrained.

This joint resolution would also create a general balance in terms of the numbers of officials and employees which is needed between our Nation's representation in the Soviet Union, and their representation here—we can no longer permit the Soviets to take advantage of this current imbalance. We must act now to inhibit furtherance of this situation.

I believe this resolution is long overdue and fully justified. I am sure this resolution has very strong support in the Senate, as a similar effort was initiated by Senators Huddleston and Goldwater during the 98th Congress.

LET JUSTICE BE DONE

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, please let justice be done. Seat Rick McIntyre.

Mr. Speaker, I have just come from a very small and very sad rally on the west front steps of our Capitol where about 120 Americans or future Americans, all of them former citizens of the Khmer Republic of Cambodia, are trying to remind this Congress what happened this week 10 years ago.

During April of 1975 this Congress of the United States, finally and tragically cut off all aid to Cambodia, both military and economic, and the almost immediate result was what we now call the killing fields, the dreaded and predicted blood bath the autogenocide, where a mass murderer named Pol Pot and his Communist followers known as the Khmer Rouge, slaughtered over 1½ million human beings, maybe 2½ million souls, possibly as high as 3 million men, women, children and babies.

What a legacy of horror for those who were here in 1975. If you were here, how did you vote?

There are only 155 Members left in this body who served during that April week of 1975. Two hundred and eighty of us have been elected subsequently. I do not know whether we are going to replay the history of betrayal in the coming days on the Communist contagion that is temporarily contained in the southern area of North America known as Central America, or if we are going to, as George Santayana warned, "Ignore history and thereby be cursed to relive it."

At least three of the nine Managua commandantes refer to themselves as Communists. By the way, Eden Pastora told me that not one of those nine fought in the revolution against Samoza. Not one heard a short fired except in their earlier bank robbing days.

Thus, henceforth in the debate on resistance funding for clarity, I will no longer refer to the Communist leadership in Managua as Sandinistas but as Communists. The true Sandinistas are in the hills or visiting our offices in the person of Eden Pastore, and others, talking about the betrayal of their evolution which overthrew the oligara Samoza.

Let us not have communism spread in our hemisphere and curse more people to relive the famine if not the killing fields of Cambodia. Never again. Eight hundred and sixty priests and nuns in Nicaragua support Pope John Paul II and their 9 bishops. Only 52—52—here that, only 52 support the Communists. Are you listening, U.S. bishops?

MATCHED SHEETS FOR YOUR FUTON

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, we hear reports of how the Japanese, try as they might, just can't seem to find anything "Made in America" that they'd like to buy.

The Japanese bureaucracy recently offered some suggestions. How about a matched sheet and pillowcase, fitted for American mattresses and pillows? Never mind that the Japanese have the wrong-sized mattresses. How about a beef thermometer? Never mind that the Japanese seldom buy beef—largely because of import restrictions.

I sympathize. I recently put together a list of Japanese goods that Americans might like to buy. How about matched sheets for a "futon"—the traditional Japanese bed? How about special sushi tongs?

Perhaps we should wait to see how these Japanese imports sell before allowing Japan to sell us any cars or cameras or television sets.

Let me make a standing offer to the Japanese bureaucracy. Come to my Illinois district. Drop in at Lord & Taylor or Marshall Fields or Sears. Just maybe you'll see a few American goods you'd like to buy.

REAGAN'S 1984 PLATFORM: I PROMISE TO FORGET

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, it appears that President Reagan's 1984 platform could be summarized by saying: "I promise to forget."

This week the President said that he believes there are "very few people alive who remember World War II." That is not exactly someone that I would trust to protect the Social Security system, or anything else for that matter.

Well, I am alive and I remember last October when President Reagan promised that he would "absolutely battle against any suggestion of reducing" Social Security.

Well, the trumpet has sounded, the battle is beginning, and President Reagan is nowhere to be found. In fact, it appears he has suited up in his Teflon coat and defected to the other side.

Six months after vowing to protect Social Security he switched sides and must believe that very few of us will remember that 1984 promise.

Anyway, nothing ever seems to stick to him, so I guess it will not hurt.

I think a government has always been measured by how it treats people in the sunset of their lives or in the shadows of their lives. This President is getting very low marks on that measurement.

THE BENEFITS OF SPACE RESEARCH TECHNOLOGY TRANSFER

(Mr. NELSON of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELSON of Florida. Mr. Speaker, I have the privilege of being the chairman of the Space Subcommittee and it is my privilege to share that space research is now having a technology transfer that could revolutionize the medical operating room. Research recently at the Jet Propulsion Laboratory in California, a NASA

center, has developed a laser which may be successful in eliminating plaque from inside human arteries. This nonsurgical procedure could replace some bypass operations.

Additionally, Johns Hopkins as a result of the microminiaturization of computers due to space research, America's medical centers are experimenting with such a microcomputer to be implanted in the human body to release calculated doses of medicine for certain diseases.

This particular modern miracle of medicine, is the result of research and development from America's space program.

WHERE IS THE DEFICIT REDUCTION PROPOSAL OF THE DEMOCRATS?

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LATTA. Mr. Speaker, Monday was April 15 and by statute the day for reporting of the budget resolution for fiscal year 1986 from our Budget Committee. Only once before in the 10-year history of the Budget Act has the April 15 reporting date not been met. With the country facing the prospect of a fiscal year 1986 budget deficit of $230 billion, would you not have thought that the Democrat majority in this House, which incidentally has been constantly criticizing the President's budget reduction proposal, would have come forward with its own deficit reduction plan before the April 15 deadline?

□ 1220

I know our chairman has stated publicly not once but repeatedly that he wants to see at least a $50 billion reduction in the fiscal year 1986 deficit. Mr. Speaker, why not let him come forward with the Democratic Party's plan now? The people are expecting us to go forward with a deficit reduction plan during this year. Let us unveil the Democrat deficit reduction plan so the people can make a determination as to which plan they prefer, or maybe, just maybe they would prefer a combination of both.

In any event, since they know the need for reductions, they should have an opportunity to see our Democrat friends' plan and how they would make reductions to a $230 billion anticipated deficit.

CENTRAL AMERICA: DOSE OF REALITY—NO. 1

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, the first paragraph of the War Powers Act reads:

It is the purpose of this act to fulfill the intent of the framers of the Constitution of the United States and insure that the collective judgment of both the Congress and the President will apply to the introduction of United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, and to the continued use of such forces in hostilities or in such situations.

We are in a clandestine war in Central America—a war being conducted by our President but never authorized by the Congress—and well on our way to being in a open war there, as well. This is precisely the situation contemplated by the War Powers Act.

First, the act refers to "United States Armed Forces." Do we have U.S. Armed Forces in Central America? Of course we do—we have numerous CIA personnel and military advisers, tens of thousands of uniformed personnel from every branch of the U.S. military, and even National Guardsmen in Central America. If these are not U.S. forces, then who are?

Second, are our Armed Forces present in all the countries of Central America? Of course they are. And are there hostilities—defined by Webster as overt acts of war—in Central America? Of course there are. Do a civil war in Nicaragua and a civil war in El Salvador constitute hostilities? Of course they do—these are wars, complete with soldiers and tanks and guns, where people die.

The War Powers Act is law, and it is a law that embodies the constitutional mandate that the Congress—and only the Congress—declares war—and only when the President together with the Congress decides such action is necessary.

The President evaded the War Powers Act in Lebanon. He violated the act in Grenada. And he's violating the act now. He has acted with impunity, and Congress has supinely acquiesced.

The result in Central America can only be tragic.

HUMAN RIGHTS ABUSERS IN NICARAGUA

(Mr. WEBER asked and was given permission to address the House for 1 minute.)

Mr. WEBER. Mr. Speaker, recently the gentleman from California, Mr. BOB DORNAN, and I had an opportunity to visit Nicaragua. We had a very interesting and lengthy interview with Archbishop Obando y Bravo of Nicaragua. I will later on in a special order be inserting the entire text of that interview with the archbishop in the RECORD, but I would just like to read a very brief response of the archbishop on the question of human rights abuses by the Contras.

I asked the archbishop, "What about the members of the resistance, the Contras?"

The archbishop's response, word for word, was:

I don't have any direct relationship with them at a personal level. They are in the mountains of Matagalpa, Jinoteca, and the Atlantic coast. The reports sent to me by the bishops who work there show that they have not received any problems from them, none.

I asked, as a followup,

Less problems than priests and bishops have had from the government?

The archbishop's response:

The reports that I have received from the priests of those areas is that they have not had any problems with them.

Mr. Speaker, the human rights abusers in Nicaragua are not the Contras, they are the Communist government in Managua.

AMERICAN MILITARY IN NICARAGUA

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, how right you were. When the President submitted his recent proposal to aid the Nicaraguan counterrevolutionaries, you said Mr. Reagan would not be satisfied until he had Americans fighting there.

This morning's New York Times carries a front page story which validates that prediction. According to the Times, a report labeled "top secret" and sent to two committees of the Congress by the President yesterday says that while the administration had for now ruled out "direct application of United States military force," it warned that this course "must realistically be recognized as an eventual option given our stakes in the region if other policy alternatives fail."

Now, General Gorman has already said that the Contras cannot win it on their own, so if the President gets his way American troops are coming. That spells it out, Mr. Speaker.

But why is it that that report is secret? Why is the President practicing this deception, calling his proposal as one of "humanitarian" assistance?

I'll tell you why.

Because he knows that the only way he can get the American people to go along with his proposal is to trick them into it.

Congress should not hesitate one moment in rejecting the President's outrageous proposal.

SPEAKER O'NEILL SHOULD REVEAL IMPORTANT INSIGHTS FROM HIS MEETING WITH GORBACHEV

(Mr. GINGRICH asked and was given permission to address the House for 1 minute.)

Mr. GINGRICH. Mr. Speaker, the Washington Times this morning has a very disturbing quote relating to our own scheduling here in the House. It quotes you as saying that the subject of the shooting of Major Nicholson last month in East Germany came up during a 4-hour session last week with Gorbachev, and it quotes you as saying, "Gorbachev was very distinct in accusing our man of being at the wrong place—and taking no blame whatsoever."

Yesterday we were to have voted on a resolution condemning the Soviet Union for killing an American officer. That resolution was pulled.

The same day that resolution was pulled you moved the date for voting on freedom fighter aid up by 1 week.

If you learned anything in your meeting with Gorbachev which you think this House should know so this House can understand why you are scheduling in the way which withdraws the condemnation of the Soviet Union and accelerates an effort on your part to defeat aid for the freedom fighters, it would be helpful to this House if you would report in public on what it is you learned from Mr. Gorbachev.

NATIONAL LOTTERY/DEFICIT REDUCTION ACT OF 1985

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, today I offer part 2 of my "painless deficit reduction package." Yesterday, I offered a 6-month tax amnesty proposal which could produce $20 billion in revenues.

Today I am introducing the National Lottery/Deficit Reduction Act of 1985. Under the bill, persons aged 18 and over would be able to buy tickets at $1 each. The lottery would award five prizes a month, for each of 12 separate lotteries held each year; 75 percent of all revenues would be earmarked to reduce the deficit.

How much would be raised? No one is totally certain. However, in the 18 States that have lotteries, revenues exceed $5 billion. In the most successful States, per capita revenue is over $1 a week. Nationally, that could produce revenues of over $12 billion.

The real answer rests with how many people play. If every person eligible bought nine $1 tickets a month for a year we would slash our deficit by over $18 billion. The more tickets purchased the more would be raised.

I believe a national lottery is an idea whose time has come, especially if it can offer us a way to reduce our deficit without resorting to tax increases or Draconian cuts in spending.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1612

Mr. ENGLISH. Mr. Speaker, I ask unanimous consent that the name of the gentleman from Arkansas [Mr. HAMMERSCHMIDT] be removed from the list of cosponsors for H.R. 1612.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

NICARAGUAN ALLIES

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, a West German linked to the Baader-Meinhof gang is a counterintelligence officer in the Nicaraguan Army. Another commands an artillery battalion. Five Italians, all former Red Brigade leaders, serve as noncommissioned officers in the Nicaraguan Army. A Basque ETA terrorist awaits trial in Costa Rica on charges of attempting to assassinate Contra commander Eden Pastora. Both Spain and Italy have formally protested the sanctuary Nicaragua gives to several dozen European leftist militants.

Before coming to power in 1979, Sandinistas trained and fought beside experienced guerrillas in Central America and the Middle East. Relations with Cuba and the PLO were especially close. Today, "proletarian internationalism" deems that the governors of Nicaragua make returns for services rendered.

The Swiss Review of World Affairs has called Nicaragua the PLO's "most important base on the Latin American mainland." Ties to Colonel Qadhafi are strong, as infusions of Libyan money and armaments have proven. The Sandinistas are linked to terrorists in Chile, Colombia, El Salvador, and other Latin countries.

Americans cannot afford not to notice. According to the FBI, fully two-thirds of the terrorist attacks in this country in 1983 were linked to Latin America. Furthermore, compelling evidence links Sandinista officials to narcotics sales in U.S. black markets.

As debate about our Central American policies continues, we should not forget the Nicaraguan hand in the international terror network.

NO WONDER SOME OF US GET UPSET ABOUT THE WAY THINGS GET DONE IN THIS HOUSE

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, people sometimes wonder why some of us get upset from time to time about the way things get done in this House. Well, there are two headlines in this morning's Washington Times that help tell the story. One, the top headline says "O'NEILL tips scales against aid to the Contras." It seems to me that the pro-Communist government in Nicaragua must be awfully pleased with that scheduling.

Another headline says "Denouncing of Soviet slaying abruptly derailed in the House." The Communist government in Moscow must be awfully pleased by that kind of scheduling.

Mr. Speaker, that is why we get upset.

DEMOCRATS ARE GETTING AWAY FROM THE POLITICAL CENTER

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, the Democratic Party says it wants to move back into the center of American politics. The opportunity is at hand in the upcoming vote on Nicaragua.

Will Democratic leadership pull the rug out from under those fighting totalitarian communism in Central America and thus absorb the responsibility for the firm establishment of a new Soviet base on the mainland of this hemisphere? Or will they eschew party politics and allow themselves and their members to vote their consciences on this crucial issue?

The responsibility for the full communization of Nicaragua and all that means for the future of this country will be laid squarely at the doorstep of the national Democratic leadership. This will have a chilling impact on the more conservative and moderate members of the Democratic Party who have been seeking to move their party further into the center. Nowhere will this be truer than in the South, in the West, and in the Southwest, the scene of national debacles at the Presidential level in recent years for the Democrats.

LUNDI SENG, CAMBODIAN REFUGEE, WINS THIRD PLACE IN SPELLING BEE

(Mr. HENRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENRY. Mr. Speaker, perhaps it is those of us who have difficulty with correct spellings and pronounciations of words who most admire the annual winners of our local spelling bee competitions. Recently, the greater Grand Rapids area spelling bee finals were completed with a most unusual series of circumstances.

As the finalists competed, the judges exhausted the entire list of challenge words for the competition. Among the tongue-twisters were the words "cinerous," "amaranthine," "quixotism," "schadenfreude," "thanatophidia," and "onomatopoeia." Still, the finalists would not capitulate!

When all was said and done, the final winner was an 11-year-old fifth-grader from Seymour Christian School by the name of Laurie Admiraal, who will be coming to Washington, DC, to represent our community in the national finals this June. The winning word, by the way, was "densitometer"—a word now well-known to Grand Rapids area schoolchildren.

In second place was Robert Tyson, a 14-year-old eighth-grader at City Middle-High School. And in third place was Lundi Seng, a 13-year-old Cambodian refugee. Lundi is an eighth-grader at Millbrook Christian School, and has lived in this country only 4 years. She saw her parents killed by the Communists in Viet Nam, and fled to our country knowing not a single word of English. Now she can lay claim, along with Larie Admiraal and Robert Tyson, of being a better speller than most of us in this body!

THROW THIS HOUSE OVERBOARD

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Mr. Speaker, I rise to bring to the attention of the House a letter that I have here that was sent by Patti Combs from Bedford, IN. This is the Eighth District of Indiana. Now, the letter has a teabag attached. She says in one clear and precise sentence: "I resent having taxation but no representation." And she has two exclamation marks there.

Mr. Speaker, it is time that the House get with it, exercise the true justice for the people of the Eighth District of Indiana, and seat the certified winner of that race, Rick McIntyre.

Mr. Speaker, I do not blame the people, including Patti Combs, of the Eighth District of Indiana for resenting what this House has done. Our founders had a Boston tea party; and I think probably the people from the Eighth District, if we do not go ahead and do what we are supposed to do, are going to come down and throw this House overboard.

I thank the Speaker.

REQUEST FOR PARLIAMENTARY INQUIRY

Mr. ARMEY. Mr. Speaker, I rise to a point of parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ARMEY. Mr. Speaker, yesterday House Resolution 125 was pulled from the calendar, I am told, by a staff member of the committee. Mr. Speaker, my question is: Is this acceptable procedure in this House for a staff member to pull legislation from the calendar?

The SPEAKER. No. 1, the gentleman has not stated a parliamentary inquiry. But, No. 2, the Chair would be willing to answer the question.

The suspension list it is the prerogative of the Speaker of the House and of the majority party; two of the powers of the Speaker are recognition and the power of scheduling. It is the normal procedure in this House when a committee wants to get a bill on the suspension list, as was requested, that it usually comes out of a committee unanimously and a letter comes from the chairman. That is why it is put on the list. It is the understanding that meetings were taking place between those representing the Russian Army and the U.S. Army over the facts of what happened.

□ 1240

Nobody can condone, and the intelligence reports of the United States which I have had the privilege of looking at certainly condemn, and we all condemn the actions that took place of the Russian soldier as he literally murdered our American.

The agreement has been that there are 12 enclaves in which we, as Americans, in the Russian zone are entitled to go into. I guess it is for verification. They have 12 zones in which they come into in West Germany for the most part that is protected by the Americans.

On a unilateral basis, the Americans never shot at Russians observers. On the Russian side, it is our understanding that according to their policy they were supposed to fire a warning shot, which our intelligence says never happened.

The negotiation is going on or has just been completed, I do not know which, to see if there could be an agreement between both that neither would use weapons or arms, and particularly the Russians, as we had unilaterally not been using them to detain Russians.

In view of that, it was the right of the committee to call and ask that the matter be pulled. So at the request of the committee, the matter was removed from the suspension list as of yesterday.

APPOINTMENT AS MEMBERS OF THE U.S. HOLOCAUST MEMORIAL COUNCIL

The SPEAKER. Pursuant to the provisions of Public Law 96-388, as amended by Public Law 97-84, the Chair appoints as members of the U.S. Holocaust Memorial Council the following Members on the part of the House:

Mr. YATES of Illinois;
Mr. LEHMAN of Florida;
Mr. SOLARZ of New York;
Mr. GARCIA of New York; and
Mr. GREEN of New York.

PROVIDING FOR CONSIDERATION OF H.R. 1210, NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT FOR FISCAL YEAR 1986

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 129 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 129

Resolved, That at anytime after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1210) to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of clause 2(l)(6) of rule XI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. [Mr. MURTHA]. The gentleman is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I

yield myself such time as I may consume.

Mr. Speaker, House Resolution 129 is an open rule providing for the consideration of H.R. 1210, the National Science Foundation Authorization Act for fiscal year 1986. The rule provides for 1 hour of general debate to be divided equally and controlled by the chairman and ranking minority member of the Committee on Science and Technology and makes in order a science committee amendment in the nature of a substitute which is now printed in the bill. This amendment will be considered as original text for purposes of amendment under the 5-minute rule and each section shall be considered as having been read.

In addition, House Resolution 129 facilitates consideration of the bill by waiving points of order against the bill for violation of the 3-day layover rule, clause 2(L)(6) of rule XI. Finally, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, H.R. 1210 authorizes $1.6 billion for the National Science Foundation for fiscal year 1986. The authorization level represents an increase of $97.8 million over the amount appropriated for fiscal year 1985, and is virtually the same as the administration's request.

The National Science Foundation is the Government's major agency which provides support for basic research in the physical, biological and social sciences. Reflecting our Nation's continuing commitment to scientific development, the bill authorizes $1.4 billion for research and related activities, and provides $82 million for graduate research grants in the fields of science and engineering.

Mr. Speaker, I urge my colleagues to adopt the rule so that we may proceed to the consideration of this legislation.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is an open rule. Although there is legitimate concern over waiving the 3-day rule, I urge adoption of the rule to expedite the business of the House.

This reauthorization for the National Science Foundation is a routine bill but also an important bill. H.R. 1210 authorizes $1.6 billion in fiscal year 1986 as requested by the administration. This is $98 million more than the fiscal year 1985 appropriation.

There is at least one provision of the bill of concern to the administration. Under present law the President appoints four of the National Science Foundation's Assistant Directors. This bill changes that procedure by giving the Foundation's Director the authority to appoint all the Assistant Directors. Since this is an open rule, however, this matter can be debated fully and voted up or down when the bill is opened for amendment under the 5-minute rule. The will of the House will prevail.

Mr. Speaker, I have been a severe critic of the National Science Foundation in the past because of the asinine grant awards that were handed out. I don't believe for a minute that we have totally stopped them. But I do know that we have made some genuine progress over the past several years in halting this terrible waste of the taxpayers' money.

I want to congratulate the members of the Committee on Science and Technology for helping in this effort to stop these asinine grants. They have done a good job and they have saved money from being spent on useless studies. We have pulled in the reins on these absurd grants but we need to keep a sharp eye on this so that these ridiculous research grants don't reappear.

Mr. Speaker, I urge adoption of this open rule so the House can proceed to the consideration of this bill which is of importance to our Nation's science community and our national scientific research program.

Mr. Speaker, I have no requests for time.

Mr. BEILENSON. I have no further requests for time either, Mr. Speaker, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the bill, H.R. 1210.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES FOR 1984—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

(For message, see proceedings of the Senate of today, Wednesday, April 17, 1985.)

NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT FOR FISCAL YEAR 1986

The SPEAKER pro tempore. Pursuant to House Resolution 129 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1210.

□ 1250

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1210) to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida [Mr. FUQUA] will be recognized for 30 minutes and the gentleman from New Mexico [Mr. LUJAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, the National Science Foundation authorization for fiscal year 1986, H.R. 1210, provides a total authorization of $1.6 billion. These funds are a critical investment in our Nation's future and represent our continued commitment to expanding the frontiers of science. H.R. 1210, as reported by the Committee on Science and Technology, enjoys strong bipartisan support of the committee members and I urge all of my colleagues to support it.

The total authorization of $1.6 billion includes $1.39 billion for research and related activities, $82 million for science and engineering education, $120.1 million for Antarctic research, and $1 million for special foreign currency. With the exception of the science and engineering education directorate, H.R. 1210 is identical to the President's request. In this area, H.R. 1210 indicates $82 million. It is the committee's stated intention that $50.5 million is for new obligational authority and $31.5 million are carryover funds from fiscal year 1985 to fiscal year 1986. Therefore, the new obligational authority contained in H.R. 1210 is $1.57 billion; the same amount as the President's proposed budget for NSF.

H.R. 1210 also provides continued support for recent initiatives especially for advanced scientific computing—supercomputers—and engineering research facilities. The Foundation has announced the selection of four supercomputers centers. These centers will utilize the most sophisticated computing instrumentation available and will offer access to large-scale computing facilities to researchers in all fields. The engineering research centers initi-

ated in fiscal year 1985 bring together researchers from universities and industry and will receive sustained support in H.R. 1210. Both the computer centers and the engineering centers represent Government, industry, and academic partnerships in research and cost sharing, thus effectively enhancing the Federal investment.

H.R. 1210 makes several changes in the National Science Foundation Act of 1950. The most prominent of these changes in the elevation of fundamental engineering research to a coequal status with basic scientific research in the Foundation. This change was included in the authorization bill (H.R. 4974) passed by the Congress last year.

Other important features of the bill include: First, emphasis on basic scientific research to better understand the phenomena contributing to acid rain; second, a study of the research facilities needs of colleges and universities; third, a requirement that appropriate scientific review be conducted before the closing of a national facility; and fourth, a requirement that the NSF Director report to the Congress on the applicable recommendations of the Grace Commission and the OMB report entitled "Management of the U.S. Government in 1986."

Mr. Chairman, H.R. 1210 is a well balanced and reasonable proposal. It has strong bipartisan support of the members of the Committee on Science and Technology. I urge my colleagues to support the bill as reported by the committee.

Mr. LUJAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 1210, the fiscal year 1986 authorization for the National Science Foundation, authorizes $1.6 billion for NSF, an amount identical to the President's request and an increase of $66.5 million over the fiscal year 1985 appropriation level.

Mr. Chairman, this bill passed the Committee on Science and Technology overwhelmingly and represents a bipartisan effort. I feel the committee has every right to be proud of this bill because the amount authorized represents a modest 4-percent increase over fiscal year 1985, and it reaffirms this Nation's commitment to science education.

This budget addresses the serious problems facing this country because of a decline in science and engineering education, due mainly to a severe shortage of qualified mathematics and science teachers and a dwindling number of qualified faculty members at colleges and universities. The committee has made it clear that the fiscal year 1986 authorization for science and engineering education should be used fully.

We understand that a freeze amendment, similar to the one which passed during consideration of the NASA authorization, will be offered during today's debate. I am ready to abide by the will of this body.

I would stress, as we go into this debate, that this bill is a bipartisan effort of the committee and represents our best efforts to accommodate the needs of the agency, the requests of the administration and the realities of our economy.

I urge this body to approve H.R. 1210, the National Science Foundation bill.

Mr. FUQUA. Mr. Chairman, I am very delighted to yield 8 minutes to the distinguished gentleman from Pennsylvania [Mr. WALGREN], the chairman of the subcommittee and one who has played such an important role in crafting this piece of legislation for us.

Mr. WALGREN. I thank the chairman for yielding. At the outset, I want to stress again the appreciation that I have personally for the contributions that have been made by other Members on all levels of this subcommittee and committee, particularly the chairman of the full committee, the gentleman from Florida [Mr. FUQUA], and the ranking minority member of the full committee, the gentleman from New Mexico [Mr. LUJAN], who have given special attention to the National Science Foundation in the process of our hearings and in the process of our marking up. Particular recognition should go to the ranking minority member on the subcommittee, the gentleman from New York [Mr. BOEHLERT] is for active participation in this process. He deserves credit for much that is reflected in this bill.

Science is bipartisan. It has no philosophical bent. The bill that we bring before you today from the Science and Technology Committee reflects the basic underlying recognition of the national interest we have in science from both sides of the aisle.

By its charter, the Congress placed responsibility for the health and progress of U.S. science in the National Science Foundation. Given the challenges that we face from abroad and the rapid advancement in knowledge and science, no part of our Federal Government has a greater role to play, and must fulfill its role with more effectiveness if our national interest is to be protected than the National Science Foundation.

I would hope that the Members of the House of Representatives will respect the importance and weight that both the committee and the administration have given this Foundation in their budget to offset inflation of 4 percent.

Overall, this bill authorizes a total of $1.6 billion for the next fiscal year. Of this amount, $1.39 billion is for research and related activities. These amounts are within and identical to the President's request. The only area that exceeds the President's request is in the area of science and engineering education where we essentially provide for the maintenance of the Science and Engineering Education Program at the levels the President requested should there be an adverse disposition of the administration's request to carry over from 1985 to 1986.

So this authorization is on all fours with that recommended by the administration in a most important area for our national interests.

As reported by the committee, we require no less than $1 million be committed for activities related to the exploration of ethics and values in science and technology. We essentially would maintain what was a $2 million effort last year on a million dollar level because of the importance that ethics and values in the area of science have. When you consider that we are spending some $50 billion of Government money on basic research, hustling pell mell into a future dominated by science and technology, certainly $1 million would be well spent to explore dilemnor of ethics and values that science poses for our society. So we have a floor or a requirement in this authorization that, of the funds expended in these various research efforts, $1 million be reserved for that function.

We also accept only part of the reduction proposed by the administration for policy research and analysis, an area that is central to developing any wisdom in guiding the direction of our programs as a whole. Of particular value in this area in the past has been consideration given to risk assessment, an area of fundamental importance to the public. Policy research and analysis was reduced by $2 million in the administration budget. We add $1 million back and ask that $3 million of the overall be attributed to this function.

We also have an emphasis in the bill on acid rain, the importance of which we clearly all recognize. The bill also requires a study of the deficiency of research facilities for colleges and universities, an area we are only beginning to appreciate, but one that will require vast commitment in the future.

□ 1300

The bill proposes several changes in the basic charter for the National Science Foundation. The most significant of these is broadening the mandate to include responsibility for the health of fundamental engineering research. This change comes out of the widespread recognition in the scientific community that the distinction between engineering and science, at least on the fundamental research level, is now blurred beyond recognition, and that if we are to have a broad-based scientific capability it must include fostering fundamental engineering re-

search. So we include parallel references to science and engineering throughout the charter so that the Science Foundation can play the most constructive role in that area.

At the same time, we make two other noteworthy changes. One is that we approve a request that the National Science Board be able to delegate greater authority to the Director of the National Science Foundation to approve contracts that the Foundation would enter into. This we do on a trial basis with strict reporting requirements, because we do want the Director of the National Science Foundation to be sensitive to the Board and the Board's judgment, and we want to be sure that the Board is exercising a broad range of oversight function.

Second, we remove the requirement that several of the assistant directorships be appointed by the President. We are faced, in these several years, with vacancies in important positions that have gone on far too long because the White House is not totally focused on the National Science Foundation, and their personnel approval process has suffered from bottlenecks that have resulted in longstanding vacancies.

It is generally believed by almost all those involved in the National Science Foundation on a practical basis that, since the Director and the Deputy Director are already appointees of the President, there is certainly sufficient Presidential control and influence over the National Science Foundation. These are not political jobs that are being disposed of here; their function is not political. It is to follow the merits of the science and encourage the merits of the science. It would seem that these assistant directorships would be in good hands being appointed by the Director and we would not suffer longstanding delays because of a structural requirement.

Mr. Chairman, this is a strong and well-balanced proposal; it sustains growth in several critical areas. The supercomputer area, I would like to underscore because the truth of the matter is that there is little access to supercomputers in our country. The gentleman from New York [Mr. BOEHLERT] will, I am sure, lay out a real horror story where Nobel Prize winning minds have less access to supercomputers than graduate students in Europe.

Supercomputers are the tool which we will use to design the next generation of computers; they are the lynch pin to progress in this area, and we should certainly sustain the limited support that is given on an enhanced basis.

Mr. Chairman, I urge the support of the Members for what is a most critical bill.

Mr. LUJAN. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. BOEHLERT]

Mr. BOEHLERT. Mr. Chairman, as the ranking Republican of the subcommittee of the Committee on Science and Technology which is responsible for moving this legislation, I am pleased to bring before you today a bipartisan request for the reauthorization of the National Science Foundation, 1986 fiscal year.

On March 25, the Science Research and Technology Subcommittee took action on H.R. 1210, the administration's bill introduced as requested. Then on April 3, 1985, the full Science and Technology Committee unanimously reported H.R. 1210 by voice vote.

The bill, H.R. 1210, being considered by the House today, supports the President's request for $1.569 billion in new obligational authority plus a proposed deferral of $31.5 million from fiscal year 1985 to fiscal year 1986. By accepting the administration's overall funding level, the committee recommends minor adjustments within the budget requiring that no less than $1 million be available for the Ethics and Values in Science and Technology Program, and no less than $3 million be available for the Policy Research and Analysis Program.

Several Members have heard and voiced concern over the proposed elimination of the $1 million EVIST Program, as well as PRA which was proposed for a 50-percent reduction. However, the committee did not feel that the Federal deficit situation warranted increases to the proposed budget, and, therefore, we reauthorized these programs from within the existing funds requested. Moreover, we are greatly concerned that any further readjustments to the fiscal year 1986 budget could lead to serious problems within the research and education activities sponsored by NSF.

It is not without constraints that NSF requests a 4.4 percent increase over fiscal year 1985 appropriated levels. In fact, though the budget presents overall positive signs, facility upgrades have been necessarily drawn out, and as I mentioned, a deferral of $31.5 million in education moneys requested. Though NSF's request is roughly $67 million more in new budget authority over fiscal year 1985, this 4.4 percent is doing no more than allowing NSF to have the same purchasing power in fiscal year 1986 than they presently have in fiscal year 1985. Quoting from the CBO estimate, "H.R. 1210 is assessed to have no inflationary effect of prices and costs in the operation of the national economy."

As I have stated, in addition to the deferral, certain facility upgrades have been drawn out—for example:

The very large baseline array, which was proposed for construction in fiscal year 1985, has been delayed twice now and may possibly be faced with further delays due to congressional directives. This initiative has been and continues to be strongly supported by the Science and Technology Committee, and we believe any further delays are unwise.

Also—

The Advanced Supercomputer Division at the National Center for Atmospheric Research in Boulder, CO, will have a longer schedule for its supercomputer upgrade.

We believe there are further insidious consequences of budget alterations and reductions to the various research accounts. It has become increasingly clear to the committee that our national facilities are being squeezed as a result of tight budgets and the demands placed upon research communities to accept freezes in many or all other programs to allow for new initiatives. In lieu of this situation, the committee emphasizes that appropriate scientific review will be conducted before closure of any national facility, including but not necessarily limited to the NSF and the National Science Board.

The committee believes that such facilities are national resources and in many cases involve the participation of other agencies and outside users.

Furthermore, H.R. 1210 requires:

First, that emphasis will be placed on scientific research to support a better understanding of the phenomena contributing to acid rain;

Second, that NSF will conduct a study of the research facilities' needs of universities;

Third, that the Director of NSF will report to Congress on those recommendations pertaining to implementation of the President's Private Sector Survey on Cost Control—Grace Commission Report—and the OMB report "Management of the U.S. Government in 1986"; and

Fourth, that all Assistant Directors be in NSF Senior Executive Branch level appointments rather than Presidential appointments, which four of the seven currently are.

Finally, H.R. 1210 contains administration requested changes in statutory authority:

First, allowing National Science Board meeting announcements and background materials to be sent using alternative delivery services other than registered or certified mail. The committee concurred with this amendment.

Second, to permit the National Science Board to use its discretion in reviewing grants exceeding "$50,000 per year for a period not to exceed 3 years" by delegating that authority to the Director of the Foundation. The

committee reached a compromise on the proposed language.

Third, NSF is seeking an exclusion from the Freedom of Information Act, as the Bureau of Census currently has, which protects proprietary information obtained from industries/companies while in the course of conducted surveys, questionnaires, and similar such studies. The committee accepted this amendment wholeheartedly.

Fourth, NSF submitted the engineering amendment sponsored by Congressmen SKEEN of New Mexico and BROWN of California. The committee concurred.

In spite of the budgetary constraints, NSF is proposing an increase in advanced scientific computing. An increase of $4.7 million over the fiscal year 1985 level for the advanced scientific computing centers; and is promoting further research in computer science and engineering, networking and access time.

As we are all aware, NSF has announced the establishment in fiscal year 1985 or three national supercomputer centers, plus one experimental center. In addition, NSF is vigorously pursuing a fourth center, the impetus which was provided by the transfer of a Cray-1S from NASA to NSF. The subcommittee applauds this effort to work this arrangement within its budgetary levels.

I congratulate NSF for their work in the supercomputer area. It was a program we in the Science Committee initiated discussion of in the 1st session of the 98th Congress and which the House supported in fiscal year 1985. NSF is clearly addressing the needs of the research communities previously excluded from this significantly advanced technology.

I would also like to acknowledge the attention NSF has given to the Arctic Research and Policy Act of 1984. This act was passed by the Science and Technology Committee during the 98th Congress.

To this end, I would like to focus my remarks on the excellent leadership in place at the Foundation. Eric Bloch is to be commended for a very sound proposal. Mr. Bloch has been recognized this year as a recipient of the President's National Technology Medal. The Science and Technology Committee recognizes him for one of the most straightforward and accountable exchanges before a congressional committee in defense of a Federal agency's budget.

Finally, I thank the members of the Science and Technology Committee for an admirable show of bipartisan support.

Mr. Chairman, at the appropriate time, I urge the entire House to support the budget for NSF as proposed by the administration and the Committee on Science and Technology by voting for H.R. 1210.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. BOEHLERT. I yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Chairman, I rise to call the attention of my colleagues to an especially important provision of H.R. 1210, which amends the National Science Foundation Organic Act of 1950 in order to clarify and emphasize the Foundation's responsibility for fundamental engineering research and education. Along with my good friend from California, GEORGE BROWN, I sponsored similar legislation last year, which this body unanimously approved. While I have my problems with other parts of this legislation, I would like to commend the National Science Foundation for including this provision of H.R. 1210, and urge your support.

The purpose of this provision is to more clearly establish the role of the NSF in supporting our Nation's base of research and talent in both science and engineering. While NSF currently operates a healthy engineering program, it does so without the benefit of a well-defined engineering mission. By explicitly recognizing the important role of NSF in supporting fundamental engineering research and education, we will strengthen the ability of the Foundation to address critical national issues.

If our Nation is to remain competitive in world technology markets, we must maintain and improve our base of university research and talent, both of which are essential ingredients for innovation and technological progress. Under the leadership of Erich Bloch and Nam Suh, the National Science Foundation has been making significant gains in meeting engineering research and education needs.

With the passage of an engineering mission change, the contribution of NSF to American excellence in science and engineering will be even greater. By bringing science and engineering closer together in the Federal structure, the overall climate for innovation can only improve.

Mr. FUQUA. Mr. Chairman, I yield 3 minutes to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of this legislation and the subcommittee amendment to freeze the funding levels for fiscal year 1986 to the 1985 funding levels. I realize that this means an authorization request for Astronomical, Atmospheric, Earth and Ocean Sciences that is about $12 million below the original committee markup but still more than $11 million above the fiscal 1985 level. While targeting reductions to certain programs, this freeze takes into consideration priorities based on science research and technology considerations. I want to commend the chairman for addressing fiscal responsibility in a fair and balanced manner.

The very long baseline array is funded under the AAEO programs. This project is one of the great technological breakthroughs of modern science and engineering. The VLBA is a national, and potentially international project. Scientists and institutions from different parts of the United States are involved in the design and construction of VLBA, and astronomers from all over the world will be able to use the facility. The VLBA, at this stage, will involve the construction of 10 antenna and control building sites in different parts of the United States. The data collected by these sights will be gathered and analyzed at an array operations center at the New Mexico Institute of Mining and Technology.

Mr. Chairman, the Association of Universities Inc., under contract with the National Science Foundation, has embarked on a project which have profound implications for our understanding of the universe. The VLBA could measure astronomical positions with incredible accuracy. It will reveal details within district galaxies and help us to gain valuable insights into the nature of the many different kinds of matter in space. It will have very practical applications for the measurement of continental drift, the Earth's rate of rotation, and many other areas that concern Earth as well as astronomical science.

Unfortunately, while the design for this project is already underway, the 1985 funds have been held up twice. The first delay was to last until April 1 and the second on May 15. This has not only slowed down the design process, it has also prevented the commitment of funds for construction of the first site in Pie Town which is in my congressional district. The administration's National Science Foundation budget summary for fiscal year 1986 expresses strong support for the VLBA, including it among the highest priority AAEO programs.

□ 1310

Mr. Chairman, I would like to engage in a colloquy with the distinguished chairman of the committee regarding the VLBA program, if I could.

Mr. FUQUA. I will be glad to answer any question the gentleman has, if the gentleman will yield.

Mr. RICHARDSON. Mr. Chairman, I just wish to make this inquiry of the committee chairman: I understand the committee report contains language expressing support for the VLBA as a high priority among the AAEO programs. I just wanted that substantiated by the distinguished chairman of the committee.

Mr. FUQUA. Mr. Chairman, let me say also that the National Academy of Sciences has identified this project as the highest-priority major new instrument for ground astronomy in the 1980's. We support that concept.

Mr. RICHARDSON. Mr. Chairman, should there be a freeze amendment, I understand that this program would also be a high priority?

Mr. FUQUA. It is the committee's intention that this still remain as a very high priority.

Mr. RICHARDSON. Mr. Chairman, let me seek one further clarification regarding the rumors about the Sacramento Peak Observatory, that it would be closed without proper review of the wisdom of such a termination. I understand that in H.R. 1210, as amended, there is a provision that precludes the closing of Sacramento Peak. Is that correct?

Mr. FUQUA. Mr. Chairman, if the gentleman will yield, it provides that no funds shall be spent toward the closure of a national facility without appropriate scientific review, including a review by the appropriate advisory committee of the National Science Foundation and also committees of the National Science Board. So any decision must be based on scientific review and not just an arbitrary closure.

Mr. RICHARDSON. I thank the committee chairman. I also wish to thank the distinguished subcommittee chairman, the gentleman from Pennsylvania [Mr. WALGREN] for the oversight hearings he held in New Mexico on these programs, and I thank the distinguished chairman, the gentleman from Florida [Mr. FUQUA] for his relentless pursuit of scientific excellence and his leadership on this issue.

Mr. Speaker, I rise in full support of this very important piece of legislation, H.R. 1210.

The CHAIRMAN. The time of the gentleman from New Mexico [Mr. RICHARDSON] has expired.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. ARMEY].

(By unanimous consent, Mr. ARMEY was allowed to speak out of order.)

WITHDRAWAL OF HOUSE RESOLUTION 125 FROM LEGISLATIVE PROGRAM

Mr. ARMEY. Mr. Chairman, yesterday I arrived at my office to be informed that House Resolution 125 had been withdrawn from the calendar. Naturally, I was concerned regarding who had withdrawn the resolution from the calendar, and I and my staff and other Members of Congress and their staffs spent the entire day trying to find out who had withdrawn the resolution from the calendar. We were unable to find any Member of Congress who would admit to having withdrawn the resolution from the calendar, let alone any who even knew in advance that it was going to be done. This was true of all the Members we were able to contact on the committee from which the resolution had come to the floor.

We spent the entire night trying to find out. This morning earlier I raised the question as a point of parliamentary procedure, and I was advised by the Speaker that the committee had requested this. I had been earlier told by a staff member of the committee that he alone had requested that, without any consultation with any member of the committee or any Member of Congress.

My concern is that a staff member would withdraw legislation from the calendar. I do not think that is appropriate procedure.

I would like to have some clarification on this matter, and I would like any Member of Congress who did indeed authorize this staff member to withdraw this legislation to come forward so this matter can be cleared up. I think it is a matter of essential concern to the Members of this Congress regarding who should make these kinds of decisions, staff members or Members of Congress.

Mr. WEBER. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. Yes, I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman for yielding.

Mr. Chairman, I was on the floor when the gentleman made his parliamentary inquiry of the Speaker, and I understood very clearly from the Speaker's response to him that the request came from the committee. Has the gentleman had an opportunity to discuss this matter, for instance, with the chairman of the committee?

Mr. ARMEY. I had a call in to the chairman of the committee, and I have not been able to locate him. However, from all the information we had yesterday, there was not even a suggestion that the chairman of the committee nor any other member of the committee made that authorization. Indeed the staff member told me very distinctly himself that he had done it solely on his own recognizance.

Mr. WEBER. Mr. Chairman, will the gentleman yield further?

Mr. ARMEY. I yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Chairman, I thank the gentleman for yielding, and I also look forward to the resolution of this question because the Speaker was fairly precise in his response to the gentleman's inquiry and made it very clear that the changing of the schedule could only come about as the result of a request from the committee, and obviously the committee is not members of the staff but only Members of Congress. But if the gentleman indicates there are no Members of Congress willing to come forward and indicate they have specifically requested the change in the calendar, then we have a contradiction on our hands that will indeed have to be resolved.

So I commend the gentleman for raising this point, and I look forward to the members of the committee resolving this question.

Mr. ARMEY. Mr. Chairman, I thank the gentleman, and I would like to make one other point.

In repeated efforts yesterday to contact both the Speaker's office and the majority leader's office, we were always referred to this same staff member, and it seems that this is the only person on the Hill that we can find who is willing to accept any responsibility for having withdrawn this resolution. Again I say this is not acceptable. This is the business of the Congress, not the business of the staff.

I thank the Chair.

Mr. LUJAN. Mr. Chairman, I yield 5 minutes to the gentleman from New Hampshire [Mr. GREGG].

Mr. GREGG. Mr. Chairman, I thank the gentleman from New Mexico.

Mr. Chairman, I rise in support of the bill before the House and in support of the fine effort made by the committee in bringing out the National Science Foundation authorization bill this year.

I would like to address one specific element of that National Science Foundation bill and talk about what I hope will be the activities of the National Science Foundation in the area of education. There is, as I understand it, $81.5 million authorized for educational activities under the educational directorate. Of those moneys, about $25 million is authorized or directed toward informal educational activities, and under that category we have what is known as telecommunication educational activities, including the funding of such programs as "3-2-1 Contact" and "Sesame Street" and now a new program which NSF is initiating called "The Brain." I want to commend the National Science Foundation for its initiative in starting up the program called "The Brain," and I want to encourage the NSF staff and those people serving within the educational directorate to move forward aggressively in the use of telecommunications in the education of our children.

In my experience in the field of educating children and as a prior member of this committee, having had the honor to serve on this committee for 4 years, it became fairly apparent to me that what we have available today to educate our children is a substantial amount of materials and information and really excellent programming. But what we have failed to do is to get that material and programming out to the individuals who can benefit from it the most, basically the children. I think we have really failed to aggres-

51-059 O-86-39 (Pt. 6)

sively use to its fullest extent the most incredible communicative facility in the world, television.

When we think about the fact that every home in this country, for all intents and purposes, has a television and that childen in this country spend a massive amount of time in front of that television, it is really a crying shame and a terrible waste of that tremendous facility that we are not inputting the children of this Nation with better opportunities for education. There is really no reason at all why on Saturday morning a child should not have available to him or her the opportunity to turn on a channel which will be as interesting to that child as cartoons and which will be getting across a message or at least a substantive idea which will go a long way toward educating that child in at least math and science to fairly objective disciplines.

Thus I would hope that this committee and also the National Science Foundation will continue the strong work they have initiated since the beginning of 1980 in reestablishing the educational directorate and especially pushing the use of the medium of television in education and especially continuing to proceed with the development of more programs such as "The Brain," "3-2-1 Contact," and "Sesame Street."

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. GREGG. I am happy to yield to the ranking member.

□ 1320

Mr. BOEHLERT. Mr. Chairman, I think the gentleman in the well is much too modest when he congratulates the National Science Foundation for the momentum in this area, because I would tell my colleagues in the House that it has been the gentleman in the well who has been a leader in this effort. I applaud him for that leadership. I could not agree more.

Our youngsters, the children across America, spend a disproportionate share of their time in front of that television set and he would like and I would like and we all should hope for the day when most of that time will be educational time and we use our modern telecommunications capabilities to the maximum advantage to provide the best possible educational opportunities for our young people, particularly in the area of science and engineering.

The gentleman has done an outstanding job, I say to the gentleman from New Hampshire [Mr. GREGG] and I want to publicly applaud the gentleman for that leadership.

Mr. GREGG. Well, I thank the gentleman for his generous comments.

It just seems to me that the National Science Foundation really is in a unique position to be the point on this issue with their talent, ability, and national reputation.

Mr. WALGREN. Mr. Chairman, would the gentleman yield?

Mr. GREGG. I would be happy to yield to the gentleman from Pennsylvania.

Mr. WALGREN. Well, I, too, want to say and recognize the contribution of the gentleman from New Hampshire and his focus on this particular point, not only as a Member of Congress in the committee, but also as someone who has children and hopes that they learn from television, rather than not learn from television.

As the gentleman knows, in response to his interest in the soundness of that idea, we do at least underline in the report that the Science Foundation should be encouraged to develop this avenue with value and it is because of the gentleman in the well and we appreciate it.

The CHAIRMAN. The time of the gentleman from New Hampshire has expired.

Mr. LUJAN. Mr. Speaker, I yield 2 additional minutes to the gentleman.

Mr. GREGG. Mr. Chairman, I just want to reinforce my view that the chairman of this subcommittee has done a superb job in moving and helping the National Science Foundation find its way through this effort. I congratulate the gentleman on the report. I congratulate him on the substance of the bill. I just hope we can keep the ball rolling and I know we will follow the gentleman's leadership.

Mr. WALGREN. We appreciate the gentleman's support and miss the gentleman on the committee.

● Mr. EDGAR. Mr. Chairman, the Nationl Science Foundation fiscal year 1986 budget authorization bill, H.R. 1210, puts this body in a quandary. On the one hand, we want to signal our support for the critical role the Foundation plays in our Nation's research base—a role that has never been so important as it is today. At the same time, however, there is a concern in this body that overrides everything else—a concern that our first priority is to get control of hemorrhaging deficits that have afflicted this Nation over the last 4 years.

I believe that in any other time, H.R. 1210 would sail through this debate unamended, a credit to the oversight functions so ably performed by the Science and Technology Committee. In today's precarious economic climate, however, our duty is clear—we must seek to hold the line on budget increases and push for a freeze on many domestic spending programs. I therefore support the effort to hold fiscal year 1986 budget authority for NSF to the fiscal year 1985 appropriations level.

But I would hasten to add, Mr. Chairman, that we can't have it both ways. For if we are to apply this rationale to a freeze on many portions of our nondefense, domestic spending sector, then we cannot shirk our responsibility and not apply it to certain portions of our defense sector as well.

In this connection I note with not a little consternation that in a time when NSF's budget request is for an increase of 7 percent—the bulk of which is in support for basic research—the DOD's basic research budget request is for an increase of 16 percent. It's about time we start to understand that when we are forced to shortchange efforts such as those of the National Science Foundation because there is no room to maneuver in a budget with a $200 billion deficit, we are shortchanging our national security. For while we may face threats to this security in a hostile international environment, we must not forget that the challenge to our long-run industrial competitiveness is no less a threat to our Nation.

I hope this body keeps this in mind when we begin to look at certain aspects of the Defense Department's research budget which holds support for some gold-plated weapons gimmickry. For the true costs of this gimmickry are the many opportunities we are giving up today in supporting a freeze on the Foundation's budget.●

● Mr. CONTE. Mr. Chairman, when I was going through this legislation, I noticed that there was a specific statutory provision requiring the National Science Foundation to do a study on the causes and effects of acid rain.

I suppose that I have no problems with a study; it will only remove the doubts in the minds of some people on the causes of this major environmental problem. But doing a study on the causes of acid rain is a little like doing a study on the health effects of cigarette smoking. Research is not enough—we know the causes—now is the time to work on solutions.

I do not want this statutory language to serve as a stopgap measure. I do not want the Members of the House to be able to pat themselves on the back today and say that we've dealt with the acid rain problem through this bill. We haven't. We've made a very tentative first step.

All the studies in the world will not change the fact that there are over 200 "dead" lakes in the Adirondacks. It will not change the fact that lakes are dying every day in Massachusetts. It will not change the fact that the Quabbin Reservoir has extremely acidic water.

Let's do the study. Let's remove all doubts from the minds of those who don't want to face this problem. But at the same time, let's move toward concrete solutions. My bill, H.R. 1030, provides those solutions. It gets at the root of the problem by requiring

actual reductions in the amount of sulfur dioxide emissions.

Let me reiterate that I will certainly not oppose this bill. But I want to urge the NSF to actually conduct this study. And I urge the Congress to begin looking at solutions to America's No. 1 environmental problem: Acid rain.●

Mr. FUQUA. Mr. Chairman, does the gentleman from New Mexico have any further requests for time?

Mr. LUJAN. Mr. Chairman, I have no further requests for time.

Mr. FUQUA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. CHAIRMAN. Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Science Foundation Authorization Act for Fiscal Year 1986".

The CHAIRMAN. Are there any amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

SEC. 2. (a) There are authorized to be appropriated to the National Science Foundation, for the fiscal year 1986, the sums set forth in the following categories:

(1) Advanced Scientific Computing, $46,230,000.

(2) Astronomical, Atmospheric, Earth, and Ocean Sciences, $372,170,000.

(3) Biological, Behavioral, and Social Sciences, $272,050,000.

(4) Engineering, $170,070,000.

(5) Mathematical and Physical Sciences, $428,970,000.

(6) Scientific, Technological, and International Affairs, $38,360,000.

(7) Program Development and Management, $69,900,000.

(8) Science and Engineering Education, $82,000,000.

(9) United States Antarctic Program, $120,100,000.

(b) Notwithstanding any other provision of this Act, from the amunts authorized under subsection (a)—

(1) not less than $1,000,000 Shall be available for the ethics and values in science and technology program; and

(2) not less than $3,000,000 shall be available for the Policy Research and Analysis program.

(c) In the obligation, use, and expenditure of the amounts appropriated for Biotic Systems and Resources under the authority provided in subsection (a)(3) and for Atmospheric Sciences under the authority provided in subsection (a)(2), emphasis shall be placed on basic scientific research to support a better understanding of the phenomena that contribute to acid rain.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: At the end of section 2 (page 15, after line 9), add the following new subsection:

(d) Notwithstanding any other provision of this Act, the total of the amounts authorized to be appropriated by this section and section 6 shall not exceed $1,501,792,000.

Mr. WALKER. Mr. Chairman, this amendment is essentially a freeze level amendment. It is similar in nature to the amendment that was offered to the space bill that came before the House just prior to the recess.

Let me first acknowledge the work of the gentleman from Michigan [Mr. PURSELL], the gentleman from Connecticut [Mr. MORRISON], who at the time of the space legislation brought their amendment to the floor, had prepared a similar kind of amendment for the bill today.

My amendment does track the amendment that they had. The reason for my offering it, in all honesty, is I think the committee at this point is in recognition of the fact that this is something that the House wants to do and we need to begin to bring our internal adjustments to what was apparently the House position.

I do want to make the point that we did come out of the committee at the Presidential level, at the level of request in the NSF bill, and that was a conscious attempt to try to stick with budgetary practice and priority, a priority set by the President in order to try to move science programs ahead, despite his attempts to effect an overall freeze on spending; but it is apparent that the House wants to move probably a little further than that and in the case of these amendments say that we want a 1985 appropriation level for the authorization of this particular bill. That is effectively what this amendment would achieve.

It says that we will not spend more than $1,500,792,000 in the upcoming fiscal year 1986.

I would urge the House to adopt this kind of a freeze approach to build upon what we did in the first authorization bill that came on the House floor, the one that came out of NASA.

Mr. PURSELL. Mr. Chairman, would the gentleman yield?

Mr. WALKER. I am very glad to yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Chairman, I appreciate the committee adjusting to the new historical bipartisan effort led by Congressman MORRISON, myself and others, to go back to the 1985 freeze budget level.

As I understand, correct me if I am wrong, I say to the gentleman from Pennsylvania, the original proposal was about 6 percent over last year, if that is correct.

Mr. WALKER. The gentleman is correct. As I say, that reflected an attempt by the committee to stay within the level that was requested by the administration, but the administration did have an increased priority for science within the budget, so therefore had increased that above the 1985 spending level.

Mr. PURSELL. Therefore, we take it back 6 percent to comply with the 1985 budget level, which would be consistent with what we did with NASA last Wednesday evening.

So I want to congratulate the committee, the chairman, the gentleman from Florida, and our great chairman, the gentleman from Albuquerque, NM, MANNY LUJAN, and the gentleman in the well for making this adjustment and complying with our precedent here, because it is historical that if we can be consistent, and I know the gentleman in the well has been consistent over the years, to look at fiscal integrity in trying to achieve a balanced budget goal.

So we have been successful with NASA and we can be successful today in the adoption of this amendment. I think we can carry that to the Bureau of Standards legislation tomorrow in which I have an amendment filed with the Clerk to do the same thing in principle, so that we can get a balanced budget and achieve at least a $38 to $50 billion reduction in the deficit this year.

I congratulate the committee. I served on the Committee on Science and Technology some years ago. It is an outstanding committee.

This way it allows the committee to reprogram those dollars into the functional category within the bill itself and I think that is appropriate, rather than somebody on the floor arbitrarily jumping in and trying to change the priorities within the National Science Foundation.

Mr. WALKER. Well, I want to thank the gentleman for his statement.

Let me say to the gentleman that I would hope that as bills come forth in the future that we are also going to try where the President has requested lower levels that we will attempt to come in at those levels of the Presidential budget as well, that we are not talking about a freeze of priorities at the 1985 level, because the freeze of priorities at the 1985 level still produces massive deficits.

It seems to me that if we are willing to cut back where that seems appropriate, then we ought to also be willing to cut back in some of those areas where the Presidential budget is below what the freeze would take us. That way, we really do begin to have some control of the deficit.

I would hope that we are going to look in that direction, too.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. PURSELL. Mr. Speaker, will the gentleman yield further?

Mr. WALKER. I would be glad to yield to the gentleman from Michigan.

Mr. PURSELL. Mr. Speaker, we will be looking at that on a case-by-case basis as the bills come before the floor.

The question before the public and this Nation is not below spending levels of 1986 or 1985. The question is whether Congress has consistently been spending at a faster rate. Medicare is growing at the rate of 15 percent per year. Medicaid, 10.2 percent. So the rate of growth is the bottom line in which the public is asking fiscal integrity and fiscal responsibility here.

Mr. WALKER. The gentleman is correct.

Mr. PURSELL. I also suggest that we, some of our group, are suggesting that our freeze apply across the board to that $1 trillion budget. That means defense, that means domestic budget areas, plus; so we will be going into certain categories, maybe 50 or 60 different programs of the Federal Government, looking for additional spending, because the freeze itself if you were to apply the freeze across the board to today's Federal budget, the 1986 budget numbers, the CBO numbers, you are only going to come up with about $38 billion.

The gentleman is absolutely correct. Those are not enough dollars to achieve not only the 1986 goal of $50 billion, but the deficit which will be greater in 1987 and in 1988, simply because the recovery, with all due respect to my supply sider colleagues, will not be recovering at a 4-percent growth rate of the GNP.

So I suggest we are going to have to look at additional budget cuts later on, over and above the freeze in which we can get agreement within the House, Republicans and Democrats, and with the Senate and with the administration.

I think the public is asking for that, so I congratulate the committee again for its excellent work.

Mr. WALKER. Well, I thank the gentleman.

I think it is important to make the point, as the gentleman has there, that if you take the March figures, the latest figures we have, the March figures, they show that revenues to the Federal Government are growing at an 11 percent greater rate than they were in March of the year prior.

□ 1330

That means that we have a rate of revenue growth to the Federal Government of almost three times the rate of inflation. That should give us the ability to begin to catch up on some of those deficit numbers.

The problem is that that body is spending at a rate of 12 percent greater and so, therefore, despite the additional revenues, we are spending at the greater rate than the increased revenues are coming in.

If we could get back to just having a spending rate at the rate of inflation we could cut into the deficit in a massive way based upon the economic growth that is taking place. And so it is important that we go beyond just freezing at the 1985 levels but take a look at a lot of programs in order to try to cut back so that our revenue growth can catch up with our spending levels.

Mr. BOEHLERT. Will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from New York.

Mr. BOEHLERT. Am I correct in my understanding that the gentleman in the well would be receptive to an amendment to his amendment from the chairman of the committee?

Mr. WALKER. The gentleman is correct. It is my understanding that the chairman of the committee is prepared to offer an amendment that would allow the committee to make adjustments within this particular number.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has again expired.

(On request of Mr. BOEHLERT and by unanimous consent Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. WALKER. It is my understanding that the gentleman from Florida [Mr. FUQUA] will offer such an amendment that will allow adjustments by the committee within this figure so that we can have the committee reflecting the priorities that we think are proper rather than to freeze again at the 1985 priority levels.

So I am prepared to accept that amendment.

Mr. BOEHLERT. If the gentleman will yield, it I may I would like to commend the gentleman in the well for his willingness to accept that amendment because had he been reluctant to accept it I would have opposed vigorously the straight freeze amendment. I think we have got a responsibility here in the Congress to provide some leadership and I feel we are taking the easy way out every single time we just say "freeze."

Some programs are deserving of more funding. Some programs are deserving of a higher priority, and simply to establish a precedent under which we say to all of the agencies "Spend no more than you did last year, we are treating you all equal," they are not all equal. Some of them, and I happen to think the National Science Foundation is one of them, have a pressing need for more money because it is an investment in the future of America.

But I commend the gentleman in the well for working out a very satisfactory arrangement under the circumstances.

However, I must confess I do not like the circumstances. I think we in the Congress are weak-kneed, we are turning our back on our responsibility. We are not willing to establish priorities. We are saying freeze, and that is not good enough. I think the American people deserve something more than that.

Mr. WALKER. I thank the gentleman and I think part of my problem is the fact that I think we are weak-kneed on the spending side though, too, because some research I have been doing recently shows what we have done over the last 5 years is overspent our own budgets, our own budgets, by $150 billion. If we do not find some way to begin to put a clamp on, we cannot depend upon the Budget Act to do it because we just waive the Budget Act, we violate it. The way we can begin to control is in the authorization process, because the authorizations stick. And we have to have something that sticks on this, and this is one way that you can begin to do it.

I would say to the gentleman I know that he is reflecting the kind of priority determination that the administration thought was important, that the science of this country has to go forward if we are to meet the technological future that this country needs to enjoy, if we are to improve trade and everything else. So the gentleman has taken a responsible position on that.

I think, though, from the standpoint of our committee, the realities of the House are at this point that what we need to do in this effort is to begin to freeze in some of these things that are high priority efforts so that in some of the other efforts a little later on we could also impose the same kind of freeze.

It is going to be interesting to see how people react to some of those.

Mr. BOEHLERT. Will the gentleman yield further?

Mr. WALKER. I will be glad to.

Mr. BOEHLERT. I would like to put things into perspective. Consider this fact: at the very time we are talking about a budget for an agency which has primary responsibility for most nondefense research and development in America, an agency that is dealing with the future of America, which has a total budget request of $1.6 billion, which is the total budget request for the National Science Foundation—now, get this—at this very hour, unless we in this body do something, on October 1 of this year the excise tax on cigarettes will be reduced from 16 cents to 8 cents a pack. That is a 50-percent reduction.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has again expired.

(On request of Mr. BOEHLERT and by unanimous consent Mr. WALKER was allowed to proceed for 3 additional minutes.)

Mr. WALKER. I yield to the gentleman.

Mr. BOEHLERT. You might say that is no big deal. But every one penny in excise tax in cigarettes brings in $212 million. You multiply that by 8 and guess what? Miracles, miracles. That is more than the total budget request for an entire fiscal year, $1.6 billion, for the National Science Foundation.

Now, I do not like to brag about it, but I am a smoker and I do it by choice. But it is mindboggling to me that we are arguing about nickels and dimes in an agency dealing with the future of America, and at the same time we are going to give a massive tax break to the tobacco industry.

I thank the gentleman for yielding.

Mr. WALKER. I thank the gentleman, and the National Institutes of Health might want to talk to him about his choices.

Mr. PURSELL. Will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Michigan.

Mr. PURSELL. I just want to appreciate the remarks of the gentleman from New York. He has been working with us on a budget analysis of a freeze. But that is a bottom line minimum standard.

Obviously the spending habits of this Congress, including all of us over the years, have been rather on the high spending level, and the rate of spending has gone out of control. So it is a minimal effort of trying to get a freeze. Maybe it sounds good; it may be popular. We will be looking at each appropriation and authorization bill as they come along.

But I like science and technology and I like the National Science Foundation. My big university, the University of Michigan, is a recipient of funds from this committee.

But the President in briefing many of us on our budget freeze proposal thinks that that is the right strategy for the country at this time to get our fiscal house in order. And every university and every recipient from this committee realizes that if it is fair, if the Defense Department is treated the same as NSF, and UDAG, and revenue sharing, and all of the other programs, they could live with that kind of a strategy in terms of good public policy for this Nation to eliminate the deficit.

And let us not lose sight of that national deficit. That is an albatross around this Nation and around this country.

Mr. LUJAN. Will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from New Mexico, the ranking minority member on the committee.

Mr. LUJAN. I think the National Science Foundation can get along as well with $1.5 billion as it can with $1.6 billion. I do not think that that is a big cut in any agency.

However, having been around here for these last 17 years I just wonder sometimes about what motives there are, you know, other than balancing the budget which we all support.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has again expired.

(On request of Mr. LUJAN and by unanimous consent Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. WALKER. I will be glad to continue to yield to the gentleman.

Mr. LUJAN. And is it the intention of the proponents of these amendments that are offered on every bill or will be offered on every bill, and I will tell the gentleman that probably with the exception of Defense I will support all of the other freezes, but are we talking when we move down the line and it turns out that the 1985 level is higher than the President's proposal, is the gentleman thinking of taking the lower of the two, whatever it may be?

I will also ask the gentleman from Michigan that same question.

Mr. WALKER. The gentleman from Pennsylvania has raised that point here earlier, and my intention I think would be that when the President has come in at lower levels, then at that point we need to have an amendment out here to reflect those lower levels, because that is how we will really begin to control this process and that would certainly be this gentleman's intent, to take the lower of the two, the 1985 authorization or the President's request, and come to the floor with the lower of the two so that we begin to get a real adjustment in budget priorities.

Mr. LUJAN. If the gentleman would yield further, I would like to ask that same question of the gentleman from Michigan [Mr. PURSELL]. I would ask the gentleman that question also because he is one of the ones that is bringing this subject up all of the time, for which I admire him, I might say.

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman. I have been here a number of years, not as long as the gentleman from New Mexico, I might say, but I think serving on the Appropriations Committee those are unusual cases when you are below the 1985 level in respect to individual spending programs in this Nation. So I think the gentleman is right. We ought to take a look at those on a case-by-case basis.

You are suggesting already that we make an exception in the area of the defense budget in your case, and this is you personally, and I respect that. But if each of us begins to make exceptions to reduce spending and try to get some fairness principle, whether it is a freeze or some percentage of growth rate, or limited emplacement at 4 percent, some particular principle of budgetting, unless we can do that we are not going to address this issue.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALKER] has again expired.

(On request of Mr. LUJAN and by unanimous consent Mr. WALKER was allowed to proceed for 1 additional minute.)

□ 1340

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, it is an open question. Let us look at the bills as they come before us. Some are lower, fine, but you are not going to find many examples in a trillion dollar budget in which those budget levels are lower.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New Mexico.

Mr. LUJAN. This is what concerns me. There are always some kinds of different motives. My particular budget that I like, for example, is in a different category from that one.

I am trying to kind of nail down: Are we going to generally go for the lower figure whether it is the 1985 level or the President's level? That is what I would support, I will tell the gentleman.

I would like to ask the gentleman the same question: Is he looking to offer amendments that would either be the 1985 level or the President's recommendation level, whichever is the lower.

Mr. PURSELL. Mr. Chairman, will the gentleman yield to me?

Mr. WALKER. I yield to the gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, I think the budgetary expense and principles are consistent across the board because it applies the fairness doctrine.

I would be open, and I think our group and others who are working on behalf of—and I am a task force chairman of a larger group—that we would be willing to look at those on a case-by-case basis.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. WALGREN and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. WALGREN. Mr. Chairman, will the gentleman yield to me?

Mr. WALKER. I yield to the gentleman from Pennsylvania.

Mr. WALGREN. Mr. Chairman, I appreciate the gentleman's yielding to me and I appreciate his approach to this. I notice in his statement that he says it apparently is the will of the House that we move to these levels.

I just want to be on record to try to raise recognition of the special nature of this budget, and I believe that in many instances the gentleman in the well would agree that reductions in this area do "cut off our nose to spite our face."

We will lose some substantial effort in this area, and I do not think we should kid ourselves that we are not. And when we go to the amendment as will be proposed by the chairman of the full committee [Mr. FUQUA], we will lose $10 million in the engineering directorate.

Now that $10 million is in an area of a very small investment, an area that is moving very fast; an area that my part of the country, particularly, can appreciate because it is our failure to keep up with manufacturing engineering particularly that has led to the demise of the steel industry, and a great deal of loss for our country also.

We will lose some $25 million in the mathematics and physicial sciences area.

Now those who would like on a case-by-case basis to treat defense with a little bit of extra effort, given the challenges around the world, would want to support that $25 million.

You cannot look back in history and appreciate the role that theoretical physicists and theoretical mathematics played in the development of the atom bomb in World War II, knowing that we were just lucky, and turn our backs on an administration recommendation for $25 million in that area. But we are by going forward in this way.

The same thing is true in the area of behavioral social sciences where we are at a critical mass in that period, in that area; they have suffered more than their share of cuts in the past. We will lose some $12 million of research effort in this area where many students are turning away because of lack of support.

So we are going to lose something of real value. I hope we can agree on a fundamental approach, such as a freeze, which would then allow us to all join together and accomplish the goals of the gentleman in the well.

AMENDMENT OFFERED BY MR. FUQUA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. WALKER

Mr. FUQUA. Mr. Chairman, I offer an amendment as a substitute for the amendment offered by Mr. WALKER.

The Clerk read as follows:

Amendment offered by Mr. FUQUA as a substitute for the amendment offered by Mr. WALKER: In lieu of the matter insert:

In section 2 of the committee amendment, strike "$372,170,000" and insert "$359,483,000"; strike "$272,050,000" and insert "$259,260,000"; strike "$170,070,000" and insert "$160,070,000"; strike "$428,970,000" and insert "$404,377,000"; strike "$38,360,000" and insert "$37,770,000"; strike "$69,900,000" and insert "$72,230,000"; strike "$82,000,000" and insert "$50,550,000"; and strike "$120,100,000" and insert "$110,830,000."

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Chairman, I rise in support of the substitute amendment. While the intent of the amendment, which is to reduce the fiscal year 1986 authorization to the fiscal year 1985 appropriation level, congressional and committee directions and priorities would be lost without my amendment. An amendment to reduce to the 1985 freeze level is more appropriate if legislative directives were given for the specific line items or the research and other activities provided for in the authorizing legislation.

The Science and Technology Committee has carefully reviewed the budget request and heard testimony from numerous witnesses in eight hearings, beginning in April 1984. The gentleman's amendment, while well intentioned does not preserve the research priorities and initiatives that are the products of directed and careful work by the Congress and by the committee.

The substitute amendment I offer to the gentleman's amendment is designed to do just that. It would reduce the budget authorization to last year's appropriation level—the freeze level as some prefer to call it, but with the best sense of priorities and purposes that we can fashion.

I believe the committee is in a position to offer guidance for each budget activity. The priorities that would be maintained by my amendment include the continuation of four national centers for advanced scientific computing, as well as the six engineering research centers selected several weeks ago by the National Science Foundation. Other priorities include basic research and associated instrumention and facilities for mathematical, physical, biological, behavior, astronomical, atomspheric, Earth, and ocean sciences.

I believe the administration's fiscal year 1986 request and the Science Committee's bill are in the best interest of society and necessary to maintain U.S. competitiveness in basic research. However, given the concern over the deficit, I appreciate the need to reduce the bill reported by the Science and Technology Committee to the fiscal year 1985 appropriation level.

The NSF has five major areas of research emphasis, and a separate program for science and engineering education. My amendment preserves the fiscal year 1986 levels in H.R. 1210 for two of the areas, including advanced scientific computing; as well as retaining new obligational authority for Science and engineering education. My amendment reduces authorization levels for three research areas below the H.R. 1210 level, but still allows for a 2- to 3-percent increase above the fiscal year 1985 appropriation level.

In the case of engineering, my amendment reduces the level in H.R. 1210 by $10 million which still maintains the engineering activity at $10 million above the fiscal year 1985 appropriation. This reduction may delay the planned establishment of additional engineering research centers in fiscal year 1986, but it will provide adequate funds to continue the six engineering research centers established in 1985. The bottom line is the same as the Walker amendment.

If at a later date, the Budget Committee allocates funds for the science category above the amounts authorized for NSF in my amendment, I would support consideration of a supplemental appropriation to restore the NSF budget to the administration's request for fiscal year 1986 and H.R. 1210.

I urge that the substitute amendment be agreed to.

Mr. GREGG. Mr. Chairman, will the chairman of the committee yield to me?

Mr. FUQUA. I yield to the gentleman from New Hampshire.

Mr. GREGG. I appreciate the chairman yielding to me.

Mr. Chairman, I certainly appreciate the approach the chairman is taking and comment on it because I think it is better for the committee, which is responsible for the funding, to make the decisions as to where the funding should go than to do it across the board.

But I would ask the question in the science and education, education directorate, where you have $51 million, is it the intention or the understanding of the chairman that the $31.5 million which is a carryover from 1985 for which there is a deferral pending, that that deferral would be approved so we would not have a programming change in that directorate?

Mr. FUQUA. The carryover funding would be included or could be carried over and would not be reduced.

Mr. GREGG. So there would be no reduction in the programming of that directorate.

Mr. FUQUA. That is correct.

Mr. GREGG. Of the $51 million.

Mr. FUQUA. The gentleman is correct.

Mr. WALKER. Mr. Chairman, will the gentleman yield to me?

Mr. FUQUA. I yield to my friend from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, as I had indicated to the gentleman from New York [Mr. BOEHLERT], as the author of the original amendment, I am certainly prepared to accept the gentleman's amendment. I think it is a very valuable addition to the amendment that I put forth.

Mr. LUJAN. Mr. Chairman, will the gentleman yield to me?

Mr. FUQUA. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, I also want to congratulate the gentleman and support his amendment. I think we do a better job of doing it the way the chairman has proposed, not that it is a bad idea what the gentleman from Pennsylvania [Mr. WALKER] is doing; but we take into consideration the additional effort, super computer centers, engineering centers, those sorts of things.

I would like to ask the gentleman, because I was out when he was discussing it earlier, but there is no change at all in the wording such as, for example, the closing of Sacramento Peak, that they could not move ahead?

Mr. FUQUA. Absolutely. All we are changing is the basic numbers to conform to the overall number that would total the amount that was appropriated in fiscal year 1985.

Mr. LUJAN. I thank the gentleman and support his amendment.

Mr. PURSELL. Mr. Chairman, would the gentleman yield?

Mr. FUQUA. I yield to the gentleman, the distinguished gentleman from Michigan.

Mr. PURSELL. I thank the gentleman for yielding.

Would the good chairman from Florida indicate and clarify the actual dollars going back to 1985 that we would be saving by virtue of his amendment plus the Walker amendment?

Mr. FUQUA. It would reduce it back to $1.502 billion.

Mr. PURSELL. It would be a saving of how many dollars?

Mr. FUQUA. Approximately $100 million.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to support both the Walker amendment and the committee substitute. I am very pleased to see the growing support in the House for the concept that was initially put forward by the gentleman from Michigan [Mr. PURSELL], and myself, in the amendment to the National Aeronautics and Space Administration authorization. The practice of freezing spending at fiscal year 1985 levels is an important first step in dealing with the budget deficit.

□ 1350

I think a freeze is something we can implement now. It is equally important that the authorizing committees play the critical role in setting forth the priorities within available funds, and that is why I think that the committee substitute is particularly appropriate.

I hope that the message being sent by our votes on these freeze amendments will cause authorizing committees to take the lead by reporting to the floor bills at fiscal year 1985 spending level.

Unless we are willing to stick to fiscal year 1985 spending levels, I do not think we can make any reasonable start on fighting the budget deficit.

Some questions were raised about whether or not those of us who have been offering this kind of an amendment are committed to offering the lower of the President's level or the 1985 spending level.

Speaking just for this Member, I believe that a freeze at fiscal year 1985 spending levels is essentially the limit of what we can expect to accomplish through the authorizing process. Its case-by-case nature precludes the kind of balancing process that requires the input of the Budget Committee.

We have taken the step of freezing individual authorizations because our alternatives were so limited. We do not yet have a budget resolution. Because of that, decisions about the merits of cuts below the freeze level or increases above it have not been made.

Although a freeze at fiscal year 1985 appropriations level will not solve our deficit problem, our vote 2 weeks ago to freeze the NASA budget was significant. It demonstrated to the Committee on the Budget that there is general support for a freeze. A vote in favor of this amendment should wipe out any doubt about our resolve.

Obviously, there are places beyond what we are freezing where we may be able to save additional money. Now, the Budget Committee ought to be in a position to bring us both a budget resolution and a process through amendment so that the House can work its will on where perhaps we would spend more or where we would spend less.

Mr. LUJAN. Will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from New Mexico.

Mr. LUJAN. Am I to understand from that that if a bill comes in here at the President's figures, that might be less than 1985, is the gentleman going to seek an increase to the 1985 level?

Mr. MORRISON of Connecticut. No; that is not what I was stating.

If the committee's judgment is that the President's level is the appropriate one, I am certainly not committed to raising spending to the 1985 level. However, if a committee comes in at the 1985 level and the President has proposed a lower level, I do not think we automatically should support going to the President's proposed spending level.

There are, I am sure, areas where all of us believe we could spend less than the 1985 level, and of course there are places where all of us could find to spend more than the 1985 level.

My view is, you should not spend more than the 1985 level unless you find the money to pay for the increase; either with cuts somewhere else, or by increases in revenue.

Only the budget process can provide that overall framework. What we are doing here in the authorization process is for those things that are coming to us before there is a budget; we are setting the precedent that we will spend more money until it is paid for, and by definition, it is not paid for at the point of the decision on these authorizations.

Mr. LUJAN. If the gentleman would yield further, is it then what I gather from the gentleman, is that if someone comes in with a 1985 level that is higher than the President's level, then the gentleman does not look at that as a priority for balancing the budget, only if it happens that the President proposed more than the 1985 level? Is that the understanding?

Mr. MORRISON of Connecticut. I think it is a priority to take the steps that we reasonably can take to do something about the budget deficit, and one on which I think there can be broad agreement is that we cannot spend more than the 1985 level unless we have found the funds to take care of the increased spending.

In fact, we have to do more than that, and that has been adequately and appropriately addressed. We have to start with what is possible. If we end the debate with the statement that "We're going to spend more here now because sometime down the road, we'll save some money," that is not going to work. That is what the budget process ought to bring to us, and I hope within the next month we are going to be on the floor here with the budget resolution, and we can have the debate about what areas of

the budget we will seek to reduce below the 1985 level.

(By unanimous consent, Mr. MORRISON of Connecticut was allowed to proceed for 5 additional minutes.)

Mr. LUJAN. If the gentleman would continue to yield, would it be a good premise to start with to say the 1985 level or the President's level, whichever lower? Might that be some kind of additional premise?

Would it be a logical premise to proceed from that, whichever is lower, the 1985 level or the Presidential request level, whichever one of those two is the lower of the figures; because that really will help us lower the deficit.

Would it be logical to proceed on the basis that whichever of the two is lower, that is the one we should support? I want to help the gentleman.

Mr. MORRISON of Connecticut. I understand.

Mr. LUJAN. I am with him on balancing the budget, on reducing it to the 1985 level, but I am asking the gentleman if he would not agree that if we are really serious about it, then let us take the lower of the two.

Mr. MORRISON of Connecticut. First of all, I appreciate that the gentleman is trying to help, and I think we are both serious about the budget deficit. I would hope all Americans would be serious about it, because it is a serious problem. It is not a partisan issue. It is a serious American issue that we ought to deal with.

However, I do not agree with the gentleman that that is automatically the way to proceed. Frankly, I do not agree with some of the President's reductions, nor some of the President's increases, but what I do believe is that through our process of setting priorities in the past, we came to rest on the 1985 levels.

There was a considered judgement over a number of years to bring us to certain relative levels of spending. It is not perfect, but it reflects a kind of consensus: The House, the Senate and the President have agreed on the 1985 spending levels.

A place to start is to say we are not going to spend more than that until we make a considered judgment to find a way to pay for it. It is that broad principle that we can agree on most easily; it is not the end of the budget deficit solution, but it is a beginning.

There is a danger of breaking down that consensus if your premise were to be accepted. On a case-by-case basis, there may be a reasons to go below 1985 levels, but I cannot agree to a general rule that because the President has suggested that we do so, that we make that our operating premise. I am afraid I could not agree with that and I think many Members who agree on the freeze could not agree with that.

Mr. LUJAN. If the gentleman will yield to me, I just bring that up because my priority, beyond funding any particular agency of the Government is to balance the budget, and I am just looking for the lowest figure that we can spend.

Mr. WALGREN. Will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman.

Mr. WALGREN. Mr. Chairman, that question will come up tommorow, and as you know, tomorrow we will have the National Bureau of Standards budget, and the gentleman will have the alternative to abandon things like the Center for Fire Research in the Bureau in order to go to the lower number that the President has recommended.

Now, knowing the gentleman from New Mexico, I know that he has a highest priority on things like the Center for Fire Research. It certainly has contributed life-saving technology and promises cost-saving technology in the future, but that budget is so structured that we will have to abandon that.

I come back to the feeling that the question is, to what degree are we going to cut off our nose to spite our face in some of these reductions? And we may be able to agree on a freeze, and that is a possible starting point, but it also involves a certain amount of sacrifice, and I hope that we can minimize the losses.

I wanted to emphasize one other point, Mr. Chairman, a good point in the amendment as proposed by the chairman of the full committee, and that is the maintenance because the committee has restructured this and been involved in the restructuring; the maintenance of the supercomputer center effort within the university community.

We have Nobel Prizewinners, as the ranking minority member, Mr. BOEHLERT, knows, who have less access to supercomputers than graduate students in Europe. We maintain that level in this amendment that is being offered as a substitute. That is one of the—that is the least we should do, and the amendment is recommendable on the basis of that alone, I think.

Mr. MORRISON of Connecticut. I thank the gentleman for his contribution on the subject.

Mr. Chairman, it ought to be underscored that even a freeze imposes sacrifices. This budget deficit problem is not going to go away easily or for free. We are not talking about a matter where there are allegations of waste. We are talking about the tough choices that we have to make to resolve our fiscal crisis. I think the freeze is a good place to start.

□ 1400

Mr. NELSON of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to discuss in the context of this amendment, which I support, the future possibilities. This particular level, which will be successful here today, to bring it back to 1985 levels, is parallel to the amendment that was passed to the NASA authorization bill that we had on the floor some 2 weeks ago in which it was brought back to fiscal year 1985 spending levels.

These amendments are predicated on the fact that we will, in fact, be successful in an across-the-board freeze, which the Senate is considering a version thereof, not a pure freeze. It may well be that this particular House will have forthcoming out of the Budget Committee a true across-the-board freeze, or it may be, if they do not, that some such substitute budget might be offered by Members, such as myself, akin to one that was offered last year by myself and my colleague, the gentleman from Florida [Mr. MACKAY], which, by the way, only received 108 votes.

The fact is that whether or not an across-the-board freeze is successful is going to be determined by some tough, hard, unpopular votes in the future.

Now, should the across-the-board freeze not prevail, then it is my intention, as chairman of the Space Subcommittee, and I would assume people handling the budgets of the National Science Foundation, to come back and make the plea that it ought to be at our committee-recommended level; in other words, these agencies dealing with science and technology, if other agencies of Government are not going to be bound by an across-the-board freeze, then these are the agencies that least should be held down to the previous year's spending levels.

Now, why do I say that? And I will conclude with this. I say that because of a revelation that has just come out, out of the Space Program research, a new laser that is being developed at the Jet Propulsion Laboratory that, because it was developed for the Space Program, it has an application we think that it might render mute bypass surgery, that you could use that laser to go in and clean out the arteries that otherwise we have to do bypass surgery for now.

Or I am talking about microminiaturization that came out of the Space Program, transferring that technology to medicine today, and at Johns Hopkins right now they are about to implant a miniaturized computer in a human that will release, according to its computerized program, certain amounts of drugs, depending on the body's condition, that could cure those particular kinds of diseases.

My bottom line, in sharing these comments with you today, is that research out of science and technology is the future of America. These areas ought to sacrifice, as everyone, if in fact everyone does, in an across-the-board freeze. But if that unravels, then we need to go back and look out for the future of the United States.

I will yield to the gentleman from Pennsylvania [Mr. WALKER], and then I will yield to the gentleman from New Mexico [Mr. LUJAN].

Mr. WALKER. I thank the gentleman for his statement, because I think he makes an excellent point. I think, to some extent, the Science and Technology Committee is getting penalized and science programs are getting penalized in this process for having done our work efficiently and having gotten to the floor first in the 1986 year. If in fact it worked out the way the gentleman's scenario says, that when we get to other votes later on we are not willing to maintain this position, then I think we ought to go back and reexamine the priorities. As it is right now, the record that we are making is that we are willing to go along with the freeze. I think we ought to continue to move in that direction and also come in at the President's lower levels, wherever that is appropriate, until that point when the House shows it is not willing to do that across the board, and then we ought to go back and examine just what the priorities of this country really should be.

So the gentleman's statement I think is very worthwhile, and I appreciate what he has had to say.

The CHAIRMAN. The time of the gentleman from Florida [Mr. NELSON] has expired.

By unanimous consent, Mr. NELSON of Florida was allowed to proceed for 2 additional minutes.

Mr. NELSON of Florida. Mr. Chairman, I yield to the gentleman from New Mexico [Mr. LUJAN].

Mr. LUJAN. I thank the gentleman for yielding. I had not sought additional recognition from the gentleman because, basically, I was going to say what the gentleman from Pennsylvania did, and that is that we were the efficient committees, if you want to put it that way, and we brought our bills onto the floor, and we are the beginning ones. Not that I objected to it, not that I object to the freeze, not that I object to the lower level of spending, but I hope that it keeps on, what has happened in the bills we have brought to the floor continues to happen with other legislation.

Mr. NELSON of Florida. I thank the gentleman for his comments.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida [Mr. FUQUA] as a substitute for the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER], as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LUNGREN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 407, noes 4, not voting 22, as follows:

□ 1420

Mr. WILLIAMS changed his vote from "aye" to "no."

Mr. LOEFFLER changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there further amendments to section 2?

If not, the Clerk will designate section 3.

The text of section 3 is as follows:

SEC. 3. Of the funds authorized to be appropriated in section 2, no funds shall be expended towards closure of a National facility without appropriate scientific review, including review by the National Science Foundation's appropriate advisory committee or committees and the National Science Board.

The CHAIRMAN. Are there any amendments to section 3?

Mr. FUQUA. Mr. Chairman, I ask unanimous consent that the remainder of the committee amendment in the nature of a substitute bill be printed in the RECORD and open to amendment at any point past section 3.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The text of the remainder of the committee amendment in the nature of a substitute is as follows:

SEC. 4. Appropriations made under the authority provided in sections 2 and 6 shall remain available for obligation for periods specified in the Acts making the appropriations.

SEC. 5. From the appropriations made under the authorizations provided in this Act, not more than $3,500 may be used for official consultation, representation, or other extraordinary expenses at the discretion of the Director of the Foundation. His determination will be final and conclusive upon the accounting officers of the Government.

SEC. 6. Besides the sums authorized by section 2, not more than $1,000,000 is authorized to be appropriated for the fiscal year 1986 for expenses of the National Science Foundation incurred outside the United States, to be drawn from foreign currencies that the Treasury Department determines to be excess to the normal requirements of the United States.

SEC. 7. (a) Funds may be transferred among the categories listed in section 2(a), so long as the net funds transferred to or from any category do not exceed 20 percent of the amount authorized for that category in section 2.

(b) In addition, the Director of the Foundation may propose transfers to or from any category in section 2; but an explanation of any such proposed transfer must be transmitted in writing to the Speaker of the House, the President of the Senate, and the appropriate authorizing committees of the House and Senate, and the proposed transfer may be made only when 30 calendar days have passed after the transmission of such written explanation.

SEC. 8. The National Science Foundation is authorized to design, establish, and maintain a data collection and analysis capability in the Foundation for the purpose of identifying and assessing the research facilities needs of universities. The needs of universities, by major field of science and engineering, for construction and modernization of research laboratories, including fixed equipment and major research equipment, shall be documented. University expenditures for the construction and modernization of research facilities, the sources of funds, and other appropriate data shall be collected and analyzed. The Foundation, in conjunction with other appropriate Federal agencies, shall conduct the necessary surveys every 2 years and report the results to the Congress. The first report shall be submitted to the Congress by September 1, 1986.

SEC. 9. (a) Section 6 of the National Science Foundation Act of 1950 is amended—

(1) by striking out "(a)" after "SEC. 6."; and

(2) by striking out subsection (b).

(b) Section 14(b) of such Act is amended—

(1) by striking out "the Director, the Deputy Director, nor any Assistant Director" and inserting in lieu thereof "the Director nor the Deputy Director"; and

(2) by striking out "the Director, the Deputy Director, or any Assistant Director" and inserting in lieu thereof "the Director or the Deputy Director".

(c) Section 5316 of title 5 of the United States Code is amended by striking out "Assistant Directors, National Science Foundation (4).".

SEC. 10. (a) Section 4(e) of the National Science Foundation Act of 1950 is amended by striking out "by registered mail or certified mail mailed to his last known address of record" in the last sentence.

(b) Section 5(e) of such Act is amended to read as follows:

"(e) The Director may make contracts, grants, and other arrangements pursuant to section 11(c) only with the prior approval of the Board or under authority delegated by the Board, and subject to such conditions as the Board may impose. Any delegation of authority or imposition of conditions under the preceding sentence shall be effective only for such period of time, not exceeding two years, as the Board may specify, and shall be promptly published in the Federal Register and reported to the appropriate authorizing committees of the Congress. On October 1 of each odd-numbered year the Board shall submit to the Congress a concise report which explains and justifies any actions taken by the Board under this subsection to delegate its authority or impose conditions within the preceding two years.".

(c) Section 12 of such Act is amended—

(1) by striking out "(a)" after "SEC. 12."; and

(2) by striking out subsection (b).

(d) Subsections (a) and (b) of section 9 of such Act are amended to read as follows:

"(a) Each special commission established under section 4(h) shall be appointed by the Board and shall consist of such members as the Board considers appropriate.

"(b) Special commissions may be established to study and make recommendations to the Foundation on issues relating to research and education in science and engineering.".

(e)(1) Section 14 of such Act, as amended by section 9(b) of this Act, is further amended—

(A) by striking out subsection (b);

(B) by redesignating subsections (c) through (i) as subsections (b) through (h), respectively; and

(C) by adding at the end thereof the following new subsection:

"(i) Information supplied to the Foundation or a contractor of the Foundation by an industrial or commercial organization in survey forms, questionnaires, or similar instruments for the purposes of subsection (a)(5) or (a)(6) of section 3 may not be disclosed to the public unless such information has been transformed into statistical or aggregate formats that do not allow the identification of the supplier. The names of organizations supplying such information may not be disclosed to the public.".

(2) Sections 3(b) and 15(b)(1) of such Act are each amended by striking out "14(g)" and inserting in lieu thereof "14(f)".

(f) Section 10 of the National Science Foundation Authorization Act, Fiscal Year 1978 (Public Law 95-99), is repealed.

(g) Section 6(a) of the National Science Foundation Authorization Act, 1976 (Public Law 94-86) is amended—

(1) by striking out "not to exceed $50,000 per year for a period not to exceed three years" in the last sentence; and

(2) by adding at the end thereof the following new sentence: "The National Science Board will periodically establish the amounts and terms of such grants under this section.".

(h) Section 6 of the National Science Foundation Authorization Act, Fiscal Year 1978 (Public Law 95-99), is repealed; and sections 7, 8, 9, 11, 12, 13, and 14 of such Act are redesignated as sections 6 through 12, respectively.

(i) Section 9 of the National Science Foundation Authorization Act for Fiscal Year 1980 (Public Law 96-44; 42 U.S.C. 1882) is amended by inserting "and the National Science Board" after "the Director of the National Science Foundation".

SEC. 11. (a) The National Science Foundation Act of 1950 (42 U.S.C. 1861 through 1875) is amended as follows:

(1) Section 3(a)(1) (42 U.S.C. 1862(a)(1)) is amended—

(A) by striking out "engineering,";

(B) by inserting after "other sciences," the following: "and to initiate and support research fundamental to the engineering process and programs to strengthen engineering research potential and engineering programs at all levels in the various fields of engineering,"; and

(C) by striking out "such scientific and educational activities" and inserting in lieu thereof "such scientific, engineering, and educational activities".

(2) Section 3(a)(3) is amended—

(A) by inserting "and engineering" after "scientific"; and

(B) by inserting "and engineers" after "scientists".

(3) Section 3(a)(4) is amended—

(A) by inserting "and engineering" after "scientific"; and

(B) by inserting "and engineering" after "sciences".

(4) Section 3(a)(5) is amended by inserting "and fields of engineering" after "sciences".

(5) Section 3(a)(6) is amended by striking out "technical" each place it appears and inserting in lieu thereof "engineering".

(6) Section 3(a)(7) is amended by inserting "and engineering" after "scientific".

(7) Section 3(b) is amended by inserting "and engineering" after "scientific" each place it appears.

(8) Section 3(c) is amended—

(A) by inserting "and engineering" after "scientific" in the first sentence; and

(B) by inserting "and engineering research" after "applied scientific research" in the second sentence.

(9) Section 3(d) is amended by striking out "basic research and education in the sciences" and inserting in lieu thereof "research and education in science and engineering".

(10) Section 3(e) is amended by inserting "and engineering" after "sciences".

(11) Section 4(c) (42 U.S.C. 1863(c)) is amended—

(A) by inserting "and engineering" after "scientific" in clause (3) of the first sentence;

(B) by inserting "and engineers" after "scientists" in the second sentence; and

(C) by inserting "the National Academy of Engineering," after "National Academy of Sciences,", and inserting ", engineering," after "scientific", in the third sentence.

(12) The first sentence of section 10 (42 U.S.C. 1869) is amended by striking out "scientific study or scientific work in the mathematical, physical, medical, biological, engineering, social, and other sciences" and inserting in lieu thereof "study and research in the sciences or in engineering".

(13) Section 11 (42 U.S.C. 1870) is amended—

(A) by inserting "or engineering" after "scientific" each place it appears in subsections (c) and (d);

(B) by striking out "technical" and inserting in lieu thereof "engineering" in subsection (g); and

(C) by striking out "scientific value" and inserting in lieu thereof "scientific or engineering value" in subsection (g).

(14) Section 12 (42 U.S.C. 1871), as amended by section 10(c) of this Act, is further amended by inserting "or engineering" after "scientific".

(15) Section 13(a) (42 U.S.C. 1872(a)) is amended—

(A) by inserting "or engineering" after "scientific" each place it appears in the first two sentences;

(B) by inserting "or engineers" after "scientists"; and

(C) by striking out "scientific study or scientific work" and inserting in lieu thereof "study and research in the sciences or in engineering".

(16) Section 13(b) is amended by inserting "or engineering" after "scientific".

(17) Section 14 (42 U.S.C. 1873), as amended by sections 9(b) and 10(e) of this Act, is further amended—

(A) by inserting "or engineering" after "scientific" each place it appears in subsection (e); and

(B) by striking out "technical" in subsection (f) and inserting in lieu thereof "engineering".

(18) Section 15(b) (42 U.S.C. 1874(b)) is amended—

(A) by striking out "technical" in paragraph (1) and inserting in lieu thereof "engineering"; and

(B) by inserting "or engineering" after "scientific" in paragraph (2).

(b) Section 2(b) of the National Science Foundation Authorization Act, 1976 (42 U.S.C. 1869a, Public Law 94-86) is amended by inserting "or engineering" after "science" each place it appears.

(c) Part B of the National Science Foundation Authorization and Science and Technology Equal Opportunities Act (42 U.S.C. 1885 to 1885d, Public Law 96-516) is amended as follows:

(1) Section 31 is amended by striking out "Technology" and inserting in lieu thereof "Engineering".

(2) Section 32(a) (42 U.S.C. 1885(a)) is amended—

(A) by striking out "technology" and inserting in lieu thereof "engineering"; and

(B) by striking out "scientific talent and technical skills" and inserting in lieu thereof "scientific and engineering talents and skills".

(3) The first sentence of section 32(b) (42 U.S.C. 1885(b)) is amended—

(A) by striking out "skills in science and mathematics" and inserting in lieu thereof "skills in science, engineering, and mathematics";

(B) by striking out "technical" and inserting in lieu thereof "engineering";

(C) by striking out "scientific literacy" and inserting in lieu thereof "scientific and engineering literacy"; and

(D) by striking out "technology" and inserting in lieu thereof "engineering".

(4) The second sentence of section 32(b) (42 U.S.C. 1885(b)) is amended—

(A) by striking out "highest quality science" and inserting in lieu thereof "highest quality science and engineering"; and

(B) by striking out "technology" and inserting in lieu thereof "engineering".

(5) The third sentence of section 32(b) (42 U.S.C. 1885(b)) is amended by striking out "technology" and inserting in lieu thereof "engineering".

(6) Section 33 (42 U.S.C. 1885a) is amended—

(A) by striking out "technology" and "technical" each place they appear and inserting in lieu thereof "engineering";

(B) by inserting ", engineering," after "science" in paragraph (2);

(C) by inserting "and engineers" after "scientists" each place it appears;

(D) by inserting "and engineering" after "science" in paragraph (10); and

(E) by striking out "science, engineering, and technology" in paragraph (11) and inserting in lieu thereof "science and engineering".

(7) Section 34 (42 U.S.C. 1885b) is amended—

(A) by striking out "science education" and inserting in lieu thereof "science and engineering education"; and

(B) by striking out "technology" and inserting in lieu thereof "engineering".

(8) Section 36 (42 U.S.C. 1885c) is amended—

(A) by striking out "TECHNOLOGY" in the heading and "Technology" and "technology" each place they appear, and inserting in lieu thereof "ENGINEERING", "Engineering", and "engineering", respectively; and

(B) by striking out "scientific engineering, professional, and technical" and inserting in lieu thereof "scientific, engineering, and professional".

(9) Section 37(b) (42 U.S.C. 1885d(b)) is amended—

(A) by striking out "technical" each place it appears and inserting in lieu thereof "engineering"; and

(B) by striking out "Technology" in paragraph (3) and inserting in lieu thereof "Engineering".

(10) The heading of such part B is amended by striking out "TECHNOLOGY" and inserting in lieu thereof "ENGINEERING".

SEC. 12. Within 90 days after the date of the enactment of this Act the Director of the National Science Foundation shall review the recommendations of the President's Private Sector Survey on Cost Control and such other recommendations as may be included in the OMB report "Management of the United States Government—1986", and shall submit a report to the Speaker of the House of Representatives, the President of the Senate, and the appropriate Committee of the House and Senate on the implementation status of each such recommendation which affects the National Science Foundation and which is within the authority and control of the Director.

The CHAIRMAN. Are there further amendments to the bill?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1210) to authorize appropriations to the National Science Foundation for the fiscal years 1986 and 1987, and for related purposes, pursuant to House Resolution 129, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill. The bill was passed.

The title of the bill was amended so as to read: "A bill to authorize appropriations to the National Science Foundation for the fiscal year 1986, and for other purposes."

A motion to reconsider was laid on the table.

DISINFORMATION NETWORK

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MARLENEE. Mr. Speaker, yesterday I spoke on the "Network" of pro Sandinista lobbyist groups that are manipulating public opinion against the freedom fighters, the Democratic resistance forces in Nicaragua.

Today, I want to introduce to every American who has any concern about our future and our children's future part 2 of a Washington Times series entitled "Network" which exposes the leftwing disinformation systems. Part 2 of this series details and exposes the exploits of the Council on Hemispheric Affairs [COHA], a group which claims to be a human rights organization.

Never before have the insidious tentacles of Marxist influence reached into our everyday lives into the very pulpits we should depend on. The

Times article reveals this organization as nothing short of a left-wing foreign policy group masquerading as a human rights organization.

To quote the Times:

COHA has no concern for human rights, just concern for foreign policy. If they did, they would ask how many people are jailed by the Sandinistas in Nicaragua, but they don't.

No, Mr. Speaker, this group ignores the gross human rights violations by the Sandinistas.

I urge the American people who are concerned about the true motives of this organization to get the full story. Read the "Network" series.

LATIN COUNCIL CALLED BACKER OF LEFTISTS, NOT HUMAN RIGHTS

(By John Holmes)

In the spiderweb that comprises "The Network" of left-wing organizations opposed to administration policies, the Council on Hemispheric Affairs (COHA) stands out as one of the better known.

COHA literature describes the organization as "a non-profit, tax-exempt independent research and information organization" founded "to promote the common interests of the hemisphere; raise the visibility and increase the importance of the inter-American relationship; and encourage the formulation of rational and constructive U.S. policies toward Latin America."

COHA is run by Larry Birns, a tireless one-man army who serves as the council's founder, director, manager, press secretary, congressional liaison, researcher and chief fundraiser. Mr. Birns, extremely visible in liberal circles, calls COHA "a human rights organization."

But some of those who have dealt with COHA don't see it quite that way.

COHA is not a human rights group. It is a left-wing foreign policy group that often masquerades as a human rights group," says Elliott Abrams, assistant secretary of state for human rights and humanitarian affairs.

"If you read what they've had to say through the years about human rights violations in Surinam, or Bishop's Grenada, or Cuba—worst of all, Cuba—you will see that they don't care about human rights in leftist or communist regimes," Mr. Abrams told The Times.

Mr. Abrams' duties bring him into contact with countless human rights organizations. He says there is a significant difference between COHA and such groups as the Washington Office on Latin America (WOLA), a group that shares COHA's political orientation and is an integral part of The Network. "WOLA has political prejudices just as we all do, but it makes a real effort to promote human rights progress," Mr. Abrams continued.

"So, while I disagree with WOLA, I work with them," he says. "But I will not have any contact with COHA and I do not permit members of the Bureau [of Human Rights and Humanitarian Affairs] to cooperate with them.

"COHA is not genuine in its stated beliefs in human rights. What it is in fact doing is promoting leftist regimes in Latin America," he said.

Bosco Matamoros, a representative of Nicaragua's anti-Sandinista FDN, agrees.

"They have no concern for human rights, just concern for foreign policy. If they did, they would have asked how many people are jailed by the Sandinistas in Nicaragua, but they haven't," he says.

"They know completely the situation down there, but they don't take into account the voices or opinion of the Nicaraguan people. They take as fact whatever is stated by the Sandinistas," Mr. Matamoros said in an interview.

These criticisms are supported by a 1984 Heritage Foundation paper, entitled "The Left's Latin American Lobby."

"An analysis of [COHA's] publications reveals a pattern exaggerating the abuses of right-wing governments or movements, while understating the abuses of leftist regimes or guerrilla groups. This calls into question the integrity of COHA's sources and data that it marshals against the Reagan administration's policies in Central America," the Heritage report states.

"What [COHA's critics are] upset about is that we do a great deal of accurate research," Mr. Birns counters.

To be sure, there are many who believe COHA's materials are accurate and well-presented. But critics contend that his publications are sometimes biased and have reflected Marxist Sandinista propaganda and disinformation themes.

A COHA press release dated Feb. 13, 1984, declared, "U.S. Helicopter Parts Sale to Guatemala Sure to Kill Indians and Worsen Refugee Flow to United States." And a headline on a release dated May 30, 1984, blared, "Guatemalan Military Dictatorship Set to Rig July Elections."

Two aspects of COHA's operations involve Capitol Hill and the press.

Mr. Birns calls COHA "a publishing mill." His council, he says, produces two to three press releases per week and numerous opinion pieces and reports. Some of these are incorporated by congressmen and their staff members into their own reports, speeches and letters, he says.

"We are a powerful force in the wings" of Congress, Mr. Birns admits.

Several liberal legislators, including Reps. Don Bonker, D-Wash., Robert Garcia, D-N.Y., and Sen. Tom Harkin, D-Ia., are listed as being on COHA's board of directors.

Last year COHA submitted numerous articles to these congressmen and others. As many as 100 of the articles to these congressmen were inserted in the Congressional Record, according to Mr. Birns.

But he denies that COHA engages in lobbying.

"We have no legislative people who go and chat up people on the Hill," he said. "It's pointless to try because many of the people up there know more than we do."

Indeed, aides to several senators and congressmen serving on such important committees as Foreign Relations and Intelligence report that they don't read COHA's releases and have never met with COHA lobbyists. Some say they've never even heard of COHA or Mr. Birns.

Still, says one intelligence analyst, "There are between 40 and 55 congressmen who would promote their material." And the attention of those legislators and their staffers is enough to make an impact on public opinion and perception, if not necessarily on policy or legislation, the analyst says.

COHA also is a powerful force in the media. It is there, more than anywhere else, that the organization has made its mark, according to observers. Of all the groups that comprise the left-leaning Latin American component of The Network, none appears to be more effective than COHA at planting its material in the press.

"We influence the mass public opinion via the press," Mr. Birns says. "We get stuff put in the local newspapers and the congressmen read those local papers."

Mr. Birns also regularly appears on programs ranging from radio's "The Larry King Show" to TV's "McNeil-Lehrer Report" and other network interviews. He also has been interviewed by television crews from Spain, Sweden, West Germany and other European nations.

But he appears to be most influential with a specific section of the foreign media, most notably the British Broadcasting Corporation (which has about 100 million listeners worldwide)—for whom he says he does as many as 50 interviews a year—and the Latin American press, which he says is a prime focus of COHA's efforts.

COHA brags in its literature that its "findings have been cited in the official publications of the U.S. government as well as in national and international publications such as Time, Newsweek, The Atlantic Monthly, The New Yorker, The New Statesman, Penthouse, Barron's and Macleans."

"On an almost daily basis, the results of COHA's work appear in the press in Latin America, the United States and Europe," the literature states.

The council also has been cited on numerous occasions in The New York Times, The Washington Post, the Los Angeles Times, the Christian Science Monitor, The Baltimore Sun, The Miami Herald, The Toronto Globe and Mail, the Manchester Guardian, the London Observer and the Times of London, among other newspapers.

"COHA is effective with the press," says the intelligence analyst. "The media is their main constituency."

Several analysts say they believe that COHA manipulates the media by submitting one-sided information.

"They'll get stuff put together for the BBC for broadcast on a Friday night, and people will pick it up in other countries on Saturday," one analyst explains. "It's a dead day, you're looking for a filler, and there it goes."

"They [COHA] have tremendous relations with the Latin America press, too," says a staffer with the conservative Council for Interamerican Security.

"Someone like a guy from the Venezuelan news service might take his press releases and send them back as news to Venezuela, to Costa Rica, to Honduras, wherever. So it has this duplicating effect. It gets sent down there as news, and very often it bounces back up here," the staffer says.

Many of COHA's detractors point to a 1980 incident as an example of the council's actions. Late that year, a so-called State Department "dissent paper" (a paper normally written by a foreign service officer to express his reservations over foreign policy) circulated widely thoughout political, diplomatic and journalistic circles.

The paper was sharply critical of U.S. policy toward El Salvador, and charged that there had been a coverup of U.S. military involvement there. The "dissent paper," however, was later revealed to have been a forgery.

Mr. Birns claims that COHA wasn't involved in distributing the document. But he did issue a four-page press release, with three of the pages filled with single-spaced details from the supposed dissent paper. COHA did question the paper's authenticity in the body of the release.

"We had been told by the State Department that it didn't take the form of an au-

thentic dissent document, but I thought the reasoning in it was good enough to warrant the release," Mr. Birns now says.

At 55, Mr. Birns remains articulate and highly personable; even his critics admit that he's a master publicist. But he also remains an energetic opponent of Reagan policies in Latin America.

COHA operates out of a suit of offices—once occupied by the McGovern campaign—near Dupont Circle, with a staff of about 30 apparently dedicated young people and, according to Mr. Birns, an annual budget of about $125,000. * * *

Critics of COHA accuse the council of engaging in misleading practices to generate the illusion of respectability by association.

From time to time COHA has sent out invitations to conferences and seminars with a list of "invited panelists," many of whom are respected authorities from all bands of the political spectrum.

But Mr. Birns doesn't always contact these "panelists" to ask them to appear. Nevertheless, COHA seeks to capitalize on the drawing power of their names, the observers say.

COHA did just that last month with a conference on Central America co-sponsored with the Fund for New Priorities in America.

On the list of "invited panelists" were such dignitaries as syndicated columnist Robert Novak, Arnaud de Borchgrave, editor-in-chief of The Washington Times, and Ambassador Otto Reich, the State Department's coordinator for public policy on Latin America and the Caribbean.

Mr. Reich says he first heard of his inclusion on the list from a friend who had also been invited. Mr. Novak said he was told of his inclusion by a reporter.

"I was not consulted," says Mr. Reich. "If I'd known that [Mr. Birns] was going to put me on the list, I would have demanded that I be taken off."

Insists Mr. Novak, "They never asked me."

Mr. Birns looks shocked when told some feel this is deceptive or manipulative, and says " this is standard practice."

"I never said all those people were going to show up," he says.

"I just said on the invitations that they'd been invited. If you were invited to an event, wouldn't you like to know who else had been invited?"

The heat of the debate over COHA's actions is matched by the continuing controversy surrounding the council's founding and purpose.

Much of this controversy stems from an article inserted into the Congressional Record by the late Rep. Larry McDonald, D-Ga., on April 15, 1977.

In that article, Mr. McDonald wrote that Mr. Birns once described COHA's purpose as "to manipulate the sophisticated political and academic communities," a statement Mr. McDonald called "indicative not so much of candor as of Birns' arrogance and deep contempt for his targets."

Mr. McDonald also wrote that Mr. Birns was "an associate of Chilean Marxist-Leninist Orlando Letelier," who soon after his death was revealed to have been receiving covert Soviet money channeled through the Cuban intelligence service, the DGI.

COHA's "pro-Marxist-Leninist stance was evident from its initial press conference where Birns supported the Marxist Allende government of Chile, Cuba, the pro-Castro dictatorship in Panama, the left-leaning governments of Mexico and Venezuela." Mr. McDonald wrote.

The 1984 Heritage Foundation report states that COHA "essentially was a by-product" of Mr. Birns's participation in a 1976 meeting in Mexico City of the International Commission of Inquiry into the Crimes of the Chilean Junta, a creation of the World Peace Council, a known Soviet front group.

"Much of that McDonald stuff was fabricated," Mr. Birns counters. "I never attended the Mexico deal. I saw Letelier once after the coup. And he never gave us any money. In fact, I gave him $25 for some Chilean refugee program he was running."

The controversy over COHA's origins and purpose apparently had little effect on its dealings with the Carter administration, on which Mr. Birns says "our influence . . . was profound. He [President Carter] praised us by name."

Mr. Birns admits that "our influence with Reagan is minute. It's more and more difficult to communicate with [the Department of] State. The liberals in State and the CIA for that matter are closet liberals." he says.

"But our influence on public opinion is great."

Tomorrow: Activities of the Washington Office on Latin America.

PATRIOTS, NOT PARTISANS

(Mr. CRAIG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, I come today to talk of patriots not partisans. Two hundred years separate the lives of Thomas Jefferson and Robert Schuller. But no number of years can split the faith these two men have had in their country.

As we contemplate the challenges of reducing the Nation's debt I ask you to consider the following words of these two patriots.

Jefferson said that:

I wish it were possible to obtain a single amendment to our Constitution. I would be willing to depend on that alone for the reduction of our Government to the genuine principles of its Constitution; I mean an additional article, taking from the Federal Government the power of borrowing.

And Robert Schuller in his new book, "The Power of Being Debt Free," published by Thomas Nelson Publishers says this:

Say yes to an idea if it will help people who are hurting now or in the future.

Isn't it time we say yes to the balanced budget tax limitation amendment.

Let me refer again to Reverend Schuller's book coauthored by Paul David Dunn.

Reverend Schuller's positive 10 commandments of possibility thinkers are one patriot's way of holding a lantern up so the rest of us can see the dangers of America's debt. I think we should clear our eyes of bias so that we can clearly see his points.

I have already quoted the first of the positive 10 commandments of possibility thinkers. Let's look at that and the nine others more closely.

A baby is born this year and it is strapped with thousands of dollars of Federal debt. Can you imagine how these babies soon to be adults will hurt if they must pay off that sort of debt before they even think about buying a car, a house, or a baby carriage for their own children. And we know that people are now hurting because of our yearly Federal deficits. How much longer can we stay healthy and vital when we have Federal debt of more than $1.8 trillion and yearly deficits of more than $160 billion.

Reverend Schuller's second commandment is "Say yes to an idea if it challenges and motivates self-discipline." We have forgotten the virtues of self-discipline. Somehow we value self-discipline for ourselves but not for Government. We can only spend what we have every month to feed, clothe and house our families. Business operators must balance their budgets too. Some 200 years ago what was good for the governed was good for the governors. That is no less true today.

The third positive commandment is that, "Say yes to an idea if it holds the prospect of contributing to peace, prosperity, and pride in the human family." We must change the role of the American people. We must not give them the job of paying off the interest on the principle. We should make clear the principle interest of the American people should be to spend their energies building better lives.

Reverend Schuller's fourth commandment is that, "Say yes to an idea if it will endow the great dreams of great dreamers." America was a great dream of great dreamers. We public servants of 1985 can not allow to let the dream die. And the people must not allow the myopic politicians to force our children to pay for our dreaming and they must endure nightmares.

"Say yes to an idea if it makes good financial sense." We are a government operating with a budget in name only. That's not good financial sense. By operating with a budget that must balance each year America could be paying its own way instead of paying for the present with the future. A free nation will not last long if its people are in servitude.

No. 6. "Say yes to an idea if it will bring beauty into the world." If the budget deficits continue we will be spending more of our money on interest on the debt not more on cleaning our cities, in repairing our roads, in building parks for our children.

No. 7. "Say yes to an idea if it contributes to a sense of a caring community." America has done more than just open its arms to people who yearned to breathe free. It has used its

position as the leader of the free world to reduce oppression elsewhere.

Reverend Schuller says that, "Say yes to an idea if it will contribute to the collective self-esteem of a person or a nation." Recession shocked America in the 1970's. Debt is more than shocking America in the 1980's. But recession was nothing compared to the debt crisis we now face. If we don't fight against our self-doubts America will never see its way clear of seeing a debt free society. And if America loses its self-esteem, its self-worth—then the world loses not only a friend but a needed leader.

"Say yes to an idea if it is a positive solution to a negative condition." Can you imagine any more negative condition than America's debt? Can you imagine any reason why America should not get rid of its debt.

And Reverend Schuller's 10th commandment says that, "Say yes to an idea if it challenges us to think bigger and have more faith"—$1.8 trillion is a lot of money to think about paying. And ending yearly budget deficits of $160 billion is a sizable challenge. It will take great vision to see the possibility of getting the job done and it will take a great deal of faith to do the job.

This public servant, rancher, citizen believes that America has 10 good reasons given to us by Reverend Schuller to support the balanced budget/tax limitation amendment. I commend Reverend Schuller and his coauthor Paul David Dunn for putting a light in the tower and making sure that it burns brightly for all to see.

It is time that America discard partisanship and embrace patriotism. If America does the light in the tower will never dim.

PRESIDENT REAGAN'S PLAN FOR CENTRAL AMERICA IS MISLEADING THE AMERICAN PEOPLE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, on Monday evening I heard President Reagan say that Belisario Betancur, the President of Colombia, supported his new initiative to provide aid to refugees in Central America. When confronted with the proposal in its entirety, which is after 60 days and no agreement is reached in Central America that military aid will continue to be supplied to the Reaganistos, the guerrilla army attempting to overthrow the Sandinistas, Belisario Betancur denied having supported that proposal, stating that the proposal is no longer a peace plan but it is a preparation for war.

Mr. President, you have misled Belisario Betancur and you have misled the American people into believing that your plan is one for peace in Central America.

Over the last 3 years, an unprecedented military buildup has taken place and the unfortunate result of your policy is, Mr. President, that your military strategy has been a powerful reinforcement to the Sandinista government which you intend to overthrow.

I include the following article:

[From the New York Times, Apr. 16, 1985]

COLOMBIAN OPPOSES U.S. AID TO NICARAGUAN REBELS

(By Joel Brinkley)

BOGOTA, COLOMBIA, April 15.—The President of Colombia said today that he and other Latin American leaders were opposed to renewed United States military aid for rebels fighting the Nicaraguan Government.

Earlier this month the President, Belisario Betancur, told reporters in Washington that his reaction to President Reagan's plan on Nicaragua had been "very positive." But today Mr. Betancur said his reponse had been based on the plan's call for a cease-fire and negotiations.

He said President Reagan and Secretary of State George P. Shultz had not mentioned to him that the proposal also provided for renewed aid to the rebels, and he said he had not realized this was part of the plan until his return to Bogota.

Mr. Betancur, speaking in an interview here, said Mr. Reagan's recent call for Congress to approve $14 million in aid to the rebels made that part of the President's plan "no longer a peace proposal, but a preparation for war."

In the last few days, several senior Reagan Administration officials have said that Mr. Betancur and other Latin American leaders supported Mr. Reagan's initiative, including a call for renewed aid to the rebels if a deadline for talks in Nicaragua is not met.

"FOREIGN INTERVENTION" OPPOSED

Mr. Betancur said today that he and other Latin American leaders "firmly believe that any foreign support to guerrilla groups, whatever the origin, is clearly in opposition to the prevailing doctrine in Latin America regarding foreign intervention in the internal affairs of our continent."

His view on foreign financing of Latin American conflicts, he said, is "outright rejection" of the idea.

He said he had discussed the matter in the last few days with heads of state of many Central and South American countries, and added, "I haven't spoken with any Latin American leader who feels differently."

Mr. Betancur also said he believed that "we are now very close to reaching a full agreement" in the Contadora peace negotiations for Central America, which have been under way for more than two years.

The remaining obstacles, he said, involve agreements on limiting foreign military maneuvers, bases and advisers. But he said that "we have made some headway on that," adding that "there may be one or another matter out of the whole agreement that the United States would not agree with."

In the 60-minute interview at the Presidential Palace here, Mr. Betancur said that while parts of Mr. Reagan's Nicaragua initiative were "positive and constructive," other parts were in direct conflict with the goals of the Contadora discussions.

In what he called a "peace initiative" for Nicaragua, Mr. Reagan proposed a cease-fire and negotiations between the American-backed rebels and the Sandinista Government that would lead to new elections. Nicaragua immediately rejected the plan.

At the same time Mr. Reagan asked Congress to approve $14 million in renewed aid for the rebels, saying the money would be used for nonmilitary purposes for 60 days. If the Nicaraguan Government does not agree to talk with the rebels by June 1, Mr. Reagan said, the aid would then be available to the rebels for weapons.

Mr. Betancur was in Washington on April 4, when the plan was announced, and he said today that Mr. Reagan and Mr. Shultz had given him only a partial briefing on it. In a meeting that morning, Mr. Betancur said, they told him that they planned to propose a cease-fire, negotiations and nonmilitary aid to the rebels—ideas that Mr. Betancur said he accepted with enthusiasm.

I DID NOT KNOW IT WAS TIED

But he said that when he left the White House, he "did not know it was tied to the $14 million" in renewed aid to the rebels.

Mr. Shultz gave him a printed copy of the full plan as he left, Mr. Betancur said, but he did not have time to read it until much later.

That afternoon, Mr. Reagan appeared on national television and described his plan in detail. Mr. Betancur held a news conference in Washington at about the same time—he did not see Mr. Reagan's address, he said—and when he was asked what he thought of Mr. Reagan's plan, he said, "My reaction is very positive."

A few days later, Robert C. McFarlane, Mr. Reagan's national security adviser, told reporters that the leaders of the four Contadora countries—Colombia, Venezuela, Panama and Mexico—all had endorsed Mr. Reagan's plan, including the call for renewed military aid, although he said Mexico was "less effusive" than the others.

QUALIFIED SUPPORT

Today Mr. Betancur said, "I understand that Mr. McFarlane has interpreted my cautious remarks in which I stated that the proposal was, at least in part, constructive and positive, as a sort of blanket approval rather than qualified support."

If the Administration is trying to use his statements to gain renewed military aid for the rebels, Mr. Betancur added, "there would be a contradiction by whomever attempts to do so.

He said it would be "infinitely more constructive" if Mr. Reagan's proposal "made no mention of a 60-day time limit" for the end of nonmilitary aid, because that "is almost like an ultimatum."

Mr. Betancur said the first part of Mr. Reagan's plan, the call for a cease-fire, "is constructive and positive inasmuch as it delays the second part of the proposal, which is the onset of a military solution."

At a meeting in Panama last week, their first since last fall, officials from all four Contadora countries said their Governments had come to similar conclusions.

The Contadora group, named for the island off Panama where the first meeting was held, has been trying to fashion a peace plan for Central America since January 1983. The plan would encompass Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua.

TALKS ARE SPECTACULAR SUCCESS

Mr. Betancur, who is widely viewed as the Contadora leader most actively involved in the negotiations, called the meeting last week "a spectacular success." After several months of inaction, problems that had been blocking the talks are now resolved, he said, adding that the negotiations now seem to be surrounded by "a state of grace."

An agreement was reached Friday on the establishment of a commission to monitor an accord being negotiated on reducing arms in the region. "This was the greatest obstacle," Mr. Betancur said today. "We are now very close to reaching an agreement."

SUPPORT OF HOUSE RESOLUTION 125

(Mr. ROWLAND of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROWLAND of Connecticut. Mr. Speaker, Maj. Arthur Nicholson, Jr., was a dedicated and fine servant to his Nation. His career with the U.S. Army commenced in 1969 and was marked by numerous distinguished accomplishments.

Tragically, this patriot's service to our Nation was cut short when on March 24 Major Nicholson was brutally gunned down by a Soviet soldier while on duty in East Germany.

That action on the part of the Soviet Union was nothing short of barbaric.

There was absolutely no justification for the action which was taken by an agent of the Soviet military and I find the lack of any apology or acknowledgement of wrong-doing by that Government to be totally unacceptable.

Major Nicholson is gone, but the resolve and commitment of this Nation in preserving the peace lives on.

In his memory, a tree was planted at Fort Belvoir on April 3. At that ceremony, Karen Nicholson talked about her husband.

Her eloquent but simple words truly reflect well on Major Nicholson and they also demonstrate the grace and dignity which has been exhibited by Karen and the entire Nicholson family during this very traumatic time.

The Nicholsons reside in West Redding, CN, and I have the high honor of representing this fine family in Congress.

Mrs. NICHOLSON. Fort Belvoir is a very special place for this memorial. Not only because it is a beautiful post, but because it is close to Nick's colleagues, but also because it was here he attended OCS and he was commissioned by his father. It was also here that he was in charge of the unit on his first assignment. I feel close to Nick here because he loved the outdoors. I thank all of the people from around the world for their thoughts, letters and prayers.

To belong to the military is to belong to a very special family. Perhaps because we are so often away from our loved ones, a bond develops that you can find no where else. And that love and concern has opened many doors for Jenny and me and has stood by me this week. I especially thank each and every member of the Mission family, who have given unselfishly of themselves to see that our lives have been made easier and all of our desires met. Nick is the most patriotic person I've ever known and that's why he made the military his life. He felt that each and every day he did something for his country, for his family and for everyone he knew. He devoted his life to understanding other people, especially the Soviets, in the hopes that through friendship and knowledge of each other he could contribute to world peace. He didn't want to die and we didn't want to lose him, but he would gladly lay down his life again for America.

□ 1230

BUY AMERICAN URANIUM

(Mr. LUJAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUJAN. Mr. Speaker, today I am introducing the Federal Domestic Uranium Purchasers Act. This bill would require all Federal agencies, including the Tennessee Valley Authority, the Department of Energy, and the Department of Defense, to satisfy all future uranium requirements through the purchase of uranium that is mined, milled, and enriched within the United States by companies owned by U.S. citizens.

This "buy American" proposal has become necessary because of a long-term failure on the part of the Federal Government to act responsibly in seeing to it that this Nation has a strong domestic uranium mining and milling industry. Our national security and our energy independence are my primary concerns. In less than 4 years I have watched our domestic milling industry shrink by 75 percent to a dangerously low level. Only 6 of the 24 processing mills that were in operation in 1981 are still in operation today and most of them are practically standing idle. The adverse impact on uranium industry jobs is perhaps the worst it has ever been. Over 90 percent of the jobs have been lost and that means that more than 20,000 workers and all of their expertise and experience are gone. While I am deeply concerned about these men and women who are the brains and the backbone of this industry, I am alarmed about the long-term impacts on our defense capabilities as well as the commercial nuclear power industry.

Today, U.S. uranium production accounts for less than one-third of our 30 million pound U.S. annual requirement. What position will we find ourselves in if that production capability continues to plunge? The past 4 years have been a disaster and the next 4 years could mark the end of a viable domestic uranium mining and milling capability.

New Mexico contains about 41 percent of the uranium producible at a reasonable cost in the United States. Four years ago, we had 38 production mines in the State. April 4 was the last day of operation for our last uranium mine. These mines cannot be restarted at the drop of a hat. When they are not in operation their drifts and crosscuts begin to cave in. Some of them fill up with water. The end result is that a mine that is closed is lost and cannot be reopened without the expenditure of an inordinate amount of money. The pool of experienced labor is suffering a similar fate. Most of the 6,800 men and women who were employed at the beginning of this decade in New Mexico have moved on to other jobs in other areas. Another 100 miners ended their jobs in the section 23 mine. On June 1, 50 more lose their jobs and that will leave less than 200 people working in the entire uranium industry in our State. Our last mine is about to be closed and we are witnessing the extinction of uranium mining and milling in the State which contains 41 percent of the economically mined ore. To resume production will require a monumental expenditure of investment capital and the expensive training of new workers. The cost will be staggering and the time it could take may be dangerous to our security.

The Federal Domestic Uranium Purchasers Act is intended to solve some of these problems. While our mining and milling industry may not be able to compete directly with inexpensive foreign labor, extremely high grade ore and foreign government subsidies, it can provide this Nation with a uranium supply that is not subject to the whims of an unstable government or that will not become part of a foreign uranium cartel.

The Atomic Energy Act requires the Department of Energy to "assure the maintenance of a viable domestic uranium industry." What is "viable" and what is not has come to be the subject of dispute between the report writers at the Department and the industry. My bill does not redefine these terms or in any other way join in that dispute. Instead, I have taken an alternative course. If all Federal agencies are required to purchase domestically produced and enriched uranium, a domestic mining and milling industry will continue to exist to supply at least that minimum level of demand. Some of our mines and mills will be saved from extinction and some of our workers will be kept on the job where their experience and expertise can be put to use. In the meantime, our industry will have the time and incentive to regain its competitive position in the world market.

I am also concerned about foreign control of production and milling operations within the United States. While our Federal Government may have chosen not to act in its own best

interests in saving this industry from extinction, other governments may not be as imprudent. I do not want to find this Nation's uranium resources entirely under the control of foreign nationals and, if a domestic industry owned and controlled by U.S. citizens is not maintained, that problem may well develop. For that reason, the Federal Domestic Uranium Purchasers Act contains a provision requiring Federal agency purchases to be from business entities owned and controlled by U.S. citizens or at least permanent U.S. residents.

In addition, this bill contains a provision deleting the "recovery of the Government's costs" language from that portion of the Atomic Energy Act concerning enrichment services. In so doing, my intent is to allow the Department of Energy to keep enrichment costs as low as is reasonably possible and thereby make the purchase of domestically mined and milled uranium an attractive proposition to our domestic nuclear power industry in the years ahead.

Mr. Speaker, this marks the final dying gasp of New Mexico's uranium industry. It is a bleak ending for thousands of men and women who worked to produce the yellowcake that made our country strong and prosperous during the last 35 years. My heart goes out to the workers in the section 23 mine who have gone home for good. I hope its not too late to save the rest of this industry from a similar fate.

□ 1430

SEARCHING FOR THE MISSING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. LUNGREN] is recognized for 5 minutes.

Mr. LUNGREN. Mr. Speaker, I rise today not only as a Member of Congress but also as a parent—a parent who is increasingly alarmed by the number of missing and exploited children being reported every year.

If current trends continue, 1½ million of our children will be reported missing this year.

A large number of these children—some suggest as many as 1 million—will be classified as voluntarily missing. These are the runaways or so-called throwaways who are frequent victims of street crime or exploitation. In fact, recent studies have shown that 85 percent of the children who have been criminally or sexually exploited were missing from their homes at the time of the act of exploitation. These numbers have grown so large that some who study the issue now estimate that 1 in 4 female children and 1 in 10 male children will be molested or raped by the time they reach adulthood.

Then there are the between 25,000 and one-half million children who will be victims of noncustodial parental kidnaping. These children, through no fault of their own, are caught in the middle of a conflict between mom and dad. The price exacted from these children will be measured in terms of emotional and physical abuse.

Finally, we can expect as many as 50,000 new missing children cases to stand unsolved at year's end. These are the victims of criminal abduction or foul play.

Statistics alone are not enough to define the problem. This issue cannot be brought into perspective without looking at the hundreds of stories behind every number. This year, children will be taken from shopping centers, farms, playpens, bedrooms, schoolyards, and bus stops. Studies show that those taken will range from the very poor to the very rich, will come from every race, and are just as likely to be taken in big cities as they are in small communities and rural areas. Sometimes a great deal of evidence will be found, and at other times parents will go for years without so much as a trace.

The story of the Bradbury family from southern California is not untypical. On October 18 of last year, 3-year-old Laura Bradbury was camping with her family in Joshua Tree National Monument in California. She followed her brother to the bathroom approximately 50 yards away. Five minutes later, he came out and Laura could not be found. An extensive 3½ day search of the area produced no trace of her and it was then determined she had been abducted.

In the days, weeks, and months since Laura disappeared, her friends and family have used every means available to locate her. They have established the "Laura Bradbury Organization" which, among other things, has distributed pictures of Laura on thousands of posters, fliers, and bumper stickers throughout southern California.

Behind me is one such example: This poster can be found at 30 bus shelters in the area Laura disappeared. As you can see here, it includes three different pictures of Laura. It also includes a description of Laura and a summary of the kidnaping. Also prominently located are two very important phone numbers. The first is an anonymous information line—(714) 960-3017—the second is the phone number for the San Bernardino Sheriff's Department—(619) 366-3781.

The "Laura Bradbury Organization's" strategy is simple: The more people that know about Laura's kidnaping, have her description, and know who to contact with information, the greater the chance that she will be found.

In a sense, the greatest challenge facing our society in terms of the missing children issue is one of education. One California professor who has studied the problem commented that, "We find more stolen cars and stray animals than missing children each year." While the made-for-TV film "Adam" brought the problem widespread attention in 1983, it seems the more we learn about the issue, the more we realize how unprepared as a nation we are to deal with it.

At the end of this month, on April 29th at 10 p.m., NBC television will broadcast a program entitled "Missing * * * Have You Seen This Person?" This special presentation, hosted by David and Meredith Baxter Birney, will give nationwide attention to a number of unsolved missing person cases, including Laura Bradbury's. By using the resources of television, this special gives Americans a chance to "Join in the search" for these individuals and moves us one step closer to the goal of educating the public about the seriousness of the problem.

Next month, Laura Bradbury is supposed to celebrate her fourth birthday. We do not know if she will be found by then, but for her, and the thousands of cases like hers, we must be certain that every course of action is being taken.

At the Federal level, we were able last year to enact legislation which established a new toll-free "hotline" administered by the National Center for Missing and Exploited Children—(800) 843-5678. This number is available to individuals who believe they have leads or information on a missing child and all calls are strictly confidential. I have also in the past supported legislation which requires the FBI to list missing youth in a national computer bank. These are important steps in the right direction, but there is much more that needs to be done.

Remember, too, that more often than not, it is easier to prevent a child from being taken than to find a missing youngster. Experts advise teaching even young children their full name, address, phone number, and how to place a long-distance phone call. It is also important for parents to know their child's blood type and have on hand a set of the child's fingerprints, current photograph, dental records, and hair sample.

As parents, it is easy to think that our child could never be taken. The record, however, tells a different story. As a nation, we must work together to educate our children, support the families of victims, and develop new methods of recording and finding missing children. As one victim who founded a nonprofit group to train search-and rescue dog teams noted: "If we can spare one family the anguish we have, it will be worth it."

AID TO THE CONTRAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. HAYES] is recognized for 5 minutes.

Mr. HAYES. Mr. Speaker, I rise today to speak in opposition to the President's proposal to send more aid to the Contras waging war in Nicaragua. The kind of assistance the President is trying to send the so-called freedom fighters has been disguised as humanitarian aid this time. For some strange reason, our President feels it necessary to provide the Contras with "food, medicine, and other means of support for survival." We are talking about only $14 million—forget about the Federal deficit for a few moments while we record this vote; it's only another $14 million.

I can only begin to tell you what $14 million would do to help rebuild the South Side of Chicago. "Food, medicine, and other means of support for survival" sounds like just what we need. It would restore $12.5 million in health and human services and $2 million for job training programs. We could teach our children, feed our families, rebuild our roads and our city and take care of our sick and elderly. Instead, our food stamps have been cut, our job training, our Medicaid and our Medicare have all been cut. It seems that the only way for us to get aid from this President is to take up arms and call ourselves freedom fighters.

I suggest that if the President is really looking for freedom fighters then he needs only to look over at South Africa where there are millions of them. They are fighting for freedom against a small but well-armed minority that continues to strip them of their citizenship in their own homeland. Over 300 South African freedom fighters have been killed in police violence in the past year, but the President has not proposed any aid for them—military or humanitarian. When South African police execute terrorist attacks against unarmed and innocent people attending funerals, the President accused the mourners of provoking the attacks. Through his policy of "constructive engagement," he has let the South African Government know that he supports their violent oppression.

It's obvious that the President doesn't recognize freedom fighters when he sees them. As long as someone is willing to pick up a gun, point it at the Soviet Union, and say that they're fighting communism, the President thinks that they are freedom fighters. The way to fight communism is not to put guns in the hands of everyone who claims to be an anti-Communist. When we learn to feed the hungry, clothe the naked, and to support the fight for real freedom and democracy everywhere in the world—including Central America and South Africa—then we will all be freedom fighters.

The President has learned a few tricks though. He has learned that we are willing to support peaceful negotiations in order to solve conflicts, that we in the Congress would rather solve problems through peaceful dialog than through military confrontation. And that is what has led to this incredible offer of "humanitarian aid" for the Contras. What the President hasn't learned, however, is that we in the Congress can see right through this disguise. Let there be no doubt about it; a vote for Contra aid is a vote for military aid. This is the same $14 million that was military aid before, and in 60 days, it will be military aid again. A vote for the Contras is a vote for expanding the guerrilla war in Nicaragua.

The situation in Central America is dangerous enough without more arms or any more of the President's "humanitarian aid." And his meddling in the situation does not make it any better. There is a direct link between the over $75 million that this administration has already sent down there and the growth of the Contras. From just a few hundred in 1981; today they number well over 16,000. We've bought and paid for them with American tax dollars. We've trained them, and we've armed them, and they've gone out and they've raped and pillaged and kidnaped and murdered innocent civilians in Nicaragua. If we had spent that same amount of money on education and job training in this country, we'd have less crime and lower unemployment. The money that we have already spent on the Contras has helped to spread the worst elements of war. The same money spent on our own people could have given us something to be proud of.

Make no mistake about it, I am as concerned with the security of our Nation as any other Member of this body. But I want the President to know that there are young people in Chicago who need jobs this summer, and that they're freedom fighters for jobs. I want the President to know that there are senior citizens in Chicago who need their Medicare and their Social Security, and that they're freedom fighters for Social Security. I want the President to know that there are hungry people in Chicago, and they're freedom fighters for food.

I want the President to know that there are freedom fighters all over the country. And I want him to know that the message is clear; if it's military aid, they don't need it and we can't afford it. If it's humanitarian aid, we need it. We need it at home. The fight for freedom in his own back yard isn't over yet.

Thank you.

□ 1440

CENTRAL AMERICAN TRIP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey [Mr. GALLO] is recognized for 5 minutes.

● Mr. GALLO. Mr. Speaker, I rise today to report to my colleagues on my recent trip to Central America.

What I have seen there strengthens my belief that the President is correct when he says that we must be consistent and firm against the spread of international terrorism throughout Central America.

I visited three nations during my trip last week. Guatemala, El Salvador, and Nicaragua.

I saw a great contrast between Guatemala and El Salvador on one hand and Nicaragua on the other hand.

In Guatemala, the military government has promised free elections this fall. In spite of economic and other problems, Guatemala is moving toward democratic government.

In El Salvador, President Duarte told me that he is committed to a growing democracy at home and to finding a plan for peace in the region.

Duarte's government has brought stability to a nation which was plagued with violence. Today, the people appear to be committed to ending violence.

Stories of concentration camps are simply not true. I visited one of these camps, where people from the countryside live for their own protection. I saw no barbed wire or guards. I met the major of the camp. I talked to the people. They would like to return to their homes in the countryside.

Fear of terrorism keeps the people in the camps. An end to violence would mean a return to normal lives for the people of El Salvador.

In Nicaragua, the story is quite different. The people I talked to felt betrayed by their Government and by the revolution.

The only independent newspaper, La Prensa, must submit to total censorship. While I was there, the newspaper failed to publish because most of the material in the daily was cut by the censors. That has occurred 38 times in the recent past.

The censors removed all references to the Reagan peace plan from La Prensa, except for President Ortega's statement, calling the plan an act of aggression. Washington Post and New York Times editorials on the plan were also censored.

A nondenominational radio station must submit transcripts of all broadcasts, including sermons.

Religious leaders complain that they are not free to practice their religions, if they disagree with the Government.

There is no free enterprise. Businesses large and small are told how many workers they can employ, what

their salaries will be, what products they will produce and what price they will charge.

I spoke with a member of the Sandinista government, Alejandro Bandana, and I asked him about the lack of freedoms in Nicaragua.

He blamed the war for the lack of freedoms. The war does not explain the total lack of domestic freedoms. The war does not explain the large amount of men and weapons in Nicaragua.

Evidence does not support the idea that the Nicaraguans are fighting a defensive war with its neighbors. The evidence indicates that the Sandinistas are limiting freedoms at home and gathering weapons from abroad to wage an offensive war of subversion against its neighbors.

During my trip, I met with Government representatives in each country. I met with citizens from all walks of life on both sides of the regional conflict.

We also delivered medical supplies to a camp in El Salvador, and saw the needs of the people in that regard, Antiburn salve in our supply delivery was immediately administered to a young burn victim.

The question before the Congress on aid to Nicaragua revolves around the question of talks to encourage a freer and more peaceful atmosphere in all of Central America.

If those talks produce results, the Reagan plan calls for economic aid to help the people of that region.

If those talks fail and terrorism continues to be the rule in Central America, then the President proposes positive action to counter terrorist activities. Regional stability is the goal of this policy. The alternative is continued conflict and a wider spread of terrorism.●

LEGISLATION TO EXTEND THE HOSPICE CARE PROGRAM UNDER MEDICARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I am pleased today to be joined by Representative BILL GRADISON in introducing legislation to extend for 3 years, the hospice benefit under the Medicare Program. As my colleagues very well know, Congress acted in 1982 to provide for the first time, full coverage and recognition of hospice care. The legislation introduced in the 97th Congress received the support of more then 240 Members in the House and more than 50 Members in the Senate. There was a strong, bipartisan feeling at that time that hospice care was an appropriate alternative to make available to care for the terminally ill. I am certain that support for hospice care continues today and should allow for the hospice benefit to continue.

Under the present program, Medicare beneficiaries are eligible for hospice care for up to 210 days if they are certified to be terminally ill and have less than 6 months to live. Certified hospice programs must provide care on a 24-hour basis in the home, on an outpatient basis, as well as inpatient care which must be limited to 20 percent of the total days of care. In addition, hospice programs must offer bereavement counseling to family members. At present, the hospice benefit is scheduled to expire on September 30, 1986. The legislation we are introducing today simply extends the current program for 3 additional years.

One area of concern in the current hospice program centers around Medicare payment to hospices. In determining payment to hospices, the Department of Health and Human Services [HHS] has calculated per diem rates for various levels of hospice care. Since the development of this payment system for hospice reimbursement, I have been greatly concerned about the level of the per diem rates established by HHS. When first established, rates were set at $46.25 for routine home care, $311.96 for continuous home care, $55.33 for inpatient respite care, and $271 for inpatient care. Last year, Congress acted wisely to approve legislation to increase the routine home care rate to $53.17, the level included in the proposed hospice regulations. However, continued concern exist in hospice programs around the country about the level of the hospice payment rates. With HHS receiving cost reports from hospice programs, I am hopeful that in the near future the actual cost of hospice care can be better determined and payment rates more appropriately established. Low and unrealistic payment rates discourage hospice programs from seeking Medicare certification and place a great financial strain on programs that are receiving hospice reimbursement. This is an inequity which Congress must stand willing to correct.

This measure to extend the hospice program clearly indicates our continued support for hospice care and our desire to avoid any uncertainty in the field amongst providers and beneficiaries about the continuance of the hospice benefit under Medicare. Implementation and participation in the hospice program has been somewhat deliberate. Of recent, though, interest and participation has been increasing and it would be a tremendous disservice to providers interested in obtaining Medicare certification to be unsure about the future course of the hospice benefit.

In addition, the initial legislation providing medicare coverage for hospice care required the Department of Health and Human Services to submit to Congress prior to September 30, 1983, a report on the effectiveness of the hospice demonstration projects. Also, HHS is required to report to Congress before January of next year on the effectiveness of the Hospice Program. An executive summary of the hospice demonstration project final report has just been recently released, and the contract for the report to review the effectiveness of the Hospice Program was just issued. Obviously, a quality report evaluating the success or any shortcomings of the hospice benefit is unlikely to be provided to Congress prior to January 1986. A simple extension of the current program should provide HHS with sufficient time to issue a thorough hospice evaluation report to Congress.

Mr. Speaker, beyond the compassionate form of care delivered by hospice programs in caring for the terminally ill, another major characteristic of hospice care is its cost-effectiveness. It is widely concluded that the substitution of hospice care for acute services offers a real opportunity to obtain cost-savings in the Medicare Program. The Congressional Budget Office has estimated that hospice coverage under Medicare can save more than $100 million over 3 years. The final report on the hospice demonstration project also concludes that hospice offers a cost savings over the last year of life. These facts are critical as we continue to struggle with the Federal budget to reduce budget deficits. We must strongly encourage the development and utilization of cost-effective programs such as hospice care.

Mr. Speaker, this legislation is important as we seek to continue to provide support to the hospice movement around the country. Over the past decade, we have seen enormous growth in the hospice movement, and today there are estimated to be more than 1,200 operational hospice programs. Hospice care has proven that it is deserving to be a part of our Nation's Federal health care system. The legislation I am introducing will provide continued support to the hospice industry and provide additional time to evaluate the benefit and develop changes to ensure the success of hospice into the future.

The needs of the terminally ill and their family members are unique. Hospice care recognizes these needs, and we must continue our commitment to meeting the demands of the dying. I urge my colleagues to support this legislation.

Following is the text of this legislation:

H.R. 2070

A bill to amend title XVIII of the Social Security Act to extend hospice benefits under the medicare program for an additional three years

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. THREE-YEAR EXTENSION OF HOSPICE BENEFITS UNDER MEDICARE PROGRAM.

Section 122(h)(1) of the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248, 96 Stat. 362), relating to the end of the effective date for hospice care, is amended by striking out "October 1, 1986" and inserting in lieu thereof "October 1, 1989" each place it appears.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. FAZIO] is recognized for 5 minutes.

Mr. FAZIO. Mr. Speaker, I was unable to be on the floor at the time that the House voted on Senate Joint Resolution 15, Helsinki Human Rights Day and House Concurrent Resolution 110, extradition of accused Taiwanese. Had I been present I would have voted in favor of both pieces of legislation.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. KLECZKA] is recognized for 5 minutes.

● Mr. KLECZKA. Mr. Speaker, I was unable to be present today when the House voted on rollcall No. 54. Had I been present I would have voted "aye." Thank you.●

REVENUE SHARING ABSOLUTELY VITAL

(Mr. KOLTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLTER. Mr. Speaker, it is my understanding that the President's new budget proposal would phase out general revenue sharing at the end of fiscal year 1986. This approach is shortsighted and will undoubtedly wreak havoc on thousands of local governments throughout the United States.

While revenue sharing is an important element in many municipal budgets, it is absolutely vital to the many communities that have not benefited from the general economic upturn. Towns and communities that have relied on a single industry like steel need revenue sharing now more than ever.

According to a 1983 survey conducted by the National Association of Towns and Townships, almost 34 percent of the 3,000 small governments that responded to the survey indicated that they relied on revenue sharing to fund their fire, police, or rescue services. Thirty-five percent used revenue sharing to assist in funding services to the elderly. Lastly, some 79 percent needed revenue sharing to fund transportation services at the local level.

While I agree that responsible budget deficit reduction will be painful, I believe we must also be fair to local governments. Raising taxes at the local level is not the answer. Yet, without revenue sharing, local governments will either have to cut programs or raise taxes. There is no other way, around it.

NATIONAL LIBRARY WEEK, APRIL 14 TO 20

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS. Today, Mr. Speaker, I would like to discuss National Library Week and pay tribute to the libraries and librarians of the Nation during the week of April 14 to 20. National Library Week is not a new week. National Library Week is one like many others. We tend to pass easily over such designations, but I would like to take today as an opportunity to discuss at great length the meaning and significance of the Nation's libraries and information systems.

National Library Week is very much a part of our effort to pay homage to our educational system and to begin to recognize the fact that we are in an age of information, that our educational infrastructure thoroughly rests on libraries as a foundation, that without libraries as a foundation, our educational infrastructure would be totally inadequate.

The President has himself again paid tribute to National Library Week with the following statement, and I quote from the President's statement on National Library Week:

It gives me great pleasure to salute the American Library Association on the occasion of National Library Week, April 14 to 20. I am reminded of the words of Ralph Waldo Emerson: "It is a good reader that makes a good book."

If we are to be a nation of readers, we must help our children discover the treasures of the libraries of our schools and cities. Throughout life we must refresh ourselves at the fountains of knowledge and academic and special libraries. Although electronic technology has vastly expanded the universe of information, access to this information continues to be assured by the assistance of our nation's librarians.

I welcome this opportunity to congratulate and to commend to all Americans the professional librarians and the many able community volunteers who stand ready to assist us who seek knowledge and pleasure in books. On this 28th annual observance of National Library Week, I salute the millions of Americans who use the libraries network of information sources.

The library's open door beckons all to enter. I invite all Americans to join as a Nation of readers.

It is signed, Ronald Reagan.

□ 1450

I begin this special order with a reading of the President's statement on National Library Week, and I want to follow that by stating that the testimony of the American Library Association, President E.J. Josey, at a press conference held yesterday with respect to National Library Week, follows in the same vein up to a point. And while the President, like most Members of Congress and most national leaders have only good words to use in connection with the Nation's libraries, the point of demarcation, the point of difference begins when we discuss the critical funding needs of libraries.

In my overall statement, I want to talk about the value and the cost benefits of modern libraries because the perception, the misguided perception of the value and cost benefits of modern libraries has led to a perception that libraries do not need money, that they do not need funding to operate.

We are faced with a situation where the President has high praises for libraries and yet he has placed zero in the budget for the Library Services and Construction Act. He has placed zero in the budget for the funding of college and research libraries and many other activities which relate to libraries have received scarce funding.

I also want to discuss the role of libraries in the learning society in this age of information. In the report that was prepared by the President's Committee on Excellence in Education, they referred to our age as an age of information, and they said that we are in a learning society where learning becomes vitally important from the cradle to the grave. At every level of our lives, we are in a process of learning, and the Commission addressed itself to the need to have resources, and the need to have institutions which help and assist Americans at every stage of that process of learning.

I also want to discuss the public library as a family learning center. And while it plays a role in this process of the learning society, the society which must provide Americans with the means and the resources for an education for their entire lifetime, I intend also to discuss information literacy and what that means.

We talk a lot about literacy, and literacy is one of the goals of the present American Library Association. But basic literacy differs from information literacy. The definition of information literacy is, a person is information-literate when they understand how to use information in their own work, when they know how to use the various tools that are available in their own occupations. And I want to discuss that and the significance of that for the Nation.

I also intend to discuss the current Federal information crisis, the policies of our present administration and how those policies impact on the provision

of information at every level in the American society.

Finally, I would like to conclude with a discussion of the state of the Federal library and information support effort, and that impact on the entire Nation.

Before I proceed, however, I understand there are others of my colleagues present or who will be submitting written statements for this special order on National Library Week.

Mr. THOMAS of Georgia. Will the gentleman yield?

Mr. OWENS. And I now yield to the gentleman from Georgia [Mr. THOMAS].

Mr. THOMAS of Georgia. Mr. Speaker, I am honored to once again join my good friend and colleague from New York, MAJOR OWENS, in support and recognition of National Library Week.

I had the pleasure of visiting with Georgia members of the National Library Association in my office yesterday, and, as always, was further enlightened by the commitment our librarians have to the enrichment of our daily lives through teaching.

Library services are broad in scope and offer us the opportunity of lifelong learning. They have programs for parents and day care centers, as well as programs that serve children directly. They work in direct conjunction with our public school systems and institutions of higher learning to help students of all ages acquire basic reading skills and to promote the joy of learning and discovery. They provide literacy programs, materials for persons who are blind and disabled, books for disadvantaged students, and services for persons with limited proficiency in English. As you can see, our libraries truly benefit all segments of our society.

At a time when we face the most staggering Federal budget deficit in our Nation's history, I think it is important to remember that an investment in our libraries is an investment in our future. It is an investment which ensures the rights of all our citizens to get information and resources for continued learning. It is an investment which is important to the quality of life, from early childhood to adulthood. It is an investment which promotes sound government, enchances the quality of community life, and improves employment opportunities.

I join with my colleagues in thanking and commending our Nation's librarians for the outstanding work they do in helping to enrich the lives of millions of Americans through learning. Thank you.

Mr. OWENS. National Library Week is a time for millions of Americans to show their appreciation for the many diverse library services we use and enjoy. This is certainly a time to even reemphasize the fact that libraries are a vital part of the national education infrastructure.

Libraries and information services of all kinds are increasingly more important as our society becomes more complex. Information literacy which is defined as the ability to use information in one's own work has become a major operating skill necessary to function productively.

What happens to libraries and information services has definite impact on prosperity, progress, and the security of the Nation as a whole. This year it appears Government funding for libraries is under a more intense attack than ever before. And, in addition to recommending zero in the budget for the Library Services and Construction Act, the present administration has signaled its intent to wage a full-scale war on the library and information support services provided by the Federal Government.

We view with particular alarm the actions of the Office of Management and Budget. It appears that David Stockman has become the unofficial censor, the book-burning tzar of the Federal Government. OMB has indicated that it will continue to combine library services with janitorial and repair services and contract these executive branch libraries out to commercial companies.

Still worse, what has caused the greatest alarm is the announcement that OMB proposes to massacre the budgets of all information generating units except the information services of the White House. Thousands of publications, films, and other information items will be eliminated if in the wisdom of Mr. Stockman and his staff they are judged to be unnecessary.

There is good cause to fear that we are about to witness the equivalent of a massive book burning compaign. The OMB is guilty of gross abuse of power. No set of accountants or budget busters should dare to assume the awesome responsibility of deciding what information should be provided to the people of this great democracy.

There is ample evidence which indicates that this administration recognizes the value of information in our very complex society. The modernized, electronic information systems in the White House as part of the White House publications apparatus have required a budget increase at least four times greater than the amount budgeted for White House information services in the previous administration.

While making the claim that there is not enough money available for the standard information services to all of the people, it appears that Mr. Stockman has made unlimited funds available to promote the White House point of view.

During this National Library Week, which highlights so many diverse needs and accomplishments of so many different kinds of libraries, it is also important that the attention of the Congress be focused on ways to challenge the sweeping powers which are being assumed by the Office of Management and Budget. If far-reaching changes must be made in Federal publication policies and information services, it is the duty of the Congress to seek a more nonpartisan, responsible and rational way of reviewing and reshaping this vital function.

National Library Week is an appropriate time to remind the American people that the information policies of our Federal Government directly impact on the quantity and the quality of useful materials which are available in our research, academic, school, and in our local public libraries.

Consider the following letter addressed to Members of Congress from the president and chief executive officer of the New York Public Library in New York City, one of the oldest, largest, and most well recognized of the research libraries, which also happens to be the central library for the New York public library services. It serves three counties, Manhattan, the Bronx, and the county of Richmond.

Mr. Vartan Gregorian sent the following letter:

THE NEW YORK
PUBLIC LIBRARY,
New York, NY, April 12, 1985.

DEAR MEMBER OF CONGRESS: At a time when the importance of an educated and informed citizenry has never been greater, there is grave danger that all federal support for libraries, a major source of learning and information for the nation's citizens, will be eliminated. I write to you, and The New York Public Library's librarians visit, to let you know of the harm that would result from these proposals.

The New York Public Library is a large and complex institution. It includes both circulating and research functions, and receives substantial public and private funding. Because of this complexity, the ways in which federal actions affect the Library are numerous. Administration proposals on a variety of subjects, if enacted, would have a devastating impact on our ability to serve the public. I would like to bring to your attention some of the major programs proposed for elimination or major reductions:

Library Services and Construction Act (LSCA). This program, located within the Department of Education, is scheduled for elimination this year. If this elimination is enacted, the New York Public Library would be forced, in turn, to eliminate or drastically reduce the many programs funded by LSCA. These include: training volunteer readers at our Library for the Blind, conducting literacy tutoring and English as a Second Language Instruction, publishing the Directory of Community Services, and providing a job advisory service. With LSCA funds we are also able, this year, to make one of our branches accessible to the handicapped, and to run a computerized data base for circulating libraries in the region. The projected annual loss to The New York Public Library

in LSCA funds would be $989,000; the loss to those who use our programs and services would be much more.

Strengthening Research Library Resources (Title II C). A valuable resource for the nation's future will be lost if this Department of Education program is eliminated, as has been proposed. The rich collections of research libraries are well known; what is not so well known is the extent to which these collections are often deteriorating on the shelves or otherwise inaccessible. With a $235,000 grant from Title II C, The New York Public Library is microfilming valuable material on World War I. Without this project, a valuable record would have decayed to the point of not being usable; now a filmed record exists.

The National Endowment for the Humanities is another agency of major concern to The New York Public Library. This agency is proposed for reductions of 11%. One program within the agency is singled out for a cut of 57%—The Public Libraries Program. While we oppose any reduction in the NEH funding, we particularly deplore the size of the reduction in the Public Libraries Program. The NEH has provided close to $2 million a year in general operating support for the Research Libraries of NYPL. In addition, projects that have been or will be conducted with NEH support include: cataloging American Musical manuscripts, the exhibit and program "Censorship: 500 Years of Conflict," access to our manuscripts and archives collection, and the upcoming exhibit "New World Voyages in the Age of Discovery."

Revenue Foregone Postal Subsidy. The administration has proposed total elimination of the appropriation that supports 3rd class mailing for non-profit organizations and for the blind. In place of the appropriation, cross-subsidization is proposed whereby first class rates would subsidize non-profits and the blind. This is illegal under current postal law. Any change in the law would be controversial and would require lengthy review. The postal subsidy through appropriation of $981 million must continue until such time as a new method becomes law. The enclosed fact sheet demonstrates that the cost to this institution would be over $1 million if postal subsidies were eliminated.

Revisions in Tax Law. The New York Public Library has historically been supported by a partnership between the public and private sectors. Annual giving by private donors is essential to our operations, as are major gifts for endowment and capital needs. The incentive in the tax code for private giving is critical to maintaining and building this funding base. We urge that changes in the tax code not discourage the generous individuals whose help is critical to our future.

Telecommunications Costs. A new filing by AT&T before the Federal Communications Commission would send telecommunications costs for libraries skyrocketing. Computerized networks are increasingly a major means by which libraries provide information to users. Because libraries are committed to providing access to information and learning free of charge, we have no way of passing these costs on to users. Because this role of libraries is so thoroughly in the public interest, a special exemption on a "library rate" should be instated, and the AT&T request before the FCC should be denied.

I want to mention briefly two other agencies endangered by budget cuts, The National Endowment for The Arts and the National Historical Publications and Records Commission. The programs of these agencies provide essential support to libraries and other cultural institutions; we urge their continuation at current levels.

The sheer length of this list demonstrates the extent to which the administration's proposal will hurt libraries and the public they serve. For The New York Public Library, we estimate a loss of $2 million from the elimination of LSCA and postal subsidies alone, with the potential of much greater harm from changes in telecommunications and tax policies.

I urge you to help reverse these damaging proposals. We and the citizens we serve need your assistance. Thank you for your consideration and attention.

Sincerely,

VARTAN GREGORIAN.

□ 1500

That is the letter from the president and chief executive officer of the New York Public Library. His library had been traditionally an outstanding innovative library providing services not only those traditional services to scholars, to students and to people who use its vast, tremendous research libraries but also providing services to people in all parts of New York in the three counties that they serve. They have been very innovative, they have had outreach programs to reach people who needed jobs, job corps centers. They have had career information centers.

There is practically no forward looking program, an outreach type of program which has not been sponsored by the New York Public Library.

In the neighboring area of Brooklyn, similar programs have been sponsored including a job information center funded by the Library Services and Construction Act and a career information center also funded by the same act.

These are examples of programs funded directly by the LSCA, and programs which would not exist if that act is not funded again.

The American Library Association, as a commentary on the report that was issued in the spring of 1983, the report which was called "A Nation At Risk" was submitted to the President by the Commission on Excellence in Education, made several outstanding comments which were later published, I believe important comments, published in a booklet which they entitled "Alliance for Excellence." In the Alliance for Excellence, the American Library Association points out the numerous ways in which no education system can go forward in this country unless it also takes into consideration the needs of the Nation's libraries. Every school, every college, every university has at its center, its very core, the appropriate library collections and services.

Beyond the school and libraries, individuals who continue their learning also use public libraries and other special libraries.

□ 1510

If you consider the fact that each individual goes to school only a limited part of their lives, that if an individual gets a Ph.D. degree, it means that they went probably through 12 years of elementary and secondary schooling, 4 years of college training and 4 years of graduate work.

So at the minimum, an individual would spend 20 years in the formal institutions related to education, colleges, universities, public schools. The rest of the years of an individual's life, if they live to be 65, the rest of those years, 45 years, would be spent without the support of any one of those formal education institutions, and institution of the type of the public library is the only institution that they would be able to turn to for the kinds of extra support they needed beyond their own personal research and study collection.

The letter from the head of the New York Public Library highlights what the critical issues are facing libraries in our Nation at this time. The report from the American Library Association Task Force on Excellence in Education, which comments on the "Nation At Risk" report, has interesting commentaries on the basic realities in the "Nation At Risk."

I will read a few excerpts from this report as evidence of the kind of concern that the report speaks about.

Reality No. 1. The extent to which parents introduce their children to books.

Does the gentleman wish to speak on this special order? Mr. ROBIN TALLON of South Carolina.

Mr. TALLON. If the gentleman would yield 30 seconds to me.

Mr. OWENS. I would be happy to yield to the gentleman.

Mr. TALLON. Mr. Speaker, I would like to commend the gentleman from New York [Mr. OWENS] for arranging these special orders in recognition of National Library Week.

I have enjoyed the gentleman's comments on the LSCA Act; that those funds are very important to all our congressional districts. They are especially important in the congressional district that I represent, because rural South Carolinians have the same sense of isolation that all rural residents experience. Public libraries long ago devised ways to minimize this isolation by using bookmobiles to bring the library to those people living too far from the library.

My Sixth District is very large and heavily agricultural, thus a perfect candidate for bookmobile service. I am proud of the job our libraries are doing to bring needed information to rural South Carolina.

We are indeed in an information age, and it is important that all citizens have access to the vital information necessary for decisionmaking. Grants to purchase bookmobiles using the Library Services and Construction Act funds are enabling our public libraries to continue this long tradition of outreach.

Mr. OWENS. I thank the gentleman from South Carolina, and I would like to comment that the Library Services and Construction Act has done most for small libraries, for rural libraries, and in many cases, the state support systems which now exist for rural libraries would not exist at all if it had not been for the passage of the Library Services and Construction Act more than 20 years ago.

That act allowed States to, for the first time, organize support staff, gave them money for adminstration overhead, allowed them to coordinate those libraries throughout the State which needed help most and provide collections to back them up.

So rural libraries will lose the most if we do not have continued funding for the Library Services and Construction Act.

I might also note that State libraries themselves in almost 30 States, the State libraries did not exist in any form other than to serve the State legislature before the passage of the Library Services and Construction Act. Thirty State libraries would be tremendously hard hit and services beyond service to their local legislatures would be cut completely if they do not have the funding which is found in the Library Services and Construction Act.

Mr. Speaker, it has been pointed out that libraries are really funded throughout the Nation primarily through local and State sources. In fact, when you average it out, about 95 percent of the funding for libraries come from those two sources; State and local funding. Only 5 percent is Federal funding.

The question was raised, if so much is already provided by the local and the State governments, why do the not provide it all?

This is a curious inverse reasoning which penalizes those who have done the most and takes away the most flexible funding. The funding that appears in the Federal Library Services and Construction Act is flexible funding which allows systems to cooperate among themselves which finances interlibrary loans, which does the kinds of things which they could not afford otherwise.

They also are in a situation where the cost of libraries has risen dramatically, and to take away that 5-percent funding for libraries would seriously jeopardize their local funding in many cases.

Federal funding is used as matching grant funds in some cases, and those matching grants—the other amount would not be there if you did not have the Federal funds to begin with.

Part of the problem, as I said before, is the perception of the value of libraries, the low perception held by the present administration. Nevertheless, this administration does put a great deal of emphasis on education, or at least does a great deal of lip service with respect to education.

For this reason, I am going to quote from the report of the American Library Association which comments on "A Nation at Risk."

In considering "A Nation at Risk," the ALA task force discussed several realities. Reality No. 1 is that learning begins before schooling. The extent to which parents introduce their children to books, culture and learning affects children throughout life. "A Nation at Risk" points out to parents the following:

"As surely as you are your child's first and most influential teacher, your child's ideas about education and its significance begins with you. You must be a living example of what you expect your children to honor and emulate. Moreover, you bear responsibility to participate actively in your child's education. You should nuture your child's curiosity, creativity and confidence.

Above all, exhibit a commitment to continued learning in your own life.

The commentary by the ALA follows:

Research shows that children who have been exposed to reading and other cultural experiences before they begin school have a better chance of success in formal learning than those who do not have this experience.

Among the most important of the preschool experiences are the development of skills in listening, speaking, and looking that prepare for reading and form the basis for the enjoyment of learning.

And it goes on to point out how libraries do provide this service.

Library service to parents for example, and to day care staffs, support preschool learning in a variety of ways. Libraries provide books for adults to read aloud to children, groups of children in child care and day care centers, and in public libraries often listen to stories and act them out.

Children borrow books and records from libraries. Toddler programs that bring very small children and their parents to the library together provide a basis for later, more independent use of libraries by children as they grow older.

It was pointed out several years ago that when a group of citizens in New York City were questioned about services that they would be willing to pay higher taxes to receive, one of the items that stood out was that those individuals who were parents of young children indicated they would be willing to pay higher taxes if they could be guaranteed better library services, especially in the area of books for children and books for parents, books which told about parenting and child rearing.

Reality No. 2, as pointed out by the ALA comment on "A Nation At Risk" states that good schools require good school libraries. Good schools enable students to acquire and to use knowledge, to experience and enjoy discovery and learning. It enables them to understand themselves and other people, to develop lifelong learning skills, and to function productively in a democratic society.

Libraries are essential to each of these tasks, and library students learn how to locate, organize and use information, and that information will expand their horizons and raise their self-expectations. Librarians are teachers, and they serve both students and teachers.

□ 1520

"A Nation At Risk" states that the elementary years "should foster enthusiasm for learning and the development of the individual's gifts and talents."

This item from "A Nation At Risk" describes what occurs when elementary schoolchildren develop early and lasting pleasures in using libraries.

In Indiana, a study showed that reading skills, verbal expression and library skills were significantly greater in an elementary school after library services were increased. Disadvantaged children in Boston increased their skills in verbal expression of ideas and their language ability after 12 weekly 1-hour library programs with books and story telling.

Access to a library for quick fact finding and sustained work on a project should be among the rights of every child and every young person. The student who encounters a librarian who is directly involved in teaching has access to a much wider world than that of a single classroom. The librarian at successive grade levels introduces literature and teaches research study skills. From the librarian a teacher learns how to locate, interpret, and present information.

Too many of the 105,000 schools in the United States have inadequate school libraries because they lack the staff, they lack the materials and space and services required by students and their teachers. Even many of the schools that have library materials provide few library services because they lack professional librarians. Almost 3 million pupils, 7 percent of the total in the Nation, attend public schools which do not have school libraries. In 1982 our country had only one school librarian for every 954 stu-

dents. This is equivalent of an average of only 20 seconds a day provided for each student.

The lack of librarians is especially severe in elementary schools. For example, in Los Angeles, our country's second largest city, in only 20 of the city's 450 elementary schools is there a full-time librarian.

Furthermore, in the last decade, the number of school library supervisory and consultant staff at State and district levels has declined sharply.

In "A Nation at Risk" the National Commission on Excellence in Education recommends higher educational standards and expectations. They recommend increased time for learning and increased attention to English, mathematics, science, social studies, computer science, and foreign languages.

To achieve these requirements, school libraries must be stronger. Librarians who are less bound by curriculum sequences than classroom teachers can improve the performance of students in every grade, in every subject, at every level of ability.

To ensure that every child has access to the quality of school library service needed in a learning society, public officials should do the following. These are recommended by the ALA Task Force on Excellence in Education: They should require that library research and information within the library program and in all subject areas at each level of elementary and secondary schools. They should establish more specific State standards for school libraries. They should require school superintendents, boards, parents, teachers, and other interested people in every community to prepare a plan for developing school library resources, for using these resources effectively and for coordinating services with public libraries in their communities. They should supply sufficient funds for school library programs so they are staffed to coordinate the teaching of research and study skills, in cooperation with teachers of English, social studies, science, mathematics, and other subjects. They should provide funds for sufficient library books. They should earmark State education funds for school library resources and program development and not allow these funds to be used in any way deemed necessary by the local administrators. They should ensure that each State education department has skilled State library media supervision staffs to provide the needed statewide professional leadership. They should require colleges and universities to provide future teachers with training in the using of libraries and library materials. They should require that education programs for school administrators and other education specialists include training and the administration and supervision of school libraries. They should also target Federal education funds to specific school library resource development programs, including those that use the new technologies and those that demonstrate exemplary services.

Reality No. 3 deals with people in a learning society and their needs for libraries throughout their lives.

Reality No. 4 deals with public support of libraries in an investment in people and communities.

The recommendations for public support of libraries as an investment in people and communities is as follows: To ensure that libraries serve us all effectively, public officials should appropriate funds for library services targeted toward individual and community needs for job information, for literacy and for development, as well as toward more general needs of library users. They should demand excellence in their academic institutions, public school and special libraries. They should supply each State library agency with the funds and staff needed to work with the public officials and libraries of all types in planning services and sharing resources. They should mandate that State and Federal Government documents and the products of Government-sponsored research are available to all through library network programs. They should institute a library rate for telecommunication and they should convene a State and national conference of library users, librarians, library policy makers, and public officials to assess the capacities of our libraries to serve the learning society, to measure the change which has taken place since the 1979 White House Conference on Library and Information Services, to encourage sound, long-range community-based planning for library services and to initiate local, State, and Federal action to improve library services.

There are all actions which are recommended by the American Library Association's report which is entitled "An Alliance for Excellence," which is a commentary on "A Nation At Risk," the report of the President's Commission on Excellence in Education.

I have spent the time to enumerate some of the positions of the American Library Association because there is a great need that the perceptions of the American people and the perceptions of the Members of Congress and the policymakers be changed with respect to the meaning of libraries. The traditional perceptions of the library as a quite place is an acceptable one. We do not want to get rid of that perception. There is a need still in our society for quiet places. The perception of a library as a place where people are serious, can get away to study, can find resources they need, the perception as a place for introverts or bookworms I do not think is necessarily a derogatory perception. Our age needs bookworms and we need introverts. Introverts are the people who prepare the programs for computers, software packages for computers. Introverts are the people who design computers. In the age of information, we need introverts, as we need every other kind of person.

So if it is perceived as a quiet place, a place for bookworms, a place for introverts, that is acceptable also.

But beyond that, the library must be seen as a place which extends to every citizen the kinds of resources for learning, the kinds of resources for self-improvement that are not available except for people who have means. Certain individuals can provide all the resources they need, they can provide for their own basic library, they can provide for their own reference books, they can provide for their own computer services, they can provide for their own electronic information services. Corporations can provide for their own electronic information services. There are colleges and universities which certainly provide for their students.

One of the goals of many of the public libraries is to place at a level where each individual can reach the services of electronic data bases. These data bases are quite costly. It means that information which originates in Washington by electronic transfer can be transferred to any part of the country, that any youngster in any part of the country could receive that information if his public library had the electronic equipment necessary to receive it.

One of the problems that we have is that taxpayers and policymakers at every level refuse to recognize that these kinds of modern information bases exist, that no library is up to date and current unless they have the capacity to finance these kinds of modern receival and retrieval units. This kind of technology must be paid for. And while we are ready to accept increases in cost in many other areas, we do not want to accept the fact that a modern library also has to bear these increased costs.

If you consider the fact that one MX missile costs $74 million, and the amount of money that is being cut from the present budget for library services is $118 million, for less than two MX missiles we can supply the money needed to fund the Library Services and Construction Act. If you consider the modern costs and how they compare, you will see that the library costs or the portion of library funding borne by the Federal Government is a trivial, very tiny, minuscule amount of money. If you consider the fact that a fighter plane at the end of World War I cost less than $100,000, and we now pay for a fighter plane more than $18 million, a fighter plane

now costs $18 million, and it cost less than $100,000 at the end of World War I, you can see how the cost for the military has escalated, but nobody wants to recognize the fact that the cost of libraries has also escalated to a lesser degree.

□ 1530

Whereas books averaged, hard-back books, averaged, at the end of World War II, less than $3 per book, and reference books were as low as $5 per book. No reference book can be purchased for less than $30 to $50, and the average hard cover book costs between $10 and $15 in 1985. The costs are escalating continually.

Libraries have traditionally been called upon to stretch the rubber band; to be very flexible and get as much out of the least amount possible. They have done this through programs of interlibrary loan and working with each other in systems. Through programs which reach across States and across the whole country, they have been able to foster systems which provide first-class services for second-class costs.

This rubberband at this point has been stretched to the limit, and it is about to break. They cannot continue to provide these kinds of services if policymakers at every level do not begin to recognize the serious problem that they face and the kinds of costs that they must have, the funding that they must have to meet their costs.

Libraries are presently one of the best bargains in our public service structure. You cannot find another agency or another service which serves as many people for as little cost. One must consider the cost-benefits ratio; how we get such a tremendous amount of benefits from our libraries with such a small amount of cost.

Measuring the costs of libraries is one of the tasks that certain library professionals have set for themselves and done a very good job. I commend to the Members the studies of the King Research Associates who have done several studies for the Federal Government to measure the actual value of libraries to the Federal Government. One of the most outstanding studies by the King Research Associates was a study of the Defense Technical Information Center which is responsible for all of the technical information in the Department of Defense.

The Defense Technical Information Center's product, its materials, are very heavily used by scientists and engineers. These scientists and engineers use these resources for very practical purposes; nobody questions the fact that they are using them and the fact that they are needed. They use them for very practical purposes. Defense, of course, has the highest priority in our Federal Government, and the services that they use were measured in this study by submitting a questionnaire to the scientists and engineers who use DTIC, the Defense Technical Information Center, and the use of this information was evaluated by the scientists in terms of how long it took them to get, how much time it saved them when they found a technical booklet, or a book or whatever, kind of material that was useful to them. How much time it saved them; what kind of innovation it allowed them to undertake as a result of revealing something that had been done before, or in various ways, how the provision of information from the Defense Technical Information Center allowed them to go forward in the research that they were doing or in practical projects that they were working on.

When the study was over, when they had measured the cost and multiplied the cost, multiplied the time that it took by the kinds of salaries that were being paid to these engineers and scientists, the amount of value attributed to the Defense Technical Information Center, was more than $30 billion. The value of that collection was assessed at more than $30 billion.

Mr. Don King of the same King Research Associates estimates that the value of our public libraries throughout the Nation in terms of the time they save for people who are seeking knowledge and information is estimated at more than $10 billion.

They are doing studies now at the Department of Energy Technical Resources Center, and they estimate similar large savings that are realized by scientists and engineers as a result of using these collections.

We are not only interested in having libraries to provide technical and scientific information, but it is good to compare the cost and the use of the technical and scientific materials because they are what the hard core, so-called practical thinkers who are making decisions in Government are willing to consider. They show the value of libraries in our modern age of information.

As I said before, when you measure these kinds of costs against the costs that we pay for our armaments, especially for our MX missiles, you can see that the amount of money that is being requested in the Federal budget for libraries, and the amount of money that libraries use across the country in general, is a very miniscule amount.

It is very significant to note that at the same time we are forcing tremendous cutbacks with respect to funds that are placed in the budget for libraries. We are also, at the Federal level, cutting back on the availability of library materials and library services with the Federal Government.

This administration, since 1981, has relentlessly pushed back the availability and cut back on the availability of information services and materials. I have in my hand a chronology prepared again by the Washington office of the American Library Association which is called, "Less Access to Less Information By and About the U.S. Government." It is a chronology from 1981 to 1984, and it reads as follows. I will read some of the highlights of the kind of atrocities that have been committed against information systems and information services over the last 5 years.

In September of 1981, David Stockman, the Director of OMB, issued an Executive Order requiring that Agency heads pay special attention to the major information centers operated or sponsored by their Agencies.

Among the types of information centers to be evaluated were clearing houses for the public; information analysis centers; and resource centers. Evaluation criteria included these questions: Could the private sector provide the same or similar information? That was a question always asked. Is the information services provided on a full cost or recovery basis. This was the opening gun for a series of memorandums which later resulted in the present OMB circular which calls again for the elimination of numerous information services and materials.

The OMB was not limiting their attack, of course, to mere materials and services, although they did have press conferences and they had on display bags of booklets and various kinds of information published by the Federal agencies. One of those booklets that they have chosen to eliminate recently is a booklet called, "Infant Care."

"Infant Care" was considered to be a waste of the Government's money. The continued publication of that particular classic. I would ask you to consider the fact that the Federal Government, the taxpayers of this country, are financing medical services for numerous mothers and children who would have used that book "Infant Care." We pay the cost of every mother who is on Medicaid; we pay for that cost and we pay for the child's health care costs also.

If every mother on Medicaid alone were given a copy of "Infant Care" and if, as a result of reading "Infant Care" or a similar booklet provided by the Government, the care that that mother provided for her baby resulted in the baby not getting sick just one or two times, numerous dollars would be saved by the Federal Government which does pay the bill for Medicaid when that mother who is on Medicaid goes to the hospital.

The whole concept of preventive health care begins with information. For any Agency of Government to assume the powers that have been assumed by the Office of Management

and Budget, and begin to dictate to every branch of Government those branches which serve health care institutions; the branches which service businessmen, labor statistics, every branch of Government, is dictating what publications they can publish; which publications shall be published in what amount, and how those publications shall be disseminated. That kind of power, resting in one agency, is detrimental to the dissemination of necessary information useful to the society as a whole, and useful to the whole of society to hold the Government accountable.

I offer as another example the decision made by the Office of Management and Budget or the Department of Labor under pressure from the Office of Management and Budget to discontinue the publication of certain Department of Labor statistics related to the cost of living for families. Those statistics will no longer be published; they are considering the discontinuation of the publication of materials which relate to occupation outlook; the kinds of materials which have been used for years by libraries and other institutions that provide guidance for various people who are seeking jobs.

All of this results from the kind of perception that the present administration holds for information and information services.

□ 1540

It is quite evident that the present administration does value information services because they have greatly increased their own information apparatus. They are providing their own press releases on electronic equipment. You can get the full text of all of the press releases from the White House. You can get the full text of certain chosen documents out of the executive branch directly on electronic retrieval machinery. They understand the value of information to convey their own point of view; however, they are determined to deny this kind of access to information to the average American.

What has happened as a result of these kinds of policies is an information crisis generated by the assumption of these powers by the Office of Management and Budget. One of the Office of Management and Budget's actions has been commented on by the the American Library Association in the following pamphlet, which is entitled "Government Information: Is it a public good or a commercial product?"

The Office of Management and Budget has requested public comment on a draft policy circular which, if implemented, will sharply reduce the Federal Government's efforts to collect and disseminate information to the public. It will also accelerate the current trend toward the commercialization and the privatization of Government information. The proposed circular was published in the March 15 Federal Register. Corrections are in the March 24 Register, and this umbrella circular supersedes four existing Office of Management and Budget circulars.

The draft circular's definitions and policy considerations bear careful review in light of the trends in the past 4 years to reduce public access to Government information. Section 8(a) of this draft states that public access to Government information is to be provided consistent with the Freedom of Information Act. Yet, the ALA has documented that Federal agencies are increasing fees to the public. Fees are being increased for record retrieval, including Federal information requests. These fees can be high when an individual requests information that must be retrieved by a computer.

For example, in the October 29, Federal Register, the U.S. Postal Service published standard charges for the system utilization services and they range from $189 to $1,827 per hour. In other words, a citizen who wants to use electronic retrieval processes to get information from his Federal Government might pay from $189 to $1,827 per hour.

While automation clearly offers promises of savings, will public access to Government information be further restricted for people who cannot afford computers or cannot pay for this computer time?

Among the basic considerations and assumptions of this OMB circular are "that the public and private benefits derived from Government information must exceed the public-private cost of the information." This means that any information wanted by any public person, any person who is a member of the public, that information will be given to him only after cost recovery is considered. In the analysis of key sections under the information dissemination, OMB maintains that the mere fact that an agency has bothered to create or collect information is not itself a valid reason for creating a program to disseminate the information to the public. Maximum reliance on the private sector is stressed.

OMB states that this is merely an application of a policy which is stated on OMB Circular A-76, which is called A-76 Performance of Commercial Activities. Section 8(a) of the same draft states that the product or the service must either be required by law or the product or service, meaning the book or the pamphlet, must be clearly permitted by law and it must be essential to the agency in accomplishing its mission, but OMB will judge what products and what books, what pamphlets, are essential to the agency for accomplishing its mission. The products or services are not to duplicate similar products or services that are already provided by other governmental or private sector organizations or can be reasonably expected to be provided by them in the absence of dissemination by this particular agency.

The definitions of information by the Office of Management and Budget are as follows: It means any communication or reception of knowledge, such as facts, data or opinions, including numerical, graphic or narrative forms, whether oral or maintained in any medium, including computerized data bases, paper, microfilm, or magnetic tape. Access to information refers to the function of providing to members of the public any information in any one of these forms. In other words, the entire information-generating capacity of the Federal Government is brought under one umbrella, under one agency, the Office of Management and Budget.

The crucial question that I want to raise is: Should any agency of the Federal Government have this kind of power which, in the ultimate, amounts to the power to censor, and if an agency of the Federal Government must have this kind of power, should it be the Office of Management and Budget? The primary concern of the Office of Management and Budget is to cut costs, a policing function related to accountability with respect to the expenditure of funds.

Does that mean that the Office of Management and Budget is required to decide who should read what books produced by which agencies of the Federal Government?

On the 29th of this month, this question will be discussed, will be reviewed, by one of the subcommittees of the Committee on Government Operations, the Subcommittee on Government Information, Justice, and Agriculture, which will review not only the telecommunications policies of the Office of Management and Budget, but the hearing is also expected on April 29 to consider the recently issued Office of Management and Budget circular on management of Federal information resources. This circular has some provisions that would affect agency plans for the electronic collection and dissemination of information. The draft OMB circular was published in the Federal Register and comment has been asked, and the committee will also forward their deliberations, I suppose, to the Office of Management and Budget as a result of that hearing.

In conclusion, the entire apparatus of the Federal Government with respect to information begins at the level of the Congress and the White House because information is a record of decisions that are made or it is a record of phenomena observed, and decisions are made in Washington as nowhere else, decisions that affect the entire world. Decisions that are made

by the President affect the greatest number of people probably in the world. Decisions that are made by the Congress affect a great number of people.

The SPEAKER pro tempore [Mr. BOUCHER]. The time of the gentleman from New York [Mr. OWENS] has expired.

Mr. OWENS. Mr. Speaker, I will conclude in a few minutes. The gentleman from New York [Mr. ECKERT] the Republican, also gave me time from his 1 hour.

The SPEAKER pro tempore. The Chair would advise the gentleman that that extension cannot be recognized at this time. Under the rules of the House, the gentleman only has 1 hour.

Mr. OWENS. In conclusion, I would like to recognize the fact that the gentleman from New York [Mr. ECKERT] did offer 1 hour for the discussion of the Library Services and Construction Act and National Library Week, and I want to take note of that fact.

My time is up, but I wanted to note that fact and thank the gentleman from New York [Mr. ECKERT] for giving me that time and conclude by saying that it is recommended that the Federal Government, the Congress, take a more active role in the review of those policies which are being made with respect to information and library services, and it is too important for the administration alone to decide. A nonpartisan commission is necessary to decide exactly how the information services and the information materials generated by the Federal Government will be disseminated and utilized.

● Mr. FRENZEL. Mr. Speaker, as we enter National Library Week, I am pleased that Congress has set aside this week to honor our libraries. It is important, not only to acknowledge our libraries and salute our librarians, but also to take a closer look at library services.

The traditional library, as a source which provides needed books and publications for citizens, companies, and other organizations, plays an important and well-understood role in our society. Yet a closer look at libraries reveals that libraries have assumed new and exciting roles in this information age. Libraries are progressing and evolving. They are making use of new technology and are expanding their information capacities.

In my State of Minnesota, many libraries have access to computer systems and data bases and hence, are able to conduct basic searches for general and specialized information of almost infinite variety. Searches may assist in the setting up of small businesses, exploring careers, reviewing patent information, retrieving unobtainable publications, and even providing instantaneous medical information, to hospital operating rooms. Such services enhance economic and social development. Their use adds breadth, vitality, and achievement to the daily lives of our people.

The modernization of our libraries, through the use of improved communications and computerization, has also allowed for the evoluton of a system of networking and information exchange between the many different types of libraries. Public libraries, hospital libraries, school libraries, college/university libraries, government agency libraries, and law libraries, are able to combine resources in order to offer vast amounts of information by interlibrary resource sharing.

In my State, Federal library funds have been well used and there is strong private-public sector cooperation and sharing of information and materials. This triumph of cooperation over turf rights is most encouraging. The sharing and availability of ideas benefits everybody. Resound sharing is helping our citizens and Nation to grow.

I commend our library systems and I thank the people who make them work. If you haven't visited your local library lately, drop in and look around. It changed and it can serve you better. Modern libraries are every day broadening our horizons in new and unexpected ways.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, as you may know, 28 years ago our Nation observed the first National Library Week. During this year's National Library Week, April 14 to 20, it is with the greatest pleasure and pride that I salute both the professionals and community volunteers who are ever ready to assist those of us who seek knowledge or pleasure in books.

I can think of no better time than when we are commending the service of our Nation's libraries, to also mention the realities faced by libraries in our districts as they attempt to provide information and other services to the people they serve. After meeting with several library representatives from my home State of Arkansas, I feel even more strongly compelled to speak out on behalf of our Nation's library network.

As information services become the focal point of our Nation's progress, libraries are confronted head on with the problem of providing a readily available, free entrance to the world of learning. To this end, the Library Services and Construction Act has strengthened and assisted local and statewide planning, coordinated present services for maximum effectiveness and met the needs of many sectors of our population for new services and facilities. The elimination of LSCA, as proposed in the fiscal year 1986 budget, would mean that the progress made in reaching those areas without library services or with inadequate services would be halted.

I know that LSCA has benefited the people of Arkansas immeasurably by, among other things, reaching the elderly, handicapped, and shutins with bookmobile services; providing local book deposits so that those living in rural, mountainous areas do not have to travel into large cities to obtain reading materials; providing assistance for serving the deaf; and operating programs for functional illiterates. I am happy that our colleagues in the Senate have at this point agreed to freeze LSCA at the fiscal year 1985 level, and I strongly urge Congress as a whole to continue to provide full funding of LSCA in fiscal year 1986.

Libraries are but one of many groups that are dependent in large measure on nonprofit mail and revenue forgone. The fiscal year 1986 budget proposes that no money for this postal subsidy be appropriated. If such a proposal were to be enacted, it would mean that the library rate has increased a mind boggling 1,243 percent over the 7 cents that existed for 2 pounds in 1970, when the Postal Reform Act was enacted.

Every extra dollar libraries spend on postage is a dollar less for purchase of library resources. Libraries on fixed budgets and their users, especially the elderly, the handicapped and those in rural or isolated locations who depend on library books-by-mail services, cannot absorb such hefty postal increases.

Libraries share resources through the use of such new technologies as computerized data bases and telecommunications. However, the continued ability of libraries to improve services through telecommunications has been severely shaken by a series of private line tariffs filed over the last year and a half as a result of the AT&T divestiture. The cost of these tariffs could represent increases from 50 to 100 percent in user charges. It is doubtful that any library budget could absorb such a drastic increase, and therefore lower rates for library telecommunications are needed. It is my hope that a special library rate will be established.

These are but several of the issues that are threatening the future of our Nation's library network. As we continue through the budget process, I urge my colleagues to keep these realities and the future of our Nation's libraries in mind. Mr. Speaker, in closing I would again like to congratulate all of those librarians and community volunteers who keep the doors to a world of learning open.●

● Mr. ROE. Mr. Speaker, it is a sad and tragic commentary on the Reagan administration's priorities when Members of Congress must rise to speak out against administration proposals to slash funding for libraries, library

construction, and library-related services. So it is with a sense of urgency and immediacy that I rise to join my colleagues in participating in this special order on libraries and library issues.

Libraries are crucial to the well-being and education of all people. Libraries and the services they provide to all a window to the past, tools for the present, and guides for the future. Many civilizations have come and gone, but their libraries have survived and from them we have been able to learn how people lived and worked thousands of years ago, how they confronted the problems of war and peace, famine and drought, birth and death, taxes and reform, justice and morality. One can say that the issues confronting civilization have not changed over thousands of years, because ancient man's problems are the same as those of modern society.

The administration pays lipservice to the needs of American education, but seeks to reduce funding for one of the cornerstones of that education and of American society, the public library. The local public library performs vital functions, functions that are essential for improving education. Their collections educate the young and the old, provide tapes and records for the blind, preserve the daily record of the Nation's newspapers and magazines, and preserve the history of our Nation. They present an invaluable resource to students and scholars, technicians and mechanics, farmers and industrialists and to every segment of American society. When libraries close, which would be the result of the administration's proposals, America and her citizens suffer immeasurably.

Mr. Speaker, I urge my colleagues to reject the administration's proposals to eliminate funding for the fourth year for the Library Services and Construction Act, to reject their proposal to eliminate the postal revenue foregone subsidy, and to strongly support continued Federal aid for library and library-related issues. America needs more educated people. We need people who know how to use the information available in libraries to accomplish the kind of things they want to accomplish. We need people who have better skills at every level. The one institution that supplies education for people throughout their lives is the public library, and we cannot afford to let the administration's plans to severely cut back on library services be made law.

In closing, Mr. Speaker, it would do us well to remember that our libraries are the respository of our great literature, and that public libraries are a vital aspect of a free and democratic society. One of the first things that the Nazis did when they came to power in 1933 was to burn, in a public ceremony, all literature that did not conform to Nazi ideology. They destroyed the function of a free and public library in society, a function that calls for the free flow of literature and the exchange of ideas without fear of persecution and torture for putting into writing what one has thought. In America, we happily enjoy our public libraries, and we should not endanger their future by eliminating funding for them.●

● Mr. CROCKETT. Mr. Speaker, we have heard a lot lately about our "national security" interests. Most of that talk concerns weapons of destruction and military assistance overseas.

But if we are truly concerned about our national security, we will look to the strength of our people at home. And a good indication of that strength is the ability of our children to cope with the information explosion that has taken place during our lifetimes. Through technology and widespread communications networks, we have access to books, records, tapes and other vehicles of education that were unheard of even 25 years ago.

This week, we celebrate one of the most important institutions in making that information available to all our people—the libraries. Through their dedication to excellence and to equal access to information, libraries and the staff who maintain them provide a unique and irreplaceable service to the communities across our country.

Without libraries, access to this new information would be restricted to those who had the time, money and commitment to seek out and purchase the materials. With the libraries, every family in the United States—whether rich or poor, large or small—can enrich their lives through reading, listening or viewing.

I join with my colleagues in saluting the libraries of America, and the librarians and others who bring life to those institutions through their expertise and concern for knowledge.●

● Mr. RANGEL. Mr. Speaker, I rise to join my colleague, MAJOR OWENS, in his special order to focus attention on the fourth consecutive Reagan budget proposal which attempts to eliminate funding for the Library Reconstruction Act and other library services and programs.

In New York State alone, the enactment of the fiscal year 1986 library recommendations would result in reductions and eliminations of essential library services such as: Circulation and research functions; Federal grants used to maintain artifacts; operation support systems and; computerization of expanding information networks.

The deficit created by this administration is causing unfair and ultimately damaging budget priorities for this country. Alternate deficit reduction initiatives must be proposed, but eradicating the traditional functions of our cities public libraries is not a solution. Educational enrichment translates into limitless educational opportunities. We cannot allow the special role of the public library system to falter: It is a valuable instructional and research center. Computer literacy, second language education and services for the disabled are key to advancement of millions of Americans.

The public library system helps to create an informed and knowledgeable society. I urge my colleagues to support funding at the fiscal year 1985 levels for our public libraries nationwide.●

● Mr. ADDABBO. Mr. Speaker, I am rising to voice my opposition to the administration's proposal to cut library funding.

As usual, the administration has got its priorities backwards. This Congress is being asked to approve more than $300 billion for next year's defense budget. What the administration is failing to recognize, is that the defense of this country begins with an educated populace.

Our strength in the future, will rely heavily on our ability to maintain a technological advantage over our adversaries. Increasingly, we will require educated men and women not just for research and development, but to operate the sophisticated weapons of tomorrow.

A strong public library system should be among the cornerstones of our educational system. As all aspects of our society become more dependent on high technology, our need for public and research libraries will continue to grow. I believe it is very shortsighted to try to balance the budget by cutting library funding. We are already spending less than we should in this area. If we cannot increase funding, we should at least have the good sense to leave this part of the budget alone.●

● Mr. DOWNEY of New York. Mr. Speaker, yesterday, many of us had the opportunity to meet with librarians from our districts who were here in Washington to inform their representatives of the effects of various administration budget proposals on the Nation's libraries.

During the past 4 years we have seen many shortsighted approaches to reducing the deficit, but it strikes me that the administration's repeated attempts to balance the budget by reducing support for libraries is among the most foolhardy. Libraries are a priceless national resource. They provide millions of our citizens with the opportunity to educate themselves, to expand their cultural horizons, or to just have a relaxing evening with a good book.

They are an integral part of the social life of our communities. In my own congressional district on Long Island, libraries are vital social centers. Very often I hold my town meet-

ings in local libraries, and I can attest to the fact that the libraries are a natural meeting place for all groups within the community. That is why the administration's proposal to eliminate the Library Services and Construction Act strikes at the heart of villages and towns across the country. In the past, Congress has rejected this proposal, and I am confident, Mr. Speaker, that we will once again be wise enough to see through the false appeals to fiscal austerity and approve renewed funding for this important legislation. As a member of the Budget Committee I will support adequate funding for the full range of library services.

I would like to commend my colleague from New York, Congressman MAJOR OWENS, for organizing this special order. Mr. OWENS, who was himself a librarian, has been a strong defender of library programs and understands clearly the important role they play in our community.●

● Mr. MRAZEK. Mr. Speaker, a great nation is dependent upon an educated and informed citizenry. It is quite natural, therefore, that over the years, our Government has made a genuine and sincere commitment to the preservation and expansion of our public library system. This year, however, this commitment is in jeopardy. This year, the Federal budget includes no funding for our public libraries. This is wrong.

Public libraries are the cornerstone, the foundation and the support beams of our educational system. Without accessible, viable, up-to-date libraries, we weaken the entire structure of our society.

Federal funds for libraries represent only a small portion of a library's operating expenditures but these funds are critical for prototype and special programs. Federal funds, combined with State and local support, have resulted in a 30-year local-State-Federal partnership guaranteeing lifelong learning opportunities for our people, research and development information for our industries, and quality education for our young.

This week, the week of April 14-20, 1985, is National Library Week. It is appropriate at this time that we reaffirm our commitment to one of our society's noblest institutions, the public library.

I call on my colleagues on both sides of the aisle to unite and vigorously support the funding of the Library Services and Construction Act and the Higher Education Act Title II.

As a nation, we must demand excellence in our educational institutions and in our public libraries. If we fail the task of providing our citizenry with the best of all possible learning centers, we will fail as a people. But if we succeed—the possibilities are endless.●

● Mr. CAMPBELL. Mr. Speaker, the future of our great country lies with its children. If the United States is to grow and prosper we need to provide good educational programs for our children. Research has shown that exposure to books at an early age is important for reading and later school success. Children who use their public libraries tend to do better in school. Public libraries are playing a vital role in this area by encouraging parents to read to their children and by providing stimulating programming for children to demonstrate the joys to be found in books. Library Services and Construction Act funds have been to hire children's librarians and to develop pilot projects. These demonstration projects have proven to be the most effective way to show local officials the benefits of improved library services for children and the need to provide for them with local funding. Libraries in South Carolina have had marked success in using LSCA funds to stimulate local support.●

● Mr. SPRATT. Mr. Speaker, I am pleased to join my colleagues today in recognizing the significant contributions of public libraries. Our comments today are in honor of National Library Week, which recognizes the vital services provided by libraries.

In my congressional district, which is largely rural, people rely heavily on the services provided by our rural libraries. Public libraries provide not only books and publications, but they join with local governments and educational institutions to provide various community services. In many cases, the library serves the role of a community center.

For example, libraries in South Carolina have undertaken an extensive program to combat illiteracy. According to recent estimates, 20 percent of all Americans are functionally illiterate and 75 percent of the unemployed have inadequate reading and writing skills. In many areas in South Carolina, one-third of our citizens lack the basic literacy skills needed to meet the requirements of adult living.

To address this problem, public libraries in my State, with assistance provided under the Library Services and Construction Act Amendments of 1984, have supported projects that now provide tutoring in reading and writing to some 2,293 adults—a 41-percent increase since last year. In my home county of York, our public library has sponsored an innovative project to reach first graders with reading problems. I commend our libraries for their efforts to meet this critical need.

Our libraries are the repositories of some of our greatest cultural achievements and they provide an invaluable public service. They make the written words of our civilization available to our people and they help to cultivate our capacity and interest for reading and learning. I am pleased to join my colleagues in paying tribute to the significant and enduring contribution made by our public libraries.●

● Mr. VENTO. Mr. Speaker, I rise today in support of our Nation's vast library system. In Minnesota alone, we have 330 public libraries and 30 mobile libraries serving nearly 4 million people in addition to numerous other academic, college, and vocational technical libraries throughout the State.

We are reminded of our Nation's impressive array of information dissemination services during this our 28th annual observance of National Library Week. We are also reminded that once again we must wage a battle against the administration's proposal to zero out funding for library programs covered under both the Library Services and Construction Act and the Higher Education Act. For the fourth consecutive year, the President has requested no funding for these programs.

The impact of such a proposal would be devastating to our Nation's library system. In an ever changing society as ours, the broad education provided by libraries is important both because of what it contributes to one's career goals, as well as because of the value that it adds to the quality of our lives.

The services provided by libraries range from making available the daily newspaper to neighborhood residents to supplying information necessary for the completion of a research project. I know from my experience as a teacher that in our schools' libraries, students learn how to locate, organize and use information that will expand their horizons and raise their self-expectations. Our public libraries assist small businesses and other industries by ensuring adequate sources of information that will allow them to expand their operations.

Adequate funding is necessary to provide for sufficient numbers of books, audiovisual materials, magazines, computer software, and other materials that will ensure that an adequate supply of information is available to those in all walks of life.

I would like to thank my colleague Mr. OWENS for arranging this special order and I would like to thank our librarians across the country for their service and dedication to this worthy program which provides a vast array of information to those in our society.●

● Mr. ACKERMAN. Mr. Speaker, I commend my colleague from New York [Mr. OWENS] for asking for this special order to commemorate National Libraries Week. Libraries have consistently served communities throughout the country not simply as depositaries of literature, but also as important components in maintaining and

improving the standard of living in the neighborhoods of this Nation.

I would like to inform my colleagues of an exemplary library located in the Corona-East Elmhurst section of my congressional district in Queens County, NY. The Langston Hughes Library and Cultural Center is a special project of the Queens Borough Public Library, funded by the Library Services and Construction Act. Named for Langston Hughes, a black American writer who was able to transcend different forms of literature to portray the many facets of black life in this Nation, this unique institution is under the direction of a community board of directors and is staffed by community residents.

The Langston Hughes Library opened its doors on Corona-East Elmhurst in April 1969. The community demanded the library, fought for it, and the residents of the area have worked for over a decade to maintain it. The library was designed to meet the special needs of the neighborhood by providing necessary educational services to an economically disadvantaged area. Due to the unique characteristics of this community resource center, Langston Hughes has offered a full range of services, including tutorial and remedial assistance for schoolchildren, a community referral service, and varied cultural events and activities.

Mr. Speaker, the Langston Hughes Library is a special place in Queens. It is a model of excellence in community responsibility, and a jewel in our Nation's library system. It is important to note the achievements of this praiseworthy organization, and the individuals who contribute so much to their community, so others may emulate them. I ask the Members of the Congress of the United States to join me in congratulating the Langston Hughes Community Library and Cultural Center and its fine officers: Andrew P. Jackson, executive director; Rodney Lee, curator of black heritage; Jack Harris, director of cultural arts; Grace Holmes, director of the Homework Assistance Program; Una Grant, coordinator of information and referral services; Grace V. Lawrence, chairperson of the Library Action Committee; and Gale Jackson and Carl Rogers, Librarians.●

● Mr. DERRICK. Mr. Speaker, public libraries throughout South Carolina are experiencing growth in book collections and in programs. Unfortunately, many of our library buildings are not sufficiently large or modern enough to accommodate this growth. The jobs bill in fiscal year 1983 enabled the South Carolina State Library to assist 11 public libraries in construction projects, including one in my hometown of Edgefield, SC. Fiscal year 1985 Library Services and Construction Act funds will enable three or four libraries to proceed with building plans. However, this is just the tip of the iceberg.

A recent survey by the South Carolina State Library indicates a need for at least 136 public library building projects, which include new buildings, expansion of existing buildings, or renovations for handicapped accessibility, energy efficiency, or to accommodate new technologies. LSCA funds are a small share of the total costs of construction, but it has proved to be the carrot needed to encourage local funding activity.

Libraries are the key component in the enhancement of the educational level of citizens across the Nation. I am delighted that this time has been set aside to give national recognition to the library system.●

● Mr. MANTON. Mr. Speaker, I would first like to commend my distinguished colleague from New York, MAJOR OWENS, for organizing this special order today during National Library Week. As we are in the midst of saluting the National Library Association, it is an opportune time to think about our national priorities and examine how libraries are affected under the administration's budget proposals.

Yesterday, I was visited by constituents representing libraries in my district. They handed me a copy of a letter signed by President Reagan commemorating National Library Week. In that letter the President states that we must help our children discover the treasures to be found in our Nation's libraries. The President also states that the open doors of our Nation's libraries "Beckon all to enter." I am shocked that a President who could make these statements would propose a budget that would effectively limit our children's access to those treasures and which will do irrevocable damage to our libraries' collections.

Mr. Speaker, the administration's budget requests zero funding for programs vital to our libraries. No funding has been requested for the Library Services and Construction Act. Title I grants of this act enable libraries to serve disadvantaged citizens who would otherwise be denied access to library services enjoyed by others. Title II of this act provides grants to help provide adequate library facilities. Title III provides important moneys for the planning, establishment, and operation of cooperative networks for libraries at all levels. The administration has also axed funding that is vital for our universities to maintain and improve their collections. Perhaps our President does not really mean that all should have access. How can the President on the one hand commend libraries, their users, and librarians, but on the other hand condemn the future of our libraries.

Mr. Speaker, these Federal programs are very important for my constituents. As of June 1984, there were 207,141 registered borrowers at the 12 libraries in my district. From July 1983 to June 1984, over 1 million books were loaned out to readers in the Ninth Congressional District. In 1984-85, the Library Services and Construction Act and Higher Education Act funds provided $8.6 million to New York's libraries. Although this money provides only 2 percent of library operating expenditures in New York State, these funds are critical. The programs funded by these Federal grants allow our libraries to reach out to people they would not otherwise be able to serve.

There is a very special library in Queens, the Langston Hughes Community Library and Cultural Center, which is used by many of my constituents. This unique library was designed to meet the special library needs of an economically disadvantaged area and is governed by a community board of directors made up of volunteers of the community. The library's black heritage reference center provides one of the city's largest circulating book collection of black heritage reading materials. This special library meets the needs of the community by providing tutorial services, community information, cultural events, and activities. The Langston Hughes Library has become a model and has been visited and studied by librarians, educators, and students from all parts of the country. The library depends on funding from the Library Services and Construction Act. Without these important funds, the excellence and the very existence of the library is threatened.

Mr. Speaker, the Nation's libraries allow our citizens to grow, to learn, and to expand their knowledge. Our Founding Fathers recognized the importance of an educated populace. In fact, Benjamin Franklin established the first public library.

I urge my colleagues to carefully examine the administration's proposals which threaten to undermine a tradition of support for public libraries. As part of my celebration of National Library Week, I pledge my support for the programs which allow Americans of all ages, from all walks of life, to enjoy the riches that are to be found in our Nation's libraries.●

● Mr. WIRTH. Mr. Speaker, this week has been set aside to acknowledge the importance of libraries in all aspects of our lives. National Library Week is being celebrated across the country from Sunday, April 14 to Saturday, April 20, 1985.

Our Founding Fathers were clear, from the very beginning that broad access to information was essential to the success of the American democrat-

ic experiment. A quote from James Madison is no less apt today:

Knowledge will forever govern ignorance. And, a people who mean to be their own governours, must arm themselves with the power which knowledge gives. A popular government without popular information, or the means of acquiring it, is but a prologue to a farce or a tragedy; or perhaps both.

Today, our country is at a critical juncture in assuring adequate access to information. The technologies through which we communicate are changing at an unprecedented pace. The organization of communication services and industries, such as our public libraries, is also undergoing radical revision. And our capacity to keep up with these rapid advancements has been steadily eroded by an administration whose priorities do not include the free and widespread access to information envisioned by our forefathers.

The President's fiscal year 1986 budget includes the termination of all Federal support for public libraries. Dollars which have traditionally been used to support special services such as programs for illiterate adults, talking books, braille manuscripts for the blind, and outreach services to handicapped citizens, orphanages, and prisons are in danger of total elimination. Elimination of financial support for our libraries will further weaken a crucial link on our Nation's information network.

Specific effects of the Reagan administration's current proposals include:

The elimination of the 4th class library postage rate and free postage for the blind and handicapped.

The reduction of library services for approximately 15,000 people in each State.

The termination of outreach services for 8 million people who are homebound or confined to orphanages, hospitals and prisons.

The discontinuation of special programs for blind and handicapped citizens who are virtually totally dependent upon public libraries for information.

We cannot afford the cost of such proposals if we mean truly to govern ourselves. During National Library Week, we should reflect upon the power of knowledge and its value to the continued success of the "democratic experiment" we embarked upon over 200 years ago.●

● Mr. BRUCE. Mr. Speaker, today, in the midst of National Library Week, I feel it appropriate that we take the opportunity to salute the timeless services that out libraries provide for us. Knowledge, as the foundation of any stable, rational society, is not a value that depreciates with age. It is a value that should, and must, be actively pursued; and as institutions devoted to the task of spreading and increasing knowledge, our libraries have performed admirably in this regard.

I am proud to report that the libraries of my district have instituted community programs that have made sources of learning available to more people than ever before. Some of these programs include federally funded workshops designed to call peoples' attention to the traumas of Alzheimer's disease; a book accessibility program which provides books for preschoolers, invalids, and individuals experiencing reading difficulties; and a drive to computerize and implement a statewide library card system that would make most collections open to any Illinois resident. In addition, the Champaign Public Library acts as an information finder for smaller businesses in the area, providing newly emerging businesses with market and loan information.

A desire to learn begins with one's exposure to the repositories of knowledge. Clearly, the libraries of Illinois remain steadfastly committed to this fundamental precept and to the ideals so nobly represented by National Library Week.●

Mr. GREEN. Mr. Speaker, I should like to commend my colleague from New York, Mr. OWENS, for his leadership in sponsoring this special order. The services provided by our Nation's libraries have proved to be of unparalleled public benefit and deserve our continued support. There a number of issues before us in this Congress which have a particular impact on libraries, and they must receive appropriate consideration.

First and foremost is the issue of funding for libraries. Last year we reauthorized the Library Services and Construction Act [LSCA] through 1989, demonstrating bipartisan support for this act. Although the administration has proposed elimination of these funds, we in Congress have recognized the tremendous contribution our libraries continue to make. The library is an integral part of our educational system and is as central to our communities as our schools and supermarkets. Libraries serve the very young and very old, and all of those in between. In addition, they meet the needs of special constituencies, such as the blind and other physically disabled, who might endure the greatest loss if funding were eliminated.

In New York, the LSCA supports vital services provided by the New York Public Library. The Special Service Programs, which receive funding under the act serve not only my district and the rest of Manhattan, but also the Bronx and Staten Island. Among the services supported in New York are those provided by the Library for the Blind and Physically Handicapped, which serve these three boroughs plus Queens, Brooklyn, and all of Long Island. In addition, the LSCA supports numerous urban library programs. These include job information centers, which provide information on career opportunities and techniques for finding employment. The literacy centers, which have a waiting list at all times, enable trained volunteers to tutor illiterate adults on a one-to-one basis. Learners' advisory centers, which also receive funding under the act, provide educational and career guidance for adults and teenagers. The LSCA also supports outreach projects, which provide services to disadvantaged and ethnic groups and have proved of tremendous benefit to minorities. Further, the community information services and directory, another urban library program, provides updated information on local and citywide services in every neighborhood branch of the library.

Of equal importance is funding for research library resources. These libraries preserve our Nation's heritage by maintaining collections which might not be preserved were these funds not available. The 26 million books, manuscripts, newspapers, periodicals, maps, prints, photographs, musical scores and other materials available through the New York Public Library's research libraries are used by 1½ million people annually. Over 350,000 of these users come from outside New York City and 150,000 visit from outside the State. The library makes these resources available to other institutions around the world through its cooperative programs. Only by devoting considerable resources to preservation and conservation programs is the New York Public Library able to maintain these invaluable collections.

Clearly, continued support for library services appropriations is essential if we are to maintain these educational and social services in our communities and preserve many of our historical resources throughout the Nation. However, these are not the only issues before us which affect libraries. Of great concern is the revenue forgone postal subsidy. Libraries are not the only beneficiaries of this important appropriation. The blind and handicapped, as well as other nonprofit organizations which benefit the public, all depend on lower postal rates. Eliminating this subsidy would critically impair the ability of libraries to distribute educational and informational material to the public, a vital part of their service. The Postal Service estimates that a fiscal year 1986 appropriation of $981 million is required to maintain subsidized postal rates at current levels. If the revenue forgone postal subsidy is eliminated, our libraries would have to devote to postage, money now spent on books and other library resources.

Our country's libraries also receive vital resources through the Public Libraries Program at the National Endowment for the Humanities. Continued support for the Endowment, and the Public Libraries Program in particular, is vital to meeting our libraries' needs.

We are grappling with the issue of growing budget deficits, and this will force us to make some difficult choices this year. However, reducing support for our Nation's libraries would do a great disservice to the American public, especially children, the elderly and disabled. Clearly, there are other portions of the budget which can be reduced, and they would make a greater dent in the deficit while doing far less harm than cutting the funds which are so important to our libraries.●

● Mr. MORRISON of Connecticut. Mr. Speaker, the Nation's libraries provide a vital resource for our population. They are one of our first lines of defense, for they protect our citizens from ignorance, illiteracy, and isolation. They help to insure that our country does not fall behind in the most vital race of all—the race for knowledge, which helps us maintain our competitive position in the world.

Clearly, the President does not understand the importance of the need for this type of defense, for once again he is attempting to undermine the fiscal viability of this country's libraries. His most recent budget proposal calls for eliminating all funds for both the Library Services and Construction Act and title II of the Higher Education Act. He has made similar proposals in the past. Such cuts would be extremely harmful to the State of Connecticut which I represent; of the $7.858 million administered by the Connecticut State Library, $1.676 million are provided by the Library Services and Construction Act.

These funds, along with matching State moneys, are used to provide both basic library services and to fund special programs through grants. The special programs funded recently in the Third District of Connecticut, which I represent, have made an enormous contribution to the life of the community. Among these projects are:

The After School Program for Children on Their Own in West Haven, which provides library and educational programs for latchkey children, both in the library and in their homes.

The How Two's and Three's View Program in New Haven, which acquires books and films, and provides educational experiences, for young preschool children.

The Materials for Patient/Inmate Libraries Program which operates within New Haven and provides reading materials for those confined to mental institutions.

The Foreign Language Materials Program, operating in West Haven, purchases materials in foreign languages appropriate to the needs of this community.

The LEAP Program, operated through the Southern Connecticut Library Council in Hamden, which brings the latest computer technology to the region for the purpose of facilitating the location of library materials for use in interlibrary loans.

Mr. Speaker, from the above list of special projects in Connecticut's Third District, it is clear that libraries are moving into areas beyond their traditional boundaries. This trend is to be applauded. We in Congress must do all that we can to ensure that it continues, and that the more traditional programs of the library, which are so important to the education and enrichment of our population of all ages, flourish. We must hold to the belief that national defense means more than military security; it means an educated, well-read population with the resources to expand its horizons as well.●

● Ms. KAPTUR. Mr Speaker, over 30 years ago, the renowned nuclear scientist, J. Robert Oppenheimer, said:

> The open society, the unrestricted access to knowledge . . . these are what make a vast, complex, evermore specialized, technological world, nevertheless, a human community.

Our Nation's libraries play a major role in providing that unlimited access to knowledge which creates our human community. And libraries serve as important cornerstones of democracy in building critical thought and freedom of inquiry.

In my district alone, there are 30 libraries serving schools, universities, and the general public. Eight of these libraries participate in a regional program providing reference assistance, books, and audio-visual materials to citizens of several counties. Last year, Toledo, OH, was deemed to be the fourth best read city in the Nation based on use of public libraries as listed in "The Book of American City Rankings." All of us in Ohio's Ninth District are proud of our libraries and the many services they provide to our citizens.

But in today's budgetary climate, libraries are threatened with the elimination of vital Federal funds. This will severely limit their ability to serve as public sources of information, knowledge, and understanding of our world. Among the fiscal year 1986 budget recommendations are proposals to eliminate funding for the fourth year of the Library Services and Construction Act—even though Congress reauthorized the LSCA for 5 years last fall. Library grant programs under title II of the Higher Education Act have also been targeted for removal. The proposed elimination of postal subsidies will increase the costs to libraries that mail books and materials to the blind and physically disabled. For Ohio, these devastating reductions would amount to over $11 million in lost services to the illiterate, the disadvantaged and older Americans, funds for construction and renovation of libraries, support for resource sharing and postal service for materials to the blind and handicapped.

Thomas Jefferson, who recognized the importance of libraries by donating his collection to the Nation after the British burned the Library of Congress in 1814, said, "Enlighten the people generally, and tyranny and oppressions of body and mind will vanish like evil spirits at dawn of day." Let us be thankful for our libraries which enable the light of knowledge to be shed for all.●

GENERAL LEAVE

Mr. OWENS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1550

ORDER OF BUSINESS

Mr. FRANK. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. GONZALEZ] and I be allowed to switch our positions in the roster today, and that I be allowed to proceed with my special order at this time and that the gentleman from Texas [Mr. GONZALEZ] may take my place on the roster.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AMERICAN FOREIGN POLICY INCONSISTENCIES

Mr. FRANK. Mr. Speaker, I want to express my appreciation to my colleague, the gentleman from Texas [Mr. GONZALEZ], for allowing me to proceed at this point, and he will proceed a little bit later on.

Another gentleman from Texas [Mr. LELAND] and I have jointly requested this special order because we are very troubled by a very fundamental inconsistency in American foreign policy. We have a situation in the world in which the administration tells us we must, as a matter of high national policy, continue to finance a body of revolutionaries in Nicaragua.

People on both sides are being killed. I am not here to talk particularly about atrocities by one side or the

other because the relevant point is that that sort of atrocity, the killing of people who volunteer to fight, the killing of innocent people, the destruction of property, and the wounding of small children, is unfortunately in our modern age inevitable when people resort to war. That is not an argument for pacifism. It is an argument for, not easily but for purely political reasons, precipitating a war or financing a war. So we have to look, I think, very carefully at what the justification is for this country continuing to finance a war in Nicaragua in which people get killed.

Well, the administration tells us that that war has got to continue until the Nicaraguan Government, in the elegant diplomatic phrase that our President chose to use—no doubt borrowed from Metternich or one of the 19th century diplomatists—as the President said, must "cry uncle." Well, on what must they "cry uncle"? What must they concede to our President to get him to agree that it is not a sensible use of American tax dollars for us to continue to fight this revolution or to finance it?

Well, he says, they must be democratic, they must have free elections, they must treat their people in a civilized fashion. They are told that "if you don't treat your people in a civilized fashion, you can't presumbly expect America not to make war on you."

Here is what we have from the President on July 18, 1984; these were the remarks of a participant of the White House outreach group, and the President said:

> If the Sandinistas want cooperation and friendship from the civilized world, then they can start by treating their own citizens in a civilized manner. A substantial part of the justification for making war in Nicaragua is that the people of Nicaragua are not given full democratic liberties.

That is what the President said. He has set several conditions which he says they have to agree to if we are to stop financing a war against them: First, they have to stop being a surrogate for the Soviet Union and Cuba; second, they must reduce their armed forces, which are now 100,000, they must reduce to a level comparable to those of their neighbors. The current imbalance, we are told, is incompatible with regional stability; third, they must stop support for insurgents and terrorists in other countries nearby; and fourth, the Sandinistas must live up to their commitment to democratic pluralism made to the OAS in 1979. The internal opposition is entitled to participate in the political process of the country.

All right, there are four conditions. First, they have to stop being a surrogate for the Soviet Union and Cuba, but that is really an overstatement for the other three. Then they must not have an armed force which is disproportionate to others in the region; they must stop supporting terrorists and armed insurgents elsewhere in their region; and they must treat their country's people democratically. If not, the President says, we will make war on them; we will use American tax dollars to finance this very bloody killing on both sides.

Well, I looked at these conditions, Mr. Speaker. They had a certain familiarity to them. Let us think about another country which has an armed force very disproportionate to anybody else in its region, larger than almost anybody else in the region combined. Let us look at one which has troops in fact in other countries and which is actively supporting armed insurgencies against other internationally recognized governments, and let us look at one that is as repressive to the majority of its people as any government in the world—South Africa. One would have naively thought, looking at the Reagan administration's criterion for one where we finance revolutions, that South Africa would have been high on the list. By almost every criterion given here about Nicaragua, the South Africans are far worse.

Does anybody think that I am disappointed in and critical of the Sandinista regime's failure to live up to promises that were made for full democractic rights for their people? Unfortunately, many governments in the world fall short of that. The problem is, what is the best way to respond to that?

Now, with regard to South Africa—and let me say, having said that I wish the Sandinistas had lived up to democratic principles better than they did—no one could seriously contend the absolute denial of basic humanity, which is the lot of the majority of the people of South Africa, the black majority, and no one could deny that they are treated by their government in a far more repressive fashion and a far less democratic fashion than the people in Nicaragua. It is simply hypocrisy to argue that we are so offended by the censorship of La Prensa in Managua—and I deplore that censorship—that we must finance a revolution against the government that censors it, but we can be the best friend in the world to the Government of South Africa. Because that is what we are.

There is a glaring inconsistency in the policies of the administration regarding Nicaragua and South Africa. To be South Africa's best friend, to preach constructive engagement, to support South Africa at the United Nations against others who would condemn it, to be even more than our Western allies the friend of South Africa makes it very difficult to have anyone believe that this administration is really motivated by a concern over democracy within Nicaragua.

Here is what he said in July, 1984:

> If the Sandinistas want cooperation and friendship from the civilized world, then they can start by treating their own citizens in a civilized manner.

What are we told about South Africa? Well, here is what we are told about South Africa by Assistant Secretary of State Elliott Abrams. He is the human rights specialist of this administration. They do not like what South Africa does, but he said, in September of 1984, and I begin to quote:

> But we must recognize we are dealing with another sovereign nation and, by no means, the only country in the world to abuse human rights. We cannot dictate to that nation's leaders how to conduct their internal affairs, but we certainly can and do offer our own reactions to what we see.

To the brutal regime of South Africa, repressing its black majority as badly as any human beings on this Earth are mistreated, we must remember that we are dealing with a sovereign nation and we cannot dictate to them how to conduct their internal affairs. To the people of Nicaragua, we can say to them, "We will make war on you until you have elections we like," because that is one of the conditions, and as I read the President's proposal for which he wants to get our approval, all of them have to be satisfied. The Nicaraguan Government has to cancel the elections they had and have new elections, and that is a condition. That is a condition for us. We are not talking now, by the way, about giving aid to Nicaragua. We are not talking about any form of cooperation.

Secretary Shultz says we will continue to pay people to shoot people in Nicaragua until they have elections that we think are fully OK, but with regard to the absolute repression in South Africa, well, that is a sovereign nation, and we cannot interfere.

The hypocrisy is overwhelming, and we are here—and I am about to yield to my friend, the gentleman from Texas [Mr. LELAND]—to drive that home. We cannot consistently talk about the sorts of policies that this administration has in Nicaragua and South Africa and make any sense of them.

We are told, with regard to South Africa, "constructive engagement." Let me read one more suggestion, the next time you hear the President say that Nicaragua must "cry uncle." Among the things they must "cry uncle," they must live up to our version of democracy. I wish they did. I wish that every country in the world did, the Philippines, South Korea, and the People's Republic of China.

I think the President is right to have a rapprochement with the People's Republic of China, but let us not confuse the Chinese Politburo with the American Civil Liberties Union or even the Republican National Committee. This is no great "gang of democrats,"

but it is OK with the People's Republic of China. It is hypocrisy to pretend that internal democracy or its lack in Nicaragua has anything to do with it.

Here is what the President said about South Africa. This was in December 1984.

If you are practicing quiet diplomacy, you cannot talk about it or it won't be quiet anymore.

There is a brilliance here we have not fully appreciated in this man's subtlety.

And then he says:

I have always believed that it is counterproductive for one country to splash itself all over the headlines demanding that another government do something because that other government is then put in an almost impossible political position.

He thinks it is tactically unwise to demand that the South African Government stop shooting down innocent black South Africans who are protesting their repression, but he can insist that the Nicaraguan Government "cry uncle" about internal democratic proceedings or else we will pay people to go and make war on them.

Mr. Speaker, I will now yield to my friend, the gentleman from Texas [Mr. LELAND].

□ 1600

Mr. LELAND. Mr. Speaker, I appreciate the gentleman yielding. I also want to say I truly appreciate the gentleman's wisdom as well as his leadership on this matter. The gentleman and I discussed just the other day the contradictions and hypocrisy that the Reagan administration has espoused. We are truly disturbed by those contradictions.

Mr. Speaker, yesterday Secretary of State George Shultz said of U.S. policy toward South Africa, "We must not stand by and throw American matches on the emotional tinder of the region."

Earlier, he had stated:

The only course consistent with American values is to engage ourselves as a force for constructive peaceful change. It is not our business to cheer on, from the sidelines, the forces of polarization that could erupt in a race war; it is not our job to exacerbate hardship, which could lead to the same result.

Yet, the Reagan administration has chosen to do just that—throw American matches on the emotional tinder—in its Central American policy.

The blitz and hype surrounding the President's request for aid for the Contras in Nicaragua and his call for the continuation of the worthless policy of constructive engagement for South Africa highlight the inconsistency and hypocrisy which the President has time and time again demonstrated in his foreign policy.

The President has equated the Contras in Nicaragua to our great Nation's Founding Fathers—true democrats. He continually refers to them as freedom fighters, as opposed to Contras, and is ernestly setting out to convince the American public and Congress that these "freedom fighters" are groups of peasants, farmers, small businessmen and others disillusioned with the Sandanista Government who desperately seek a free and democratic Nicaragua.

I cannot understand how the President can justify calling a band of men and women whose hallmarks are rape, pillage, kidnaping, and murder freedom fighters. How did the President come to the conclusion that the Contras are made up primarily of humble Nicaraguans disillusioned with the revolution? It is a known fact that the largest group of Contras is made up of former national guardsmen from the Brutal Somoza regime. The brutalities executed by the guardsmen under Somoza caused Nicaraguans en masse to rise against the government. How can then can President Reagan claim that the majority of Nicaraguans now support these same people who inflicted such atrocities on them earlier?

The President continues to claim that we have a moral obligation to help these terrorists in the name of democracy.

Let's turn to another region now, South Africa. The conflict in South Africa has received almost as much publicity as the conflict in Nicaragua lately. And the conflicts in both countries do have some similarities.

President Reagan is highly critical of the Sandinista government because of what he perceives as questionable elections and repressions of government opponents, freedom of the press, and the private business sector.

But what of the Botha government in South Africa? The overwhelming majority of South Africans have no political voice, let alone a vote. Those who oppose the government are jailed, mysteriously disappear, or are murdered. And what greater repression of the private business sector than keeping a majority of a nation's people restricted to certain areas and in such destitution that the thought of owning a business is not even a fantasy?

Yet the Reagan policy regarding South Africa is "quiet diplomacy." In no way does the President want to offend Botha. But Reagan appears to have no qualms about offending the Sandanista government. He continually attempts to intimidate them by sending troops to train in neighboring Honduras and urging support of the Contras. Reagan has chosen confrontational politics in Nicaragua and silent politics in South Africa.

In South Africa, as in Nicaragua, there are factions who do not agree with the government, who have never had illusions about democratic treatment from the government. The overwhelming majority who oppose the South Africa's apartheid system are the humble of South Africa. I do not deny that some in South Africa have taken a more strident approach to ending the abuses of democracy and human rights in South Africa, like the African National Congress.

President Reagan, however, does not acknowledge the people fighting for freedom and democracy in South Africa as freedom fighters.

Based on President Reagan's statements that we "have an obligation to be of help where we can to freedom fighters and lovers of freedom and democracy" and that we should stand in strong support of those who have had "tyranny imposed on them by force, deception, and fraud" I would think that the President would seek consistency in his foreign policies.

Therefore, shouldn't President Reagan recognize and aid all freedom fighters who strive for democracy and justice? I've drafted a resolution calling on the President to be consistent in his foreign policy. If he insists on calling the Contras in Nicaragua freedom fighters and aiding them then he should also recognize members of the African National Congress in South Africa as freedom fighters and secure aid for them as well.

But while the President may find it perfectly justifiable to intimidate and confront the Sandinista government in order to enforce Reagan approved politics, he becomes defensive when asked why the United States is not doing more to bring about change in South Africa. He tries to explain that quiet diplomacy is the only policy that will bring change in South Africa. His policy in South Africa seems to be a one of wishful thinking—if he wishes long and hard enough maybe apartheid will go away. If this is the case, President Reagan isn't wishing enough, because apartheid is still present in South Africa and only cosmetic change has occurred.

In dealing with Nicaragua, Reagan has chosen to do more than wish away the problems there. He has been so eager to bring about change that he has allowed for the flagrant abuse of laws.

The Boland amendment—which President Reagan himself signed into law—prohibits the use of funds for the overthrow of the Nicaraguan Government. Yet the Reagan administration has violated this law several times, from the CIA approved manual on overthrowing the Sandinista Government to Reagan's approval before the American people for the removal of the Sandinista government unless the Sandinistas cry "uncle."

An earlier spending cap of $24 million for direct and indirect aid to the Contras was repeatedly violated. The New York Times reported that the CIA charged some of the costs of rebel programs to accounts other than those covered by the $24 million cap.

51-059 O-86-40 (Pt. 6)

The Times further reported that the living expenses of some rebel leaders' families and salaries of some CIA employees sent to Honduras, as well as the cost of CIA manuals, had been charged elsewhere.

And when the United States was prohibited from funding the Contras, President Reagan appealed to friendly allies to aid the Contras.

Time and time again Congress has come to learn of actions taken in regards to Nicaragua after the fact, a clear violation of the Intelligence Oversight Act.

America's Watch has concluded that the Contras "have attacked civilians indiscriminantly; they have tortured and mutilated prisoners; they have murdered those placed hors der combat by their wounds; they have taken hostages; and they have committed outrages against personal dignity."

Yet, these are the people the President has dubbed freedom fighters. A group Ronald Reagan, as our Nation's leader, has chosen to be the recipient of U.S. support and aid.

I am reminded of the saying, "If we allow an immoral government to speak for us then we are responsible for its acts." I do not believe the "silent majority" (as Reagan likes to call the public) wants to be responsible for the atrocities being supported by the Reagan administration. I am speaking out and I urge all concerned Americans to do the same.

□ 1610

Mr. FRANK. I thank the gentleman from Texas for his great leadership.

Mr. RITTER. Will the gentleman yield?

Mr. FRANK. And I will yield to my friend in 1 second. I just want to summarize a couple of points and then we will open it up.

The point that we want to focus on is much of the justification for the President's request for $14 million, but $14 million is only a small part, for continuing substantial sums from America to finance a revolution against the Nicaraguan Government, to finance the Contra attack, is the lack of democracy within Nicaragua. There were other justifications as well, but I reread again Secretary Schultz's speech in February at the Commonwealth Club in San Francisco. There are four points; all of them have to be satisfied before a war America is financing could be called off and one of them is they must live up to their commitment to democratic pluralism. They must be allowing the opposition to participate in the political processes of the country.

It is simply bizarre for South Africa's great friends to say that one of our conditions for stopping armed attacks on the Nicaraguan Government is that they let the people of Nicaragua have more rights when they support a South African Government that totally represses them.

The government, yes, talked about the business sector. Well, if you are black in South Africa you cannot even be an employee in much of your own country. You cannot be in certain businesses.

Yes; progress is coming. They are now about to say, we are told, that if two people of different race make the mistake of feeling an affection for each other, and want through some church to regularize that and become married to each other, that may no longer be a crime. That is the degree of moral barbarism we are dealing with and that we support in many ways by economic relations.

Let me just talk about the strategic question. The administration would genuinely believe, they would have us believe, I guess, that they are opposed equally to what goes on in both places. I would think almost anybody objectively would find South Africa——

Mr. RITTER. Will the gentleman yield?

Mr. FRANK. I will get to the gentleman in a moment.

At this point I would read into the RECORD some extraneous material from an article by Gregory Nokes of the AP. And he says: "President Reagan says the struggle against the Sandinista Government of Nicaragua is one of the 'greatest moral challenges' since World War II, but critics say the greater challenge, about which Reagan says little, is in South Africa.

"The President speaks out forcefully and frequently against Nicaragua, but only seldom criticizes South Africa. Yet there is little disagreement that the mistreatment of South Africa's 22 million blacks by the white minority is much harsher than the human rights abuses of the leftist Sandinistas."

At this point, Mr. Speaker, I include this entire article.

The article referred to follows:

REAGAN SAYS NICARAGUA A "MORAL CHALLENGE" BUT QUIET ON SOUTH AFRICA: AN AP NEWS ANALYSIS

(By R. Gregory Nokes)

WASHINGTON.—President Reagan says the struggle against the Sandinista government of Nicaragua is one of the "greatest moral challenges" since World War II, but critics say the greater challenge, about which Reagan says little, is in South Africa.

The President speaks out forcefully and frequently against Nicaragua, but only seldom criticizes South Africa. Yet there is little disagreement that the mistreatment of South Africa's 22 million blacks by the white minority is much harsher than the human rights abuses of the leftist Sandinistas.

Reagan has accused the Sandinistas of "institutionalized cruelty," alleging brutality toward the Miskito Indian population; suppression, torture and abuse of political opponents, and of using a "scorched earth" policy to force the relocation of tens of thousands of peasants.

Yet South Africa, the only government to make racial discrimination official government policy, routinely destroys homes of blacks, and has forced millions to live on reservations known as homelands. Blacks have no vote and no right to protest. Several hundred blacks have been killed in recent months by police who fired on demonstrations, while dozens of black leaders have been jailed on unspecified charges.

Reagan's approach to the two countries reflects his concern that Nicaragua is going Communist, while South Africa is considered an anti-Communist bastion in Africa. But it's a shortsighted policy that will reap its own ill harvest, say critics.

Rep. Howard Wolpe, D-Mich., chairman of the House Subcommittee on Africa, said the administration fails to "understand that South Africa itself is an open invitation to communism."

"Our identification with this kind of regime is actually increasing the dependence of liberation movements in the region on the Soviets and the Cubans," he said.

Randall Robinson, who has organized daily demonstrations outside the South African Embassy here, said the administration errs by focusing exclusively on strategic objectives. "Moral concerns of the deprivation of human rights don't have the slightest consideration," he said.

He said the administration is doing nothing in its policies to head off a possible "blood bath" in South Africa.

But Secretary of State George P. Shultz, speaking at a National Press Club luncheon Tuesday, expressed sharp opposition to a proposal before Congress that would ban new U.S. investment and reduce trade ties. He said the United States "must not throw American matches on the emotional tinder of the region."

He also said conditions are improving, although critics say recent changes are only cosmetic and don't get at the substance of apartheid, which is the denial of any political power to the black majority.

In one of his rare criticisms of South Africa, after 19 black demonstrators were killed by police last month, Reagan said the apartheid practices of the government are "repugnant."

He has said he doesn't criticize South Africa more often because it is "counterproductive for one country to splash itself all over the headlines demanding that another country do something . . . It can't appear to be rolling over at the demands of outsiders."

There is no reluctance to criticize Nicaragua, however, which Reagan said wants "to spread its poison throughout this free and increasingly democratic hemisphere."

"We cannot have the United States walk away from one of the greatest moral challenges in postwar history," he said Monday night in a speech aimed at persuading a reluctant Congress to approve $14 million in new aid for anti-government guerrillas, known as Contras.

Reagan says the Contras—organized and trained by the Central Intelligence Agency—are freedom fighters worthy of the help that the United States traditionally gives to peoples struggling for freedom. The Contras have received $80 million from the administration since 1981, but a much older black guerrilla movement in South Africa receives neither Reagan's praise nor American aid.

Wolpe said in an interview that racial attitudes may be a factor in American foreign policy.

"It is hard to escape the possibility that our hang-ups about race in our own society have helped to shape our very different way we respond to the struggle for freedom and dignity in South Africa, in contrast with our easy identification with comparable struggles elsewhere in the world against communist or totalitarian rule," he said.

Chester A. Crocker, the assistant secretary of state for African affairs who helped forge the administration's policy of so-called "constructive engagement," said in an interview it is misleading to compare South Africa with Nicaragua.

"South Africa is not a communist country, for God's sake," he said. "South Africa is not our enemy."

(EDITOR'S NOTE.—R. Gregory Nokes covers diplomatic matters for The Associated Press and has been writing about the administration's policy toward Central America since 1981.)

Mr. FRANK. What is it that keeps them from speaking out against South Africa?

Mr. RITTER. Will the gentleman yield?

Mr. FRANK. Not at this time. I will yield to the gentleman in a moment.

Mr. RITTER. The gentleman is a great engager in other special orders.

Mr. FRANK. I have not yielded, so I do not know why the gentleman is speaking. I will get to him. We have about 40 minutes left and I promise that I will be glad to let the gentleman speak. I just want to develop the argument.

I want to quote Secretary Shultz. Certainly my friend on the other side would not object to my quoting Secretary Shultz.

Secretary Shultz said yesterday in a quote as to why we cannot fight against South Africa too hard, why we have to be constructively engaged in South Africa: "A society that feels immensely threatened by outside forces is less likely to loosen the controls at home."

Now if you are seriously trying to get the Nicaraguan Government to be more democratic, you do that. Let me put it this way: You make the Nicaraguan Government being more democratic by financing a war against them. But in South Africa, you do not rise your voice too loudly because if they feel threatened by outside forces, they are less likely to loosen the controls at home.

And here is Secretary Shultz again:

We cannot have it both ways. We cannot have influence with people if we treat them as moral lepers, especially when they are themselves beginning to address the agenda of change.

We must not treat the South Africans as moral lepers, but we can shoot the Nicaraguans because that will bring them to change. But we cannot criticize too harshly South Africa. That is the kind of incredible use of language to cause there to be no credibility for the President's program. That is what we wanted to focus on.

Let me read just one last final quote from Chester A. Crocker, the Assistant Secretary of State of African Affairs. This is in January of 1985 that it was printed, but he said it in September. An Assistant Secretary of State over at the State Department talking about how we would like change in South Africa. He says:

Americans reject instinctively scenarios that would have us instigate revolutionary violence and racial strife in that country . . .

Apparently violence without racial strife is OK, but revolutionary violence and racial strife with violence we cannot have.

Our goals can only be reached through a sustained process of peaceful evolutionary change. We remain opposed to the resort to violence from whatever quarter; the fruits of political violence in the world today are bitter reminders of what terrorism and counterterrorism can mean.

This is not coming from Mike Farrell or from opponents of the President's policy or the National Council of Churches. This is the Assistant Secretary of State of the United States of America explaining our policy in South Africa.

We remain opposed to the resort to violence from whatever quarter. [We] reject instinctively scenarios that would have us instigate revolutionary violence and racial strife . . .

. . . the fruits of political violence in the world today are bitter reminders of what terrorism and counterterrorism can mean . . .

As someone who is unhappy with the Sandinistas' lack of democracy, how in the name of anything rational can you say these things and then finance in the name of democracy in part a $14 million first installment on a war?

Mr. DYMALLY. Will the gentleman yield?

Mr. FRANK. I am happy to yield to the gentleman from California.

Mr. DYMALLY. I thank the gentleman very much for yielding.

I have an appointment with the chairman of the Foreign Affairs Committee and I trust that I will take this matter up with him, too.

Mr. Speaker, I do not know of any issue that is more pressing in the world today than the question of the racist regime in South Africa. I join with my colleague from Massachusetts [Mr. FRANK] and my colleague from Texas [Mr. LELAND] in expressing my indignation over the situation in South Africa and the failure of this administration to move forcibly against the racist regime.

I conclude by saying this: I take very strong exception as an American to the fact that the President referred to the Contras in Nicaragua as freedom fighters but then blame the freedom fighters in South Africa for fighting for their rights and lay the blame on the whole unrest there on the freedom fighters. And as a black, I take strong exception to the Secretary of State referring to these Contras in Nicaragua as brothers. Brother is a term of endearment born out of the civil rights movement for the struggle for justice and democracy, and it seems to me it is a double standard that points out the hypocrisy of this administration's efforts in South Africa.

I commend the gentleman from Massachusetts [Mr. FRANK] and the gentleman from Texas [Mr. LELAND] for calling this special order and I thank the gentleman for yielding to me.

Mr. FRANK. I thank the gentleman.

Mr. RITTER. Will the gentleman yield?

Mr. FRANK. I now yield to my friend from Pennsylvania.

Mr. RITTER. I thank the gentleman for yielding.

I think there is some difference between the situation in South Africa and Nicaragua. I am not here in any way to defend apartheid or the policies of the South African Government. But I would like to call my colleague's attention to certain situations that have occurred in the last 15 years around the country, around the world, whereby authoritarian regimes have made the transition to democracy. For example, Greece under the colonels eventually went democratic. We did not sponsor a war of national liberation, of violent upheaval in Greece. We, to some extent, worked with the Greek Government, worked with the traditional forces within the society, traditional forces like the business community, traditional forces like the church, traditional forces engaged in political opposition that was not totally destroyed.

I think the same can be said of Spain under Franco. When Franco died, Spain made a transition to democratic rule.

Recently, in South America, there has been a spate of nations which having formerly been authoritarian made the transition to democratic rule. Argentina recently, not too long ago, was under the dictatorship of the Generals. We did not go into Argentina and suppport the Montenegro leftist guerrillas. We worked to some extent with a system; we supported those intitutions and those traditions within the government.

□ 1620

Mr. FRANK. I will take back my time for just a second in order to ask the gentleman a question: As I understand it he is giving all these instances when we have refrained from financing an armed rebellion against an undemocratic society. Do I take it he is about to announce against funding the Contras? I am just curious.

Mr. Speaker, I yield back to the gentleman from Pennsylvania.

Mr. RITTER. No. I am trying to make the distinction, if the gentleman

would continue to yield, and I do appreciate his yielding, I am trying to make a distinction between some of these undesirable authoritarian regimes on the right which have had the seeds of transition to more democratic societies.

For example, we have worked with the Korean Government and strides have been made towards opening up the Korean political system, as recent elections show. They have a long way to go to become a United States-style democracy, there is no doubt about it. But nobody is interested in foisting a North Korean type of war of national liberation on them.

Brazil, Uruguay have recently made the transition from authorization rightwing regimes to democratic systems.

Mr. FRANK. I am going to take back my time in order to make a point briefly. Let me say to the gentleman I understand and I agree to all that.

Mr. RITTER. Will the gentleman continue to yield?

Mr. FRANK. No, the rules are such that the gentleman may speak when I yield to him. Under the gentleman's special order I may speak when he yields to me. But I simply want to set the ground rules.

The point is simply this. I only have an hour and there are other Members who want to speak.

Mr. RITTER. Will the gentleman yield further?

Mr. FRANK. I would ask the gentleman, Mr. Speaker, to please abide by the rules. I would be glad to continue to yield if the gentleman would abide by the rules of the House. I do not write the rules of the House, I only vote for them.

Mr. RITTER. Well, may I sum up my point?

Mr. FRANK. No; I will be glad to yield to the gentleman briefly, but I will not if we cannot abide by the rules of the House. I do not think it is possible——

Mr. RITTER. Will the gentleman yield to me briefly?

Mr. FRANK. I will yield in a few minutes.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. FRANK] controls the time.

Mr. FRANK. I say to the gentleman from Pennsylvania that if he wants to give this list, and I agree with him, and I think it was a wise thing that we did in some cases. When Raul Alfonsin became President of Argentina winning a democratic election, I was very proud that he had Pat Derian who was Assistant Secretary for Human Rights in the Carter administration, to be at his inauguration because he said if it had not been for her and the kind of pressure she had brought on that regime that preceded him, he might have not lived even to run. And I agree that we can do that. My point is that it is not relevant to the issues we are talking about today because we are talking about South Africa.

I would reject the suggestion that there is in this explicitly racist regime of South Africa anything that really resembles what has gone on in Argentina and Greece.

There is, I think, a qualitative difference with the people who say—you see the problem we had with these other nations was this: the Greeks, the Franco regime, they said democracy is no good. We have something in South Africa where they say "Oh, democracy is wonderful." The people who run South Africa, the white South Africans say democracy is the only legitimate form of government "for us human beings. But for you black people, you don't count and you don't get this." Therefore I am rejecting the gentleman's analogy. The fact that the Greek Government did move, I do not think the South African Government is going to move. On the other hand I would also point out to the gentleman that we are not here arguing and let me make this clear, the gentleman from Texas, myself, the gentleman from California [Mr. DYMALLY], we are not arguing for the Reagan policy of Nicaragua to be transferred to South Africa. We are not here suggesting that not $14 million but a proportionate amount would be $50 million or $60 million, be given to armed resistance by the African National Congress.

We are not here suggesting that you finance armed revolt against the South African Government. We are saying that to finance armed revolt against Nicaraguans and say democracy is one of the reasons, they do not say it is the only one, but to count that at all and then to say "We can't even yell at the South Africans" I think is inconsistent.

So I would say to the gentleman what he said is not relevant to the argument here.

I yield to the gentleman from Pennsylvania.

Mr. RITTER. I appreciate the gentleman's yielding.

First of all we are fighting, that is we are supporting wars of national liberation, in Afghanistan.

Mr. FRANK. Yes.

Mr. RITTER. A wide cross-section of this Congress, the committee at least, has supported aid through Thailand for the San Son resistance in Cambodia. And I think the reason is that there has not been any kind of authoritarian government's transition to a democracy other than in Grenada which was done by force. I think it is a realization that there simply is no movement of Communist totalitarian governments toward more liberal forms of government and that the people who are willing to take up arms on behalf of democratic principles perhaps deserve some support.

Mr. FRANK. Let me take back my time to ask the gentleman a question and I will yield to him. He has not yet said and none of his arguments make any sense unless he is about to tell us that the South African Government is in fact going to move. I do not see any sign that if you follow the Reagan policies of constructive engagement, of not being rude to them, blaming some of the rioters for getting shot as the President did——

Mr. RITTER. I am not supporting that.

Mr. FRANK. Right. I would agree with some of the examples that the gentleman gave but the point is they are not available to defend the Reagan policy in South Africa.

The point is simply this. The gentleman is making arguments about other countries. We are talking about South Africa. Let me be very explicit: When George Shultz says, "We are so concerned about the censorship of La Prensa, it distresses me so to see a newspaper censored that I am going to finance a revolution against the people who censor it," when he then turns around and says, "but with regard to South Africa if you make someone a moral leper then you can't have any influence." What I am saying is it is not true, the Secretary of State and others who say that, including the President, are speaking an untruth to the American people when they say that the Nicaraguan policy is motivated in part by concern over internal democracy.

The South African example and their own rhetoric belies that. Now yes, there are other countries that have moved. As far as South Africa is concerned, let me say that I have seen more movement in behalf of some far-left countries. Let us take one of the President's best friends right now, the People's Republic of China. He has great relations with them. There have been some movement, more liberalization, more improvement from the Mao days to the Deng Xiaoping days today in China than in South Africa. So while I agree with what the gentleman has said that we have not seen democracy come to any of those Communist countries, we have seen, if you are going to take South Africa, we have seen the lot of a Chinese citizen today is better economically and politically in terms of liberalization than it was under Mao. For the South Africans it has gotten worse. They have even lost the right of living in their own country. The South African Government in the most cosmetic way talks nice and in fact is getting worse and more brutal. I am simply saying that the argument that the gentleman makes while it is historically of great inter-

est, it is irrelevant to the argument here.

I yield to the gentleman from Texas at this time.

Mr. LELAND. I thank the gentleman for yielding.

Mr. Speaker, I would like to address myself to Mr. RITTER and some of the observations that he has made.

What I do not understand is the logic of his argument because if you lay out the foundation for the history the gentleman has given then in fact we ought to be supporting the South African liberation fighters or the true freedom fighters there for the liberation of the majority of the people in South Africa, financially and otherwise.

Mr. RITTER. I would like to respond to that.

Mr. LELAND. All we are trying to say in this discussion, if you will, is that if, in fact, President Reagan can make so many statements that are favorable toward the Contras in Nicaragua, then those statements ought to be truly, in many instances or in most instances I venture to say, those statements ought to be made more so about the people who are struggling for freedom in South Africa.

Mr. FRANK. I yield to the gentleman from Pennsylvania.

Mr. RITTER. I think what one can see in South Africa that is similar, for example, to some of the other countries that made the transition, not that South Africa is that close to transition, but there is an independent church, there is an independent business community, there is an independent intellectual community and academic community. These are the seeds that eventually can, if one works with them, make the transition.

Mr. FRANK. I would ask the gentleman this question: for black people?

Mr. RITTER. Just one second, please. The Chinese experience, yes, there is liberalization in China but if anyone thinks the Chinese people have anything regarding any kind of freedom that even existed in Greece under the colonels, I think that is stretching it.

The fact about Nicaragua is that it is on our southern border. The fact about Nicaragua is that it does not——

Mr. FRANK. I have to take back my time for a second because the gentleman said Nicaragua was on our southern border. Has he misplaced a few countries? What happened to like Mexico and Panama, not Panama but the others above it? Nicaragua is not on our southern border.

Mr. RITTER. Nicaragua is very close to the southern border of the United States.

Mr. FRANK. I will give the gentleman "close."

Mr. RITTER. There is no way one can consider it on the southern border, it is not literally on the southern border.

Mr. LELAND. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I will let the gentleman from Pennsylvania finish if I may.

□ 1630

Mr. RITTER. I guess my point about Nicaragua is, it is one of these totalitarian communist governments. There are people who are willing to take up arms. If you look at the number, 15,000 in a small country of 2½ million, that is like 1.5 million Americans. They say that with the proper material and supplies, 25,000 people would take up arms.

Mr. FRANK. I have to ask the gentleman a question. I want to take back my time to ask the gentleman a question, and then I will yield to the gentleman from Texas.

In the first place, I did not suggest that China today has freedom. I said there has been more advance for the Chinese peasant from Mao to Deng——

Mr. RITTER. It is because——

Mr. FRANK. I must remind the gentleman that he has to wait for me to yield. Those are the rules we all live by; the gentleman can take out a special order and I will participate there, but we do have to have rules in the House.

The point is this: I simply said that there has been an improvement for the average Chinese that was greater than the improvement for a black in South Africa. I think there has been slippage in the other direction.

I did not say that they had any of those real freedoms. As a matter of fact, it is the Reagan administration that is the great booster of the People's Republic of China—I do not think I have been quite as enthused as the President about some of these things; in fact, I have been critical of the Reagan administration's failure to allow political asylum-seekers from the People's Republic of China into America. I think the State Department has behaved badly in rejecting the asylum application because of the President's political tie-in there.

But I want to get back to the gentleman when he suggests that there is for black people in South Africa, independent business, and an independent intellectual community.

I have to disagree when the gentleman suggests that black people in South Africa today are allowed those basic freedoms. They are not even allowed in many cases to live in certain parts of their own country.

So the suggestion that the black people of South Africa have that kind of independence, I think, is simply wrong.

Does the gentleman want me to yield to him, or his reinforcement?

Mr. RITTER. I would just like to say, I do not believe that there is the great level of independence of blacks in South Africa, but one also must admit that blacks do migrate into South Africa from other black African ruled nations.

Mr. FRANK. And what is the relevance of that?

Mr. RITTER. Excuse me?

Mr. FRANK. Is that in any way a justification or anything relevant—I must say that disturbs me, that suggestion.

Mr. RITTER. There are certain economic——

Mr. FRANK. I want to get back to the point that I was asking. The gentleman suggested that South Africa today resembles Greece. The gentleman said that Nicaragua is a totalitarian regime, and suggested it for the blacks in South Africa. For the whites in South Africa, it is a great place to live; no heavy lifting, because the blacks do it for you.

But in the situation for black people, I would argue that it is far worse than it was for the people of Nicaragua; there is much less freedom for the blacks, and I would reject the notion that there is the basis for black people to be at all hopeful about this regime in South Africa.

I yield to the gentleman from Pennsylvania.

Mr. RITTER. What I am trying to say is, there are institutions today in South Africa which do not agree with apartheid. There is an independent church which is diametrically opposed to apartheid. There is a press which is opposed in part, which is opposed to apartheid. There are academic institutions, there are business organizations which have gone several steps to enforce celibate principles within their own confines to oppose the system of apartheid.

Mr. FRANK. Reclaiming my time, I want to respond to the gentleman's I think excessive justification of South Africa.

Mr. Speaker, I would ask——

The SPEAKER pro tempore. The gentleman from Massachusetts has the time.

Mr. FRANK. The gentleman should understand. He talks about an independent church in South Africa. Well, there is an independent church in Nicaragua.

You might say, "Well, the church in Nicaragua faces harrassment." The churches in South Africa face persecution and harrassment that is far worse.

In South Africa they have indicted white churchmen as well as black churchmen. Roman Catholic churchmen have been indicted in South Africa—I do not think that there have been high ranking Roman Catholic churchmen subjected to the kind of police procedures in Nicaragua that they have been in South Africa.

So the argument that because there is an independent church in Nicaragua, they are better off; the South African Catholic Church has been very shabbily treated and persecuted by this government.

I yield first to the gentleman from Texas and then to the gentleman from Minnesota.

Mr. LELAND. I thank the gentleman from Massachusetts for yielding to me, and let me direct my comments to the statements made by the gentleman from Pennsylvania, and let him know that I have a certain empathy for the people of South Africa, because my roots lie somewhere in the Continent of Africa, and because of the brutality that was committed to the black people who were brought here, in terms of our cutting off our roots, we cannot trace back precisely where we came from.

Let me suggest to you that I am very happy to be an American citizen today, because I can stand here and argue with you on the issue apartheid in South Africa whereas there is not a black person in the parliament of South Africa who can argue for the people they would represent, given the opportunity to get elected.

They cannot get elected, not only because they are disallowed from representation for the people who are in the majority in South Africa, but they cannot even vote. They do not even have a vote.

What kind of persecution is that? You talk very cavalierly about what is going on in South Africa. There is nothing cavalier about the fact that people, black people, are relegated to townships, shanty towns, if you will, because white people do not want them to be a part of their social life or their political or economic life.

They do not gain any benefit from being a South African citizen and now they have gotten this incredible scheme where they would cordon off land for the so-called black workers in South Africa and give them that land and let them call that a township.

They have absolutely no rights to participate in society in South Africa at all. What is done in Nicaragua is not comparable to what has gone on in South Africa. How long has the Sandinista government been in power?

Let us also review the history of Nicaragua. What kind of rights did the people under Somoza have? What kind?

I think that the gentleman must understand that what is happening in South Africa now is that things have, as the gentleman from Massachusetts has suggested, have gotten much, much worse.

Anytime the black people get together in groups now, they are subject to being killed. Not just incarcerated or put under house arrest, but now they are fearful of their lives, just for going to a funeral. Just for peacefully demonstrating.

What kind of situation is that? How can we justify our continued involvement? How can we accept the very pedestrian attitude on the part of the Secretary of State of this country to say that in fact those people in South Africa might get a little shaky, the rulers of South Africa might get a little shaky if we push too hard?

Mr. FRANK. I will reclaim my time for a second. I just want to add to the comments of my friend from Texas. He is perplexed, and he wants to know how we can do that. Let me explain. Let me give him the Reagan doctrine on this. It comes from Secretary for Human Rights Abrams—he is the human rights expert.

He says, he might as well have been listening here and wanted to say this to the gentleman from Texas when he talks about people being shot down at funerals:

> We must recognize that we are dealing with another sovereign nation. And by no means the only country in the world to abuse human rights. We cannot dictate to that nation's leaders how to conduct their internal affairs.

That is the justification for nonintervention in South Africa. But with Nicaragua, because they have censored the press and have not had elections that we fully approve of, we can finance a revolution against them.

I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman from Massachusetts for yielding to me.

Mr. Speaker, I have not been a part of this entire discussion; I watched some of it on television in my office. Let me say, I essentially agree with the gentleman from Texas and the gentleman from Massachusetts about the situation in South Africa.

I specifically agree with the gentleman from Massachusetts about the stupidity of the remarks of the Secretary of State. I do not want to get into that argument, particularly, but it seems to me that what we are—where I will disagree with both of the gentlemen is that the situation in Nicaragua is nowhere comparable to the situation in South Africa.

In my judgment, all the elements of the same kind of oppression, if not in degree, but the same kind of oppression are existent in Sandinista Nicaragua that exist in South Africa. There is oppression of the church by the Sandinista government. The archbishop has had his car destroyed twice; once with him in it by the Tour Bus Divinas organized by the Sandinista government; Father Pina has been stripped and beaten by Sandinista soldiers; the Sandinista government has expelled all the foreign priests working with the traditional church and kept only the priests working with the so-called popular church.

So there are elements of religious repression. Even the elements of the resettlement program that the gentleman from Texas [Mr. LELAND] so eloquently pointed out, one of the major human rights violations on the planet which is taking place right now in South Africa, but there is even an element of that in Nicaragua, as 3,000 to 4,000 families in the Montegulpa Province and the other northern areas of the country are being relocated by the Sandinista government, having their families torn apart.

□ 1640

In my judgment, if there is a difference in degree between Nicaragua and South Africa, it is only because the Sandinistas have not had a sufficient amount of time to entrench the totalitarian nature of their state.

Mr. FRANK. I will take my time back now. The gentleman has made his statement. I will take my time back, and I want to make one point clear. We were not here, essentially, arguing that particular point. What we were saying was this: The gentleman said he is willing to concede, I guess, that South Africa, for black people, is maybe a degree or two worse than Nicaragua.

Mr. WEBER. I just said it is worse. I did not say a degree or two. I said it is worse.

Mr. FRANK. All right. The gentleman concedes that South Africa is worse than Nicaragua. Now he thinks if you give Nicaragua time, they may overturn them. The point we are making is this: We are addressing that part of the Reagan administration's justification for making war on Nicaragua which says we are concerned about democracy.

If you want to argue the other point, you can. What I am saying is——

Mr. WEBER. Will the gentleman yield?

Mr. FRANK. No; I have not yielded yet, because I want to get back on the point. The point we are making is this——

Mr. WEBER. I am trying to address the point.

Mr. FRANK. Well, then get a special order and address it.

The point is, the administration has said that one of the moral justifications for making war on Nicaragua with American money is their lack of democracy. At the same time it has said with regard to South Africa:

> You can't expect the government to change. They are a sovereign nation. If we push too hard, they will rebel against us. That is not the way to do it.

What we are saying is, it is hypocritical for a government to make excuses for not pressing very hard against South Africa. And I admired the letter that the gentleman and others on his side of the aisle sent to

the South African Government. I thought it was an important letter. I wish it reflected administration policy.

Let us not lose sight of the fact that the No. 1 defender of apartheid in America today, as I remember him from his statements in the columns he wrote, he is now the Director of Communications, Mr. Buchanan. Mr. Buchanan has basically defended apartheid. He is in the White House. That is the policy we have today.

What we are saying is, this administration, if they want to persuade us that 3 million poorly organized people in Nicaragua are a threat to this great superpower, let them do it on that basis. But let them not try to invoke democratic principles, because when the gentleman agrees South Africa is, if anything, even worse, even if they are both unfortunate, where do you get any justification for saying, given the South African policy, that one of the reasons we are making war on Nicaragua is democracy?

The speech says there were four conditions. One of the Secretary of State's and President's conditions for calling off the war is the lack of democracy. Well, if we were to go to war against everybody in part on that basis, I think we would be bankrupt.

I yield to my friend from Texas.

Mr. GONZALEZ. I impose on my colleague quite reluctantly, but only because the gentleman that you just yielded to before on the other side has made a grievous misstatement of truth and fact, and I would like at this point to provide, if the gentleman agrees with this unanimous-consent request, a reply to this question of so-called religious persecution in Nicaragua, by Rev. William Callahan, who is here now in the Washington area but has worked and lived in Nicaragua for many, many years, and I just want to state at this point the categorical answer that he makes to this, in view of the fact that the President had talked quite insincerely, I think, about using the hierarchy as sort of a medium of reconciliation.

"The Roman Catholic bishops, as a whole," in Nicaragua, "have taken a strong adversarial position toward the Sandinista party and toward the newly elected Nicaraguan Government. They are not perceived as impartial either inside Nicaragua or internationally * * *."

"The struggle between the bishops and the Nicaraguan Government is essentially political, not religious; that is, a struggle over 'turfs,' not over religious freedom," which has been one of the long-associated historical dilemmas in the Latin American countries, beginning with Mexico and proceeding on south.

Many religious opponents of the Nicaraguan Government suggest that Nicaragua will become "another Cuba."

Exactly the opposite has happened. The very opposite. In Cuba, the churches were restricted to the churches and the religious practitioners restricted to the churches, they have been closed, to all intents and purposes, religious schools have been closed, the Catholic Church had fought Castro, lost, and has been sharply reduced in scope and influence.

Exactly the opposite is true after 6 years in power of the so-called Sandinista regime. "Churches of all denominations enjoy freedom of worship. The churches are vigorous." The Nicaraguans are a highly religious people, "as witnessed in the public activity of those supporting the revolution and those opposing it. Religious schools are flourishing, and the intrachurch debates are vigorous."

Fourth, "the struggle in Nicaragua is not only between the government and the bishops but within the church community, i.e., between Catholics who oppose the revolution and those powerful segments of the Catholic community that support the revolution."

Mr. FRANK. I will just say to my friend from Texas that unfortunately I only have 5 minutes remaining.

Mr. GONZALEZ. I thought it would be appropriate to put that in.

Mr. FRANK. I appreciate it. I hope it will be inserted. But I did want to have time to yield a little bit to my two friends. Let me go to my friend from Minnesota first and then to my friend from California. I will keep about a minute for myself.

Mr. WEBER. Let me just ask my colleague, the gentleman from Texas had a unanimous consent request. I do not want to interrupt the free flow of debate, but I hope the gentleman is not going to insert at this point in the RECORD massive volumes of materials, because if he is going to do that, I would like to do the same thing to hold out my point of view. I would hope that the gentleman would agree with me that neither of us would go messing up their special order with all sorts of unanimous-consent requests at this time.

Mr. FRANK. Well, the gentleman from Minnesota will not be surprised if the gentleman from Texas has his own special order.

Mr. WEBER. I am sure that he does.

Mr. FRANK. And he will put in whatever he thinks is appropriate.

Mr. WEBER. I thank the gentleman for yielding. I will not go into this at any great length. I will just say that in my visit to that part of the world I explored more than any other question the question of the situation of the Catholic Church.

Mr. FRANK. Which part of the world, South Africa or Nicaragua?

Mr. WEBER. Both in El Salvador and in Nicaragua, not in South Africa.

Mr. FRANK. Not in South Africa.

Mr. WEBER. And I disagree with the conclusions of the gentleman from Texas. We were told by Archbishop Obando y Bravo that over 860 priests in Nicaragua remained loyal to the traditional church and only 10 Nicaraguan priests and 40 foreign priests are loyal to the so-called popular church.

Furthermore, the popular church, which does not attract very large crowds at Sunday mass when we were there at that time, is subsidized heavily by the government. Half a million dollars went to the center which subsidizes the popular church and the Sandinista government. Let me just conclude, and then I will give your time back.

Mr. FRANK. I just wanted to ask the gentleman, because that is not basically my point, I wanted to ask him, does he think that the fact that a church is mistreated, which I greatly deplore, is an independent reason for America to finance an armed assault on the government that does it? Because I think the South African Government mistreats its churches as badly and in many cases worse, with indictments and persecutions, as Nicaragua. So I am not here to say that these things do not happen, simply that it is hypocritical for this administration to advance that as an independent reason for attack.

I yield to the gentleman from Minnesota.

Mr. WEBER. One, I am responding to the gentleman from Texas, who took specific issue with my comments. Two, I do not think in and of itself that the nature of religious freedom in any country is reason for us to justify the overthrow of that government. However, the nature of religious freedom in the country of Nicaragua, to the extent which it exists and the attitude the government takes toward it, together with other facts we know about that government, are substantial evidence of the nature of that government and should be brought to bear in the debate.

Mr. FRANK. I have to take back my time. Yes; they are evidence of the nature of the government. The point the gentleman from Texas and I are making is this: It is hypocritical to be South Africa's best friend—I do not mean the gentleman from Minnesota, who has been very good on this subject of South Africa—it is hypocritical for this administration to be South Africa's friend and say we cannot pressure them politically and then find a lack of democracy as any part of the justification for an assault on Nicaragua. If they want to justify the American people taking scarce dollars to encourage people to kill each other in Nicaragua, they better find some other reason than that they are concerned about democracy, because as

South Africa's friend, as Marcos' friend, as the friend of so many other dictators, right and left, the People's Republic of China, when was the last time they pressured them for democracy?

Mr. LELAND. Chile, Mr. Pinochet in Chile.

Mr. FRANK. Chile, which is far more oppressive, right in our own hemisphere. It simply will not wash for them to invoke democracy, and it degrades the debate for them to pretend.

Let me yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

To get back to the gentleman's original point, I think the gentleman has made a good case for inconsistency here manifest in the statements of Mr. Shultz and others in the administration. My question for the gentleman is, because it appeared to me that the gentleman was saying that he agrees that the Sandinistas do pose—at least there is an argument to be made for a military threat and that they are, in many cases, as bad as the South Africans——

Mr. FRANK. No; let me just say to the gentleman that I disagree with their internal policies, I think they are undemocratic; I am not afraid of the Sandinistas because Nicaragua is a small, rather poor country. I would be inclined, as a citizen of Massachusetts, to be more afraid of Connecticut than I am of Nicaragua, because they have a better industrial base. But the point I would make is that I am critical of their lack of democracy, I am not frightened of them. And I am not a big tough guy, this is not a macho act, it is just geopolitics.

I yield back to the gentleman.

Mr. HUNTER. My question is simply this: Does the gentleman feel—because the Contra vote obviously is coming up, and the gentleman has not indicated how he is going to vote on that. Does the gentleman feel that there is enough of a proxy Soviet presence there in Nicaragua or a potential presence, satellite presence, to be a threat on the magnitude of Cuba?

Mr. FRANK. I will take 1 minute, and then I will yield to the gentleman from Texas.

No; in the first place, if it were a threat of the magnitude of Cuba, I suppose we would have to go and invade Cuba too, and I think that disproves the gentleman's point. If it is a Cuba-type threat, if it is a proxy for Cuba, what do you get by doing away with the proxy when the real thing is still there just a few miles away?

I do not think that America should be the 911 of civil liberties, every time people repress their citizens you dial 911, out comes Bill Casey and $50 million and a comic book about how to murder people and blow up their toilets. I think that is a great waste. I am not afraid of Nicaragua. I think we can say, as a majority of both parties of this House said, we are prepared to support policies that interdict the shipment of arms elsewhere, but I am not for invading them, and I am for an equivalent policy, I am not for funding the African National Congress, I am not for making war on South Africa, I am for the kinds of economic sanctions in South Africa I think would help.

I will yield, to finish up, to the gentleman from Texas.

□ 1650

Mr. LELAND. I would just like to ask the gentleman if, on the premise that we have involved ourselves and the way that we have as a Government in Nicaragua, should not we attack the Soviet Union right now since in fact we are worried about their involvement? I mean, that is exactly what the parameters of the discussion happen to be. That is what the gentleman is suggesting.

Mr. FRANK. I say to my friend from Texas: Please do not give them any ideas.

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleagues, the gentleman from Texas [Mr. LELAND] and the gentleman from Massachusetts [Mr. FRANK] for reserving this special order on the Reagan administration's constructive engagement approach toward the South African Government. The President would have us to believe that this approach is the key to changing the racist system of apartheid in South Africa. That is not the case.

The American news media depicts almost daily the mounting injustices, senseless killings, and horrors that are a part of the everyday life of the 22.7 million black South Africans. Although they comprise the majority of the population, blacks in South Africa, virtually have no political, economic, or social power. The majority is ruled by the minority—4.7 million white South Africans. White South Africans can vote. Black South Africans cannot. For every $1 a white employee earns, a black earns 22 cents.

Mr. Speaker, while the United States simply watches, the grand scheme of apartheid to establish satellite black townships where blacks are relegated and robbed of their homeland is in full swing. Institutional discrimination and overt racism are the law of the land. Violence and unjustified killings by government police against unarmed black South Africans are on the increase.

"Constructive engagement" will not change this situation. In fact, the Reagan administration approach may worsen it. Constructive engagement has lulled the white ruling South African Government into actually believing that apartheid can survive.

The Reagan administration's approach is a simplistic response to a complex problem. It is also a comfortable position for the United States. Over 300 American corporations conduct business in South Africa. South Africa's minerals are imported, in large quantities, into the United States. And, South Africa is a major ally of the United States in that part of the globe.

It is a tough decision. But, leaders of this Nation, the self-proclaimed champion of the oppressed around the globe, must take a firm stand on the side of justice in South Africa. Constructive engagement is not the answer. Only swift and effective action by the American Government will push the South African ruling minority government to review and abolish the apartheid system.

Mr. Speaker, the Anti-Apartheid Act, introduced by my distinguished colleague, Congressman BILL GRAY, is a good first step. The bill prohibits American businesses from making new investments in or loans to South Africa. The bill further prohibits the sale in this country of the gold South African Krugerrand coin and sets forth steps from the sanctions to be lifted.

The Anti-Apartheid Act is tough action, not meaningless talk like the Reagan administration constructive engagement approach. The American Government must act, decisively, before it is too late in South Africa.●

● Mr. SOLARZ. Mr. Speaker, I am extremely pleased to sponsor H.R. 1460, the anti-Apartheid Act of 1985, which was introduced on March 7, 1985. For several years now, along with many like-minded colleagues in the House of Representatives, I have sought to enact legislation to limit American economic and political relations with South Africa and to express our commitment to see the policy of apartheid eradicated. Such legislation passed the House of Representatives last year, but unfortunately died in the Senate in the last hours of the session. Nonetheless, in the ensuing months advocates of sanctions have been encouraged and renewed by the demonstrations of concern and commitment by thousands of Americans on this issue, and we are pleased to reintroduce the South Africa sanctions bill for passage during the current session of Congress.

Virtually all Americans would agree that South Africa's apartheid system is incompatible with democratic principles and human rights. Any system of government which excludes by definition the overwhelming majority of people who live in that country merely because of the color of their skin is a system of government that we would

find fundamentally objectionable. The question we confront in the Congress is not how to assess apartheid, but how to respond to it.

The answer advanced by the Reagan administration is a policy known as a constructive engagement, grounded in the belief, as Assistant Secretary of State Chester Crocker has said, "that it is not our task to choose between black and white." After 4 years, the verdict is in on the constructive engagement approach. It is a flawed and failed policy, a monument to moral myopia and wishful thinking. It has caused South Africa neither to relax its racist repression at home, nor to end its control of Namibia in defiance of international law. Meanwhile, the United States is paying an increasingly heavy price, with the black majority in South Africa, with other African nations, and even with some of our Western allies, for a policy which is often perceived as a reapproachment with racism.

Clearly, it is now time to abandon constructive engagement and bring forward a new approach, one which makes clear in deed as well as word our abhorrence of apartheid. It is time to develop a policy in which we choose not between black and white, but between justice and injustice. In designing and executing such a policy, we should cast aside any illusions that our actions will bring the apartheid system to its knees. In the final analysis, a political resolution of South Africa's problems must come from within South Africa, not from the United States or any other outside nation. At the same time, there are a number of steps we could take which would have a significant symbolic and substantive impact upon events in South Africa. Several of those steps are embodied in the legislation that was introduced on March 7, 1985. The bill has four parts: First, a ban on loans by U.S. banks to the South African Government or its parastatal entities, except for loans made for educational, housing, and health facilities which are available on a totally nondiscriminatory basis in areas open to all population groups; second, no new investment by American companies in South Africa; third, a ban on the importation into the United States of the South African krugerrand or any other gold coin minted by the South African Government; and fourth, a ban on the sales of computers (which are used to enforce apartheid) to the South African Government.

Critics of the legislation contended that it is wrong to single out South Africa for special condemnation when there are so many other human rights violators around the world. But the fact is that for a variety of reasons the United States has adopted stringent measures against other nations—restrictions which have frequently been more sweeping than those proposed in this bill. For example, in 1978 we enacted a total economic embargo on trade with Uganda. Under the International Emergency Economic Powers Act, the United States maintains an embargo on economic transactions with Cuba, Vietnam, Cambodia, and North Korea and implemented an embargo against Iran during the hostage crisis. Under the United Nations Participation Act, we carried out extensive economic sanctions against the white minority government of Rhodesia for many years. The Export Administration Act contains other provisions under which exports to South Africa and many other nations are controlled or restricted on grounds of short supply, national security, antiterrorism, human rights, nonproliferation of nuclear weapons, and other foreign policy considerations.

Given the actions we have taken against other human rights violators, I believe our Nation would be more open to a charge of inconsistency and selective indignation in our foreign policy if we failed to enact this legislation. If we believe human rights to be a valid and important consideration in our foreign policy, it would seem to be particularly inappropriate to carry on business as usual with the apartheid regime. While all forms of dictatorship and tyranny are objectionable, there is something especially repulsive about a system of tyranny based on the doctrine of racial exclusion because that idea strikes in a very fundamental and insidious way at the dignity of human beings.

I believe it is now up to the Congress to point us toward a fundamentally different course in our relations with South Africa, a course which serves both our sense of national purpose and our national interest, which is consistent with our own commitment to individual freedom and recognizes the reality of eventual majority rule in that nation.●

● Mr. LEVINE of California. Mr. Speaker, I am pleased to have the opportunity to participate in this special order on the lack of firm action by the Reagan administration against the practice of apartheid by the South African Government.

On taking office in 1981, the Reagan administration formulated the policy of constructive engagement to encourage peaceful change away from apartheid in South Africa. But treating this odious practice in such a benign manner is like treating terminal cancer with laetrile. It just doesn't work.

The South African Government operates under an entrenched system of institutional racism, in open defiance of any standard of civilized society. Yet the Reagan administration still prefers to adhere to its misguided policy and to reward this inhuman South African Government by making it the United States' largest trading partner and by becoming the second-largest foreign investor in South Africa.

Through apartheid, the South African Government allows a minority of 4.5 million whites to deny 22 million black South Africans their basic human rights. Black South Africans cannot vote. They cannot run for political office to have a voice in their own destiny. The South African Government's homelands policy has resulted in over 9 million black South Africans being stripped of their citizenship in the land of their own birth. The South African Government has increased its oppression of trade unions. Its policies have resulted in the death of blacks fighting for their rights and for their ever-elusive freedom. A virtual police state exists in South Africa.

Mr. Speaker, we must raise our voices loudly and clearly in opposition to the unconscionable practice of apartheid and to the Reagan administration's policy. Constructive engagement is not the answer. Tolerance of apartheid is not the answer. We must remember the oppressed black South Africans longing for their freedom and for the respect they deserve. We must speak for them and to agitate on their behalf. Our national values and interests mandate that we take up the cause of those longing to be free of the shackles of their oppressors. It is our moral responsibility.

We can help break the back of apartheid by breaking the grip of those who foster that obnoxious practice. We must remember the human beings for whom and with whom we fight. We must keep them and their indomitable spirit in our hearts and minds. We can have an effect by opposing administration policy and by passing stong antiapartheid legislation, which I endorse wholeheartedly. We can do that by expressing our views and by pressing unceasingly against the relentless wall of apartheid.

South African bishop Desmond Tutu, recipient of the 1984 Nobel Prize for Peace, has said that no amount of repression can contain the millions of black South Africans who are determined to be free. Let us join them in their determination and their efforts. We must stand with them, hands joined, in unity of spirit, for a cause that is right. One day they will be free, and I, for one, want to help hasten that day.●

● Mr. MORRISON of Connecticut. Mr. Speaker, I am proud to join with my colleagues in supporting H.R. 1460, the Anti-Apartheid Act of 1985.

South Africa is the only country in the world that practices legally mandated racism. The United States

cannot associate itself with a government that oppresses 23 million of its citizens. As the champion of democracy, freedom, and human rights in the world, we must demonstrate our abhorrence and repugnance for apartheid.

The effects of apartheid are devastating. In the past 35 years, 3 million black, 800,000 mix race, and 400 Indian South African citizens have been forcibly removed from their land. As a result of poor sanitary conditions, low standards of nutrition, and the lack of sufficient hospitals and doctors in the so-called homelands, infant mortality among blacks is as high as 200 per 1,000 live births (among whites, it is 15 per 1,000 live births). The poor living conditions also give blacks a life expectancy of 57 years as compared with 70 years for whites.

Some of South Africa's principal exports include diamonds, uranium, metals, metallic ores, and gold. Yet, a black mineworker earns an average of $136 a month, while his white counterpart earns an average of $750 a month. The South African Government spends $7 on each white student's education for every $1 spent on a black student's education. Since August 1984, over 270 blacks have been killed, and over 4,500 blacks have been arrested.

South Africa's black majority is denied the right to citizenship, the right to national political participation, the right to choose where one will live and work, and the right of free assembly to petition the government for a redress of grievances.

It is quite obvious that the Reagan administration's policy of constructive engagement is not working. The South African Government recently established a new constitution that does not even acknowledge the very existence of black South Africans.

We must make it clear to the South African Government and to the rest of the world that we find apartheid totally unacceptable. We must do more than say we don't like apartheid.

My colleague, Mr. GRAY, of Pennsylvania, has introduced a bill that will impose economic sanctions against the South African Government. H.R. 1460 prohibits loans to the South African Government, prohibits all new investment in South Africa and Namibia, bans the importation of krugerrands into the United States, and prohibits computer sales to the South African Government. These sanctions demonstrate our abhorrence and repugnance for such oppression.

I have joined as a cosponsor of H.R. 1460, and I hope that this body will take favorable action on this important measure without delay. It is time for the United States to take a strong and clear stand against apartheid.●

● Mr. MINETA. Mr. Speaker, today, I would like to join with my colleagues in bringing attention to the administration's continued support of the racist and brutal policies of the Government of South Africa. In face of the administration's tacit approval of the apartheid policies in South Africa, I believe citizens all across our Nation must make known to their lawmakers that it is unacceptable to continue to have close relations with a country where human rights are denied to 73 percent of the population because of their race. In their own country, South African blacks must carry passes at all times; they cannot vote; they cannot own property in the "white areas" which comprise 87 percent of the country; they are barred from making any economic progress; and many have to live apart from their families.

U.S. citizens must object loudly against our Nation's economic power reinforcing a government that frequently displays brutal violence towards its citizens—shooting and killing innocent people who feel compelled to demonstrate against the injustices of the white-supremacist government of South Africa.

The Reagan administration speaks of the importance of constructive engagement, and is an enthusiastic applauder of South African President Botha's tepid and cosmetic reforms. Our citizens must ask out loud, "What have 4 years of this so-called constructive engagement brought"?

If at the highest level of our Government there is silence and inaction, then our national objection to the policy of apartheid and the Government of South Africa must begin at the grass roots level, for our national patience is fast running out.

Mr. Speaker, I am proud to say that the city council of my hometown of San Jose, CA, on April 2, 1985, voted to begin banning investment of city money in South African Government, in corporate securities, and in American firms that have subsidiaries in South Africa. I commend the council for their action for I believe they voted their conscience in passing this measure. I hope my colleagues in the House will follow their example when legislation comes to the floor which seeks to make it the policy of the United States to condemn and seek eradication of the policy of apartheid through specific prohibitions and restrictions on loans, investments and exports to South Africa.●

● Mr. RANGEL. Mr. Speaker, I rise to commend my colleagues BARNEY FRANK and MICKEY LELAND for bringing this very important special order to the floor of the House. It is timely and necessary.

Racism in any form is a repugnant thing. In this century it has taken on many disguises, and has often been perpetuated by the mechanisms of 20th century ideological praxis. Millions of lives have been lost or ruined because of the excesses of Stalinism, Nazism, religious hatred, and ethnic programs. This is a unique characteristic of modern man, unmatched since the religious wars of the Middle Ages.

Apartheid is the latest manifestation of State-sponsored racism. Nonwhites do not share the fruits of the rich natural wealth of South Africa, and have been denied basic political freedom. Dozens of protesters have been shot by the security forces, and no end is in sight.

Apartheid will not end of its own volition. Pretoria must be convinced that the world community will end all economic and political ties unless apartheid is ended. Only in this way will change come to South Africa.

Ronald Reagan has not only refused to condemn apartheid, but has given it aid and comfort. Constructive engagement is nothing more than appeasement, and has gotten us nowhere. It is quite clear to me, Mr. Speaker, that the United States will be tainted by this appeasement unless we change our course.

I have reason to hope for a change in American policy. We are witnessing a grassroots movement against constructive engagement. Most recently, students at Columbia University in my congressional district have bravely protested Columbia's investments in companies doing business in South Africa. In this spirit of hope, I would like to submit the following article into the CONGRESSIONAL RECORD:

[From the New York Times, Apr. 13, 1985]

PROTESTS AT COLUMBIA: STUDENTS AND THE ISSUES HAVE CHANGED SINCE THE 60'S

(By Michael Oreskes)

Columbia students are sitting-in on the steps of Hamilton Hall again, just as they did in something called "the 60's"—a phrase that conjures both a time and a state of mind.

To some, these new protests at Columbia University are like the buds of spring on the quadrangle, the first signs of a new student activism after a long winter.

But these are very different times, others say. The issues are different, the attitudes are different—the only thing that is really the same is the building.

Yet that earlier time is a presence, nonetheless, that in tangible ways is influencing what happens today.

To the students, the Columbia protests of the spring of 1968 are a received memory, something they learn about almost the way they learn of such events as the assassination of President John F. Kennedy or the war in a land called Vietnam. It is a legacy they may not have fully understood at first and would now just as soon separate themselves from.

To the university administration, the protests—in which the police were called to clear out students who had occupied Hamilton Hall and four other buildings—are a specter and a lesson, a symbol of how badly things can go wrong when mishandled.

In 1968, the protests focused at first on defense-related research, then broadened to issues including support for the Harlem

community's objections to a gymnasium Columbia was planning for Morningside Park.

In 1985, the students have taken the steps of Hamilton Hall to demand that Columbia University, which has an endowment of just under a billion dollars, withdraw $32.5 million invested in companies doing business with South Africa because of its policy of apartheid.

The university has already restricted its investments, but it is reluctant to simply write off many of America's biggest corporations.

The protest comes as opponents of the South African government almost daily offer themselves up for arrest at the South African consulates in New York and Washington, on a charge of what could be called trespassing with intent to end apartheid.

The Columbia students, conducting the first real sit-in anyone can remember on the campus since the end of the Vietnam War, say they are prepared to be arrested, too, in the same peaceful fashion. They have even tried to negotiate with the university on terms for the arrests.

But they have underestimated the impact of history. Calling the police on campus is, in the words of one senior administrator, "anathema" to much of the Columbia faculty and administration who remember the fire last time.

The administrators who run Columbia cannot help but have in mind the events of the spring of 1968 when thousands of students participated in what was variously described as an uprising, a protest, a rebellion or a riot.

The students seized five buildings, and after a week of indecision, mediation and debate, the college president, Dr. Grayson Kirk, asked the police onto the campus in the dead of night to clear the buildings.

The result was awful, everyone now agrees. The students resisted. The police officers used fists and nightsticks. Many students were injured, and hundreds were arrested.

There was a law professor on campus that spring named Michael I. Sovern. After the clash between the police and students, Professor Sovern was named to head a 10-member faculty committee that, to state it simply, was given the job of putting Columbia back together.

Today, Professor Sovern is Columbia's president. He is the one who must decide what to do about the students on the steps of Hamilton Hall.

Knowing history is not the same as learning the lessons of history, or even knowing which lessons to learn. Dr. Sovern points this out to acquaintances by reminding them that a cat that sits on a hot stove will never sit on a hot stove again, but neither will it sit on a cold stove.

Dr. Kirk was criticized for calling the police. But he was also criticized for not calling them sooner, thus allowing the situation to build to a crisis.

Dr. Sovern and his aides are watching Hamilton Hall closely. But there is little sign of crisis on the campus. Most students are going about business as usual.

That is one difference. Perhaps even more important, the students on the steps of Hamilton Hall, almost all of them undergraduates, are very different from the earlier protesters.

If there is one word that everyone uses to describe the students on the steps of Hamilton Hall, today it is "disciplined." Their protest has been neatly organized to draw maximum attention with minimum disruption.

They have even computerized all of their statements and the statements of the administration "so we can respond quickly," said Wally Hays, who oversees the desktop computer used by the protesters.

These students are not fighting the generational war of their predecessors. "These students are often very close to their parents," said Dennis Dalton, a Barnard political-science professor who has been advising several students. He said many of the students felt considerable pressure from parents to end the protest.

The college and the world of adults is not their enemy. "We don't hate President Sovern," said David Goldiner, a 20-year-old protest leader who remembers being wheeled to anti-Vietnam war protests in a stroller. "We think we have a better argument than he does."

Dr. Sovern met this week with five of the protesters, who had been conducting a fast. Anyone steeped in the campus culture of the 60's might have expected tension and invective. Instead, they had two hours of high-level discussion, said Eric Foner, a history professor who accompanied them.

Professor Foner and others say that far from being an exception to the career-minded students who have become prevalent on campus, the protesters are quite concerned about the danger the protest holds to their academic careers and their chances for getting into good professional schools.

The students have clearly succeeded in getting attention for their cause, and there are beginning to be demonstrations on other campuses.

What they have not been able to do, at least yet, is rally the student body behind them. In 1968, a few hundred students occupied buildings, but hundreds more, maybe thousands, milled and marched outside in support.

"In 1968 you had a spark thrown in a tinderbox," said Diane Ravitch, an historian of American education. Protesters, she suggested, were able to tap a deep well of discontent then. "Here," she said, "There's the spark but there is no tinderbox."●

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr GONZALEZ. Mr. Speaker, I continue on my advice to the privileged orders, which, as I have said, include first and foremost my colleagues. We happen to find ourselves at a critical moment in our hierarchial, societal position in one of the pinnacle points of privilege. But mostly to those real wielders of power, the real privileged orders, which today in America represent those forces that ensconced in an unaccountable way to the people in basic violation of the basic tenets that gave rise to our form of government under the Constitution that is operative today, are wielding the power of war and peace; the American standard of living; the doom or the extinction of millions of our small business exterprises.

To these privileged orders I address, and continue to address my remarks. I had intended to begin by continuing what I left somewhat unfinished yesterday with respect to this peculiar situation that brings us full circle in America back to the 200-year-ago point and just almost on the eve of our bicentennial celebration of the Government that we enjoy today. So many Americans think that we had a bicentennial in 1976; the truth is that our form of government will not have a 200th birthday until 1989.

There is nothing, I might point out to my colleagues, that vouchsafes the continuity or the permanence of this form of government. We take it for granted, true. But we better start working at it.

I was starting to begin on that premise when I joined, just a few minutes ago, in some of the discussion that the distinguished gentleman from Massachusetts, who, with his unmatched wit and incisive intellect has so eloquently pointed out and has, I think, removed some of the obscurantism of the current President and his regime in the trappings that they have tried to provide in guise of a policy, but which in effect is no policy at all. I am very grateful to the gentleman from Massachusetts for at least pointing out the incoherency, if not the actual hypocrisy and outright insincerity, in what is being uttered and what is being done.

I wanted to take this point to pick up on that matter having to do with our relations and our present catastrophic course in Central America, specifically. But generally toward those countries that share the destiny south of the border with us, beginning with the Republic of Mexico.

In the first place, we cannot continue to indulge in the misperceptions that still prevail in the minds of the overwhelmingly and preponderant number of Americans in and out of the Congress, in and out of the White House. Also, the reference to the situation or the anomolous position and conflicting position of the administration and its spokesmen with respect to the situation in Central America with specific reference to the Republic of Nicaragua, and the South African country or government or republic.

It reminded me very much, I wanted my colleague from Texas and my distinguished colleague from Massachusetts to hear this because in 1957, as a freshman member of the State Senate of Texas, at a time before the name Martin Luther King was heard, I got up and filibustered, I used the instrumentality that had really been born in the Texas State Senate; not in the U.S. Senate. The unlimited rule of debate and the filibuster, as it got to be called popularly, really had its birth in that great institution known as the Texas State Senate.

We were facing that particular year the massive group of resistance bills that had emanated out of the State of Virginia and had wended its course through the 11 Confederate States. I might say that the record will show that it was only in the Texas Legislature where they were even debated. In the Arkansas Legislature, for example, the 16 basic measures were approved in about 16 minutes. So that when I got up, took the floor, held it continuously without cease and without sitting for a total of some 26½ hours, and then combined with a senior member at that time, but a recent former colleague of ours in the Congress, Mr. Abraham Kazen, we filibustered and tied up the Senate a total of 36 hours, and we ended up in enabling the Senate to approve only 2 of the 16.

But the arguments that were advanced were identical to what you heard here today. Now, I cannot evoke that atmosphere: The sounds, the smells, the hatred, the putredness of outworn prejudicies encrusted into the law. I had first seen that on the city council level of San Antonio, where we had the same thing. Astoundedly, I was the one that had a hand in the first so-called Supreme Court decision that was the beginning of the so-called civil rights, and that was the unconstitutionality of restrictive covenants in the alienation of property based on race, color, creed, or nationality.

At that time it was very popular a practice in San Antonio and in Texas generally, but particularly in that part, and more virulently in east Texas, to have in the master deed records with the county clerk, filed these restrictive covenants that read:

"If at any time this property, either through diseason or alienation or sale or inheritance or bequeath, should become an ownership in the hands of a Negro or a Mexican," and in some sporadic instances they also included the word Jew, "then the original title, that is the title to this land, shall revert to the original grantor." That is the one who had originally filed the master deeds when he or she proceeded to develop plats of land or what we call today developments or subdevelopments.

□ 1700

So that here we were in the glorious year of our Lord 1947, while in the law school I had studied that very diligently and then after the war, and subsequent to 1946, I read with great interest in a law journal that the black group in St. Louis, MO, had raised the magnificent sum of $250,000 in order to prosecute the case of restrictive covenants through the judiciary and were headed for the Supreme Court.

Now, in San Antonio, we had had, some of us, the same experiences that were customary and were encrusted into the State statutes known as Jim Crow laws, and the other State constitutional provisions that called for strict segregation up and down the line. We were no different from South Africa. The antimiscegenation laws were criminal culpability in nature, and in the city of San Antonio, lo and behold, I organized what was known as the first, sponsored Mexican-American—even though I hate hyphenated names, I will use this for descriptive purposes—businessmen. These were relatively young men who had somehow or other remained in San Antonio during the war and they were able to profit, and some of them reached the great position of being either millionaires or near-millionaires. So after the war I thought it was time that the people of Mexican origin do more than just sit back and whine and complain about discrimination.

As I say and repeat, in some areas, including San Antonio at that time, and particularly before the war, we faced, and especially those who had a darker texture of their skins, and in my family, as I said once before here, I am the lightest complexioned in the family, so that I shared some experiences that were directed to my brothers and my sister that unfortunately I would be spared because the individual prohibiting entry say to the skating rink on St. Mary Street, or to the swimming pool at San Pedro Park, or further over in New Braunfels, TX, to the Land Apart, and before that, well, later it became a State park so we were able to proscribe that kind of practice, but at that time I had the experience of having these individuals say, "All right, we do not allow Mexicans." Then they would look at me and say, "Well, you are all right because you are Spanish."

This is the reason I do not like this word Hispanic today, even though it offends some of my colleagues of Puerto Rican and Cuban descent who are generally classified as Hispanics. I do not like it because the people who did not want to be associated with that distasteful appellation, even though they emerged from the same group, would say they were not Mexican; they were Spanish, Hispanic. So I have this inbred dislike for that word, even though it is a very noble word. In Spanish it is a word that is very beautiful, Hispanidad. It is a beautiful word, but nevertheless, in order to come up to today, because what I heard here from some of the Congressmen is reminiscent, and some of the things that have been put out by the PR people of the South African Government are identical to what we were told during the filibuster by preeminent associates in the State senate and by the State senate leaders then and the State leaders generally in Texas.

But in San Antonio, my baptism of fire began my first year on the city council, because before I ran for the city council, before I even thought I would be in politics, I had organized a Pan American Progressive Association. I was trying to get some social conscience responsibility and some social conscience out of some of these newly rich businessmen, and they did. They came across mostly because they knew my family, knew my father, and they thought that anybody the son of Don Unitas was going to be all right.

The first thing they found was that I got involved in some of the then crises. For instance, I had a returning veteran of World War II by the last name of Trevino who came to me and said, "I wanted to buy a home with my savings and my mustering-out pay. Over here in this new development that is just under construction, near Woodlawn Park, and the developer there and the people who are going to sell the homes said they could not sell to me because I am Mexican."

Well, at first it seemed very difficult to accept that, but it was true. Then I found that their reason was they could not give him a clear title because of these master deed records and these instruments that were so basic and would not allow a title guaranty company to give what they call an unclouded title.

So then I was pondering that situation when here comes a very humble little gentleman, one of those salt-of-the-earth who are commonly called Mexicans, but who was, like the overwhelming, preponderant majority, just asking for tranquility, to work hard, earn a living, provide for the family, find a roof, provide food and clothing. All of the sons of this man, whose name was Abdon Puente, had been in the service. One of them had come back and had befriended a buddy. They had fought together. They had been on the same team beginning back when the 36th Texas Division was mustered in, and they were in Italy at Anzio, and when they came out, this buddy of his was not Mexican-American, his last name was Humphrey, and he happened to have a little family house. He was totally a 100-percent disabled veteran. He had great need for $3,000 in cash. The little home he had was in what they call the Palo Alto addition in San Antonio. It was originally known as the Mayfield subdivision. This was named after an individual who was very famous after World War I in our stretch of the woods, and his name was Earl B. Mayfield, who ran in 1920 as a candidate of the Ku Klux Klan Party and won. So one of those who was close to him was a businessman who also bore an illustrious name. He was the one who had the title vested in him by virtue of the master deed records. So when Humphrey said in good faith, "I will sell to you, young Puente," and the Puente

family dreamed of having a little home, because all they had had was a lean-to shack, so upon this young veteran's return and his buddy saying, "I will sell," they gave him the $3,000 in cash, which Mr. Humphrey immediately spent.

Lo and behold here comes Mr. Puente, the father, with his hat in his hand, and said, "Mr. Gonzalez, I have been told that maybe you could help us," and then he laid out a notice, a filed notice, that had been served on him by the deputy sheriff in which he was asked to appear before the district court. At that time it was known as the 37th district court, in Bexar County, and to show cause why an injunction should not be honored.

□ 1710

The injunction was filed by the gentleman who had inherited the master deed titles to all of those developments and homes in the Earl B. Mayfield Park Subdivision, and what he was saying was: "Look, you not only are going to lose your money, you have to turn that house over to me because you, Mr. Puente, are a Mexican, and this is a restriction."

I then checked with Mr. Humphrey, who said, yes, that the title company had informed him that there was a cloud, but he did not understand what that was nor did they explain the nature of the cloud.

So the next thing I did, I said, "Mr. Puente, you have to have an attorney to file an answer. Otherwise you lose by default."

He said, "I have no money."

I picked up the phone and called a friend, a very benevolent lawyer, a Mexican-American lawyer, one of the very few at that time in San Antonio, and he said, "Henry, I can't practice really adequately and competently in district court, I just reserve my practice to the lower courts, municipal court"—what they used to call the corporation court—"and maybe a county court of law case now and then, frankly."

"Well," I said, "I don't know who I can get that will do it free."

He said, "Well, I tell you what, maybe I can recommend somebody." And we talked to somebody and they said, "No, we can't do it for free."

So I, being a law school graduate, told the lawyer, "Look, I'll prepare the answer if you will use your name as the attorney of record," which he did. I said, "Just to hold up the case, because it is coincidental, but I know this case in point is ultimately going to land in the Supreme Court if it hasn't already. All we want to do is ask for a postponement, and the immediate request is to pass the hearing on the preliminary injunction over for 30 days."

That was done, but when the 30 days was up, we had the same dilemma of finding a lawyer. To his eternal credit, one of the most illustrious legal minds I have known and had the privilege of knowing, now Judge Carlos Cadena, who is one of the judges on the fourth court of appeals and is celebrating his 20th anniversary on that court this week—and I wish to take this opportunity to salute him—he was then not too long out of law school, like I, and he was trying to make ends meet, but he said, "I'll do everything possible to help. The only thing is you're going to have to find some way of paying for the filing fees and some of the incidental court costs."

I said, "Don't worry about it, Carlos."

Judge Cadena is a constitutional expert. In the University of Texas Law School he was an honor student, and everybody ranked him as one of those brilliant legal minds that developed his talent along constitutional law lines.

Well, the rest is history because we delayed it. But in the meanwhile the newspapers found out about it, and the Board of the Pan-American Progressive Association called me in and said, "We understand you're involving us in this."

And I said, "No, not yet, because we haven't gotten the bill for the court costs, but it is my hope to do so soon."

They said, "No, because the newspapers mentioned that what this does, it is going to put us in there with the nigger."

And remember, that when I filibustered the race bills in the State senate in 1957, the words used on the senate floor were not Negro, they were not black, they were plain old Texas nigger, except that the newspapers were very kind to those senators and they cleaned up the language and substituted the word, "Negro." But when I faced that, I heard one of the senators say, "Will you yield?" And I said, "Yes, for a question."

And he said:

"You don't know the niggers like I do. In my district we have more niggers than we have whites, and they don't want to intermarry, and that is what you want.

I was reminded of that because of the recent PR poop put out by the South Africans saying that we are thinking of making it noncriminal to violate the miscegenation statutes, and I remember the senator saying that.

Then I said, "Senator, I will reply to you. Those who have cynical ideas as to why I am arising, we live in a cynical world. If you do anything, you are supposed to have an angle, either political or some kind of self-aggrandizing angle."

I said, "In my case let me tell you this; I know that I am a novice, I know that I am an amateur politician, but I have enough brains to know the logistics of the situation in my district."

At that time the State senatorial district consisted of the entire county, just like in my first 8 years in this House my district was the entire county. I had the second-largest district in the Nation.

Anyway, there I was answering the senator, and I said, "Senator, in my county the citizens, the Americans, the fellow San Antonians of black descent, don't constitute, and never have, even 8 percent of the total population, so there certainly couldn't be any political mileage in that."

As a matter of fact, when I got up and fought the bill, the resolutions, or the ordinances in the city council in 1954, I was considered a kamikaze, a suicide, a political suicide, and this is what I was told in the State senate.

I said, "Senator, look these San Antonians may be less than 8 percent, but I have had a great chance to get around my district and meet them, and the thing that strikes me is that per capita I would say they are the most religious of any in my county, but in all of my goings and comings the clear thing I have seen, just as clearly and perceptively and limpidly and as purely as anything could be, was their desire to be brothers, not brothers-in-law."

So I can see the psychology behind the South African Government in saying, "Well, you know, we'll loosen up and maybe we'll allow some miscegenation," because I can just see the impact it will have on a lot of those Southern minds that always feared, first, that it has to be come Communist plot if we were trying to fight those segregatory bills, or, plot if we were trying to fight those segregatory bills, or second, if they could not prove that—and there was no way they could; in fact, I have never been to Russia, I have never belonged to any organization any more questionable than the Lions Club or the Optimists Club or the Holy Name Society of the Cathedral parish into which I was born, and so they could not make a case out of that—there had to be some other reason.

So the reason was that he is getting some political mileage. But then, as I answered the senator, that would have been foolhardy.

It is the same thing today. It is no different. Those who struggled in the civil rights days in the fifties and sixties, but especially in the sixties, so often said that freedom is not free, and the truth is that freedom is never won permanently. Every generation has to fight the fight in its own way under the peculiar environment of that particular generation.

This is what the fight is today, I say to my colleagues. Our involvement south of the border fails to distinguish between the Old World as it was and the New, and it is not even the same world today as it was, say, in 1960. As I have said, as great an admirer and sup-

porter as I was of President John F. Kennedy, if he were the President today and he were to try to sell the Alliance for Progress, it would not take in today's Latin America. We will use that lump word. And the reason is that the Alliance for Progress was really unilateral. Though the spirit behind it was collective, it was permised on what was said at Punta del Este when the Alliance for Progress was unveiled, and that is that we are coequals. No matter how large we are and no matter how small, the smallest country here, we said that we are going to work with you on a parity. But since then what we have now—and I think it is due to these misperceptions, lack of knowledge, and abysmal ignorance, is that we do not see ourselves other than as we have learned our history in this part of North America.

□ 1720

When we say we are Americans, we not only antagonize the people that share the new world to the south of us, but also north of us. I recently had a letter from a Canadian who had reacted to one of these presentations and said, "As a North American—" and I resent very much America's exclusiveness in trying to segregate itself as the only Americans around, so he considers himself a North American; but south of the border this is the way we are described, those "North Americanos."

Now, the history there in our relations has been as late as 1929 Calvin Coolidge's invasion of Nicaragua and our keeping troops there for almost 10 years until we had trained the National Guard and installed the Somoza regime, the most dictatorial, the most tyrannical, the most corrupt of any land at any time. We are the ones that imposed it and kept it up. It was not Russia. It was not England. It was not France. It was not any other country but the United States of America.

We did not hear anyone talk about freedom of the press, freedom from such things as torture and political extermination. I did not hear any leader; in fact, I heard great leaders like Franklin Roosevelt take a very cynical, a very uncharacteristic pose when they described Somoza in these words, and this was FDR. It was not Ronald Reagan, but I am almost sure the President's mind set in such that he would appreciate what FDR said, referring to Nicaragua, referring to Somoza during World War II. He said, "Yes, I know he is an S.O.B., but he is our S.O.B."

This is a cynicism that we can ill afford to continue to harbor any more than we can continue to harbor the misperceptions that I see obviously reflected during the debates.

The reason is simple. The reason is that unless we discern what is happening, now, if we are upset by what is happening and has happened thus far in the smallest country in El Salvador where after $2 billion of direct aid in less than 4 years we are back to square one and if we are where we are in the case of Nicaragua where we have literally impelled them, where the President's position as enunciated just 2 weeks ago was, "Look, drop dead or I will kill you." This is the way the world is interpreting America's position.

I think it is time we divest ourselves of these misperceptions, because they will be and continue to be highly costly, not only in Treasury, but in blood. Not only that, but because it will be that we will forever make of the new world a replica of the old world with its ancient hatreds and animosities and inbred dislikes and horrible, horrible examples of wars, enternal wars, vast wars, killing wars, destructive wars, because that country to the south of us is entirely different. The world has shrunk. They know there is hope.

These teeming masses that now in the aggregate outnumber the total population of the United States, and this has been true only in the last decade and a half, are no longer going to take the oppression, the tyranny, the hunger.

Just think, in Honduras where we are occupying now and we had and I want to point out to my colleague from Texas that was here a while ago [Mr. LELAND], if he happens to be up in his room watching this on the closed circuit TV, that I was the only one who protested the Governor of Texas, Mark White, sending in the Texas National Guard. Even the Governor of California had more sense and refused to do it, even though he is a Republican; but our Governor in Texas not only sent the Texas National Guard, the are still down there on this Operation Pine Tree, which will probably terminate around May 3 and a lot is going to happen between now and then; but in selecting the component guard elements, the commander said they were going to go to the Southwest and to the Valley of Texas where the density of the word they use this day "Hispanics," which as I have said before, I dislike, because if anybody is going to call me anything, then they ought to say Mexican. I have never liked hyphenated Americanism and I have long thought when it was not politically popular to do so to say, "Look, we are either Americans or we are not, and if we are not, then I want to know what I am." That has been my position since I can remember and it offended some people. The professional ethnics, who all they know how to do and earn a living doing it is beating the ethnic drums, the racial tom-toms, and I have never believed that. I have believed in fighting for the guarantees that American constitutional freedom gives us, without respect to race, color, or creed.

I would have taken the same position on the city council or in the State senate at that time. Remember, this was before Martin Luther King was even a name that anybody heard and where we had very, very intrenched ferocious feelings.

I had to face a pistolero, that is a gunman that the East Texas White Citizens Council sent over. It was so foolish, because he walked over to the capital and somehow or another confronted me and I just told him to his face, I said, "Mister, I think you ought to know, I come from the west side of San Antonio. I know you have got that gun there under your coat, but you take one step to me or you make one menacing move and I am going to strip you of that gun and kill you with it." That was the only way I knew, coming up the rough way, to handle the situation.

The captain of the Austin police force called and wanted to know if I would want protective custody and I said no. In the first place, I commuted. I did not have money to live in Austin during the sessions, so I used to drive. I would eat breakfast at home, get in my car and drive to the State senate meeting. I would be back and eat supper with my family and sleep at home. It did a lot of things, including making me invulnerable to the lobbyists who would usually try to get you at suppertime at the old Driscoll Hotel in Austin; so nobody knew what I would do until the senate session opened and I came in my car and went in.

So these things that I see today really are kind of amateurish compared to what we faced in Texas. It was strange to see that just as in the case of the board of directors of the Pan American Progressive Association, who said, "How dare you get us involved with the nigger? You can't put us on the same plane."

Well, the reason was that the Mexican-American if his skin was dark enough, if he looked Indian, he would get discriminated on a par, especially in the rural areas with the blacks. They lived no differently. They were treated the same.

If you were blue eyed, light complexioned like many Mexican-Americans are and you became acceptable, well, it was human nature. The leading lawyers of the day, with two exceptions, Mexican-American lawyers who had been accepted, one of them to the Rotary Club, a couple to the downtown Lions Club, well, they felt they were acceptable. If they wanted to continue to be acceptable, they would have to acquire all the trappings of prejudices that the dominant group reflected.

Well, lo and behold, today the majority in San Antonio—they were not then—at that time I would say it was around 42½ percent, today the majority of the citizens, a little better than 51 or 52 percent, are Mexican-Americans in the city.

□ 1730

But that does not guarantee enlightenment and progressive government, because the equal false notion that if you are a minority member you are downtrodden, and that you are virtuous, and that your are going to be liberal is, of course, a fallacy. What it does reflect is the ignorance of the people who use that kind of an approach of the people. They just do not know people. Just like our leaders clearly revealed to me their misperceptions of what they call Latin America. This is what the President revealed, it will be 3 years in October, when he went down to four of the South American countries and made the first blooper in one country by saying he was in another.

Well, you know, everybody can understand that, but I think the most significant thing was when he came back and landed in California and his first explanation was "Gee, I didn't know they were that different."

Well, we had better start knowing it. We had better start realizing history from the perspective of development.

Our Thirteen Colonies when we read American history as if those were the Thirteen Colonies, actually we were a part of 37. The others now form part of that which we call Canada and Nova Scotia and the like. But to the south of us, by the time Plymouth Rock became a historial note in our books, in Mexico City you had had a university and a printing press for more than 150 years. So that unless we understand the intricacies of the historical developments, cultural, class systems, we will continue to make serious errors, as we are indeed in other parts of the world.

I do not think we would have made the error of having lost 50,000 of our American young, and untold billions of treasury in Southeast Asia if our leaders, both in and out of the Congress, in the Oval Office, the Presidency, had had a correct perception of the real world, of this we call communism.

We also should learn that we have to develop some kind of realization that there is a vast difference between an indigenous, that is a native civil war, and one that brings into play through external forces some ruling power, because our continuing our neglect in that respect is fatal.

At this point I would introduce for the RECORD, for instance, in view of the dialog preceding me, a statement and an analysis prepared by the Reverend Father William R. Callahan, who is here and heads what is known as the Quixote Center in Hyattsville, MD. He is one of the most knowledgeable and experienced men with respect to Nicaragua specifically that I know of in the United States. He not only has served in missionary capacities, he has done more than that; he has lived, he has lived amongst, he has ministered to, and he is intimately acquainted with the Nicaraguan people.

At this time I offer this prepared summary, plus two articles that he also gave to me appearing under the sponsorship of the Quixote Center. One of them is by Anthony Quainton the former U.S. Ambassador to Nicaragua. It was extracted from a magazine known a Sojourners, or March 1983. And another "Religion in Nicaragua," the Catholic Institute for International Relations of England, and published under the auspices of the Quixote Center.

The materials referred to follow:

CHURCH AND STATE IN NICARAGUA

Background—The Reagan Administration's suggestion that negotiations in Nicaragua take place under the mediation of the Nicaraguan bishops is a seemingly attractive option that needs reflection.

Nicaragua is a religious country, 85% of the people profess Roman Catholicism. Nicaraguans have a long history of docility to their bishops.

The bishops eventually lined up against Somoza, gave permission for priests and religious to serve in the new government, acknowledged the right of the Sandinistas to lead the new government (cf Nov. 1979 pastoral letter) then turned against the Sandinistas, withdrew the permission for the priests, and in the last three years have fought the government charging it with being Marxist. The bishops have protested censorship, denounced the draft, (on ideological grounds, not religious, as serving the Sandinistas party) and quarreled repeatedly with the government.

On the other hand, the Sandinistas have made constant efforts to dialogue with the bishops, most recently after the 1984 elections when the bishops acknowledged that the Sandinista party had won strong support.

In weighing the Reagan proposal for episcopal mediation, several points need reflection.

1. *The Roman Catholic bishops, as a whole, have taken a strong adversarial position toward the Sandinista party and toward the newly elected Nicaraguan government. They are not perceived as impartial either inside Nicaragua or internationally.*

The bishops, while condemning the Sandinistas for "ideological aggression," have consistently refused to condemn the contra violence. Archbishop Obando y Bravo and Bishop Vega, the two bishops to head the Bishops Conference in the last three years, have been especially hostile to the Nicaraguan government and the Sandinista party.

In this they differ sharply from the perception of neutrality reflected by Archbishop Rivera y Damas of El Salvador who is acting as a mediator in that country.

Thus the bishops appear to lack the appearance of neutrality which is necessary to act as a mediator.

2. *The struggle between the bishops and the Nicaraguan government is essentially political, not religious, i.e. a struggle over "turf", not over religious freedom.*

Even most opponents agree that the church is far freer to worship, speak out and oppose the government than during the time of Somoza.

The intense involvement and backing of government programs not only by many priests and religious, but also by large numbers of Catholics in local communities is a key dimension of support and legitimacy for the Nicaraguan government.

The bishops appear to fear the Nicaraguan government and its populist programs as a threat to the institutional loyalty of Catholics to their bishops.

3. *Many religious opponents of the Nicaraguan government suggest that Nicaragua will become "another Cuba".*

The fact is that after almost 6 years, Nicaragua, economically, socially, politically and religiously looks nothing like Cuba after that same interval. After 6 years Cuban churches had been closed or practice confined to church buildings. Many religious leaders had been driven out. Religious schools had been closed. The Catholic church had fought Castro, lost, and been sharply reduced in scope and influence.

Exactly the opposite is true after six years in Nicaragua. Churches of all denominations enjoy freedom of worship. The churches are vigorous, as witnessed in the public activity of those supporting the revolution and those opposing it. Religious schools are flourishing, and the intra-church debates are vigorous.

4. *The struggle in Nicaragua is not only between the government and the bishops but within the church community, i.e., between Catholics who oppose the revolution and those powerful segments of the Catholic community that support the revolution.*

In July, 1984, the Sandinistas expelled 10 foreign priests, apparently as a rebuff to Archbishops Obando y Bravo who had led a public demonstration in support of Fr. Pena whom the government had charged to be a "contra" agent. Yet the bishops have withdrawn priestly faculties and forced out of communities or out the country at least 30 priests and pastoral workers because they supported the revolution.

5. *The religious struggle in Nicaragua is a microcosm of the larger struggle throughout Latin America and the Roman Catholic Church over liberation theology and its call to align the church with the poor.*

Traditional Latin American church alliances have been with the middle/upper class landed and business people and the military, a "three-legged stool of stability" for those societies. Liberation theology, rising from reflection on the lived experience of the poor, has been given powerful impetus by the bishops at Medellin (1968) and Puebla (1979). It encourages the church to make a preferential option for the poor and to work to change the structures of society which bestow the bulk of the wealth on a fraction of the people and keep the vast majority of the people in misery.

A powerful struggle is emerging throughout the Roman Catholic church over liberation theology. Opponents charge that it is Marxist and leads to a parallel "popular" church which is not in unity with the bishops. These charges are made in Nicaragua where government programs find strong support among those sectors of the church which have been most motivated by liberation theology.

Defenders insist that liberation theology is not separatist, that it flows from the

Bible, carries strong support from the teaching of the second Vatican Council, and has the support of Latin American bishops in council at Medellin and Puebla.

The Brazilian bishops have powerfully supported liberation theology and the Christian communities in which it has been grounded. The Nicaraguan bishops have been opposed.

The Vatican has entered the struggle against liberation theology with Cardinal Ratzinger serving as the "point man" for the Vatican.

6. *The Vatican's opposition to the Nicaraguan revolution likewise denies it the neutrality needed to act as an effective mediator.*

Judging from his words, Pope John Paul II has apparently put his trust in advisers who have labeled Nicaragua "Communist" and likened it to his experience of Eastern Europe.

In Managua the Pope used religious language of "unity with your bishops" which was understood to urge opposition to the government. Combined with his refusal to address the suffering experienced by the people of Nicaragua, his preaching stirred the crowd in its chant of "we want peace."

There is no credible evidence that the Sandinistas organized the crowd response, knowing full well that any disturbance would be detrimental to them in international opinion.

The Vatican pressure on the priests to leave the government is taken as a further sign of Vatican hostility to the revolution and the legitimacy which their presence confers on the revolution.

CONCLUSIONS

A. The adversarial posture of Nicaragua's Roman Catholic bishops toward the Sandinistas and their refusal to condemn contra violence denies the bishops the appearance of impartiality necessary to act as mediators in the conflict.

B. The Vatican's posture of hostility to the Nicaraguan government similarly precludes Vatican involvement in mediation.

C. Any Roman Catholic church mediation would have to be sought from bishops outside the country who are not already compromised on the Nicaraguan revolution.

D. U.S. policymakers should avoid being turned against the Nicaraguan revolution by people who manipulate religious symbols and events for political goals.

E. U.S. policymakers should be aware of the worldwide struggle over liberation theology and the political alliances of the various parties in the struggle.—Prepared by Rev. Wm. R. Callahan, S.J.—Quixote Center.

POLITICAL STRUGGLES IN RELIGIOUS LANGUAGE

"Religion in Nicaragua is everybody's concern," according to Rev. Cesar Jerez, SJ, former Jesuit provincial of Central America. "Everything pervades religion and religion pervades everything."

Because this is true, political debate in Nicaragua is often carried on in religious language. Struggles over the legitimacy and direction of the Sandinista revolution surface as struggles over liberation theology, the authority of bishops or the political role of the clergy.

PRIESTS IN GOVERNMENT POSITIONS

The saga of four Nicaraguan priests who hold prominent government posts is well known. They were originally given permission to serve in public office by the Nicaraguan bishops, but this was later modified to permit continued services only if they did not perform priestly functions. It was finally withdrawn completely in an attempt to make them leave the government. Since the four have continued to serve, the Vatican has finally suspended them and has pressured the Jesuits (successfully) to expel Fernando Cardenal, the Minister of Education, from the Jesuit order. One of the four, Edgar Parrales, has asked for a formal dispensation from the priesthood but it has not yet been granted.

The hierarchy usually frames its concerns about this matter in the context of canon law which, in its newly revised form, forbids priests to occupy government posts. The priests speak of their gospel-based "preferential option for the poor" which they find well expressed in the Sandinista revolution.

But in a country as Catholic as Nicaragua, the presence of priests in high government posts serves another function: it gives legitimacy to the revolution among believing Catholics. Since it is well known that the Nicaraguan bishops and the * * * making the church the third leg of a "three-legged stool" that propped up the social system of a continent. With the 1968 Bishops' Conference in Medellin, Colombia, the Latin American hierarchy announced a new solidarity, a "preferential option for the poor." That option is basic to liberation theology and it represents the direction of the Latin American Church for the last 20 years.

In Nicaragua, that "option for the poor" is likewise the basis for the Sandinista revolution. Thus, for the Nicaraguan bishops to inveigh against liberation theology is to condemn one of the very bases of the revolution itself. It calls into question the alliance of the church with the struggles of the poor.

Another element of the debate over liberation theology involves Marxism.

MARXISM

The Nicaraguan bishops have long labeled the Sandinistas "Marxists," an accusation designed to discredit the revolution in the eyes of the Nicaraguan people. Liberation theologians, on the other hand, maintain that Marxist philosophy provides useful tools for social and economic analysis, and that Marx's ideas can be used in applying the gospel to 20th century realities just as the secular philosophy of Aristotle * * *.

CHRISTIAN BASE COMMUNITIES

Christian "base communities" grew in Nicaragua in the years before the Sandinista triumph. They are formed by small groups of believers who meet regularly to reflect on the Scriptures in the light of daily experience. Such reflection and prayer convinced many formerly passive people that the gospel called them to act for justice. It moved them away from a belief that "suffering now means happiness hereafter" and empowered them to work to change a social situation they once regarded as hopeless. For many Nicaraguan Christians, these communities were the beginning of their option for the "revolutionary process."

The Nicaraguan bishops and Pope John Paul II have condemned such groups, labeling them a "popular" or "parallel" church. Clergy supportive of the revolution who had been working with such communities have often been replaced with priests who are least cool toward, if not downright opposed to, the revolution. Both the bishops and the Pope justify such moves by urging "public unity with the pastors of the church" or "docility to church teaching." They regard these groups as out of the control of the hierarchy.

Like other religious struggles in Nicaragua, this one has political overtones. The base communities are a strong base of support among the people for the revolution. By making them appear as "outside the fold," the hierarchy seeks to discredit the revolution, cause believing Christians to rethink their commitment to the revolution, and undermine an important base of legitimacy and populuar support for the revolution.

OTHER STRUGGLES

Other "religious" struggles in Nicaragua likewise have strong political implications. They have included debates over Catholic education, the expulsion of foreign priests and the military draft. Moreover, there is, underneath it all, competition between church and government for a limited pool of talented leadership, especially among young people.

Young people themselves are deeply affected by the religious struggles. They have long been staunch supporters of the revolution. Cesar Jerez notes that the "hierarchy's distrust of the revolution is leading to a greater falling off of church participation among young people than among adults. . . ."

CONCLUSION

The most important implication of the religious struggle is the set of political alliances it has created. By opposing the revolution in terms similar to those voiced by Washington, Archbishop Obando y Bravo of Managua has linked the Nicaraguan hierachy with U.S. interventionist policies. By refusing to condemn the *contras'* attacks on the civilian population while denouncing the Sandinista government, he has created the suspicion that he really favors the *contra* cause. By accusing the Nicaraguan government of "Marxism," he provides a new ammunition to U.S. policymakers and fuels the fears of Marxism that John Paul II brings from his Polish experience.

Thus, the "religious" struggles of Nicaragua have forged a political alliance between church hierachy and the Reagan administration which seeks to discredit the alliance of many priests, religious and laity with the Sandinista revolution. It is an ideological struggle for the hearts and minds of Nicaraguans waged in religious language for political objectives.—Maureen Fiedler, William R. Callahan, and Dolores Pomerleau—Quixote Center.

RELIGION IN NICARAGUA

As a popular movement in an overwhelmingly Roman Catholic country, the Sandinista revolution was supported by hundreds of thousands of Catholics. It also had the specifically Christian support of many priests, religious and lay Catholics whose work in the shanty-towns and rural areas had given them first-hand experience of the injustice and suffering inflicted by the Somoza regime. One priest, Fr. Gaspar Garcia Laviana, died fighting with the Sandinistas, and a number of priests accepted ministerial and other senior positions in the new government. The bishops set the seal on this Catholic support when, in a pastoral letter in November 1979, four months after the Sandinista victory, they said:

'We are confident that our revolutionary process will be something original, creative, truly Nicaraguan and in no sense imitative. For what we, together with most Nicaraguans, seek is a process that will result in a society completely and truly Nicaraguan,

one that is not capitalist nor dependent nor totalitarian.'

The panorama five years later is very different. The majority of the bishops, at the prompting of Archbishop Obando y Bravo of Managua have withdrawn their support from the revolution; they have campaigned to remove the priest-ministers from their posts and have publicly criticized the Sandinista leadership for its handling of the crisis among the Miskito communities on the Atlantic Coast. They have repeated accusations that the education programs of the government are really political indoctrination and have expressed fears about atheism and totalitarian rule. This attitude has been criticized by Catholics who support the government, and the bishops have reacted by trying to reassert their traditional authority.

On June 29, 1982 the Pope wrote them a lengthy letter, criticizing the 'popular church'—a term never widely used in Nicaragua—but at the same time urging the bishops to be more understanding. The Pope used his visit to Nicaragua in March 1983 to repeat the message in his letter.

The measures taken by the Bishops' Conference to distance the Catholic Church from the Sandinistas have caused confusion and resentment among ordinary Catholics. The poor, who are the beneficiaries of the revolution, cannot understand this hostility. For most of the bishops, and for many middle-class Nicaraguans, however, the people, enrolled in mass organizations, unions, neighborhood communities and the militia, are a new and frightening phenomenon. No longer are they the hapless victims of repression, exploitation and poverty, seeking the successor of the church, but an organized social class wielding considerable power.

Archbishop Obando y Bravo has become a focus for members of the conservative opposition who threw in their lot with the Sandinistas when they failed to dislodge Somoza from power through negotiation, but who, within months of the Sandinista victory, became bitter critics of the new government which they were unable to control.

In the tense situation created by the *'contras'* campaign, the government has reacted sharply to many of the bishops' statements, and any particular incident is likely to be exaggerated out of all proportion by partisans of either side.

Three incidents in particular have recently provoked conflict. In September 1983 the bishops denounced the newly promulgated conscription law as an attempt to mold conscripts to Sandinista ideology, and in their Easter pastoral letter of 1984 they called for unconditional negotiations with the *'contras'*—a document publicly criticized in statements by the Jesuit and Dominican orders in Nicaragua, the Jesuits noting that the bishops had never condemned the *'contras'* attacks. In July 1984, the government expelled ten foreign priests, apparently as a direct rebuff to Archbishop Obando y Bravo of Managua, who had organized a public march in support of a priest accused by the authorities of being a *'contra'* agent. In August, after the nomination of Father Fernando Cardenal, SJ as Minister of Education, the Secretariat of State of the Vatican renewed its efforts to make the priest ministers resign their posts.

The evangelical churches, which claim 15 per cent of the population, have followed a more consistent path. From a tentative involvement with welfare work in the early 70's, they have passed through denunciation of human rights violations to overt sympathy with the Sandinistas. This change has taken place in spite of a theological tradition originally hostile to social involvement and a marked suspicion of left politics. Change, of course, has not been uniform; nevertheless the majority of evangelical churches supported the fight against Somoza and have since been favorable to the new government and its programs.—Catholic Institute for International Relations, England. *Comment*, 1984. Quixote Center.

With that, I think I have said enough, other than to say that it seems to me as if we are inexorably headed for an enlarged conflict in which ultimately your children, my colleagues, those of draft age, are going to be fighting in the jungles to the south of us, quite unnecessarily, and I think mistakenly so.

I have offered suggestions. I have never been cast in the role of a panjandrum in any of the bodies I belong to. When I filibustered the race bills in the State senate, I did so as a freshman, which was unheard of in the annals of Texas Senate history. But the fact is that our system, if we uphold it, is the greatest, and the American people in turn are way above in stature than what our own leaders really accredit them with.

The people, my colleagues, are way ahead of us.

We have got the responsibility of trying to lead intelligently, knowledgeably, and that is an awesome responsibility in this day and time. But if we continue to be intimidated by a President who then reduces the issue to are you pro-Communist, are you giving aid and comfort to the Communists or are you loyal to me, and that is what the issue has been reduced to in the last 4 years. Now, somehow or other I still appeal to the overwhelming preponderant colleagues that we examine the issue on the merits and demerits based in turn on a realistic assessment of the facts involved.

We cannot continue to blunder. Our margin of error as to time is reduced very much in terms of the world in the 1980's.

Also, it dovetails with our equal misperceptions with respect to a world that is compelling you up to now, and Presidents to foist on the American people a horrendous war machine. We call it a defense budget. But it really is a war budget at $315 billion which will be $1 trillion in less than 2 years. I think that it is time we try to catch up with ourselves.

I still have, despite some demoralization, the optimism that we can do it. And tied in with that was what I started out originally, and that was to show how here in the world of Joel Barlow, that great American patriot, poet, he was a chaplain in George Washington's Revolutionary Army, he was a real revolutionary in the sense that that word really without perversion is meant to be, but we live in a world in which words are perverted. We live in a true Orwellian sense.

I would like to point out what I started out to say yesterday and did not quite round out, which was the coming summit, economic meeting this next month in Bonn, West Germany, which I pointed out that no Member of the Congress has even used the words or much less referred to this emerging force that was first revealed at the summit, economic conference there also in Bonn in 1979, Jimmy Carter then being the President. And the development of the ECU, the European Currency Unit, and the EMF, the European Monetary Fund.

I want to point out to my colleagues, unlike 1979, these countries now, either the 6 or the 10, in the aggregate, have more gold than the United States. And we like to think that we have demonetized gold, but it is still there, and we foolhardedly sold our gold reserves in 1975-76 with Secretary of the Treasury Bill Simon over a lone objection on my part. So I am used to having all of these. I have a big trunk, or chest, of lost causes, but I also have quite a number that have prevailed in the long run, because the system, and I think it still is, is beautiful.

□ 1740

If you are right, if you have any degree of competency in developing the position that is right, ultimately it is going to prevail, assuming you can survive long enough politically.

Now, in anticipation of the summit meeting I would like to place in the RECORD at this point an article on page A-27 of the Dallas Times Herald for Sunday, March 31, which is entitled "Volcker: World Economy Needs West German Aid."

Now, that sounds strange, "West German aid." That sounds strange. West Germany, the United States pleading to West Germany—

Federal Reserve Chairman Paul Volcker on Saturday called for West Germany to shoulder more support of the world economy which he said has recently relied too heavily on exported United States money that should be staying at home.

Well, what have I been saying for 16 years? And the other article, because it also has a direct bearing on the first subject matter, a front page article in the Dallas Times Herald for Tuesday, March 26, entitled "Reagan Decries Mexico Corruption." It is bylined "Paul West of the Washington Bureau." In it Mr. Reagan is taken off much like Gen. Paul Gorman before him, who still is I believe in command of the Southern Command in Panama and who, quite frankly, told, and I wish my colleagues here who are advocating the opposite would listen, General Gorman, as much as he is against the Sandinista regime, said that unless

the United States did more directly, that is intervention, with our own soldiers, that the Contras couldn't win at all, no matter how much help we gave them. We have continued to give to them.

I have charged that the President has violated the laws. I know he has violated three of the basic treaties which is turn have completely eroded our capacity for moral collective leadership in the New World.

I think that it is not our might, it is not our guns, our tanks, our cannons; I think that what is really looked for in America more than anything else is more leadership.

As I have said repeatedly, and I will say it today, if I had my way, if it were in my power to do so, I would call back every single American soldier that we have placed south of the border, right now. And in lieu thereof, instead of a tank like the M-60 tanks that the Governor of Texas sent down there with the National Guard, but when they selected them they were going to select them from the Hispanic component in the dense Hispanic areas of south Texas. Why? Because they thought it would be good to have Spanish-speaking elements down there, it would be good for good neighborliness. Well, the truth is that it shows an ignorance of what those countries are all about down there, also an ignorance of what modern day Texans are, whether they are Hispanic or not.

So the Governor, who went to visit the day after Easter the troops and took a C-130 transport full of frejolas, beans, tortillas, and barbecues. I could have told him, I think, that I would say at least 80 percent of those troops down there, instead of that fare, which a lot of them consider to be a Gringo plot to poison them, they would have preferred to have had Wheaties, the food of champions, and a good cold glass of milk or a milkshake.

But, you know, you cannot break through this aura of stereotype thinking. Anyway, the Governor went down there and they sent M-60 tanks plus Scorpion British tanks. All I can say is that if we are not the laughingstock then I do not know what it is we are, in every country in the New World outside of the territorial bounds of the United States. But in the meanwhile the attack has been on the Mexican President, de la Madrid.

We have, through the CIA, been trying to destabilize, we have been trying to put pressure on him. One of the most popular books in Mexico recently was a novel based on a Presidential sellout in which the black coat and the black hat was the CIA of the United States. It was the most popular thing down there. We ignore all of that because we live in a world in which every society is self-contained, not only ours but theirs.

So even we, living in Texas, will not even have a report of some of the most transcendental occurrences 300 miles south, below the border of Monterey. So that we are going to have to pay a price for that ignorance. I hope in time we can remedy that with some real enlightened leadership.

I have been critical, as I have said, not only critical but for every criticism I have voiced I have offered a suggested course of action.

Some of these I have advocated for more than 20 years. But the one that I have persistently advocated, I started on April 1, 1980, and certainly the President was not Ronald Reagan but was Jimmy Carter; but the forces there in place, just like the Army, the generals come and go, the CO's come and go, but the sergeant is the one who is there all along. They are the ones who are going to determine policy in many instances. Where you have these policy determinants who in turn have mindsets like the President, in which the stereotyped, outworn concepts are no longer valid, then we are going to have egregious error compounded upon egregious error.

I think the summit of error is when we try to destabilize a President like de la Madrid who is very, very personally pro-America. He was educated here, he likes the United States. But he is also a faithful, loyal son of Mexico. Mexico has always advanced two basic doctrines: nonintervention, no intervencion, and autodeterminacion, that is self-determination. And they have formed a group identical almost to the one that was formed in 1957 for the same reason, to arbitrate a border dispute which had flared into violence between Honduras and Nicaragua.

Those same countries banded together but the big difference was that President Eisenhower's Secretary of State had more brains. What they did, they did not have any compunction about getting together with them, they did not think it was below the dignity of the United States to get in and kind of even take the leadership, and that conflict was resolved after the group, with the United States as a copartner, went to the World Court. In fact it had been resolved until the recent eruptions which we have fostered through the CIA's destabilization tactics.

Now, the American people simply ought to be informed if nothing else. I think that if the American people have a full grasp of the facts, for example a President who says that he preaches frugality, wants us to cut all housing-assisted programs, even the FHA-Insured Mortgage Program; he wants to eliminate the Farmers Home Administration which provides rural housing for the rural poor and those of moderate income. You know what a dilemma our real farmers are in right now. Well, the President wants to zero it out in the name of economy. But his own personal, Presidential executive discretionary budget, for which he does not have to account, has grown by 750 percent, 7.50 times in less than 2 years. Why? Well, I think if he were a man of candor he would not hesitate to come to the Congress and therefore to the American people and say, therefore, "Here is where I have been using it."

I happen to know where some of that money has been diverted. It coincides, this incremental increase or exponential increase, coincides with the Congress cutting off the direct appropriated funding for the Contras.

□ 1750

So that I think that the American people, once given the confidence of information and knowledge, will make the right judgments. I have never had that doubt, but I have always premised it on the American people being knowledgeable and being given the facts. And then I do not worry after that.

Those of us who stand up and proclaim where we are naturally assume responsibility for the utterances, always have. I do not think I would be here after 33 years in public elective office, from the lowest legislative representative capacity to the highest, if I had not been accountable.

I say that if we are wrong, but if we are honest, we admit to the wrong. I am of such a mind that unless that is the case, I will not yield, and I will persist even as the lonely number of one.

Because in our system, as I say and repeat: It is a wonderous—if you are right, and if you have any degree of competence in pushing that cause, you will be heard.

GRENADA DOCUMENTS: AN OVERVIEW AND SELECTION, PART III

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, this is the third in a series of talks about the lessons of the Grenada documents and the documents which we captured from a Communist government and a Communist party when we liberated the Island of Grenada.

It is, I think, very useful to the average American to be able to look at what a Communist government and a Communist party says to itself in its secret documents.

This particular book, called "Grenada Documents: An Overview and Selection," prepared and released by the

Department of State, September 1984, is the most complete set of materials on a Communist government we have ever had. The first time we have ever captured material from a Communist government.

Let me say, Mr. Speaker, that it is fascinating that in the second of these special orders, last evening, that one of our colleagues admitted, a colleague who normally would vote against aid to the Freedom Fighters, admitted, "I have absolutely no question that they had become allies of the Soviet Union," referring to Nicaragua.

Now if the Nicaraguan Communists are in fact allies of the Soviet Union, what does that mean? What lessons can we learn about the process of being an ally of the Soviet Union? Why should Americans worry about a tiny country in Central America a long way off?

Many Americans are not even sure exactly where Nicaragua is, or which Central American countries are above it or below it. People say to me, "Why should I be concerned about Nicaragua?"

My first answer is, that while we have a moral interest in freedom for everyone, while we have a concern in free governments for everyone, that there is a very practical, down-to-earth reason for Americans to be concerned about the Nicaraguan Communists.

The reason is, the Nicaragua offers the Soviet Union its first real base or colony on the American continent. For the first time on the American continent, there is a government which is directly allied with the Soviet Union.

Now we know that the Soviet Union is committed ultimately as a Communist state, to dominate the United States. We know that Soviet leaders spend their lifetimes studying how to undermine the United States. We know from Mr. Chevchenko's recent book, for example—the highest-ranking Soviet defector who ever has left the Soviet system—that he sat in on meetings where they systematically plotted how to destroy the United States where in fact people who today are still negotiating with the United States were negotiating on the one hand, while practicing and studying and thinking how to defeat us and destroy us on the other hand.

In that setting, if the Soviet Union is in fact a grave danger to America—and I think it is—what does it then mean if Nicaragua, as one of our friends admitted yesterday, is an ally of the Soviet Union?

Well, the Grenada documents are particularly helpful in helping us to look from the inside; at what it means to be an ally of the Soviet Union. Because in the Grenada documents, we begin to get some sense of, how do they work together? what are they trying to accomplish? who are they with?

I think, as you look at the Grenada documents, you will learn first of all that the Soviet Union was systematically involved in arming Grenada.

Let me quote first of all from the introduction by Michael Ledeen and Herbert Romberstein. They said, speaking of Grenada now:

From the beginning, Bishop and the other NJM leaders sought to bring Grenada into the Soviet orbit, and there are thousands of documents showing the intimate relationship that developed between the USSR and Grenada. Sometimes relations were embodied in formal treaties between Grenada and Soviet bloc countries, and such Soviet proxies as Cuba, Vietnam, and North Korea. On other occasions there were secret agreements, such as those for providing counterintelligence or surveillance equipment, training for agents, and so forth. We have included several of the treaties and party-to-party agreements that gave Grenada a vast quantity of armaments as well as military and political training. Thousands of weapons, far more than could have been required for the security requirements of the tiny island, were shipped by the Soviet Union and Communist-bloc countries. Overall, the documents (samples of which can be found in this book) showed that the Soviet, Cuban, North Korean, and Czechoslovakian agreements included the following items, which were to have been delivered by 1986:

Approximately 10,000 assault and other rifles;

More than 4,500 submachine guns and machine guns;

More than 11.5 million rounds of 7.62 mm ammunitions;

294 portable rocket launchers with more than 16,000 rockets;

84 82 mm mortars with more than 4,800 mortar shells;

12 75 mm cannon with 600 cannon shells;

15,000 hand grenades, 7,000 land mines, 60 armored personnel carriers and patrol vehicles;

More than 150 radio transmitters, 160 field telephone sets, approximately 23,000 uniforms, and tents for about 7,700 persons.

By U.S. Department of Defense estimates, equipment found on the island (not all of it had arrived) would have been sufficient to equip a fighting force of roughly 10,000 men. Furthermore, there evidently were some plans for special forces, since the Soviets promised to provide an airplane capable of transporting 39 paratroopers, as well as other special equipment.

All of this made Grenada a real military threat to its neighbors, most of whom had only local constabularies rather than standing armies. And there was little question that the airport was going to be used for military purposes, since General Hudson Austin's deputy, Liam James, reported in his notebook on March 22, 1980, "The Revo has been able to crush Counter-Revolution internationally, airport will be used for Cuban and Soviet military" (Document 23). This apparently reflected a decision of the NJM leadership.

The Soviets appreciated the geopolitical significance of acquiring another proxy in the Western Hemisphere, as can be seen from the picturesque account of a meeting between Major Einstein Louison, Chief of Staff of the Grenadan Army (who had gone to Moscow for military training), and his Soviet counterpart, Marshal N.V. Ogarkov. According to the Grenadan notes on the meeting (Document 24), Ogarkov told Louison, "over two decades ago, there was only Cuba in Latin America, today there are Nicaragua, Grenada and a serious battle is going on in El Salvador." The Grenadans saw themselves as Soviet proxies. Their Ambassador to Moscow, W. Richard Jacobs, reminded his comrades in Grenada that their importance to the Soviets would eventually depend on their success in exporting revolution:

□ 1800

To the extent that we can take credit for bringing any other country into the progressive fold, our prestige and influence would be greatly enhansed [sic]" (Document 26). Jocobs felt that the first such project should be Suriname.

There was no lack of Soviet support for Grenadan intelligence and counterintelligence operations. A draft letter dated February 17, 1982, from General Hudson Austin to Yuri Andropov, then the chief of the KGB, requested training courses for three Grenadans in counterintelligence and one in intelligence work. Austin thanked Andropov for the "tremendous assistance which our armed forces have received from your party and government in the past.

Now, I cite this and I quote this to say to everyone that when we talk about being an ally of the Soviet Union we are talking first of all about a military alliance. We are talking about a commitment on the part of Grenada to work with the Soviet Union and in return we are talking about a commitment from the Soviet Union to prepare a country to be helpful. There is a fascinating parallel between the airfield that was being built in Grenada, which as these documents prove was in fact going to be used by the Cuban and Soviet military, and the airfield being built in Nicaragua today.

If I were to come here and say the Soviets have an aircraft carrier in the Caribbean, everyone would be very worried. Yet if I come here and say the Soviets are building an airfield in Nicaragua, which is a permanent aircraft carrier, somehow no one seems worried. In fact, the 12,000-foot runway being built in Nicaragua is a far more powerful base for aircraft than any aircraft carrier would be.

Combined with the Cuban bases, the Soviets have the equivalent of seven or eight or nine aircraft carriers in the Caribbean.

Now, if we were to have a news report tonight that there were eight or nine Soviet aircraft carriers in the Caribbean, every American would be worried. "Why are they there? What are they doing?" Yet as long as they build airfields in countries that are their allies, no one worries. But if there were a great crisis, if in fact for some reason in the Middle East or in Europe or in Korea there was to be a crisis, if the following week hundreds of Soviet airplanes were to land in Nicaragua and in Cuba, does anyone seriously believe that any of the people currently voting against aid to

the freedom fighters would suggest, "Oh, why don't we go in and take them out"?

Oh, no. Having first reassured us that Nicaragua was not really with the Soviets, then having reassured us that Nicaragua was not really building an airfield, then having reassured us that the Nicaraguan airfield was not really military, then having assured us that while the Nicaraguan airfield is military, it really was not dangerous, then finally having assured us that while the Nicaraguan airfield was dangerous, there were no Soviet airplanes, I do not think any reasonable, responsible person can believe that the leftwing Democrats who are voting against helping the freedom fighters would then rush to this floor and say, "Now that there are Backfire bombers there, now that there are Soviet aircraft there, now let us do something decisive."

And indeed I challenge any of our friends who intend to vote against aid for the freedom fighters to, at any time in the next few days, pledge at what point they would intervene, at what point they would be willing to do something drastic, because every day that we do not help the freedom fighters, we increase the danger of Soviet penetration.

Mr. WEBER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman for yielding.

Mr. Speaker, the gentleman I think is making the critical strategic point about the importance of Nicaragua in describing it literally as an aircraft carrier.

Now, last night, the gentleman, along with our colleague from Pennsylvania [Mr. WALKER], was on the floor with several of our colleagues from the other side of the aisle. And did not one of our Democratic friends last night concede that Nicaragua is indeed a client state of the Soviet Union?

Mr. GINGRICH. Well, our Democratic friend used a much stronger word. They conceded that the Nicaraguans were in fact the allies of the Soviet Union; in fact the exact quote, which I will be glad to read, is: "I have absolutely no question that they have become allies of the Soviet Union."

Mr. WEBER. If the gentleman will yield, let me just clarify again. The quote you just read, that Nicaragua is indeed an ally of the Soviet Union, came not from a Republican but from a liberal Democrat yesterday?

Mr. GINGRICH. That is exactly correct.

Mr. WEBER. Then it seems to me that the aircraft carrier that the gentleman is describing is a Soviet aircraft carrier; is that correct?

Mr. GINGRICH. That is correct.

Mr. WEBER. So the vote on aid to the Contras is really a vote on whether or not you want to give the Soviets an aircraft carrier in our backyard?

Mr. GINGRICH. I think it is fair to say that the vote on aid to the freedom fighters is a vote on whether or not you are willing to tolerate the establishment of a Soviet airfield, the equivalent of a Soviet aircraft carrier, a permanent aircraft carrier, on the North American Continent. And I think that to vote no is in effect to vote for permission to send a signal to the Soviet Union that it is perfectly reasonable for a 12,000-foot runway to be built by the Soviets, to be placed in Nicaragua by the Nicaraguan allies of the Soviet Union, so that at some future crisis, the Soviets should feel equally comfortable flying bombers and fighter planes into that airfield, because, after all, I would say to any American, "Do you honestly believe that the Soviet Union is building a 12,000-foot runway in a military setting, with military preparations, with revetments to hide the aircraft?"—and nobody disputes that this is a military runway, unlike the Grenadian situation, where our leftwing friends kept telling us it was not a military runway until, of course, we captured the documents where they said it was a military runway.

Even our leftwing friends concede, "Oh, yes, this really is a military airfield."

Now, do you honestly believe, does anyone honestly believe the Soviet Union is building a 12,000-foot runway not to use it, not to put aircraft on it, not to threaten the United States?

And of course not; there is no rational argument that says, "Oh, yeh, they are going to pour all of that concrete, build all of those revetments, have all of those bunkers, but, by the way, the Soviets are really reasonable people, and clearly they would not do anything to threaten America."

Mr. WALKER. Will the gentleman yield?

Mr. GINGRICH. I will be glad to yield.

Mr. WALKER. The gentleman has sketched a scenario of the way the left treats many of these issues by pointing out that they will say right up until the time it happens that, oh, no, that is not going to take place—and I think he sketched it pretty well a few minutes ago.

Is the gentleman not sketching precisely what happened in Cuba, that if you take what happened in Cuba, all the way along, our liberal friends assured us that, oh, no, the Soviets had no real intentions of making Cuba into a client state of the Soviet Union, that this was simply something that was the imagination of conservatives in this country, but that now have to admit what we have created in Cuba is a nation which is a direct threat to the United States and it is in fact being used as a Soviet base of operations throughout the Caribbean and being used as a Soviet base of operations against this country.

And in fact the gentleman has sketched exactly the process that was used by the left to continue to move away from any kind of action that the United States might have taken with regard to Cuba, and now we get on the House floor the rather interesting argument from some people on the left that if you are really so worried about Communist subversion in the Caribbean, why don't you do something about Cuba?

Well, the fact is the power has been coalesced in Cuba in such a way that to do something about Cuba at this juncture becomes extremely expensive for this country in terms of lives, in terms of everything else.

The left allowed Cuba to take place and now turns and uses it as a justification for allowing another Cuba to happen in Nicaragua. It is abolutely crazy what is happening out there.

I thank the gentlemen for yielding.

Mr. GINGRICH. Let me just say, on the point about Cuba, that there is something maddening about our friends on the left who refuse to help freedom fighters who are willing to go out on their own, who refuse to stop communism and a Soviet ally in Nicaragua when it is still easy, who then turn and say, well, if you are all that frightened, why don't you do something about Cuba?

And I say again and again to my friends on the left, if you are willing to support any serious effort to bring pressure to bear on Castro, on the 9,000 Russian troops who are now in Cuba—9,000 Russian troops 90 miles off our shore—if you want to do anything, I would be delighted to cosponsor a bill. But the fact is, the left uses that as a mask behind which they are willing to vote no to helping freedom fighters today in a country where we have a very reasonable chance, without a single American being at risk, to simply eliminate the Soviet Communist danger to the survival of the United States.

I think there is something infuriating about this deliberate and, I think, clearly it is hard—one does not want to challenge anyone's sincerity, but it is hard to understand the kind of mind which would vote no to helping freedom fighters in Nicaragua and turn and offer the help to do something serious about Cuba, a much more difficult position.

Mr. WALKER. Will the gentleman yield?

Mr. GINGRICH. I yield one more time to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding, and I just want to

make one point. That is, that so often what we hear the left doing is being tough where they know there is no real issue. They are willing to be tough, for instance, to build a Stealth bomber that they know we cannot get for 10 years, they are willing to be tough about, let's stand up against Cuba, when they know that is not an action which this Government proposes to take.

□ 1810

They are willing to be tough everywhere except where you have got to really act, and at the point you have got to really act, then all of a sudden they are no longer tough; then defense does not matter; then they do not want to really take the steps necessary to protect the defense of this country.

That is the infuriating thing which happens so often in this body, is that we hear them talk a tough line, but the fact is, when they come to the question of whether or not they are going to act, then there is no point at which they are really willing to act.

Mr. GINGRICH. Let me carry it one step further. There is something strange about the number of left-wing Democrats who are now, and one or two, frankly, ostrich Republicans who fit this, who are not eager and excited about helping freedom fighters in Cambodia; who are suddenly even excited about helping freedom fighters in Afghanistan. Both of those are distant countries in difficult situations where it is hard to get help. But when we come very close to home in Nicaragua, close to us, easy to help, where we could be effective, suddenly these people who are very eager to help distant freedom fighters are not willing to help local freedom fighters.

I would say that charity and help begins at home. That here in the Western Hemisphere we are going to help freedom fighters. Let us start with the freedom fighters who are closest where the threat is greatest.

I yield to my good friend from Indiana.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

I agree a great deal with what my colleague from Pennsylvania just said about what has happened in Cuba. You know, I just got back from Central America, and went to Nicaragua, and I talked to business leaders and religious leaders and political leaders, and without exception, except for the Sandinista Communist government leaders, everybody said that if the United States does not support the Contras, the repression will increase and the revolution will spread throughout Central America as Thomas Borja, Umberto, and Daniel Ortega have said it would.

One of the things that the gentleman from Pennsylvania alluded to a moment ago was the Cuban situation, and the gentleman in the well talked about it. I would like to give you a scenario that I see developing in the months and years ahead if we do not aid the Contras.

President Kennedy, in 1962, adopted the Kennedy doctrine. He forced the Soviet Union to get their missiles and all offensive weapons and all troops out of Cuba. Today, we know they are all back there. They have Mig-23 fighter-bombers; they have troops; you alluded to 9,000 Cuban troops.

Mr. GINGRICH. 9,000 Soviet troops.

Mr. BURTON of Indiana. Soviet troops; correct. Because of that, our liberal colleagues tell us: "Well, we cannot be involved in a military conflict with Cuba because we invite a superpowers confrontation which could result in a nuclear holocaust."

I submit to you that if we do not support the Contras in Nicaragua, before long, we are going to see thousands of Soviet troops down there Mig-23 fighter-bombers there and all the military equipment that goes along with it. At that point, when the revolution spreads into these other countries, and we talk about taking off the head of Nicaragua to preserve our hemisphere, those people will be saying the same thing: "We cannot do anything about Nicaragua because we risk a confrontation between the superpowers, which could lead to a thermonuclear war."

We do not have to face that prospect if we give the people who are fighting for their freedom down there, the Contras, the wherewithal to do is right now.

Mr. GINGRICH. I yield to the gentleman from Minnesota.

Mr. WEBER. I thank the gentleman for yielding.

I think the gentleman from Indiana is precisely correct. I was in Nicaragua about 10 days before the gentleman from Indiana and found out precisely what he said is true. In fact, the beginning of the fortification of Nicaragua as an armed Soviet client-state is already underway.

Mr. BURTON of Indiana. Yes.

Mr. WEBER. I learned when I was there, and I would invite the comments of my colleague from Indiana if I have got my figures wrong, there are already I believe 8,000 or 9,000 Cuban troops already in Nicaragua. In addition to that, there are troops from East Germany, Bulgaria, Czechoslovakia. There are PLO advisers flying the jet aircraft or flying the airplanes in Nicaragua. There are advisers from Libya, as well as representatives, I am told, of virtually every terrorist organization in the world including the Bader-Meinhoff gang from West Germany.

Mr. GINGRICH. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I did not mean to imply that it is not already a surrogate and the puppet of the Soviet Union and Cuba. What I meant to say was that right now there are not Soviet troops domiciled there and they do not have all the Soviet equipment like the Mig-23's, because the President has told them they better not bring them down there. But if we wait, like we waited with Cuba, that will be a Soviet stronghold, not just a Communist stronghold but a Soviet stronghold, and the argument the liberals will make is, we cannot do anything about it because we risk a nuclear confrontation. That need not occur.

Mr. GINGRICH. Let me say also if I might that if we are watching a Soviet-Cuban military buildup in Nicaragua under Ronald Reagan, can you imagine what would happen with a Jimmy Carter or a Walter Mondale as President? If they are willing to continue to take the risk of building up their military power under Reagan, who they know is tough and they know has got a pretty firm anti-Communist position, can you imagine the next left-wing Democratic President?

In fact, it was precisely under President Carter that the Russians reintroduced a brigade into Cuba and built up their offensive capabilities in Cuba.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. But they are depending upon the Congress. The reason why they will do it even in the face of someone who is taking a tough stance like Ronald Reagan is they know ultimately this Congress, and particularly this House, has the power to cut off Ronald Reagan from supplying the Contras and doing the kind of things that he knows are necessary to stop what they are doing. So in fact what the gentleman is defining is exactly why this vote is so important. Because they are depending upon this House to do what they know that a Walter Mondale or a Jimmy Carter would do if he was in the Presidency, and that is protect them in what they want to do.

The vote next week becomes very much a case of whether or not you are going to vote pro-Sandinista or whether you are going to vote anti-Sandinista Communist. That is the real question. There is no question here about the Contras. You are not really talking about the freedom fighters down there; whether or not you are voting for or against them. You are really talking about whether or not you are voting for or against the Communist Government of Nicaragua. That is what the vote will be all about next week.

Mr. GINGRICH. Let me say to my friend, too, that I think every liberal Democrat who has any hope of thinking about this issue, because there is no point in talking about the radical, left-wing Democrats who, frankly I think, are not going to ever think

about it; they are committed to an ostrichlike policy of just ignoring any of the data. But any liberal or moderate Democrat who has any hope of really thinking about this issue, should read the April 29 edition of the New Republic. Because in that edition of the New Republic they go back and they cite, and it is amazing, they cite the memoirs of the North Vietnamese officers who were involved in planning the final invasion of South Vietnam.

They cite, these North Vietnamese officers have now written their memoirs; they won, they get to write the books. So they have written books in which they said:

> We watched the U.S. Congress, and when the U.S. Congress did A, B, and C, we then knew we could invade South Vietnam and get away with it.

Now, what we discover, and it is very clear in the Grenada documents. These are very smart people; they work a long time at taking power. What we learned in the Grenada documents is that they know how to work with Congressmen; they understand how the Congress is subdivided; they talk about it in some detail in the Grenada documents, and they talk about specific groups of Congressmen and specific staffs. They know how to manipulate the American press. There is a four-page letter in here from the American-born wife of the Cuban Ambassador, in which, in handwriting, she outlines exactly how to manipulate American newsmen.

They understand how to have collaborators in the churches, and that is the word they use in their document. They talk about collaborators in the churches, and they set up this fantasy island tour in which what they do is they bring people in who are gullible and innocent and naive and they brainwash them.

Now it is fascinating, we read a great deal in the last few days about Ortega. We have read particularly gullible ostrich in the news media who talks about Ortega and what a person Ortega is like.

That person does not seem to understand that Ortega's first great political action was exactly the same political action as Joseph Stalin. The first thing Ortega ever did that was famous was that he robbed a bank and was caught and sent to jail. The first thing Joseph Stalin did as a member of the Communist Party back when it was still rebelling against the czar of Russia, was that he robbed a bank and was sent to jail.

We talk about this poor guy who was jailed by Somoza, it is true; he robbed a bank. Now probably this will come as a shock to some of our ostrich friends, but probably if a left-wing radical in America robbed a bank, we would put him in jail. We would probably put a right-wing radical in America who robbed a bank in jail. This is an old-fashioned clearly American way of behaving that is not fair to left-wing revolutionaries that we think if you rob a bank you should go to jail.

I just want to make this point: That Mr. Ortega, the dictator of Nicaragua, who is so nice to all those left-wing groups, is a man who started his career by robbing a bank, and by the way, he was released from jail when they kidnaped a large number of people and threatened to kill them if he was not released.

This is the kind of deliberate terrorism which is the base of the current Nicaraguan Communist government, and it is probably one reason the Soviets like the Nicaraguans: They have a similar history between Joseph Stalin and Ortega, of being bank robbers as the base of their political career.

I yield to the gentleman from Minnesota.

□ 1820

Mr. WEBER. If the gentleman will yield further, I was just going to reemphasize the point that the Communist dictator of Nicaragua, Daniel Ortega, was not, as popular mythology in this country would have it, a great battlefield hero of the Sandinista revolution who fought his way into power against the corrupt Somoza government. He was, in fact, in jail at the time that Eden Pastora managed to basically win the military victory that led to the ouster of Somoza. Had Pastora not liberated him from jail, he probably never would have gotten out in the first place. Pastora, of course, now is fighting along the Costa Rican border to topple the Sandinistan government precisely because they are no longer Sandinistas; they are now Communists, and he is the real Sandinista.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I would be glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. I think this is an important point. We got asked by one of our colleagues on the floor last evening. "Who are these counterrevolutionaries down there? Who are these people that the President wants to support?"

Well, the gentleman from Minnesota has just told us one. The man who helped oust Somoza, who was the largest single force——

Mr. WEBER. Commander Zero was his nickname in the fight. He was the most popular general in the Sandinista rebellion

Mr. WALKER. The man who carried out the military victory against Somoza is now fighting the Communists who have taken control of the government because he got thrown out of the coalition because he was serious. He wanted to put together a democracy and found out that the Communists did not want to do that.

He is not the only one. As a matter of fact, I have a whole document here of just who the people are who are among the freedom fighters. In fact, they are very upstanding people, people who do want to bring democracy to their country, and I think it is extremely important that we do understand that we are not talking about Somozistas here; we are talking about people who really are prodemocracy, and it is a doggone shame to hear them libeled the way they so often are by the liberals in this Congress.

Mr. BURTON of Indiana. If the gentleman would yield further, I would like to elaboate upon that just a little bit.

All of the people who oppose what the Communist Sandinista government down there are doing are not the freedom fighters and the conservatives. I talked at dinner at the Ambassador's residence in Managua last week with a gentleman who is the head of the liberal party. Up until about 1 year ago he was the Labor Minister in the Communist Sandinista government, and he got his stomach full and he put together a ticket, a liberal ticket to run for office.

Philosophically the two of us agreed on almost nothing, but the one thing he said to me was if aid to the Contras is not continued or given by the United States of America, the repression will increase and the revolution, without doubt, will expand throughout Central America. So the freedom fighters who fought against Somoza, the Sandinistas whose revolution has been kidnapped and who are fighting together to try to overthrow the Communist government down there are not alone. There are even liberal members who are in the Sandinista government who have had their stomach full and they want to see a change.

Mr. GINGRICH. Let me bring us back to what I think is the central point of this evening, which is, even if you are willing to stomach a Communist dictatorship, even if you are willing to kill freedom in Central America, even if you are willing to eliminate the freedom fighters who are the decent people who tried to overthrow Somoza and create freedom, as an American, you have to ask yourself, what does it mean when you have even some of the Democrats who are against helping the freedom fighters admit that Nicaragua is an ally of the Soviet Union.

Let me just read for a second from a couple of documents in the Grenada documents to give us a sense of this, because people say, "Oh, I bet he is afraid of something that is not real." Well, now we have captured the real documents. Here is an interesting one.

This is Document No. 13 of this book. It is called An Agreement Between the Government of Grenada and the Government of the Union of

Soviet Socialist Republics on Deliveries From U.S.S.R. to Grenada of Special and Other Equipment. Under article I it says:

The Government of the Union of Soviet Socialist Republics shall insure in 1980 to 1981 free of charge the delivery to the Government of Grenada of special and other equipment.

I would remind everyone that one of the charges was, as indicated in a secret document from the Grenadian Embassy in Moscow, that they tried to overthrow two governments; that their quota that year was Surinam and Belize. So they were getting a charge, sort of, "You go out and overthrow some government and we will send you more equipment." That was the Russian deal.

Article II, and I think this is very interesting in terms of the point the gentleman from Minnesota made about the 9,000 Cubans. Article II:

The delivery of the equipment listed in the annex to the present agreement shall be effected by the Soviet party by sea at the port of the Republic of Cuba. The order of the further delivery of the above equipment from the Republic of Cuba shall be agreed upon between the Grenadian and Cuban parties.

In other words, the Russians were not stupid. They were not going to suddenly send Russian ships straight into Grenada. They were going to send the Russian ships, which already go to Cuba anyway, to Cuba, the Cubans were going to repackage it, and we have it repackaged in some places in really interesting ways. We have weapons, for example, we captured that were listed as foodstuffs, that had boxes that said "Foodstuffs." They just happened to be rifles when you opened them up. It was a very interesting version of foodstuffs. When our liberal friends talk about how this is really a fight and if only we sent foodstuffs, they do not understand what the Russians and the Cubans mean by foodstuffs. In their case it is AK-47's.

Let me give you one more version out of this very same treaty, because it is a fascinating document which we captured and which we know is real. This is not some fantasy made up by somebody in order to scare people. This is a real document.

Article VI: "The Government of Grenada and the Government of the U.S.S.R. shall take all the necessary measures to insure keeping in secret the terms and conditions of deliveries.

I just want to report to my colleagues that when I went to Oxford to debate the Nicaraguan Vice President, the Communist Vice President of Nicaragua, the day before at the Chatham House he pledged publicly that there were no secret treaties.

First of all, I think that tells you a great deal about their contempt for Western democracies, that the whole idea of pledging publicly there are no secrets, if you think about it, it is just wonderful. It is the kind of "Fantasy Island" bizarreness that only people who have real contempt for us would begin, because by definition, if it is a secret treaty you would lie about it being secret, so if you said there were no secrets and there were secrets, your lie was an effective way of covering up the secret. So here is a guy who thinks we are so stupid he publicly pledges there are no secrets; but in the second place, we know he is lying. And this is the most difficult thing for our many friends, particularly in the church groups, to appreciate because they go down and are sincere and naive and innocent and in a remarkably historically ignorant way walk up to this guy, this former bank robber turned Communist dictator, and they say to him, "Gosh, do you have any secret treaties? and he says, "Would I have any secret treaties? Of course I do not."

Let me then remind you that we have absolutely proof in Grenada that there were secret treaties and that furthermore they promised the Russians they would lie about them. They promised they would keep them secret, and by definition, if you promise to keep it secret, does that not mean you promise to lie if somebody says, "Do you have a secret treaty"?

In that setting I would say to you, as a historian, does it not strike every person listening as far more likely that in Nicaragua we are dealing with a parallel situation? Does anyone really think the Russians have changed in the last 2 years? Of course not. So what does that mean? It means that without any question, if the freedom fighters win and if the freedom fighters open up the archives of the communist government, what we will suddenly discover, and it is a much bigger list of treaties because the Nicaraguans are getting a lot more money. Now, if you figure two countries per $6 million of aid, the amount of aid the Nicaraguans are getting, they must have volunteered 30 or 40 countries they would undermine, assuming that the same exchange rate of countries for aid was going on with Nicaragua that went on with Grenada.

I would say that the burden of proof is on the ostrich wing of the Democratic Party to explain to us how they could possibly believe, if they are willing to concede that Nicaragua is an ally of the Soviet Union, as one of them did, how could they possibly argue, I would love to hear their explanation, of why the Grenada book is not the most probable model of what is going on in Nicaragua, because I just think it boggles the mind to imagine that here we are, going to vote apparently next Tuesday, led by the Democratic leadership of this House, to in effect give the Soviet Union a permanent aircraft carrier in Nicaragua.

□ 1830

Now, I cannot understand, given the last 10 years of history, how anyone who has watched the Democratic leadership of this House, who has watched the effect of those votes over the years, could possibly stand by and have any sense of trust in the Soviet Union or its ally, the Nicaraguan Communist Government.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Speaker, just to follow up on that in a little different vein, the gentleman talked about the Soviets and the Cubans and the Grenadians lying about those treaties and agreements, and I talked to my colleagues in the last couple of weeks about arms shipments coming from Cuba and the Soviet Union, coming through Nicaragua and to the guerrilla fighters who are trying to overthrow the duly elected government in El Salvador, and they say that there is no proof of that going on.

I was in El Salvador last week, in Chalatenango province, and I saw a newly captured cache of weapons that were all Communist-originated—Yugoslavian mortars, Bulgarian hand grenades, and all kinds of weapons that you could follow directly all the way back to the Communist bloc. Yet they tell us that is not happening.

I would like to take a paragraph out of the letter that President Duarte sent to President Reagan. He said, and I quote:

We remain concerned, as we have been for some time, by the continuing flow of supplies and munitions from Nicaragua to guerrilla forces here in El Salvador which are fighting against my government and our programs of reform, democracy, reconciliation, and peace. This continuing intervention in our internal affairs is of great concern to us and we deeply appreciate any efforts which your government can take to build a broad barrier to such activities—efforts which a small country like El Salvador cannot take in its own behalf.

Yet when you talk to the liberal Democrats in this House, they say that is not taking place, while the president of the country where it is taking place and that is being affected documents it in his letter to our President.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. GINGRICH. I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I think the gentleman from Indiana [Mr. BURTON] has made an important point because it goes even deeper than that.

Many of our friends on the left know that in order to document that traffic into El Salvador, we would have to give up intelligence secrets of this country. Many of them have seen

those intelligence reports. They know doggone well that our intelligence can show that that kind of trafficking is taking place. So when they make those kinds of statements, what they are really saying is "We would like you to release that intelligence information."

Now, we all know what is going to happen if that intelligence information is released. It will give up our sources.

Mr. BURTON of Indiana. And they will be killed.

Mr. WALKER. Yes, and our sources will be killed.

So what they are really asking for is the kind of things which undermine the intelligence-gathering capacity of this country, which is in itself a help to the Soviet Union.

That is a very, very disturbing element, I think, to the fact that we hear all of this campaign from people who really, I think, know better. If they have not seen those intelligence briefings, they are certainly available to them as Members of Congress, and those intelligence briefings are very, very specific on the point that in fact the kind of gunrunning the gentleman has just referred to is going on.

Mr. Speaker, I thank the gentleman for yielding.

Mr. GINGRICH. Mr. Speaker, let me just continue this, if I might, for just a minute because I think people might say, "Well, there is only this one treaty with the Russians, and anyway most of the people in Nicaragua are Cubans, they are not Russians—most of the military advisers, most of the secret police trainers, most of the people who are doing the work."

Let me make two points. There is another secret treaty between Grenada and the Soviet Union which was signed and which said this. This is document No. 14, under article 2:

> The delivery of the equipment listed in Annexes 1 and 2 to the present agreement shall be effected by the Soviet party by sea at the port of the Republic of Cuba. The order of the further delivery of the above equipment from the Republic of Cuba shall be agreed upon between the Grenadian and Cuban parties.

In other words, the Cubans became the control of the Grenadians. The Cubans began to have the power to say, "If you don't obey us and do what we want, you won't get the things the Russians are shipping to us."

Let me carry it one step further. Some of our leftwing friends who, I think, act as ostriches——

Mr. WEBER. Mr. Speaker, will the gentleman yield on that?

Mr. GINGRICH. I am glad to yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Speaker, I just want to slow the gentleman down for a second, because I was listening very carefully to that point. That seems to me to be a critical point, and I would just like to review it for a second.

As I understand it, what that agreement that the gentleman just read indicates is that the flow of arms and other materials to Grenada from the Soviet Union was literally brokered by the Cubans, and that there was a formal document with the Grenadian Government establishing that the flow of such arms and other materials to the Grendians was to be procured by the Cubans, Is that correct?

Mr. GINGRICH. That is correct. Cuba acted in effect as the middleman for the Soviet Union in establishing a Communist dictatorship in Grenada, and the Cubans acted as the control point. So the Cubans had literal control over the Grenadian Government so at any moment they could choke off the flow of weapons.

Mr. WEBER. Of course, the point there is critical because, as the gentleman points out, there is a large number of Cuban troops and nonmilitary advisers in Nicaragua, so all of our past experience indicates that they are probably once again acting directly as the agents of the Soviet Government; is that not correct?

Mr. GINGRICH. That is correct.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. And this is the same Cuba that some of our friends on the left have in recent weeks suggested we ought to be more compassionate to, we ought to be less hostile toward, we ought to be opening the doors more toward, and we ought to be trying to negotiate with? It is exactly the same Cuba, is it not?

Mr. GINGRICH. As the gentleman will remember, one Democratic candidate for President last year ran around all of Central America saying that the United States should not embrace dictators and then physically embraced Fidel Castro. I thought it was one of the most bizarre moments in modern American politics. Here is a guy who went to like six countries in a row and held press conferences and said that America should never again embrace a dictator, and he arrived in Havana and physically embraced Fidel Castro, as though Castro was not a dictator.

Let me continue now, and then I will be glad to yield, because I really want to drive this home. There is another document in the Grenada documents—and these, as I said earlier, are all available to the public; they are printed by the State Department, and I think they should be in every public library and every high school library and, I might say frankly, every church library. If churches are going to get involved in lobbying, and so forth, they ought to read the Grenada documents. Every church group in America should read this document and have a study circle to ask, what does this mean? If they look at document No. 16, which is protocol of the military collaboration between the Government of the Republic of Cuba and the People's Revolutionary Government of Grenada, they will discover this article 12, which I think is very, very important for all of our ostrich friends on the left to listen to and think about:

> The Government of the Republic of Cuba and the People's Revolutionary Government of Grenada will take all measures depending on them in order to assure the secrecy of the permanency of the military personnel in both states and the character of activities, as well as the mail and information relating to present protocol.

Now, what does that mean? Not only is this the secret treaty on which they rely, but notice the keyword, I say to those of our friends on the left who always rush in after the next Communist government gets set up and say, "Oh, well, this is all temporary. If we are reasonable, they will back off." The keyword here is "permanency."

This was a permanent treaty of alliance between the Cuban Communist Government and what was then the Grenadian Communist Government. And what does that say about Nicaragua? It says that Nicaragua is the permanent ally of the Communist Government of the Soviet Union and the Communist Government of Cuba as long as we allow that Communist government to survive.

And on the vote next Tuesday, if anyone votes no next Tuesday, they are voting to kill the freedom fighters' chances of stopping communism in Nicaragua, and they are voting to increase the potential for a Soviet airbase in Nicaragua.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am delighted to yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Speaker, I would just like to make it clear that in my mind there is a threat to the security of the United States of America by allowing the Communists to expand their foothold on the North American Continent in Central America.

John F. Kennedy was President in 1962, and in 1961, in making an address before the American Society of Newspapers, he was talking about the Cuban threat, and I want to quote him because he was talking about the security of America. This is one of the most popular Democratic Presidents who has lived in our century.

He said this:

> Any unilateral American intervention, in the absence of an external attack upon ourselves or an ally, would have been contrary to our traditions and to our international obligations.

And then he went on to say this:

But let the record show that our restraint is not inexhaustible. Should it ever appear that the inter-American doctrine of non-interference merely conceals or excuses a policy of nonaction—if the nations of this Hemisphere should fail to meet their commitments against outside Communist penetration—then I want it clearly understood that this Government will not hesitate in meeting its primary obligations which are to the security of our Nation.

He was concerned about the Communists trying to get a toehold on our continent in Central America, and he was alluding to that in this speech. You can go on and read it, and it spells it our even more graphically as the speech progresses. But he said that American intervention may become necessary.

Now, if we do not support the freedom fighters down there and if this revolution expands, we are going to have to do that, and it is not necessary. But here was a Democratic President who made that commitment back in 1961.

Mr. GINGRICH. Let me build on what my friend just said because I think it is really important and it also, frankly, frames our next speaker. I really think this is important.

President John F. Kennedy in his inaugural address said, "Let all our neighbors know that we shall join with them to oppose aggression or subversion anywhere in the Americas, and let every other power know that this hemisphere intends to remain the master of its own house."

□ 1840

He went on to say later, speaking about the aggressors:

We dare not tempt them with weakness, for only when our arms are sufficient beyond doubt can we be certain beyond doubt that they will never be employed.

The greatest tragedy to befall the cause of freedom in the last 20 years has been the collapse of the pro-defense, anti-Communist wing of the Democratic Party. Its replacement by a George McGovern, Walter Mondale wing, what I would call an ostrich wing, a wing in which the ostrich has replaced the donkey as the primary symbol, a wing in which ostrich Democrats seem to be unable to understand the nature of communism. They seem to be unable to understand John F. Kennedy's speeches. They seem to be unable to even read the Grenada documents and understand what they teach us. The ostrich wing of the Democratic Party, I think, is driving those Americans who used to be proud Democrats, but who fear communism and are concerned about America's survival and the survival of freedom, have been driving more and more of them, frankly, to leave their party. It is a tragedy for freedom.

One man who has personally witnessed it and lived through it and seen it is the very distinguished gentleman from Florida [Mr. IRELAND] and I would like to yield to him at this time.

Mr. IRELAND. Mr. Speaker, I would like to register my support for the President's peace plan by first enumerating some of the issues upon which all sides agree, and the historical facts pertinent to them. Today we find ourselves in remarkable agreement regarding the problems and dangers in Nicaragua, with disagreement restricted primarily to how we might best solve those problems, or indeed whether we should attempt a solution at all.

First, I think it is generally agreed that the nature of the current Sandinista government is repugnant to both the American citizens and their elected representatives. Offers to the democratic opposition of so-called electoral participation fooled none. Sandinista harassment of opposition leaders cost them the support of even their more tolerant European sympathizers. This tactic was merely part of the long-practiced Sandinista policy beginning with ignoring promises made to the OAS which secured international support for overthrowing the Samoza regime in 1979. The Sandinistas are openly Marxist-Leninist—it is a Communist regime. They are implementing not just the Marxist socialism which has contributed to the country's economic ruin, but also the Leninist principles of mass organization and oppression which eventually can give them totalitarian control over their citizenry. The Sandinistas are not agrarian reformers, they are Communist revolutionaries whose No. 1 priority is to consolidate their regime.

Second, once such a government has consolidated its power, we have not, since the birth of communism in 1917 witnessed its overthrow or a significant reversal in its human rights policy. Once the iron curtain has closed, its unfortunate inhabitants have been locked behind it. The only countries in which there is a present hope of such a reversal are those—such as Afghanistan, Mozambique, Angola, Ethiopia and Nicaragua—where the government has not yet consolidated its political power. And where there exists a viable armed resistance movement.

Third, the domino theory is real. Nicaraguan Communist expansion to the north and to the south will focus on two strategic targets important to the United States. Mexico on our immediate border and the Panama Canal and the Caribbean sea lanes that supply our allies and friends. Through nonconventional guerrilla insurgencies, the Sandinistas will promote their brand of terror and destabilization throughout Central America.

In short, the Sandinistas will say, do and promise anything in order to gain enough time to consolidate their regime. There are only two choices, first, to support the President's peace plan which promotes the Contadora process and offers an opportunity for a peaceful resolution of the conflicts in Central America or support the consolidation of the Marxist-Sandinista regime and strengthen the Leninist bonds of the Soviet-Cuban-Nicaraguan axis.

Talk is cheap and promises are easily broken. Prolonged negotiations and alleged regional "settlement" may not be the Sandinistas preferred option, but even this would give them what they need most—time for internal consolidation. Once the Nicaraguan people are fully controlled, promises can be broken, as they were in the past, and the details of "verification" rendered irrelevant. At that stage the Sandinistas will supplement propaganda and political action with more overt infiltration, terrorism and insurgency against their neighbors. Even if a "settlement" can now be achieved, it will be a temporary palliative only, and the future threat will be worse than that which now exists since we will face a stronger enemy with a secure base of operations. The Sandinistas must either be forced to allow opposition freedom and to accept the moderation in policy which this entails or they must be banished from government. Only the Contras can force them to face this choice.

Wars are not pretty, and the Contras are not perfect, but they are our only alternative to something far worse. Although the countries of Central and Latin America boast a democratic tradition superior to that of other less-developed regions, they too have serious vulnerabilities. Topography and borders also lend themselves to insurgency. There are lucrative strategic targets both to the south of Nicaragua, in the Panama Canal, and to the north, in Mexico, which is the largest supplier of U.S. oil imports and the ethnic fatherland of many U.S. citizens.

We cannot grant totalitarians control of Nicaragua on the theory that this will permanently slake Sandinista ideological ambitions. The democracies erred grievously before World War II when they ignored Churchill's insight and logic. We, who have experienced not just a decade of Nazism but also nearly seven decades of communism, have no excuse to repeat those errors.

Mr. GINGRICH. Well, Mr. Speaker, I appreciate very much the gentleman's comments because I think the gentleman puts in context our fears that we are seeing the rise of a true Communist state in Nicaragua and a state which is allied with the Soviet Union against the survival of the United States.

Mr. IRELAND. Mr. Speaker, I thank the gentleman. He could not be more

correct. We need to have our colleagues and the American people pay close attention. It is so important to have this dialog move forward in a measured pace, rather than a rush to judgment as some of the leadership of this body would have us do.

I thank the gentleman.

Mr. GINGRICH. Mr. Speaker, I yield to my friend, the gentleman from California [Mr. HUNTER.]

Mr. HUNTER. Mr. Speaker, I thank the gentleman.

I think it is a historic thing that the gentleman from Florida is here today speaking as he is, because that perhaps answers the question that was put forth by one of the great Members of this House, the gentleman from Texas, CHARLES WILSON, during the last major debate that we had concerning the military strength and the MX missile. The question that he asked, if I can paraphrase it; CHARLES WILSON said essentially, "What has happened to the Democrat Party of Jack Kennedy, of FDR, and Harry Truman, who were strong on national defense and strong on foreign policy?"

The gentleman from Georgia has articulated some of John Kennedy's statements.

The gentleman from Indiana [Mr. BURTON] has given some other statements.

The Democractic Party was renowned for years and years for having a tough foreign policy. The answer perhaps to the question of the gentleman from Texas [Mr. WILSON], that is, what has happened to the Democrat Party of John Kennedy, FDR, and Harry Truman, is that they are alive and well and they are following people like PHIL GRAMM and the gentleman from Florida, ANDY IRELAND into the Republican Party.

Let me say that perhaps I should welcome that as a Republican and I do welcome these esteemed colleagues coming forth and rejecting what they see as a major weakness in the Democrat Party; but I would much rather see our Democrat friends standing up on that side of the aisle saying, "We are going to renew that Democrat platform of Jack Kennedy and FDR. We aren't going to give away our hemisphere."

I think the statements of the gentleman from Georgia have been right on point. The question is not only whether the Sandinistas are good people or bad people or have committed atrocities. Certainly they have committed them. Certainly they have denied democracy in this country and certainly they have reneged on the promises they made to the OAS; but beyond that, they are providing a Soviet presence in our hemisphere. They are doing exactly what John Kennedy said he would stop. They are doing exactly what Harry Truman said he would stop. They are doing exactly what Dwight Eisenhower said he would stop. If in fact we fail in this vote to give some aid to the Contras, to the freedom fighters, then we are going to be acquiescing to that Soviet adventure in our own hemisphere and we are going to be allowing this and the Democrat side of the aisle is going to be allowing what some of the most celebrated and revered Democratic leaders of this country have said they would stop, and that is an outside power coming into our hemisphere and establishing a presence that is a threat to the United States.

If you look at the Backfire bomber, we were debating the Backfire bomber and other strategic systems that the Soviets had recently and one of my friends from the other side of the aisle said, "You know, Backfire bombers don't have the range, so you really can't count them as being long range strategic bombers."

People will look at the potential airfield built in Nicaragua and the airfield in Cuba, you realize that all of a sudden those Backfire bombers that have the capability of flying from Russia to the United States and dropping 26,000 pounds of nuclear warheads in the Midwest of the United States suddenly become in fact capable of doing that mission because now they have a place to recover. They do not have enough fuel to fly back the way they are designed to the Soviet Union. They do have enough fuel to recover in Central America. That is why that 10,000-foot runway in Grenada was so important to us. That is why those runways that they are constructing in Nicaragua are so critical to us.

I know the gentleman remembers in that book that he has that was put together by our historians that was derived from some of the 26,000 pounds of material that we captured in Grenada, he recalls a statement that was made in the secret central committee meeting after Ronald Reagan showed the American people the overview, the photographic evidence of that 10,000-foot runway in Grenada, and he said, "This runway is going to be used by Soviet airplanes, possibly airplanes like Backfire bombers that are recovering in Central America." The next day the press said that is baloney. They are going to ship spice through it just like they have told us. That secret central committee meeting resulted in one member recording in the meeting that it is agreed that the runway will be used by the Cuban and the Soviet military.

□ 1850

So the Grenadians lied to us, the Grenadian Marxist leader, and Ronald Reagan was absolutely right about this military threat. And we can expect only the same from the Nicaraguans.

I thank the gentleman.

Mr. WALKER. Will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because I simply want to reemphasize a point just made by a distinguished member of the Armed Services Committee in this body. I think what I heard the gentleman saying is that even if no Backfire bomber ever ended up being put on the runway in Nicaragua, that runway in the hands of a Soviet ally is still a threat to us because at that point a first strike launched by the Soviet Union using Backfire bombers would, in fact, be able to use that runway to recover after a bombing mission on the mainland of the United States. Is that what I understood the gentleman to be saying?

Mr. HUNTER. That is absolutely true. There are people, mostly on the other side of the island, the United States, who claim that the only bombers the Soviet Union has today that can be counted are these old propeller-driven Bear bombers because they claim the Backfire bomber does have the capability, it is a swept wing jet aircraft that can go faster than the speed of sound, and can deposit 26,000 pounds of nuclear payload in the United States. But we cannot consider that to be a long range bomber, and we cannot consider that to be something that should be part of the SALT treaties because, after all, it then does not have the fuel to go back to Russia. So theoretically a Soviet crew cannot leave Russia and come and bomb the United States and return to the Soviet Union.

But it can recover in Central America, so that is why those runways, those 10,000-foot runways in Central America are so very, very deadly to the United States.

Mr. GINGRICH. So potentially a no vote on Tuesday against aid for the freedom fighters is a vote which as a consequence could have Soviet nuclear bombers having a base in Nicaragua against the United States?

Mr. HUNTER. That is right. It gives an added effectiveness of 200-plus extra strategic bombers to the Soviet Union that are in their inventory and can be, can practically be used in a strategic attack against the United States.

Mr. GINGRICH. I think every American citizen should think about that between now and Tuesday. If your Congressman or your Congresswoman votes no on Tuesday, they are in effect voting for a policy which increases the likelihood that the Soviet Union would have a nuclear air force base in Nicaragua.

Mr. HUNTER. That is right.

Mr. GINGRICH. I thank the Speaker.

THE ELECTION IN INDIANA'S EIGHTH CONGRESSIONAL DISTRICT

The SPEAKER pro tempore (Mr. GONZALEZ). Under a previous order of the House, the gentleman from Arizona [Mr. KOLBE] is recognized for 60 minutes.

Mr. KOLBE. Mr. Speaker, I want to take the Members back, if I might, and those who today are within my earshot, to 1972, to the Olympics in Munich, Germany. Some of you may recall the basketball game that was played in those Olympics between the United States and the Soviet Union.

At the end of that basketball game the Soviet Union was behind by one point. The United States had won the basketball championship at the Olymics. But there was a referee who came from an East German country and he decided that they would roll back the clock for 3 seconds and replay those last 3 seconds.

They did so. They did not get off another shot, and at the end of the 3 seconds the United States won the basketball game by one point.

The referee again decided that they would replay those last 3 seconds once again at the end of it and once again gave them a second chance, gave the Soviet Union a second chance to win the Olympic basketball game.

They did. They got off a shot and sure enough, at the end of the second replay of that Olympic basketball game the Soviet Union won that Olympic championship.

Mr. Speaker, what is the point? Does it remind you of anything that is going on today in this body?

It does. I am talking, of course, about the election, the election which has been going on since November 6 in the Eighth Distirct of Indiana, an election which was won by Mr. Rick McIntyre, the Republican candidate for the House of Representatives in that district. It was won on election night, and then it was recounted. And the election was won again on the recount by Mr. McIntyre.

But that was not enough. This House did not seat Mr. McIntyre and they decided they were going to undertake their own count. And so we have gone through the process again of this time the House of Representatives devising its own rules on how they would count the ballots in the Eighth District of Indiana. This time with the House of Representatives stacking those rules in such a way that they would do everything they could to guarantee a victory for the other side.

Now we are at the end of that second recount, the third election to take place in Indiana's Eighth District in the last few months, and they still have not been able to win the election. It is a dead heat. It is a dead heat. Out of 230,000 votes that are cast, the election is virtually a dead heat.

Now we are coming down to Friday of this week when the task force that is assigned to look into that election will have to go to Indiana and face the voters and the citizens of that district and tell them what they are going to do. They have done everything they can to keep the Eighth District from being represented by Mr. McIntyre. They have done everything they can to structure the rules of the recount in such a way that they would win this election.

Now they are going to have to go and tell them what they are going to do. So I think that now, as we come to the end of this very, very long and arduous period that has been difficult for either of the candidates in that election, I might add, as we come to the end of this recount I think it is fair that this House, which is going to have to deal with this issue again, as we have dealt with it on January 3 and time and again since then, as we have insisted that the time has come for the winner, that certified winner in the Eighth Congressional District election to be seated, I think it is appropriate that we take some time now to review all of the events that have taken place since November 1984 and look at that election so that the American people will know exactly what has transpired during this election.

Let us remember, there has never been a question, a suggestion by anybody of fraud. There has never been a suggestion that this election was done unfairly, that the recount, that the count was handled incorrectly, that the tallyings were done improperly. There has never been the suggestion of any illegality. Nobody has filed any charge under the Federal elections law. Nobody has made such a claim during the whole course of this election.

So on election night, November 6, the winner was Rick McIntyre. There was a period there for a few hours, actually about 48 hours, when one county reported incorrectly its tally, and it would appear, would have appeared that Mr. McCloskey was ahead by about 72 votes. But that was based on a clearly improperly added up tally, not on the basis of any counts of votes, just that the numbers when they were added on the bottom column came out differently.

A few days later the courts in Indiana directed the clerk in that county to add up those figures again. It does not take very long with the pocket calculators we have these days to do that. He added them up and, sure enough, the figures came out and showed that Mr. McIntyre had won that election.

Yes, it was a close election. It was a razor-thin margin. But he won that election. And the secretary of state issued a certificate on that basis, issued a certificate to Mr. McIntyre that he was the actually elected and duly certified winner of the election in the Eighth District of Indiana.

Well, we all know what happened. When we arrived here on January 3 to be sworn in, along with Mr. McIntyre I came also as a freshman Member of this body to be sworn in. I did that day raise my hand and take the oath of office to uphold and defend the Constitution of the United States. My certificate that came with me as a duly elected Member of the Fifth District of Arizona was not in question.

Yes, I had a close election. No, it was not as close an election as Mr. McIntyre had, but it was a close election.

□ 1900

But nobody suggested fraud in my case. Nobody suggested that I should not be seated because I had a close election. I think when we get to it, at the end of this discussion today or at the end of all the discussions that we have had with this, when you strip away all the other things that are said about the election in Indiana's Eighth District, there is one and only one difference between the election that was held in my case or the election that was held in the case of each of the other 434 districts of the United States, and that is that this one was exceptionally close, close. That is all that was different, it was close. But there was a winner. That winner was certified.

But we know what the next step was. The Democratic majority in the House of Representatives refused to seat Mr. McIntyre on the floor of this body saying that they needed to take a look at this election, that is was too close an election, and there were, by golly, some charges that were made about some irregularities, apparently reading some newspapers or listening on the phone to somebody who might have called up. No formal statement ever issued, no formal charge ever issued under the Federal election law. But they were going to take a look at this election because it was a close vote and the House had a responsibility to look at that.

So he was not seated.

After all, they make the point, there is a recount going on right now in Indiana, and we ought to wait and see how that recount comes out. It should not take too long. Another couple of weeks and the recount in Indiana was completed.

The outcome, as we know, was very clear. Mr. McIntyre won the election again, this time by a substantially wider margin. In fact, under that recount, as the figures that now stand as the only official figures under Indiana election law as to what the outcome of

that election in the Eighth District was, Mr. McIntyre won that election by more votes than some Members who now sit in this body won their election by. Not very many of us won as close as that even under the recount, but there are Members who were seated whose certificate was accepted in this body who won by less votes than Mr. McIntyre did on the recount.

Well, you would have thought that the recount, having been undertaken by Indiana in complete conformance and compliance with its own law on the handling of recounts, would have settled the issue once and for all, and the majority in this body would have said let's get on about our business, "OK, we have assigned this thing to the House Administration Committee, to the task force, and we will continue to let them take a look at this issue, but in the meantime there can be no question, there can be no question but that Mr. McIntyre, with his certificate, ought to be seated on the floor of the House of Representatives." But, no, they did not do that. That was not the decision that was made. Instead, they refused once again to seat him because, though the Republican minority asked them to comply with what has been the precedent in virtually every single case that has ever been heard in this body, they refused to seat him, and we went right on with the recount.

That was done.

Now we are going to do the recount under the rules set up by the House of Representatives, by the task force of the House Administration Committee.

Despite the efforts since that time to resolve this matter and to seat the individual, pending the outcome of that investigation and that recount, who carries the certificate from the secretary of state, they have not done so.

Now, the recount that was undertaken by this body, by the House Administration Committee, is a very interesting process because of course they decided what the election law ought to be in Indiana. They decided what ought to be fair about which votes ought to be counted and which ones ought not to be counted. They restructured the rules for the recount in such a fashion that they—they restructured those rules for the recount in such a fashion that there was no doubt in their minds how the next recount would come out, the one that they were going to undertake. This time they put the rules, we will get to that in a bit in the course of this discussion, they restructured the rules in such a way that surely the ones that were not going to get counted and the ones that were going to be thrown out were the ones in the stronghold for Mr. McIntyre and the ones that were going to get counted were contrarywise in the opponent's. And, despite the fact that they did these rules and despite the fact that they covered it with this patina of fairness by getting the General Accounting Office into the business of conducting this recount, despite all of these things, here we are now more than 90 or 100 days later, we are now at the end of that third election in the Eighth District of Indiana, and it is a dead heat. They still have not been able to get their person as the winner in this election.

I think it is interesting to observe in the Indiana election law on this point there has never been any suggestion that Indiana law was wrong. Sure, Indian law may be different than the election law that exists in your State or in my State, but each of us presumes that our States have the right and the authority to adopt the election laws under which each of us will get ourselves on the ballot, so long as it is not inconsistent with the Constitution of the United States; that each State has the ability to adopt its own election laws which say when people will be registered, how they will register to vote, what kind of information will be on there; that each State has the authority to adopt its own election laws which govern the conduct of the election on election day; that each State has the authority to adopt its own election laws which govern how you will conduct absentee ballots, and, yes, Mr. Speaker, when there is a vote, an election that is challenged, that each State shall have the authority to enact its own election law which will govern how a recount will be done. There is no question that Indiana has the right to do this.

Let me just give you one suggestion: In my State, Arizona, we are unique in one respect in the law on registration. We have a longer period from the close of registration to the election date than any other State in this country.

In order to vote in Arizona you have to be signed up and registered 50 days before the election. You have to be on the rolls 50 days before.

Most States have 30 days, or 20 days, and there are a number of States that you can go in on election day and vote.

Now, if this task force had said, "Well, that is erroneous, it is too long a period, people aren't thinking about an election 50 days beforehand, they ought to be able to go in in 20 days beforehand and register to vote and be allowed to vote in the Fifth District of Arizona [Mr. KOLBE]." If they had done that, what would they do? Would they go out on the streets and pull everybody and say, "Did you intend to vote if you have forgotten to register?" Of course not. We presume that each State has the authority to enact its own election laws, that it should govern its own election laws. That is indeed why the certificate that each of us brings from the Secretary of State or the appropriate elected official in each of our States is so critical, because it is the certificate that we bring that certifies us by the election authorities in our own State, as the duly certified winner of our race.

Mr. McIntyre was no different in that.

Mr. Speaker, at this time I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman from Arizona for yielding.

I think he has laid out the chronology of events surrounding this so-called McIntyre controversy very accurately.

Let me just say something and recall a similarly contested seat which occurred several years ago when Mr. HENDON of North Carolina lost his seat following the 1982 election.

You know, he had a very unusual case there because Mr. HENDON, according to a Federal court, won that particular seat. In this situation you had a lever that you could pull in North Carolina that would vote for the straight Democratic Party. It was the party level; if you pulled that thing you could vote for everybody there who had a "D" after their name.

□ 1910

But in Mr. HENDON's district, at least in a number of the counties, you had people who wanted to, they wanted to vote Democrat almost all the way through, and they pulled that Democrat lever, but then they went over and they very clearly marked an X next to Mr. HENDON's name, next to the Republican's name.

Yet, when the clerk counted up those votes, they counted the ballots in which the voter had marked an "X" next to Mr. HENDON's name for his opponent.

Mr. HENDON took that case to the Federal court, and the Federal court said this about it. They said:

> The imposition of a legislative preference for the straight party candidate when the voter has indicated no such preference is an arbitrary subversion of the electoral process. It serves no compelling state interest.

They continued:

> We conclude that the legislative directive to count an improperly split ballot as a vote for the straight party ticket is unconstitutional.

Here you have a Federal court saying it is unconstitutional to say that when a guy puts his X next to Mr. HENDON's name, you count it for the other guy. This provision of the statute denies the equal protection of the laws to both the voter and the opponent of the candidate named in the straight party ticket.

That is *Hendon* v. *North Carolina State Board of Elections*, 710 Fed 2d 177, 4th Circuit, 1983.

And yet even with those credentials, Mr. HENDON came before this body and asked this body for a recount, this

body, the Democrat leadership of this body, which controls the body right now and did then—denied him a recount.

The reason they gave for denying the recount was the other feller, by gosh, had the certificate, and the certificate was what was important.

So here you had a case where you actually had a Federal court ruling the election to be unconstitutional; at least the manner in which they counted the ballots, you did not have a question on how the ballots were counted, you had ballots that had X's on them next to Mr. HENDON's name, the Republican's name, and those were counted as Democrat votes, or votes for the Democrat candidate.

This body said: No, the certificate is the important thing, and the certificate preempts the fact that these ballots were in fact counted in an unconstitutional manner, and they denied Mr. HENDON his seat.

Now here you have Mr. McIntyre come along, you have him with a duly issued certificate, along with the recount that says that he is a winner, and he is denied a seat. And I have never had it explained to me by a member of the Democratic leadership how those two sets of circumstances can be reconciled, and how that inconsistency can possibly be erased by the process we are going through right now.

Mr. KOLBE. I thank the gentleman from California [Mr. HUNTER] for his comments. As he was talking, it made me think of a couple of points.

One of the things we have heard—let me just add, I should say parenthetically, that I suspect you will never get the explanation of why the two were treated differently, because there is no real explanation for it; there is no justification whatever for treating these two cases in such obviously different manners.

One of the points that has been made frequently on this floor by people on the other side of the aisle, the distinguished gentlemen and gentlewomen on the other side of the aisle, has been that Indiana has changed its election law. So clearly there must have been some problem in Indiana, with the election law, that they changed this.

Certainly we ought to take that into account and we ought to be using the election law which has been enacted in Indiana as we recount these ballots—not that that necessarily would have made any difference at all, but that we ought to be taking that into account.

In the case you cited in North Carolina, of course, you had a Federal judge which struck that provision down, flat out struck it down; said this is unconstitutional and you cannot do that. Subsequently the North Carolina Legislature changed its law in that regard. They changed the law about how those are to be done.

It was never suggested here that we ought to go back and recount and reseat for 2 years before Mr. HENDON on the floor of this body, because the law was struck down and it was changed—no, they said he did not have the certificate; his opponent had the certificate.

That was what the election officials in the State of North Carolina had ruled; that his opponent was the duly elected individual, and he brought that certificate and this body seated that person.

Now I think this body certainly ought to have looked at the election and the way it was conducted, but I think they were perfectly within their rights, pending the outcome of such an investigation, to seat the individual who brings the certificate.

And that, for the last 100-plus days, is all that we have asked of this body: to give the presumption to the individual.

Mr. HUNTER. Will the gentleman yield?

Mr. KOLBE. I yield to the gentleman.

Mr. HUNTER. The gentleman is absolutely right. You know, if you look at some of the very close votes that we have had, I think the MX missile passed by six votes. If three votes had been changed out of the entire House, that vote would have failed, and the MX missile would not have been funded.

And I say that, realizing that some people are on one side of the fence with regard to the missile; others are on the other side of the fence. The point is that that vote, that single vote that Mr. McIntyre could have been casting the last 120 days is very important, not only for the people of his district in Indiana, but also to the United States and to our foreign and domestic policy.

There is absolutely unequal treatment that has been accorded by the Democrat leadership to challengers of election results from the two parties. There is no way to reconcile the Hendon case with the McIntyre case.

During this past election, we had another close election, too; I think we had a close election with our friend George Hanson from Idaho. He, I think, was declared to be the loser by some 74 votes, and I know that he had some questions about votes particularly that might have been cast by out-of-state people who were not really residents.

We could have moved not to have seated the gentleman who defeated George Hanson; I think that is Mr. STALLINGS; but we did not do that. I think most Members of the Republican side of the aisle voted overwhelmingly to go ahead and seat Mr. STALLINGS, because he had the certificate, which is a standard that this institution has always honored, except for one case when the secretary of state himself—and I think it was an Indiana case—sent an affidavit to the House of Representatives saying, "I've made a mistake," and in that case they did not seat him.

In all other cases, they have honored that certificate, and there is absolutely unequal treatment here and it has done a disservice to the people of Indiana as well as to the people of the United States, and certainly to the gentleman who worked so hard for that election, Mr. McIntyre.

Mrs. BENTLEY. Will the gentleman yield?

Mr. KOLBE. I will be happy to yield to the gentlewoman.

Mrs. BENTLEY. Is not it true that in the case of Hanson versus Stallings that here was an election that irregularities have been charged in already; that there were charges made?

Mr. HUNTER. That is right.

Mrs. BENTLEY. And in the case of the McIntyre race, there have been no charges of irregularities?

Mr. HUNTER. That is right. There has been nobody saying that there has been any underhandedness; in fact, as I understand, most of the election officials in the counties, in Mr. McIntyre's district, are Democrats; the people who put the rules in effect and regulated the elections and declared Mr. McIntyre to be the winner.

So your are absolutely right; it is a matter of the Democrat leadership in this House exhibiting no faith and credit to the State authorities that we have relied on for 100 and some years to govern, at least initially, our elections.

Mrs. BENTLEY. If the gentleman would yield further, this of course makes it look like down the road all of us could face a problem of the same kind.

Mr. HUNTER. I think the gentlewoman has hit the nail on the head. What I see the Democrat leadership saying potentially, at least implicitly, to challengers throughout this country is, that if you are a Democrat, you do not have to quite get 50 percent of the vote; come close and we will see what we can do.

Mr. KOLBE. I thank the gentleman from California for his earlier remarks, as well as the gentlewoman, and I will be happy to yield to her further if she would like.

Mr. Speaker, I wanted to comment on the point that he made about the case in North Carolina, because I think the distinction is very obvious; that we cannot see any way to rationalize the two different ways in which these cases were decided.

Nor can we, if we look through the course of the recount, figure out how this recount is being undertaken.

I mention in my remarks earlier, and I think it is a serious statement to make, that the rules of the recount have been structured in such a way as to favor an outcome for Mr. McCloskey.

Well, let me tell you one of the things that the task force decided to do in this recount: They decided, one of the issues that had been raised earlier, of course, was that in some counties there were ballots that had not been counted because they had not been properly notarized, they had not been properly initialed, rather, before they were dropped in the ballot box; they had various problems.

They decided they would count all of those. But guess what they decided they would not count at the outset? They decided they would not count all the ballots that have mutilations or distinguishing marks.

Now under Indiana law there is no problem, apparently, in counting those; those are handled on a case-by-case basis. But they made that kind of across-the-board decision; they would count all the others that had not met the specifics of Indiana law on the way in which they were case, but they would not count those that had the mutilations or the distinguishing marks.

That exception applies to over 24,000 votes in 9 counties. In those counties, the ballots went by more than 1,400 votes for Mr. McIntyre. So one can see just as you work the statistics—and I happen to have some knowledge of the law of probabilities; my wife teaches statistics at the University of Arizona—as you start to play the laws of probability, you are playing a game where you figure out sooner or later your are going to be able to knock off enough votes in that kind of a lead, when you look at those mutilations or distinguishing marks, and you will be able to come out ahead.

Sure enough, they have been able to do it. They have been able to whittle down this lead that ended up at the recount of some 400 votes, by using the House rules, apparently the new election laws of Indiana, or at least the new election laws of the Eighth District of Indiana decided by the House of Representatives task force consisting of two gentlemen from California and one from Missouri who have rewritten the Indiana elections code.

□ 1920

They have written it in such a way and have done everything they could to make sure that the outcome would come out differently, and they still have not been able to get there. They are almost there. It is a dead heat. And maybe on Friday they will be able to figure out some way to make sure that it comes out correctly for them.

One of the ballots that is in dispute, as I understand it—and I do not know that the task force has made a decision on this, but I think it is interesting, the kind of degree to which they are going to go, to which they are going to reach to try to make sure the outcome is the way they want it—in one of the counties of Indiana's Eighth District that is split between the Eighth and the Ninth Districts there is a precinct, I do not know whether it is right on the border or the boundary, but, anyhow, it is one of those counties that is split between two congressional districts, one individual in this country got a ballot, who is in the Eighth District, got a ballot that was from the Ninth District, ended up voting the Ninth District ballot, he was in a precinct that should have had an Eighth District ballot, he voted a straight—he or she, you never know about those things—voted a straight Democractic ticket. Well, the task force, the counters, looked at that, and apparently one of the arguments that is being made by certain staff members of the task force is that, well, clearly, he had intended to vote for Mr. McCloskey because he voted a straight Democratic ticket, and if he had just the opportunity to get the right ballot, he would have done so. Of course the name was not on there. He voted instead, under the law, under the ballot he got, for Mr. Hamilton, but we are going to say he realy intended to vote for Mr. McCloskey.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Let us understand this, We have a ballot where someone voted for Mr. Hamilton——

Mr. KOLBE. And it is going to be counted for Mr. McCloskey, that is correct.

Mr. WALKER. And it is going to be counted for Mr. McCloskey?

Mr. KOLBE. I am not sure that the task force has made a final decision on that, but that is one of the arguments, that is one of the ballots that is being considered.

Mr. WALKER. Someone is seriously contending that a ballot cast for Mr. Hamilton in a totally different district is now going to be counted for Mr. McCloskey in order to help Mr. McCloskey's vote?

Mr. KOLBE. Well, the theory is, you see, that if he had just gotten—if they had not made this error and given him the wrong ballot, he really would have voted for Mr. McCloskey.

Mr. WALKER. But effectively he voted for Mr. Hamilton, and now we are going to count it for Mr. McCloskey?

Mr. KOLBE. Absolutely.

Mr. WALKER. And that is evidently what we mean by counting all of the ballots.

Mr. KOLBE. That is what we mean by counting all of the ballots. We might go out onto the street and find some people who did not get a chance to vote and have an opportunity to ask them.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I am from the Sixth District of Indiana. Does the gentleman think it is possible we could get the recount commissioner to take 10 or 12 of my ballots down to the Eighth District for Mr. McIntyre?

Mr. KOLBE. I would be happy to contribute a few of mine from Arizona.

Mr. WALKER. I would be glad to contribute a few of mine. We could put together quite a package here this evening if that is the way we are going to count around here. That is an interesting new rule that we have written here in the House, that ballots cast for one Member of Congress you can simply transfer over and have them counted for another contested race.

Mr. DORNAN of California. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from California.

Mr. DORNAN of California. California has been so diabolically chopped and carved up that our average win, Republicans and Democrats, our average percentile was a 68 percent victory in all 45 seats. We have so many votes to spare in both parties that we should be allowed to transport just thousands of votes to the Eighth District of Indiana.

Mr. KOLBE. I appreciate the offer of the gentleman from California, and I am sure Mr. McIntyre would, as well.

I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I come from Indiana, and I know of our elective processes there and I know the officials who judged this race, I know our secretary of state, who is a very honorable man, and we kid around about this right now because it is so appalling what is taking place at the hands of the Democrats in taking away this seat from a Republican Congressman—and I call him a Congressman because I think he is and should be—and it is really unfortunate that the elective process in Indiana is being subverted by the Democrats and a precedent is being set that is going to follow elections of this kind probably for the next 20 or 30 years, and I am hopeful that the people of this country realize what is happening right now. A sovereign State is having its election laws overturned and the Congress of the United States, a Democrat

majority, is using a ruse to seat one of its own Members.

Mrs. BENTLEY. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentlewoman from Maryland.

Mrs. BENTLEY. I wanted to ask the gentleman from Indiana, is it not true, though, that the local Democrats, the Democrats from Indiana, in their count, have said that McIntyre was the winner, but it is the Democrats from the House of Representatives who are doing it otherwise?

Mr. BURTON of Indiana. If the gentlewoman will yield for an answer, yes, you are absolutely correct. Sixty percent of the recount commissioners were Democrats. In nine of the counties, the majority of the counties, the recount commissioners were a majority Democrat, and when they threw out the votes, the ballots that were not correct, which gave Mr. McIntyre a 418 win, 93 percent of those ballots thrown out were thrown out by Democrats, and they said Mr. McIntyre was the legitimate winner by I think 418 votes.

Mrs. BENTLEY. I just wanted to clarify that.

Mr. KOLBE. I thank the gentlewoman for her comments, and the gentleman from Indiana as well.

I think it is useful just to go through once again here and summarize some of the points that need to be made about the race in the Eighth District of Indiana. I think again that it is appropriate that we do so now because we are reaching that final stage, that stage where a final decision is going to have to be made by the task force, following that by the Administration Committee, and following that by this body. I think as each of us looks at the record that we will come to a very clear conclusion about the way that this affair has been handled.

Let us take a look at a few of the points, the facts. First of all, I think that we can conclude that this task force recount probably never should have taken place. No one has ever suggested there was any fraud or there was any irregularity or that anything was handled improperly at the time of the November elections. To this day the opponent has not filed any charge under the Federal elections law with the courts, has not suggested that there was any irregularity in the way that the election was handled. And the vote on election night and the vote at the time the recount was undertaken, that the retallying was undertaken and that the certificate was issued, clearly showed Mr. McIntyre the winner. The vote at the end of the recount clearly showed him the winner. There was no reason that this House of Representatives ever needed to undertake its own recount, to substitute its own will for the people of Indiana with regard to how elections should be conducted.

Mrs. BENTLEY. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentlewoman from Maryland.

Mrs. BENTLEY. The gentleman has emphasized that there have been no charges of any fraud, et cetera.

Mr. KOLBE. That is correct.

Mrs. BENTLEY. I want to point out that 6 weeks ago the other party singled me out for a vicious attack, suggesting that I had voted to seat Mr. McIntyre for base motives of racial bias.

I spoke on this floor when a press release was circulated to that effect sent out to all of the media in my district.

I pointed out that this was the standard tactic for people who have need to attempt to steal a congressional seat.

Now, certain facts deserve to be repeated on the eve of the completion of that would-be theft. The loser of that race—and pray to God that he will not be named the winner by his friends—never entered an election contest and never until after this matter got to this body alleged any vote irregularity of any kind.

There was a time limit, as you know, after the election to do that. The reason is quite simple. All the irregularities that he alleged had benefited him. Neither I nor anyone who voted to seat the real winner, the one who was certified by the State, voted to disenfranchise anyone, nor did I vote to deny anyone's voting rights. The Federal court in Indiana never even mentioned such an issue.

What is crystal clear is that the only thing of importance to those who smeared my reputation was to get the seat for the loser. Facts were not important then and they are not important now.

We can be sure that the task force will attempt to baptize a new winner in Indiana's eighth. Then if they do that, I am going to ask: Who will have violated the voting rights of the citizens of that district?

And I think this is a course we must pursue.

I thank the gentleman.

□ 1930

Mr. KOLBE. I thank the gentlewoman for her comments and I was not aware that you had been subject to that kind of attack in your congressional district. I think it is most reprehensible and unfortunate that people, certain individuals feel a need to indulge in that kind of attack on others on the basis of a vote that they cast.

In my view I do not suggest any motives, racial motives on the part of anybody in the votes that they cast on this floor. My view is very clear on this issue. I think they are wrong-headed about the votes that they are casting. I think they are doing so for a partisan, political reason, but not for any other kind of reason. Not for anything that has been suggested in your case.

I yield to the gentleman from North Carolina.

Mr. COBEY. I appreciate the gentleman yielding.

I think it is fitting that I should be here on the eve of the conclusion of this recount and the gentlewoman from Maryland. We all are freshman Congressmen; we all were in close races and this could easily be us involved in a situation like the Indiana eighth just as Rick McIntyre is involved.

There were a lot of close races this year. We were all sworn in on January the 3d except Rick McIntyre. I just have never understood why the House of Representatives Task Force had to go out and conduct this recount. We have already had a count of the votes; a 34-vote victory for Rick McIntyre. He was certified by the Secretary of the State of Indiana just like I was certified by the Secretary of North Carolina. Then there was a recount; he won by 418 votes. We have heard already that nine of these counties were controlled by Democratic boards, and why have we gone through this count?

Yes; I stand behind the House of Representatives' right to go in and investigate this race, but why did we not have an investigation and a determination as to whether a recount or not was needed? There was no alleged irregularities, and yet we have been subjected to this count.

Mr. KOLBE. I would just like to respond, and I will yield further to the gentleman from North Carolina. I think the question is a good one and one that needs to be raised now and on each appropriate opportunity on this floor as to why this is being done. I think the answer is fairly clear. We are going to recount as often as we must; we are going to change the rules in such a way, as often as we must, in order to get the outcome to come out the way that certain individuals, a certain group, the majority in this body, clearly want it to come.

You were not here at the beginning of my remarks, but considering your background I think you would appreciate this particular analogy. I made the analogy of this election to the 1972 Olympic basketball championship, where if you will recall the United States and the Soviet Union fought down to the wire at the end of the time, the United States won by one point.

The East European referee rolled back the clock for 3 seconds; they played the last 3 seconds; they still did not score a basket, so they rolled back the clock again for another 3 seconds.

Sure enough, on the third try, they got a basket in.

The point is, if you play it often enough, the game, the law of statistics says that you will get the team you want to be the winner, and sure enough, if you recount this election often enough, especially if you change the rules as they did in this case, you might as well have taken four of our five basketball team members off the court, if they change the rules enough, sure you can get it so it comes out the way you want it, that is exactly what happened in this case.

I yield further.

Mr. COBEY. I thank the gentleman for yielding. I think we need to continue to reiterate the point, the fact that he was the certified winner by the Secretary of State. I am glad the Governor of Indiana is pursuing this case in the courts on behalf of the people of Indiana. I hope no matter what the outcome is that this case is continued to be pursued in the courts because we are breaking with precedents, 200 years of precedents. This would be a horrible thing to establish that this House of Representatives, after 200 years of always seating the certified candidate or certified winner of a race, to suddenly break with that tradition in an unconstitutional manner and establish a new precedent.

We have to establish that in law that this is wrong and not a right action on the part of the majority party. While we have been going through all these recounts, and I know we are told it will be over tomorrow and that we will consider this matter next week, but we have been promised week after week that this was going to be over. We are now at the 105th day that the people of the 8th District of Indiana have not been represented in this body. They do not have anybody here to vote on critical issues, but they are being taxed; they paid their taxes on April 15. This is the very thing that our Revolutionary War was fought over, the fact that we were taxed without representation.

So we need to get this over with quickly, but we cannot allow this to be forgotten, because we cannot allow this to be repeated again.

Mr. KOLBE. I thank the gentleman from North Carolina and I think you have made two or three points that I would like to emphasize. Certainly that last one I think needs to be emphasized and that is that we should not forget this case. Unfortunately, certainly for a long time to come, we will not be able to forget it because I think it has left an indelible scar on the good will which should mark the conduct of this body. I think that perhaps is the most tragic thing about this case. It need never have happened that way.

You also made a point that I think is a good one, earlier, and that is that there is 200 years of precedent. There are 82 cases that are directly on this point in the way in which the House views an election under these conditions. In each of those cases, in every single one of those cases, the individual that carried the certificate was seated on the floor of the House of Representatives. I say that, make that statement with the full knowledge of the Roush-Chambers case in Indiana 25 years ago, where the individual who came with, there were two individuals, each with a certificate, one from the Governor, a dispute over that. In that case, no one was seated, but there was not a clear indication of who had the legitimate certificate. So I think it is absolutely accurate to say in every single case that the individual who has won an election, has brought the certificate and has come to this body with that certificate, that individual has been seated.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding. I think we do need to make the point that on several occasions we have heard the Democrats parade out onto the floor a series of precedent cases that they said are precedents that say that what the gentleman has just stated would be absolutely wrong, that they have got all kinds of precedents of people who were not seated.

The point being that every one of those previous cases involved fraud of some kind. No one, no one, has said that there is fraud involved in this election. If they have got proof that there is fraud involved in this election, they should have brought it out a long time ago. The fact is that they do not have anything of that kind. So those precedents are meaningless. The only precedent that they have that has any smidgeon of a precedent is the Rouse-Chambers case, which the gentleman just discussed, and the Rouse-Chambers case, as the gentleman said, you had two certificates that were involved.

So it is a totally absurd precedent for this case too. But to have them come to the floor from time to time and try to mislead the American people on the basis that this is not the only case, that there have been previous cases before, that fact is that when you look back at all those precedents they have cited, there is fraud involved, that somebody came to Congress, for instance, carrying a fraudulent certificate. Well, obviously we are not going to seat someone who has a fraudulent certificate; maybe one he printed up in his own basement. That is obviously not a case where we are going to seat someone.

But those are not precedent cases for what is happening in Indiana, this is a case of just raw power of the majority, a dictatorship of the majority denying the seat to a certificated Member of Congress from his home State.

□ 1940

This is the first time in history that that has ever happened, the first time in history that the House has abrogated to itself the authority to deny a certificated Member from a State his rightful seat in this body. It is one of the most horrendous examples of this House exercising its dictatorial power rather than being a democratic body that it was intended to be under our Constitution.

Mr. KOLBE. I thank the gentleman from Pennsylvania, and you have hit on a point that I think is very important. There is a very clear reason why so many of us in this body are very concerned about the precedent that is being established in this case. It is not simply the issue of Mr. McIntyre versus Mr. McCloskey or 1 out of 435 races in congressional districts in the United States, as important that it is.

It is the question of the abuse of power by the majority, the abuse of power which would allow that party to say, "Although there is no precedent for doing so, we will not seat an individual who carries a certificate of election," an abuse of power that makes each of us, I think, certainly those of us in the minority, and in my opinion it ought to apply just as well to those in the majority, be concerned with the fact that one party, one group, can abuse its power in such a way as to deny a seat to an individual who wins an election and is certified and comes to this body to be seated.

We should be concerned about that. All of us who believe in the rights of the minority, all of us who believe in the democratic process in this country, should be very concerned that that can take place. If today it is Mr. McIntyre, tomorrow who will it be? Which Member of this body will be the next target in the next election?

Mr. BARTON of Texas. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Texas.

Mr. BARTON of Texas. I thank the gentleman for yielding.

Mr. Speaker, I have missed part of the debate this evening, so excuse me if I cover old ground, but it is my understanding that the latest count that we have is that Mr. McCloskey is ahead by 1 vote. I guess we all come to this body as U.S. Representatives and we obviously want to uphold the Constitution, and nobody questions the fact that the House is going to be the sole judge of who it shall seat, but I think there are some very legitimate questions that can be raised about the validity of this latest recount.

No. 1, insofar as I can tell from research, the counting rules used in the

recount have never been used in any election before. They did not use the State election code of Indiana nor any other State or Federal election code. They basically, on a 2-to-1 vote, decided to count every conceivable ballot that could be called a ballot except those that had distinguishing marks.

Mr. KOLBE. That is correct.

Mr. BARTON of Texas. You mentioned the basketball scenario. To me, that is a scenario where the leaders in the majority party have decided that the only chance they have to win, they could not win the original election, which Mr. McIntyre won by 34 votes, they could not win under the election code of Indiana, which Mr. McIntyre won by 418 votes, the only possible chance they had to win was to come up with a set of rules that had never been used before, and using their own set of rules, they have now managed to strain mightily and possibly eke out a one-vote victory.

If I were an American citizen who was not a Member of this body, I would have some real questions about the validity of seating a Member of the U.S. Congress using recount rules that had never been used before, that had not ballot security provisions. As I understand it, even in this recount, Mr. McIntyre at one point had a one- or two-vote victory and they went back into another county and disqualified one or two votes that had been given to Mr. McIntyre. "So we are going to play until we win, and we will change the rules in the middle of the game if we need to, or at the end of the game, or we will start a whole new ball game."

I just have some real personal concerns about the mentality that can justify that type of a procedure. Of course, the procedure was agreed to in the task force by a 2-to-1 vote, the majority voted for it and the minority member voted against it, but I just have a real concern about that and I am at a loss to determine what to do to rectify that.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. KOLBE. Yes, I yield to the gentleman from Pennsylvania, and when he finishes I would like to pursue this matter of the counting rules because they are very interesting, the rules that were adopted.

Mr. WALKER. If the gentleman would yield, I just wanted to tell the gentleman from Texas, he was not on the floor when we had a discussion here a little while ago, we think there is a possibility, the gentleman will be pleased to know this, knowing of his concern, we think there is a possibility that the one vote we are now referring to was not a vote cast for Mr. McCloskey but was a vote cast for Mr. HAMILTON, but what they have now done, according to the gentleman from Arizona, is that they have now taken this ballot—and there is a possibility of this, so we are not certain—at least a recommendation was made that this ballot be counted, that they have taken a ballot that was cast in another congressional district for Mr. HAMILTON and decided that that was really a ballot that they meant to cast for Mr. McCloskey, and that that, in fact, has become a vote in the process.

The gentleman must find, as we did, it absolutely amazing that we have now developed counting rules in the House of Representatives that take a ballot cast for one Member of Congress and transfer it over and have it counted for another Member of Congress in a totally different district. You have to be really fascinated by counting rules that have gotten us to this point that the Democrats put in place by a 2-to-1 vote.

Mr. BARTON of Texas. If the gentleman will yield, is it also a fact, or at least it is my understanding, that there are now more votes in some of the counties than there are registered voters, or than voters that signed the poll list?

Mr. KOLBE. The gentleman from Texas is absolutely correct. That is correct. They decided to count all the ghost voters where the number of votes exceed the number of people that signed the vote register. It is possible one can make an argument that somebody did not sign the register and there were 40 people who signed the register but 41 people came in to vote and one failed to sign. So they have made a decision to count all of those ballots.

What is interesting is the ones they have decided not to count.

Mr. WALKER. If the gentleman will yield further, what we are saying is we now have also more ballots counted than we had voters in the district in some of these places under the counting rules we have adopted?

Mr. KOLBE. As I understand it, it is not more than voters, but more than voters who signed the register as having voted on that day. That is correct.

Mr. WALKER. But the reason why they signed the register is to make certain that that person was actually there to cast that vote. Is that not right? That is a fraud protection.

Mr. KOLBE. That is a fraud protection and there are more ballots cast than there are signatures.

Mr. WALKER. And we now have, under the counting procedures that we adopted in the House, a system that allows more ballots to be counted than people signed up who came to the polls that day?

Mr. KOLBE. That is, as I understand it, correct.

Mr. WALKER. And we are also counting ballots from totally different congressional districts in this process.

Mr. KOLBE. Yes; the ballot clearly is not from the Eighth Congressional District. It apparently was cast inside the Eighth District but it was a ballot from the Ninth District.

Mr. WALKER. Those sure are interesting rules. When we really count all the ballots around here, we really count all the ballots, do we not?

Mr. BURTON of Indiana. Mr. Speaker, if the gentleman will yield, I have but one question, and that is, you alluded not so much to the ballots that they added that should not have been counted, but some that they disallowed. I am kind of curious about those.

What ballots did they not allow? It sounded earlier like they counted everything and more, and now you are telling us that they disallowed some ballots, and I would like to know what those were and under what conditions they disallowed them.

Mr. KOLBE. There were some very large exceptions to the ballots that were not counted.

Mr. BURTON of Indiana. No doubt those would have favored Mr. McIntyre.

Mr. KOLBE. That is correct. Those were in the counties where there was a 1,400-vote margin for Mr. McIntyre, and as I said earlier, if you play the law of statistics, eventually you are going to come out with your side winning.

Mr. WALKER. If the gentleman will yield further, I just want to follow up here.

Did we have any of these counties where they counted more people or any of these precincts where they counted more people than there were actual people who signed up and came to the polls? Were any of those Mr. McIntyre's areas?

Mr. KOLBE. There is no evidence yet that the dairy cows and hogs have yet been counted, but we clearly have more votes being counted than people signed the register on that election day.

Mr. WALKER. But did those tend to be in Mr. McCloskey's areas where we are counting more people than there were actually people signed up?

Mr. KOLBE. I honestly do not know the answer to that.

Mr. WALKER. But what we do know is where they threw out ballots and said that these were not going to be counted, those just happened to be in Mr. McIntyre's areas?

Mr. KOLBE. That is correct.

Mr. WALKER. That is an interesting process.

Mr. KOLBE. Here are the rules adopted by the task force on the Eighth District for counting. Here are some of the rules for the ballots that they will count.

Rule No. 1. Count an otherwise valid paper (regular) ballot that was not initialed by the poll clerks.

□ 1950

Indiana law says it has to be initialed to be a valid vote, but they will count those.

No. 2. "Count an otherwise valid paper absentee ballot not properly initialed by poll clerks." So they will count that.

"3. Count an otherwise valid punchcard (regular) ballot not properly initialed by poll clerks." So they will count those even though the Indiana law says that should not be counted.

"4. Count an otherwise valid punchcard absentee ballot not properly initialed by poll clerks." So they are going to count these.

"5. Count an otherwise valid paper ballot without precinct designation." That also, under the Indiana law, has to be included on there.

"6. Count an otherwise valid punchcard ballot without precinct designation," and so on, and so on.

Now, let us get on to what they decided they would not count.

No. 12: "Distinguishing marks on paper ballot.

"Do not count a ballot which contains any distinguishing marks.

"A distinguishing mark is any marking on the ballot (such as a name, initial, erasure, number, or special symbol), other than the intended voting mark which appears to have been placed there by the voter in order to identify that ballot as the one cast by that particular voter.

"A distinguishing mark is something done to the ballot by the voter for the purpose of indicating who cast it, thereby evading the law insuring the secrecy of the vote."

So if you put your initial on it, you do not get counted. On the other hand, if the poll worker did not put his initials on it, it does get counted. I am seeing a little inconsistency here.

I go on with a reading of the particular rule that the task force came up with:

"A distinguishing mark must change the condition of the ballot, in a manner other than allowed by law, from its condition when the ballot was handed to the voter."

But apparently, concluding it from that particular rule there, you do count a ballot that was not marked as the law in Indiana said that it had to be marked by the poll clerk, properly initialed by the poll clerk, with the proper precinct designation on it.

It is a very interesting set of rules they came up with to count these ballots. I think it is very interesting that in the process, with the statistical numbers working in their favor, they still at the end of the day are in a dead heat, with one vote separating the two of them. One would think, with all this talent working out there, they certainly would have been able to get a few dozen votes for their candidate to win by.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. KOLBE. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Speaker, it is kind of interesting to me that this procedure is taking place at all. There were no allegations of fraud. Mr. McIntyre won the first count, the original count, by 30-some votes. The recount was taking place under the laws of the State of Indiana that we have had for some time, and the majority of the recount commissioners were of the opposite party, Democrats. They threw out most of the votes that were disallowed in those counties. I think 93 percent of the votes that were thrown out were thrown out by Democrat recount commissioners, and after all that, Mr. McIntyre won by 418 votes. Yet they have gone through this procedure. It is just unbelievable.

Mr. KOLBE. Mr. Speaker, I thank the gentleman from Indiana, and I appreciate the opportunity to discuss this issue.

The SPEAKER pro tempore. The time of the gentleman from Arizona [Mr. KOLBE] has expired.

THE COMMUNIST MILITARY BUILDUP IN CENTRAL AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. BURTON] is recognized for 60 minutes.

Mr. BURTON of Indiana. Mr. Speaker, I do not think we will take the whole 60 minutes, but I would like to discuss a little bit more in depth the problems in Central America.

Last week I was down in Central America. I flew into Guatemala City on Easter Sunday. Then 2 days later we went into El Salvador, and subsequently we went into Nicaragua.

One of the things that was most intriguing to me was, when I went into El Salvador and took a helicopter out in Chalatenango Province, I met with a Colonel Acholla, and Colonel Acholla showed us a recently captured cache of Communist weapons that was sent to that country obviously from the Communist bloc.

Many of my colleagues in the House have indicated that there is no evidence that the Communist Sandinista government in Nicaragua is exporting revolution to El Salvador and elsewhere into Central America. I saw with my own eyes Communist weapons in El Salvador, and I would like to tell the Members what those weapons are doing. They are trying to undermine the duly elected Government of El Salvador.

I went into a little village in Chalatenango Province, and a lady came out to visit us, a little lady whose husband had been maimed about 3 weeks or 4 weeks before that. Her husband ran a little jitney service in between two towns. They do not have a whole lot of bus service down there because the economy does not warrant it or will not support a bus line, and this little jitney service he ran consisted of one small used truck, and into that truck he would put as many people as he could possibly put to transfer back and forth.

The day before the Salvadoran elections. Mr. Speaker, he had 18 people in that truck, and in between two of those towns a manually operated landmine was detonated under that truck. it was a Communist landmine supplied through Nicaragua or Cuba because it could not have just grown out of the ground. When that landmine detonated, it destroyed that truck, and along with it, it killed 7 people, 2 of them babies, and injured 11 more, including the driver, the husband of this lady who talked to us.

We asked her about that, and she said it was the Communist guerrillas being supplied by either Cuba or Nicaragua with Soviet-bloc military supplies.

We talked with the leaders of that country, and we then went into El Salvador, Mr. Speaker. We went to Managua, and I was very appalled at what I saw there. We went into the hotel in Managua, the biggest hotel in that city, and immediately after walking through that lobby, we found nothing in that lobby of a literary nature except the works of Karl Marx, Communist dogma. That is all they had in the lobby, at the bookstand, or in the cigarette area where they sell cigarettes, candy, and so forth.

In that lobby were Internationalistas, Communist sympathizers who have come from the United States and around the world to support the Communist Sandinista government.

We met during that trip with educators, with priests, with nuns, with business leaders, and with members of the Government and former members of the Government, and with the exception of the leaders of the Communist Nicaraguan Government, every single person with whom I talked said that if aid to the Contras, the freedom fighters in Nicaragua, is cut off, the Communists will solidify their position, the repressions will increase, and they will be exporting revolution throughout Central America.

That borders upon endangering the security of the United States of America. If that revolution expands beyond the borders of Nicaragua, we all know there will be literally millions of refugees fleeing Central America and coming through Mexico and into Texas and the United States. This will

result in hardship on the American economy.

Can we imagine what it would be like, Mr. Speaker, if we had 10 million to 20 million refugees in this country, trying to house them, feed them, educate them, and clothe them? And, of course, they will be wanting jobs, and they will be willing to work for $1 or $2 or $3 an hour, much less than what Americans are being paid. And that, in my opinion, Mr. Speaker, will lead to massive unemployment, unemployment of Americans, and it is not necessary.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BURTON of Indiana. I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Is it not true that after all of the Indochina refugees have come to this country—and we all know that because the left failed us in Southeast Asia and, therefore, created a situation that resulted in a massive refugee migration into this country from there—all told, that has equaled about 500,000 people who have come to this country as a result of that migration?

And is it not true that we already have about 590,000 people who have come out of the situation in Central America as a result of the Communist guerrillas' activities in El Salvador, as a result of what is happening in Nicaragua, and that we already have a migration into this country from Central America greater than all that that has taken place so far from Indochina?

Mr. BURTON of Indiana. Yes, I believe the gentleman is accurate. And in addition to that, there has been a migration of people out of the Communist Nicaraguan area into Costa Rica. They believe they have between 20,000 and 100,000 there. They are not sure exactly how many because they cannot keep track of them, but they know they have at least 20,000 in Costa Rica.

They have refugees in Honduras, in Guatemala, and in El Salvador trying to flee the repression that has been created in Communist Nicaragua.

□ 2000

If that revolution is exported, as Thomas Borja and Daniel Ortega and Umberto Ortega have said that it is going to be, if that spreads throughout Central America they will have no place to go but to the United States of America.

Mr. WALKER. Mr. Speaker, if the gentleman will yield further, I think it is important to note that the Indochina refugees who were here are here legally. They have been legally admitted so that we have brought them in through the regular processes of the country, which means that we have processed them in through our economy.

The 590,000 I am referring to, which I believe is an accurate figure, are here illegally, which means that they represent a major problem to this country, as the gentleman has pointed out, economically and also represent a major problem to the entire immigration process, the legal process that we have in this country, so that the threat the gentleman refers to later on is indeed a very powerful threat, because we are already seeing elements of it happening and it could become an even more intense problem if as the gentleman points out the Nicaraguan Communists begin to spread their revolution throughout Central America.

I thank the gentleman for yielding.

Mr. BURTON of Indiana. Well, that is absolutely correct. The problem is much greater than that. Those people do not want to come to the United States of America. They want to stay in their homeland. That is where they were born. That is where they were raised. That is where their roots are.

But in addition to that, the United States of America, in my opinion, will not be able to stand idly by and let all this occur. At some point we are going to have to protect our southern border. We have 1,980 miles of border between the United States and Mexico. I call it the soft underbelly of America. We cannot leave that exposed to communism. At some point we are going to have to provide a defense perimeter someplace either down in Mexico or south of Mexico to protect our southern flank. That is going to cost not $14 million, which is what the Contras want right now to protect themselves and to protect freedoms and get their country back, which has been kidnaped by the Communists, but it will cost us much, much more. It will cost us billions of dollars and American lives as well, because we will have to provide manpower to protect our southern flank.

Now, people say in this body that that is not likely to occur, but these people down there really do not want to export that revolution. Thomas Borja in numerous speeches has said they want a revolution without borders. In a 1983 Playboy interview when he was asked a question about Jean Kirkpatrick when he said that the Communist Sandinista government wants to expand their revolution into El Salvador, then Guatemala, or Honduras and then into Guatemala, and ultimately into Mexico, he said that is one prophecy, Mr. Borja said, that is one prophecy of Ronald Reagan's that is absolutely correct.

Now, many of my colleagues say, we will just wait them out. That revolution cannot last. We said that about Cuba 25 years ago and now it is a bastion of Soviet and Communist strength in the Caribbean. They have Mig-23 fighter bombers. When John F. Kennedy was President he imposed what was called the Kennedy Doctrine. You will recall, Mr. Speaker, he turned the Soviet ships around and sent them back when they were bringing missiles to Cuba during the Cuban missile crisis. He not only sent those missiles back, but he demanded that Soviet troops be taken out of Cuba and all offensive weapons and there would be no Communist expansionism into our hemisphere beyond Cuba.

Today, Mr. Speaker, Cuba has Mig-23 fighter bombers. They have thousands of Soviet troops down there, 9,000 to be exact, and they are an armed camp. So anybody who believes that the menace will go away simply because we are going to outwait them is sorely mistaken.

I want to cite as an example one of the things that they are teaching their children in school to perpetuate the revolution beyond just this generation. I received while I was in Managua, Nicaragua, last week a copy of a school text. I wish everybody in America could see this. This text is on mathematics, mathematica. On about the second, third, or fourth page, it shows them how to add, three machineguns plus three machineguns equals six machineguns. Two handgrenades plus two handgrenades plus two handgrenades equals six handgrenades. They are indoctrinating the youth of that country just like they are in Cuba with a revolutionary philosophy.

The storybook problems in this mathematics text also talk about the revolution.

I also received an English book for the first, second, third, and fourth graders. In that all they talk about is the revolution, the Communist revolution and how they must support it. They are indoctrinating these young people so that they will be militarists throughout their lifetimes, but they are still having trouble getting young people to join the military.

I have heard my colleagues on the other side say that the Contras, the freedom fighters, are repressive, that they are perpetrating atrocities on the people of Nicaragua. The fact of the matter is they are not kidnaping people to come into their army. The people are going to them and joining voluntarily because they are tired of the repression that is being perpetrated upon them by the Communists; but just the opposite is true as far as the Communist military is concerned in Nicaragua. It is not uncommon to see them going down the streets and chasing a young 13-, 14-, or 15-year-old person and forcing them into a truck and forcing them into the military.

They are trying to get an additional 30,000 young people into the military this year, even though they already have an armed militia, an army total-

ing 120,000 people, which is twice what all the other countries of Central America combined have.

Mr. Speaker, this is really intolerable. They are telling us exactly what they plan to do and we are not doing anything about it.

While I was down there, I found out that they had just arrested five mothers, the Communist Sandinista government had arrested five mothers and put them in prison because they were trying to keep their little kids from being inducted into the military, forced into the Communist Sandinista army. They had a bunch of mothers whose boys had been forced into the Communist Sandinista army, 700 of them in fact, that were in Managua and a bunch of mothers came to see their boys. Hundreds of mothers came to see their children and they would not let them see them. The mothers pushed against the gates so hard that the gate gave way and the guards that were guarding that gate were supposed to stop the mothers from getting in and they had orders to stop them in any way they could.

The 700 boys left. The mothers left and the guards left with them because they did not have the heart to shoot them and they knew that there would be reprisals because they did not stop those mothers from getting in there. That is the kind of government that is being perpetrated upon those people, forced upon those people in Nicaragua right now.

Mr. Speaker, there is so much more that is going to come out during this debate. I just hope the American people have the opportunity to hear all of it. The repression is great.

The Catholic priests, the 10 Catholic priests that were forced out of the country, one Catholic priest because he would not adopt the Communist line in his homilies was forced to walk down the streets of his parish naked before his parishoners to embarrass him. That is unbelievable.

The Pope when he went there, they would not let the people come out to see him. Every country where the Pope went—I am not Catholic, but I believe in religious freedom—every country where the Pope appeared, there were thousands and thousands of people along the streets to cheer him, but when he went into Managua, I have a tape from down there, a movie tape, which shows that they kept the people back from the streets from seeing the Pope.

When he went to give his homily in the square, they had Sandinista troops ringing the square. When the Pope started to speak, they interrupted the speech. They took control of the microphones. They had microphones underneath the stand and they started screaming Soviet Communist slogans into those microphones, drowning out the Pope.

This is all documented. The religious persecution that has been taking place is unbelievable. I talked to one of the leaders of the 950 Catholic priests and nun organization down there, and he said that the repression is unbelievable.

I asked him as well as I asked everybody else, what will happen if there is no organized resistance to the Communist government in this country?

He said, along with everyone I talked to, the repression will increase. The censorship will increase and many people are going to lose their lives.

The Communists will consolidate their position within that country and the revolution will be exported into El Salvador, into Honduras, into Guatemala, and ultimately into Mexico.

Mr. Speaker, nothing has been more clear to me since I came to the Congress of the United States and I believe that most of my colleagues who have been down there share my view. I think a blind person could go down there and see what is going on.

Mr. Speaker, next week on Tuesday we are going to cast one of the most important votes this Congress will ever cast in our lifetimes. If we do not vote to support the freedom fighters who are fighting for their liberties and their freedoms, who are fighting to get their country back, we are going to make a terrible, terrible mistake, that is going to be carried on by the future generations of America.

I have a 10-year-old son, Danny Lee Burton II. I want that boy to have the very best, everything that we have been able to have in America. I certainly do not want him to go to fight in an unnecessary war in some place that I do not want him to be; but, Mr. Speaker, I truly believe in my heart of hearts that if we do not allow the people of Nicaragua to regain control of their country, if we do not allow the freedom fighters the ability to fight for their own country, that at some point in the future, in the not too distant future, we will have American boys down in Central America fighting unnecessarily. God forbid that my boy will be one of them.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BURTON of Indiana. I would be happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding, because he made a point here a minute ago that I think is an important point.

A lot of our colleagues on the other side of the aisle, some of our liberal friends, have been down in Nicaragua recently. They have come back and they would not necessarily share the gentleman's viewpoint. What they had to say is somewhat different from what the gentleman has said; but almost invariably now when they are coming to the floor they are saying things like, "Well, I'm not for the Sandinistas. I think what they are doing down there is very bad, that there is indeed repression there."

So to confirm what the gentleman just said, nearly everybody who goes down there does see very clearly what is going on and nearly everybody, even though they do not share his and my viewpoint about the situation, will say that the Sandinistas are pretty bad, that what we are doing is pretty bad down there.

□ 2010

And one of the things that I think is important to understand is that if you really think that, and if you really went to Nicaragua and saw it, and I have not been there, but the gentleman I think has given us a very clear report of what he saw, but if, as some of our liberal friends are saying, that they have been there and they have seen how bad it is, we need to understand the context in which we will be voting on this matter next week.

There is a pro-Sandinista vote and an anti-Sandinista vote that is going to be cast here. There is a pro-Communist vote and an anti-Communist vote as it relates to the situation in Nicaragua that is going to be cast here. That is the context in which we are going to be voting and if in fact what the Sandinista Communists are doing in Nicaragua is as horrible as virtually everybody coming back reports, I do not understand how anyone could cast a vote that will give aid and comfort to that government. It is very difficult for me to understand how anybody understanding what they are doing to their own people, and what kind of a Communist dictatorship they are installing in Nicaragua, how anyone understanding that could cast a vote that will give aid and comfort to that government is beyond me.

So I think what the gentleman has said here this evening is extremely important because he has made every cogent points based upon his own experience, but I think has reflected very clearly that many of our colleagues who do not necessarily share his viewpoint are also telling us something very important in a totally different way when they come out here and admit that they do not think the Sandinistas are a very good government for the Nicaraguan people. What they ought to do is take that one step further and say that no one ought to be voting for something that will give them the kind of support that they are looking for in the U.S. Congress.

I thank the gentleman.

Mr. BURTON of Indiana. I thank the gentleman for his comments.

I would just like to end up by saying that Daniel Ortega in an interview with JIM SENSENBRENNER of this body, the gentleman from Wisconsin [Mr.

SENSENBRENNER] and another individual who went with me to Central America, said, when asked about a revolution without borders, that that was what he had said in the past, and a revolution without borders means a revolution that encompasses all of Central America.

The security of the United States of America will undoubtedly be threatened if this prophecy of Mr. Ortega comes true, and we will be involved in a military conflict that is unnecessary. And if the future generations of this country will be threatened, their security will be threatened, and their freedom will be threatened.

You know for over 200 years we have always had a strong defense, we have always had a policy of defending our hemisphere. We had the Kennedy Doctrine and we had the Monroe Doctrine, and those doctrines have gone out the window. And I sincerely hope and pray that my colleagues, before next Tuesday, will see the light so that the kids of today will not have to be the soldiers of tomorrow.

Mr. Speaker, I yield back the balance of my time.

AMERICAN POLICY TOWARD NICARAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. RITTER] is recognized for 60 minutes.

Mr. RITTER. Mr. Speaker, the vote coming up on Tuesday next is not only crucial to the future of this country, as we have heard here so eloquently stated just a moment ago by my colleague from Indiana, but it is crucial to the Democratic Party. It is a major test of the stated aims of the Democratic Party to move back into the center, to move back into the mainstream of American politics. It gives the Democratic Party a chance for the first time in national policy since the nomination of George McGovern, a chance to throw off those chains which have grown stronger and stronger since that election debacle in 1972.

We have heard a lot about moving back to the center from leading Democrats. Particularly we have heard a lot from Democratic Governors in the South, in the Southwest, and in the West. These are regional politicians who are listening closely to the voices of their constituents.

Mr. Speaker, I would like to present to my colleagues, to the American people, a series of arguments as to what indeed the main criticisms of our policy in Nicaragua are, and to provide a counter to those criticisms which I believe should and can be embraced by center leaning moderate Democrats in this body.

It has been very fashionable, perhaps even obligatory for the critics of the administration's Nicaraguan policy to proffer certain statements as if they were axiomatic to the truth, and this is being done in the face of overwhelming historical, intellectual and yes, even moral evidence to the contrary. And when not excusing they seem intent on rationalizing the behavior of the Sandinistas.

I would like to provide some examples. There is the criticism that the Sandinistas are not Communists. Critics argue that the regime is not Communist totalitarian, and they point to a token newpaper that is allowed to continue to publish, albeit in the face of massive censorship. They point to an existence of a continuing repressed, indeed, small business community. They point to some unions and some independent agriculture. They underline continuing political opposition, although that opposition, as evidenced by the recent election, has now mobilized itself against the Sandinista regime and joined, for all intents and purposes, with the Contras.

They talk about visits of church and other groups invited to see for themselves in Nicaragua as evidence that this is not a Communist totalitarian regime. What is missed, what is completely missed is the game that is being played by the Sandinista Communists with world opinion and with U.S. opinion.

By keeping alive a token press, a token small business, a token labor union, a token political opposition, the Sandinista Communists win points within world and U.S. opinion that prevents them from losing foreign credits, that prevents them from losing whatever trade they have retained. It also confuses world opinion and deters any cohesive diplomatic or military action against it.

Like all Communist rhetoric, the Sandinista Communist rhetoric has clearly spelled out the goals. Yet many people and organizations refuse to take this rhetoric at face value.

Let me just quote somewhat from a selection of statements defining the nature of the Sandinistas.

□ 2020

In a speech before the Sandinista armed forces, Humberto Ortega, the Sandinista Minister of Defense, is quoted as saying:

Marxism-Leninism is the scientific doctrine that guides our revolution, the instrument of analysis of our vanguard to understand the historical process and to create revolution. Marxism-Leninism and Sandinismo are indissolubly united and because of that our moral strength is Sandinismo and our doctrine is that of Marxism-Leninism.

Hugo Torres, a member of the general staff of the Sandinista Popular Army, on April 23, 1982, is quoted as saying:

The principles of Marxism-Leninism wisely applied to the reality of our society guided the revolutionary actions of the FSLN over the dictatorship.

Victor Tirado Lopez is quoted by Jeane Kirkpatrick in a Reader's Digest article of July 1983, stating "that Marxism-Leninism is a fundamental part of the Sandinista ideology." That is Victor Tirado Lopez, a junta member of the FSLN.

"Ortega will appear to push democracy," that is in reference to President Ortega. "This has fooled some international circles. I do not believe there are divergencies in the national directorate of the Sandinista Party. Some want to go faster, some slower, but the goal is the same, a tropicalized Marxism-Leninist Party." Luis Rivas-Leiva, head of the Social Democratic Party, that is one of the opposition parties, quoted in the Washington Times of February 25, 1985.

"The Sandinistas are determined to impose a controlled system. Their final goal is implantation of a Communist totalitarian regime." Jaime Chamorro, coeditor of La Prensa in the Washington Times, February 25, 1985.

I would like to just present a few elements of the connection with the Soviet military establishment that the Sandinistas enjoy. For one, there are an estimated 10,000 Soviet, Cuban, East German, North Korean, Vietnamese, Czech, Bulgarian, Libyan, and Palestinian forces in Nicaragua. This is what former Ambassasdor to the United Nations, Jeane Kirkpatrick, calls the Soviet international fighting force.

The Soviet Union recently supplied Nicaragua with 110 medium battle tanks, 30 light amphibious tanks, 200 armored personnel carriers, 70 long-range artillery pieces and nearly 500 rocket launchers, howitzers, and anti-aircraft guns. These are State Department figures quoted in the New York Times of February 9, 1985.

As of February 1985, total equipment, including 200 armored vehicles, 150 tanks, and 44 helicopters, including some 6 to 8 MI-24 Hind Ds helicopters, these are the same infamous weapons that are being used against the Afghani freedom fighters in far away Afghanistan by their Soviet invaders.

The Sandinistas are building the largest airport in Latin America at Punta Huete with Soviet assistance. It will be capable of handling any size Soviet aircraft. (See Washington Post, August 17, 1984.)

I think there is no doubt that the Nicaraguans have received chemical warfare equipment, that is the opinion of Caspar Weinberger, our Secretary of Defense. All of this, of course, comes directly from the Soviet Union.

From 1962 to 1982 the Soviet Union provided $4 billion in military assistance to Latin America. For the same

period the United States supplied $1.5 billion.

I think this is an indication that what we are talking about is a Soviet base on the mainland of the Western Hemisphere, a Soviet base on the land bridge between North and South America.

I would like to talk a little bit about the kind of indoctrination techniques that the Sandinista Communists have used quite similar to that which we have seen in Cuba and in other Soviet bloc states.

The Sandinistas have created Cuban and Soviet style mass organizations designed to indoctrinate and control the people at all levels of society. Their organizations have adopted the structures, the rhetoric and methods of their Cuban and Soviet models. One of the most repressive instruments of control is the Sandinista defense committees, [CDS] which are neighborhood committees organized to spy on neighbors.

Tomas Borge, the Minister of Interior, has called the some 10,000 CDS's, the eyes and ears of the revolution. This is taken from "Broken Promises, Sandinista Repression of Human Rights in Nicaragua," State Department document, October 1984.

I would like to talk a little bit about how the Sandinistas have treated the labor movement. Again, quite similar to that of other Communist governments where they have been established.

The AFL-CIO has stated that the Sandinistas have "established a dictatorship that all but destroyed the right to strike, to organize, or to bargain collectively without interference." Taken from the AFL-CIO Free Trade Union News, March 1984.

"Upon coming to power the FSLN immediately began its campaign to destroy the two democratic trade union centers of Nicaragua, the Confederation de Unificacion Sindical [CUS] and the Central de Tradbajadores de Nicaragus [CTN]." Taken from AFL-CIO, Free Trade Union News, March 1984.

Within hours of taking control the Sandinista leadership formed the Central Sandinista de Tradbajadores [CST], that is the central workers organization, and insisted that all unions should belong to one trade union central.

When the two democratic unions centrals declined, the FSLN embarked on a unification plan that violated every concept of human and trade union rights. Taken again from the AFL-CIO Free Trade Union News, March 1984.

Comparing Nicaragua with Poland one Nicaraguan labor leader said: "We are both small countries and have suffered many invasions. We both experience long lines and scarcity while many of our products are shipped off to the Soviet bloc. We are Catholic countries with close ties between the unions and the church. We live under regimes where citizens can be jailed at will. And both governments brand independent trade unions, 'anti-socialist agents of imperialism.'" Sam Leiken, Labor Under Seige, the New Republic, October 8, 1984.

I would like to go to my conclusion on this point.

If it looks like a duck, if it walks like a duck, if it quacks like a duck, it must be a duck.

What we are seeing is Nicaraguan communism moving to solidify its gains. Let us call it that. Let us no longer dilude ourselves that this is some kind of reform movement in transition. Let us understand the nature of what we are dealing with here.

□ 2030

When it comes to a vote next Tuesday, let the leadership of the Democratic Party in this House know that they will be pulling the rug under opposition forces to this Communist totalitarian movement, to this group of individuals who seeks to establish a Soviet base directly south of the borders of the United States of America.

It is somewhat inconvenient for the Sandinistas to have to put up with a trade union here and a La Prensa newspaper there, and a bishop who doesn't support them. And that slows them down in their transition to a fully totalitarian Communist state.

Let us look at what really slows them down: What is really slowing down this transition is the rebellion of the Nicaraguan people who dislike what they perceive as this inexorable movement to totalitarian Communist government.

That slowing down, that prevention of the solidification of Marxist-Leninist rule, that is the essential achievement of the Contra war against the Sandinistas. The Sandinistas feel obliged to show the world they are really not what they are. So that the world will not support the cause of the Contras.

Opponents of assistance to the Contras, and this includes many of my colleagues on the Democratic side of the aisle, must ask themselves: What happens when the Contras disappear, or are forced to dissolve? Given the likes of the Sandinista rulers, the incentive to keep these annoying vestiges of a free society disappear. They disappear with the disappearance of the Contras.

With solidified power, which, let us face it, is what the world at large really respects, what Sandinista ruler would be concerned about any remaining critical world opinion at that point. Dictators like Libya's Mu'ammar Qadhafi, certainly do not care about world opinion, and dictators like Fidel Castro have even managed to use world opinion to their own advantage.

Can anyone imagine Interior Minister Tomas Borge seeking to mollify foreign public opinion or seeking to mollify the Organization of American States? I think not. I think it is an unimaginable possibility.

Another criticism that we hear from our Democratic colleagues, particularly those who have gone to Nicaragua and those who have seen the true colors of the Sandinista Communist regime, is that, well, they may be better than the Sandinistas, but they cannot win.

Critics argue that the Contras cannot win. But we have to ask, what is winning in a guerrilla war? Certainly it is not the great battle that decides, but it is a test of wills which continues on over the years. The critics, do these same critics except that somehow the Afghans, in their guerrilla war, will triumph over the invading Soviet Union? Yet many Nicaragua policy critics in Congress support the Afghan Freedom Fighters.

Will Son Sann's non-Communist opposition in Cambodia actually defeat the Soviet-backed Vietnamese occupation army? Of course not. But a number of critics support them, too. The nature of guerrilla war is not to win the big battle in the great big conflagration; no. The nature of guerrilla war is to make the opponent sick and tired of fighting and sick and tired of expending resources.

The Contra struggle, likewise, must be viewed over the longer range with the goal of encouraging the Soviets and the Cubans to pull out. Is not that what happened to us in Vietnam? Did the Vietcong and North Vietnamese infiltrators, did they defeat the United States main forces on the battlefield? No. No. But they made life miserable enough over the years that the majority in the American Congress eventually pulled the plug on funding that war.

Maybe, just maybe with will and determination and perseverance, that can happen in terms of the Soviets and the Cubans funding the Sandinista government in Nicaragua.

Then there is a very interesting other criticism. It is the criticism that by aiding the Contras, this will eventually lead to the use of American troops. But the critics themselves, in saying that the use of American troops might be necessary there, if a major Soviet base of operations threatening the United States would emerge, those critics are the ones really risking the use of American troops.

Why? Because a new Soviet-backed Cuba on the mainland base of operations is indeed emerging. Just look at the airfields. Just look at the barracks. Look at the training grounds.

The only effective way to discourage or deflect that emergence now, without American troops, is by Contra resistance. Once the Soviet-Cuban base is established, it is too late. It is too late for limited action. Then only American troops would suffice.

I think we have to ask the Democratic leadership and the critics in the Democratic Party whether they are prepared to risk the Nicaraguan equivalent of an American blockade or invasion of Cuba. Is that what they are telling the American people?

At that point, the cost of American lives and the cost to American treasure, dwarfs anything imaginable growing out of our extremely limited support for the Contras.

I would like to put in a word about the level of that support. We are talking about $14 million; a fraction of the cost of one F-15. We spend nearly $300 billion on our defense to ward off the Soviet threat, to deter the Soviet threat, and at the same time critics on the other side of the aisle, the Democratic leadership making this a litmus test vote of Democratic allegiance, are saying that this $14 million is a waste, when it is supporting people who are willing to fight for their own freedom.

Another interesting criticism that we continue to hear is the Contras are not worth supporting because the Contras are Somozistas. Critics are arguing, I think somewhat less forcefully these days, that Contras are the heirs to the Somoza regime; they are former Somoza national guardsmen. But it is getting harder and harder these days to brand people like Eden Pastora, the head of the ARDE alliance fighting in southern Nicaragua. It is getting harder to brand the Miskito Indians fighting to save their own culture and heritage and tradition. It is getting harder to brand Alfonso Robello, a former member of the Sandinista junta, and Adolfo Calero, head of the FDN, who was imprisoned by the Sandinistas, along with Arturo Cruz, the former Sandinista Ambassador to the United States and a leading political opponent inside Nicaragua until recently when he joined philosophical ranks with the Contras. It is getting harder and harder to brand these individuals as Somozistas.

□ 2040

What is ironic is that many of the critics during the Vietnam war characterized the Vietcong as peoples revolutionaries, they characterized the North Vietnamese as nationalists. Could we not expect the same dispensation from today's critics of the Contras, to give them credit for being nationalists, for being democratic, when indeed—and this irony is even greater—they are fighting for democratic principles to topple a totalitarian Marxist government, and at the same time the guerrillas in Vietnam and the North Vietnamese infiltrators were fighting to install what we see today as a Communist totalitarian government?

From all that has been said in numerous press conferences and all that has been published in position papers, the Contras profess to be democrats, democrats, democrats—that's "democrats" with a small "d." They are simply asking the Sandinistas to live up to their promises to the Organization of American States, really to the Nicaraguan people. Meanwhile, while the Contras are talking like democrats across the spectrum of their organizations, the Sandinista rulers continue to talk like Soviet-Cuban allied Communist dictators. Branding the Contras "Somocistas" is name calling, it seeks to hide the embarrassing truths that the Contra leaders are seeking democratic pluralistic government, and it is pretty uncomfortable for the critics not to support their cause. It helps to cloud the issue by essentially calling them Fascists. It clouds the issue, it denigrates their cause by calling these anti-Communists Fascists. It is an old trick.

I would like to present a few facts about the Contra opposition forces which I think are important. Let us talk about, overall, the alliance that has recently been formed amongst various opposition groups to the Sandinista Communists. Several goups of the armed and unarmed opposition met in San Jose, Costa Rica, and formed a coalition called the Nicaraguan Resistance. On March 2, 1985, they issued a document calling for a national dialog with the Sandinistas under the sponsorship of the Nicaraguan Bishops Conference. In addition to the dialog, they called for a ceasefire in place, lifting the state of emergency, amnesty for some 3,500 political prisoners, granting the rights of habeas corpus and asylum, a guarantee for protection for participants in the dialog.

There is an interesting point here. Unlike the Salvadoran Communist guerrillas, they did not ask for power sharing, they are simply asking for democratic processes in their society. The national resistance offered to recognize Daniel Ortega as President pending a plebiscite. They called for the presence of guarantors from other Central American countries to oversee the proposed dialog and invited other interested nations and groups to send observers. That sounds to me like people interested in democracy.

The opposition seeks only the right to participate in a free and open election and does not demand in advance, as did the Salvadoran leftist guerrillas, a place in the government.

Within the recently formed Nicaraguan Resistance are the Nicaraguan Democratic Force, or FDN, the Democratic Revolutionary Alliance, or ARDE, the MISURA (Miskito, Sumo, and Rama), as well as smaller or lesser known groups. MISURASATA (Sumo, Rama, and Sandinista Unity), the Frente Revolucionario Sandino (Sandino Revolutionary Front, or FRS), and others, although not signatories of the San Jose document, are also fighting to force the Sandinistas to return to the original goals of the anti-Somoza revolution.

The FDN has been branded as Somocista.

Let me say a little bit about the FDN. The FDN's policymaking Directorate, recognized in 1983, is composed of six persons. Five are civilians who were long-time opponents of Somoza. The other member is a former national guard colonel, Enrique Bermudez, who heads the military general staff. The Directorate is responsible for making and carrying out all FDN policy.

Early on, Bermudez was never recognized by the Sandinista government as being part and parcel of the dictatorial Somoza policies.

The FDN reports that its overall military leadership, including the general staff and regional and task force commanders, has a greater number of former Sandinistas than national guardsmen.

One has to ask, too, how many former national guardsmen are officers in the Sandinistas. I do not think we will get those figures.

The composition of the FDN military leadership is as follows: Former Sandinistas, 43 percent; former national guardsmen, 32 percent; campesinos, small farmers, 19 percent; and other, 6 percent.

Of the 56 regional and task force commanders in the FDN responsible for day-to-day operations, the FDN reports that 27 were former Sandinistas, 13 were national guardsmen, none above the rank of lieutenant, and 12 were farmers. The remainder include a medical doctor, an evangelical minister, a fourth year university student, and a civilian radio technician. The overwhelming number of the reported 15,000 FDN troops are peasants, workers, shopkeepers, businessmen, and others with no previous ties to Somoza.

It is a smokescreen to brand the Contras Somocistas.

Let us talk about ARDE and current groups in the Robelo-led ARDE coalition. They are the Nicaraguan democratic movement, or Movimiento Democratico Nicaraguense.

The MDN is a social-democratic party founded in 1978. It drew its support from lower and middle-class Nicaraguans, including many peasants, and it played an active role in the revolution which overthrew Somoza. Its leader, Alfonso Robelo, was an original member of the ruling Sandinista

junta. He resigned in protest over Sandinista efforts to create a Communist state. Subjected to extraordinary harassment by the Sandinistas, Robelo went into exile in Costa Rica in 1982.

There is another ARDE, headed up by former No. 1 commandante, or I should say Commandante Zero, Commander Zero, Eden Pastora, the democratic revolutionary alliance, also termed ARDE. The Costa Rica-based ARDE is a coalition of organizations created in 1982 by individuals who were active during the revolution, including many who were initially officials in the Sandinista government. From its beginning its leaders sought to restore the original course of the revolution through political means. In the spring of 1983, after peaceful efforts proved futile, ARDE began military operations in southern Nicaragua. There have been internal disagreements among various ARDE leaders. In 1984 Eden Pastora, leader of the military arm, was expelled by other members of the ARDE coalition, the one I just described, led by Alphonso Robelo. There continues to be a dispute over which faction can legitimately claim the ARDE name, with both sides doing so. Pastora has retained the loyalty of most ARDE troops and continues military operations in southern Nicaragua. And this refers to the political head of ARDE, Alphonso Robelo was a principal organizer of the Nicaraguan resistance.

MISURA is an armed group that evolved out of the Atlantic Coast Indian organization ALPROMISO, founded in 1973 with the help of Protestant churches in the region, and its successor group, MISURASATA. Former supporters of the Sandinista revolution, Miskito Indians Wycliffe Diego and Steadman Fagoth, founded MISURA in 1983. Its military operations are carried out in northeastern Nicaragua.

The Nicaraguan Democratic Solidarity, or STDN. STDN was founded in 1983 by two Nicaraguan labor leaders who had been forced into exile as a result of Sandinista persecution of the independent labor movement in Nicaragua. The founders had long been opponents of Somoza. One of them, Zacarias Hernandez, was a signer of the Nicaraguan resistance document.

□ 2050

I can go on and on; I could talk about the biographic sketches of key members of the opposition. Adolpho Calero, once imprisoned by Somoza, commander-in-chief of the FDN. I can talk about Arturo Cruz; I mentioned that he was a former Ambassador to the United States from the Sandinista government who resigned in opposition.

You can go on and on, and I think the point is made that it is not possible, it is not possible to honestly brand the Contra resistance, Somocistas. I would hope that as we further debate this issue toward the vote next Tuesday, we cease this name calling, this smokescreen because it is simply not factual. Because it simply does not hold water.

There seems to be an overriding reality with our competition with the Soviet Union, and this overriding reality has occurred over the last decade, particularly over the last 5 years. Wars of national liberation are now being fought against Communist, totalitarian regimes, whose power can only be supported by Soviet bloc arms, economic assistance and personnel. How long would the regime in Angola last without thousands of Cuban troops propping it up? How long would it last against UNITA led by Jonas Savimbe without Cuban troops propping it up. Of course, the Cuban troops receive their logistics, their arms from the Soviet Union.

How long would the Mengistu regime last against the Eritrean resistance without thousands of Cuban troops and vast amounts of Soviet hardware. Wars of national liberation are now being fought against Communist, totalitarian regimes whose power base can only be supported by Soviet bloc arms, economic assistance and personnel. It is an important point; it is worth repeating, because it is one of the major new trends of our time.

The conflict in Nicaragua is no different. What I would hope is that my colleagues on the Democratic side of the aisle understand the context of that war fought by democratic forces against a Communist totalitarian power right south of the United States border.

It is a conflict being waged in a tradition similar to that in Afghanistan, Angola, Cambodia, and Ethiopia. People are seeking freedom from Communist totalitarian rule by taking up arms against their oppressors. It is so important for my Democratic colleagues to realize that our failure to assist this trend obviates our need for example, for massive military hardware such as MX or B-1 or Starwars or fleets of fighter planes and tanks, no less large-scale, conventional armies.

If we cannot protect our back door right here at home, how can we justify these costly defenses to protect far away front lines from sophisticated technologies and major armies. This challenge right south of the border of the United States, brings very close the trend toward revolutions against Communist totalitarian regimes. How can we fail to support those challenging Communists directly south of our border?

How can my colleagues justify supporting Afghan freedom fighters halfway around the world? Cambodian freedom fighters half-way around the world, when we cannot support freedom fighters right next door? That is the question I leave with my Democratic colleagues. I would like their answer to that question.

GENERAL LEAVE

Mr. RITTER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Massachusetts [Mr. FRANK].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

FEDERAL INSURANCE OF ACCOUNTS—A HALF CENTURY OF SAFETY FOR DEPOSITORS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island [Mr. ST GERMAIN] is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, almost 100 percent of the banks and savings institutions in the United States proudly display an official Federal seal on their premises. We've become so accustomed to seeing it over the past half century that most of us no longer notice it. As a matter of fact, that seal has been so effective in accomplishing the purpose for which the Federal agencies it represents were created that many have forgotten why it was considered necessary in the first place.

Congress established the Federal Savings and Loan Insurance Corporation and the Federal Deposit Insurance Corporation in the darkest days of the worst economic crisis every to beset our country. Our country then—in the thirties—was in deep economic depression, wracked with joblessness, with hunger and homelessness on a scale unrivaled in American history. Confidence in America's ability to right itself was eroding rapidly. It bottomed when frantic citizens lost faith and trust in their financial institutions. There were runs on banks. Bank failures were so widespread it appeared our entire system of depository institutions would come crashing down.

It was at that point a wise and concerned Congress rewrote the laws under which our depository institutions operated. These laws continue to form the basic framework of our financial system. One key to the continuing success of our depository system was the establishment of a Federal deposit insurance system—a system designed to assure depositors their Federal Government stands 100

percent behind their dollars on deposits up to the present limit of $100,000.

The FSLIC and the FDIC, authorized as they are to call upon the U.S. Treasury for assistance if needed, have consistently made good on their commitments to depositors.

Congress recently reiterated the intent of the insurance funds' creators by adopting a resolution stating that the full faith and credit of the U.S. Government stands behind the deposits in federally insured institutions up to $100,000 per account.

The stability of our financial system is the envy of the world. We have the FSLIC and the FDIC to thank for that, because for over half a century depositors have had their deposits secured by Federal deposit insurance.

As the chairman of the House Committee on Banking, Finance and Urban Affairs in which the Federal deposit insurance funds had their legislative origins, I am gratified that this system has inspired the confidence and good will of millions upon millions of account holders.

I shall do all in my power to assure that this confidence continues.●

WHY SUPPORT THE NICARAGUAN FREEDOM FIGHTERS?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. STRATTON] is recognized for 5 minutes.

● Mr. STRATTON. Mr. Speaker, last night at the Capital Hilton Hotel, the friends and admirers of America's U.N. Ambassador, Jeane J. Kirkpatrick, joined to honor her for her long and distinguished career at the United Nations, and to express their appreciation for Dr. Kirkpatrick's unique capability of expressing views on complex foreign policy issues in straight-forward, down-to-Earth, sensible terms.

The more than 700 persons who filled the hotel's ballroom applauded as Ambassador Kirkpatrick was presented with plaques and other expressions of appreciation by 15 outstanding organizations, not only in this country but also in Nicaragua. The dinner was coordinated by the American Security Council for the coalition for peace through strength.

The Ambassador responded by speaking on the No. 1 political issue of the day—"Why Support the Nicaraguan Freedom Fighters?"

Since this is an issue which every Member of the House will be called upon to vote next week, I believe a careful reading of Dr. Kirkpatrick's eloquent and moving address should be mandatory for every Member before casting his or her vote on this issue of vital importance to the entire Western Hemisphere.

The address follows:

SALUTE TO AMBASSADOR JEANE J. KIRKPATRICK, APRIL 16, 1985, CAPITAL HILTON HOTEL, WASHINGTON, DC

Ambassador KIRKPATRICK: Thank you John; thank you Adolfo; thank you Bill; thank you Ed; thank you Frank; thank you everybody. I thank all of you. I was concerned about Don Hodel (phonetic). Did he ever get to sit down? Okay.

This is obviously a very pleasant evening. I see a great many friends. I see a few whom I have spent a lot of time with at the United Nations like Andy Ireland and Sam Stratton. I always feel like giving them awards, let me say. Any Congressional member who came to the U.N. and really stayed around and helped us do a job won my very special gratitude.

While I am saying "thank you", I want to say "thank you" to my friend Cap Weinberger, very particularly, for his generous words about me tonight, but also especially in this assembly, Peace Through Strength. Thinking of that theme, I want to thank Cap Weinberger for his most extraordinary contributions to restoring this nation to its strength so that we can in fact seek Peace Through Strength.

I think that John Fisher has his upon an extraordinary way to keep everybody within their time limits because obviously we don't get any dinner until we stop talking. So, I am going to skip the first four pages of my prepared remarks, mainly, but not entirely.

I do want to say what I take to be the principal function of our foreign policy. I take that to be defending our own nation and its democratic institutions against external attack or subversion; defending our allies against external attack or subversion, and preserving our civilization, the kind of world in which we can live and thrive and enjoy our lives; a world of independent nations with whom we can trade, among whom we can travel; nations which will not pursue aggressive expansionist policies and destroy the peace of their neighbors.

I take it to be a purpose of our foreign policy to promote democratic institutions and human rights and economic development everywhere. I take it to be a function of our foreign policy as well to manage our foreign relations in such a way that they do not consume too large a share of our resources, time, effort, and money. I think those are the things that President Reagan has, in fact, been trying to do and I think it's the thing that Cap and a great many of us who are here, in the Congress as well as the Administration have tried to do.

I think no place have we tried to work towards these goals more persistently than in Central America. Now, it's never useful to over simplify and we need to recognize that there are various kinds of obstacles to the achievement of our goals. There are stubborn problems of climate and culture and politics, history, mutual insecurity and animosities, and deep set rivalries, and they often stand in the way of achieving our goals. The fact is that we also need to recognize that the principal obstacle to our security and also to our helping preserving and enjoying our civilization and our world is unfortunately, the expansionist policies of the Soviet Union.

I believe that there were two principal dimensions to the so-called "Changed Correlation of World Forces" that we heard so much about in the period before 1981. The "Changed Correlation of World Forces", I think consisted of two parts; the growth of Soviet military power, and the concomitant decline in the military strength of the West, and the dramatic expansion of Soviet influence outside Europe and North America.

We all know the development of Soviet military power is important. It permitted an extraordianry buildup in the Pacific, created new vulnerabilities in Europe, created new vulnerabilities here at home. We also know in principal that we can deal with that by restoring our own military establishment, and also by trying to get a handle on the Arms Race through verifiable agreements arrived at in Arms Control Negotiations.

The fact is that we don't even have an adequate theory of how to deal with Soviet expansion outside Europe and North America. In just 20 years the Soviet Union progressed from being a continental power in Europe to becoming a global power, acquiring bases and surrogates you all know, in Cuba, Vietnam, Ethiopia, Angola, South Yemen, Nicaragua, Afghanistan, expanding its military reach to the vicinity of such strategic checkpoints as the Panama Canal, Straits of Gibraltar, the Suez Canal, Straits of Hormus, the entrance to the Red Sea, and the Indian Ocean, the sea lanes of East Asia, and so forth, Cam Rahn Bay.

In the same period, the number of Soviet and block troops in non-Soviet non-Warsaw Pact countries increased more than 500 percent. From that point of view, that period between 1975 and 1980 was a period of great success.

We need to be clear about what they mean by "success" in thinking about the Third World and in thinking about the countries outside North America and Europe. What they mean is the incorporation of a country into the world socialist system, or at least a reliable beginning in the process of incorporating a country into the world socialist system.

Their view of success is very different than our view. Our view of success is, in fact, to help a country preserve its independence. We have succeeded when a country avoids incorporation and maintains its independence.

It's an interesting difference in what happens to countries where they succeed and where we succeed. Where they succeed, the country is incorporated into a global military mutual-aid society, in which armaments and services from all the member states of the Soviet empire are drawn and brought to bear on unfortunate targeted countries.

From our point of view, when we succeed, the country that is successful may not make any contribution at all to collective enterprise. It may not extend any basing rights, for example, for collective purposes. It may not help its neighbors maintain their independence. So be it. That's our kind of success. We are not seeking to build an empire. We are not seeking client states. We do seek a world of independent nations.

The only problem is that the expansion of Soviet power and the incorporation of ever larger numbers of nations into the world socialist system is dangerous for us and for other independent nations.

I might note that this incorporation usually takes place incrementally; one slice at a time, like salami tactics applied to international politics.

The process of incorporation into the world socialist system was described in the Granada Documents, which I'm sure many here have read. The stages in this process are not complete until full military integration of a country into the world socialist system has been achieved. It had not yet

been achieved in Granada. It has been achieved in Cuba. Cuba integration into the Soviet Military System is symbolized by the presence in Cuba of some Soviet personnel. For example, some seven thousand civilian advisors; some 2800 in that famous combat brigade; some seven—I'm sorry. Some 2800 military advisors, plus about 2,000 special Soviet personnel who are manning an electronic intelligence facility that monitors our electronic communications here in the United States.

Cuba, of course, provides bases that extend the reach of Soviet naval and air power and electronic surveillance over our coastal waters and our coast. Cuba provides advisors and troops for Nicaragua, Angola, Ethiopia, Mozambique, Conga, South Yemen. Cuba provides manpower and planning for the drug and terror network that reaps chaos in Latin America and mightly affects our own country.

Nicaragua has been partially, but not wholly incorporated into the Soviet military world system. Nicaragua provides training, arms for guerillas from a dozen countries. Nicaragua provides a home, refuge, sanctuary, for the international terrorist network. Indeed, its capital has become Managua where one finds Bader Manhof (phonetic) remnants, Red Brigades, Basque, ETA Members, Argentine Monteros and ERP, Peruvian Sendero-Leminoso (phonetic), and Marta El Salvadoran FMLN, of course, Guerillas from all over the world meet there with their PLO mentors and exchange notes and train one another. Of course, with a little help from the Libyans.

One of the consequences of this steady flow of services and manpower to the—to Nicaragua, and from Nicaragua to other countries in Central America and South America is the kind of tragedy I visited in El Salvador last weekend, when I visited the hamlet—It's not even, really a village, where the massacre of the previous days had taken place. Where some 19 Salvadorans had been dragged from their beds and killed in cold blood. I say the style in which seven men had been shot, and one had his head crushed. I was with our Ambassador who picked up a shell casing which bears on it a Number "10", which I am told is a definitive marking of such casings of Bulgarian make.

Where do the bullets in El Salvador's hamlets come from? They come from Bulgaria. Where do the bullets used against Nicaragua's own democrats and Freedom Fighters come from? Well, they come from Bulgaria too, and of course from Vietnam, and from East Germany and Czechoslovakia, and from the Soviet Union. The struggle that is underway today in Central America has very special significance for us, and I presume everyone here understands that.

True, we live in a big inter-dependent world, and events in very remote places can have a large impact on us. A coup in Sudan, a civil war in Angola, a Vietnamese offensive in Cambodia, a conversation between Chinese and Soviets, a struggle in New Caladonia, a Presidential election in Greece, a massacre in El Salvador, may have all of them important effects on our well being and our national security, but not all situations in all places are equally important to us. Not all deserve the same attention from our Government, and not all decisions of our Government deserve the same attention from American citizens.

In thinking about foreign policy and national security, one must begin with geography, because in foreign affairs, geography is destiny. In thinking about foreign policy, one must end with ideals of one's civilization, because they provide the—literally, the spiritual food and intellectual food off which we live.

Developments in Nicaragua matter more to us than developments in many other countries, because Nicaragua is at the center of the isthmus that stretches south to Panama, north to Mexico. Those countries constitute our fourth border, and that gives Central America and the Caribbean an irreducible strategic importance for us.

Now, we're not accustomed to thinking strategically and we're not accustomed to thinking about any potential vulnerabilities that we may have. The Soviets are. They began thinking as early as 1967 about the strategic vulnerabilities for the United States that could be created if they could threaten our security on our southern border.

Nicaragua can constitute a security problem for the United States of major proportions. Not because they establish a socialist economic system, though we regret that and we know it will fail; not because they create a repressive new military dictatorship under which the people of Nicaragua suffer, though we regret that very deeply, and we think the people of Nicaragua deserve better; not because they expose ideas we find obnoxious and untrue, though we regret that too. Nicaragua constitutes a security problem actual and potential, especially for the United States because it is being very rapidly integrated into the socialist military world system. It is advanced into the process of incorporation into that Soviet world system.

Today, everyone who cares to know, knows that Nicaragua, whose Government began as a broad based coalition with important democratic presence, is today wholly controlled by communist leaders and that situation came into being because the Marxist guerrillas had a monopoly of weapons.

Everyone who cares to know, knows that the Nicaraguan Junta Representatives went soon after they achieved power to Moscow, where they were greeted by General Secretary Chunyeko and Foreign Minister Gromeyko (phonetic), where they signed a party to party agreement, among other things, approving the Soviet invasion of Afghanistan.

Everyone who cares to know, knows today that the Government of Nicaragua is sustained by Cuba, whose advisors started arriving in days after the victory, and it is sustained by the famous Internationalistas from all over the Soviet block.

Everyone who cares to know, knows that today in Nicaragua the Government is repressive, the economy is in shambles, and hope flies with the domocratic resistance forces.

You know, sometimes we like to console ourselves with believing that things are not as bad as some people say and that afterall, the Sandinistas might turn out to have a falling out with Cuba and the Soviet Union, and Cuba might turn out to have a falling out with the Soviet Union, and that if only we were more obliging or understanding than we are, there would be nothing to worry about, and we could all live happily together in this hemisphere forever after.

I think of that perspective because just before I came here tonight I missed the reception because I was appearing on McNeil-Larrel (phonetic) where I encountered some people who seemed to have that view. Just before that, I was testifying before the House Sub-Committee on Foreign Affairs on this subject where I met some people who seemed to have that view. You know, the kind of people that tells us that we drove Fidel Castro into the hands of the Soviet Union even though Fidel Castro himself tells us that he had been an apprentice Marxist-Leninist for years before he came to power and had disguised his true beliefs.

What can the United States do in this situation? I think we can help Nicaragua's Freedom Fighters, that's what we can do. We should assist Nicaragua's Freedom Fighters, because it helps Nicaraguans and it helps the Nicaraguan Freedom Fighters themselves, who are not only decent and upright, but a very impressive group of democrats working now for democracy in their country as each of them has worked for democracy for Nicaragua for years in the past.

We can help them because they are good men whom we should be proud to help. We can help them because it helps the region, and we can help them because it helps us.

Will Congress permit the President to provide the 14 Million Dollars of assistance to the Nicaraguan Forces fighting against the consolidation of a communist government in their own country? That is the question which is confronting the Congress and this country today. I believe that the answer to that question, given by the Congress, will effect the fate of Nicaragua; effect the stability of Nicaragua's democratic neighbors; Costa Rica, El Salvador, Honduras. It will effect the evolution of other countries in the region, including Guatemala, Panama, Mexico. It will effect the security of the United States, the cost of our defenses, the strength or our alliances for many years to come.

Above all, I believe the decision to be made by the Congress will seriously effect the possibilities for peace in the next decade.

You know, very often in human affairs, peoples intentions lead them to actions which defeat their intentions. The problem with the kind of self-defeating appeasement that is, in my opinion, involved in a refusal to support Nicaragua's resistance forces is that it doesn't work.

I was reading recently an old book of Walter Lipman, when he was talking about the period before World War II, and he said in that book, and I quote, "The Surrender of the Rhineland in 1936; of Austria and Czechoslovakia in 1938, were the strategic preliminaries to the neutralization of Russia and the conquest of Poland in 1939; that is what was surrendered by our allies in the name of peace became the strategic foundation upon which Hitler prosecuted his war." Thus, do the best intentions of flawed policy makers sometimes go astray.

You know, mistakes when individuals make them are always regrettable and sometimes they are serious, but the mistakes of Goverment are more serious than the mistakes of individuals. If I make a mistake it involves only me and my family, probably, and maybe a friend or two. When Governments make mistakes, whole societies suffer. Often those mistakes are honest, but the costs are no less high because of the honesty and good intentions of those who make the mistakes.

Some people say we should not support Nicaragua's Freedom Fighters because we should leave the problems of Central America to the Central Americans and the problems of Nicaragua to the Nicaraguans. My response to that is that we would like nothing better than to leave the problems of Nicaragua to the Nicaraguans. Exactly the

point is that Nicaragua's fate is not being left to the Nicaraguans. It is being determined by people and guns from very remote places, by heavy armaments, major weapons systems from Eastern Europe and by Guerrillas and Internationalistas from every terrorist nation in the world.

Colonel Cadaffy has mentioned that he would send his troops to fight in Nicaragua. As I understand it, he's been helping the Nicaraguans for quite a long time, so there will be nothing new about that.

I would like to say in closing that today the United States Congress authorizes more than—and appropriates and provides, more than 15 Billion Dollars of economic and military assistance to nations and groups in the world. That's a lot of money, 15 Billion Dollars.

We provide some millions of dollars to freedom fighters fighting in remote parts of the world. Now, I support most of that foreign economic and military assistance and I support certainly all that assistance to freedom fighters in remote places, but I should like to say that it makes no sense at all, moral or political, or intellectual, or strategic sense, to refuse to provide help for the Nicaraguan Freedom Fighters today.

Let me just say that the most terrible mistake that we could make would be to conclude that the struggle in Nicaragua does not concern us, or that the Nicaraguans are in some sense not ready for democracy. The fact is that their struggle is our struggle, and their freedom and our freedom are indivisible, and if we do not understand that now in time to help Nicaraguans to help themselves and stand with those who stand for freedom in that country, we will, I am afraid, learn that lesson under much more painful circumstances not too far in the future.

Thank you.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. GINGRICH) to revise and extend his remarks and include extraneous material:)

Mr. EDWARDS of Oklahoma, for 60 minutes, May 14.

(The following Members (at the request of Mr. WALKER) to revise and extend their remarks and include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, today.

Mr. DORNAN of California, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, April 22.

Mr. GINGRICH, for 60 minutes, April 23.

Mr. GINGRICH, for 60 minutes, April 24.

Mr. GINGRICH, for 60 minutes, April 25.

Mr. RITTER, for 60 minutes, today.

Mr. GALLO, for 5 minutes, today.

Mr. WALKER, for 60 minutes, today.

Mr. WALKER, for 60 minutes, April 18.

(The following Members (at the request of Mr. HERTEL of Michigan) to revise and extend their remarks and include extraneous material:)

Mr. HAYES, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. FAZIO, for 5 minutes, today.

Mr. KLECZKA, for 5 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, April 18.

Mr. SOLARZ, for 60 minutes, April 18.

Mr. ROWLAND of Georgia, for 60 minutes, April 23.

(The following Members (at the request of Mr. RITTER) to revise and extend their remarks and include extraneous material:)

Mr. ST GERMAIN, for 5 minutes, today.

Mr. STRATTON, for 5 minutes, today.

Mr. RICHARDSON, for 60 minutes, April 25.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WALKER) and to include extraneous matter:)

Mr. COURTER in two instances.

Mr. MORRISON of Washington.

Mr. MOORHEAD.

Mr. FIELDS in four instances.

Mr. EDWARDS of Oklahoma.

Mr. GREEN.

Mr. BROOMFIELD.

Mr. OXLEY.

Mr. CLINGER.

Mr. LEWIS of California.

(The following Members (at the request of Mr. HERTEL of Michigan) and to include extraneous matter:)

Mr. FOWLER.

Mr. BENNETT.

Mr. ENGLISH.

Mr. BERMAN.

Mrs. SCHROEDER.

Mr. LELAND.

Mr. MAVROULES.

Mr. BRUCE.

Mr. FAZIO.

Mr. EDWARDS of California.

Mr. GUARINI.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 15. Joint resolution to designate May 7, 1985, as "Helsinki Human Rights Day."

ADJOURNMENT

Mr. RITTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 58 minutes p.m.) the House adjourned until tomorrow, Thursday, April 18, 1985, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1054. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 6-17, "Interest Rate Ceiling Amendment Clarification Act of 1985," and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

1055. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Government Operations.

1056. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the refugee assistance authorities of the Immigration and Nationality Act and for other purposes; to the Committee on the Judiciary.

1057. A letter from the Administrator, Agency for International Development and the President/Chairman of the Export-Import Bank of the United States, transmitting a semiannual report on the amount and extension of credits under the Trade Credit Insurance Program [TCIP]; jointly, to the Committees on Banking, Finance and Urban Affairs and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. Report on unnecessary firing of tactical missiles demands DOD's attention (Rept. No. 99-45). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on the impact of the budget process on offices of inspector general (Rept. No. 99-46). Referred to the Committee of the Whole House on the State of the Union.

SUBSEQUENT ACTION ON A REPORTED BILL

Under clause 5 of rule X the following action was taken by the Speaker:

The Committee of the Whole House on the State of the Union discharged, and referred to the Committee on Public Works and Transportation for period ending not later than May 2, 1985, for consideration of such provisions of the bill (H.R. 1931) and

amendment as fall within the jurisdiction of that committee under clause 1(p), rule X.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MICA (for himself, Mr. FASCELL, Mr. KOSTMAYER, Mr. SMITH of Florida, Mr. WEISS, Mr. MACKAY, Mr. FEIGHAN, Mr. BROOMFIELD, Ms. SNOWE, and Mr. GILMAN):

H.R. 2068. A bill to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the U.S. Information Agency, the Board of International Broadcasting, and for other purposes; to the Committee on Foreign Affairs.

By Mr. MATSUI (for himself, Mr. JACOBS, Mr. FORD of Tennessee, Mr. JENKINS, Mr. HEFTEL of Hawaii, Mr. ANTHONY, Mr. FLIPPO, Mrs. KENNELLY, and Mr. CAMPBELL):

H.R. 2069. A bill to amend the Internal Revenue Code of 1954 to make permanent the rules relating to imputed interest and assumption of loans, and for other purposes; to the Committee on Ways and Means.

By Mr. PANETTA (for himself and Mr. GRADISON):

H.R. 2070. A bill to amend title XVIII of the Social Security Act to extend hospice benefits under the Medicare Program for an additional 3 years; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 2071. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income amounts which are received from a public retirement system and which are attributable to services as a Federal, State, or local policeman or fireman; to the Committee on Ways and Means.

H.R. 2072. A bill to amend the Internal Revenue Code of 1954 to exclude $2,000 from the gross income of auxiliary policemen and volunteer firemen; to the Committee on Ways and Means.

H.R. 2073. A bill to amend the Internal Revenue Code of 1954 to lower the limitation on defined benefit plan established for policemen and firemen; to the Committee on Ways and Means.

H.R. 2074. A bill to establish a national lottery to reduce the Federal deficit; to the Committee on Ways and Means.

By Mr. DE LA GARZA

H.R. 2075. A bill to make permanent the free rate of customs duty on fresh cantaloupes imported at certain times, and for other purposes; to the Committee on Ways and Means.

By Mr. DIOGUARDI (for himself, Mr. GINGRICH, and Mr. RALPH M. HALL):

H.R. 2076. A bill to require the Secretary of Health and Human Services to prepare a report on the health effects of cocaine use; to the Committee on Energy and Commerce.

By Mr. ENGLISH:

H.R. 2077. A bill to provide for wheat loan, export marketing certificate, export differential payment, and acreage limitation programs, to authorize an agricultural export subsidy program under certain conditions, and for other purposes; jointly, to the Committees on Agriculture and Foreign Affairs.

By Mr. FIELDS:

H.R. 2078. A bill to amend the Internal Revenue Code of 1954 to provide that the use of certain transferable passes for air transportation service by an individual who is not an employee of any trade or business providing such service shall be treated as use by an employee for purposes of the fringe benefit exclusion; to the Committee on Ways and Means.

By Mr. FRENZEL:

H.R. 2079. A bill to amend the Internal Revenue Code of 1954 to provide certain individuals living abroad an exclusion for income from sources within foreign countries; to the Committee on Ways and Means.

By Mr. LELAND (for himself, Mr. CONTE, Mr. DORGAN of North Dakota, Mr. DIXON, Mr. JEFFORDS, Mrs. SCHNEIDER, Mrs. BURTON of California, Mr. LOWRY of Washington, and Mr. WEISS):

H.R. 2080. A bill to provide funds for food assistance and African agricultural development; jointly, to the Committees on Foreign Affairs and Appropriations.

By Mr. FRENZEL:

H.R. 2081. A bill to amend the Internal Revenue Code of 1954 with respect to the definition of political contribution; to the Committee on Ways and Means.

H.R. 2082. A bill to amend the Internal Revenue Code of 1954 to exempt from tax gain the sale of an individual's principal residence; to the Committee on Ways and Means.

H.R. 2083. A bill to amend the Internal Revenue Code of 1954 relating to group-term life insurance purchased for employees; to the Committee on Ways and Means.

H.R. 2084. A bill to amend the Internal Revenue code of 1954 to provide that the amount of the charitable deduction allowable for expenses incurred in the operation of a motor vehicle will be determined in the same manner Government employees determine reimbursement for use of their vehicles on Government business; to the Committee on Ways and Means.

H.R. 2085. A bill to amend the Internal Revenue Code of 1954 relating to the tax-exempt interest on certain governmental obligations; to the Committee on Ways and Means.

H.R. 2086. A bill to extend the Internal Revenue Code of 1954 to make certain changes in the tax treatment of private foundations; to the Committee on Ways and Means.

H.R. 2087. A bill to amend to Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to provide for the treatment of trucking industry plans under rules governing multiemployer plans and to make certain other improvements in such rules; jointly, to the Committees on Ways and Means and Education and Labor.

By Mr. HERTEL of Michigan:

H.R. 2088. A bill to provide for coordinated management and rehabilitation of the Great Lakes and for other purposes; jointly, to the Committees on Science and Technology and Merchant Marine and Fisheries.

By Mr. HOWARD (by request):

H.R. 2089. A bill to amend the Federal Aviation Act of 1958 to advance the scheduled termination date of the Essential Air Service Program, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 2090. A bill to review and extend certain provisions of the Federal Water Pollution Control Act, as amended, for 5 years, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. HOWARD (for himself and Mr. SNYDER) (by request):

H.R. 2091. A bill to amend and extend title I of the Marine Protection, Research, and Sanctuaries Act, as amended, for 2 years; to the Committee on Merchant Marine and Fisheries.

By Mr. HOWARD (for himself, Mr. SNYDER, Mr. ANDERSON, Mr. SHUSTER, Mr. SHARP, and Mr. DANNEMEYER) (by request):

H.R. 2092. A bill to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1986 and 1987, and for other purposes; jointly, to the Committees on Energy and Commerce and Public Works and Tansportation.

By Mr. KANJORSKI (for himself and Mr. KOSTMAYER):

H.R. 2093. A bill to recognize the organization known as Veterans of the Vietnam War, Inc.; to the Committee on the Judiciary.

By Mr. LUJAN:

H.R. 2094. A bill to prohibit the purchase of nondomestic uranium by Federal agencies and for other purposes; jointly, to the Committees on Government Operations and Interior and Insular Affairs.

By Mr. MARKEY (for himself, Mr. MOORHEAD, Mr. LOWRY of Washington, Mr. LAGOMARSINO, Mr. GREGG, Mr. FRANK, and Mr. CONTE):

H.R. 2095. A bill to provide for daylight saving time on an expanded basis, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MORRISON of Washington:

H.R. 2096. A bill to authorize the Secretary of the Interior to construct, operate, and maintain an enlarged Bumping Lake, supplemental storage division, Yakima project, Washington; to the Committee on Interior and Insular Affairs.

H.R. 2097. A bill to recognize the organization known as the American Philatelic Society; to the Committee on the Judiciary.

By Mr. PRICE:

H.R. 2098. A bill to recognize the organization known as the Fleet Reserve Association; to the Committee on the Judiciary.

By Mr. RIDGE:

H.R. 2099. A bill to restore competitive equity between national and State banks regarding shared automatic teller machine networks; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DE LA GARZA:

H.R. 2100. A bill to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture.

By Mrs. SCHNEIDER (for herself and Mr. SCHEUER):

H.R. 2101. A bill to establish in the Environmental Protection Agency a program on indoor air quality, and for other purposes; jointly, to the Committees on Science and Technology and Energy and Commerce.

By Mr. SCHUMER:

H.R. 2102. A bill to establish State pension investment units, a secondary market for industrial mortgages, State venture capital and royalty finance corporations, and a national loan loss reserve fund; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SKELTON:

H.R. 2103. A bill to amend the Federal Meat Inspection Act relating to the inspection and labeling of certain imported meat and meat food products, to require that certain eating establishments serving imported meat inform customers of that fact, and for other purposes; to the Committee on Agriculture.

H.R. 2104. A bill to provide the Secretary of Agriculture with the authority to establish a program to develop, maintain, and expand markets for U.S. agricultural commodities, and for other purposes; jointly, to the Committees on Agriculture and Foreign Affairs.

H.R. 2105. A bill to establish an agricultural export credit revolving fund, and for other purposes; jointly, to the Committees on Agriculture and Foreign Affairs.

By Mr. HUTTO (for himself, Mr. WEBER, and Mr. MCGRATH):

H.J. Res. 241. Joint resolution directing the President to ensure that Soviet Government personnel in the United States are subject to the same requirements as are U.S. Government personnel in the Soviet Union; to the Committee on Foreign Affairs.

By Mr. MATSUI:

H.J. Res. 242. Joint resolution to establish a Commission on Poverty Definition Reform; to the Committee on Government Operations.

By Mr. DONNELLY (for himself, Mr. FREIGHAN, and Mr. GEJDENSON):

H. Con. Res. 118. Concurrent resolution condemning the use of plastic or rubber bullets by British security forces in Northern Ireland and calling upon the Government of the United Kingdom to end the use of such bullets against civilians; to the Committee on Foreign Affairs.

By Mr. LELAND:

H. Con. Res. 119. Concurrent resolution expressing the sense of the Congress that the President should consider the members of the African National Congress in South Africa to be freedom fighters; to the Committee on Foreign Affairs.

By Mr. OWENS:

H. Con. Res. 120. Concurrent resolution expressing the sense of the Congress that the President should withdraw the determination that the Government of Haiti is making progress toward improving the human rights situation in Haiti and progress toward implementing political reforms which are essential to the development of democracy in Haiti, such as progress toward the establishment of political parties, free elections, and freedom of the press; to the Committee on Foreign Affairs.

By Mr. DIOGUARDI (for himself, Mr. GINGRICH, Mr. RALPH M. HALL, Mr. MANTON, and Mr. ROWLAND of Connecticut):

H. Res. 132. Resolution condemning the Government of the Union of Soviet Socialist Republics for 5 years of forced and oppressive military occupation of Afghanistan in the face of popular resistance to Soviet imperialism; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 7: Mr. CLAY, Mr. LELAND, Mr. ADDABBO, Mr. OWENS, and Mr. CONYERS.

H.R. 21: Mr. BATES, Mr. YATES, Mr. MATSUI, Mr. PANETTA, Mr. COELHO, Mr. MILLER of California, and Mr. JEFFORDS.

H.R. 36: Mr. LEVIN of Michigan.

H.R. 43: Mr. BIAGGI and Mr. CROCKETT.

H.R. 44: Mr. STRANG, Mr. ANNUNZIO, Mr. SABO, and Mr. QUILLEN.

H.R. 52: Mr. CRAIG and Mr. RAY.

H.R. 229: Mr. DE LUGO and Mr. LOWRY of Washington.

H.R. 385: Mr. ARMEY, Mrs. BENTLEY, Mr. BILIRAKIS, Mr. CAMPBELL, Mrs. COLLINS, Mr. HOWARD, Mr. LOEFFLER, Mr. ORTIZ, Mr. REID, Mr. SUNDQUIST, Mr. WHITTAKER, and Mr. WORTLEY.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1612: Mr. HAMMERSCHMIDT.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1617

By Mr. PURSELL:

—In section 3 (page 7, line 7), strike out "$600,000" and insert in lieu thereof "$500,000".

—At the end of section 2 (page 7, after line 2), add the following new subsection:

(e) Notwithstanding any other provision of this Act, the total amount authorized to be appropriated by this section shall not exceed $123,985,000.

EXTENSIONS OF REMARKS

REPRESENTATIVE GEORGE MILLER'S CONCERN FOR REFUSENIKS

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. WAXMAN. Mr. Speaker, our colleague Congressman GEORGE MILLER of California has just returned from the Soviet Union as a member of your official parliamentary group.

During this mission, Congressman MILLER served as the leader of the human rights group, and in that capacity delivered a very strong and impressive statement to the new Soviet leadership on the subject of human rights and the treatment of Jews and other minorities in the U.S.S.R.

Congressman MILLER also met with leaders in the refusenik community and held extensive private talks with Soviet leaders during which he cited Soviet and international law as grounds for allowing Jews and other Soviet citizens the right to practice their religion or emigrate freely.

I have read Congressman MILLER's statement, and I am impressed with his thoughtfulness. I want to share that statement with all fellow Members of the House, and I urge all our colleagues to review it.

The statement follows:

STATEMENT OF U.S. CONGRESSMAN GEORGE MILLER, SEVENTH DISTRICT, CALIFORNIA

The visit of this delegation from the United States House of Representatives to the Soviet Union presents a timely opportunity for improving relations between our governments and our people.

Earlier this year, a new Congress took office in the United States, and President Reagan was inaugurated to his second term in office. Just last month, the leadership of the Soviet Union changed, with the passing of Mr. Chernenko and the elevation of General Secretary Gorbachev.

Next month, our nations will commemorate the fortieth anniversary of the ending of a terrible war, a struggle in which the United States and the Soviet Union were allied against totalitarianism, militarism, and persecution.

The world in which we live today is very much the product of that war. And while the great powers have largely known peace among themselves, we have not enjoyed friendship. Suspicion, far more than trust, and tension far more than cordiality, have marked relations between our countries since 1945.

Yet forty years ago, how common our purpose seemed; not just victory over Hitler, but victory over the corruption he perpetrated. As allies, we won not only a great victory over the Nazis, but also liberation for the nations and the peoples whom the fascists had enslaved.

The anniversary of this great struggle should rekindle the mutuality of purpose and the sense of trust which has tragically slipped from both our hands over the last four decades. If this delegation can further that goal, then this shall have been a successful mission.

Our delegation represents the diversity of the Congress, and the pluralism of the American people itself. We represent the machinist in Massachusetts and the commuter in California; we speak for farmers and factory workers; we belong to competing political parties and embrace conflicting ideologies. We hold diverse views of our own Nation, and of your Nation.

However, the debates which occasionally divide us from each other illustrate the strength of our freedom, not its weakness. And, diverse though we may be, we stand united on the need to enhance human rights around the globe.

No nation can claim an unblemished record in the area of human rights or civil liberties. No ideology has extended to its detractors the same tolerance enjoyed by its supporters.

There are many issues between our governments which must be resolved in order to promote international peace and domestic security for our nations. It is critical that we learn to trust each other sufficiently to undertake the serious discussions, and to take the bold steps, which are required to reduce the unconscionable danger of nuclear annihilation.

I am sure that the other members of this delegation share with me a sense of optimism as a result of the resumption of the arms control talks in Geneva, and the potential summit meeting between President Reagan and Secretary Gorbachev.

Arms control is a vital issue, but it is not the only issue. And while the question of human rights may not impinge directly on the issue of nuclear weapons, the degree to which each Nation abides by treaty obligations in the area of human rights cannot help but affect its credibility with respect to meeting other agreements.

Members of this delegation disagreed on our approach to other issues which lie between the Soviet and American governments. But let there be no mistake: we are in full accord that the just treatment of religious, ethnic and national minorities is an indelible, and appropriate, part of our agenda.

I am fully aware of the sensitivity of this issue, and I intend to discuss it with full respect for your leaders and your laws. You know of our concerns; we know of your counter-charges and responses. Nevertheless, we will continue to raise the Soviet record on human rights until we are convinced that it no longer presents the barrier between us which unfortunately it does today.

We have different laws and different cultures. I do not seek to impose the standard of American law upon you. But we do hold you accountable for abiding by your own law and the international law into which you have voluntarily entered.

Trust is a critical ingredient in these negotiations. But trust cannot be purchased, and it cannot be demanded. It can only be earned through honorable behavior.

If the Soviet Union does not uphold agreements assuring the rights of those who present no true threat to the Soviet security, how can the American people feel secure that you will abide by arms agreements, whose violation would risk the security of our entire Nation, and the future of mankind?

Articles 34 and 36 of the 1977 Soviet Constitution guarantee equal rights, including cultural rights, to citizens of different nationalities. Under Article 74 of the Criminal Code, denial of equal rights is regarded as a special crime. Article 36 ensures Soviet citizens "the possibility to use their native language."

In international law, too, the Soviet Union has committed itself to cultural pluralism and religious tolerance. Article 27 of the International Covenant on Civil and Religious Rights state that "In those States in which ethnic, religious or linguistic minorities exist, persons belonging to such minorities shall not be denied the right in community with the other members of their group, to enjoy their own culture, to profess and practice their own religion, or to use their language."

The Helsinki Final Act declared that participating nations shall "fulfill their obligations as set forth in the international declarations and agreements" in the field of human rights, and requires that states afford national minorities "the full opportunity for the actual enjoyment of human rights and fundamental freedom."

As one whose public career has been devoted to the reduction of tensions between Nations, I must tell you in all candor that the overwhelming, impartial evidence compels me to conclude that the Soviet Union has failed, and continues to fail, to abide by these guarantees.

As one who believes that the negotiation of a reduction in the level of nuclear weaponry is our highest priority, I must tell you that the Soviet record in the area of human rights enforcement inevitably tarnishes the credibility of your Nation in the Congress of the United States with respect to compliance with arms limitation agreements.

The plight of Soviet Jews illustrates the grounds for that concern. Over the last several years, the expanded emigration of the late 1970s, which was so welcome, has slowed nearly to a halt. From a peak of 51,300 Jewish emigrants in 1979, the number has been cut radically, to just 896 in 1984. In February of this year, just 88 Soviet Jews were permitted to leave.

In place of a policy of liberal emigration has come a tightening of exit requirements, including limitations on who may apply for an exit permit, complicated forms, long delays and bureaucratic obfuscation. While the Soviet government alleges that the reduction of emigres is attributable to the diminishing in the number of those seeking to leave, the facts belie this claim.

Jewish Soviet citizens are suffering economic punishment, imprisonment, physical and psychological abuse, family separation, and religious intolerance because they wish

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

to exercise not only their religious teachings, but their legal rights as Soviet citizens.

You may claim all who wish to leave have left; we will visit, during this trip, some of those who have waited years, in some cases, for permission to emigrate.

You may claim the "refuseniks" are criminals; but their so-called "crimes"—the teaching of Hebrew, the distribution of religious tracts—are guaranteed both by Soviet law and international agreement.

You may claim that Jews in the Soviet Union are free to practice their culture and their religion; the evidence—and I have personally seen it—strongly suggests an official tolerance for, if not encouragement of, anti-Semitism.

In the Ukraine, Yakov Levin was arrested for circulating religious materials. As evidence, prosecutors cited his possession of Leon Uris' book, "Exodus." He was sentenced to 3 years in prison for anti-Soviet slander. Charges against a friend, Yakov Mesh, were dropped because Mesh "sustained life threatening injuries from a beating administered at the time of his arrest", according to a report issued by the U.S. State Department.

Last December, Iosif Berenshtein of Kiev was sentenced to four years in prison for allegedly "resisting arrest." He was placed in an isolation cell with two hard-core criminals who assaulted him with broken glass, blinding him in one eye.

Irina Ratushinskaya, a Ukranian poet, was sentenced to 7 years of hard labor for joining human rights demonstrations and attempting to emigrate.

According to Catherine Cosman, a member of the Helsinki Commission which monitors compliance with the Final Act, 3 leading Ukrainian dissidents have died in the last year—Yuri Litvin, Valery Marchenko, and Oleksy Tykhty—all of them imprisoned for their human rights activities. Indeed, Ms. Cosman reports a terrible increase in physical abuse of prisoners of conscience since the mid-1979s, and particularly after 1983.

Hundreds of the Helsinki Watch monitors have been jailed in the U.S.S.R. for the crime of urging Soviet compliance with the 1975 accords which your government voluntarily signed. Tatyana Osipova, a monitor, has been imprisoned for nearly a year and began a hunger strike because she could not meet with her husband, Ivan Kovalvov, also a prisoner.

Dozen of other Soviet citizens who sought compliance with the Final Act have been sent to prisons, labor camps, and psychiatric hospitals. They did not seek to destroy the Soviet state; they did not urge violence or sedition; they sought only to have their government comply with international law which Soviet officials had solemnly ratified.

Many have thus far escaped the punishment of the prison camps. They live in legal limbo, denied the right to practice their professions while standing accused of "parasitism" and indifference to public service.

Nor is emigration the only right denied Jews in the U.S.S.R. The freedom to practice the Jewish faith, to study Hebrew and Jewish culture, to possess Hebrew language literature and to publish Jewish journals—all these rights are supposedly assured by Soviet law, and yet none is widely available.

Within just the last few months, there have been deeply disturbing signs of a reawakening—and official sanctioning—of anti-Semitism is the Soviet Union. A television documentary, broadcast in Leningrad last November and elsewhere since, hinted at a worldwide Jewish conspiracy and accused Jewish dissidents of treason.

The narrator in this film alleges that, "Deceiving Jews is a part of a global psychological war against the Communist system . . . The Zionist propaganda is directed first of all against our country. Thousands of organizations, centers, conferences and committes influence public opinion in the West in a spirit of Zionism, and they slander our people and government."

In February of this year, another program was broadcast on Moscow television. This program, entitled "Conspiracy against the U.S.S.R.", equated Zionism, Nazism, and the U.S. Central Intelligence Agency.

Nor are these the only examples of growing anti-Semitism. In April, 1983, the Anti-Zionist Committee was created. That same year, the official youth newspaper Komsomolskaya Pravda declared that the meaning of Zionism is "to turn every Jew, no matter where he lives, into a traitor to the country where he was born." The newspaper Leninskaya Pravda denounced Israel as a "money-grubbers' paradise" and suggested that the desire to learn and speak Hebrew was "far from cultural, but is strictly political."

This vicious rhetoric repeats longstanding and highly offensive characterizations of members of the Jewish faith. To equate Zionism with Judaism, in itself, is inaccurate; to suggest that learning Hebrew—which is essential to the practice of Judaism—is "anti-Soviet" contradicts your own laws regarding the right of cultural minorities to learn their own languages.

To allege—as your government does—that the refuseniks represent a serious danger to the stability of the Soviet state is a proposition so lacking in credibility that it is dismissed by every impartial observer in the world.

But even if your own allegations about the refuseniks are accurate—which we vigorously dispute—why mandate that they remain in the Soviet Union? If the free expression of their beliefs and the practice of their religion present a challenge to the State, why not grant them the only requests they are making: the right to leave; the right to be reunited with their families; the right to be repatriated to Israel?

I want to emphasize our equally strong concerns about other nationalities and religions which are denied rights due them under Soviet law and international accords.

There have been substantial reductions in the number of Germans and Armenians allowed to emigrate from the Soviet Union. Siberian Pentecostals, Baptists and Christians, like Soviet Jews, have waited years for emigration permits.

Some are in jail, like Ukrainian Catholic leader Iosyp Terelya, founder of the Initiative Group for the Rights of Believers, Father Gleb Yakunin of the Christian Committee, and Lithuanian priest Alfonsas Svarinskas of the Catholic Committee. Others, like the Jehovah's Witnesses, suffer constant persecution.

The punishment of these people, and many more, illustrates that it is not Zionism which is the so-called crime, but rather the free expression and practice of religion—a right guaranteed by Soviet law.

Last week, millions of Jews throughout the world celebrated the holiday of Passover, which commemorates the exodus of the Jewish people from Bondage in Egypt. The holiday is a Jewish one, but the lesson is universal: it commemorates the triumph of faith over oppression and of freedom over slavery.

In the Soviet Union, Jews celebrated this holiday as they did in all other nations. But Soviet Jews did not have the religious materials or sufficient spiritual leaders; they chanted the prayers in the Haggadah under the pale of official condemnation of Hebrew as a subversive language.

And for tens of thousands of Soviet Jews, the Seder's closing—"Next Year in Jerusaleum"—has a profound and personal meaning.

As we prepared to depart for this mission, we were heartened by reports that your government was actively considering granting exit visas to 280 Jewish families. We profoundly hope this report is accurate, and that it represents a first step towards a return to the more enlightened emigration policies of the late 1970s.

Open the doors to those who desire to leave, and reduce the oppressiveness on those who must remain. At the very least, grant exit visas to those who have suffered imprisonment, those who are aged or in poor health, those who have endured years of waiting, so that they may at long last join relatives abroad.

En route to the Soviet Union, we stopped in Munich, West Germany. Together with some other members of our delegation, I visited Dachau, the site one of the Nazi death camps where millions of Jews and other minorities were exterminated. During that visit I appreciated, as I never have before, the terrible tragedy of World War II—a tragedy endured at greater human cost to the Soviet Union than any other combatant.

Out of our common victory in that struggle came a hope for international peace. We stand today at a critical moment in the search for that peace. We have begun the negotiations whose success could end the arms race, but whose failure could endanger the very survival of our planet.

This delegation comes to the Soviet Union in the spirit of reconciliation. We wish to communicate to you, and to the Soviet people, our sincere desire for peace and improved relations on a wide range of issues.

Human rights is one of those issues. It is inseparably linked to all of the other issues. On this we agree and will not bend. As Abraham Lincoln declared, "Important principles may and must be inflexible." No principle is more dear to us than personal freedom.

In the past, cordiality between our countries has contributed to greater tolerance toward Soviet Jews and relaxed emigration policies. I hope that the good will exhibited by this delegation toward our hosts and the Soviet people will again contribute to modifications in the human rights policies of which I have spoken today.

I assure you that the improvement of those policies will certainly help to create an atmosphere of trust which will reduce the threat of war and to promote closer relations between our countries and our people.●

REMEMBER THE GULF OF TONKIN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. EDWARDS of California. Mr. Speaker, I want to recommend to my

distinguished colleagues an outstanding editorial by the senior Senator from California. The editorial is very right in illuminating that the President's request for Contra aid can lead to far more than $14 million and the editorial makes a very apt comparison between the President's request for military aid to the Contras and the 1964 Gulf of Tonkin resolution.

Mr. Speaker, the editorial follows:

REMEMBER THE GULF OF TONKIN

(By Alan Cranston)

The Senate vote on the President's bid to expand military operations against Nicaragua is not simply a question of approving another $14 million for "secret" anti-Sandinista operations. The stakes could be far higher. Under the terms of the Nicaragua resolution that will be before Congress next week, the President will be requesting authorization of what could substitute for a virtual declaration of war.

Examine closely the precise language that the White House is trying to have adopted: "Congress approves the obligation and expenditure of funds available for fiscal year 1985 for supporting directly or indirectly military or paramilitary operations in Nicaragua."

An affirmative vote on this proposal would provide an even more specific and generous license than Congress gave the executive in 1964 in the fateful Gulf of Tonkin resolution. That sufficed for more than a decade as a substitute for declaration of war against Vietnam, Cambodia and Laos. More than 50,000 American troops died in the supposedly "limited" war authorized by the 1964 congressional resolution.

Congress believed that the Gulf of Tonkin resolution simply provided rhetorical backing of a popular President for a show of force against a pesky Third World nation. But the White House subsequently used the hurried-through resolution as a far more broad grant of authority. Interviews conducted for a recent Senate study showed that key officials in the 1964 Administration recognized this opportunity. McGeorge Bundy, then the national security adviser, conceded, "Congress surely did not believe in 1964 that it was voting for the war that happened." Yet, as Bundy noted, the Executive branch later persisted "in describing the (Tonkin Gulf) resolution as the functional equivalent of a declaration of war." Nicholas deB. Katzenbach, who was deputy attorney general in 1964, later admitted that the reported torpedoing of U.S. ships in waters off Vietnam was "nothing." But Katzenbach would insist in key 1967 congressional hearings that the Gulf of Tonkin resolution "is as broad an authorization for the use of armed forces for a purpose as any declaration of war."

If this Congress adopts the Nicaragua resolution, it would give the President arguable justification for immediate use of the substantial U.S. military forces that we have amassed on Nicaragua's borders. These forces include 5,000 U.S. troops that the Pentagon has engaged this month in infantry, tank and air support exercises rumbling within three miles of Nicaragua's border. The Pentagon also has maintained a semipermanent naval presence within sight of both Nicaragua's western and eastern shores; these naval forces begin new exercises this week.

The President would, of course, have to come back to Congress for additional funding. But with a blanket authorization in hand and U.S. troops already in combat, the White House would be in strong position to get what it wanted from a Congress reluctant to "withdraw under fire."

This is not simply a debate over parliamentary formalisms, over the proper mechanism for authorizing acts of war. We should take the opportunity provided by next week's first full, public Senate debate and vote on military operations against the Sandinistas to consider an escalating U.S. policy gone wrong.

Our Nicaragua policy is wrong because it is immoral: U.S. taxpayer dollars should not be used to sponsor acts of international terrorism in Nicaraguan villages, harbors and cities.

It is wrong because it is illegal: U.S. funding of military efforts to overthrow a government that we recognize violates not only the charter to the United Nations and the Organization of American States but our own Constitution as well.

It is wrong because it violates our national principles: No matter how we deplore the Sandinistas' curbs on civil liberties and their support from Havana and Moscow, we must not adopt the attitude that our ends justify our means. We ill serve America's mission of promoting democracy when we emulate our adversary's most deplorable tactics.

But for those who feel that morality and legality and national principles have no place on a troubled planet, I would hope that the impracticality of current Administration efforts would be decisive.

The fact is that U.S.-bankrolled efforts to undermine the Sandinistas have proven utterly counterproductive. They have increased domestic, nationalist support for the Sandinistas. They have isolated Nicaraguans opposed to the Sandinistas and have made them, by association, allies of CIA-backed terrorists. They have provided the Sandinistas with ready-made excuses for curbing press and political freedoms and for relying heavily on Warsaw Pact nations for security assistance. And after four years and nearly $100 million in U.S. taxpayer funds, these efforts have failed to wrest one inch of soil from the Sandinistas' control. A resolution authorizing direct or indirect military or paramilitary operations in Nicaragua will not help either.

On the 10th anniversary of our withdrawal from our "limited war" in Vietnam, we should recall some of the lessons of opposing nationalist movements in urban and jungle warfare on their own soil.

Just as the Gulf of Tonkin resolution did, the Nicaragua authorization could open the door for a war that the American people do not understand, will not support and do not believe hold the promise of advancing our national interest in stable democratic developments in a turbulent region.

Congress must not repeat the tragic error of 1964.●

THE PUCCIO REPORT ON WESTWAY—PART II

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. GUARINI. Mr. Speaker, today I am inserting the conclusion of a report by former Federal prosecutor, Thomas P. Puccio, on the proposed Westway Highway project in New York. Puccio proves that the goals of the project encompass much more than the development of a highway. At the same time, he shows how these goals have become obsolete in the context of present day New York. Finally, he provides sound rationale for excluding the Westway from Federal interstate highway funding and supporting New York's trade-in option.

PROS AND CONS OF WESTWAY

Westway itself is not all black and white. Thus, while the opponents tend to characterize the project as a boondoggle, its supporters believe that Westway is a unique opportunity that can provide the City with a revitalized waterfront on the lower West Side, a superior transportation connection, a major source of jobs and a base for expanded real estate development. Each of these points contains elements of truth. At the same time, they are elements that should be understood in context.

WATERFRONT CLEAN-UP AND PARKLAND

As planned, Westway would clean up the largely derelict waterfront between 42nd Street and Battery Park City, and it would provide the lower West Side with a significant (93-acre) park border. This would certainly be an improvement as compared to existing conditions, with the park providing special benefits by opening the waterfront to public access. The cost of achieving this, however, would be immense—i.e., the $2 to $4 billion that will be required to construct the landfill.

Of equal importance, the clean-up of the waterfront no longer depends on Westway. Much of it could be done in connection with the construction of an improved surface arterial funded through the trade-in. Among other things, the work could include the development of a border park and promenade along the waterfront, likewise opening the Hudson to public access. In addition, once the overhang of Westway was removed, there can be little doubt that private sector developers would promptly seek to rehabilitate and re-use the existing waterfront, just as they have in Boston, Baltimore and San Francisco. When Westway was planned, the adjacent neighborhoods were largely industrial; and thus, the waterfront was unattractive for development. Today, however, with Greenwich Village, Tribeca and lower Manhattan residential communities having already expanded to West Street, the waterfront is prime real estate that would clearly attract private sector investment.

The surface level alternatives would not provide the same magnitude of parkland as Westway. On the other hand, the uncertainties would be less. For example, until recently it had always been assumed (or at least asserted) that the Westway park would be built using interstate funds. However, the New York State Office of Parks & Recreation has recently indicated that the park might not be able to be built as planned. This development serves to underscore what has long been a concern of opponents and proponents alike—i.e., that Federal interstate funding may not, in fact, be available for some of the most important features of Westway. (The same concern attaches to the operation and maintenance of the park. The State has agreed to undertake this responsibility, but in times of fiscal constraints, the necessary funding may be hard to come by.)

TRANSPORTATION CONNECTION

There is no doubt that Westway would provide a better transportation connection than any of the alternatives. Again, however, the context is important.

In the first place, this connection would be obtained only at tremendous cost—$2-4 billion including $200-400 million in State funds. Second, the time savings that would result from this expenditure would be five to ten minutes at most (as compared to a grade-level arterial). Third, the improvement in driving conditions would end at 42nd Street. In order to make the corridor connection effective for the length of Manhattan, major outlays would be required for the roadway section from 42nd Street north to 72nd Street; and since this segment of the West Side Highway does not have interstate designation, the State would have to supply up to 30% of the required funds. Fourth, contrary to the claims of Westway's supporters, truck traffic on local streets and avenues would be minimally affected by Westway, with reductions being small as contrasted to the grade level arterial. In short, while Westway would offer a better vehicular connection than the alternatives, the differences would be quite modest in all respect but one—the immense cost of Westway itself and the denial of equivalent funds for transit rehabilitation and bridge and road repairs.

JOBS

Westway would unquestionably provide employment for a substantial number of construction workers. However, transit rehabilitation and bridge and road repairs funded through the trade-in would also provide jobs and probably in equivalent numbers. (Indeed, one study by Michael Gerrard indicates that the trade-in would result in more jobs than Westway would.) It is understandable that construction unions and contractors should support Westway, since it seems to gleam with gold. In reality, however, the trade-in would have its own substantial employment benefits, and in all likelihood, these would accrue more equally to minorities than would be the case with Westway.

REAL ESTATE OPPORTUNITY

Westway supporters place considerable emphasis on the benefits that they believe will accrue from the developable portions of the landfill. In particular, they emphasize the impetus that new development should give to the revitalization of the lower West Side. This claim, however, is questionable. As already noted, when Westway was planned the lower West Side was in eclipse. Since then, however, it has renewed itself with new construction and literally thousands of conversions. In short, the revitalization that Westway was to have sparked is already far advanced, without any help from, or need for, Westway itself.

There are, moreover, potential detriments that could follow from the landfill and its development. In the first instance, the highway funds will, at most, finance the landfill base. The infrastructure improvements necessary to support subsequent development (including roads, sewers, and other utilities) will have to be financed through other public or private sources and given existing fiscal constaints (much less the need to rebuild infrastructures in existing areas of the City), the prospect of obtaining the necessary resources is uncertain at best. In addition, any commitment of public resources that may be needed to support the landfill development (whether to finance infrastructure or to subsidize developers or tenants) will deny those resources to potential projects in other areas; as a consequence, development in areas such as the South Bronx, Long Island City and other locations in Manhattan could be undercut.

ADVERSE ENVIRONMENTAL EFFECTS

The potential for adverse environmental impacts must also be recognized. The threat of severe damage to the Hudson River fisheries has already been mentioned. Equally important, neighboring communities are justifiably concerned that development on the landfill (which is likely to be in the luxury category) will cut them off from the Hudson and disorient existing integrated population, due to pressures on rents and other secondary impacts. For a City which is trying to hold on to its middle class, this is an important issue.

All of the preceding concerns assume, moreover, that the landfill can be completed. However, if Westway's costs increase substantially—which cannot be discounted as unlikely—adequate funds simply may not be available from the Highway Trust Fund. If this should prove to be the case, either the State would have to make up the difference or the landfill construction would grind to a halt. In the case of the Second Avenue subway, where construction had to be halted because of a shortfall of funds the impacts were limited because the unfinished work could be covered up. With the elaborate Westway landfill, however, the impacts on adjoining neighborhoods could be prolonged and severe—half-finished waste piles cutting off the River and effectively foreclosing clean-up, much less new development. While the likelihood of such a situation's occurring may seem small at this point, the possibility cannot be discounted, given the extended construction schedule for Westway and the extraordinary complexity of the proposed work.

TROUBLE FOR THE TUNNELS?

The last point is underscored by one recent development which raises serious concerns in its own right. The landfill would extend from just north of Battery Park City to approximately 30th Street—a stretch which includes the PATH tubes and the Holland and Amtrak tunnels. Initially, it has been proposed to simply fill around and on top of these structures. In the past year, however, the Port Authority has expressed concern that the filling could do serious damage to one or more of the tunnels, including the possibility of a rupture. If this were to occur, the consequences would be disastrous. The NYSDOT engineers are now attempting to develop protections satisfactory to the Port Authority, but is improbable that the risks can be avoided completely. Furthermore, even if it were justified to incur such risks (and it is hard to understand why it should be), providing the necessary protection could add large amounts to the cost of Westway. Inflation aside, in short, the engineering problems associated with a project as complex as Westway could make it far more expensive than has been estimated, with an increasing risk that Federal funds would fall short and the State would have to underwrite the balance.

DECEPTION REQUIRES INVESTIGATION

From early on, the State and its Westway Project consultants took the view that the Westway landfill would have no impact on fisheries resources because there were no fish in the area to be filled; and this is exactly what was stated in the State's EIS. When the Environmental Protection Agency and the other Federal fisheries agencies claimed that the area was far from the wasteland which the state portrayed, the State's response was that the agency positions were absolutely without basis.

Eventually, the State agreed to do further sampling which it asserted would prove the area to be of no value. Instead, the field work conducted by the firm of Lawler, Matusky & Skelly (LMS), turned up major concentrations of young striped bass in the area to be filled, with the concentrations being ten times or more greater than any other place on the Hudson. However, when LMS and the State issued their report on the sampling, they did not disclose this; but, to the contrary; they obscured the results both through inaccurate text and manipulated graphs. Equally important, they misrepresented the seriousness of the concerns of the Corps of Engineers, even after openly recognizing them in a meeting with the Highway Administration, held a few weeks before the report was issued.

JUDGE GRIESA'S FINDINGS

All of this came out in the trial before Judge Griesa, whose findings included the following (all of which were affirmed by the Court of Appeals).

1. The LMS report of the study was deceptive and false, failing to disclose the seriousness of the potential impact on striped bass and obscuring this intentionally.

2. The State fraudulently advised the Corps of Engineers that the new study, showing large concentrations of striped bass in the Westway area, said nothing different from the EIS, which said there were no fish in the Westway area.

3. The State EIS was false from the outset since there was no basis for asserting that the Westway area had no aquatic life in it.

4. The State and its consultants acted in bad faith and conspired with the Federal Highway Administration to suppress the new information on potential fisheries impacts and to deceive the public.

5. The State's key witnesses, including Lowell Bridwell, whom the State selected as Westway Executive Director, had not been candid or truthful in their testimony. In addition, the State's attorneys had also participated in the misconduct.

To date, no formal investigation has been undertaken as a result of these findings. Without the benefit of subpoena power, such an investigation would prove fruitless, and it is certainly beyond the present capabilities of the author of this memorandum. However, a thorough investigation is necessary to restore public confidence in the integrity of the approved process. Accordingly, it is recommended that the matter be referred to an appropriate state of federal investigative body.

FINAL THOUGHTS

It was in March 1975 that Governor Carey and Mayor Beame rejected the trade-in option and committed themselves to Westway. Their view was that Westway construction could begin within two years and that the trade-in was illusory. At about the same time, Boston expanded its trade-in request and Washington, D.C., followed the same course to finance its Metro.

Today, Westway remains at a standstill. Boston, in contrast, has drawn down close to $1 billion under the trade-in program, which it has used to finance subway expansion and rehabilitation, and Washington, D.C., has drawn down substantially more than $1 billion to build the Metro.

NYSDOT officials will probably continue to contend (as they have regularly for the past several years) that Westway is just around the corner, if only the Governor will hang in there. In my view, this simply is not so, for reasons that I have already noted. But what is equally important to recognize is that the "hang in there" theory has already cost the State and City important opportunities; and if it remains the controlling principle, it will, in my view, have a like outcome in the future.

One last point is also worth noting: even if Westway is pursued and ultimately approved, the State and City will face an unstable future. The duration of construction itself will be uncertain. More than this, however, the State and City will continually have to be cashing in their chips to keep Federal funding on track. This will not be a free charge. To the contrary, programs of State-wide importance may have to be cut back, due to the large Federal allocations to Westway. Furthermore, so long as the Federal government continues to spend hundreds of millions of dollars annually on Westway, it will be difficult to persuade Senators and representatives from other states that New York is deserving of capital funds for other critical infrastructure needs.

In short, in the end, Westway may well be more of a burden than a boon in terms of obtaining allocations of Federal funding.●

A NATIONAL LOTTERY IS IN ORDER TO HELP REDUCE DEFICIT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BIAGGI. Mr. Speaker, today I am pleased to introduce legislation which would establish a national lottery to help our Nation in its effort to reduce our record Federal deficit. Under my proposal, a national lottery would be established. Persons aged 18 and over would be able to play and purchase tickets at a cost of $1. The lottery would award 5 prizes each month of the year, for a total of 12 separate lotteries each year on the national level. Under my bill a full 75 percent of all revenues raised under the national lottery would be earmarked to reduce the principal on the Federal debt. Of the remaining 25 percent, 20 percent would be reserved for prizes, and 5 percent would go toward administrative costs.

I offer this legislation with the knowledge that lotteries have been conducted successfully at the State level in 18 different States. Lottery revenues have been showing dramatic growth in recent years. For example, lottery revenues exceeded $5.2 billion in 1983, a quantum leap from the $3.8 billion raised the previous year.

In those States where lotteries have been the most successful, revenue per capita has exceeded $1 a week. On a national scale, according to economist Alfred Tella writing in the New York Times, this would produce weekly gross revenues of more than $236 million a week or $12.3 billion based on 1984 levels.

It is impossible if not inaccurate to try and make projections on how much a national lottery could generate in terms of reducing the deficit. What is clear, however, is that participation holds the key to how much revenue could be raised. According to some excellent research provided to me by the Economics Division of the Congressional Research Service, if every person eligible to participate in my lottery were to buy just nine $1 tickets per month for a year, we could slash our deficit by 10 percent, or by over $18 billion. Obviously, the more one buys the more is reduced with the optimum situation being if every eligible person were to buy 90 $1 tickets per month for a year, the entire deficit could be wiped out.

I fully realize that the idea of each person buying that many lottery tickets may seem extreme. However, my point is we should give serious consideration to any proposal which has a realistic chance of reducing our Federal deficit, especially those which do not extract higher taxes or make draconian cuts in spending for important social programs. I propose a national lottery as one such idea.

The idea of a national lottery does not come without some support. A Gallup Poll indicated that 62 percent of those surveyed gave support to the idea of a national lottery. Four additional States approved a national lottery in the November 1984 elections. My bill does not propose to have a national lottery supersede any existing State lottery, rather be conducted in conjunction with State lotteries.

I would add that my legislation provides safeguards against common abuses that might pop up on the conduct of a lottery. It prohibits and establishes penalties for those selling a ticket to someone under the age of 18, selling a ticket for more than the price established by the Secretary of the Treasury or counterfeiting or altering tickets.

At this point in the RECORD I would like to insert the full text of my legislation and urge its careful consideration by my colleagues.

H.R. 2074

A bill to establish a national lottery to reduce the Federal deficit

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Lottery and Deficit Reduction Act".

SEC. 2. ESTABLISHMENT OF NATIONAL LOTTERY.

(a) ESTABLISHMENT.—There is hereby established a national lottery, which shall be administered and operated by the Secretary of the Treasury. In operating the lottery, the Secretary shall—

(1) sell tickets only to persons 18 years of age or older;

(2) sell each ticket at the price of $1.00;

(3) hold a drawing for prizes each month; and

(4) award five prizes at each monthly drawing.

(b) REGULATIONS.—The Secretary shall issue regulations to carry out this Act, including regulations prescribing—

(1) the types of games to be conducted in the lottery;

(2) the manner of selecting winning tickets;

(3) the amounts of prizes to be paid to holders of winning tickets;

(4) the manner of payment of prizes to holders of winning tickets;

(5) the locations at which tickets may be sold;

(6) the method to be used in selling lottery tickets; and

(7) such other matters as may be considered necessary by the Secretary for the efficient and economical operation and administration of the lottery.

(c) DEPOSITS INTO TREASURY.—The Secretary shall deposit amounts received from the sale of national lottery tickets into the general fund of the Treasury.

(d) REPORTS TO CONGRESS.—The Secretary shall report to Congress every month on the total revenues and expenditures of the national lottery.

(e) TIMETABLE.—The Secretary shall issue the regulations required by this section not later than 180 days after the date of the enactment of this Act and shall begin operation of the national lottery as soon after the regulations are issued as may be practicable.

(f) OPERATION THROUGHOUT UNITED STATES.—The national lottery established by this Act may be carried out in every State, notwithstanding any other law of the United States, of a State, or of a political subdivision of a State.

SEC. 3. CRIMINAL PENALTIES.

(a) TICKET SALES.—Any person who—

(1) sells a national lottery ticket to a person under the age of 18 years; or

(2) sells a national lottery ticket at a price greater than $1.00;

shall be fined not more than $100,000 or imprisoned not more than one year, or both.

(b) COUNTERFEIT TICKETS.—Any person who, with intent to defraud—

(1) falsely makes, forges, counterfeits, or alters any national lottery ticket; or

(2) sells a falsely made, forged, counterfeited, or altered national lottery ticket;

shall be fined not more than $250,000 or imprisoned not more than 15 years, or both.

(c) RELATIONSHIP TO OTHER LAW.—Chapter 61 of title 18 of the United States Code shall not apply with respect to the national lottery conducted under this Act.

SEC. 4. ESTABLISHMENT OF TRUST FUND.

(a) ESTABLISHMENT.—There is established in the Treasury of the United States a trust fund to be known as the "National Lottery and Deficit Reduction Trust Fund" (in this Act referred to as the "Trust Fund"). The Trust Fund shall be managed by the Secretary and shall consist of such amounts as may be appropriated or credited to the Trust Fund as provided in this section.

(b) APPROPRIATION INTO TRUST FUND.—(1) There are hereby appropriated, out of any money in the Treasury not otherwise appropriated, to the Trust Fund amounts determined by the Secretary to be equivalent to—

(A) the amounts received in the Treasury from ticket sales for the national lottery established by this Act; and

(B) the fines imposed under section 3.

(2) The amounts appropriated by paragraph (1) shall be transferred at least monthly from the general fund of the Treasury to the Trust Fund on the basis of estimates made by the Secretary of the amounts referred to in such paragraph. Adjustments shall be made in the amount subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

(c) INVESTMENT.—(1) The Secretary shall invest such portion of the Trust Fund as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States and may be acquired—

(A) on original issue at the issue price; or

(B) by purchase of outstanding obligations at the market price.

(2) Any obligation acquired by the Trust Fund may be sold by the Secretary at the market price.

(3) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall be credited to and form a part of the Trust Fund.

SEC. 5. PURPOSE OF THE TRUST FUND.

Amounts in the Trust Fund shall be available only for the following purposes and in the following amounts:

(1) Not less than 75 percent shall be used to reduce the principal on the Federal debt.

(2) Not less than 20 percent shall be used to pay prizes due to holders of winning national lottery tickets.

(3) Not more than 5 percent shall be used for administering and operating the national lottery.

SEC. 6. AUTHORIZATION OF APPROPRIATION.

There are authorized to be appropriated to the Secretary of the Treasury such sums as may be necessary for fiscal year 1986 for purposes of operating and administering the national lottery established under this Act.

SEC. 7. DEFINITIONS.

For purposes of this Act—

(1) the term "Secretary" means the Secretary of the Treasury; and

(2) the term "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory and possession of the United States.

SEC. 8. CONFORMING AMENDMENT.

Section 3005 of title 39 of the United States Code is amended by adding at the end the following new subsection:

"(e) Nothing in this section shall prohibit the mailing of any ticket or other material made for purposes of a national lottery conducted under the National Lottery and Deficit Reduction Act.".●

ELLIOTT LEVITAS ON GENEVA ARMS TALKS

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FOWLER. Mr. Speaker, our former colleague Elliott Levitas has recently prepared an analysis of the Geneva arms talks for the Atlanta Journal and Constitution. Mr. Levitas' article raises some important questions about the objectives for arms control. In particular, he calls attention to the importance of crisis management in reducing the risk of nuclear catastrophe.

Preventing nuclear war is perhaps the most urgent task of our era. The Levitas article is a timely discussion of this key question and I am therefore presenting it for your review.

The text of the article follows:

TALKS ARE OFF TARGET IN GENEVA, MAKING PEACE A NUMBERS GAME

(By Elliott Levitas)

The only good thing about the arms control talks in Geneva, Switzerland, is that they are taking place. Obviously, having any dialogue and contact in the name of peace is preferable to escalating levels of confrontation with a possibility of miscalculation and ensuing disaster.

The bad part, however, is that the Geneva agenda does not contain items that could really make the world a safer place. It deals mostly with numbers of warheads, missiles, bombers and the like. Even a "successful" negotiation will leave the numbers too high.

In short, what is being discussed in Geneva is the wrong subject. Let us assume for a moment that the arms treaty could be written tomorrow morning. Would it reduce the arsenals of thermonuclear warheads from present levels to 3,000 on each side, or even some lesser number? No one seriously viewing the talks in Geneva believes that such a marvelous conclusion could occur. Remaining arsenals still would be sufficient to deal indescribable damage, if not ultimate destruction, to both the United States, the Soviet Union and most of the Northern Hemisphere.

We are seeking solutions that make the potential danger only marginally less catastrophic. The real issue is not how can we reduce the number of these weapons, but why do we have them to begin with? The answer is rather simple. First, we distrust each other. Second, we are afraid that, if either side gains an obvious nuclear advantage over the other, the very threat of using that power may result in achieving the adversary's defeat.

The Soviet Union has nothing to fear from the United States in terms of offensive nuclear weaponry. Our history since World War II would demonstrate that. Our strategic planning, our order of battle, our force structure, and our deployments would make that clear. The same is not true of the Soviets. We cannot have any agreements with them that are not independently verifiable and self-executing.

On the other hand, it is also true that the mutual fears and suspicions that we bear are the reasons we have our weapons.

What should our broader negotiating agenda be? A few examples are worthy of consideration:

We must place greater stress upon removing the possibility of miscalculation or surprise attack. This would be an extension of the "hot line" concept. Having both Soviet and American teams at common monitoring centers would assure either side that the possibility of a surprise attack could not occur. Negotiations to eliminate the possibility of surprise attack are now being conducted in Stockholm, Sweden, at the East-West Conference on Disarmament in Europe.

Another example of a more fundamental peace approach would be to develop a Star Wars system, or strategic defense initiative, that would provide a shield from an adversary's offensive nuclear weapons. If both sides have the same capability, it would raise the level of confidence and would reduce the possibility of the use of nuclear weapons.

President Reagan has proposed that if we develop such a system, we offer to provide this system—the most costly, secret and sensitive technology we could possibly have—to the Soviet Union. But is it plausible that the Soviet Union will sit by idly while the United States develops this capability in hopes that we will give it to them?

If we are, in fact, willing to share with the Soviet Union the fruits of our Star Wars technology, would it not be better to negotiate now for a means of joint development? If such a joint development was undertaken, then neither side would be pushed to develop independently against the other's offensive ballistic missiles.

If we are prepared—as President Reagan has said—to share that technology with the Soviets at some point, then surely the time to negotiate the arrangements for making it available is at the beginning of the process rather then at the end.●

DON'T FUND THE CONTRAS

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FAZIO. Mr. Speaker, I rise today to draw my colleagues attention to insightful article by Adolfo Perez Esquivel, which appeared in the New York Times on March 30.

Mr. Speaker, I have no illusions about the Sandinistas and their government. We do not advocate it for the people of Nicaragua or the other nations of Central America. However, it does not follow from our concern that we should arm reactionaries from the Somoza dictatorship to rain terror on the hapless civilians of Nicaragua.

The Reagan administration should adopt a new policy that emphasizes negotiations, that reduces conflict rather than escalates conflict, that brandishes incentives to move away from the Soviets rather than swords that insure the very outcome the administrations wants to avoid.

DON'T FUND THE "CONTRAS"

(By Adolfo Pérez Esquivel)

It must be clear to everyone that the confrontation between the Reagan Administration and the Sandinista Government has neared a breaking point. Both the Sandinistas and American policy makers seem unwavering in their determination to survive each other. Only Congress can defuse this time bomb.

Soon Congress is to decide whether to support the Administration's war against Nicaragua by voting an expected $14 million Administration request for covert aid to the "contras," or to seek a peaceful solution to the region's problems. Latin Americans hope common sense and a healthy awareness of self-interest will move the lawmakers to end the war against the tiny Central American republic.

The Reagan Administration has done its best to create an atmosphere conducive to deepening the conflict. It has waged an un-

declared war through the contras, who, if given sufficient support, hope to topple the Sandinista regime. For Nicaragua, one of the world's poorest nations, this unrelenting aggression has resulted in postponement of economic development.

Material damages, inflicted with United States taxpayers' money, are estimated at more than $400 million. The fighting has killed more than 2,300 people, among them many women, children, students and workers. The Administration's rationale for its policy has been the Nicaraguan Government's alleged totalitarianism, its denial of basic freedoms and the menace it poses to its regional neighbors and ultimately, to United States security interests.

During several trips to Nicaragua and the United States, I have grown convinced that these arguments are, at best, overstatements designed to justify an essentially unjustifiable policy of aggression. The debate on Capitol Hill will, I hope, reveal the distortion and manipulation of fact by high Administration officials.

Yes, the Sandinistas have made mistakes—but they have also registered remarkable achievements that far outweigh their shortcomings. Certainly, their mistakes do not justify the terrible punishment Washington is meting out. My conversations with Nicaraguan leaders in virtually all sectors of society made it clear that the Sandinistas recognize that a better understanding should be developed with the Roman Catholic Church, the opposition party, the press and the Miskito Indians.

But common sense dictates that we all take into account the dramatic social changes that Managua has implemented. The revolutionary Government has outlawed capital punishment and demonstrated extraordinary restraint in dealing with defeated adversaries, the deposed forces of Anastasio Somoza Debayle.

While the Sandinistas must divert a large portion of their financial and physical resources to defense, they have carried out policies that have resulted in a sharp decline in infant mortality rates and have greatly increased medical care for the population. Their health program caused the World Health Organization to select Nicaragua as one of five model countries for primary health care. These successes are mirrored by advances in education, with marked declines in the national illiteracy rate following one of the most effective literacy campaigns in Latin America.

The Administration ignores these accomplishments in its need to escalate the conflict. Through its support for the contras and direct intervention by the Central Intelligence Agency, it has bombed and mined Corinto, the main port, in violation of international law. It has disregarded the International Court of Justice while advocating terrorism against a sovereign state. It unilaterally withdrew from talks with the Sandinistas in Manzanillo, Mexico, and undermined the peace initiative of the Contadora countries—Colombia, Mexico, Panama, Venezuela—when it failed to manipulate that initiative towards its own desired ends.

These acts of hostility and terrorism, far from breaking the Sandinistas' spirit, have only galvanized them in their resolve and rallied much of Latin America to their support. Even high Pentagon officials acknowledge that further assistance to the contras will not bring about military defeat of the Sandinistas.

Existing evidence, a feeling for history and common sense should enable Congress to reject the Administration's counterproductive policies.

At this critical moment, it seems the Sandinistas are ready to support a policy of nonintervention in the region by any external power and an end to arms shipments and use of military advisers in Central America.

The Congress should make clear its respect for self-determination of all peoples and reject the Administration's proposal for continued aid to the contras. At the same time, it must implement measures that would make it virtually impossible to circumvent that decision.

The Reagan Administration should resume talks with the Sandinistas, and seriously support the Contadora peace initiative. The choice is clear: the Administration either continues its policy of destruction and death or chooses one of cooperation and life.●

THE FIGHT AGAINST ILLEGAL DRUGS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday April 17, 1985, into the CONGRESSIONAL RECORD:

THE FIGHT AGAINST ILLEGAL DRUGS

Despite record seizures of drugs and arrests of high-level traffickers, our war on drugs has failed to curb their illegal influx. Only 5-20 percent of cocaine, heroin, and marijuana shipped into the U.S. is stopped at the border. The illegal drug trade earns over $100 billion each year in the U.S. alone, and profits are enormous. Drug trafficking is one of the largest enterprises in America. The U.S. is the largest consumer of illicit drugs in the western world.

The costs of such widespread use are incalculable. At home, drug abuse leads to addiction, broken lives, and death. It imposes heavy burdens on society in lost employment and productivity, crime by addicts and traffickers, and money spent on enforcement and treatment. The estimated cost of these burdens in 1980 was $47 billion. Our drug use adds billions of dollars to the coffers of organized crime, estimated to control more than half of the illegal drug trade. It has world-wide impact as well: drug traffickers use American money to corrupt third-world governments and disrupt their economies. In addition, there is mounting evidence that some governments use American drug money to finance the activities of terrorists and revolutionaries.

Traditionally, we have attempted to control narcotics by eliminating supply in producing countries. 85 percent of the marijuana and all of the herion and cocaine consumed in the U.S. is smuggled from abroad. The international nature of the problem makes control especially difficult. Drugs are an important part of the culture and economy of producing countries. Thus, there is little or no enforcement in some areas against drug trafficking. At boom prices, illegal crops generate ten times as much for a farmer as palm oil, tea, and other legal crops. So many farmers rely on these crops for their livelihood that local governments are unwilling simply to destroy the plants. Some governments themselves depend on "narcodollars" to keep their economies afloat.

The U.S. provides foreign assistance for crop eradication, law enforcement, crop substitution, and demand reduction efforts. A new law calls for the termination of all foreign assistance if the President determines that a country is not making substantial progress against drug production. Use of the law is unlikely in all but the most extreme situations. Most of the drug-producing nations are our allies, and our aid to them is based on a variety of factors, most notably security.

Some efforts to reduce production have been successful. In 1968, more than 70 percent of our heroin came from Turkey. In response to pressure from the U.S., the Turkish government has virtually eliminated illicit heroin production. The Colombian government is spraying marijuana fields with herbicides and has agreed to extradite Colombian traffickers wanted on drug-related charges in the U.S. Alarmed by increasing numbers of heroin addicts among its own population, Pakistan has begun a crackdown of its own. These efforts have had some effect, but supplies of these drugs still far exceed demand. As enforcement increases, traffickers simply move their production operations elsewhere. Heroin production increased in Mexico to fill the gap left by decreased Turkish production. Because the market shifts to meet demand, we face the almost impossible task of controlling narcotics production in all geographic areas simultaneously.

Because of our inability to curtail supply, recent U.S. efforts have focused on stopping imports at the border and cracking down on street dealers and users. Resources for investigating smuggling operations have nearly doubled. Officials say they are busting bigger drug-trafficking groups, jailing more top financiers for longer terms, and confiscating more ill-gotten gains. Court-ordered wiretaps in drug cases have more than doubled over the last two years. Long-term undercover operations are increasing, as are financial investigations that track large purchases or deposits to their sources in drug deals. Federal officials are also using statutes with stiffer penalties, helping to increase the average prison sentence in drug cases by 15 percent.

Greater efforts must be made to eliminate expanded domestic production. Some of the 700,000 persons licensed in the U.S. to prescribe, dispense, or manufacture controlled substances dispense drugs illegally. A majority of overdose deaths involve such drugs. Domestic production of marijuana is now so large that it may be one of the largest cash crops in the U.S. Designer drugs, cheap synthetic drugs with the same effect as illegal drugs but with legal chemical make-ups, are proliferating so quickly that some people maintain that they could render obsolete the international system of drug control.

Many drug control experts doubt that we can ever solve the problem of illicit drug trafficking. They argue that drug traffickers have evaded almost every drug control strategy tried. When a country cracks down on production, the dealers simply move elsewhere. Drugs formerly smuggled into the U.S. through south Florida now enter at other points along the Gulf Coast, in Texas, and along the East Coast as far north as Maine. No matter what enforcement resources are available, there will probably always be enough illicit drugs to supply everyone who wants them. That gloomy assessment fuels the argument by some for le-

galization of drugs. However, fears that legalization would increase the drug problem will likely block any move in that direction.

Besides trying to curb drug supplies, we msut get to the root of the problem and reduce demand for drugs. That means greatly expanding programs on a variety of levels designed to prevent use and to educate our people about the dangers of drugs. We should combine these efforts with programs for detoxification and treatment of drug abusers, and continue research aimed at understanding the causes and consequences of drug abuse.

Some of our efforts against drug trafficking are producing helpful signs, but overall it is proving to be an exceedingly difficult problem. To succeed, we must redouble our efforts at eradication, enforcement, and education.●

BROOKLYN PUBLIC LIBRARY

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. SCHUMER. Mr. Speaker, I stand before you today to honor the Brooklyn Public Library and its employees for doing such an outstanding job. They have contributed much toward enhancing the reputation of the New York Public Library system and libraries nationwide.

The facilities at the 59 branches of the Brooklyn Public Library are utilized by the Brooklyn community on a daily basis. Cardholders enjoy valuable services ranging from children's educational programs, cultural programs, exhibits, facilities for the blind, programs for the elderly, Young Adult Programs, research facilities, and community resources. Because the library system in Brooklyn has so much to offer, it would be a terrible shame to curtail the innovative programs that presently exist.

With this in mind, I find it incomprehensible that President Reagan wants to decrease the amount of funding currently being received by public libraries. Libraries suffered greatly from the 1981 budget cuts. It is unfair to penalize the library system again. We must analyze the cause of the current deficits and attack the source of those deficits. Furthermore, it is a well-known fact that the fiscal year 1986 budget proposal will allocate billions of dollars for the MX missile defense system. It is ironic that the $70 million it takes to produce just one MX missile would more than adequately support the New York Public Library System for an entire year.

I can't imagine why anyone would want to deny children the opportunity to participate in summer reading programs and other educational programs that encourage a love and respect of books and libraries. I also recognize that the 529,555 registered borrowers who currently take advantage of the diverse resources in the Brooklyn Public Library System will not be pleased with the fiscally stringent measures that have been proposed. Decreasing library funding from the current level would also, in the long run, be detrimental to those segments of society who cannot necessarily afford to take courses or attend college. The current budget proposals will also affect the blind, a segment of the population to whom braille services are essential.

There is no denying that books contain a wealth of knowledge, and that trying to better educate oneself is a noble endeavor. We can't afford to jeopardize the future of our country—a future that is dependent upon education. Therefore, it is absolutely essential to give strong support to library programs.●

SUPERFUND PROGRAM

HON. JAMES FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FLORIO. Mr. Speaker, a recent letter from a coalition of major national environmental organizations raises some valid concerns over the administration's proposal to reauthorize the Superfund Program. The coalition's letter points out that the administration's bill would in reality only raise $4.5 billion in 5 years rather than the administration's projection of $5.3 billion.

Putting aside the discrepancy in figures, the coalition points out that EPA itself has estimated it would cost $11.7 billion to clean up 1,800 of the Nation's worst abandoned hazardous waste sites. The General Accounting Office, on the other hand, tells us that 4,000 sites will qualify for Superfund cleanup and the States estimate that the number of sites that will require Superfund assistance is closer to 7,000.

The coalition is also concerned over an increase in the States' share of cleanup under the administration's bill. Under the administration's bill the State share would increase from 10 percent to 20 percent. The State share for State-operated sites would increase from 50 percent to 75 percent. States are already experiencing difficulty meeting their 10-percent share, not to mention that States must deal with thousands of hazardous waste sites on their own without any contribution from the Federal Government.

The administration's bill would also omit certain proposals that existed in last year's House-passed Superfund legislation. The administration's bill omits requirements for the setting of mandatory schedules for Superfund cleanups as well as provisions for citizen suits such as those contained in every other major Federal environmental law. The administration's bill also fails to deal with leaking underground storage tanks.

I recommend this thoughtful letter to my colleagues' attention.

NATIONAL AUDUBON SOCIETY,
Washington, DC, March 12, 1985.

DEAR REPRESENTATIVE/SENATOR: On Friday, February 22, the Administration revealed its Superfund reauthorization proposals. The undersigned organizations reject the Administration's legislative suggestions and urge you to oppose the Administration bill.

The current Superfund law expires in September. In four and one half years EPA has cleaned up only a handful of sites—thousands of others remain unaddressed. Dramatic improvements in the law are urgently needed. Yet the Administration bill demonstrates a thorough lack of concern for the people whose lives and property are threatened by toxic substances.

If enacted into law, the Administration's bill would:

Raise only 4.5 billion dollars in taxes over 5 years to pay for Superfund clean up and other related programs. (The Administration's $5.3 billion estimate for its Superfund bill includes $300 million raised in the sixth year and $500 million in interest and fines.) The EPA itself has estimated the cost of cleaning up 1800 hazardous sites at $11.7 billion. The real cost will be substantially higher. The states estimate that 7000, not 1800, sites will need Superfund assistance and the Office of Technology Assessment has placed the Superfund price tag closer to $40 billion. The National Governor's Association called the Administration proposed funding levels "totally inadequate."

Threaten the integrity of the Superfund tax base. Superfund is currently financed through a tax on basic chemical feedstocks which has proven itself to be a highly reliable source of income. The Administration proposes to shift 60 percent of the Superfund tax base to an untried and unproven waste end tax scheme.

Significantly slow down the pace of cleanup by dramatically increasing the amount of money a state must contribute to response actions before Superfund cleanups can begin. The state share of clean up costs at privately owned sites would double from 10 to 20 percent. The state share for state operated sites would increase from a minimum of 50 to 75 percent. Many states have been unable to meet even their current Superfund obligations in a timely manner.

Weaken current law by threatening communities now protected by Superfund. The Administration's proposal prohibits Superfund from being used to address certain classes of life threatening hazardous substances releases (unless the President has determined that a major emergency exists, and that no other person has the capability to respond to the emergency). Many sites now proposed for Superfund action would be denied federal assistance and sites not yet proposed would be ineligible for the basic studies needed to determine Superfund eligibility.

For example, EPA could not routinely clean up poisoned drinking water supplies unless the contamination was known to be caused by a facility that handled hazardous substances. Water supplies currently proposed for inclusion on the National Priority List would be removed from Superfund's jurisdiction, including water supplies in, New

York, California, Michigan, Minnesota, Nebraska, New Jersey, and North Carolina. EPA would be precluded from funding the studies needed to determine if other contaminated water supplies should be cleaned up.

For example EPA would also not be able to routinely clean up public health threats caused by the extraction and processing of ores and minerals.

Legalize substandard cleanup. The Administration's proposal allows EPA cleanups to violate public health standards and criteria established under other relevant environmental laws for any reasons promulgated by the agency in its National Contingency Plan. The National Contingency Plan, now being proposed, sanctions dirty cleanups, by allowing unnecessarily broad waivers for applicable standards.

Fail to provide adequate health assessments at communities threatened by hazardous substances releases. The proposal does not require EPA to initiate health assessments, regardless of the seriousness of the threat.

Fail to compel the clean up of dumps owned by the federal government.

Fail to put EPA on a schedule to speed cleanup.

Fail to address contamination of natural resources which threaten the food chain.

Fail to clean up communities threatened by the release of petroleum products from leaking underground storage tanks.

Fail to provide citizens with access to the courts to require EPA to carry out its duties under Superfund.

Fail to provide appropriate relief to victims of hazardous substance releases including failing to establish a federal cause of action.

The Administration's proposals are wholly out of touch with the needs of the American people for a strong Superfun program. We urge you to reject the Administration's Superfund bill.

Russell Peterson, President, National Audubon Society; Alden Meyer, Director, Environmental Action; Jack Sheehan, Legislative Director, United Steelworkers Union; Martha Broad, Resource Specialist, Natural Resources Defense Council; Gene Karpinski, Director, U.S. PIRG; Ira Arlook, Co-Director, Citizen Action; Rabbi David Saperstein, Director, Religious Act Center, Union of American Hebrew Congregation; A. Blakeman Early, Washington Representative, Sierra Club; Joan Claybrook, President, Public Citizen; Glenn Watts, President, Communications Workers of America.●

COMPULSIVE GAMBLERS NEED HELP

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. COURTER. Mr. Speaker, I wish to commend to my colleagues an excellent article, "Compulsive Gamblers Need Help."

COMPULSIVE GAMBLERS NEED HELP

(By Arnie Wexler)

PARLIN, NJ.—If you took the pari-mutuel machines out of the race tracks and put them in the stadiums where football, baseball, basketball, and other sports are played, no stadium would be big enough to seat the people who'd want to come in and bet. And the race tracks would be closed.

Eighty-eight million people in the USA gamble; 12 million are compulsive gamblers. And 79 percent of all compulsive gamblers bet on sports events.

With 5 percent of the population identified as compulsive gamblers, there's no reason to believe that 5 percent of athletes, managers, and the people in the broadcast booths and press boxes aren't the same.

The media are a significant part of the problem. The same newspapers and TV commentators that leap to pillory a guy like Denny McLain are publishing point spreads, handicapping the horses, and providing other services to gamblers. Compulsive gambling is an impulse reaction and seeing the point spreads can be the spark that pushes compulsive gamblers to place bets.

Go to a sports event. You hear the buzzing in the stands when the home team is ahead but isn't making the spread. Any time there's an interception in football or a missed layup in basketball, you hear screaming that the game is being dumped. It's hard for sports to get and keep a clean image.

But when owners of sports teams are allowed to own race tracks or incur heavy gambling losses and still keep their franchises, how can you pick on Mickey Mantle and Willie Mays for working for a casino?

I've worked with an ex-major league player who got in trouble because of gambling, was sent to the minors, and ended up out of baseball. I worked with a minor leaguer who's no longer in baseball; gambling took its toll. I know athletes playing now who have serious gambling problems.

The answer is not to send athlete-gamblers to jail or drive them out of their livelihood. The answer—assuming they want help and are willing to make restitution where called for—is to send them into rehabilitation programs and Gamblers Anonymous.

I know team owners who've bailed star players out of their gambling debts or traded gambling players away to get rid of them. But the answer is not to bail a gambler out, ship him out, or lock him out; the answer is to help him help himself out.

GAMBLING SCANDALS

1919–1922: Eight Chicago White Sox players conspired with gamblers to throw the 1919 World Series. They were barred from baseball for life.

1951: Two Manhattan College players were accused of accepting $5,000 to fix games. Gambling scandals hit three other New York schools and Bradley University.

1952: Three ex-Kentucky stars were charged with taking $500 in bribes to fix a tournament game.

1961: Two gamblers were charged with bribing University of Connecticut players to keep scoring down.

1963: NFL players Paul Hornung and Alex Karras were suspended for betting on football games.

1970: Denny McLain, baseball pitcher, was suspended for alleged involvement with bookmakers.

1979: A Boston College forward and four others were convicted of conspiracy to engage in sports bribery.

1982: NFL quarterback Art Schlichter was suspended for betting, and reinstated after rehabilitation.●

STUDENTS' QUESTIONS ABOUT WORLD AFFAIRS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. DORNAN of California. Mr. Speaker, I wish to recognize Mr. Jim Silva, an outstanding teacher at Los Amigos High School in Fountain Valley, CA.

I addressed Mr. Silva's classes of 341 students, plus 11 faculty members and several parents recently and was very, very impressed with the broad range of questions asked by the group. Students touched on many of the questions that my colleagues and I wrestle with each day as we work to develop effective public policy.

I would like to share most of the students' questions with my colleagues. How goes it with the high school students in your districts? These young people today are most impressive.

Questions attached.

Why do we give so much foreign aid to Israel? Do they receive more than their share of American foreign aid?

Who do you see as the strongest Republican contender in 88? Jack Kemp or George Bush. Isn't Vice President Bush, really a liberal at heart?

Do you agree with Senator Barry Goldwater that the current administration is throwing money at Defense contractors. The example Goldwater used, was a military tank costing 3 million dollars in 1979 and the same tank costing 15 million in 1982.

Why was Cassius Clay entertained at the White House, after he refused to serve in the military? Wasn't that an insult to the American Men in uniform?

Do you feel Time magazine should have been forced to pay Israeli Defense Minister Ariel Sharon for the libel they were guilty of committing against Sharon.

What is the salary of a Congressman?

Does the government pay for you to move your furniture back to Washington and back to California if you are defeated. Does the government ever pay for your family to fly back to California?

Why does President Reagan allow moles to work in top security areas. It seems like a lot of vital information is leaked to the press. What do you think of the Washington Post and their article on our secret missile.

What is Rep. Edward F. Feighan like as a person. Do you think he created problems in South Korea, at the airport? Isn't the American Ambassador upset with him?

Why did Jesse Jackson go to Cuba and bring back criminals. Don't we have enough dope dealers in this country now. Did he do it for a joke?

Do you feel Ted Kennedy will be hard for the Republicans to beat if he should get his parties Presidential nomination? He seems to be a very Christian fellow, with his current trip to Africa and all.

Why did President Carter want to give the Panama Canal back? Do you feel that his top aide Hamilton Jordan gave him bad advice on numerous occasions?

After watching the CBS nightly news with Dan Rather, I get the feeling he is slanting the news to favor liberals. How can the American people be protected from the Dan Rathers and Tom Brokaws.

What is your definition of treason?

Why wasn't Jane Fonda tried for treason against the United States for her role in helping the North Viet Cong during the Viet Nam conflict?

Do you feel the President is incompetent in military areas? The President said he was responsible for the marines killed in Beirut. Rumor has it that our marine guards were guarding the compound with empty rifles. How could the President be that ignorant?●

DEFENSE DEPARTMENT'S WHITE PAPER ON CENTRAL AMERICA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BARNES. Mr. Speaker, recently we all received a slick publication from the Department of Defense, entitled "The Soviet-Cuban Connection in Central America and the Caribbean." While this white paper contains some valuable information, it may be misleading in several respects.

The Subcommittee on Western Hemisphere Affairs, which I have the honor to chair, recently held a hearing on the Soviet presence in Latin America. At that hearing, a noted scholar and author of a State Department study on the subject, Prof. C.G. Jacobsen of the University of Miami, presented a critique of the white paper. So that the Members will have the benefit of his analysis, I am submitting Professor Jacobsen's critique for the RECORD.

The article follows:

THE DEFENSE DEPARTMENT'S WHITE PAPER ON CENTRAL AMERICA

The second Reagan administration's first, early 1985 white paper on Central America embodies and epitomizes all the problems that plagued its precursors. It is rhetorically aggressive, and tendentious. But it contains few facts. Some of the hard data that is presented is misleading, because it is presented out of its proper context; some is mutually contradictory; none is new.

A credible case for reasoned American concern can be made. The white paper does not make it. It makes no reference to the now impressive body of scholarship that is available, and from which the solid data required for a realistic, balanced case could be extracted; nor does it refer to the exhaustively-documented (and State Department funded) Jacobsen Report of June 1984, on Soviet Attitudes Towards, Aid To, And Contacts With Central American Revolutionaries, which reflects the burgeoning trove of academic research, and which does make the case. Substitution of a caricature spectre for proper threat analysis invites disdain, and alienates allies.

The white paper edits on April 1983 discussion between Soviet Foreign Minister Gromyko and Grenadian Prime Minister Bishop, to suggest deceitful Soviet masking of aggressive intent. But the full Gromyko quote was cautionary. It reflected a late 1982 Soviet policy decision to adopt a lower profile—because of the escalatory dynamic of American military pressure on Managua, and because of growing realization of the limits of influence. Moscow gave enough to ward off accusations of betrayal. But she limited investment to one she could afford to lose.

The white paper figures show that Soviet-bloc military equipment still reaches Managua, but at a much-reduced rate. Today's administration figures show 1500 Soviet and East European trucks in Nicaragua; by early 1983 there were already more than 1350. Similarly, the 110 T-55 medium tanks represents only a modest increase on mid-1983 numbers (it was then that Nicaragua established its second tank brigade).

The tanks, and most of the conventional equipment acquired by the Sandinistas, are of considerable vintage, though of course still potent; the T-55s, first deployed in 1961, are a development of the T-34/85, of late World War II fame. They are not useful against guerrillas. And the lack of suitable terrain en route to, for example, Tegucigalpa, the Honduran capital, severely constrain their offensive potential. Amphibious capability, the ability to ford a river, is not useful if mountains and jungle preclude access to the river bank.

The Mi-25 helicopter gunships are modern, and eminently suited for counterinsurgence operations; they are not much use in hostile air environments (as against Honduran or other jets).

The spectre of Mig-21s, and of Bear reconnaissance flights appears unduly alarmist. The early-model Mig-21s (it entered service in 1959) that a country in Nicaragua's "ideological bracket" would normally receive would not ensure air superiority against Honduras. But that is irrelevant. Moscow clearly appreciates Washington's position that their introduction would constitute a casus belli. Available evidence suggests Soviet determination not to be cast in the role of instigator; it would dilute the propaganda harvest that she expects to reap in the event of final U.S. action.

Hypothetical Bear reconnaissance flights and Soviet naval facilities at Bluefield Bay fall in the same category; they would give undesired credence to Washington threat spectres. The most sensitive "targets" on the West Coast, in particular the Trident base complex in Puget Sound, are in any case nearly as far from insecure Nicaragua as they are from Soviet Far Eastern territories. Similarly, no Naval commander with access to Cuban ports would voluntarily redeploy to a facility so exposed to sabotage and attack, from such a plethora of hostile elements.

The white paper is not consistent. Some sections talk of real "Marxist" military threats and operations; elsewhere the danger is said to emenate from the "high degree of congruence in Soviet, Cuban and Nicaraguan foreign policy goals". The legitimacy of America's posture is said to derive from Nicaragua's position as a geographical neighbor, but when Nicaragua's force potential is compared to her "neighbors", U.S. forces in Honduras and off her coasts are excluded from consideration. (Rather than comparing Nicaragua's active and reserve forces with Brazil's active soldiery, it might be more relevant to note that Nicaragua's composite total is far smaller than Finland's).

The white paper lacks balance. It correctly states that Thomas Borge describes himself as Marxist-Leninist, but ignores the fact that Nicaragua's government also includes other tendencies, from "liberation theologians" to Cordova Rivas, former head of the Conservation Party. It notes guerrilla alliances in El Salvador and Guatemala, but ignores the fact that pro forma unity was imposed as a precondition for Cuban support, that internecine struggles continue, and that Soviet-oriented factions do not predominate.

It speaks of peasant alienation and opposition to Cuban and East-bloc "foreigners", which is real, but ignores the fact the extensive support for the Sandinistas, and for Salvadoran and Guatemalan rebels, is also real; "elaborate series of (supply) corridors" through what are heavily populated regions apparently escape interdiction.

El Salvadoran insurgents are said to have acquired American weapons from Vietnam, and there is no question that some such arms did indeed arrive, through a variety of channels, during 1972-82. But there is no evidence that this persisted. There is evidence that arms acquired since 1982 came courtesy of El Salvador's military; rebels now profess need of boots and medicine, not arms.

The white paper invokes Allied and Church support for El Salvadoran "elections," and for administration policies throughout the region. But both are misleading; both are simplistic. Nicaragua may be Marxist-dominated and she may incline to authoriarianism, but she is not (yet) a Soviet "satellite", either politically or economically—and a broader look at the evidence in fact suggests that she is not likely to become one. Moscow is resigned to minimal expectations. She has no illusions of this score; neither should Washington.

Nicaragua is a garrison state. But Western journalists attest to considerable more freedom to travel and probe there than in Guatemala. In fact, in terms of the killing or maiming of Western observers over the last five years, Guatemala makes Nicaragua look like a veritable haven.

Nevertheless, if the Sandinistas' Nicaragua is not "communist" in either the pure Marxist sense or in the Soviet sense, she is anti-American, and she does espouse an ideology, however diffuse, which does run counter to American interests. And while Moscow might realize that she cannot control or dictate events in this region, she does aspire to influence and mischief; she also views dynamics here not in the abstract, but as integral components of a global picture, a picture that also includes Afghanistan, and other pressures closer to home.

The gross exaggerations of the administration's preferred image of the region invites rebuke, and distracts attention from the real causes for concern. Caricature invites caricature, not debate. The administration's avoidance of real debate, indeed, its de facto suppression of read debate, is perturbing.●

A WARNING TO QADHAFI

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BROOMFIELD. Mr. Speaker, the administration's recent warning to Libya on terrorist activities is wel-

comed by all Americans who believe that Qadhafi has gone too far in promoting terrorism. The following New York Times article describes the Libyan leader's latest plans for terrorism.

As my colleagues know, Qadhafi recently announced the formation of a "Pan Arab Command" to carry out acts of violence against the United States, other Western nations, and moderate Arab regimes.

Our President wisely warned Qadhafi that he would be held responsible for any Libyan terrorist acts against the United States. His plan to form a "Pan Arab Command" is just one of a series of recent Libyan efforts in the area of terrorism. Just a few weeks ago, Qadhafi announced that the Sudan was Libyan territory and warned that President Reagan would lose his nose if he tried to interfere in developments in the Sudan.

In recent weeks, a Libyan anti-Qadhafi exile living in Bonn was gunned down by a Libyan hit man as he walked in that city. He is one of many exiled Libyans who have been assassinated by Libyan terrorists during the past few years. Qadhafi has also been accused of operating a radio station from a ship, anchored off the north African coast, that is allegedly broadcasting calls for north Africans to kill Zionists.

In addition to engaging in acts of terrorism itself, Libya trains, funds, and gives false documentation to terrorists from a variety of countries around the world. In a sense, terrorism has become an instrument of Libyan foreign policy.

Enough is enough, however. I commend the President for speaking out on this critical issue of putting a stop to mindless terrorism. Given the serious interest that the administration has in trying to do something about this growing menace, I would hope that Qadhafi and company are listening very carefully.

With these thoughts in mind, I recommend the following article on Libyan terrorism to my colleagues in the Congress.

[From the New York Times, Apr. 3, 1985]

U.S. WARNS LIBYAN LEADER ON TERROR GROUP

WASHINGTON, April 2.—The Reagan Administration criticized Col. Muammar el-Qaddafi of Libya today for his formation of a "Pan Arab command" to carry out acts of violence against the United States, other Western nations and moderate Arab regimes.

Following up on a similar warning to Iran made privately in recent weeks, the Administration publicly warned Colonel Qaddafi today that he would be held "fully responsible" for Libyan terrorism against the United States.

Colonel Qaddafi, who has repeatedly supported revolutionary movements, said on Sunday that "there is no alternative to confronting the enemy with violence."

Speaking in Tripoli at the conclusion of the first meeting of the Pan-Arab Command for Leading the Arab Revolutionary Forces, he praised the suicide attacks on American and other installations in the region.

"We want every one of us to say: I have decided to die just to spite America," he said. "If we could bring this nation to the point where it possesses this determination it will definitely win."

He said violence should be brought to bear against the United States and such countries as Egypt and the Sudan, which have been his chief adversaries.

Reflecting Washington's heightened security concerns, the Administration moved quickly to indicate that it took Colonel Qaddafi seriously.

"The world cannot tolerate the lawlessness and terrorism which Qaddafi so openly advocates," Bernard Kalb, the State Department spokesman, said. "He should know this and be aware that Libya will be held accountable for its actions."

"Our own views on terrorism and Colonel Qaddafi are well known," Mr. Kalb continued. "We will hold Qaddafi fully responsible for Libyan terrorism against Americans and other U.S. interests, whether carried out abroad or in the United States. Likewise, we will continue our consultations and cooperation to assist governments threatened by Libyan aggression."

How the new force announced by Colonel Qaddafi will operate is unclear. Its mission is to be a kind of supra-Arab force, not beholden to any one state, but organized and outfitted by the Libyans, and it would be so zealous as to be willing to carry out suicide attacks if necessary.

The Reagan Administration has condemned Libya for its acts of terrorism and in effect has severed most ties with it. But the Administration says it has been frustrated by the failure of other countries to isolate Libya.

On several occasions the Administration has moved aircraft carrier task forces into waters near Libya and in 1981 two Libyan planes were shot down by an American F-14.

Robert G. McFarlane, the White House national security adviser, said last week that the importance of having allied backing was "probably nowhere better exposed than in the case of Libya."

He said that the various sanctions taken by President Reagan in 1981, such as cutting off oil imports from Libya, refusing to sell Libya items that could benefit its economy and trying to dissuade Americans from living there, had some effect, "but I wouldn't pretend that it's had an effect of stopping Libya's behavior and support for terrorism."

He said that "until we can stop the training by Libya of other terrorists, the graduates of whose camps are spread from the Philippines to Ireland, Libya remains a menace and a risk to us, as well as our friends."

President Gaafar al-Nimeiry of the Sudan, who is in Washington on an unofficial visit, said today in an interview with United Press International that he had thwarted a plot by Moslem fundamentalists, armed by Iran, to overthrow his regime last week.

He said that the Moslem Brotherhood, which had led him to introduce Islamic law to the Sudan 18 months ago, had turned out to be too extreme, and that he had arrested 160 of its members. As a result, he said, the group organized the demonstrations against him. He said that they had received explosives and weapons from Iran.●

HELSINKI HUMAN RIGHTS DAY

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LEVIN of Michigan. Mr. Speaker, Senate Joint Resolution 15, calling for the designation of May 7, 1985, as Helsinki Rights Day, has my wholehearted support. Human rights experts from all 35 signatories, including the United States, will assemble in Ottawa that day to begin a review of the implementation of the human rights provisions of the Helsinki accords. It has been nearly 10 years since this land mark agreement was signed by the nations of Europe and North America establishing the rights of individuals regarding their governments and affirming the right of individuals to be protected from their governments. Events during those 10 years have indeed demonstrated how relevant these rights are to the quality of human life.

The principle of the protection of individual liberty is firmly rooted in our own Government and the historical experience of our people. Over the last 200 years we as a nation have struggled to live up to that principle both at home and abroad. We have defended that principle in the world arena and advocated it as an essential component of Government. Our own commitment to this principle now embodied in the Helsinki accords should not falter because of all too common violations of those human rights accords by some of the signatories.

Yesterday, I learned that Abe Stolar, who is both an American citizen and a Soviet refusenik, has been told that he, his wife and son will be allowed to emigrate after 9 long years of waiting. Many of my colleagues are familiar with the tragedy of Mr. Stolar's case. As a young man Abe accompanied his parents to their native Russia. Without his knowledge or consent, Abe was made a Soviet citizen. He has lived as a law abiding citizen in the Soviet Union for the last 52 years; his only crime that he and his family filed for exit visas in 1975 so that they could leave the Soviet Union. And yet, the Helsinki accords, to which the Government of the Soviet Union agreed, guarantee a citizen's right to emigrate.

What then could be wrong now that Abe is being allowed to leave? During the 9 long years of waiting, Abe's son Michael has taken a bride, a happy occasion to be celebrated in most societies. But the Government of the Soviet Union is turning this family blessing into a family tragedy by refusing to allow Michael's wife to join the Stolar family as they begin their new life in Israel this Saturday, April 20, 1985. In clear violation of the spirit

of the Helsinki accords which guarantee freedom of religious practice to citizens of the signatory nations, the Government of the Soviet Union has refused to recognize the marriage of Michael and his wife Julia because it was performed by a rabbi. It is my fervent hope that the officials of the Soviet Government who are responsible for this unreasonable situation will reevaluate their decision and grant Julia Stolar permission to join her family as they emigrate to Israel this weekend. I urge my colleagues in the Congress to join me in asking the Soviet Government to reconsider its most unfortunate interpretation of the Helsinki accords.●

HISTORY OF HUMAN RIGHTS ABUSES IN HAITI

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. OWENS. Mr. Speaker, today I am introducing a concurrent resolution which seeks the withdrawal of the most recent certification that Haiti is making progress in ensuring human rights. This history of human rights abuses in Haiti is long and disheartening to all who are concerned about the dignity of mankind and the possibility that people can work together to better the conditions of their lives. However, the past is not as important as the present or future. As we review events of the last year, it becomes clear that the human rights situation in Haiti is not becoming better and that it may indeed be getting worse. Like the child's game of giant steps, Haiti takes one small step forward and one giant step backward. The small steps forward are the proclamations which recognize the basic rights and the giant steps backward are the summary arrests of those who dare to believe and act as if they could exercise those rights.

In the past, those who were politically active were most likely to be subjected to arrest, incommunicado detention, and physical abuse. In the last year, those who have been active in community development and work with the poor have also been subjected to arrest and abuse. Many of those arrested have been associated with the Catholic Church and these arrests have been protested by the church in Haiti.

Although one must view every situation within the context of a nation's history, economy, and culture, this has been used as a pretext for accepting the unacceptable in Haiti. For example, the Department of State noted that the Haitian Government acted with restraint when three people were killed last May. It is beyond belief that a similar statement would be acceptable after American police fired upon an American crowd and killed three people.

As I reviewed the Department of State's certification report I was confronted with example after example of accepting the unacceptable. Although I appreciate the candor of the report, I cannot accept the assumption that abuses are acceptable elsewhere.

There are no easy answers for Haiti. The country is poor and there is a great need for development of the infrastructure and industry. Measures must be taken to protect the agricultural land and replant forests which control water flow to that land. While development takes place, it is easy to overlook the day to day lives of the Haitian people. The day to day realities, however, are the most pressing issue for those who must endure the fear and hardship which result from the government's oppressive policies. The day to day realities are also our window through which the future of Haiti may be seen. The future does not look promising.

A resolution of this body and the other body will do little alone. It is my hope that a discussion of the issues will lead to a broad-based national commitment to support the political and economic development of Haiti for all of the Haitian people.

The resolution that I am introducing follows:

H. CON. RES. 120

Concurrent resolution expressing the sense of the Congress that the President should withdraw the determination that the Government of Haiti is making progress toward improving the human rights situation in Haiti and progress toward implementing political reforms which are essential to the development of democracy in Haiti, such as progress toward the establishment of political parties, free elections, and freedom of the press

Whereas the President determined in January 1985, pursuant to section 540 of the Foreign Assistance and Related Programs Appropriations Act, 1985 (contained in section 101 of Public Law 98-473), that the Government of Haiti "is making progress toward improving the human rights situation in Haiti and progress toward implementing political reforms which are essential to the development of democracy in Haiti, such as progress toward the establishment of political parties, free elections, and freedom of the press";

Whereas increasing numbers of Haitians have disappeared, including some who have been deported to Haiti by the United States;

Whereas in the February 1984 legislative elections, the Government of Haiti did not allow opposition candidates, resorted to intimidation and altering of results to secure victories in some areas, and arrested poll watches of Serge Beaulieu, the only independent candidate, who was defeated;

Whereas riots began in May 1984 after a pregnant woman was beaten to death, and although 3 other people were killed, the Department of State found that the Government acted with restraint;

Whereas two new independent publications, L'Information and Fraternite, joined the weekly LePetit Samedi Soir, but on June 18, 1984, the publishers of all three of these publications were jailed for 48 hours, the publisher of L'Information was beaten during that 48 hours and his arm was broken (which, as the Department of State observed, served as a reminder of the limits of freedom of the press), and Fraternite has not been published since June 1984;

Whereas Gregoire Eugene, a leading opposition figure, returned to Haiti in February 1984 but was not allowed to run in the election and was under house arrest from June through September 1984, and oppositionist Sylvio Claude was not permitted to run in the February 1984 elections, was put under house arrest and released after the elections, and went into hiding in July 1984 after his printing press was taken and his daughter beaten by a soldier; and

Whereas Haiti's representative to the United Nations Educational, Scientific and Cultural Organization, Hubert De Ronceray, was detained on July 4, 1984 for 48 hours and was then placed under house arrest and not released until September 23, 1984: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President should withdraw the determination that the Government of Haiti is making progress toward improving the human rights situation in Haiti and progress toward implementing political reforms which are essential to the development of democracy in Haiti, such as progress toward the establishment of political parties, free elections, and freedom of the press.●

IDA REPLENISHMENTS

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention an April 10, 1985 article in the Wall Street Journal regarding the International Development Association [IDA]. The authors are Steve H. Hanke and Alan Rufus Waters. As a member of the Foreign Operations Subcommittee on Appropriations, I have expressed numerous concerns during committee meetings regarding the IDA replenishments. As the article concludes, IDA loans frequently support economic practices that are the antithesis of free market policy and are out of step with those domestic economic policies that we know promote growth.

REAGAN SHOULDN'T GO SOFT ON FOREIGN LOANS

(By Steve H. Hanke and Alan Rufus Waters)

Bolstered by daily news accounts about famine in Africa, as well as pictures of its pitiable victims, foreign aid advocates are working Capitol Hill as if it were a French vineyard. They have expressed outrage about the Reagan administration's newfound, but tentative, unwillingness to commit itself to the future support of the

International Development Association. A member of the World Bank Group, IDA grants soft loans on highly concessional terms to lesser developed countries.

During hearings last month in the House, a sympathetic ear was given to the pleas for more aid, which were presented by no less than former secretary of the treasury Henry Fowler. It is clear that if the Reagan administration's new firmness on IDA is to amount to more than a sand castle facing a rising tide, it will have to fortify its position.

Although the Reagan administration will honor its May 1984 pledge of $2.5 billion to the Seventh Replenishment of IDA resources, it has put IDA and its client states on notice that "in light of current severe fiscal pressures, the administration is not budgeting at this time for future replenishments. . . ." U.S. budget issues aside, a substantive case can be made against future support for IDA. To this end, we will rely on information contained in "IDA In Retrospect," a volume published for the World Bank by the Oxford University Press.

IDA was established in 1960 to make concessional loans where commercial banks and multilateral development banks feared to tread. Since its establishment, IDA has expanded at a rapid rate. In fact, it has grown more rapidly than the economies of either the donor or recipient nations that participate in IDA. By July 1984, IDA had extended total credits of $33.7 billion. Loans are interest free with a 10-year grace period and 50 years to repay (minor fees are imposed). In IDA's own words, "These terms were designed to be as close as feasible to the economic equivalent of grants, while retaining the form of repayable loans."

Although some 40 nations have contributed funds to IDA, the U.S. has proved to be the softest touch, accounting for 31% of IDA's total funding. This percentage increases to 75%, if the contributions of Canada, France, Japan, the United Kingdom and West Germany are included with those of the U.S. Neither the Soviet Union nor its Warsaw Pact allies contribute to IDA.

Eighty-two countries have been recipients of IDA's largesse. Many of these, while more than willing to accept the West's soft loans, embrace an ideology that emanates from the East. Notable examples include; Laos, Ethiopia, Guinea-Bissau, Afghanistan, Vietnam and Tanzania. Red China, too, has become an effective sponge for IDA funds, soaking up close to $1 billion in credits.

These data reveal that one of the important unofficial premises used to justify U.S. participation in IDA—that our participation allows us to exert political influence on recipient nations—is questionable, at best.

The IDA soft loans have wrought two products; the seen and the unseen. We discuss these in turn. Most of the IDA credits have been channeled toward public works infrastructure projects that can indeed be seen. These public-sector monuments include: irrigation projects, roads, bridges, ports, railways, power stations, telecommunications systems, urban water and sewerage projects, schools and public housing. According to IDA's reckoning, these projects have generated respectable rates of return—the World Bank audited 183 projects and found an average rate of return of 21%.

If we accept these data at face value, the Reagan administration's unwillingness to fund future IDA replenishments would not, contrary to claims made by foreign-aid advocates, jeopardize so-called public infrastructure projects. Projects could be financed with commercial loans obtained at home or abroad, since projects could generate sufficient yields to service commercial credits.

The second IDA product, the unseen, should also give the Reagan administration further cause to withhold future IDA replenishments. This is the establishment and funding of state planning and management bureaucracies. IDA refers to the funding of these activities euphemistically as "institutional development and technical assistance programs." To take one example, but one that IDA considers to be its crown jewel, consider IDA's accomplishments in the Yemen Arab Republic (North Yemen). In 1970, when the YAR became a member of IDA, "the information needed to identify investment possibilities and to assess financial requirements was lacking." In consequence, IDA funds were used to establish the YAR Central Planning Organization, which "has played a central role in guiding the country's development. . . ." Apparently this was not enough, and so IDA funding was used to subsequently establish the following public entities: the Highway Authority, the Tihama Development Authority, the Industrial Estate Development Authority, the Yemen General Grain Corporation, the Yemen General Electric Corporation, the Industrial Bank of Yemen, the Ministry of Municipalities and Housing, and the National Water and Sewerage Authority.

These and like-minded institutions established by IDA have all had their inevitable consequences. They have provided jobs, publicity and perquisites for politicians and civil servants. Also, these public entities have provided effective mechanisms to keep the foreign aid flowing. For example, in the case of the YAR, these public bodies "have been able to be of significant assistance to the government in devising its economic and sector policies, developing national institutions, and preparing projects for other donors." But more important, these public planning institutions have acted to control and allocate resources in recipient nations, intervene in markets and politicize economic life in the lesser developed countries. These actions have dissipated economic wealth, retarded economic development and will guarantee that the wretched figures that we see on foreign-aid posters remain in a state of abject poverty.

Given that the Reagan administration advocates free markets, deregulation and privatization as a means for promoting economic growth at home, it would be disingenuous to embrace IDA funding that is used to establish public institutions that promote suffocating market interventions, regulations and nationalizations abroad.

That the Reagan administration is on solid ground in refusing to budget money for future IDA replenishments is evident. What is not clear is why the administration agreed to IDA's Seventh Replenishment in 1984 and whether President Reagan will, in fact, let the budget ax fall where it should.●

THE ANNUAL CANADIAN SEAL HUNT MUST BE STOPPED

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LANTOS. Mr. Speaker, the Canadian Royal Commission on Sealing and the Seal Industry is holding sessions here in Washington to receive testimony from American political leaders and environmental groups on this important and sensitive issue. Today, I presented a statement to the Royal Commission, and I would like to share with my colleagues in the House the testimony which I presented to the Commission:

Gentlemen, I would like to thank you for this opportunity to present testimony to you today. As one who has followed the Canadian seal hunt closely for many years, I am pleased to share my views with you.

I wish, first of all, to express my thanks to you for your visit to Washington, DC, to receive testimony here. It has been suggested by some that seals and the sealing industry is purely a Canadian concern. Seal hunting is of worldwide interest, it has international implications, and—most importantly—any action which affects the environment is a matter for global concern.

Furthermore, our two countries are closely linked by our common border, we share many rivers and lakes, and our economies are closely interrelated. The closeness of our two countries in so many areas suggests that the precedent which the Royal Commission has established should be followed in many other fields as well.

Americans have long followed the Canadian seal hunt with particular interest and deep concern. The overwhelming majority of Americans oppose the killing of baby seals—this is not simply the concern of a small number of animal welfare advocates but the strong belief of most Americans.

The appalling pain and unnecessary suffering of the annual seal slaughter is well known and thoroughly deplored—bludgeoning the defenseless baby seals and in many cases skinning them while they are still alive.

Mr. Chairman, in my testimony today I do not wish to focus on these ethical concerns, as important as they are. Many others have focused your attention on this issue. As a professional economist—I received my Ph.D. in economics at the University of California, Berkeley, and prior to my election to Congress I was a professor of economics at San Francisco State University—I wish to discuss the economic arguments of this matter.

It has become clear over the past few years that continuing the annual seal hunt is not only a gross violation of all humane standards, but it is also uneconomical for both the Government of Canada and for the Canadian seal hunters.

The sealing industry is not a major source of individual income in the Atlantic Provinces of Canada. Hunters have tried to claim that their livelihoods depend on sealing. The president of the Canadian Sealers Association, Mark Small, recently testifying before this Royal Commission argued, "Some say we hunt for sport, but it's to provide bread and butter to go on to my table. It's to send my boys to the university. It's a necessity." Such statements are extremely misleading.

The seal hunt lasts a maximum of 4 weeks each year. No fisherman has ever made a living exclusively from sealing—it is a supplementary source of income, and a very small one at that. For example, in Newfoundland, only a tiny fraction of the population—about 1 percent—is involved. The chairman of the Economic Council of Canada, Dr. Keith Fondel, estimates that

"sealing brings a gross return of some $5 million to Canada" (Science, February 19, 1982). Between 1976 and 1980 it is estimated that only between 5,000 and 7,000 sealers participated in the hunt, and the average return to the individual seal hunter varied from $400 to $700.

In reality, the sealers have seen remarkably little of the income generated by the hunt. Seventy-one percent of the sealers share only 12 percent of the income. The large fur-processing companies and the Government have received the bulk of the proceeds.

Furthermore, since 1982 the annual revenue from sealing has dropped dramatically. As all of us here are well aware, the reasons for this drastic reduction are not to be found in any actions taken by the Canadian Government which has provided generous subsidies to the sealers until this year. The decline in world markets has brought about this change.

The EEC ban on seal products followed widespread public outcry in individual member countries such as West Germany, Great Britan, and France. The people of these countries have demonstrated their indignation at the continuing hunt by simply refusing to purchase seal products. Nor does it appear likely that other markets will open up. Interest from the Japanese has been extremely limited, since the Japanese prefer softer furs such as mink. Bernard Nygoard—president of Carino, the last remaining Canadian buyer of seal pelts—acknowledged this: "This market as we know it has disappeared completely."

The Canadian Government has acknowledged that this is a dying industry by withdrawing its price supports. It is uneconomical for sealers to continue a 4-week annual hunt when there are no longer any purchasers of pelts. It is time for sealers to examine whether, in fact, other opportunities are not readily available to supplement their incomes.

Let me suggest at least one important area where opportunities exist for sealers to find alternative income—tourism. There is new interest in this growth industry—an interest which can benefit a much larger share of the population, including the seal hunters of the Atlantic Provinces. Increasingly, travelers are seeking out the unusual and taking more adventurous vacations. For example, we have witnessed increased interest in excursions to such places as the Antarctic, a part of the world formerly considered beyond the interest or reach of the average tourist. On both the Pacific and Atlantic coasts of the United States whale-watching expeditions have become commonplace.

In Canada there is already interest in selling seal watching. Dr. Eugene Lewis of the University of New Brunswick has formed a company to provide guided tours of the harp seal herds in the Gulf of St. Lawrence this spring. The New York firm of Linblad is also examining the market. Paul Watson, who testified earlier before this panel and who is currently carrying out a study of the possibilities of seal tourism, said, "The seal grounds are one of the most awesome wildlife experiences in the world today."

The service structure for tourism already exists in the Atlantic Provinces. The hotels of Prince Edwards Island, Nova Scotia, and Newfoundland are vastly underutilized during the winter and early spring months. Increased tourism in these slack seasons would create hundreds of new jobs. The role of the sealers would be key to the success of this venture, with their unrivalled knowledge of the terrain, weather conditions, and the behavior of the seals.

The Canadian Government has already launched an effort to encourage tourism. Tom McMillan—the new Canadian Minister of Tourism and a native of Prince Edward Island—stated in a recent interview: "Tourism is an economic entity * * * we are packaging the whole country. Every single Canadian is in the tourism business." Seal watching could be a significant new field with enormous potential.

The conclusion is obvious—it makes economic sense to stop the seal hunt, which contributes little to the economic health of the Atlantic Provinces because the markets for seal pelts no longer exist and Government subsidies have been withdrawn. It is time for the seal hunters to turn to the future and aggressively pursue alternative occupations which hold considerably more promise.●

THE NATIONAL ENTREPRENEURSHIP ACT

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. SCHUMER. Mr. Speaker, if our economy is going to prosper and return to full employment, we must ensure that sufficient capital is available for new businesses with a potential to grow rapidly. These young entrepreneurial businesses produce most of the new private sector jobs in our economy and generate most of the technological innovations and new products that we need to compete effectively in international markets. Unfortunately, these businesses have problems raising the capital they need to develop new innovations and bring them to market.

To launch a new business, most entrepreneurs must fend for themselves, frequently relying solely on personal savings and loans from friends and relatives. Only a select few can meet the stringent criteria needed to tap the venture capital market. Their projects do not hold out the prospect of extraordinarily high profits. Nor do they have a good probability of "going public" or merging with another corporation. Venture capitalists, in other words, are constantly on the look out for another Apple Computer or Genentech; they are generally not funding the thousands of potential entrepreneurs who have profitable, but not spectacular, job-producing, productivity-enhancing ideas. As a result of this "capital market gap," many promising businesses never see the light of day, not because they cannot pass muster in the market place, but because financial markets and existing financial institutions are not equipped to provide the vast majority of entrepreneurs with adequate financing at affordable prices and on reasonable repayment terms.

These capital market gaps take many forms. For example, insurance companies and pension funds control billions of dollars which they are usually willing to invest in long-term projects. However, they generally are not willing to make the large number of relatively small loans needed by entrepreneurs. Banks, on the other hand, have the specialized expertise to evaluate loan applications and the marketing network to service small borrowers. But for a variety of reasons, banks prefer to make short-term loans. Since entrepreneurs require long-term financing, an entrepreneurially oriented industrial policy should try to eliminate this gap by devising ways to combine the banks' ability to originate loans with the willingness of insurance companies and pension funds to provide long-term financing.

Capital availability is only one type of capital gap. Entrepreneurs also need "patient capital." New businesses often have a poor cash flow during their start-up phase. Only later, when the business is safely down the road to financial solvency, will its cash flow be sufficient to meet its debt service obligations. In view of these financial facts of life, a capital availability program should be structured so that repayment terms better suit the unique financial characteristics of start-up companies.

Investment decisions, of course, are best left to individual lenders and stock purchasers. But with some targeted changes in both our financial laws and regulations, I believe we can greatly improve the ability of individual investors and existing financial institutions to service the unique financial requirements of entrepreneurs.

With this in mind, I am proud to reintroduce the National Entrepreneurship Act which I first introduced in the 98th Congress. Senator HART today has joined me and is introducing the National Entrepreneurship Act in the Senate. This legislation should help to ensure that existing financial institutions are better equipped to provide adequate financing on affordable terms for new entrepreneurial ventures.

The National Entrepreneurship Act can fill an especially important niche in today's environment of helter skelter financial deregulation. To counter the trend toward financial concentration, we need new financial innovations on the lending side to ensure that sufficient capital is going to those small businessmen who can use it most effectively and profitably.

The National Entrepreneurship Act relies exclusively on the market-oriented decisions of entrepreneurs and financiers, with a minimum of Government supervision, interference, and red tape, to ensure that sufficient long-term, "patient" capital is avail-

able to help young businesses grow more rapidly and create more jobs. In addition, the National Entrepreneurship Act has several other desirable features:

It does not redistribute jobs from one region to another.

Government planners are not forced to pick winners or losers or to distinguish between sunrise and sunset industries.

It does not compete with private capital by offering subsidized interest rates for projects that are already receiving sufficient funding from private sources.

It serves a public purpose but the financing mechanisms are shielded from undue political interference and special interest pleading.

It allows investors to earn high rates of return on successful ventures to compensate for the extra risk of funding entrepreneurial activities.

It will help each State capitalize on its unique talents, skills, industrial structure, and comparative advantage.

The National Entrepreneurship Act has the following titles:

Loan loss reserve fund: Banks often view loans to new entrepreneurial businesses as extremely risky. Because these businesses do not have adequate collateral to compensate a bank in the event of a default, they cannot obtain loans to purchase plant and equipment. A loan loss reserve fund, however, will insure banks against losses and defaults on loans to these businesses. The fund will be financed by small payments from banks, borrowers, and the Federal Government. It will be sufficient to compensate banks for losses on any particular loan, although not their entire portfolio. This self-financed insurance fund will encourage banks to lend more aggressively, but it will also require them to act prudently since they will still bear part of the risk of default.

Matching grants for State venture capital/royalty finance corporations: Royalty finance is a form of long-term "patient" capital whereby an investor's return is based on a percentage of the sales revenues generated by each new product. With royalty financing, a new business can undertake longer-term projects because it will not have to start repaying investors until the product or innovation is a commercial success. Massachusetts and Connecticut have had great success with State-sponsored royalty finance corporations which provide grants to new entrepreneurial corporations that cannot obtain funds from traditional sources. The State corporation is repaid from royalties on new products and these royalties provide a revolving fund for continued and expanded operations. A matching grant program will encourage States to emulate these efforts and help other States expand their existing programs.

Pension investment units: Public and private pension funds have more than $850 billion of assets. However, State and Federal laws often prevent pension fund managers from investing these assets in the securities of new businesses. In addition, many pension fund managers do not have the resources to analyze the investment potential of new businesses whose securities are not actively traded on major exchanges. The Federal Government should make available matching grants to encourage the establishment of State-sponsored pension investment units that will recommend changes in State and Federal pension fund regulations and statutes and provide research about the investment opportunities of new entrepreneurial businesses in their States. This will allow pension funds to participate more actively in each State's economic development program. The higher returns from a more aggressive, but still prudent, investment strategy will also help to hold down pension costs for both private and public sector employers.

Secondary market for industrial mortgages: Commercial banks specialize in short-term business lending and have the facilities and specialized expertise to evaluate loan applications and to originate and service the large number of relatively small loans required by rapidly growing small businesses. Pension funds and insurance companies are a major source of long term capital for the U.S. economy but they are not well equipped to originate and service the large number of relatively small loans needed by rapidly growing new businesses. A Government sponsored secondary mortgage market will purchase industrial mortgages from banks and resell them to pension funds, insurance companies, and other institutional investors who are looking for long term investment opportunities. It will combine the unique talents and lending activities of commercial lenders with those of pension funds and insurance companies, thereby increasing the efficiency of U.S. capital markets and the amount of long-term capital that is available to finance purchases of plant and equipment. A similar Government-sponsored secondary market for residential mortgages helped increase home ownership and employment opportunities in the construction industry.

No single piece of legislation can hope to solve all the problems faced by entrepreneurs. But some carefully crafted changes in the financial system will go a long way towards ensuring the success of existing entrepreneurial ventures and, more importantly, guaranteeing that potential entrepreneurs who, until now have been shut out of the financial markets, will have an equal opportunity to launch their projects.●

FOOD ASSISTANCE AND AFRICA AGRICULTURE ACT OF 1985

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LELAND. Mr. Speaker, I am today joined by my colleagues, Representatives CONTE, DORGAN, DIXON, JEFFORDS, SCHNEIDER, BURTON, LOWRY and WEISS in introducing the Food Assistance and Africa Agriculture Act of 1985. Our bill is aimed, first of all, at the severe and complex long-term problems in Africa. The legislation provides support for the International Fund for Agricultural Development [IFAD]. IFAD aids poor farmers and landless laborers to improve agricultural production, emphasizing self-sufficiency, self-reliance, and self-sustenance. In addition to regular replenishment funding for IFAD, the bill supplies $100 million over 4 years for a special IFAD Program for sub-Sahara African countries affected by drought and desertification.

The second portion of our bill is aimed at the short-term problem, proposing $900 million for food aid grants under title II of the Public Law 480 Food for Peace Program for 1986. Although less than the fiscal year 1985 level, this is a more realistic assessment of needs in Africa and elsewhere than the administration's proposed $650 million. No one can say for sure exactly how much emergency food will be needed in 1986, but the need will likely be close to the 1985 needs, if not higher. With a more adequate budget now, emergency aid programs will not be subject again to the delays of a special supplemental bill and the private voluntary organizations will be able to plan their efforts knowing a stable and adequate supply of commodities is available to them.

In 1985, we are facing one of the most critical challenges of the century; the massive famine underway in sub-Sahara Africa. It has already resulted in the starvation deaths of tens of thousands. This tragic famine in Africa is really two tragedies. The first is the visible one, and we tend to remember it. People don't have food, and they're dying, and we see it on TV. The second tragedy is less visible, and we tend to forget it. Even before the current drought, the situation in Africa was deteriorating. Per capita food production has been falling for 20 years. Unless Africa's long-term problems are dealt with, frequent famine and massive starvation will plague that continent for the rest of this century and into the next.

The current crisis in Africa has many dimensions, but that which is of central concern to IFAD is the impact on their targeted group, the poorest

people in the world's poorest countries. As the 1984 OECD Review of Development Cooperation pointed out: "In 1983/84, drought drove millions of Africans deeper into poverty and further handicapped economic recovery efforts. Especially vulnerable are poor, chronically undernourished rural labourers, marginal farmers and herders, and families headed by women, and their many children." It is this group of rural poor that IFAD would seek to reach through its current and expanded operations.

The land in Africa is generally ecologically fragile, of variable soil quality, and scattered in small plots. Absolute land scarcity in terms of population per acre is not widespread but given the low productivity of presently cultivated land, marginally productive land is increasingly taken into production. The devastating effect of the recurrent droughts in many areas diminishes food production, increases the desertification of affected land and reduces the production potential in the longer run. Local ecosystems, exploited beyond their natural carrying capacity, are breaking down.

Consequently, it is vital to adopt a coherent approach to the question of increased food production, keeping in mind that the smallholder sector holds the key to the longer term and sustainable solution of the problems of chronic food deficits, malnutrition and poverty. This sector has been largely neglected in most recovery and/or rehabilitation programs in sub-Sahara Africa. The IFAD special program for sub-Sahara Africa proposes to contribute toward filling this gap by emphasizing the following priority areas of action:

(A) Concentrating on production of stable food crops which are mainly grown and consumed by the poorer sections of the population who are the primary target of this program.

(B) Assisting the small producers to recover their production base through improving their access to the necessary inputs—hand tools, draught oxen, simple implements, improved seeds/fertilizers, and agro-chemicals—and through quick-yielding programs aimed at rehabilitation, recovery and fuller capacity utilization.

(C) Helping to restructure the agricultural production base through adaptive research and field trials, strengthening the extension service and improving marketing systems and related infrastructures.

(D) Augmenting the communities' food security through construction or rehabilitation of small scale irrigation, water management and control measures, and development of related improved technology.

(E) Initiating measures for environmental protection, such as agro-forestry, shelter belts, soil conservation, and fertility buildups.

(F) Assisting governments in their efforts toward policy and institutional reform in support of the above approach.

Mr. Speaker, we are confident that IFAD is uniquely suited to helping overcome the problems of small farmers because of its documented, demonstrated success record of increasing food production capabilities among the most needy people of the Third World. Our replenishment contribution, along with a special U.S. contribution to IFAD's Africa work, as called for in the Food Assistance and Africa Agriculture Act, would also lead other nations to contribute. Poor countries whose poorest people would become more self-sufficient through IFAD projects also contribute this "multiplier effect" in these budget conscious times, makes good economic sense in approaching the critical challenges of African hunger. The Belgium Government has already committed $58 million to the IFAD special program for Africa, and France, Italy, Norway, Finland, Sweden, Demark, and the Netherlands have stated their willingness to contribute.

Today, Africa is a continent in trouble. The United States could make certain choices that increase the likelihood that Africa's future will be a hungry one. Alternatively, the United States can strengthen its leadership in foreign assistance, coordinating with other nations to help Africans reach a future of food security and self-reliance. The Food Assistance and Africa Agriculture Act embodies this second option.●

PESTICIDE EXPORTS

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. HEFTEL of Hawaii. Mr. Speaker, I would like to share with my colleagues a newspaper article that reveals some of the problems created by our policy of exporting pesticides never registered, restricted, or banned in this country.

The health and environmental problems that are created by use and overuse of these deadly chemicals abroad are far more serious than we tend to acknowledge, and there is no indication that we are doing anything to remedy the situation. We are deceiving ourselves if we think that the problem is not ours. No one has any idea of the extent to which the imported produce sitting on our grocery shelves is adulterated with chemicals that may in themselves be within legal residue limits, but combined with other residues may be a time bomb. Our ability to develop new chemical combinations far exceeds our ability to understand the long-term safety implications of the products.

I have introduced modest legislation, H.R. 1416, the Pesticide Import-Export Act of 1985, to at least make our Government agencies aware of the pesticides we export and make foreign government agencies acknowledge the dangers of the pesticides they are importing. The only way we will come to grips with the problem is when we acknowledge that we have one.

[From the Washington Post, Apr. 11, 1985]

BANNED PESTICIDES FIND MARKETS ABROAD

(By Jack Anderson and Joseph Spear)

Each year American chemical companies export nearly $1 billion worth of pesticides that are unregistered, restricted or banned in the United States.

When these deadly chemicals are used by Third World farmers ignorant of the dangers, the results can be catastrophic. For example:

In Brazil, 13 children who lived on the same village street became mysteriously, violently ill. They sweated, foamed at the mouth, vomited and went into convulsions. Most died within a few days. The only survivor, an 8-year-old girl, was fatally stricken with the same symptoms a few weeks later. An autopsy showed unusually high levels of aldrin and its breakdown product, dieldrin, in her blood and liver. These U.S.-manufactured pesticides were banned in the United States the year before.

In Tiajuana, Mexico, 17 people died and more than 300 got sick after eating sugar contaminated with parathion, a pesticide whose use is restricted in the United States, but whose manufacture is not.

In a single province of Thailand, out of a population of 3,789, 24 died and 320 others became ill from pesticides used on local crops. A government study found dangerous levels of pesticide residues in 75 percent of rice and flour samples, in more than 40 percent of vegetables and in milk, cooking oil and fresh-water fish.

In Egypt, exposure to the pesticide phosvel killed more than 1,000 water buffalo and an undisclosed number of people. Rural families suffered convulsions, speech difficulties, loss of bladder control and other symptoms. Phosvel is manufactured in the United States solely for export; its use has never been permitted in this country because of the danger to humans.

These horror stories, which occurred over the past two decades, were compiled by Julian Epstein, an aid to Rep. John Conyers Jr. (D-Mich.), from internal government documents and other sources.

The chemical industry defends its export of pesticides that are banned or restricted here, arguing that they are a necessary evil in the battle against famine and disease in the Third World.

But Epstein challenges the effectiveness of the pesticides in achieving these goals and notes that at least half of the pesticides imported by the Third World countries are used on crops that will be exported to Western Europe and the United States.

What strikes environmentalists as unconscionable about the pesticide exports—which amount to some $2.8 billion a year—is that the dangers are widely misunderstood by the farmers who use them. Even the officials responsible for distributing them are often uninformed.

When warnings are written in the native language and can be read by the users, the chemicals are often mislabeled.

The United States is the only country that voted against a U.N. resolution that would make a list of hazardous exports available. After initially supporting the U.N. effort, the Environmental Protection Agency cautioned in an internal document seen by our associate Vicki Warren that "we think it is also in the U.S. interest to refine such a listing in a way that would minimize any unwarranted disruptions to international trade." ●

SECRETARY WILLIAM BENNETT'S SUPPORT FOR EDUCATIONAL REFORM

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BENNETT. Mr. Speaker, Secretary of Education William J. Bennett recently spoke before the National Press Club and urged that schools add to the three R's of reading, writing and arithmetic, three C's—content, character, and choice.

As to content he said every student should "receive a common education," and that good teaching "does more than teach skills"; saying further that "skills are important but knowledge is at least as important, and knowledge can come only from content." As to choice, Bennett advocated a voucher system that would allow parents to choose whichever available school is preferred.

The 97th Congress passed a law which I introduced and which provides assistance to local schools in teaching good citizenship, 20 U.S.C. 3842(1)(J). So, I was particularly interested to note what Secretary Bennett said on his third "c"—character. After saying that the Federal Government would not dictate the content or curriculums he made the following comments on character education:

"Americans have always believed that in education the development of intellect and character go hand in hand." Three different but persuasive authorities are worth noting. First, Thomas Jefferson. Listing for the citizens of his day several basic requirements for a sound education, he wrote not only of writing, calculation, and geography, but also of the importance of what he termed "the improvement of one's morals and faculties."

Second, 200 years later, there is the Gallup Poll. Last year Gallup found that Americans in overwhelming number want schools to do two things: to teach students how to read, speak, and write correctly, and to help them develop a reliable standard of right and wrong.

Finally, there is Patricia Graham, dean of Harvard's School of Education. Writing last year in Daedalus magazine, she said that "the primary responsibility for our schools should be to nurture and to enhance the wit and the character of the young." There you have it: Thomas Jefferson, the American people, and Harvard's dean of education—a convincing trio.

What is character? Webster defines it as "strength of mind, individuality, independence, moral quality." We could, of course, include more. We must teach thoughtfulness, fidelity, kindness, honesty, respect for law, standards of right and wrong, diligence, fairness, and self-discipline.

But how? It seems many of our schools have forgotten the answer. In recent years, although we have not overintellectualized the curriculum, ironically we have tried to intellectualize moral development. Many have turned to a whole range of "values education" theories and practices where the goal is to guide children in developing their own values by discussion, dialog, simulation, and even game.

While it is true that good character can have an intellectual aspect, the development of intellect has never guaranteed the development of good character. Germany in the 1930's was intellectually advanced. Aristotle knew, and psychologists confirm today, that it is habit which develops virtues, habit shaped not only by precept but by example as well. "It makes no small difference," Aristotle wrote, "whether we form habits of one kind or another from our very youth; it makes a very great difference, or rather all the difference." It is by exposing our children to good character and inviting its imitation that we will transmit to them good character.

Teaching character begins where it must—in the home, starting with those early childhood years from infancy to age 6. But after that our schools must help. And a school must have character if it is to transmit character to its students. What does this mean?

First, teachers and principals must be willing to articulate ideas and convictions to students. As Oxford's Mary Warnock has written:

> You cannot teach morality without being committed to morality yourself; and you cannot be committed to morality yourself without holding that some things are right and others wrong.

Second, the character of a school, its ethos, is determined by not only articulation but the behavior of authorities. We must—there is no other way—have principals and teachers who know the difference between right and wrong, good and bad, and who make an effort to live the difference in front of pupils. Last Sunday on television, I saw the athletic director and head of the Peer Drug Counseling Program at Spingarn High School. He put it this way: "You can't counsel to be drug free unless you are drug free."

I am not talking about browbeating students into accepting points of view. That is simply indoctrination, which we all deplore. I am talking about intellectual honesty and ethical candor. To put students in the presence of a morally mature adult who speaks honestly to them is not to violate their rights. On the contrary, it is the surest way to foster their moral growth. In this business of character, there has never been anything as important as the quiet power of moral example.

The character of a school is also determined by the kind of place it is. Here I am speaking of the physical and moral tone of the school premises, again its ethos. School effectiveness studies have shown us over and over again the importance of both of these elements. A school with broken window panes, graffitied walls, and littered floors is, strictly speaking, a school that has failed one of its own lessons. A careless environment is bound to affect student habit. Plato tells us in the Republic that the stamp of baseness on a building will sink deep into the souls of those whom it surrounds.

There are, of course, less subtle and more palpable forms of disorderliness. One is called drug abuse, and that includes alcoholism. Last week the student chosen by the National Association of Secondary School Principals as the outstandiang student leader of 1985 said the biggest problem confronting our school is teenage alcoholism. He summed up the problem with five words. "Everywhere you look, there's liquor," he said.

The point is that orderliness should prevail in a school aspiring to transmit good character. Schools run in a disciplined manner can teach self-discipline to students. As Prof. Amitai Etzioni has recently pointed out, a lack of self-discipline might be our students' greatest failure, the cause of so many other failures. The problem of school character demands our teachers' and principals' deepest commitment to both example and discipline. As for school crime the Federal Government can help and is helping.

As any parent knows, teaching character is a difficult task, But it is a crucial task because we want all our children to be not only healthy, happy and successful but decent, strong, and good. None of this happens automatically; there is no genetic transmission of virtue. It takes conscious, committed effort. It takes attention. We must give it more.●

NEW PARENTAL LEAVE BILL INTRODUCED

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mrs. SCHROEDER. Mr. Speaker, I want to bring to the attention of my colleagues H.R. 2020 the Parental and Disability Leave Act of 1985. This legislation would establish a national leave policy for working parents.

Our country was built on a model of the family where men worked in the labor force and women worked in the home, raising the children. But it is not that way in every household today.

The structure of the family has been changing over the past years. More women are working in the paid labor force and more men are sharing in childrearing responsibilities. Too often, however, family security and responsibility are in conflict with employment policies.

Women currently constitute 43 percent of the labor force. They are making essential contributions to their family's income. Sixteen percent of American families are headed by women and 41 percent of married working women have husbands who earn less than $15,000 a year.

The most dramatic increase of women workers has been among mothers of preschool children. Eighty percent of working women are likely to become pregnant during their working lives, and increasingly, these women are working through their pregnancies, then returning to work as quickly as possible after childbirth. In 1984, half of all mothers with children under the age of 3 were in the labor force, as compared to 30 percent in 1970.

These facts create a new reality of parenthood in this country: Either both or the sole parent of very young infants are working fulltime. Women are increasingly assuming responsibility for the support as well as the care of their families. With this in mind, we must foster employment policies that recognize the financial and nurturing responsibility of today's parents.

Mr. Speaker, current law prohibits discrimination against pregnant workers, but we have no policy providing job security to workers in the event of pregnancy-related disability or childbirth. The Pregnancy Discrimination Act of 1978 requires that pregnancy-related disabilities be treated like other short-term disabilities. The law does not, however, require employers to provide leave for any employee.

Many employers do offer some sort of leave for parenting reasons. Three-quarters of employers provide unpaid maternity leave, one-third offer unpaid paternity leave, and half provide disability insurance to their employees. The obvious gap in coverage means, of course, that many workers have no leave or job protection at all.

H.R. 2020 would fill this void. It requires employers to furnish a minimum of 4 months, leave for parents who choose to stay home with a newborn, newly adopted, or seriously ill child. In addition, the legislation requires 6 months' leave time for pregnancy-related and other temporary disabilities. In both cases, job reinstatement would be guaranteed upon return to work.

The bill is compatible with title VII of the Civil Rights Act of 1964, which prohibits employment discrimination. Job-protected leave for both temporary disability and parenting would be available on a gender-neutral basis. All workers would receive equal protection under the law.

While job guarantee is the first component in the economic security of families, wage replacement is equally critical. H.R. 2020 calls for the establishment of a commission to study and make recommendations on the implementation of a national paid parental leave and disability policy.

Five States have already implemented temporary disability insurance [TDI] programs, wherein employees and/or employers contribute to a wage-replacement fund for disabled workers. I look forward to exploring the experiences of these States in implementing their programs, as a possible model for national initiative.

The United States is the only country in the industrialized world without a policy providing some period of job-protected maternity leave with some level of wage replacement. It is about time we caught up.

American women are in the labor force to stay. We must acknowledge that the Ozzie-and-Harriet-style family—where one parent worked and the other stayed in the home to raise the family—no longer predominates. H.R. 2020 is a first step toward meeting the reality of a new generation of families, where single or both parents are striving to sustain and nurture their families.

[The text of the bill follows:]

H.R. 2020: THE PARENTAL AND DISABILITY LEAVE ACT OF 1985

I. PURPOSE

To promote the economic security of families by guaranteeing jobs to wage earners who are temporarily disabled or who choose to take a period of leave upon the birth, adoption or serious illness of a child and by exploring methods of implementing wage-replacement for such leaves.

II. PARENTAL AND DISABILITY LEAVE REQUIREMENTS

A. Disability Leave:

All employers must provide a minimum of 26 weeks leave for all employees who are temporarily unable to work due to nonoccupational, short-term disability with reinstatement to the same job upon their return.

The employer is required to continue health insurance coverage for the employee with the same employee/employer payment scheme. The employer is also required to maintain the employee's pre-leave benefit status (seniority, pension, etc.) through the leave period.

The Secretary will propose reasonable regulations for the verification of temporary disability which may include standard periods of absence for common disabilities and physician certification, so long as such regulations apply to all disabilities.

B. Parental Leave:

All employers must provide a minimum of 18 weeks leave for any employee who chooses to stay home to parent a newborn, newly-adopted, or seriously ill child with reinstatement to the same job upon his/her return.

The employee shall be allowed to return to work on a reduced schedule so long as the total length of parental leave does not exceed 39 consecutive weeks.

The employer is required to continue health insurance coverage for the employee with the same employee/employer payment scheme. The employer is also required to maintain the employee's pre-leave benefit status (seniority, pension, etc.) through the leave period.

The Secretary shall propose reasonable regulations for the verification of eligibility for parental leave and notice to the employer in advance of commencing such leave.

C. Other Employer Requirements:

All leave provided in accordance with sections A and B, must be provided on a sex-neutral basis.

No retaliatory actions may be taken against employees who take advantage of these leave provisions.

All employers in interstate commerce, including the government of a state and the government of the United States, are covered by the Act.

III. STUDY

Congress shall establish a commission to study and recommend within two years means for implementing a national paid disability and parental leave policy.●

INTRODUCTION OF LEGISLATION TO RESOLVE THE IMPUTED INTEREST CONTROVERSY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MATSUI. Mr. Speaker, today I am introducing legislation that offers a permanent solution to the imputed interest controversy that has been the subject of intense public debate since the 1984 Tax Reform Act was passed. The stopgap corrective legislation which Congress enacted last year expires July 1 and I urge my colleagues to join me in an effort to resolve this issue.

The distinguished chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, promised this body last June that he would address and resolve the imputed interest issue before the transition rules expired. My good

friend from Illinois is fulfilling that promise by scheduling hearings on the issue for April 24. I applaud the chairman for this action as it would be devastating to let the transition rules expire without passing a workable solution.

As my colleagues are aware, the Deficit Reduction Act contains provisions that threaten to substantially disrupt, if not stop entirely, legitimate and economically motivated real estate transactions. This threat is contained in law that increases the required interest rate for seller financed real property transactions from 9 percent to a significantly higher figure of 110 percent of the Federal borrowing rate for similar maturities. This means that a seller financing a sale of real property for 10 years must charge the buyer 110 percent of the rate which the Federal Government says on 10-year obligations. Should the seller fail to charge an interest rate of at least this amount, the draconian imputed interest provisions will impute a rate of 120 percent of the Federal rate to the seller for tax purposes. This, I contend, imposes a tremendously counterproductive, chilling effect on the real estate market.

For example, last summer the long-term Federal borrowing rate was 13 percent—meaning that an owner financing the sale of property would have been required to charge at least 14.3 percent interest. This would create an impediment to many real estate transactions. The higher the conventional market interest rates, the more serious the chilling effect becomes because it is during high interest rate periods that seller financing is most needed.

Industry representatives have informed me that seller financing affects about $30 billion of rental, residential, commercial, and industrial sales. These sales contribute $6 billion to the gross national product which represents about 120,000 full-time jobs and about $2 billion in Federal, State, and local tax revenue. It is imperative that an acceptable solution to the imputed interest issue be reached so as not to put these sales in jeopardy.

The legislation I am introducing today contains such a solution. My bill will change the safe harbor and imputed interest rates so that they more adequately and reasonably reflect the current states of interest rates for real estate. This bill provides that for seller financing amounts below $4 million, the lower of 9 percent interest or 80 percent of the applicable Federal rate would be the test rate. If this rate is not met, the lower of 10 percent interest or 90 percent of the Federal rate will be imputed. For seller financed amounts in excess of $4 million, a safe harbor rate of 80 percent of the Federal rate and an imputed rate of 90 percent of the Federal rate will apply.

The importance of this 80 percent test rate particularly comes into play if interest rates rise again to the 15 to 17 percent levels. If interest rates get that high, seller financing becomes the only way that a seller can find a buyer for his property. The primary motivation is not tax avoidance, but simply a need for individuals to avoid a price for money which is for all but the richest too expensive.

My bill also solves the mismatching of income and deductions problem between buyer and seller that Treasury expressed such concern about last year. Under the provisions of my legislation, seller financed transactions below $4 million will be exempt from the original issue discount provisions in the act. Instead, both the seller and purchaser must agree to report the transaction for income tax purposes under the same method of accounting; that is, either the cash or the accrued method.

Furthermore, this bill will clarify the uncertainty of the status of assumed loans and wraparound loans with regard to original issues discount and imputed interest. Assumed loan amounts below $4 million will be exempt from OID and imputed interest provisions. Also exempted is the net amount of a wraparound mortgage below $4 million except for the amount of any preexisting underlying obligation. In determining whether the 9 percent or 80 percent safe harbor rate is met, the interest rate of the seller's wraparound mortgage and the net cash flow from the prior obligation will be considered. Mr. Speaker, if there are no objections, I would like to submit a factsheet for the RECORD that outlines the provisions of my bill.

A solution to the imputed interest issue should not focus primarily on preventing a perceived tax abuse as the drafters of the present imputed interest provisions have done. Seller financing is not a tool used to facilitate tax abuse. It is a means of structuring a real estate transaction so that it is affordable to potential buyers. The American public does not need government interjecting itself into the reasonable and customary real estate transactions that occur daily. The American public needs flexibility and certainty to conduct its business. The solution I propose to the imputed interest issue will provide the measure of flexibility that the real estate industry needs. This approach is simple, straightforward and allows for an orderly real estate market in any interest rate scenario.

I urge my colleagues to support this legislation.●

51-059 O-86-42 (Pt. 6)

PENETRATING THE IDEOLOGICAL ENIGMA

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FIELDS. Mr. Speaker, I recall that during the political debates surrounding the Law of the Sea Treaty the most laughable accusation made by the protreaty forces was that President Reagan was guilty of interjecting ideology into the process. By this was meant, of course, that President Reagan simply opposed parts of the treaty.

The important point is that few in our society even know what ideology really is, let alone what dangers this ignorance presents to Western society generally and the United States particularly. Few understand the uses and powers of ideology, particularly when it is packaged by Marxists with pretenses toward science.

A potentially strong antidote to ideological ignorance has arrived in the form of a book by political scientist Kenneth Minogue entitled, "Alien Powers: The Pure Theory of Ideology." The ambition of the book is to penetrate the enigmatic nature of ideology and analyze it in understandable terminology. Of the many revelations upon the subject, just this one would make the writing and the reading invaluable: Ideology is not just an idea; it is a way of using ideas in the service of power.

Consider the following from Helene Carrere d'Encausse's masterful work, "Confiscated Power: How Soviet Russia Really Works:"

> Ideologies of this type cannot be spread in a vague manner. They demand a weighty apparatus that directs, educates, and reassures society and keeps it constantly in contact with the certainties which are the basis of power. This explains the fact that ideology occupies a central place in the Soviet system, that it covers the whole spectrum of social and private activities, and that it penetrates all areas of individual and group existence. * * * It explains, finally, the importance in Soviet society of the group that is the guardian of the ideology: the Party.

Mr. Speaker, in 1917 Lenin had a choice to make between power of the workers and power exercised in the name of the workers. Since he had openly characterized Marx's utopian stateless society as a fairy tale, Lenin simply confiscated political power into his own hands and that of the Party. From this initial choice by Lenin flowed the entire Soviet system as we know it today: A single monolithic party, and an ideology in possession of a monopoly on the truth. As Helen Carrere observed:

> "* * * the Soviet system might change its methods or choices, but the mono-organizational and mono-ideological system re-

mained inviolable, for this inviolability was the source of its legitimacy and invulnerability."

Mr. Speaker, I am pleased to enter into the RECORD a review of Professor Menogue's vital and important book, reviewed by the respected columnist Joseph Sobran.

I urge my colleagues to read this review in a thoughtful manner, hoping it will spur them to study the book itself. As Mr. Sobran points out, Professor Minogue considers ideology, particularly Soviet ideology, as a dagger at the heart of Western civilization. I offer a special invitation to those among us who claim to subscribe to no formal ideology, but who "always seem to be on hand to agree with the West's ideological accusers and to arrange, on our behalf, the terms of surrender." This includes charter members of Mrs. Kirkpatrick's "blame America first" crowd.

[From the Washington Times, Apr. 9, 1985]

PENETRATING THE IDEOLOGICAL ENIGMA

(By Joseph Sobran)

President Reagan says that the Soviets' unapologetic murder of Maj. Arthur Nicholson only shows the necessity of a summit conference. On the contrary, it proves the futility of any attempt at "dialogue" with the Soviets.

After nearly 70 years of facing a Communist enemy bent on its destruction, the West still has not learned how to cope with the phenomenon of ideology—or even how to comprehend it.

Help now has arrived from England, in the form of a brilliant new book by the political scientist Kenneth Minogue. Its title is "Alien Powers: The Pure Theory of Ideology," and like all Professor Minogue's work, it amounts to a trenchant defense of political common sense against the fashionable fanaticism. It is not easy reading, but that is because its ambition is to penetrate and analyze what has hitherto been an enigma.

Mr. Minogue uses the term "ideology" in a special way. By it he means not just a political doctrine or philosophy, but, more specifically, those kinds of doctrines that profess to offer "liberation" in the very act of analyzing society. Liberation from what? From the "alien powers" that Marx said "enslaved" individuals under the guise of modern freedom. And where are these "alien powers?" According to Marxism, they are everywhere.

As seen by Marxism and such variant ideologies as feminism, the world is nothing but a structure of domination. Everything can be reduced to, and understood in terms of sheer power. Do you think you are free? Aha, says the Marxist. The illusion of freedom is part of the apparatus of oppression. The crafty capitalist ruling class only makes you think you are free, the better to oppress you, my dear. The very fact that you think you are free thus proves you are a slave. Even your mind is in chains. Thus ideology defies refutation, or even critical analysis.

Men oppress women, says feminism. Did that nice man hold the door for you? Aha, cries the feminist. That is only one more strategy of male domination, different from rape only in degree. Even the woman who appreciates that difference in degree is sadly in need of a bit of consciousness-raising.

"Consciousness-raising" is an essential part of the ideological arsenal of conceptual weaponry. It means training in the paranoid skill of interpreting one's own experience of freedom as masked persecution. Let your Marxist brothers or feminist sisters teach you how badly off you really are. Dare to be alienated.

The value of the paranoid structure of ideological thought is that it puts the ideologue in the right at all times, under all circumstances. Every aggression become an act of self-defense. The Soviets are particularly skillful at interpreting their own behavior as defensive. They're currently defending themselves against men, women, and children in Afghan villages. They were defending it in East Germany against Maj. Nicholson. They constantly defend it against hundreds of millions of class enemies, real and potential, including the pope.

As Mr. Minogue notes, ideology pretends to be scientific but assumes the character of revelation, beyond criticism, beyond good and evil. From Marx on, ideologues have been intolerant in a special way: They admit of no possibility of legitimate disagreement with themselves. Marxism has thus traditionally reposited its "scientific" knowledge in the personal authority of a charismatic leader or revolutionary vanguard. Cross him, or it, and you are excommunicated, an enemy of truth. Some "science!"

Ideology, therefore, is not just an idea: It is a way of using ideas in the service of power. The disposition to use ideas as means of power indicates, Mr. Minogue observes, the ideological preoccupation with power as both explanation and answer for every evil.

In spite of its many and obvious fallacies, ideology works. It arms the cynics, inspires dreamers, activates latent resentments, and disarms its intended victims. If, as Mr. Minogue puts it, "ideology is a dagger pointing to the heart of modern Western civilization," one would like to hear him say more about those people within the West who, without subscribing formally to ideology, always seem to be on hand to agree with the West's ideological accusers and to arrange, on our behalf, the terms of surrender.

The West cannot afford to be represented by Ramsey Clark, Andrew Young, or William Sloane Coffin. It needs spokesmen like—I was about to say Ronald Reagan.●

OSHA IGNORES HEALTH OF FARM WORKERS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. VENTO. Mr. Speaker, last week the Occupational Safety and Health Administration [OSHA] announced that it would not propose a Federal standard for field sanitation for farm workers. Thousands of farm workers, including many children, work long, hard hours to harvest the vegetables and fruit which we all enjoy on our dinner tables. Numerous medical studies and indeed an exhaustive study by OSHA's own staff have clearly established the need for an effective field sanitation standard for farm workers. Infectious and parasitic diseases have been shown to be common among farm workers who do not have access to clean water and toilet facilities. Unfortunately, OSHA has chosen to look the other way and ignore this problem.

Perhaps most disturbing about this decision was the comment made by OSHA Administrator Robert Rowland who said that OSHA's refusal to implement a field sanitation standard was justified because if such a standard was issued it would be a low priority item for enforcement. Once again, we see another example of OSHA's insensitivity to its mandate to protect the health and safety of American workers. Mr. Rowland is sworn to uphold the law, and yet despite the overwhelming evidence in support of issuing a field sanitation standard, Mr. Rowland refuses to do so because its enforcement would be relegated a low priority. If the enforcement of future health and safety standards will be lax, it is only because Mr. Rowland and his subordinates within OSHA have decided that they will not enforce their agency's own standards. If this is the case, perhaps Mr. Rowland should consider resigning and turning over his duties to someone who intends to meet his responsibilities. Unfortunately, the Reagan administration has had a remarkable inability to appoint any individual to a position of responsibility within OSHA who has any great enthusiasm for protecting workers' health and safety. Instead, the emphasis is upon reducing inspections of workplaces and reducing the numbers of inspectors who carry out these functions.

Mr. Speaker, an editorial in the Washington Post (4/16/85) condemns OSHA's backtracking on the field sanitation standard and reminds us of the "Harvest of Shame." The "shame" is OSHA's. I am hopeful that the representatives of the Nation's farmworkers will appeal OSHA's decision through the courts to overturn this abdication of responsibility.

[From the Washington Post, Apr. 16, 1985]

HARVEST OF SHAME, 1980's STYLE

Twenty-five years ago, Edward R. Murrow's documentary, "Harvest of Shame," aroused the public's conscience by revealing the ghastly conditions in which migrant field workers toil to bring a fresh and varied diet to the tables of this wealthy country. Since then, when migrant workers are found held in bondage or a migrant child dies from dysentery, public concern again flares momentarily. Congress may even tighten slightly the poorly enforced standards meant to curb the worst abuses. But there can be no better testimony to the ephemeral quality of this concern than last week's decision by the Occupational Safety and Health Administration to kill a long-awaited rule requiring that fresh water and toilets be provided to field workers.

There is a sick joke quality about the Labor Department's justification of its decision. OSHA Director Robert Rowland says that even if a federal standard had been set, it would have been laxly enforced. Well, he

is certainly in a position to know how often his agency disregards its own rules. Mr. Rowland notes, moreover, that migrants in 13 states are already covered by some sort of sanitation standards. Perhaps he thinks that those in other states can simply move across state lines when they feel the urge. After all, they're migrants aren't they?

You should know that we are not talking about unnecessary frills. Thousands of field workers and their children are forced to toil for long hours in the hot sun with, at best, a bucket of contaminated water from which to drink and no access to toilet facilities. Numerous studies, including studies by Johns Hopkins University of workers on the nearby Delmarva Peninsula, have shown that, as a result of these primitive conditions, workers suffer high rates of infectious, parasitic and toxic diseases.

One expert, recently hired by OSHA to review all available evidence, concluded that parasitic disease is more common among U.S. field workers than among Guatemalan children. And because they have nowhere to wash their hands and must relieve themselves in the fields, these diseases are passed on to surrounding communities and the consuming public.

The compelling need—on both humanitarian and public health grounds—is no longer seriously disputed. Even the farm organizations, which have traditionally opposed federal standards, have muted their opposition. One official told reporter Ward Sinclair last week that "many of our members are prepared to put this behind us." Advocates for the farm workers are prepared to appeal OSHA's decision in court. Labor Secretary-designate William Brock should make sure that appeal isn't necessary. Mr. Rowland says that his agency has "higher priority standards" to enforce. What priority can be higher than treating all people in this country as human beings?●

PROVIDING OPPORTUNITIES FOR SPOUSES OF FOREIGN SERVICE OFFICERS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LANTOS. Mr. Speaker, one of the great inequities being perpetrated by our Government is that of foreign service spouses who must give up professional careers and surrender opportunities to accompany their spouse on foreign assignments for our Government. These spouses are frequently well-trained and competent professionals who either no longer use their education and experience in service to our Government or who must serve without compensation.

The time has come that these problems be explored and remedied in order to keep good officers in the foreign service and attract new younger professionals. We must work out creative ways to permit two-career families to serve. With similar-minded colleagues, I have begun to explore with leaders of the Association of American Foreign Service Women possible congressional action that will alter this situation.

An extremely perceptive article by Joanna Biggar was published in last Sunday's Washington Post magazine. I urge my colleagues to consider the important issues it raises—they are issues with which we must deal if we are to maintain the competent professional Foreign Service essential to the proper conduct of our Nation's foreign policies.

MARRIED TO UNCLE SAM

Shortly after Foreign Service officer Patricia Quinn married Foreign Service officer George Barbis in 1957, she received a telegram from her personnel officer:

"Understand you married while on leave. If so, forward resignation immediately effect date prior marriage . . ."

Barbis followed the order and resigned, becoming, instead of a Foreign Service officer, a Foreign Service officer's wife. In her first assignment overseas as a spouse, she wanted to go by the book. Wives who didn't perform well sometimes found that their husband's promotions were not as frequent as expected.

This book, among other things, called for wives to appear on public diplomatic occasions wearing hat, hose and white gloves. Posted to Thailand, Barbis dressed as Washington prescribed for a reception to greet Queen Sirikit (who did not wear hose). After the meeting Barbis developed a terrible skin reaction from the combination of her stockings and the tropical heat. Later, when she had to pay a call on an army commander's wife, Barbis was surprised to be greeted by a pet gibbon as well as her hostess. "The gibbon got excited and had an accident by my shoe," she recalled recently. "I kept talking. My interpreter stared while a young girl appeared with a banana leaf and scooped up everything . . . They don't tell you about things like that in the protocol book." They don't pay you for it either.

But that may change if a group of senior Foreign Service wives succeed in their revolutionary campaign to provide Foreign Service spouses official jobs when they are overseas and to pay them for their work.

Sue Low doesn't look like a radical. Her blue eyes are attentive, her voice is easy. Gently leading a guest from the kitchen with fresh coffee, she is gracious—and diplomatic. Perhaps that shouldn't be surprising, because she is the wife of a diplomat. But she is also the principal author of the proposal to pay spouses of Foreign Service officers (including husbands as well as wives).

She shies away from talking about what such a plan could cost, but suggests a figure for most spouses in the "middling range" of Foreign Service salaries—about $20,000 a year. Given Low's estimate of how many spouses might participate, the total could be a $20 million payroll the first year.

The proposal, which has already acquired support in the State Department and on Capitol Hill, is a "first." So far, say Low and the other women behind the plan, no one else has succeeded in putting a dollar figure on "wives' work." A few other countries grant allowances to diplomatic spouses for official duties, but none has gone so far as to consider the spouse an unquestionably salaried employe. If the plan is successful, it could have an impact far beyond the Foreign Service—into the military, for example.

"It's an idea whose time has come," says the State Department's top personnel officer, Undersecretary for Management Ronald Spiers. "We have a major problem here in the Foreign Service, and this is an approach to it."

Lawrence Eagleburger also supports the idea and has continued to work for it since his retirement last year as undersecretary of state for political affairs. Eagleburger's wife, Marlene, has been a key figure in promoting the plan.

"When it first came up, I, in typical male chauvinist fashion, had my doubts," Eagleburger says. "But the more I listened to my wife, and the more I looked into it, I realized she was correct. I became an ardent advocate. Foreign Service wives—and lots of other wives, too—work for the U.S. government, and the U.S. government has been getting it for free . . . that's not right. For common justice, they ought to get paid for it."

Besides the endorsement of the 1,000-member Association of American Foreign Service Women, which hopes to turn the proposal into legislation this spring, support has come from Reps. Henry Hyde (R-Ill.), Tom Lantos (D-Calif.) and Pat Schroeder (D-Colo.), who have already agreed to cosponsor the bill in the House, and Sen. Charles McC. Mathias (R-Md.), the first announced sponsor in the Senate.

Not everyone thinks the proposal will work. Foreign Service spouse Maureen Lyons says her doubts about how much the program will cost and how it will be administered are shared by many others in the U.S. diplomatic world. Lyons says the plan in its present form could never get through Congress and hopes it won't until they answer the questions."

Nevertheless, Eagleburger says groups representing military wives and university presidents' wives already have been in touch with her. "If we break the ground, and they have a legitimate case, I hope it would follow that their contribution be recognized."

Pat Barbis' contributions to U.S. diplomacy have been typical of work done without pay by other Foreign Service spouses: she served on school and hospitality committees, worked with the blind, raised funds for international women's organizations, spent weeks at the airport meeting evacuees from Iran, shopped with congressional wives and paid a condolence call to the family of a slain officer. She also entertained. At one post, she shopped and cooked for a reception for 250, only to have her husband called away to meet the U.S. secretary of defense. She was told to take his place in the receiving line and to convince guests she didn't know where her husband was. When the secretary of state came to visit, she was informed he would be her house guest. Prior to 1972, she was often told to perform these tasks by her husband's superiors, and her ability and willingness to carry out the orders were reflected on his efficiency report.

In 1972, the State Department abolished the position of official wife. In a Directive on Wives it declared: "The wife of a Foreign Service employee who has accompanied her husband to a foreign post is a private individual. She is not a government employee. The Foreign Service, therefore, has no right to levy any duties upon her." The practice of hiring a married officer and getting "two for the price of one" was officially terminated.

The State Department went on to state that wives could work at whatever jobs they choose, including jobs in the Foreign Service; thus was born the concept of "tandem couples," in which both husband and wife

are Foreign Service officers and the department attempts to assign them to posts in the same place. Moreover, women who had been forced to resign under the old policy would have the right to be reinstated.

The old policy had in fact never been an official regulation, only a custom. "We were snookered," Barbis says.

She didn't intend to be snookered again. In 1979, after 12 years abroad, she asked for Foreign Service reinstatement. But she was told, Barbis says, "because we have such a strong track record on women, we really don't have to hire you." She was offered a job if she would agree to go abroad again immediately. She declined. In her fifties, she took a job as a secretary, working for a woman much younger than herself in the public relations firm of Carl Byoir & Associates. Although she has advanced to the post of account executive in charge of government relations, "I lost 15 years in terms of career," Barbis says. "I have to work harder than others. I'm older, I'm female, and I lost a lot of time."

To many foreign service wives, the 1972 directive simply meant business as usual. They continued to do what they had always done, but now without official recognition.

Low's proposal challenges the premise of unpaid and unrecognized "woman's work." It calls for the creation of an "associates program" of Foreign Service spouses. Those who chose to participate would be paid by the U.S. government for work in four broad categories: work in the overseas American community; work in the local community; official entertaining; and professional work for the host country under a "Peace Corps-like" arrangement.

The first three areas encompass the jobs traditionally done by Foreign Service wives. The fourth addresses the fact that many spouses want to pursue their own professions.

Barbara Finamore is among those looking at "Part 4" with great interest. A lawyer 4½ years out of Harvard Law School, she is a specialist on environmental law with a Washington firm. A year and a half ago she married Foreign Service officer Steve Young, who is to take up an assignment in Moscow this spring. Finamore has tried to line up a job in the Soviet Union, but could only find secretarial work in the embassy. In Moscow, she notes wryly, you can't exactly go out on the open market. "I've now got two choices: I can work in a job I don't want, or I can stay here." She is leaning toward the "wrenching" decision of staying in Washington.

Under the association program, she believes there would be another possible work related to law or the environment. She might earn less than she does in Washington, but she says salary is less important to her than doing interesting work in her own field and being able to live with her husband.

Not surprisingly, the proposal has stirred a controversy. At one extreme are those who feel nothing at all should be changed. Joan McGinley, a Foreign Service wife for 35 years, says she is one of the "old guard" who feel that the "wife-of" should not be paid. She laments the loss of the old days and their values. "We did it because we had to," she says. "Some resent that the ladies today want to get theirs. I'm rather wedded to the concept of volunteerism."

"Some people say it's socialistic," says Family Liaison Office director Marcia Curran. Others feel that it's unnecessary and "if you have enough imagination and flexibility, you can find a job you like."

Anne Murphy, a former ambassador's wife and the first recipient of the Avis Bohlen award for outstanding service as a Foreign Service wife, questions how the plan can be implemented. If spouses are to be hired by the government, their work will have to be evaluated. How will they be evaluated fairly? She imagines the following:

"Suppose the ambassador's wife's soup was cold and her ice cream was warm. Fire her? But then the second agricultural wife had superb food, an incredible mix of people, and the ambassador got the meeting he wanted. Double her pay? . . ."

Among the criticisms, debate seems most intense about the "hostess issue"—the most traditional of an official wife's duties.

Murphy's view is that "it's grotesque to get paid for giving dinner parties." Ann Macfarlane, a former Foreign Service wife raising a family, tells the story of the housewife who is asked in a survey: "Do you think that housewives should be paid?" The housewife replies, "Absolutely not, because you couldn't pay me enough." Macfarlane's opinion is that wives will continue to do the work for love, not money.

Others say no amount of money could entice them to do official entertaining. Still others feel that they are justified in asking to be paid for hostessing because senior diplomats who do not have wives may—and often do—pay someone else to oversee their entertaining.

"Antagonism comes from not being appreciated," says Meryl Steigman, wife of a former ambassador to Gabon. "In our society, unfortunately, the big appreciation is money."

Ann La Porta would agree. She has spent 20 years as a Foreign Service wife. When she married her husband, Al, she was going to law school at night and working in the day.

In 1967 they got their first overseas assignment, to Jakarta, and she began her career as a volunteer. She took time out from her duties to deliver one baby in Penang and another in Kuala Lumpur—and to deal with a family crisis when her son was taken hostage in Indonesia at the age of 7.

Throughout it all, she continued to pursue her studies; more than 11 years after she had begun, she received her law degree from George Washington University. That year she went to Turkey with her husband, eager to work as a lawyer for the U.S. Air Force base near Ankara. Although she was welcome there as a legal volunteer, she could not get a job. She enjoyed the work but not the "pay."

When La Porta returned to Washington in 1981, she found her résumé didn't get her far. "You can't sell volunteerism to anybody," she says. "I've managed 40 people . . . I've worked at a GS10 or 11 level, and they laugh at you here." She finally found a job handling a caseload of 40 children for the Council of Child Abuse and Neglect—as a volunteer.

La Porta supports Low's proposal, and especially favors a provision that would help a spouse find employment in her profession. In the Foreign Service, she says, "you're married to your husband's job in a way. If the wife doesn't like it, the man gets out, or they get a divorce.

"Getting out or getting a divorce" is part of the "major problem" referred to by Undersecretary Spiers and one that worries many senior officials in the Foreign Service.

Marcia Curran, a Foreign Service officer's wife, says young couples, full of enthusiasm and adventure are willing to go out for a tour or two. But in midcareer, enthusiasm wanes. There may be teen-age children, and the spouse may be taking a hard look at once again leaving a good job in Washington. Perhaps the husband opts out of the service altogether, or his wife decides to stay behind if he goes abroad.

By the time the man becomes a senior officer, it is not uncommon for him to go on assignment alone, partly because high-ranking diplomats have greater representational duties. Diminishing numbers of senior wives are willing to undertake 30-to-40-hour weeks of unpaid labor. At a certain point, "you've had it, and you feel you owe yourself something," Curran says.

The women behind Low's proposal intend to close the debate, devise a workable legislative strategy and push on. Barbis says the State Department has been receptive, "but we have to keep the heat on."

In the end, Marlene Eagleburger may do much of the pushing. She has done it before. Last spring she took another proposal for spouse compensation to the Hill and carried her message to the media.

Her proposal wasn't introduced as a bill because time ran short before the fall elections.

So far, Secretary of State George P. Shultz has taken no stand on the proposal. Eagleburger says that "if Secretary Shultz endorses [the plan], it would certainly be helpful."

If Shultz doesn't endorse the plan, Eagleburger will look to Congress. "This is a wrong that needs righting, even if it is a difficult budget climate," she says.●

DALE T. TAYLOR ON SOVIET MYTHS AND REALITIES

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. COURTER. Mr. Speaker, Congressional Librarian Daniel Boorstin once wrote a fascinating study of our propensity for dwelling upon illusions at the expense of dealing with realities. He called his book "The Image." Mr. Boorstin must have viewed with detached amusement the efforts—initially successful—to paint Yuri Andropov as a man of Western political inclinations and tastes.

Now a similar campaign is coloring Mikhail Gorbachev with an eye to our satisfaction. Mr. Dale T. Taylor, vice chairman of the New Jersey Conservative Union, took a look at that campaign in a column he wrote for the Gloucester County Times this April 11. I would like to submit it for reproduction in the RECORD.

The article follows:

Who says that the Soviets don't understand the Americans? Obviously, the author of that comment wasn't referring to the latest in a long string of ruthless Soviet functionaries-turned-leaders: Mikhail S. Gorbachev.

It really wasn't that many months ago that Yuri Andropov, the former KGB butcher, ascended to the leadership ranks of

the world's premier totalitarian body—the Soviet Politburo.

A master of manipulation, particularly with respect to the Western media, Andropov succeeded in spreading the stories that ran rampant in the press that he was, after all, a "closet liberal."

Yes, this man who oversaw the slaughter of Hungarians, the ruthless suppression of the Czechs, the assassination of Soviet dissidents and the jailing of Soviet Jews seeking to flee Russian tyranny, somehow (through the magic of disinformation—Soviet style), became a fancier of Western clothes and even jazz.

The American news media bought it hook, line and sinker. George McGovern, that darling of the left, said that Andropov was one of the most reasonable Soviet leaders to come down the pike. So much for George McGovern. And so much for the left.

But the current Soviet leader, Mikhail S. Gorbachev, has managed to create a swooning of affection from the West that must have old Joe Stalin tossing in his grave. And Gorbachev has milked the steady stream of attention for all it is worth.

And so it was no great surprise that, on Easter Sunday, Gorbachev launched his first major propaganda blitz of many sure to come.

Gorbachev, named Communist Party general secretary soon after the death of Konstantin Chernenko, announced that he was "freezing" the deployment of Soviet medium-range SS-20 missiles until November.

Gorbachev also called for a freeze on research of so-called "space arms." (A typical Soviet ploy, since research into space weapons, and most other weapons systems for that matter, isn't verifiable).

The so-called "peace movement" in America is, of course, simply ecstatic over all of this Soviet good will from a man now being referred to as the Soviet Union's answer to John F. Kennedy.

But the facts (something the peace movement in New Jersey and elsewhere would prefer not to deal with) tell a different story.

The Soviets now have 414 SS-20s. The United States and NATO have only 134 medium-range missiles deployed (the BGM-109A "Tomahawk" ground-launched cruise missile and the Pershing II Missile).

The Soviet SS-20 was first deployed in 1977, while the first U.S. medium-range system wasn't deployed until the end of 1983. (By then, the Soviets had deployed hundreds of SS-20s. The only comparable NATO weapon was 18 antiquated intermediate-range SSBS S-3 missiles held by France).

The Soviet SS-20 (three-fourths of which are targeted on Western Europe, with the rest easily movable to the Western Front if needed), carries three warheads. In addition, there are from one to five "reload" missiles at each SS-20 mobile site.

The total warhead count is somewhere in the range of 1,200 to 3,800.

American Cruise and Pershing missiles, on the other hand, have only one warhead each. And even if the entire complement of 572 U.S. missiles is deployed as scheduled by 1988 (with the Soviets not deploying even one more SS-20), the Soviets would still hold anywhere from a 3-to-1 to 5-to-1 warhead advantage.

Each American Tomahawk or Pershing warhead carries up to 50 kilotons of nuclear explosive power. (A single kiloton is equal to 1,000 tons of TNT). An SS-20 warhead, on the other hand, carries up to 150 kilotons.

American Cruise missiles deployed in Europe have a range of 2,500 kilometers; Pershing II, 1,800 kilometers. The Soviet SS-20s have a range of 5,000 kilometers. (A kilometer is about 5/8 of a mile).

Nevertheless, the same members of the peace-at-any-price crowd in America who claim that American weapons deployed in Europe are "first strike" in nature, never raised a peep when the Soviets began to deploy their truly first-strike weapons eight years ago—six years before NATO responded with its own deployment.

Even factoring in short-range, tactical, air and sea-based nuclear systems, and U.S. strategic systems commonly assumed to be assigned to the European theater, the Soviet Union and the Warsaw Pact dominates the nuclear weapons arena by a massive margin.

But no matter. The Soviets will continue their carpet-bombing of Afghanistan, their repression in Eastern Europe, their use of chemical and biological agents in Southeast Asia, the support of international terrorism, and the destabilization of the world through Marxist-instigated wars of national "liberation."

Liberals and the left will respond with their usual trashing of the United States. And Mikhail S. Gorbachev will be on his way to the Soviet version of Camelot, dutifully choreographed by a willing—and thoroughly duped—Western news media.●

NEED FOR PARENTAL LEAVE POLICY

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. GREEN. Mr. Speaker, it is important that we are devoting time today to the issue of parental and disability leave, and the need for formation of a policy to address this matter of particular concern to working parents. I am pleased to cosponsor H.R. 2020, the Parental and Disability Leave Act of 1985, which would require employers to provide job-protected leave for parents who choose to stay home with a newborn, newly-adopted, or seriously ill child, and for pregnancy related or other short-term disabilities. This legislation represents a serious effort to provide adequate protection of employees' employment and benefit rights during parental or disability leave.

Since World War II, the composition of the labor force has changed dramatically, particularly with respect to women's participation. However, as recently as in the last two decades, the patterns of women who work have also changed substantially. In the 1950's, the most significant gains in the labor force occurred among women aged 45 to 64, who had completed their child-bearing and child-rearing duties. However, in the 1960's and 1970's, it seems that children's presence as an influence on the decisions of women to enter the labor force diminished. During this period, women of child-bearing and child-rearing age, aged 20 to 44, experienced the largest increases in labor force participation. Between 1960 and 1983, the proportion of married women who were both in the labor force and raising children more than doubled. Further, the number of women workers is projected to increase faster than the overall labor force growth rate between 1980 and 1995.

In view of these facts, it is clear that the need for a parental leave policy is of great importance. Eighty percent of working women are likely to become pregnant are back at work within less than a year after childbirth. Under current law, the Pregnancy Discrimination Act passed in 1978 provides that discrimination on the basis of pregnancy is sex discrimination. The law requires that pregnancy-related disability be treated in the same manner as other short-term disabilities depending upon the employee's ability or inability to work. However, Federal law does not require employers to provide disability leave for any employees. As a result, policies vary greatly with respect to job-protected leave for employees who are temporarily disabled for any reason. Further, there is no Federal policy concerning child care leave for working parents. By contrast, every industrialized country except the United States provides some period of job-protected maternity leave with some amount of wage replacement.

This legislation does not address only maternity leave, a concept which has led to problems of discrimination against women in the past by distinguishing pregnancy as a separate condition. Further, dealing only with maternity leave does not account for the role fathers play in child-rearing, nor does it account for male employees who are temporarily disabled. H.R. 2020 provides 6 months of job-protected disability leave for all employees who are temporarily disabled, and 4 months job-protected parental leave for all employees upon the birth, adoption, or serious illness of a child. Further, it authorizes a study to determine ways of providing salary replacement for employees who take parental and disability leaves.

We have made substantial progress in recognizing the changing roles of women in the work force, assessing the pertinent problems which have emerged, and developing solutions to reflect new patterns in American society. By including the issue of parental and disability leave on our agenda, we are continuing to make progress in our efforts to achieve equality for women.●

MY PLEDGE TO AMERICA

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. RUSSO. Mr. Speaker, each year the Veterans of Foreign Wars of the United States and its Ladies Auxiliary conduct the Voice of Democracy scriptwriting contest. This year more than 300,000 secondary school students participated in the contest competing for the six national scholarships which are awarded as top prizes. The contest theme this year was "My Pledge to America."

Today I would like to share with you the winning entry from my home State as delivered by Lori Lesniewski, of Burbank, IL, a 17-year-old senior at Reavis High School. I'm impressed and hopeful when I read such as essay and am reminded of the wisdom and patriotism of our young citizens.

I know my colleagues join with me in commending Lori as well as the other young people who won recognition in the Voice of Democracy contest, and in commending the Veterans of Foreign Wars and its Ladies Auxiliary for this fine program which encourages young people to think about democracy and provides educational scholarships.

MY PLEDGE TO AMERICA

(By Lori Lesniewski)

When I think of America, I envision a large flag with the outlines of the stars and stripes standing out in perfectly clear cut lines, almost as if they formed pieces of a puzzle, a jigsaw puzzle.

I think of my pledge to America as a jigsaw puzzle. My pledge consists of many different aspects, that of supporting American ideals, voting, paying taxes, and helping others. All aspects have different qualities and come in many forms, just as pieces of a puzzle do.

As I begin the task of completing the puzzle it seems confusing, but as I sort my way through the many different colors and shapes a corner piece stands out. That corner piece is important, it holds the base of my pledge, supporting the puzzle, supporting America. A most important part of my pledge is to support American ideals. To uphold American standards is to have a strong belief in the judgments and decisions our country makes. Without this allegiance to our great nation, we would find ourselves reduced to wandering and confused persons. In a sense, with the absence of a strong belief, the United States of America would exist no more. This strong sentiment is exactly what this country was built on. I believe the backbone of America is the spirit the people possess, which supports our country. As I place this key piece into the puzzle a feeling of satisfaction overwhelms me.

Continuing my way through the mass of different forms another piece is spotted. This piece carries with it the tag of voting. To be able to choose our nation's public officials is an honor held high in my opinion. There is a growing interest in the qualities and beliefs of those individuals we choose for our leaders. This was apparent in the 1984 election for President. One candidate stood for liberal views and the other for traditional conservative values.

The state of our nation used to be in is the state the voters would like to see it in now. Obviously, this means a change in American thinking, but more importantly a change in American attitude. I believe this nation gives us a chance to express our views through voting and it is a chance that will certainly not be overlooked by me. Voting is one of the events in a young adults life, like myself, that signifies maturity and an interest in the state of America.

Each American must pay his fair share of taxes so that we can have a strong defense, police and fire protection, and a well run government. This brings us to the next piece, that of paying taxes. Taxing is the catalyst, the oil to run the machine, without it, our nation would crumble to the ground. There is a link between voting and taxing. If the American people vote responsible and honest people into office, they will not abuse the privilege of spending taxes and our government's money will be used correctly.

Working towards the completion of my puzzle pledge, I find there is also a heart shaped piece that fits in the center of the puzzle. This piece represents the kindness of the American people. I highly value this special piece, difficult to find, but well worth the wait. Kindness and caring towards others has a ripple effect. A smile usually brings about another smile. I feel that if people lend a helping hand we will have a stronger country. Not only will the person you help benefit but you will receive the rewards also. Americans through the years, shared their wealth with those less fortunate because they too came from humble beginnings. Whether it be the starving masses in Africa or the little children in deprived areas of our cities. We have reached out to the needy. We are probably the most generous people in history. That heart fits snugly in the center of the puzzle. When my puzzle pledge is completed it forms a breathtaking view of the American flag. Representing our nation, it shows off its vibrant colors and shapes of stars and stripes proudly, but not as proudly as we would all like to think. There are some frayed edges in our American Flag and my main pledge is to strive to make it whole and perfect.●

PERSONAL EXPLANATION

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LELAND. Mr. Speaker, yesterday, for reasons of official business, I was unable to be in Washington. Had I been here, I would have voted "yea" on H.R. 1786; House Resolution 125; House Concurrent Resolution 33; House Concurrent Resolution 52; House Concurrent Resolution 110; Senate Joint Resolution 15.●

THE CONTRAS: AMERICAN SURROGATES OF TERRORISM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BROWN of California. Mr. Speaker, we will soon vote on aid for the Contras in Nicaragua. President Reagan, in his efforts to repackage this aid, has referred to the counterrevolutionaries as freedom fighters, and has likened them to our Founding Fathers.

The President calls his aid request a peace plan. This plan sends a simple message to the Sandinistas; "If you refuse to give up portions of your sovereignty within 60 days, the United States will resume its efforts to overthrow your government."

Before we vote on this proposal, I think we should reassess the meaning of this policy.

The Contras are using violence and terrorism in their efforts to overthrow the Sandinista government. It wasn't so long ago that President Reagan launched an all-out program to battle terrorism wherever it existed.

The United States publicly decrys terrorism and covert plots of the KGB and other organizations. We abhor these practices because we believe in certain basic human rights. These rights include the right to personal safety, the right to personal property, and the right to a government supported by the people.

Mr. Speaker, by resuming aid to the Contras, our great country, which prides itself on protecting basic human rights, will go on record as supporting and encouraging terrorists who rape, murder, burn farms, and whose main goal is to overthrow the Sandinista government with or without the support of the Nicaraguan people.

With the resumption of this aid, the United States would be sending a message around the world. This message would read:

The United States strongly objects to and condemns the use of terrorism by our international neighbors, but the United States fully intends to use these methods herself.

Mr. Speaker, this is hypocrisy in its truest sense. Is this how the United States chooses to promote world peace and the right to sovereignty? By supporting the terrorism?

Below is an article which recently appeared in the Wall Street Journal. I encourage my colleagues on both sides of the aisle to read it.

[From the Wall Street Journal, Mar. 28, 1985]

REAGAN'S SELECTIVE AVERSION TO TERRORISTS

(By Michael Kinsley)

The poor, naive Carter administration thought you could build a foreign policy

around human rights. The Reaganites laughed that one out of town. But the Reagan administration has a sentimental obsession of its own: terrorism. Alexander Haig said in his first week as secretary of state: "International terrorism will take the place of human rights in our concern because [terrorism] is the ultimate abuse of human rights."

This is fatuous nonsence, reminiscent of those doctors who analyze nuclear war as a public-health problem. But human rights and terrorism are actually quite similar as foreign-policy obsessions. Both are attempts to assert universal standards of conduct that override the usual considerations of geopolitics. "Terrorist acts . . . can never be legitimate," said the current secretary of state, George Shultz, last October. "And ligitimate causes can never justify or excuse terrorism."

The State Department defines terrorism as "premeditated, politically motivated violence perpetrated against noncombatant targets by-subnational groups or clandestine state agents." The kind of terrorism that most excites the Reagan administration is so-called "state-sponsored" terrorism through "intelligence services" and the use of "surrogates." This refers to such matters as the alleged KGB hiring of Bulgarians to kill the pope and Iranian support for the Shiite lunatics in Lebanon.

But there's another obvious example: the contras in Nicaragua. Two recent articles in the Wall Street Journal by reporters David Ignatius and David Rogers make clear that the contras are a virtual creation of the Central Intelligence Agency. It assembled their leaders from among alumni of Anastasio Somoza's National Guard, hired professional thugs from Argentina's military dictatorship to train them, and "repackaged" the leadership (as the authors nicely put it) with some democratic elements when criticism began to mount.

The articles also make clear that the U.S.'s purpose in this is the classic terrorist one of social and economic subverison. To bring down the regime, we are attempting to derange and impoverish the country by destroying its infrastructure and scaring off trade. Compare this to the administration's mock horror over the effects on South African blacks of a mere American investment ban.

We already have spent $80 million "sponsoring" the contras, and President Reagan wants $14 million more because they are "the moral equivalent of our Founding Fathers." Obviously our goal of a democratic Nicaragua is more admirable than goals of other sponsors of terror such as the Soviets and Iranians. But the premise of all the fuss about "terrorism" is that the goal doesn't matter. "Terrorist means discredit their ends," as Secretary Shultz says. So what makes the contras different?

Secretary Shultz likes to quote the late Sen. Henry Jackson on the difference between terrorists and freedom fighters. Freedom fighters, Jackson said, "don't blow up buses containing noncombatants" or "set out to capture and slaughter schoolchildren" or "assassinate innocent businessmen, or hijack and hold hostage innocent men, women and children. . . ." According to Americas Watch, a nonpartisan human-rights group, the contras have kidnapped, tortured, raped, mutilated and murdered many unarmed civilians including women and children "who were fleeing." No doubt there are nastier groups around, but this is an impressive record. Yet an unnamed State Department official told the New York Times, "It seems to be what you would expect to have in a war." Another administration official conceded, "The contras . . . have a tendency to kidnap young girls." Oh well.

It's sometimes said that these freedom lovers are hard to control and that "abuses," while deplorable, are not officially sanctioned. Sure. But any terror expert will tell you that random, out-of-control violence is a part of the method. It creates a desirable sense of anarchy. What's more, the U.S. does not accept the "hard to control" excuse from rival sponsors. Only last week, National Security Adviser Robert McFarlane declared that we will feel free to retaliate against states that sponsor terrorism without troubling to "prove beyond all reasonable doubt" that the object of our wrath is responsible for any particular terrorist act.

The regime the contras are attacking is not a democracy. Is that the crucial distinction? If so, why does the State Department highlight episodes in Kuwait, South Korea and South Africa in its most recent summary of terrorist activities? Terrorism, of course, makes democracy harder. "Where the terrorist cannot bring about anarchy," says Secretary Shultz, "he may try to force the government to . . . impose tyrannical measures of control, and hence lose the allegiance of the people." Mr. Shultz explained the "disappearances" (i.e. murder by the military) of thousands in Argentina during the 1970s as "a deliberately provoked response to the massive campaign of terrorism." The Sandinistas explain their own increasing repression (though nothing on the Argentine scale) the same way. But in this case the U.S. is not so understanding. "I don't think the Sandinistas have a decent leg to stand on," says President Reagan. "What they have done is totalitarian. It is brutal, cruel," And so on.

"It is in the objective interest of the Soviets to see the destabilization of regimes not friendly to them," wrote the editors of this newspaper in April 1981. ". . . Moreover, the Soviets . . . don't have hanging about them any silly Western liberal doctrines about the will of the majority, the unacceptability of violence, or the difference between military agents of the state and presumptively innocent civilians." I took this at the time as a criticism. But apparently not. More recently the Journal has said: "The objective of the Reagan administration's policy toward Nicaragua is to bring about a democratic government. . . . If [critics] are against the Nicaraguan democrats and in favor of the Sandinistas, we hope they will tell us that as forthrightly as the administration has now proclaimed its purposes." The end justifies the means, unless (as another journal editorial put it) you're some kind of "Common Cause lawyer" hung up on "international law."

Obviously it's hard to be good in a world where others are bad. When Mr. Reagan brings up the French Resistance, he makes the best possible case against his own conceit that terrorism is indefensible in all circumstances. But the Sandinistas are not Nazis. They are not so monstrous a regime that we have to abandon all hope of maintaining our own civilized standards in dealing with them. We are not so powerless that we must resort to mayhem and the murder of innocents. International law does not leave us with the choice of doing nothing or doing anything. Or does terrorism just mean "what the other side does"?

(Mr. Kinsley is editor of the New Republic.)●

TOWN OF BERKLEY COMMEMORATES 250TH ANNIVERSARY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FRANK. Mr. Speaker, this month marks the 250th anniversary of the incorporation of the town of Berkley, MA. This small community of 3,000 people nestled along the banks of the Taunton River has a long and rich history deserving of our attention. Settled in 1638, the town was incorporated in April 1735 and given the name "Berkley," after George Berkley, bishop of Cloyne, Ireland.

In 1866, Berkley laid claim to the launching of the largest two-masted schooner in the world at the Berkley Bridge, a mark of the 35-year shipbuilding industry that made the early town thrive. That bridge site, today called the Berkley-Dighton Bridge, is in need of replacement if this important community asset is to be maintained.

I am proud of the accomplishments of Berkley, MA, and commend the town on this propitious occasion.●

SBA—THE VOICE OF SMALL BUSINESS

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MAVROULES. Mr. Speaker, for over 30 years, the Small Business Administration has stood alone as the one Federal agency devoted to assisting the Nation's small businesses, a segment of our economy which is perhaps the most innovative and vital in America today. When the agency first began in 1953, its primary mission was that of a lending agency. Today however, the Small Business Administration has evolved to become a multifaceted agency providing a wide range of services to both new and existing small businesses.

Today, there are opponents of the Small Business Administration who seek to portray the agency merely as a federally subsidized lending institution. They would reverse what has been a bipartisan commitment to the advancement of small businesses in America. These same opponents seek to turn back the clock, all in the interest of questionable financial gain.

Money spent on SBA programs produces a tangible return on the investment. This is best evidenced in areas where SBA works with existing businesses to deal with the climatic changes they may be confronted with. These changes may be economic, tech-

nological, or even geographical. In each instance, these dollars are used to assist existing businesses in order to allow them to adapt to changes in the marketplace and remain competitive.

The following are but a few examples of how SBA works with existing businesses.

The 502 and 503 programs where Federal guarantees are used to leverage local financing from community-bases economic development centers.

The Surety Bond Guarantee Program which uses Federal guarantees to allow bonding of small contractors. This has opened up an entire market to small contractors which had traditionally been dominated by large contractors able to afford the substantial cost of becoming bonded.

Procurement assistance, which helps small business in doing business with the Federal Government, often at a cost which is substantially less than that charged by larger firms.

The Small Business Development Center Program, which requires a local match of any Federal appropriation for management and technical assistance to small businesses.

If we dismantle the Small Business Administration, some of these programs may survive, since the plan calls for them to be shoved off to an obscure corner of the Commerce Department, but many will not.

There are no guarantees.

Ironically, under the administration's proposal to abolish SBA, there is no guarantee that one Federal dollar will be saved. Take the SBA's loan portfolio for example. Under the proposed plan, this portfolio, estimated to be worth between $1.8 and $3.6 billion would be sold off. However, if SBA was allowed to continue to manage these loans, the eventual return to the Federal Treasury will be between $5 and $7 billion. In addition, many market analysts predict that there will be no commercial market for this loan portfolio.

American small business men and women are not looking for guarantees. They are simply looking for an equal opportunity to compete with the larger corporations who often seem to have the deck stacked in their favor.

These same individuals are looking to us to continue what had been a bipartisan commitment to this most important segment of our private-sector economy.

Mr. Speaker, small businesses need a voice on the Federal level. I would urge my colleagues to join in the fight to save the Small Business Administration.●

TRIBUTE TO FATHER MARK HEGENER

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LIPINSKI. Mr. Speaker, today I would like to take a moment to recognize and honor Father Mark Hegener, OFM, who this year is celebrating the 40th anniversary of his ordination as a Franciscan priest.

Over the last 40 years Father Mark has involved himself in numerous humanitarian endeavors. He possesses an impressive and unique record of accomplishments. Let me mention just a few of these.

Father Mark is president and founder of Mayslake Retirement Village which houses 750 elderly residents. He is also president and founder of the Chariton Retirement Complex, which is located in St. Louis. He was instrumental in securing Federal funding for this complex which houses approximately 165 elderly residents.

In 1956, through Father Mark's efforts, the Pax Et Bonum Hall was built at 51st and Laflin in Chicago. At this location Father Mark established the Third Order Credit Union to assist young families in purchasing homes in the Back of the Yards area.

Father Mark's other involvements include assisting the directing of the St. Philip of Jesus Social Center in Chicago at 46th and McDowell from 1949–60. He was founder and trustee of the Catholic Theological Union at Chicago from 1968–76. Father Mark was also trustee of Quincy College from 1972–76. Furthermore, Father Mark is the former chaplain of the Knights of Columbus, St. Augustine Council, and since 1980 he has served as the chaplain for the Knights of Columbus, Sacred Heart Council.

Father Mark has an extensive background in publishing. Since 1949 he has been the managing director of the Franciscan Herald Press, which is located at 1434 West 51st Street in Chicago. He has published some 1,000 books covering a broad field of church history, art, ecclesiology, theology, Cannon Law, Biblical studies and many interdisciplinary supplementary texts for high schools and colleges. As an author, Father Mark's works include Poverell: St. Francis of Assisi, 1958; A Short History of the Third Order of St. Francis, 1963; and Managing Your Third Order Fraternity, 1958.

With respect to his education, Father Mark obtained an AB degree in 1938 from St. Joseph's Seminary in Teutopolis, IL. He also did post graduate work at St. Joseph's Seminary in Cleveland, OH, from 1939–42. Father Mark received a bachelor of journalism degree in 1948 from Marquette University. He joined the Order of Friars Minor in 1938 and was ordained a priest in 1945.

Father Mark is a member of the American Home Builders' Association, the American Association of Homes for the Aging, and the Catholic Press Association. He is listed in Who's Who in America, American Catholic Who's Who, Who's Who in Religion, and Who's Who in the Midwest.

Mr. Speaker, I wish to extend my sincere congratulations to Father Mark Hegener on the 40th anniversary of his ordination as a Franciscan priest. Father Mark's extraordinary achievements, along with his tireless efforts to help his fellow man, are truly an inspiration to all of us.●

MATTY LEE, OUTSTANDING VETERAN

HON. DAN MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MICA. Mr. Speaker, it is with great pleasure that I today commend the bravery of an outstanding World War II veteran, Matty Lee. The heroes who have committed their efforts and risked their lives on our behalf should remain at the forefront of our hearts and minds. The following is Matty Lee's 1944 commendation:

ARMY SERVICE FORCES,
NEW YORK PORT OF EMBARKATION,
Jersey City, NJ, June 8, 1944.

SPTAA 201.22 CPCT.

Subject: Commendation, Matty Lee. (Thru: Utilities Officer, Caven Point-Claremont Terminal.)

I am in receipt of a report on a breakdown of the power and lighting system of this Terminal which occurred on the evening of 2 June 1944. This report commends very highly the manner in which you went about placing the power and lighting system into operation. You were called for emergency duty and you performed a very efficient and coordinated job of which I am very proud.

I therefore wish to take this opportunity to commend you for the exceptionally fine manner in which you performed your duty and for the interest you displayed which was over and above the call of duty.

John U. Schiess,
Colonel, TC, Commanding.●

DAYLIGHT SAVING EXTENSION ACT OF 1985

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MARKEY. Mr. Speaker, today I am joining with my colleague CARLOS MOORHEAD and four cosponsors to introduce the Daylight Saving Extension Act. The legislation would begin daylight saving time on the third

Sunday in March rather than the last Sunday in April. Daylight saving time would also be extended until the first Sunday in November rather than the last Sunday in October. The latter change would place Halloween under daylight saving time and bring added daylight and safety to young children going to trick-or-treat.

Extended daylight saving time has always been popular with the public. A recent poll conducted by Nation's Business found that its readers supported our bill to extend daylight saving time by a margin of 68.9 percent to 29.5 percent.

Beyond personal taste, daylight saving time has a variety of important benefits. It is a big energy saver. A study performed by the Department of Transportation following an experiment with extended daylight saving time saved 100,000 barrels per day of oil equivalent during March and April.

Daylight saving time makes our lives safer. The Department of Transportation study also found that traffic fatalities declined by 0.7 percent during extended daylight saving time in March and April compared to standard time.

Daylight saving time is also a crime fighter. During the last experiment with extended daylight saving time, violent crimes in the District of Columbia declined by more than 10 percent compared to comparable months in years under standard time.

Extending daylight saving time is also good for our economy. This year a broad-based business coalition is supporting extended daylight saving time. Among the group are the National Association of Convenience Stores, the Foodservice and Lodging Institute, the National Confectioners Association, the American Association of Nurserymen, the Sporting Goods Manufacturers Association, the Barbecue Industry Association, and many others.

Over 400,000 Americans suffer from retinitis pigmentosa, a disease which causes night blindness. Extending daylight saving time will literally give these people the gift of sight for an extra hour in the evening, making this legislation a high priority for the RP Foundation fighting blindness.

Our legislation differs from daylight saving bills considered by the House in the past two Congresses. They would have begun daylight saving time on the first Sunday in March. Our bill delays the beginning of daylight saving time until the third Sunday in March. This compromise approach clearly avoids any unacceptably late sunrises. In fact, the sunrises on the third Sunday in March under daylight saving time would be no later than the sunrises in January under standard time. Sunrises get early rapidly during late March and April, further mitigating any early morning problems.

In short, this is a bill which will stimulate our economy without tax breaks or subsidies. It will bring safety to the streets and energy savings as well. If you want to help let the sun shine in by cosponsoring this legislation, please call David Schooler with the Subcommittee on Energy Conservation and Power Office at 6-2424.●

MY PLEDGE TO AMERICA

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. EDWARDS of Oklahoma. Mr. Speaker, with great pleasure I would like to share with my colleagues a speech by Jennifer Johnson, a 16-year-old junior attending the Living Word Academy in Edmond, OK. Jennifer's throughts and eloquence have earned her first place honors as the Oklahoma winner of the Veterans of Foreign Wars Voice of Democracy competition. More than 300,000 students, representing more then 8,000 secondary schools, participated in the script writing contest, all competing for the six national scholarships which are awarded as top prizes. Scholarships totaling $32,500 will go toward continuing the education of the winners at the schools of their choosing.

I commend the VFW for this program. I believe it fosters in our youth an appreciation—and further understanding—of our freedoms. Democracy, whereby government governs by the consent of the people, is only a dream for many oppressed people in our world today. Young Americans ought to know that our freedoms of speech, petition, assembly, religion and others are perishable and have been scarce throughout history. A greater understanding of our freedoms will help our young Americans to realize that freedom is not free but attained at a price. An increased appreciation and knowledge of the sacrifices made for the cause of freedom will only serve to assure our vigilance in future generations.

The contest theme for this year is "My Pledge to America." Jennifer pledges many things to her country and it is clear that underlying her lofty pledges is a true appreciation of precious freedom. I respectfully submit into the RECORD Jennifer Johnson's "My Pledge to America."

MY PLEDGE TO AMERICA

(By Jennifer Johnson)

I consider it a great privilege to live in America. This truly is the land of the free. America welcomes all mankind—the rich, the poor, the black, the white. I love this country of mine, and I want to do everything possible to help develop her to even greater heights. I believe that America's future is promising for generations to come, and we, as citizens, must take on the responsibility of helping insure that we maintain her freedom. We must take a stand for right. I pledge to be loyal to what America believes in and stands for. I pledge to not be critical of her daily strifes but to have a positive attitude towards the whole overview of life in America.

I pledge to encourage the small child, sitting behind the school desk, I will tell him that America is full of opportunities. I will encourage that child to get the best education possible so that as he becomes older he will have the chance to explore what America has to offer. I would explain to him that freedom gives him the right to choose any vocation.

I pledge to express my gratitude and deep appreciation to the paraplegic war veteran living down the street. I will tell him that it was because of his courage that we still have the privilege of living in a free land. He has shown the utmost faith in our country by risking his life in the wartorn country of Vietnam. He is a representative of all of the soldiers of decades past who have fought to preserve the freedom of my country. I cannot thank them all personally but my heart overflows with thanksgiving for their sacrifices in my behalf. America's soil holds thousands—million of military graves—men who have died valiantly for our cause—I promise to preserve the memory of those men in the hearts of all Americans.

I also pledge to show my appreciation to the representatives and statesmen who have dedicated their lives and service to these United States. I will express to them my stand on political issues that confront this nation, realizing that it is the politican who has the power to tear down or build up America's reputation. I pledge to help him built it up. I will pledge to try to influence those politicans that represent me to spare the millions of lives that are being sacraficed every year by abortion. If I am responsible for even one of those lives being saved, my cause on this earth will have been fulfilled.

And most importantly, I pledge to thank God for the many blessings He has bestowed upon us and ask His continual blessing upon America. He has enriched us with His gracious love in many ways. God is love, God has built up America's way of life over and over again. I will pledge to try to be worthy of this.

Freedom was but yesterday's dream. Freedom is today's reality. Freedom is the key to unite all individuals in America to become and act as one. I pledge to America to exerise my right of freedom until I draw my last breath of life.●

WHEAT EXPORT ENHANCEMENT ACT OF 1985

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. ENGLISH. Mr. Speaker, today I am introducing the Wheat Export Enhancement Act of 1985 which is aimed at curing the long-term problems faced by wheat farmers while still providing the American consumer with the best food bargain in the world. I am including a detailed description of the program for the RECORD, but I

would like to quickly summarize its major benefits. This bill will allow wheat farmers to earn a living from the market and pay their bills. It will reduce Government costs over the long term. And it will continue the 50-year policy of the United States that its citizens will be assured of a bounteous supply of food at reasonable prices. The provisions of this bill have been developed over a period of months in consultation with wheat farmers from all parts of the Sixth District of Oklahoma.

THE WHEAT EXPORT ENHANCEMENT ACT OF 1985

America's wheat growers are buried under a surplus of grain caused by the loss of export markets and ineffective application of the production adjustment authority granted to the Secretary of Agriculture. The surplus has caused market prices often below the cost of production, inability to meet debt service needs, declining standards of living, and—all too often—bankruptcies and farm foreclosures.

The Administration has proposed a solution to the problems of wheat farmers—lower the price and grow more wheat. This proposal will lead, inevitably, to more farm foreclosures and a greater surplus. The Administration's proposal is not a cure, its a bigger dose of the same disease.

The Wheat Export Enhancement Act of 1985 provides a way to move wheat quickly into world markets, get rid of the price-depressing surplus, protect wheat farmers incomes, and continue to insure an adequate supply to consumers at a fair price. It does so by focusing on exports and production adjustment for farm income protection and on maintaining a year's domestic supply for consumer protection.

First, the act provides that the Secretary of Agriculture will reciprocate when foreign nations use subsidies or other artifices to unfairly compete with America's farmers. It allows the Secretary to match foreign governments tit for tat so that U.S. farmers do not have to fight another nation's treasury.

Second, the act provides a mechanism whereby farmers who cooperate with the Secretary to manage the wheat surplus earn a payment for export wheat if the average market price does not rise to a level established at 70 percent of parity. The market price will be computed on actual sales every three months during the marketing year and the payments will be made each quarter to farmers who actually sold wheat for export during the quarter. The operation of this phase is controlled by export marketing certificates which are issued to cooperating farmers and which are returned to the Secretary by exporters when the wheat leaves the country.

Third, the act requires the Secretary to adjust production of wheat so that the carryover from year to year will be at about the level of one year's domestic supply. The American consumer is thus assured of an adequate supply yet the farmer is not unduly burdened by price-depressing surplus.

Farmers who do not cooperate with the Secretary in managing the surplus are restricted to sales for the domestic market because the wheat they offer to the trade will not be accompanied by export marketing certificates.

The major objective of the plan is for farmers to get their income from the market place and not the federal treasury. The operation of the surplus management feature will ultimately move the market price upward toward the 70 percent of parity level.

Cooperating farmers will not be required to plant their entire permitted acreage in order to earn their full share of export marketing certificates. Thus a farmer can produce less in a given year and market wheat from an earlier year with the current year's certificates. A farmer could then retire less productive acreage which is prone to erosion without damaging the family income or losing wheat base.●

MRS. MARILYN WIESENECK LEVENBERG HONORED

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. TORRICELLI. Mr. Speaker, I am honored to call to the attention of the Congress the recognition being extended to Mrs. Marilyn Wieseneck Levenberg of New Milford, NJ for her many years of outstanding service to the Jewish community.

On April 20, 1985, Mrs. Levenberg will be the guest of honor at a dinner being held by the New Milford Jewish Center. The dinner has been organized in order to pay tribute to the unparalleled dedication of Mrs. Levenberg has displayed during her 25 years of active involvement.

Over the years, Mrs. Levenberg has served in numerous capacities. She has been president of the northern New Jersey branch of the Women's League of Conservative Judaism, a member of the Regional Board of Directors of the United Synagogues, a member of the National Board of the United Synagogue Youth, and vice-president of the Council of Jewish Women.

Friends and family who proudly honor Mrs. Levenberg hail her as an exceptional member of the community. They are delighted to have the opportunity to recognize her achievements and to bestow upon her the honor which she richly deserves. I am proud to be able to join in this celebration and commemoration.●

AIR TRANSPORTATION PASSES SHOULD NOT BE TAXED

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FIELDS. Mr. Speaker, today I have introduced legislation to provide that air transportation passes provided by an airline through its employees shall be tax free.

The Deficit Reduction Act of 1984, which was signed into law last July, included a comprehensive title which clarified the tax status of employee fringe benefits. The purpose of this title is evident: to limit tax-free fringe benefits which may be provided in lieu of taxable income. However, I believe the Deficit Reduction Act stepped beyond the bounds of preventing revenue loss and attempted to legislate, improperly, in my view, corporate policy.

Taxation of air transportation passes will not raise additional revenue for the Government. Why? Because the airlines, faced with an additional paperwork burden will simply discontinue the issuance of airline passes for other than its employees' immediate families. Additionally, taxation renders the undependable air transportation passes uneconomical. While some may argue that it is unfair for airlines to provide these travel benefits, I would respond that it is profoundly more undesirable for the Government to dictate corporate policy under the guise of the Tax Code.

The Federal Government loses no revenues from the use of air transportation passes. Further, the airlines loses no revenue in offering air transportation passes. The airline benefits are "no cost" for two basic reasons. First, the passes may only be used for otherwise empty seats. The pass bearer retains the lowest standby status, may be seated only after all revenue passengers have been seated and may be removed during any leg of the trip should his/her seat be needed for a paying passenger. And, second, most, if not all, airlines charge a fee to cover the cost of meals, baggage handling, etc.

In conclusion, Mr. Speaker, airline passes do not decrease Government revenue, and do not increase airline costs. Conversely, by taxing these benefits, we will not lower the budget deficit, we will simply ensure that empty airline seats remain empty. In the process we will deny travel opportunities to a large number of individuals.

Although legislation has been introduced to restore tax-free benefits to parents of airline employees, and I support such legislation, my bill takes a different approach. My bill exempts airline passes which are provided through airline employees from taxation in their entirety. Consequently, it allows each airline—not the Government—to establish its own policy as to who may qualify for empty-seat airline passes.

I urge my colleagues to cosponsor this legislation.●

REMEMBERING THE HOLOCAUST

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. KOSTMAYER. Mr. Speaker, the 40th anniversary of the liberation of the concentration camps is now being vividly recalled throughout Europe and in this country.

From April 21 through April 23, the Inaugural Assembly of the American Gathering of Jewish Holocaust Survivors will meet in Philadelphia to commemorate liberation of the Nazi death camps. Chosen as the site for this year's commemoration because of its role in America's struggle for independence, Philadelphia will host over 2,000 volunteers of all religious faiths working in support of this historic event.

The opening ceremony will take place on Sunday, April 21 at 1 p.m. A memorial Yiskor ceremony will be held at the Monument to the Six Million Martyrs on John F. Kennedy Boulevard. A processional to the Liberty Bell entitled "America: the Road to Freedom" will follow. Here survivors will pay homage for their lives and for their freedom. Three days of seminars, workshops, and commemorative events are scheduled to take place at the Philadelphia Civic Center.

The American Jewish Committee hopes to expand the computer registry of American survivors which has brought about the reunion of many lost family and friends. This listing now includes the names and residences of over 55,000 survivors. In addition, oral histories of survivors will be recorded, documented, and preserved in cooperation with the Holocaust Oral History Project of the William E. Weiner Oral History Library. These are recollections of both the horror and destruction of the concentration camps, as well as testimonies to the resilience of the spirit, courage, and faith of those who survived and perished during those dark days.

One of my constituents, Mrs. Rachel Ickovics of Richboro, will be attending this gathering along with her husband, brother, and sister-in-law. All are survivors of the concentration camps. While they lost most of their families, neighbors, and friends to the camps at Auschwitz, Buchenwald, and Treblinka, they regard themselves as lucky to have survived. Rachel was 14 when she entered Auschwitz; she spent over a year of her life there. She recalls, "Life didn't mean anything in Auschwitz. I remember watching people lying down on the road to die, while others threw their bodies on the electrical fences in order to avoid suffering through another miserable day." She also watched her parents, brothers, and sisters enter the gas chambers. Rachel's stories are not unlike those of other survivors who remember the feelings of isolation and the stench of death.

Mrs. Ickovics has not always talked about her experiences so openly. She speaks in sober, restrained tones in order to bear witness and to pass these stories from generation to generation so that no matter what color, religion, or creed—this type of systematic destruction of human life never happens again.

The organizers of the American Gathering anticipate over 10,000 Holocaust survivors from around the world will attend the gathering in Philadelphia during these 3 days. The first gathering took place in Jerusalem in 1981. A second gathering took place here in Washington, DC, in 1983.

Mr. Speaker, along with my colleagues and fellow citizens, I stand with the Inaugural Assembly in recalling the systematic brutality that occurred in the concentration camps during and prior to World War II. We recognize the just and righteous men and women of all faiths who rescued Jews and non-Jews alike from persecution and death.

May this gathering be blessed by reunion, commemoration, and the triumph of the human spirit of survival. Forty years later, we are all moved by the spirit of hope and commitment to freedom embodied by the Inaugural Assembly.●

H.R. 2020

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mrs. KENNELLY. Mr. Speaker, we are a culture that celebrates its children. As individuals, we devote great time and energy and love and not a few gray hairs to the well-being of our children.

Yet, although we give plenty of lip service to the wholesomeness of motherhood, we as a society have in many respects fallen short of developing the kinds of public policies which reflect a true commitment to children, the kinds of policies which promote children's development and strengthen the bonds of family. When it comes to pregnancy and childbirth, we fall particularly short when it comes to policies related to pregnancy and children.

It is now estimated that four-fifths of the women now working outside the home will become pregnant during their working lives. Under the Pregnancy Discrimination Act, their pregnancy-related disabilities must be treated like any other short-term disability. Unfortunately, nothing in the law requires employers affirmatively to provide disability leave. And worse, after the child's birth, the United States unlike every other industrialized country and many developing countries, has no policy concerning child care leave for the mothers and fathers of newborns.

The lack of guaranteed parental leave too often forces mothers and fathers to choose between their job and their baby. When the family's economic security is at stake, the choice is stark, the strain on the child's mother is great, and both she and her infant lose this most critical time for bonding.

If we are going to truly celebrate motherhood and ensure that our children develop this critical bonding during the first few months of their lives, crucial to emotional and intellectual growth throughout their lives, then it is time we catch up with the rest of the world and require employers to provide their employees with guaranteed disability and parental leave time.

H.R. 2020, of which I am an original cosponsor, does this. Employers are required to provide a minimum of 6 months leave for a short-term disability and 4 months parental leave for parents to care for their newborn, newly adopted or seriously ill child. Under the bill, the Secretary of Health and Human Services would develop regulations for the verification of temporary disabilities and for the verification of eligibility for parental leave.

This legislation is particularly important for low-income working women, as nearly half of the married women in the labor force have husbands who earn less than $15,000 a year, and these women are the most likely to be concentrated in jobs which do not provide adequate employment benefits.

H.R. 2020 is an important step in promoting the well-being of our children and helping women cope with the stresses of job and motherhood. It recognizes the contribution that both parents make in the early development of their children and I urge my colleagues to support it.●

A SALUTE TO NIH

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BARNES. Mr. Speaker, I would like to bring my colleagues attention to an important event that will be taking place in January 1986 in my district of Montgomery County, MD. That is, a "Salute to the National Institutes of Health," sponsored by the Juvenile Diabetes Association.

The timing of this event is most appropriate as NIH approaches its 100th birthday in 1987, as is the theme of the salute—"Bethesda, the Healing Well"—blending the concept of the biblical healing well with the location of NIH itself. This will serve to emphasize the striking advances in health care, including innumerable new insights into human disease, for which NIH has been responsible in their laboratories and clinics in Bethesda, MD.

Dr. Lewis Thomas, president emeritus of the Sloan-Kettering Institute for Cancer Research, stated in a recent reference to the National Institutes of Health:

As social inventions for human betterments go, this one is standing proof that, at least once in awhile, Government possesses the capacity to do something unique, imaginative, useful and altogether right * * *. It has, in short, been a success story from start to finish, although the finish is, I trust, nowhere near. The NIH laboratories are something for the Government to boast about, to dine out on, and to be immensely proud of. It is my hope that the same intelligence and good taste will be displayed for the institution's future as were used to build the magnificent instrument now at hand.

As the Federal agency entrusted with the development and progress of research in the biomedical sciences, NIH has enjoyed the consistent support of Congress. I am sure that we can wholeheartedly agree with Dr. Lewis' sentiments as we celebrate this outstanding achievement.●

AGRICULTURAL TRADE BILLS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. SKELTON. Mr. Speaker, today I am introducing a three-bill legislative package designed to boost sagging U.S. agricultural exports and help ensure fair trade. I have introduced these measures because it is my belief that there will be no substantial, long-term improvement in our farm economy until we reverse the decline in agricultural exports and begin to create new markets for our agricultural products, and expand existing ones. Moreover, U.S. agricultural exports generate employment, income, and purchasing power across the entire economy.

My first bill, Mr. Speaker, is a reintroduction of H.R. 2185 which I introduced during the 98th Congress. It would provide the Secretary of Agriculture with the authority to use Government surplus commodities to promote the increased use of U.S. agricultural products by tendering them as bonuses to U.S. exporters, processors, and foreign purchasers. There is strong competition for world agricultural markets. We must be prepared to meet our competition. I believe this legislation is necessary in order for our Nation to counter the predatory export subsidies which many other nations provide their farmers.

Second, I have introduced legislation reauthorizing the Agricultural Export Credit Revolving Fund which is due to expire at the end of the current fiscal year. As you know, I was the original House sponsor of agricultural export credit revolving fund legislation, and, along with our colleagues Congressman GLICKMAN and Congressman STENHOLM, I cosponsored the amendment which attached the measure to the 1981 farm bill. Unfortunately, it has laid dormant since its authorization. I believe we must reauthorize and use the Agricultural Export Credit Revolving Fund. It would make funds available for financing export sales of U.S. agricultural products, export sales of U.S. breeding animals, and the establishment of grain-handling and storage facilities in importing nations. It would make us more competitive, and moreover, since it is a revolving fund, the program would be fully self-supporting.

In addition to these export measures, Mr. Speaker, I have introduced legislation to toughen the inspection standards on imported meat and meat food products, to require the labeling of imported meat, and to require that eating establishments serving imported meat inform their customers of that fact. This bill will help provide fairer trade for U.S. meat producers, and it is also proconsumer. Many foreign nations permit their meat producers to use chemicals and drugs which are restricted in the United States for health and safety reasons. I believe that meat produced in foreign countries for importation into the United States should be subject to the same health and safety standards as meat produced in the United States. Further, I believe that consumers have the right to be informed that they are buying foreign-produced meat, both at the supermarket and in restaurants. The situation with Canadian hog and pork imports is only the latest in a series of problems in this area. In this case you have a government-subsidized industry importing products into our Nation that have been produced using a drug banned in the United States. However, once these Canadian hog and pork products enter the stream of commerce in our Nation, there is no way to tell them apart from U.S.-produced pork. After a long delay, the ITC has seen fit to take preliminary action in this case. My bill will lessen the need to use the cumbersome, time-consuming administrative process and better protect our producers and consumers.

Mr. Speaker, Congress must address the area of agricultural export trade this session. It is my hope that the legislation which I have introduced today will be incorporated in the 1985 farm bill. However, if this is not the case, I am prepared to offer these proposals as floor amendments, or to push for the separate passage of each of these bills. It is important for our Nation to maintain and expand our share of foreign agricultural markets. To do this, we need an aggressive export policy that takes advantage of our strengths—farm productivity and an efficient agribusiness marketing system—but also recognizes and corrects our weaknesses. The enactment of the measures which I have introduced today will start us on the road to such a policy.●

TRIBUTE TO JOHN A. BANNES

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. RUSSO. Mr. Speaker, the 19th century author, Lydia Sigourney, commenting in the language of her times on teachers, said:

Teachers should be held in the highest honor. They are the allies of legislators; they have agency in the prevention of crime; they aid in regulating the atmosphere, whose incessant action and pressure cause the life-blood to circulate and to return pure and healthful to the heart of the nation.

I think little has changed in the 20th century in terms of the esteem in which we should hold our educators. In fact, I think we need be even more aware in a volatile, crowded, and changing world of how crucial it is that our young people have the knowledge and perspective provided by a good education.

An outstanding educator and administrator in my congressional district, Superintendent John A. Bannes is retiring in June. This dynamic, conscientious, and professional administrator has dedicated 25 years of his life to the field of education and he will be honored this month at a retirement dinner dance sponsored by Kirby School District 140.

Mr. Bannes philosophy of education is to help provide each child the best possible education according to his/her needs and ability. It is "help provide" because he feels that the total education of our children is a joint endeavor shared by many. It involves the cooperation, mutual trust, and understanding of the community, school board, parents, faculty, and the children themselves. Such a philosophy comes from a man of experience and maturity, and Mr. Bannes is indeed such a man.

He is a native midwesterner, born in Chicago, and has been a resident of Cook County most of his life except for his military service years. When

World War II ended—and Mr. Bannes saw action in both the European theater and the South Pacific—he accepted a position as athletic director with the Lawndale Boys Club in Chicago and began what has turned out to be a full career in helping children toward physical and mental well-being. Although working with the boys club, he managed to resume and complete his undergraduate work at DePaul University, later returning there to earn his master's degree, which he received in 1957.

Mr. Bannes actually entered the teaching profession while still with the boys club, when in 1950 he became a substitute teacher in Chicago. He began his distinguished career in District 118 in Palos Park where he taught 4th grade and took an active role in the curriculum development. In 1960 he moved to District 140 in Tinley Park and his present position as superintendent of schools. Enrollment was 341 students. He again instituted changes, ranging from a still-in-service district-operated transportation system to the addition of kindergarten classes conducted during the school year, District 140 being the first in the area to have kindergarten, and continuing work on testing, gifted, remedial programs. And he oversaw the development of the growth of the district to 2,619 students today.

It is not possible to list all Mr. Bannes has accomplished, but I would like to cite a few of his awards. They tell us that this is a man who gives of himself not only in his work, but to his community and country as well. He has received certificates of service and appreciation from the Morain Valley Community College, Tinley Park Chamber of Commerce, and the Tinley Park—Park District. A John A. Bannes Scholarship Fund was established by the PTA in 1978, and he was administrator of the year for the South Suburban Association of Educational Office Personnel.

Today I would like to express my own appreciation to this outstanding citizen for his contributions to his community and country and I know my colleagues join with me and his family and many friends in commending him for a job well done.●

HARBOR DISTRICT BOY SCOUTS TO HONOR SAN PEDRO'S TRANI BROTHERS AS "CITIZENS OF THE YEAR"

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. ANDERSON. Mr. Speaker, it is indeed an honor for me to inform our colleagues and, in fact, the Nation that five of my constituents, Lou, Jim, Jack, John, and Phil Trani, have been selected as "Citizens of the Year" by the Harbor District Boy Scouts. I am delighted that the Trani brothers are receiving this award, for they have been contributing members of our seaside community for many years.

Frankly, it would be a difficult task to find anyone in San Pedro who somehow does not know one of the Trani brothers or has not eaten a fine lunch or dinner at their restaurant, Trani's Majestic, at Sixth and Beacon Streets.

The year was 1927 when the patriarch of the Trani clan, Filippo Trani, first opened his doors for business to the public. Calvin Coolidge was in the White House, Babe Ruth hit 60 home runs in one season, and Charles Lindberg made the first successful solo nonstop flight from New York to Paris.

Today, Trani's Majestic restaurant is recognized as one the Harbor area's finest eating establishments. And with its emphasis on amateur and professional sports, it is not uncommon to see one of the world's top athletes dining or helping out in the kitchen. In fact, the restaurant now hosts regular "Linguini and Baseball" luncheons with the Dodgers and "Fettucine and Football" dinners with the Raiders, with proceeds going to many charities throughout the area.

Mr. Speaker, the Trani brothers and sisters have done much in helping to make San Pedro the special place that it is. Their personal commitment to the economic, social, and cultural enhancement of San Pedro has been a way of life for them.

In closing, Mr. Speaker, let me just say that the many accomplishments of the Trani brothers clearly demonstrates their devotion to their work and the community. My wife, Lee, joins me in congratulating Lou, Jim, Jack, John, and Phil on this special occasion. We know that their great success will continue in the years ahead.●

THE TEMPLE CITY SILVER ANNIVERSARY, 1960-85

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MOORHEAD. Mr. Speaker, in the early years of the 20th century in southern California, Walter Temple purchased 400 acres of land which had been part of the vast Rancho Santa Anita of the San Gabriel Valley. Envisioning a community where people of medium income could afford to live and own their homes, he divided the area into lots and began development of the land in 1922. Bond issues instigated by Temple were responsible for street paving and electrification. Temple also petitioned the Pacific Electric Railway to extend its "red car" line from Los Angeles to Temple City, contributing to the steady growth of the area. In 1936, the town was officially designated Temple City, but remained a city in name only until the incorporation of the community on May 25, 1960.

Incorporation came as the result of the citizens' desires for home rule and local control of government. The city operates under the council-manager form of government, and provides excellent services through contracts with the county of Los Angeles and private sources. These services are provided without a municipal property tax. In 1971, the city officially became a charter city, following approval of the voters. The change from general law city status approved at incorporation provides residents with a working charter which contains rules and regulations for the operation of the city.

The city offers a variety of services for its residents, including parks and recreation programs, street maintenance and improvements, Dial-A-Ride for senior citizens and the handicapped, and programs such as the Emergency Reserve, Neighborhood Watch, and Student and the Law. In addition, the annual Camellia Festival is held on the last weekend of February as a celebration of youth and community. Excellent educational opportunities are provided by both public and private schools.

In the 25 years since incorporation, Temple City has grown in area, population, and services provided to citizens. The 25th anniversary celebration on Saturday, May 18, 1985, will include dedication of a new city hall and a salute to the residents and officials of Temple City who together have created a wonderful community which has a very promising future.

Mr. Speaker, I am delighted to bring to the attention of my colleagues in the House of Representatives the silver anniversary celebration of the city of Temple City.●

THE INDOOR AIR QUALITY ACT OF 1985

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mrs. SCHNEIDER. Mr. Speaker, it is my pleasure to join with my distinguished colleague, Representative JAMES SCHEUER, in introducing the Indoor Air Quality Act of 1985. The legislation would authorize a $3 million, 2-year research program, to be run by the Environmental Protection Agency [EPA], to conduct research on the sources of hazardous indoor air pollutants and their impact on human

health, and to recommend Federal strategies for reducing that health threat.

Indoor air pollution is viewed by many observers as the emerging environmental and health problem of the 1980's. The Consumer Federation of America [CFA] has named indoor air pollution the No. 1 health and safety issue of the year. The American Lung Association has begun a national campaign of education on the threat to individual health posed by indoor pollutants at home and at work.

Why this sudden attention? The average American spends 70 percent of his/her time indoors; the percentage for groups such as the elderly, homemakers, and children is much higher. The inside environment is often filled with harmful pollutants such as benzene, chloroform, methylene chloride, and tobacco in concentrations 10 times higher than those found outdoors. Increasingly researchers are linking exposure to these substances to everything from coughs to serious illness such as lung cancer. Exposure to radon, for example, is estimated to account for one-tenth of all lung cancer deaths in the United States every year.

Given the potential impact on individual health, and the long-term savings of both public and private resources that can be obtained by reducing exposure to indoor air pollutants, it is prudent for the Federal Government to begin a responsible research program on the subject.

The Indoor Air Quality Act of 1985 will give EPA the tools to look at important questions surrounding indoor air pollution, including the relative exposure levels in various indoor environments, the link between certain exposure levels and myriad illnesses, and the most cost-effective strategies to reduce any threat to human health that exists.

I am a firm believer that prevention is the best medicine. Skeptics may envision a day when indoor air pollution provokes the same public uproar, and the same demands for assistance, as toxic waste and polluted water do today. A minimal investment in research can save us money in the long run as we learn the correct way to mitigate exposure to indoor air pollutants, and to prevent another American health crisis from occurring.●

PERSONAL EXPLANATION OF ROLLCALLS NOS. 52 and 53, and H.R. 1210

HON. ALBERT G. BUSTAMANTE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BUSTAMANTE. Mr. Speaker, on rollcall votes Nos. 52 and 53, taken by the House yesterday, I did not register my votes because of official business away from Washington. Mr. Speaker, had I been present, I would have voted yea on both rollcalls.

Because official business continues to require my presence elsewhere while the House considers H.R. 1210 today, I would like the record to show that I would have voted yea on both of the amendments offered by my distinguished colleague from Pennsylvania, Representative ROBERT S. WALKER, and on final passage of H.R. 1210.●

VETERANS OF THE VIETNAM WAR, INC.

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. KANJORSKI. Mr. Speaker, today I am introducing in the House, legislation to grant a Federal charter to Veterans of the Vietnam War, Inc., a nationwide veterans service organization of veterans headquartered in Wilkes-Barre, PA.

This month marks the 10th anniversary of the end of the Vietnam war. It is altogether fitting as we reflect on the events that took place a decade ago that we also take constructive steps on behalf of the brave soldiers who served in Southeast Asia.

There is no denying that the Vietnam war was markedly different from all previous wars the United States has been involved in. As a result the problems and needs of Vietnam-era veterans are frequently different from the problems and needs of veterans of previous wars. Only veterans of the Vietnam war, for example, have had to cope with the effects of herbicides like agent orange, and intense public division over the war in which they fought.

Although Veterans of the Vietnam War, Inc. was founded by, and is primarily concerned with, the problems of Vietnam-era veterans, it offers its services to all veterans. Unlike some other groups of Vietnam-era veterans it is primarily a service organization for veterans and their families. It provides assistance in filing claims with the VA for disability and compensation, it represents veterans before appeal boards, and it provides a wide range of personal assistance.

Through its posts Veterans of the Vietnam War, Inc. also provides traditional fraternal services. Meetings are traditionally held every 2 weeks and focus on issues like employment, education, agent orange, POW's and MIA's, and post-traumatic stress disorder, as well as individual veteran's problems.

It is important to note that Veterans of the Vietnam War, Inc. is not a political organization, a group which desires special treatment, or a group which exists only to serve the needs of Vietnam veterans.

Veterans of the Vietnam War, Inc. describes its four goals as:

First. Provide a place for the anxious Vietnam veteran to go to relate to others of his era and war.

Second. Exist to bring to the attention of the public and the Government the somewhat different problems of Vietnam veterans.

Third. Wish to cooperate with and support all other veterans organizations in the programs in behalf of all veterans of this Nation.

Fourth. Provide the Vietnam veteran and his family with an organization in which he will feel comfortable until he is, once again, interested in working for the rights and benefits due him and all other veterans.

Although Veterans of the Vietnam War, Inc., was founded and chartered in Pennsylvania, it now has tens of thousands of members in over a dozen States. As a nationwide service organization it needs and deserves a Federal charter, which is what my bill would grant it. My bill is modeled on the Federal chartering legislation of other nationwide service organizations and was introduced in the 98th Congress by former Congressman Frank Harrison.

I urge all my colleagues to join me in sponsoring this important legislation and to encourage the formation of Veterans of the Vietnam War chapters in their own districts. Individuals who wish to start chapters, or who desire other information about the organization, should contact: Michael Milne, president, Veterans of the Vietnam War, Inc., 2090 Bald Mountain Road, Wilkes-Barre, PA 18702, phone (717)-825-7215 or 1-(800)-VIETNAM.●

PARENTAL LEAVE AND DISABILITY ACT OF 1985

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Ms. OAKAR. Mr. Speaker, the obvious is sometimes the hardest to indentify. We, as Members of Congress, are constantly talking about our Nation's future and the need to preserve this great land of democracy. It is obvious, that our children are the essence of that future; but, sometimes their interests are ignored.

Let's take parental leave after childbirth or adoption. Psychologists and physicians confirm that the first several months of a child's development are key to his or her growth and maturation. Yet, this country does not have an all-encompassing leave program for expecting mothers—who may need dis-

ability time prior to delivery—and to both the mother and father after the child is at home. Consequently, employers vary widely on what kind of leave program they will provide to workers. Many even disregard the father's role as caretaker. The employers who do allow mothers time off, will often provide no guarantee that the job will be open when the mother returns.

Statistics prove that a leave policy of some kind is necessary. The number of working mothers will not decline. Similarly, the number of working mothers who support families is ever increasing, as is the number of two-earner couples. These thousands of parents are working to provide food and shelter for their children. It seems wrong that they should have to choose between work and child care.

Today, I am joining a number of my colleagues in introducing the Parental and Disability Leave Act of 1985. This bill would provide fathers and mothers with 4 months of job-protected parental leave upon the birth or adoption of a child and 6 months of job-protected disability leave for all employees who are temporarily disabled. In addition, the bill would instruct Congress to establish a commission to study and report on the feasibility of implementing a national paid disability and parental leave policy.

Mr. Speaker, there are few issues with which our country is not a leader. Unfortunately, parental leave and child care is one area that we need to pursue. The Parental and Disability Leave Act of 1985 is a good first step in developing a more progressive policy which meets the needs of our working parents and—most of all—meets the very important needs of our children.●

TRIBUTE TO EDWARD W. BILINKAS

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. COURTER. Mr. Speaker, I rise to pay tribute to an exceptional individual who has been given the special honor of being named Muscular Dystrophy's Man of the Year—Edward W. Bilinkas.

Ed is the kind of person who is unable to say no to any worthy cause, whether it is setting up Randolph Township's first recreation football program or chairing a bumper sticker campaign to help support New Jersey's police. His involvement and energy have been relentless, and the results of his efforts are always impressive. Ed always exceeds his goals.

A respected educator, Ed often gives classes in real estate on his own time when he feels students have not yet grasped all they need to know for successful careers. He is a respected member of his profession, and his community. But it is for his limitless dedication to the cause of muscular dystrophy that Ed is being recognized at this time.

Seven years ago, Ed promised a young boy who was dying from muscular dystrophy that he would do something for sufferers of this disease each day for the rest of his life. And so he has. Each and every day Ed makes some effort to improve the lives and futures of MD sufferers, and to find preventions and cures for this killing disease.

When Ed was in the hospital suffering from a serious medical problem, he asked that friends not send flowers, but, instead, give the money to muscular dystrophy. In addition to private, heroic acts such as this, Ed has also made major contributions in fundraising. Most recently, he surpassed his personal goal of raising $100,000 for MDA in 1984. This year, of course, Ed plans to raise $200,000, and there is no question that he will succeed.

Beyond the major contributions he has made, Ed Bilinkas is undoubtedly being honored for what he is as a person; a humble, sincere individual with a wicked sense of humor. He has been described as a real friend—the kind of person you can call after midnight. Ed truly deserves this distinguished Muscular Dystrophy Man of the Year Award, and I join his family and friends in applauding him for all his years of dedication and service.●

THE LEGACY OF MARY McLEOD BETHUNE

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FOWLER. Mr. Speaker, this year marks the 50th anniversary of the National Council of Negro Women, founded by Mary McLeod Bethune, and on April 27, 1985, Mary McLeod Bethune Day, many groups around the country will honor this pioneer political and civil rights leader. Dr. Bethune—1875-1955—devoted her life to achieving equality among all peoples, to "break the bars to brotherhood" as she so eloquently expressed it. Her efforts to eradicate the barriers of race, creed, and sex place her among our greatest citizens and serve as an inspiration to us all. I hope that my colleagues in Congress will join me in honoring Dr. Bethune and in taking strength from her vision of equality and human dignity.

Dr. Bethune first gained prominence for her work in building the Bethune-Cookman College, one of the first colleges for black women. She later served as part of the National Child Welfare Commission under President Calvin Coolidge, but she exercised her broadest influence under President Franklin Delano Roosevelt. As Director of the Division of Negro Affairs from 1936 to 1944, Mary McLeod Bethune had a tremendous impact upon the formation of New Deal policy and was responsible for FDR's appointment of a number of black professionals to Government agencies. Her work addressed the problems of housing, discrimination in Federal and civilian agencies, health services, and the integration of black women into the labor force. She was also instrumental in bringing together many black leaders in several nationwide conferences.

Many of the problems which Dr. Bethune addressed are still with us and her legacy lives on in the many men and women who still strive for equality among people. In addition to this living legacy, however, we are fortunate enough to have many invaluable historical records of black women leaders. The Bethune Archives, which occupies the 19th century Washington townhouse which was Dr. Bethune's official residence, is dedicated to preserving and promoting black women's history.

The archives and museum house is the largest manuscript collection of material pertaining to the organizational and individual contributions of black women in America. Dr. Bethune's personal papers, as well as the organizational records of the National Council of Negro Women are preserved there. These records as well as the records of many other important American black women help promote awareness of this rich area of history as well as serving as an invaluable resource for scholarly research.

The archives offers us all access to the rich history of Mary McLeod Bethune and other black women through museum tours, children's education programs, traveling exhibits, lecture, poetry, and concert series. I urge you to join with me in support of the archives, in taking advantage of its resources and in the fine legacy of Dr. Bethune.●

HONORING MAJOR GENERAL GERARD

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. GREEN. Mr. Speaker, as the Member of Congress privileged to represent New York City's 15th District, I am proud to recognize the contributions of one of its residents, a true patriot, Maj. Gen. James W. Gerard II.

General Gerard is a 48-year veteran of the military, a man who has provided invaluable service to his city, his State, and his country. In November 1937, General Gerard enlisted in "K" Company, 107th Infantry, New York National Guard. There, he rose to the rank of master sergeant. He was commissioned as a second lieutenant in August 1942, serving during World War II in Ordnance, Quartermaster, and the Adjutant General's Department. General Gerard also served on General MacArthur's staff in the Philippines, and as assistant executive G–4 on the general staff at the War Department. At the end of World War II this valiant man served in the Army of Occupation in Japan, and, later, during the Korean conflict, he participated in the Inchon landing, serving as a battalion commander and group executive officer. General Gerard retired as a colonel with over 20 years of service in 1961.

General Gerard assumed command of the Veterans Corps of Artillery on April 22, 1975. In 1982, he was promoted to the rank of major general in the corps by the order of the Governor of the State of New York. Besides participating in the military life of New York, General Gerard is an active member of many clubs and organizations such as the Huguenot Society of America, of which he is the present president, and the New York Chapter of the Sons of the American Revolution, of which he is a past president.

General Gerard's numerous well-deserved awards and decorations include the Bronze Star, the Army Commendation Medal with two oak leaf clusters, and the American Defense Medal. This is a man who has devoted himself to his country.

Mr. Speaker, I know my colleagues in the House will want to join me in paying tribute to this impressive man. His loyalty to his country and his willingness to take action for our country are awesome. Maj. Gen. James Gerard could serve as an example for us all.●

LEGISLATION TO ENLARGE BUMPING LAKE

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. MORRISON of Washington. Mr. Speaker, today I am introducing a measure to authorize the enlargement of Bumping Lake, a water storage reservoir in central Washington. While I recognize that no procedure for the approval of new water projects has yet been agreed to in Congress, my intent in introducing this bill is to reemphasize that the Yakima River system does not currently have the capacity in short water years to fulfill the obligations that the Federal Government has to both irrigation and fish maintenance in the Yakima River Valley and that this problem must be addressed.●

ADELIA MUNDY CELEBRATES 100TH BIRTHDAY

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. KANJORSKI. Mr. Speaker, it is a great honor for me to bring to your attention a citizen from my district who has just recently celebrated her 100th birthday. Mrs. Adelia Mundy is the oldest resident of my hometown of Nanticoke, and I join with my neighbors in wishing her a happy, healthy birthday.

Mrs. Mundy has been a resident of our area all her life, having been born in Newport Township in 1885. She was married to Robert E. Mundy, a mine official, who died in 1945. Her daughter, Ella, a retired schoolteacher lives with Mrs. Mundy in her Nanticoke home.

Mrs. Mundy is still active in the First Presbyterian Church of Nanticoke, and summers with her daughter each year at the family summer cottage at Lake Nuangola. She is an avid reader and a big fan of the Nanticoke Trojans.

Mr. Speaker, Adelia Mundy's life has spanned the most exciting and change-filled century in man's history. It is my pleasure to bring her to your attention.●

CONGRATULATIONS CAROLE B. STEVENS

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to an outstanding leader of our community and a good friend, Carole Stevens. On May 1, she completes an unprecedented third term as president and chief executive officer of the Federation of Hillside and Canyon Associations, Inc. The federation represents the interests of 200,000 homeowners in the hills and canyons of Los Angeles.

Those homeowners could not have found a better champion than Carole Stevens. The appeal of Los Angeles includes the stunning vistas from the mountains within our city, the dramatic spectacle of the plunging canyons, the wilds of the Santa Monica Mountains. Carole recognized the importance of the environment to those who chose to make Los Angeles their home, and has fought like no other to protect that environment.

Her ability to communicate the importance of those concerns to Federal, State, and local government agencies, to the Southern California Businessmen's Association, L.A. Taxpayers, the Building Industry Association, and other organizations led to positive and productive relations that benefited all.

Her work on behalf of homeowners is just a small part of Carole's extensive community service. She is also a member of the Santa Monica Mountains Conservancy and was elected to the board of directors of the Southern California Planning Congress. Her service as legislation chair of the National Women's Political Caucus and as governmental affairs representative for the U.C.L.A. Foundation Trustees has been outstanding.

In the past, Carole served on the Los Angeles Women's Campaign Fund Steering Committee, on Mayor Bradley's Blue Ribbon Budget Committee, and on other community organizations too numerous to mention here. She successfully lobbied to win back the right of local jurisdictions to ban the sale of fireworks.

Carole has been an inspiration, an example, and an unmatched standard by which the rest of us measure our own efforts. With her husband, Norman, Carole raised two fine sons and a wonderful daughter in addition to all her other activities.

It is my honor to congratulate Carole B. Stevens—author, journalist, activist, and friend—not only for her efforts as president of the Hillside Federation but also for her tremendous commitment and untiring efforts on behalf of the entire community.●

EXPLANATION OF VOTE

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. OXLEY. Mr. Speaker, because of prior commitment for official business, I was unable to be present yesterday. Had I been present, I would have voted "yea" on rollcall 52 and "yea" on rollcall 53.●

HONORING AMERICA'S OCCUPATIONAL THERAPISTS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. FIELDS. Mr. Speaker, it is with a great deal of pleasure that I rise to commend the outstanding work of America's occupational therapists—including those occupational therapists in the Eighth District of Texas.

In our schools, rehabilitation homes, hospitals, and clinics, occupational therapists provide thousands of Americans with the help they require to achieve their rehabilitation goals and meet their psychological needs.

They do so with great patience, a strong belief in the individual and an innovative and creative capacity to help their patients.

Over the years, our senior citizens; our children; our mentally, socially and physically handicapped men and women; our brain injury victims; our burn victims; our stroke patients; our arthritics; our amputees and others all have benefited from occupational therapists whose efforts have helped their patients again function in our society despite their impairments.

So, Mr. Speaker, I believe you and the rest of my colleagues would do well to join with me during the week of April 14 to 20 to salute the efforts of our occupational therapists. They deserve our thanks, our admiration, and our support for their efforts.●

SALUTE TO BESSIE DOTY

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. COURTER. Mr. Speaker, I rise today to salute an outstanding New Jersey citizen who has spent a lifetime serving the people of her community. Bessie Doty, of Haskell, NJ, is a truly outreaching and compassionate individual whose accomplishments via her concern for others are most inspiring and impressive.

She has, among other things, worked on programs dedicated to fighting cancer, heart disease, and other debilitating illnesses. Bessie has also helped hospitals and nursing homes acquire more of the facilities and progams necessary to better serve people in need. Her tenacity and perseverance in perenially assisting the people of New Jersey cannot be overvalued.

It is refreshing to know that there are people such as Bessie who are so active in our communities. She is a model citizen and a great human being.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 18, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 19

9:00 a.m.
Banking, Housing, and Urban Affairs
Financial Institutions and Consumer Affairs Subcommittee
Housing and Urban Affairs Subcommittee
To hold oversight hearings to review adjustable rate mortgages.
SD-538

9:30 a.m.
*Finance
Health Subcommittee
To hold oversight hearings of the Peer Review Organizations.
SD-215

10:00 a.m.
Foreign Relations
To hold hearings on the current situation in Central America.
SD-419

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the role of Nicaragua in drug trafficking.
SD-430

APRIL 22

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings to examine the tax treatment of corporate takeovers.
SD-215

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on extended voluntary departure issues.
SD-226

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for certain defense programs, focusing on the strategic defense initiative.
SD-192

11:00 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the nominations of Peter C. Myers, of Missouri, and Robert L. Thompson, of Indiana, each to be an Assistant Secretary of Agriculture.
SR-328A

APRIL 23

8:00 a.m.
Judiciary
Juvenile Justice Subcommittee
To hold hearings on juvenile arson.
SD-628

9:30 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of Education, including elementary and secondary education, education block grants, impact aid, research and statistics, and libraries.
SD-116

Environment and Public Works
Environmental Pollution Subcommittee
Business meeting, to mark up S. 53 and S. 652, bills authorizing funds for programs of the Clean Water Act.
SD-406

Finance
To hold hearings on the impact of floating exchange rates on the international trading system.
SD-215

Labor and Human Resources
To hold hearings on the nomination of William E. Brock, III, of Tennessee, to be Secretary of Labor.
SD-430

Rules and Administration
To resume hearings on Senate committee resolutions requesting funds for operating expenses for 1985.
SR-301

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for certain defense programs, focusing on the strategic defense initiative (policy and capability).
SD-192

Judiciary
To hold hearings on S. 447, to insure a greater measure of competition in the railroad freight industry's hauling of certain products.
SD-226

2:00 p.m.
*Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Forest Service (including the land and water conservation fund), Department of Agriculture.
SD-192

Appropriations
Treasury, Postal Service, and General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1986 for the Department of the Treasury, U.S. Postal Service, and general Government programs.
SD-138

Rules and Administration
To continue hearings on Senate committee resolutions requesting funds for operating expenses for 1985.
SR-301

2:30 p.m.
Finance
To continue hearings on the impact of floating exchange rates on the international trading system.
SD-215

APRIL 24

9:00 a.m.
*Foreign Relations
To hold hearings on American policy toward South Africa.
SD-419

9:30 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on S. 501 and S. 616, bills to expand export markets for U.S. agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and continue low-income food assistance programs, focusing on commodity assistance for rural credit programs.

SENATE—*Thursday, April 18, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

The PRESIDENT pro tempore. Our prayer today will be offered by Archbishop Mesrob Ashjiam, prelate of the Armenian Apostolic Church of America, New York, NY. The Archbishop is sponsored by Senator ALAN CRANSTON.

PRAYER

The Archbishop Mesrob Ashjiam, prelate of the Armenian Apostolic Church of America, New York, NY, offered the following prayer:

In the name of the Father, of the Son, and of the Holy Spirit. Amen.

Almighty God, eternal Guide of all people, direct us along the path of justice and honor in our daily conduct. Give of Thy blessings to this glorious Nation so that it may continue to shine as a welcoming beacon of liberty admidst the dark clouds of tyranny and oppression. Reveal always Thy infinite spirit to the Members of this august body, that they may be inspired toward a greatness of purpose, that they may be ennobled in the urgent quest for justice, freedom, and peace for all of mankind.

We thank Thee in the name of the Armenian people for Thy eternal wisdom and divine mercy in providing them a safe refuge in these United States from the ravaging inhumanity of their enemies. We offer to Thee our sacrifices upon the altar of freedom in an act of redemption for all of mankind. In turn, Heavenly Father, we ask that Thy other children always be spared from the stifling yoke of tyranny and persecution.

Give, we beseech Thee, but a particle of Thy celestial wisdom to all men and nations that they may learn to walk together with joy and happiness on the path of righteousness, truth, and freedom. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, unless reserved, followed by special orders not to exceed 15 minutes by Senators MCCONNELL, MURKOWSKI, and PROXMIRE, followed by routine morning business not to extend beyond the hour of 1:30 p.m. with statements limited therein to 5 minutes each.

Following routine morning business, it will be the intention of the majority leader to turn to either of the following bills, or both: Calendar Order No. 76, S. 813, pipeline safety; and Calendar Order No. 81, S. 796, the National Bureau of Standards authorization. Either, if not both, in my view, are unanimous-consent items in nature. However, there is a possibility rollcall votes will occur.

Also, the Senate, during the course of the day, could turn to any other legislative or executive items which have been cleared.

It would appear certain that we will not have a session tomorrow. I cannot guarantee that there may not be a vote sometime today, but it is unlikely there will be a rollcall vote.

Mr. President, I would also indicate, as far as the majority leader knows, we will still start action on the budget next Monday, the 22d of April. Then, on Tuesday, we will move to the Contra aid proposal. There are indications of some possible change, if it can be worked out, in that provision. Hopefully I can discuss that with the minority leader later this afternoon.

Then, on Wednesday of next week, we will be back on the budget resolution and we will continue on that until it is disposed of.

Mr. CRANSTON. Mr. President, may I ask the majority leader what the situation is with regard to votes on Monday?

Mr. DOLE. On Monday, it is my hope that we can discuss the budget proposal, but not have votes.

Mr. CRANSTON. I thank the majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. GRAMM). The distinguished minority leader is recognized.

SENATE RESOLUTION 134—ASSURING THE COST-OF-LIVING ADJUSTMENTS FOR SOCIAL SECURITY RECIPIENTS

Mr. BYRD. Mr. President, I am going to send to the desk the following simple resolution. I will read it.

TO ASSURE THE COST-OF-LIVING ADJUSTMENTS FOR SOCIAL SECURITY RECIPIENTS

Resolved, It is the the Sense of the Senate that the Budget Resolution for fiscal 1985 and succeeding years shall include sufficient amounts under function 650 (Social Security) so as to allow full funding of the Cost of Living Adjustments for fiscal years 1985 through 1988.

I send this to the desk on behalf of myself, Mr. MOYNIHAN, Mr. RIEGLE, Mr. CRANSTON, Mr. BURDICK, Mr. FORD, Mr. GORE, Mr. KENNEDY, Mr. KERRY, Mr. METZENBAUM, Mr. SARBANES, and Mr. LAUTENBERG and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, I am constrained to object.

The PRESIDING OFFICER. The objection is heard and the resolution will go over under the rule.

The text of the resolution is as follows:

Resolved, It is the Sense of the Senate that the Budget Resolution for fiscal 1985 and succeeding years shall include sufficient amounts under function 650 (Social Security) so as to allow full funding of the Cost of Living Adjustments for fiscal years 1985 through 1988.

SOCIAL SECURITY

Mr. BYRD. Mr. President, today I am introducing two resolutions on behalf of myself and Senators MOYNIHAN, RIEGLE, CRANSTON, BURDICK, FORD, GORE, KENNEDY, KERRY, METZENBAUM, SARBANES, and LAUTENBERG. The first, a joint resolution, states the policy of the United States that the budget resolution for fiscal 1985 as revised shall be deemed to include amounts sufficient under function 650, Social Security, so as to insure the full cost-of-living adjustments for Social Security recipients through fiscal 1988.

The second resolution expresses the sense of the Senate that the budget resolution for fiscal 1985 and succeeding years shall include sufficient amounts under function 650, Social Security, so as to allow full funding of the cost-of-living adjustments for fiscal years 1985 through 1988.

These resolutions are reflections of my commitment to see that our contract with this Nation's elderly and disabled Social Security beneficiaries is not broken.

Mr. President, despite continuous promises from the President during the past year that he would never reduce Social Security benefits to current recipients, he and Senate Republicans have advanced a joint proposal to do just that. The compromise budget they have proposed will reduce the Social Security cost-of-living ad-

justment [COLA] by 2 percent in each of the next 3 years under virtually all economic projections. This will reduce Social Security benefit payments by $22.6 billion over the 3-year period.

Constricting Social Security COLA's as the President and Senate Republicans are proposing is, in fact, a reduction in existing Social Security benefits, contrary to the impression the President is trying to present to the American people. Congress determined in 1972 that the value of Social Security benefits should be held constant in the future in the face of inflation, and wrote into law a guarantee that benefits would be increased to do that. Any restriction on this periodic adjustment constitutes a reduction in currently-guaranteed benefits to current Social Security beneficiaries.

The effect of this COLA reduction is quite simple, Social Security has been and remains an absolute necessity for many elderly Americans who fall into lower income brackets. Nearly 43 percent of elderly-headed households had total money incomes below $10,000 in 1983. Seventy-three and four-tenths percent of elderly households had incomes of $20,000 or less. The great majority of elderly Americans cluster around the poverty line. In 1983, 14.1 percent of the population age 65 and over, 3.7 million, had incomes below the poverty level, counting Social Security benefits. An additional 8.3 percent of the population age 65 and over, 2.2 million, in 1983 had incomes between the poverty level and 25 percent above the poverty level, counting Social Security benefits.

Further evidence that Social Security remains a bedrock that keeps many elderly persons from destitution is revealed in the percentage of income that Social Security constitutes for the Nation's elderly:

In 1982, Social Security supplied more than half of the total income for 65 percent of its beneficiaries 65 and over.

In 1982, Social Security supplied 90 percent of the total income for 27 percent of its beneficiaries 65 and over.

In 1982, Social Security supplied 100 percent of the total income for 15 percent of its beneficiaries 65 and over.

A report by the House Ways and Means Committee, titled "Background Material on Poverty," has determined that, if there were no Social Security, there would be about 3.5 elderly persons for every 1 who now falls below the poverty level. In other words, Social Security reduces the incidence of poverty among the aged by 70 percent. Furthermore, according to the same report, "although about two-thirds of Social Security recipients are aged, payments to the aged and non-aged together in 1982 probably kept 13.8 million persons of all ages out of poverty. Nearly 9.3 millon of these would-be-poor are age 65 or older."

The Congressional Budget Office [CBO] has analyzed the projected financial impact of the new Republican proposal on beneficiaries—the so-called modified CPI minus 2 percent proposal coupled with a small increase in supplemental security income [SSI] benefits for the impoverished aged, blind, and disabled. The CBO concluded that, using its own inflation assumptions, the proposed 3-year reduction in COLA's for non-means-tested program benefits, combined with the SSI increases, would increase the poverty gap, that is, the aggregate amount of income needed to raise the incomes of the 35 million Americans living below the poverty level up to the poverty threshold, by an estimated $430 million and would increase the number of poor people by about 530,000. With respect to the effect of the COLA reduction alone—not partially offset by the slight proposed increase in SSI benefits—the CBO concluded that the "5.4 percent reduction in real benefits would increase the poverty gap by an estimated $610 million and would increase the number of people in poverty by 600,000. Under the administration's economic assumptions, the results of this COLA reduction are even more severe.

The debate on the budget that will begin next week is really a debate on the priorities that guide this country. Democrats believe those priorities ought to be set to ensure a future of hope for all Americans. We believe the priorities reflected in the compromise budget worked out between the White House and the Senate Republicans must be challenged and changed.

And we believe that it is appropriate that one of the first questions we address in changing those priorities concerns the protection and preservation of a contract we have with the American people—a contract they have counted on in planning their futures—a contract that keeps almost 14 million senior citizens out of poverty.

That contract is Social Security. And Democrats will use every means at our disposal to stop the Reagan administration's attempt to cut Social Security COLA's.

The legislation that I introduced today is designed to take the first step toward that end. It is my hope that we will prevail in eliminating Social Security COLA reductions from the budget before the Senate.

Mr. President, I ask unanimous consent that I may reserve the balance of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 813—NATURAL GAS PIPELINE SAFETY ACT AND THE HAZARDOUS LIQUID PIPELINE SAFETY ACT—AUTHORIZATION

Mr. SIMPSON. Mr. President, with the concurrence and approval of the minority leader, I ask unanimous consent that the Senate now turn to the consideration of calendar item No. 76, S. 813, pipeline safety programs authorization, and that no amendments, motions, appeals, or points of order be in order.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 813) to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1986 and 1987, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 813

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 17(a) of the Natural Gas Pipeline Safety Act of 1968 (49 App. U.S.C. 1684(a)) is amended by—

(1) striking "and" at the end of paragraph (2);

(2) striking the period at the end of paragraph (3) and inserting in lieu thereof a semicolon; and

(3) adding at the end thereof the following new paragraphs:

"(4) $3,450,000 for the fiscal year ending September 30, 1986; and

"(5) $3,615,600 for the fiscal year ending September 30, 1987.".

(b) Section 17 of the Natural Gas Pipeline Safety Act of 1968 (49 App. U.S.C. 1684) is amended by adding at the end thereof the following:

"(c) For purposes of carrying out the Federal grants-in-aid provisions of section 5(d) of this Act (49 App. U.S.C. 1674(d)) and section 205(d) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2004(d)), there are authorized to be appropriated—

"(1) $4,500,000 for the fiscal year ending September 30, 1986; and

"(2) $4,716,000 for the fiscal year ending September 30, 1987.".

(c) Section 205(d)(2) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2004(d)(2)) is amended by inserting "or section 17(c) of the Natural Gas Pipeline Safety Act of 1979 (49 App. U.S.C. 1674(d)(2))" immediately after "title".

SEC. 2. (a) Section 214(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2013(a)) is amended by—

(1) striking "and" at the end of paragraph (2);

(2) striking the period at the end of paragraph (3) and inserting in lieu thereof a semicolon; and

(3) adding at the end thereof the following new paragraphs:

"(4) $875,000 for the fiscal year ending September 30, 1986; and

"(5) $917,000 for the fiscal year ending September 30, 1987.".

(b) Section 214(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2013(b)) is amended by—

(1) striking "and" at the end of paragraph (2);

(2) striking the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following new paragraph:

"(4) such amounts as are made available pursuant to section 17(c) of the Natural Gas Pipeline Safety Act of 1968.".

SEC. 3. (a) Section 5(a) of the Natural Gas Pipeline Safety Act of 1968 (49 App. U.S.C. 1674(a)) is amended by striking "$5,000" and inserting in lieu thereof "and amount that the Secretary establishes by regulation".

(b) Section 205(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2004(a)) is amended by striking "$5,000" and inserting in lieu thereof "an amount that the Secretary establishes by regulation".

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME TO ANNOUNCE APPOINTMENT OF DEPUTY LEGAL COUNSEL OF THE SENATE

Mr. SIMPSON. Mr. President, having consulted with the senior Senator from West Virginia, I ask unanimous consent that the President pro tempore of the Senate have a period of 30 more days to announce the appointment of the deputy legal counsel of the Senate, purusant to 2 U.S.C. 288 and Public Law 96-576.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR McCONNELL

The PRESIDING OFFICER. Under the previous order, the Senator from Kentucky [Mr. MCCONNELL] is recognized for not to exceed 15 minutes.

APARTHEID

Mr. McCONNELL. Mr. President, I am a new Member of the U.S. Senate, the world's greatest deliberative body, and in my first few months here I have witnessed what the Senate can do, when it wants to.

And, as a Member of the majority party in the Senate, I have come to observe the potential we, as Republicans, have to initiate, to lead, to forge consensus, and to institute change.

Recently, the whole world witnessed an example of the power and potential of the U.S. Senate to act.

In the course of only a few days, the Senate—Republicans and Democrats alike—acted in unison to pass a resolution and send a message to the Japanese so powerful that it caused entire nations to take notice. And it worked. Talks that were stalled, suddenly began again in earnest. Stalemates were dislodged. And our negotiations with the Japanese are back on track.

I was proud to be a part of that effort, Mr. President, and excited and encouraged to witness what we, as U.S. Senators, can do to affect the course of world events.

I come before the U.S. Senate today to suggest to my colleagues that the time has come to flex some of these same muscles, to exercise that same determination and commitment and power in a unified effort to correct one of the most abhorrent and criminal examples of injustice evident in the world.

The system of apartheid is nothing short of criminal. When a diabetic prisoner dies in custody because she is denied insulin—that is criminal. When 16 members of a nonviolent political group are held without charge, without bail for months—that is criminal. We must respond as a body. We must bring about a change.

In the past 10 days we have heard of plans for change in South Africa. The Government of South Africa has indicated it would support legislation in Parliament to repeal the Prohibition of Mixed Marriages Act, which forbids marriages between whites and nonwhites, and the immorality acts which outlaws sexual relations between whites and nonwhites. This action should not be taken lightly. It reflects a long period of review and debate by a specially constituted parliamentary commission. It reflects careful evaluation by the executive branch resulting in its concurrence with the recommendation to abolish the acts. I have every reason to hope Parliament will follow these recommendations and repeal the act.

There also may be reason to be hopeful about the fate of the 100,000 blacks living in Crossroads, a camp outside Cape Town. The Government has told squatters that they may be legally authorized to stay near Cape Town for 18 months if at least 70,000 of them will relocate to an officially recognized black township 2 miles further from the city. Apparently, the Government has offered to subsidize the transportation costs created by the additional distance from the city and they have hinted that those who move to the official black township will not be repatriated to their assigned homelands after the 18-month period.

The question remains: What happens if at least 70,000 people do not agree to uproot their families and move? The clear threat and leverage the Government has is that these people have a single choice: move or you will be forcibly moved. How many times have families in Crossroads and similar camps seen the tents and shacks they call homes flattened by Government bulldozers? How many times have these blacks been trucked back to the reservations called homelands?

This situation illustrates a basic fact of life for the majority of South Africans. Most blacks in South Africa do not make choices about where they want to live; they do not make choices about who represents them in Parliament; they do not make choices about where children will go to school; they do not make choices about careers. The majority of South Africans—the approximately 21 million blacks who make up almost 70 percent of the population—make no choices at all.

All of these decisions are made for them by the South African Government and every decision upholds the architecture of apartheid: a policy of separate and less.

As I review progress in South Africa, I am struck by the fact that reforms have had no clear cut effect on the daily lives of the majority of South Africans. The constitutional reforms did bring a segment of the disenfranchised population into the political process to a limited degree. Racially segregated chambers of Parliament were established for Asians and the coloreds. The actual influence any legislation originating from the two new chambers will have on the quality of Asian and colored lives remains to be seen. Since guesses are that these new representatives were brought into office with only 20 percent of their respective racial groups voting, it is difficult to believe in their popular mandate in the first place.

A lack of constructive change in the quality of lives for most South Africans creates enormous pressures for the country. Most blacks face bleak prospects, little opportunity for education, ownership of a home, or a permanent job. They have no confidence that those who control their fate will take any initiatives now, or in their children's lifetime, to change significantly the impact apartheid has on their lives.

There is absolute consensus in this country that the policy of apartheid is repugnant morally and politically. But the solutions that have been provided by this administration, Members of Congress, academics, members of the clergy and representatives of all segments of South African society have varied enormously.

The administration's policy of constructive engagement was outlined by Secretary Shultz in an address to the National Press Club on Tuesday. He spoke of the escalations in cross-

border violence, Soviet and Cuban intervention in the area, questions relating to Namibia's independence, the significance of South Africa's economic resources, and, of course, the growing racial tension in South Africa resulting from apartheid. The Secretary underscored the linkage in U.S. interests and concerns between the regional complexities and, as he called it, the morally indefensible conditions of apartheid. He made it clear that one set of problems cannot be isolated without careful consideration of the other, apartheid. In other words, as we press for internal reforms on apartheid we, as Americans, must be cognizant of the destabilizing threats South Africa faces from Cubans in Angola. From the Washington perspective, this comprehensive approach is reasonable. However, what of the perspective of a miner who will never make pay equal to his white counterpart, who is denied an opportunity to rise in position due to a policy of reserving certain jobs only for whites? Does this miner share this larger view of southern Africa? Does he understand his plight in these regional terms?

The administration's policy, I believe, fails to adequately focus on the bare, grim facts of life for most South Africans. I fear we no longer have the luxury of weighing our regional concerns. I am convinced the greatest threat to security and stability is not posed by the Cubans or Soviets, but by the injustices of apartheid. Two-hundred-and-forty-two people have been killed in racial violence in the last year. Sixteen members of the United Democratic Front advocating nonviolent change are being held in prison, without charge and without bail. They are alleged to have committed acts of treason. A policy that allows this to continue uncorrected, as the administration has, is a policy that has failed.

While the administration's policy does not go far enough to effect a change in South Africa's problems, I am equally skeptical that proposals currently under consideration in this body will effectively change the course of events in South Africa. The plans I have reviewed seem to be all stick and no carrot. Sanctions against an entire nation will not compel the few who control South Africa to lift the burdens of apartheid. Unrestricted sanctions will punish all for the sins of a few.

Clearly, there is a middle ground between policies that go too far and those that do not achieve enough. There is room for a plan that will strike a balance and render the necessary change.

I was encouraged to note in the Secretary's speech that the United States has developed nearly $30 million in assistance programs to train leaders in the black community to help them effect change in their society. This is a critical part of a two-pronged message and program we must initiate.

First, we must develop and underscore an understanding among members of the majority in South Africa that we believe the time has come—in fact, is long overdue—for a significant change in the quality of their lives. Community level assistance to legal, health, educational, and professional groups is the medium and method through which we can convey a message to the majority that we support change and we support it now. Full national political participation is the key to ensuring change that is meaningful and long term.

We must also direct our political and economic message to the Government of South Africa. There should be no doubt the United States has the will to follow through and bring all necessary pressure to bear to effect change.

The Senate must respond to the inhumanity, the injustice, and the crime of apartheid. There have been more than 200 years of racial discrimination in South Africa that tests the 196-year-old integrity and will of this body. We must rise to this challenge and act to change the course of South Africa's tragic history. Conservatives and liberals, Republicans and Democrats, can and should act in unison. And we should act now.

Mr. SIMPSON. Mr. President, I regret that I was not in the Chamber on April 16 when the Senator from Kentucky made his initial remarks with regard to a piece of legislation entitled, "The Agriculture Act of 1985." I just want to share with my colleagues, as Senator MCCONNELL shared with us his maiden speech on a major piece of legislation, that he indeed is a fine addition to the U.S. Senate. I read those remarks concerning the Agriculture Act of 1985, with regard to an attempt to get to market-oriented agriculture in the United States and how important that is that we do that. I just say that, on behalf of the leadership, we are most pleased to have this new Senator among us, and indeed, the State of Kentucky should be very proud. We are very proud to have him here. He will make and is making a fine contribution to his State and to the U.S. Senate.

I also believe his sensitive remarks on the South African situation are but another indication of what we have here in the form of a new U.S. Senator who is going to bring great credit to the institution. I thank him for those remarks.

Mr. MCCONNELL. I thank the assistant majority leader.

Mr. MURKOWSKI. Mr. President, I, too, would like to join with my colleague, the majority whip, the Senator from Wyoming [Mr. SIMPSON], in congratulating Senator MCCONNELL on his maiden speech. The Senator from Kentucky is a welcome addition to the ranks of the Republican majority in the Senate. I certainly look forward to working with him and I welcome him into our midst.

RECOGNITION OF SENATOR MURKOWSKI

The PRESIDING OFFICER. Under the previous order, the Senator from Alaska [Mr. MURKOWSKI] is recognized for not to exceed 15 minutes.

The Senator from Alaska.

Mr. MURKOWSKI. I thank the Chair.

U.S. TRADE POLICY

Mr. MURKOWSKI. Mr. President, my purpose today is to initiate a series of statements with regard to the trade policy that the United States has with its neighbors, particularly those on the Pacific rim—Japan, Taiwan, and Korea.

First, I would like to point out an inconsistency that I feel deserves examination. From the standpoint of trade policy, for reasons unknown to me, our Nation has not seen fit to address the reality of the word "accountability." When we view our trade policies in the United States, we find it very difficult to pinpoint the appropriate agency responsible and accountable for trade policy. In effect, we seem to have the idea that those involved in trade—namely, the Department of Commerce, the Department of State, the National Security Council, the U.S. Trade Representative's Office—are all involved in the promotional aspects of trade.

But I ask you, Mr. President, who is accountable for U.S. trade policy? When we look at Japan today, we find we have an untenable situation in the sense that the trade imbalance has grown from approximately $21 billion in 1983 to $36 billion in 1984. It is anticipated that the trade imbalance this year will not be $45 billion with Japan but closer to $50 billion.

Who do we look toward and hold responsible for that imbalance? It is very difficult to pinpoint the appropriate agency because, as I have indicated, Mr. President, there is absolutely no one single agency that is accountable for our trade policy. How different from our neighbor, Japan. Japan has one agency of government, referred to as MITI, that directs trade policy for Japan. That agency is held accountable by the Japanese Diet for Japan's very favorable trade position.

MITI will tell you on what basis you can come into the Japanese market, what percentage of the market you might expect to gain, and under what terms and conditions.

Mr. President, until the United States adopts some specific account-

ability in its trade policy, we are going to continue to have the inconsistencies which we have seen over the past several decades.

Mr. President, approximately 2 weeks ago this body voted 92 to 0 on a resolution expressing its frustration with our friendly neighbor, Japan, in regard to the trade imbalance.

Mr. President, there is no question that the bilateral trade agreement between Japan and the United States is the most important trade agreement in the world, but the citizens of this country are sick and tired of seeing the trade imbalance continue to grow. Japan, as I have indicated, sells more in the United States, to the tune of some $36 billion, than the United States is able to sell in Japan. That is the simple reality of the trade imbalance. This trade imbalance shows no signs of decreasing.

There are a couple other factors that I think entered into the frustration expressed by the Congress in the vote in the Senate 2 weeks ago. One is the reality that, after a 4-year period where there had been restrictions on automobile imports coming into the United States from Japan—and those exports were terminated as a consequence of the expiration of that 4-year term—our President did not request Congress to, nor did Congress address the issue of, extending the quotas on Japanese automobiles. There was no quid pro quo. The Japanese through MITI arbitrarily suggested that the Japanese automobile industry might increase its market in the United States by 25 percent. I might add that that 25 percent is approximately equal to the total capacity of the Japanese automobile industry. That came not only as a surprise, Mr. President, but it actually hurt. We were not prepared, as a consequence of having that 4-year restriction, for that kind of a turnabout. We actually felt that Japan was responsibly addressing the concern which we had expressed over the trade deficit.

I had the opportunity last week to be in Japan. I was accorded the courtesy of a personal meeting with Prime Minister Nakasone for some 25 minutes. I am convinced that Prime Minister Nakasone is responsive in his concern over the necessity of doing something meaningful about the trade deficit with the United States, and I am satisfied that his Ministers are equally responsive in addressing the problem.

But, Mr. President, the reality exists that the Japanese business sector since reconstruction has been committed to one specific goal, and that is business as usual—greater penetration of markets overseas. To suggest suddenly that the Japanese Government should recommend that they buy more from the United States or export less into the United States or further open up their markets is very foreign to them. The Japanese bureaucracy has been working hand in hand with the private sector since the reconstruction. As a consequence, if we look at what has happened to date, I think we can be somewhat satisfied in that some progress has been made in the area of telecommunications. But, we had reason to believe we would see more progress made in areas of medical and pharmaceutical, electronics, wood products and wood fiber. We had hoped that Japan would open up those markets to American exporters. The reality with regard to these others, with the exception of telecommunications, has been that the Japanese need more time.

Now, Mr. President, the question of America being a paper tiger is a very real one. The Congress of the United States is still holding in abeyance the question of what to do about trade imbalance. We have several measures that have been introduced which suggest a surcharge on Japanese imports. Some have suggested 20 percent across the board. The problem, obviously, with the surcharge is that it is protectionism, and I do not support protectionism.

The reality of that was seen in the 1930's when virtually every country, as a consequence of the economic decline, set up a network of protectionist legislation to keep foreign products from coming into their countries. The result of that unfortunate happening was to exacerbate the economic decline which resulted in the depression of the thirties.

There is of course a ripple effect. I had an opportunity to spend a short time in Korea as well. Koreans are very interested in what will happen to them as a consequence of what we propose to do about the Japanese trade imbalance. Their concern is that if Japan buys more from the United States, will it be at the expense of Korea? Will there be a decline in purchases from Korea?

Mr. President, the jury is still out on what action the United States is going to take, but I think the 92 to zero vote taken in the Senate is significant in that the Senate has gone on record in opposition to Japanese trade policy with the United States per se. As a consequence, it will be much easier at a later date to vote on various trade proposals.

Mr. President, I caution my colleagues that it is very important to not take steps which will result in establishing protectionist legislation; which will result in decisions being made in the heat of battle that later perhaps will be regretted. We must make sound decisions. Mr. President, I, too, am a sponsor of legislation with regard to the application of a surcharge. But my legislation is a little more complex in one sense and offers relief in another. My proposal requires that the current account balances between the United States and Japan be examined over a 3-year period; and if, for 3 consecutive years, there was in those figures an imbalance adverse to the United States in excess of $16 billion, then and only then would we invoke surcharge legislation.

This would allow Japan the remainder of this year to balance trade, because Japan has had only 2 years to date of current account surpluses with the United States greater than $16 billion. So they would have almost 1 more year to comply. I feel that this is relatively responsible, in that it provides Japan with an alternative.

There is another proposal, however, to which I am giving more consideration each time, and that is the reciprocal policy of open markets. As we reflect on our trade with Japan, we find that they have protected their markets to build up their ability to market their products throughout the world.

I think it would be well for our Department of Commerce to examine perhaps 10 of the major markets in Japan that are still closed to the United States. We should indicate to Japan that they have 6 to 9 months to open those markets; and if they see fit to do that, then we will be satisfied. On the other hand, if they continue to keep closed 10 or 12 of the major markets in their country, then I think we should identify 10 or 12 of our own major markets and suggest that we will close them. I think that this approach, while perhaps rather simplified, offers the matter of choice to the Japanese and yet lets them know that we mean business; that trade, in order to be fair, must be two-way trade.

Mr. President, I am going to mention one more item that I think deserves consideration prior to concluding my remarks today. We have become a debtor nation for the first time in 65 years. The significance of this is that there is more foreign investment in the United States today than there is U.S. investment overseas.

As we consider the growing deficit in the United States which now exceeds $1.7 trillion; the fact that every 18 cents the Government spends is interest on our national debt; and the reality that each year as we debate the budget process we find that we are spending more than we generate in revenues which adds to that deficit by $180 billion to $220 billion a year; the reality of just who is financing this deficit bears some examination.

We are seeing Japan achieving the enviable position of being an exporter of capital. Japan is making substantial purchases of U.S. debt instruments. One can very easily conclude that, to a degree, Japan is financing our debt.

Having spent my other life, outside the Senate, as a commercial banker, I have some idea of the power and influ-

ence of a person who holds someone else's debt. I do not think it is necessary that I say any more on that topic, but it is something that my colleagues should reflect on with greater detail.

Mr. President, in concluding my remarks, I want to emphasize that I think Prime Minister Nakasone is being very responsive in trying to urge that the Japanese private sector and bureaucracy turn this trade deficit around. The thought of the private sector and bureaucracy moving on their own is something that I question. As I have indicated, I am disappointed in their progress so far. I would like to assure my colleagues that the Japanese and our other friends in the Pacific rim, as well as the rest of the world, are waiting to see if the United States means business this time or whether, as we have done so often in the past, we have simply lamented on our frustration over the trade imbalance, and as soon as there is another topic that is more timely, will move on to that. I do not think that this is the case today.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

Mr. PROXMIRE. I thank the Chair.

UNHERALDED HEROISM

Mr. PROXMIRE. Mr. President, the story of the Nazi Holocaust and the Genocide Convention is not told in statistics. Not by the number of concentration camps. Not the number of victims. Nor the laundry lists of barbaric torture and inhumane treatment visited upon its victims. The real story of the Holocaust is told, instead, in the individual stories. The victims, like Anne Frank. And the heroism of those who were not Jewish, yet risked their lives so that their Jewish countrymen might escape and live.

Of course, one of the most heroic stories was told recently on NBC television, the Raoul Wallenberg story, about that amazing young gentile living in Sweden who saved the lives of literally tens of thousands of Hungarian Jews, risking his own life. He is imprisoned or dead, at the hands of the Soviet Union.

His example is probably the most noble example of all to emerge from World War II. He had no reason to risk his life, except that he wanted to do so to save the lives of others. As I say, he was a gentile, not a Jew, and he made this remarkable sacrifice. But it was not the only sacrifice of this kind.

The April issue of the newsletter of the International Network of Children of Jewish Holocaust Survivors contains a story by Valerie Wiener and two colleagues outlining several such acts of heroism.

In Poland, there was the Chrostek family, trapped by the Nazi invasion of their country, barely able to feed their own six children. Yet, they welcomed onto their land a Jewish family of six, whose survival depended solely upon the food which the Chrostek children brought to them in the woods and the two earthen ditches in which they hid.

Once, when a neighbor became suspicious of the Chrostek family, he seized the 6-year-old Chrostek child and, with a gun pressed to the boy's chest, demanded, "Where are the Jews?" Yet, the child maintained his silence, and the two families survived to be reunited in New York just a few years ago.

There was Walter Ukalo of Brody, Poland, who was a member of the Zegota underground, actively searching for Jews who needed food and shelter, providing them with false identification papers and help on planning their escape. Not only did Walter Ukalo save the lives of hundreds of Jews but he also went on to marry one of the women whose lives he saved.

These and other stories recounted by Ms. Weiner's article were told at a recent reunion of Holocaust survivors.

Reading these stories, one can only wonder, why, Mr. President? Why would so many individuals—safe if they minded their own business—risk everything by coming to the rescue of the Jews? It would have been certain death if found by the Nazis, yet they were willing to take the chance. Not just individuals like Walter Ukalo. But large families such as the Chrosteks.

As Valerie Wiener notes, for rescuers like Ukalo or the Chrosteks, "mortality was not an abstract ideal but a commitment to the right of people to live with dignity."

Mr. President, can we do any less than the Chrosteks and the Walter Ukalos? They did what they could to stop the monstrous actions of the Nazis. Will we do what we can to prevent a future Holocaust? Are we willing, at long last, to join the other 96 nations which have ratified the Genocide Convention?

With this being the 40th anniversary of the liberation of the Nazi concentration camps and the 36th anniversary since the Genocide Convention was drafted, we have the opportunity to answer those questions decisively and affirmatively. Like the Chrosteks and Walter Ukalo, let us demonstrate our courage and take the step that is within our power and ratify the Genocide Convention.

WHY AN ARMS CONTROL TREATY WITH THE SOVIET UNION IS THE ONLY WAY

Mr. PROXMIRE. Mr. President, the most important action the Federal Government can take today is to negotiate an arms control treaty with the Soviet Union that will stop the nuclear arms race. Superpower treaty negotiations now going on in Switzerland are not even trying to do the job they should do. We need a treaty different from any we have tried to negotiate in the past. That treaty must include the strongest possible verification system. It must be comprehensive—that is, it must include every aspect of nuclear weapons. It must stop all testing. It must stop all production of nuclear weapons and it must end all deployment of nuclear weapons. Eventually, it should embrace all of the world's nuclear powers. Since the United States and the Soviet Union have between them roughly 95 percent of the world's strategic nuclear warheads—95 percent, that is, between the United States and the Soviet Union, all but 5 percent—a treaty confined at first to the superpowers would go a very long way to assuring nuclear peace in the world.

Why is effective verification essential? It is essential because both superpowers would be tempted to try to violate the treaty at least at the margins unless both were confident that each could detect such cheating and that violations might end the agreement and plunge the world into a renewed arms race.

Is such a treaty feasible? Yes. Such a treaty is feasible. Why is it feasible? It is feasible because both the United States and the Soviet Union have everything to gain from ending this nightmare of advancing nuclear weapons technology that can lead in any direction. The arms race might lead toward more or less stable nuclear arsenals in each country. It might lead toward apparent but momentary advantages for each nation. Such advantages might tempt a superpower strike. Growing technological complexity increases the prospect of a terrible mistake. A mistake could lead to an accidental launching of a missile or a mistaken warning that a nuclear strike was on its way. Such an error could provoke an "attack on warning." Meanwhile, without a comprehensive treaty, both superpowers are about to enter the truly costly aspect of the nuclear arms race.

The Senator from Alaska has just talked about the problem of the colossal deficits facing an enormous national debt, and he is right, but that is just the beginning because of the immense cost of the arms race that is pending.

To date, the cost of amassing an immense nuclear arsenal has been high, but relatively easy to manage for both

superpowers. Not now. With the advent of Star Wars, we are talking about a missile defense that could cost a trillion-dollar expenditure just as a starter. It could also require supplementary spending for look-down, shoot-down defense against submarine-fired missiles and bomber missiles and cruise missiles, plus hundreds of billions of dollars annually to be spent on the kind of offensive nuclear missiles that could cope with a Soviet Star Wars defense.

This Senator has the sneaking feeling that some in the administration and in the Defense Department fully recognize the immense cost of all this. They feel that if they can only get the competitive juices of the American people flowing, the American people will let Congress spring for the trillions of dollars necessary to give us everything: A total star wars defense, a look-down, shoot-down supplement and a spanking new system of hardened skin missiles, decoys plus a massive new research program to find other ways of overcoming any Russian Star Wars defense.

If that seems insane, consider the reasoning behind it. The United States has an economy that is twice as productive as the Russian economy. Our GNP is twice their GNP. Furthermore, with much of our productive facilities sitting idle and with 8½ million Americans out of work and another 3 or 4 million underemployed, plus a potential work force that we could increase by 15 to 20 million by putting more people into the work force, the United States could outproduce the Soviet Union militarily by a truly huge margin. What is more, the United States has far superior scientific resources. We, not they, have the Nobel Prize winners, the superior management and engineers, the more highly skilled and trained workers.

America is ahead in economic capability, way ahead. It is not close. Some people might say, Why not move? Cut loose in an all-out effort to produce the greatest nuclear war machine we can possibly imagine. It would be strictly the NFL all-stars versus the Little Sisters of the Poor. We couldn't lose. Very early in this kind of game, Gorbachev and company would have no choice except to acknowledge defeat, and cry "Uncle."

What is wrong with that dream of U.S. supremacy? The answer is, plenty and then some. First, the American people are balking right at this moment over a 3 percent annual (in real terms) increase in defense spending. They are balking even though the most popular President in 50 years—"the great communicator"—is pushing for it. What is also wrong is that the Soviet Union has none of the political, public opinion restraints on military spending that we have. If Ivan has to pull his belt in two notches now, Gorbachev can pull it in two more or four more. Neither Ronald Reagan, nor any President can do that to Americans. And what does our scientific or technological lead mean? Our scientific lead in nuclear weapons means a year or two difference until they duplicate what we do, by theft or espionage, hook or crook. The MIRV breakthrough by this country followed promptly by Russian duplication suggests how transitory our scientific advantage in nuclear weapons is likely to be.

But what is wrong about all is that the nuclear arms race has a life of its own. Once we turn our back on arms control and waltz down that arms race path in a really big way, the uncertain, unpredictable, unstable nuclear technology itself takes over. What is wrong finally is that the one consequence of all this is that ultimately—if we are persuaded to dance down the primrose path in an all-out arms race—we bankrupt our country, we destroy the greatest economic system the world has ever seen, America collapses under a burden of taxes and debt to pay for an arsenal we could never use except to blow mankind off the face of the Earth, forever.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. ANDREWS). Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond 1:30 p.m. with statements therein limited to 5 minutes each.

SUPPORT FOR WITHDRAWING AFGHANISTAN'S MFN STATUS

Mr. DENTON. Mr. President, I rise in support of the legislation that was introduced yesterday by the senior Senator from New Hampshire [Mr. HUMPHREY] to withdraw most-favored-nation status from Afghanistan. I commend the Senator for his initiative and the work of the Task Force on Afghanistan, which has made certain that we in the Senate are fully informed about the war in Afghanistan.

It has been 5 years since the Soviet Army invaded Afghanistan and installed a puppet government, the Communist dictatorship of Bahruk Karmal, in Kabul. Despite the brutality of that regime and the cruel military tactics used by the Soviets, I am concerned that the American public remains largely unaware, and therefore apathetic, about the tragedy unfolding on Afghan soil. Although we correctly remember the Holocaust, we avert our eyes from Afghanistan and fail to rally public outcry against the atrocities being committed there.

It is estimated that the Soviet military presence in Afghanistan now totals 115,000 men. Furthermore, the Soviets have at their disposal 40,000 Afghan Government troops. The Soviets also dominate Afghanistan's security forces and the bureaucracy. They have constructed extensive military and logistical facilities to support their forces and have tied Afghanistan ever closer to the Soviet economic system.

The Soviet occupation and the internal turmoil in the country have caused the flight of more than a quarter of the population. Nearly 3 million refugees are in Pakistan, mainly in tent camps on the border in the Northeast Province and Baluchistan. As many as 1½ million Afghan refugees may also be in Iran.

Considering the scorched earth policy employed by the Soviets, a tactic used elsewhere by them and their surrogates, and the high altitude bombing that they annually conduct in the spring, it should be quite clear to everyone that the Soviet occupation forces are carrying out a campaign of terror against the Islamic people of Afghanistan.

I believe, therefore, that it is appropriate and necessary that the United States urgently reevaluate its Afghan policy to determine whether there is more that our Government can do to help the Afghan people resist tyranny and the foreign occupation of their sovereign country.

I believe that there is more that we can do.

I was shocked to learn that the United States still imports $12 million worth of goods from Afghanistan each year, and that Afghanistan receives all the benefits and blessings of most-favored-nation status. The current regime deserves no favors, least of all any that improve market access for its products and helps it to earn hard currency. Those benefits do not go to the Afghan people, but to those Afghan and Soviet policymakers that are deliberately choosing to starve and massacre thousands of Afghan women and children.

I have no illusions that a withdrawal of MFN status would have any persuasive effect on the Kabul regime or its Soviet masters, or even a practical effect on the level of trade between the United States and Soviet-occupied Afghanistan. Nonetheless, I do believe that, by authorizing the President to withdraw most-favored-nation status from Afghanistan, the Congress can emphasize anew our abhorrence for the criminal tragedy that is now taking place there.

I support rapid approval of the legislation; it is long overdue.

"GO FOR BROKE"—WHAT IT'S ALL ABOUT

Mr. INOUYE. Mr. President, it was a high honor for me to serve during World War II with courageous and

dedicated Americans. The members of the 442nd Regimental Combat Team, known as the "Go For Broke" regiment, served our Nation with valor and their achievements helped to dispel in a most dramatic and bloody manner any doubts harbored as to the patriotism of Japanese Americans.

Veterans of the 442nd, 100th Infantry Battalion, and the Military Intelligence Service—Japanese-speaking interpreters who served in the Pacific—will celebrate a Nisei Veterans Reunion in Hawaii, on the island of Maui, from July 4–7, 1985.

Roger Smith, who served as an officer in the 442nd, has written an article on the accomplishments of the 442nd, and his experiences as a non-Asian member of our Japanese-American unit. He is a retired captain in the U.S. Army and currently lives in Efland, NC.

Mr. Smith's article makes for fascinating reading, and I ask unanimous consent that it be reprinted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"GO FOR BROKE": WHAT IT'S ALL ABOUT

The 442nd Regimental Combat Team was one of the most unusual units in World War II. But not enough Americans know the story behind this unit.

To begin with, the 442nd was the most decorated combat team in U.S. military history. Although it included only 4,500 men at any given time, those valiant soldiers earned more than 18,000 personal combat decorations, including a Congressional Medal of Honor, 52 Distinguished Service Crosses, 500 Silver Stars, 5,200 Bronze Stars and 9,486 Purple Hearts. And last but not least: seven Presidential Unit Citations.

With a record like that you might think most of the men were John Wayne types. Not exactly. The men of the 442nd were second-generation Americans of Japanese descent, called "Nisei," which means "two" in Japanese, and the average man was 5'4" tall and weighed 126 pounds.

But the most unusual thing about the 442nd was the fact that its men were victims of cruel prejudice by other Americans. Many of the men's families, in fact, were uprooted from their homes and imprisoned in virtual concentration camps for the duration of the war.

HOW IT ALL STARTED

In 1942, due to prejudice and war hysteria, all persons of Japanese ancestry on the West Coast and about 2,000 individuals from Hawaii—including second generation American citizens—were rounded up and put behind barbed wire in concentration camps. And in many cases, some only had 72 hours to prepare to leave. More than 110,000 people were uprooted from their homes with loss of property, businesses, freedom and personal justice.

This was the greatest blot ever on American History. And today, 43 years after this "mass ethnic incarceration," the U.S. Congress is just getting around to making amends in a Congressional Bill. The bill acknowledges the incarceration—and apologizes on behalf of the people of the United States. It also provides for partial financial restitution to each individual who was interned.

THE BIRTH OF THE 442ND

In 1950 Metro-Goldwyn Mayer made a movie titled Go For Broke, the story of the 442nd Regimental Combat Team. "Go For Broke" was the combat team motto. It meant to go all out or shoot the works, either in a dice game or against the enemy. Today, go for broke has become part of the American language.

In 1942 not everyone was imbued with prejudice and war hysteria, and many in government and the War Department argued against the evacuation of all persons of Japanese ancestry from the West Coast. Eventually this opposition brought forth a proposal to form a unique combat team, which was approved by Franklin D. Roosevelt.

The 442nd Regimental Combat Team was activated on February 1, 1943. Except for the officers, who were mostly Caucasion, it was composed of Japanese Americans. I was one of the officers, a newly commissioned 2nd lieutenant just out of the Infantry Officer Candidate School at Ft. Benning, Georgia.

All the enlisted men were volunteers. Approximately 1,500 came from the mainland and about 3,000 from Hawaii—where although not interned, they were viewed with suspicion and distrust. 4,500 men, many with families behind barbed wire, where they also had been, volunteered to train and fight as a unit.

That was the epitome of loyalty. But loyalty didn't stop after volunteering.

Shortly after we started training at Camp Shelby, Mississippi, one officer in each company was designated as War Bond Officer. From 1943–45 I didn't get many promotions in rank, but I did get a lot of titles to go with: Platoon Leader, Second Platoon, Company L. One of these was "War Bond Officer, Company L."

Facts and figures after 43 years are a little fuzzy, but as I recall: almost every man converted most of his life savings into war bonds, and bought them with money orders he had purchased before leaving home. And this was repeated in all the other companies of the 442nd.

I don't remember the exact value of the bonds, but it was somewhere between $50,000 and $100,000—which in today's dollars would be much more than that. I do remember, though, having to endorse each money order before the bank would accept it.

How many times do you suppose I wrote: Roger W. Smith, 2nd Lieut. Inf. in four hours of non-stop writing?

TRAINING AND INTO COMBAT

Every man in the 442nd knew that his was a segregated unit, marked for intensive observation by the War Department and by the public. Thus they had to prove (even though they shouldn't have had to) that they were at least as good as any other group of Americans. And prove it they did with flying colors, by either coming up to or by surpassing all military standards of training.

Training records are one thing, but final examinations are given in combat. We looked at the 442nd's examination grades earlier: those 18,000 personal decorations and seven Presidential Unit Citations, which were earned in Italy and France.

As in our training, the challenge to prove oneself in combat was overwhelming. Additionally, an added incentive to excel was present. Shortly after the Japanese bombing of Pearl Harbor on December 7, 1941, a special infantry unit was formed in Hawaii for Japanese Americans and was sent to the mainland for training. This unit, later designated the 100 Infantry Battalion, had preceded the 442nd into combat in Italy by about nine months, and had achieved an outstanding record.

Here was a standard to come up to, which the 442nd did. And from June 1944 on, the two units fought as one.

TWO OUT OF 18,000

With more than 18,000 personal decorations, the choice of citations of courage and bravery are almost endless. I have selected two to recount. The first is a Congressional Medal of Honor citation. The second is the story of a two-platoon operation in which I took part.

"PFC Sadao S. Munemori," reads the Medal of Honor Citation, "took over his squad after the squad leader was wounded.

"After some extremely heavy fighting, Munemori worked his way back toward his squad, followed by bursting grenades.

"As he neared the crater where his men were waiting, a grenade bounced off his helmet and rolled into the crater.

"Without hesitation, Munemori dove on the grenade and smothered the explosion. He was killed. His two squad members escaped with their lives."

Munemori was the Congressional Medal of Honor winner. But there were many others, who, in one degree or another performed acts of extraordinary heroism in a military operation against the enemy.

Now for the second story, which is more difficult to tell because I am writing from notes I made in 1945—instead of quoting from a Congressional Medal of Honor citation. The following action took place near Bruyeres, France, in late 1944.

The two forward companies of our 2nd Battalion had advanced so rapidly that they had bypassed quite a few elements of German soldiers. This left "pockets of resistance" that were creating havoc with the supply lines and the reserve elements of the 2nd Battalion.

The reserve company, F Company, had its hands full and could only spare one platoon to clean out those pockets. This was not enough men to get the job done. So a platoon from the 3rd Battalion was borrowed to help in the clean up: the 2nd Platoon of Company L, my platoon.

Every combat story is different, but there is usually one common demoninator among the winners; aggressiveness is often more important than manpower or fire power.

The box score for this operation was: A conservative estimate of 100 Germans killed, wounded or captured (and not many were captured). Our losses between the two platoons, of about 25 each—three casualties, no one killed.

This was not a normal action regarding 442nd losses. But you win some and you lose some. That day we had a winner—all the way around. And we had it because of the aggressiveness of the men—the determination to close with the enemy and get the job done.

As always, the desire to prove their loyalty to their country was overwhelming. "Go For Broke" was in the hearts—on the tongues—and coming out of the rifle barrels of 50 Japanese American soldiers. And two Caucasian American lieutenants. I would hardly know where to pay individual tribute

for that day's work. Every man was in the fight giving his all.

One final footnote: every German unit that faced the 442nd for the first time got a demoralizing shock. They thought they had been double-crossed by their ally—Japan. And so it was in late 1944 near Bruyeres, France. Our enemy, that day, had their introduction to the 442nd.

THE SUPREME ACCOLADE

There is probably no better summary of the fighting spirit of the men of the 442nd than the one made by George C. Marshall, General of the Army and Chief of Staff during World War II.

"They were superb: the men of the 442nd took terrific casualties. They showed rare courage and tremendous fighting spirit. Everybody wanted them."

After that, there isn't much else to say, except to remind the reader that these were men whom the government had doubts about in 1942. The men whose parents and younger brothers and sisters, in many cases, were behind barbed wire while they were fighting in Italy and France.

These were the men who came home after the war and were met with signs in restaurants, barber shops, etc. saying: "No Japs allowed." In short, when they came home they found many of the same things we had been fighting against for four years—still being perpetuated on the home front.

1945-85

Since 1945, I have kept in contact with many 442nd friends by correspondence, a few personal visits and several tri-annual reunions.

From 1970-77, I lived in Southern California, where I was a member of the 442nd Veterans Association of Southern California. I served as their president in 1972. That was the greatest honor I ever received or would ever hope to receive.

The next Nisei Veterans Reunion will be held in Hawaii, on the island of Maui, July 4-7, 1985. This reunion will bring together all nisei veterans, which includes men who served in the Pacific as language and intelligence specialists. Men who were as outstanding in that theatre as the 442nd was in Europe.

World War II ended 40 years ago, but the story of the nisei soldier in Europe and in the Pacific—and the mass incarceration of 110,000 persons of Japanese descent—needs to be told over and over again.

Would that this amount make a small contribution to the retelling.

A TRIBUTE TO DR. LUTHER TERRY

Mr. HEFLIN. Mr. President, it is with sadness that I rise today to note the recent passing of a fellow Alabamian, a former Surgeon General of the United States, Dr. Luther L. Terry.

Dr. Terry, who served as Surgeon General from 1961-65, was born in Red Level, AL, in 1911. In 1931, he received his bachelor of science degree from my alma mater, Birmingham-Southern College. He then continued his education at Tulane University, where he received his MD in 1935.

During his distinguished career, Dr. Terry's expertise as a physician, heart specialist and educator would take him all around our country. After medical school, he returned to Birmingham for his internship. His residency was done at university hospitals and city hospitals in Cleveland, OH.

Later, Dr. Terry would teach at Washington University in St. Louis, the University of Texas in Galveston, and Johns Hopkins Medical School. He also served at the U.S. Public Health Service Hospital in Baltimore.

Prior to being named Surgeon General by President Kennedy, Dr. Terry had served at the National Heart Institute in Bethesda, where he was assistant director from 1958 to 1961.

It was during his years as Surgeon General that Luther Terry achieved what he believed to be his greatest public health service—the first Surgeon General's Report on Smoking and Health. The relationship between smoking and deteriorating health was a cause which he would pursue for the remainder of his life.

Mr. President, I could list all of the honors and awards and degrees which were accorded Dr. Luther Terry, but to do so would take a seemingly endless list. That is the esteem in which he was held by his colleagues in the medical profession.

Mr. President, Dr. Terry is from a distinguished Alabama family. He and I had the honor of being inducted into the Alabama Academy of Honors at the same time.

Mr. President, I ask unanimous consent that the eulogy delivered by Joseph A. Califano, Jr., the former Secretary of Health, Education and Welfare, be printed in full in the RECORD.

I would like to thank Mrs. Frances Humphrey Howard, the sister of the late great Vice President and Senator from Minnesota, Hubert Humphrey, for making Secretary Califano's eulogy available to me. Mrs. Howard is now with the National Library of Medicine in Bethesda.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

EULOGY FOR DR. LUTHER TERRY

Luther Terry was special.

He was an outstanding public servant. The United States has known no finer Surgeon General. He was a dedicated researcher and teacher. The New York Times called him "a doctor's doctor, the kind that doctors would like to have look after their own families."

But those are not the characteristics that made him special.

Luther Terry was special because he cared and had courage, attributes rare in a capital that awards so many of its prizes to the cautious.

Great scientific inventions have saved millions of lives. Pasteurization of milk. Vaccines to eliminate smallpox from the face of the earth and check childhood diseases. Antibiotics to stamp out bacterial infections. In the first part of the century, infectious diseases these medicines conquered were the public health challenges.

Luther Terry's public health challenge was far more difficult. It could not be met in the academic tranquility of a laboratory or medical campus. This quiet, private man had to face his public health challenge in public. He met that challenge. He pioneered the recognition that life style was the killer and crippler for the last half of the 20th century. He taught us that we could do more for ourselves than any doctor or hospital could do for us.

Luther Terry didn't practice public health with platitudes. He gave it to us straight and true with the first Surgeon General's Report on Smoking and Health. He tried and convicted cigarettes of murder and mayhem by cancer, heart disease, emphysema and chronic bronchitis. His findings and his soft but steady voice moved a reluctant Congress to act, first with warning labels, then with a ban on television advertising. He saved as many lives as any Salk or Pasteur or Madame Curie. He is as much a medical giant.

But Luther Terry is more. He is a genuine hero, a man of extraordinary courage. No powerful economic forces rose up to defend polio, or smallpox, or unsafe milk. When Luther Terry told us of the dangers of smoking, political and financial powers of magnum force rose to attack him. His discovery was one they had tried to hide, one didn't want to talk about. But Luther spoke out. Softly, but firmly he stood his ground. He persevered and in the end he revolutionized our thinking about the causes of modern day diseases.

Luther Terry touched my life twice. For a decade I ignored his warning, but my son Joe did not. He learned about the Surgeon General's Report in school; and he asked me to quit for his eleventh birthday present. And I did.

Four years later, Luther inspired the second Surgeon General's Report on Smoking and Health to celebrate the 15th anniversary of his work. The report vindicated him as a scientist and a humanitarian. It provided overwhelming evidence that his warnings were justified.

Luther Terry kept fighting to the last. His recent efforts to eliminate smoking from the workplace have marked the paths to new frontiers for his followers. Many of us have walked and will walk in his footsteps, but none of us can fill his shoes.

In searching for some words to describe this committed, caring, courageous man, I could find none better than those of Theodore Roosevelt:

"It's not the critic who counts, not the man who points out how the strong men stumbled or where the doer of deeds could have done better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood, who strives valiantly, who errs and comes up short again, and again, who knows the great enthusiasms, the great devotions, and spends himself in a worthy cause. . . ."

Luther Terry certainly spent himself in a worthy cause. He's no longer in the arena. He can rest now. He deserves to enjoy a peaceful journey with the Lord. In the no-smoking section, of course.

SOCIAL SECURITY NOTCH PROBLEM

Mr. HEFLIN. Mr. President, during the 98th Congress, I jointly sponsored legislation directing the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan and report to Congress immedi-

ately on ways to correct the so-called notch problem in the Social Security system. Unfortunately, this bill was not brought to the floor of the Senate for a vote.

I am cosponsoring similar legislation again in the 99th Congress to correct the Social Security benefit disparity which was created when Congress adopted the Social Security Amendments of 1977. When this 1977 measure was passed, Congress established a new formula for calculating Social Security benefits in an effort to keep the Social Security system solvent. However, the new method of calculating benefits created a situation which allows for fewer benefits for persons born in the period between 1917 to 1921.

In order to protect Social Security benefits for people already retired or soon to reach retirement age, a transitional period was established which caused the notch baby problem. When Congress changed the Social Security formula it intended to prevent the over payment of benefits to some recipients. Instead, however, Congress' solution to the problem resulted in an unfair penalty to individuals who have similar work histories but were born only 1 year, 1 month, and in some instances, 1 day apart. Because of the flaw in the Social Security benefit formula, a $100 difference in the monthly benefits can exist for one person born December 31, 1916, and another born January 31, 1917, who worked side by side on the same job for the same number of years. If you multiply this $100 over a 1-year period we are talking about a $1,200 difference in Social Security pay for these notch year workers.

It is imperative that we develop a new formula to close the benefit disparity which justifiably has caused widespread concern throughout our Nation. The disadvantage to those who continue to work after age 65 especially must be resolved. The Social Security System was established to provide supplemental income and peace of mind to our retired citizens. Alabamians and citizens throughout our Nation who have devoted considerable energy to their careers deserve a fair and reasonable return from the Social Security System.

Although I was not a Member of the Senate when the Congress established the new formula for calculating Social Security benefits, I do not believe that it was the intent of the Congress in passing the 1977 Social Security Amendments to create a situation whereby persons born between 1917 and 1921 would be penalized for working beyond the age of 62, particularly inasmuch as the difference in benefits is, as a general rule, greater for those who delay retirement beyond that age.

Mr. President, Members of Congress must come to grips with the reality of this situation and close this loophole. As responsible leaders who have been elected to represent the interest of our constituents, we must commit ourselves to providing justice for these elderly individuals who have worked hard all of their lives, paid into the Social Security System and expect to receive their full benefits upon their retirement.

Mr. President, I urge the entire Congress to join me in these efforts to correct this Social Security notch problem.

W. TAPLEY BENNETT, JR.

Mr. NUNN. Mr. President, one of our Nation's most able and distinguished diplomats, W. Tapley Bennett, Jr., recently retired from the State Department. Tap Bennett has been an outstanding Foreign Service officer for more than 40 years, representing the United States in positions of great responsibility around the globe. Tap also hails from my home State, where his father was one of Georgia's best-known agricultural leaders of the 20th century. Tap Bennett, Sr., was known and honored throughout Georgia for his lifetime of contributions to agricultural development.

Tap Bennett, Jr., has also become a well-known name to the citizens of Georgia. At the time of his retirement, he was the only remaining active Foreign Service officer who began his career prior to World War II. In every assignment in his long and varied career, Tap Bennett executed his duties with dedication, ability and patriotic devotion to our Nation's interests.

The list of important and sensitive assignments that he has undertaken successfully is long and well known to my colleagues in the Senate. It includes services as assistant to the U.S. delegation to the Founding Conference of the United Nations in 1945, Ambassador to Portugal, Ambassador to the Dominican Republic, U.S. Ambassador to the United Nations Security Council, Deputy U.S. Representative to the United Nations and Ambassador to NATO.

Most recently, Tap served as Assistant Secretary of State for Legislative and Intergovernmental Affairs. All of my colleagues in this body know him as a forthright and dependable representative of the State Department.

During a farewell reception for him at the State Department, Tap made an eloquent statement that deserves the attention of the Senate. In it he spoke for the Foreign Service as no one else could. His remarks instill in me, and I believe in all who will read them, a profound appreciation for those who accept the honor, as well as the risk, of representing the greatest Nation on Earth throughout the world.

Tap's statement reflects a strong sense of patriotism and devotion to this country. It also reflects his close identity with his Georgia heritage, an identity he has maintained despite spending the past 43 years in far flung corners of the globe.

Mr. President, I am proud that Tap Bennett hails from my home State. I am even prouder that he has represented our Nation in some of the most challenging assignments offered by the Foreign Service. I ask unanimous consent that Tap Bennett's retirement statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

RETIREMENT STATEMENT OF W. TAPLEY BENNETT, JR.

Amb. BENNETT. Mr. Secretary, all you friends gathered here, this is of course a very emotional occasion for Margaret and me. I'm terribly grateful for the things that have been said, you know my father might have believed them (laughter) but we're very happy to be here tonight and some of you out there thought that this day would never come. (Laughter) There were times when I thought myself about it. So now after nine Presidents and 14 Secretaries of State, why the time has come to move on to a new assignment and a new adventure. Some of you will remember what Dean Rusk said when as retiring Secretary of State he was asked what he was going to do on his retirement and he thought a minute and he looked up and he smiled and he said, "Never underestimate the power of a Georgian to just sit and do nothing. (Laughter) He didn't follow that advice, and I don't plan to either. But having been at this business a long time, I'd just like to say for the benefit of some of the younger participants here that when I entered government service, in 1940 it was, on a paid capacity, it was at the munificent salary of $1,625 per year and per diem on travel was $5.00 a day. So I, of course I must say the cafeteria meals were only 25 cents (laughter) but I cite these statistics merely to, and some of those in the audience who can go back even further than I could tell you when there was a 15 percent cut in salary back in the early 30's, so I cite these statistics just to say that things are not as bad as they seem and the Service will go on without undue hinderance despite some rocks in the path.

You know there are certain advantages in diplomacy if you come from my part of the country because when I've gone around certain countries and seen these signs "Yankee Go Home," I knew they didn't mean me. (Laughter/applause) In fact I had occasion to say once to the President of Bolivia that I could understand his concern (laughter), that we'd made a rather major effort to get the Yankees off our backs. But we'd learned the best way to get along was to go along and so we joined in and I need only today to cite the sunbelt to you to see the success of that policy.

Now I've been blessed in this job with having had a very fine predecessor in Powell Moore who I'm glad to say is here tonight and everybody is going to be very pleased with my successor, Will Ball, whom I hope is also here. It means a lot to know that three of us in a row have had their training in Georgia (laughter).

I've always said in this career of ours in modern diplomacy you've got to have a tough hide to survive the slings and arrows

that come along with it and you have certainly got to have a sense of humor—to be able to laugh at yourself as well as some of the situations that you get involved in. Today in this turbulent world, I think you need more than that unfortunately, and I don't say this in light jest, you need a bullet proof vest and lots of luck. And when we think of some of our colleagues and their being on the front lines, this is a tough career but a very valuable one. And many out there are serving in the finest traditions of this country today because our society and what we represent around the world is, in my opinion, we're still the city on the hill, we are the goal to which so many other people around the world aspire and I happen to be one of those who believes that we are still as a Nation the last best hope of earth. You only need to look at the immigration statistics to see an every day confirmation of that situation. And I think of the first President under whom I served, Franklin Roosevelt, and something he said. Our present President looks back to FDR and so do I and in that posthumous address of his which he was writing at Warm Springs when he was stricken, which he didn't deliver himself, he had that phrase, "Let us go forward with strong and active faith." And that's our credo for this country still, I think.

When I moved into the congressional office, I was reminded of something Cordell Hull, who was my first Secretary of State, said and he was a man for earthy advice, you know, and he said, "Never wrestle with an alligator in the water because you're in his territory." (Laughter) Well, having wrestled with the Congress now for a year and a half, I think that's one of our problems where we're always wrestling on their turf and so it takes a lot of agility and flexibility to keep up with what's giong on up there and try to work it to the interests of our country because the relationship between the Congress, between the Legislative and the Executive branches, is absolutely crucial to the success of this country and its projection abroad and I'm happy to say that, in the present Secretary of State, we have a man who understands that very thoroughly and who is willing to give the extra ounce of energy and to walk the extra mile in trying to reach reasonable understandings and to present a coordinated view to the world. (Clock chimes ring in background) I'm about to finish. (Laughter) And I can't close here without expressing the privilege it's been for Margaret and me to serve under George and O'Bie Shultz and what that's meant to us personally as well as what it means to the country to have a man of your character, Sir, in charge of this important and vital operation.

None of this would have been possible I obviously would say without the help of Margaret, and obviously the best day of my life was the day she decided and agreed to go down the path with me. And I also want to pay tribute to my mother-in-law, because that's been a wonderful experience—she soars like a lark and she's just been a great influence in our lives.

When I move into my present job down at the other end of the corridor, I moved my office from the office which was normally that of the Assistant Secretary to a smaller office on the corner. One, because it commanded this incomparable view which is out—all of us share on this side of the building in which is such a really to me inspiring experience every day of the week. But from my chair there I can see both Lincoln and lee. (Laughter) The columns of Arlington and the columns of the Lincoln Memorial and that I've derived great spiritual sustenance from over these last months. And so I can think of as I leave I'll have a quotation, but before hand, I want to say that this has been a marvelous several decades of friendship and I'm gald people are here tonight from every phase of that experience of mine, all the way back to the early days of Santo Domingo and into Greece and to Austria and people have come tonight all the way from Vienna, and from Brussels, from New York and from Atlanta and this means a lot to me. So as I go I shall think of you fondly, but as I lie on my back in the Caribbean next month looking up at a sail (laughter) I shall think of you fondly but not maybe every day. (Laughter) And so in closing, I merely want to cite a phrase, to quote a Southerner, General Robert E. Lee, who in addressing his farewell to the Army of Northern Virginia said, "With an unceasing admiration of your constancy and devotion to your country and the grateful remembrance of your kind and generous consideration for myself, I bid you an affectionate farewell."

AMERICA AS TARGET

Mrs. HAWKINS. Mr. President, in the New York Times recently appeared a six-part series entitled "America as Target." These well-researched and hard-hitting articles deal with many of the different aspects of the drug abuse problem in our country. Each article is horrifying.

The first article discusses what is considered a somewhat drastic step on the part of the United States to stop drug trafficking, and that is cutting off foreign aid to drug-producing nations. While this article contends that this method of cutting off drugs at the source would have serious adverse effects on American foreign policy, it also admits that previous attempts to cut off drug supplies have failed and drastic measures are now necessary.

While the Reagan administration has placed the highest priority on eradicating drug abuse, and has escalated Federal activities to achieve this goal, drug production continues to increase, and drug use continues to grow. The Drug Enforcement Administration claims that such large quantities of the three major drugs of abuse—marijuana, cocaine, and heroin—are being grown, both in the Golden Triangle and the Golden Crescent, that supply far exceeds the demand. In this first article of the series, it is stated that the United States is so glutted with cocaine that the drug now sells at wholesale prices in some parts of the country, for one-half to one-third the price of 1 year ago. At the same time, drug agents are finding that the cocaine they seize on the street is two to three times purer than last year.

To convince the source countries of the necessity of stopping their drug production is a difficult task indeed. The "narco-dollars" earned from these drug crops in some of the producer nations actually keeps the national economy afloat. The United States does not have full diplomatic relations with some of the world's major drug-producing nations, such as Afghanistan, Iran, and Laos. The diplomatic alternative we have of cutting off foreign aid has not often been used and is one that is generally thought should be utilized. An example of the potential success of this method is detailed in the case of Turkey. When the United States threatened to limit arms sales to this nation that had become the world's largest producer of opium poppies, Turkey took no time at all in virtually eliminating illicit poppy production. Additionally, the Turkish Government has kept the situation under equally strict control ever since. Following the success of these particular negotiations, drug control agreements have been negotiated with four new nations: Pakistan, Colombia, Bolivia, and Peru.

In the second article of this New York Times series, our ally and friend, the nation of Jamaica, is described as one of the largest contributors to our drug problem. While many of the attitudes reported were upbeat, the devastating results of drug use seem to proceed unchecked. In producing both marijuana and cocaine, the tiny country of Jamaica is recognized as being one of the major suppliers of both these dangerous and illegal narcotics to the United States. Jamaica is also the 10th largest recipient of U.S. economic aid in the world and the diplomatic pressure is growing for Jamaica to make very real efforts to cut drug production.

In the third article of this series, Colombia's very special situation is described in detail. Colombia, a nation "held hostage by the traffickers," recently declared all-out war on drugs. Colombia had been the recipient of $40 million in American aid. When drug abuse became a disruptive internal problem, this nation began an antidrug offensive that has been remarkably successful. Having witnessed how far the Colombians have progressed during a recent congressional visit to that nation, I express admiration and encouragement for how far President Betancur and his country have come in trying to wrest themselves from the deadly grip of drug traffickers.

The next article deals with Bolivia and that nation's efforts to stop drug production. This nation, which I have also visited as part of my continued efforts to convince foreign governments to take steps to stop their drug production, has indeed proposed an ambitious drug enforcement initiative. We have yet to see any significant results. Narcotics, especially cocaine, in this nation has become the most important

commodity of foreign exchange. After the Bolivian army forced the shutdown of Bolivia's most prolific cocaine-producing region, there was a near-revolution by the farmers and the Bolivian peso's value dropped in 1 day to 30 percent of its value the day before. Despite all this effort, however, Bolivia is still considered by the State Department to be "one of the most intractable narcotics problems in the world."

In the fifth article of this series are some of the narcotics control efforts around the world, and the illustration used is Thailand.

It is discerned that the basic policy of crop substitution is the strategy behind these failures. In Thailand, in the last few years, the United States has spent millions of dollars in setting up pilot crop substitution programs, and witnesses report the following results: "Yes, they're raising the substitute crops. But they're growing all the opium, too." Actually, the latest reports from Thailand indicate that, since the inception of this program, there has been a 38-percent increase in acreage planted in opium poppy. The conclusion that has been reached vis-a-vis this effort, sadly, has been that further such efforts simply will not work without accompanying enforcement. And as the center of the Golden Triangle of Southeast Asia, Thailand's opium production must be curtailed.

The sixth and final article of this exceptionally fine series asks the question: "The War on Narcotics—Can It Be Won?" The article then begins with the Rand Corp.'s assessment that the supply of drugs can never be eliminated. That is an unsatisfactory answer to the pleas of the families of our Nation.

It is a consensus of opinion among drug control officials in the U.S. Government that the demand for drugs, along with the foreign illicit narcotics supply, must be destroyed simultaneously. Many different ways of achieving this goal are suggested in the series. Some suggest the formation of a special U.S. Army contingent to be deployed to stop drug traffic, while others suggest the legalization and taxation of narcotics substances. Increased seizures of assets of drug dealers, stopping the money laundering involved in drug trafficking, and the formation of a mobile drug-eradication strike force were all offered as alternatives to present drug control methods.

Mr. President, the immense scope of the drug problem in our Nation is presented all too vividly in these exceedingly effective articles. The conclusion is that by whatever means, the international terror of drug abuse must be stopped.

HOLOCAUST REMEMBRANCE DAY

Mr. KENNEDY. Mr. President, we gather in the Senate and across America today to remember and commemorate the 40th anniversary of the liberation of the Nazi concentration camps in World War II. Holocaust Remembrance Day is set aside so that we, and all the generations to come, will never forget the tyranny and massive cruelty of the Nazis and their systematic and brutal execution of millions of Jews and other minorities.

On this special day, we also pause to celebrate the courage and faith of the Jewish people. We honor the martyrdom of the 6 million innocent men, women, and children who were the victims of the Holocaust, and we praise the indestructible spirit of the Jewish people.

By looking back today, we can see ahead more clearly. And we acquire a deeper understanding of the steps that must be taken to combat bigotry and injustice wherever it appears, so that never again will such atrocities and crimes against humanity recur. And on this anniversary, we also renew our pledge to work even harder in the time to come, to ensure that all those responsible for these crimes, such as Josef Mengele, the Angel of Death at Auschwitz, are inexorably pursued and finally brought to justice.

Let us rededicate ourselves now to end for all time the bitter roots of religious discrimination and racial prejudice. There is no place on our planet for words or deeds which breed such hatred and division. On this day of commemoration, let us renew our efforts to rebuild a world of true and lasting freedom—from war and want, from fear and oppression. Above all, let us ensure that our remembrance is not confined to a single day alone. Enduring freedom is timeless and indivisible. The struggle for justice is never over, and none of us can rest until liberty is secure for all peoples in every land on Earth.

MESSAGES FROM THE HOUSE

At 12:11 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1210. An act to authorize appropriations to the National Science Foundation for the fiscal year 1986, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 236. Joint resolution commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 1210. An act to authorize appropriations to the National Science Foundation for the fiscal year 1986, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HEINZ (for Mr. GARN), from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. Res. 135. An original resolution authorizing expenditures by the Committee on Banking, Housing, and Urban Affairs; referred to the Committee on Rules and Administration.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary reported that on today, April 18, 1985, she had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 15. Joint resolution to designate May 7, 1985, as "Helsinki Human Rights Day."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

The following-named captain of the Coast Guard Reserve to be a permanent commissioned officer in the Coast Guard Reserve in the grade of commodore:

Captain Bennett S. Sparks, USCGR.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HELMS:

S. 943: A bill to amend title II of the Social Security Act to provide that additional years spent in child care may be dropped out in computing benefit amounts; to the Committee on Finance.

S. 944. A bill to amend title II of the Social Security Act to restrict the payment

51-059 O-86-43 (Pt. 6)

of benefits to certain aliens; to the Committee on Finance.

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. ABDNOR, Mr. MITCHELL, Mr. NICKLES, Mr. HOLLINGS, Mr. INOUYE, Mr. DOMENICI, Mr. HATCH, and Mr. COCHRAN):

S. 945. A bill to recognize the organization known as the National Association of State Directors of Veterans' Affairs, Incorporated; to the Committee on the Judiciary.

By Mr. FORD:

S. 946. A bill to amend the Federal Coal Leasing Amendments Act of 1976, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. LUGAR (by request):

S. 947. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Relations.

By Mr. INOUYE:

S. 948. A bill for the relief of Dr. L. Neil Frazer and wife, Marie Sylvina Pauline Frazer; to the Committee on the Judiciary.

S. 949. A bill for the relief of George Hook Wo Young; to the Committee on the Judiciary.

By Mr. HEINZ (for himself, Mr. CHAFEE, Mr. HOLLINGS, Mr. SPECTER, Mr. MATSUNAGA, and Mr. BURDICK):

S. 950. A bill to amend the Communications Act of 1934 to promote fairness in telecommunications policy by providing for lifeline telephone service; to the Committee on Commerce, Science, and Transportation.

By Mr. GORTON:

S. 951. A bill to amend the Fair Debt Collection Practices Act to provide that any attorney who collects debts on behalf of a client shall be subject to the provisions of such act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BYRD:

S. 952. A bill for the relief of Ray M. Reed; to the Committee on the Judiciary.

By Mr. EVANS (for himself and Mr. GORTON):

S. 953. A bill to validate contractual relationships between the United States and various non-Federal entities; to the Committee on Energy and Natural Resources.

By Mr. GORTON (for himself, Mr. MCCLURE, and Mr. SYMMS):

S. 954. A bill to provide for additional protection of steelhead trout as a game fish, and for other purposes; to the Committee on Indian Affairs.

By Mr. MITCHELL (for himself and Mr. CHAFEE):

S. 955. A bill to amend the Internal Revenue Code of 1954 to provide funding for the Hazardous Substance Response Trust Fund, and for other purposes; to the Committee on Finance.

By Mr. MOYNIHAN (for himself and Mr. CHAFEE):

S. 956. A bill to amend the Internal Revenue Code of 1954 to modify the provisions relating to minimum taxes for tax preferences of individuals and corporations, and for other purposes; to the Committee on Finance.

By Mr. BENTSEN (for himself and Mr. WALLOP):

S. 957. A bill to amend the Internal Revenue Code of 1954 to impose an excise tax on manufacturers and producers of tangible personal property, to transfer the proceeds of such tax to the Hazardous Substance Response Trust Fund, and for other purposes; to the Committee on Finance.

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. STEVENS):

S. 958. A bill to provide authorization of appropriations for activities under the Magnuson Fishery Conservation and Management Act; to the Committee on Commerce, Science, and Transportation.

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, and Mr. HOLLINGS):

S. 959. A bill to amend the Coastal Zone Management Act of 1972 to provide authorization of appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BYRD (for himself, Mr. MOYNIHAN, Mr. RIEGLE, Mr. CRANSTON, Mr. BURDICK, Mr. FORD, Mr. GORE, Mr. KENNEDY, Mr. KERRY, Mr. METZENBAUM, Mr. SARBANES, and Mr. LAUTENBERG):

S.J. Res. 116. Joint resolution to assure the cost-of-living adjustments for Social Security recipients; read the first time.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BYRD (for himself, Mr. MOYNIHAN, Mr. RIEGLE, and Mr. CRANSTON):

S. Res. 134. Resolution to assure the Cost-of-Living Adjustments for Social Security recipients; submitted and read the first time.

By Mr. HEINZ (for Mr. GARN):

S. Res. 135. An original resolution authorizing expenditures by the Committee on Banking, Housing, and Urban Affairs; from the Committee on Banking, Housing, and Urban Affairs; to the Committee on Rules and Administration.

By Mr. SIMPSON (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 136. Resolution to direct the Senate Legal Counsel to intervene in "In re WHET, Inc., et al."; considered and agreed to.

By Mrs. HAWKINS:

S. Res. 137. Resolution expressing the sense of the Senate with respect to the cost-of-living adjustments under title II of the Social Security Act; to the Committee on Finance.

By Mr. HATFIELD:

S. Res. 138. An original resolution authorizing expenditures by the Committee on Appropriations; from the Committee on Appropriations; to the Committee on Rules and Administration.

By Mr. BAUCUS (for himself, Mr. ARMSTRONG, Mr. WEICKER, Mr. BUMPERS, and Mr. HEINZ):

S. Con. Res. 41. Concurrent resolution expressing the sense of the Congress that corporate income tax rates should remain graduated; to the Committee on Finance.

By Mr. CRANSTON (for himself, Mr. METZENBAUM, and Mr. KENNEDY):

S. Con. Res. 42. Concurrent resolution urging the President to cancel the Bitburg visit; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HELMS:

S. 943. A bill to amend title II of the Social Security Act to provide that additional years spent in child care may be dropped out in computing benefit amounts; to the Committee on Finance.

RESTORING SOCIAL SECURITY EQUITY TO WORKING PARENTS

Mr. HELMS. Mr. President, I am today introducing legislation to eliminate the penalty the Social Security system imposes on working parents who leave the work force to care for a child during the child's preschool years.

Present laws allows a worker to deduct the 5 lowest years of income when calculating Social Security benefits. That is it. Consequently, a parent, usually a mother, who leaves the work force or reduces his or her working hours to care for a preschool child must "bite the bullet" when the time comes to calculate his or her Social Security benefits. Parents are not permitted to deduct years spent in caring for a child and must assume the monetary loss in Social Security benefits. In effect, the Government is discouraging rather than encouraging parents to take care of their own children.

Mr. President, not only does penalizing mothers and fathers for taking care of their own preschool children offend our societal tradition, it also affronts the principles of democracy. A democratic society should promote the family. Throughout history, proponents of democratic government have acknowledged that the fate of self-governed people rests upon their virtue, self-discipline, and morality. The family is primarily responsible for instilling these qualities, so without strong families, democracy erodes.

Unfortunately, our Nation has not heeded the counsel of these political philosophers. In today's society, where the divorce rate ranks one of the highest in the world, marriage is often portrayed as an institution of convenience and children are often viewed as a drudgery and a burden. The family, once looked upon as the cornerstone of individual freedom, has come to be viewed by many as an inconvenience.

Mr. President, we must adjust our laws to encourage strong families. My bill is a first step. This legislation would give a parent the opportunity to exclude from the calculation of his or her Social Security benefits each year spent at home with a child as long as the child is younger than 6 years old. Up to 6 years could be excluded in addition to every worker's already guaranteed low 5-year exemption. During the years excluded, the parent could earn up to one-half the average wage of all Social Security covered workers each year.

Mr. President, I ask unanimous consent that my bill, along with a section-by-section explanation of its provisions, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 943

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 215(b)(2)(A) of the Social Security Act is amended—

(1) by striking out "The number" and inserting in lieu thereof "Except as otherwise provided in paragraph (5), the number"; and

(2) by striking out the third sentence.

(b) Section 215(b)(2)(B)(i) of such Act is amended by inserting ", except as otherwise provided in paragraph (5)," after "the term 'benefit computation years' means".

(c) Section 215(b) of such Act is amended by adding at the end thereof the following new paragraph:

"(5)(A) An individual's benefit computation years shall be determined under this paragraph, rather than under paragraph (2), if such individual has child care years (as defined in subparagraph (B)), and such individual's primary insurance amount determined on the basis of paragraph is greater than if determined on the basis of paragraph (2).

"(B) For purposes of this paragraph, the term 'child care year' means, with respect to any individual, a computation base year in which—

"(i) such individual is living with a child (of such individual or such individual's spouse) under the age of six, substantially throughout the portion of such year during which such child is alive and under the age of six; and

"(ii) such individual's earnings do not exceed an amount equal to 50 percent of the 'SSA average wage index' (as defined in subsection (i)(1)(G)) for such calendar year.

"(C) The alternative benefit computation years under this paragraph shall be determined as follows:

"(i) From the individual's benefit computation years as otherwise determined under paragraph (2), child care years shall be excluded, in reverse order of earnings starting with the lowest earnings year, up to a maximum exclusion such that the total number of years excluded under this clause and clause (ii), when combined with the number of years determined under clause (i) or (ii) of paragraph (2)(A), whichever applies, will not exceed eleven years.

"(ii) If, following in such reverse order, any child care year which would be excluded under clause (i) has already been excluded in the calculation under paragraph (2)(B)(i) or has already been excluded under this clause, then, for each such child care year, an additional year not already excluded under clause (i), this clause, or paragaph (2)(B)(i) shall be excluded. Such additional year shall be the remaining computation base year in which such individual's earnings are the lowest.

"(iii) Any year shall be excluded under clause (i) or (ii) only to the extent that such exclusion results in a higher primary insurance amount than would be the case if such year were not excluded.

"(iv) The number of an individual's alternative benefit computation years as determined under this paragraph shall in no case be less than two, and shall be the two computation base years in which such individual's earnings were the highest.

"(D) For purposes of this paragraph, an individual's earnings for a year are the total of such individual's wages and self-employment income for such year, after adjustment under paragraph (3).".

SEC. 2. The amendments made by this Act shall apply only with respect to individuals who initially become eligible for old-age or disability insurance benefits, or who die before becoming eligible for such benefits, after December 31, 1985.

SECTION-BY-SECTION EXPLANATION

Section (a) sets forth technical changes to the Social Security Act Section 215(b)(2)(A).

Section (b) sets forth technical changes to Section 215(b)(2)(B)(i).

Section (c) amends Section 215(b) of the Social Security Act adding a provision to allow a parent to compute Social Security benefits by dropping child care years if using the child care years will yield a higher benefit than without it.

Section 215(b) of the Social Security Act is also amended by adding a provision defining child care years as a year in which an individual is living with a child substantially throughout the portion of such year during which such child is alive and under the age of six.

"Substantially throughout the portion of such year" is defined in 20 C.F.R. 404.211 as 9 months of the year.

The parent may earn up to 50% of the SSA average wage index for such calendar year.

Section 215(b)(2)(B)(i) is also amended by adding Section (c) setting forth the method of obtaining the benefits if the child care drop years are used. Section (2)(i) states lowest income years will be excluded first and up to six years can be excluded, but under no circumstances can more than 11 years be excluded.

Section (C)(ii) states if the child care years have already been excluded as part of the 5 lowest years of income, then the individual can drop additional years spent in childcare.

Section (C)(iii) states it does not have to drop child care years if the primary insurance amount is higher with the inclusion of child care years.

Section (C)(iv) states that the number of years on which to base the individual's benefit years shall not be less than 2 and shall be the 2 years in which the individual's earnings were the highest.

Section (C)(v) states that earnings for a year is the total of wages and self-employment income under paragraph 3.

Section (2) states that the provisions of this bill shall apply only to individuals who become eligible for old-age or disability insurance benefits after December 31, 1985 or who die before becoming eligible for such benefits after December 31, 1985.

By Mr. HELMS:

S. 944. A bill to amend title II of the Social Security Act to restrict the payment of benefits to certain aliens; to the Committee on Finance.

RESTRICTION OF SOCIAL SECURITY BENEFITS TO CERTAIN ALIENS

Mr. HELMS. Mr. President, I am today introducing legislation to halt the flow of hundreds of millions of dollars being paid each year in Social Security payments to illegal aliens and to those individuals living outside the United States who are not citizens or U.S. nationals.

Exactly how much money is being paid to these two classes of beneficiaries has never been determined. With respect to payments to overseas recipients, the General Accounting Office estimates that the Social Security Administration sends over $1 billion in benefits abroad annually, with more than two-thirds of this amount going to individuals who are not citizens or nationals. The GAO has no idea how much the Social Security Administration pays to illegal aliens.

Mr. President, Congress has made numerous attempts to amend the Social Security Act to restrict payments to non-U.S. citizens living abroad. There are so many exceptions, however, that these provisions have had scant effect on limiting Social Security payments. As recently as 1983, legislation was introduced in Congress to reduce or eliminate Social Security moneys going abroad to aliens. Unfortunately, the only legislation which became law limited the benefits payable to the alien survivor. Illegal aliens residing in this country and non-U.S. citizens workers abroad are still collecting their monthly check from Social Security.

Mr. President, I have spoken on numerous occasions about our problem-riddled Social Security System. In 1937, 16 workers supported each recipient. Today three workers support each recipient. Consequently, to pay for the benefits, 51 percent of the workers in this country pay more in Social Security tax than they do in Federal income tax. But Mr. President, despite this growing tax burden on our Nation's young workers, we continue to send hundreds of millions of dollars abroad.

Mr. President, this foreign aid entitlement program must be stopped. The bill I am introducing would limit the amount these recipients and their survivors could receive in Social Security payments. Under the legislation a worker who is not a U.S. citizen or a U.S. national and who is working illegally in the United States or who was legally here but has been gone from the United States for 6 consecutive months could recover from Social Security only the amount he or she contributed to the system, plus interest. If at the time of enactment of this legislation the illegal alien has recovered the amount he contributed to the system, then he shall not be entitled to any future payments. For the worker who was legally here but now living abroad, if he remains out of this country for 6 months from the date of enactment of this legislation and has recovered the amount of money he paid into the system, he will not be entitled to future payments. Benefits to survivors of the illegal alien or nonresident worker would be limited as well. They could only recover the amount the worker contributed to the system, plus interest.

Mr. President, elected officials of this country must act now to revive our faltering Social Security system. Enactment of this legislation would be a first step in this direction.

Mr. President, I ask unanimous consent that the bill, along with a section-by-section explanation, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 944

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 202(t)(1) of the Social Security Act is amended to read as follows:

"(1)(A) Notwithstanding any other provision of this title, benefits payable to an individual under this section or section 223 on the basis of his or her own wages and self-employment income shall be subject to the limitations set forth in subparagraph (C) if the individual—

"(i) is not a citizen or national of the United States, and

"(ii)(I) has not been lawfully admitted to the United States for permanent residence; or

"(II) has been lawfully admitted to the United States for permanent residence and has been outside the United States for a period of more than six consecutive calendar months while entitled to benefits under this section or section 223 on the basis of such wages and self-employment income.

"(B) Nothwithstanding any other provision of this title, any other benefits payable on the basis of the wages and self-employment income of an individual to whom subparagraph (A) applies shall be subject to the limitations set forth in subparagraph (C).

"(C)(i) The total amount of benefits paid under this section or section 223 on the basis of the wages and self-employment income of an individual to whom subparagraph (A) applies may not exceed the sum of—

"(I) the total amount of taxes paid under sections 3101(a) and 1401(a) of the Internal Revenue Code of 1954 (and corresponding provisions of prior law) with respect to such wages and self-employment income; and

"(II) the interest accrued on such taxes (as determined under regulations promulgated by the Secretary of the Treasury).

After benefits equalling the sum of such taxes and interest have been paid, no individual shall be entitled to benefits on the basis of the same wages and self-employment income.

"(ii) For purposes of clause (i), benefits paid under this section or section 223 on the basis of the wages and self-employment income of an individual to whom subparagraph (A) applies shall be taken into account without regard to whether such benefits were paid before, on, or after the date of the enactment of this paragaph.

"(D) The limitations set forth in subparagraph (C) shall not cease to apply to benefits payable on the basis of the wages and self-employment income of an individual to whom subparagraph (A) applies by reason of clauses (i) and (ii)(II) thereof solely because such individual returns to the United States.

"(E) The application of subparagraph (A) to an individual by reason of clauses (i) and (ii)(II) thereof shall not preclude the payment of benefits to such individual under this section or 223 on the basis of wages and self-employment income of such individual other than the wages and self-employment income on the basis of which the individual was entitled to benefits at the time the individual was outside the United States for more than six consecutive calendar months.

"(F) For purposes of this paragraph, an individual shall be considered to have been outside the United States for any calendar month if the Secretary, on the basis of information furnished by the Attorney General or information that otherwise comes to the attention of the Secretary, determines that such individual was outside the United States during all of such calendar month. In applying the preceding sentence, an individual who has been outside the United States for any period of 30 consecutive days shall be treated as remaining outside the United States until the individual has been in the United States for a period of 30 consecutive days.

"(G) For purposes of this paragraph, the term 'United States' (when used in either a geographical or political sense) means the States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.".

(b) Section 202(t)(4) of such Act is amended—

(1) by striking out "Subject to paragraph (11), paragraph (1)" and inserting in lieu thereof "Paragraph (1)";

(2) by striking out subparagraphs (A) and (B);

(3) by redesignating subparagraphs (C), (D), and (E) as subparagraphs (A), (B), and (C); and

(4) by striking out the semicolon at the end of subparagraph (C) (as so redesignated) and all that follows and inserting in lieu thereof a period.

(c)(1) Section 202(t) of such Act is further amended by striking out paragraphs (2), (3), and (11) and redesignating paragraphs (4) through (10) as paragraphs (2) through (8), respectively.

(2) Paragraph (4) of section 202(t) of such Act (as redesignated by paragraph (1) of this subsection) is amended by striking out "or (10)" and inserting in lieu thereof "or (8)".

(d) The heading of section 202(t) of such Act is amended to read as follows:

"RESTRICTIONS ON PAYMENT OF BENEFITS TO NONRESIDENT ALIENS"

(e) The amendments made by this Act shall apply with respect to months after the month in which this Act is enacted.

SECTION-BY-SECTION EXPLANATION

Section (a)(1)(A) denies Social Security benefits to any individual who is not a citizen or national of the United States and who has not been lawfully admitted to the United States for permanent residence or any individual who is not a citizen or national of the United States but has been out of the United States for six consecutive months or more.

Section (a)(1)(B)—(a)(1)(C)(i) The Social Security recipient who falls within (A) is allowed to recover only the amounts he contributed to the System under Sections 3101(a) and 1401(a) of the Internal Revenue Code plus interest. The recipient cannot recover employment contributions made on the alien's behalf.

The rate of interest to be paid is to be determined by the Secretary of the Treasury.

After this amount is paid, the alien cannot recover any additional amounts.

Section (a)(1)(C)(ii) requires that in computing the benefits paid, the Social Security System will compute benefits paid before and after the enactment of this legislation.

Section (a)(1)(D) provides that merely reentering the country will not negate the application of Section (1)(A).

Section (a)(1)(E) provides that a legal alien who falls within the provisions of this bill is not precluded from re-establishing a work record in this country and participating in Social Security. Additionally, application of Section (1) does not preclude an individual from being a survivor beneficiary of Social Security.

Section (a)(1)(F) states that the legal alien shall be considered outside the country for any calendar month if the alien is outside the country for every day during that month. Any alien who has been outside the country for thirty consecutive days will be treated as remaining outside the country until he remains in the United States for at least 30 days.

Section (a)(1)(G) states that United States means the States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands and any of the territory or possession of the United States.

Section (b) sets forth technical changes to the Social Security Act Section 202(t)(4).

Section (c) (1) & (2) sets forth technical changes to Social Security Act Section 202(t).

Section (d) sets forth technical changes to Social Security Act Section 202(t).

Section (e) states that the six month period in Section (a)(1) shall begin to run at the date of enactment of this legislation.

By Mr. THURMOND (for himself, Mr. DECONCINI, Mr. ABDNOR, Mr. MITCHELL, Mr. NICKLES, Mr. HOLLINGS, Mr. INOUYE, Mr. DOMENICI, Mr. HATCH, and Mr. COCHRAN):

S. 945. A bill to recognize the organization known as the National Association of State Directors of Veterans' Affairs, Incorporated; to the Committee on the Judiciary.

NATIONAL ASSOCIATION OF STATE DIRECTORS OF VETERANS' AFFAIRS, INCORPORATED

Mr. THURMOND. Mr. President, today, we are introducing legislation to grant a Federal charter to the National Association of State Directors of Veterans' Affairs, Inc. I am pleased to have the privilege of introducing this measure on behalf of myself and Senators DECONCINI, ABDNOR, MITCHELL, NICKLES, HOLLINGS, INOUYE, DOMENICI, HATCH, and COCHRAN.

Mr. President, many of our colleagues may already be familiar with the work of this fine organization. The National Association of State Directors of Veterans' Affairs is a nonprofit service organization comprised of professionals dedicated to assisting veterans and their families without regard to affiliation with any special interest veterans group. The association has a distinguished record of concern for

the welfare of all veterans—regardless of the length or branch of service, their background, or their experience in the armed services.

The National Association of State Directors of Veterans' Affairs had its inception in early 1945 at a conference of State representatives sponsored by the U.S. Army Air Corps. The organization was founded the following year at the behest of Gen. Graves B. Erskine, then Administrator of the Federal Retraining and Reemployment Administration. Its primary purpose was to encourage each State to provide services to veterans returning from World War II. At the 1946 organizational conference, held in Washington, DC, the association adopted the following declaration of purpose:

The purposes of the Association are to provide a medium for the exchange of ideas and information; to facilitate reciprocal State Services; to foster better understanding of the national veterans' problems; to secure uniformity and equality of service in all the States and the Territories; to maintain an interest in all veterans' legislation.

The Association recognizes the great worth and merit of all existing congressionally chartered veterans organizations, and asserts a willingness to cooperate with such organizations. It further declares a deep and abiding organizational affiliation or the lack of it.

The National Association of State Directors of Veterans Affairs was incorporated in the District of Columbia on March 12, 1973. It is the only organization representing the veterans affairs agencies of the various States. The functions of the association are: To advise veterans of available benefits and services; to coordinate the activities and purposes of the various State and territorial agencies affecting veterans; to serve as liaison between the Governors and concerned officials on the Federal level; and to maintain contact with all branches of the armed services. The association operates wholly for charitable, educational, historical, patriotic, and research purposes.

The national scope of the association is clear from its membership, which currently consists of representatives from 48 States, 4 territories, and the District of Columbia. In addition to its other services, the association coordinates the efforts and policies of the State and territorial veterans affairs agencies in order to ensure the fair and equitable treatment of veterans throughout our country. It performs the vital role of liaison between the Federal structure of veterans' services and entitlements and the various State structures of resources devoted to serving the Nation's veterans and their families.

The National Association of State Directors of Veterans Affairs has unselfishly served the needs of veterans for 39 years, and epitomizes the commitment to purpose which has made our Nation great. A Federal charter will express the recognition of Congress of the efforts of the association on behalf of countless veterans and their families. I call upon my colleagues to support this legislation and urge early enactment of this bill.

By Mr. FORD:

S. 946. A bill to amend the Federal Coal Leasing Amendments Act of 1976, and for other purposes; to the Committee on Energy and Natural Resources.

FEDERAL COMPETITIVE COAL LEASING AMENDMENTS ACT

Mr. FORD. Mr. President, today I am introducing legislation which will encourage U.S. companies to develop Federal coal reserves already under lease.

Coal is our Nation's most abundant mineral resource, yet the United States continues to import coal from foreign sources. South American countries such as Colombia are gradually capturing a substantial share of our domestic coal market, and of the world export market as well. The east and gulf coasts of the United States are particularly vulnerable to the attractions of cheap, high quality South American coal because of the alternative—unaffordable domestic coal, expensive because of the high costs of rail transportation.

In recent months, much of the public debate about the development of our domestic coal reserves has centered around the issue of section 3 of the Federal Coal Leasing Amendments Act of 1976. This provision of law prohibits the Secretary of the Interior from issuing additional mineral leases (notably coal, oil, and gas) under the Mineral Lands Leasing Act of 1920 to a lessee who holds a lease issued prior to August 4, 1976, and has held such lease for 10 years without producing coal from the lease in commercial quantities. This critical deadline for development is less than 16 months away.

Mineral companies have argued that this production deadline is unreasonable. They claim that it has been difficult to develop leases because of a slack coal market. Although many in Congress may believe that section 3 should be modified, the question is to what extent. To date, several measures have been introduced that would amend in varying degrees this provision.

I, myself, am inclined to believe that changes to section 3 are in order. However, my enthusiasm is tempered by the fact that while our domestic coal remains undeveloped, a number of U.S. companies are engaged in joint ventures overseas to produce and export foreign coal. It is ironic that a large share of this coal is then imported into the United States, displacing domestically produced coal.

My bill responds to this disturbing balance-of-trade situation. It would prohibit the Secretary from issuing a competitive coal lease, under the terms of section 3, to any corporation or similar entity that is a subsidiary of, affiliated with, or controlled by or under common control with a corporation engaged in the production and importation of foreign reserves into this country. In short, U.S. companies involved in such overseas ventures could not acquire additional mineral leases if they do not meet the 1986 production deadline.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 946

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be referred to as the "Federal Competitive Coal Leasing Amendments Act of 1985".

SEC. 2. Section 2(a) of the Mineral Lands Leasing Amendments Act of 1920 (30 U.S.C. 201(a)), as amended by section 3 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(a)) is further amended by redesignating the last sentence as (2)(A)(i) and adding a new sentence (2)(A)(ii) as follows:

"(2)(A)(ii) The Secretary shall not issue a competitive coal lease or leases under the terms of this section to any person, association, or corporation that is a subsidiary of, affiliated with, or controlled by or under common control with a person, association, or corporation engaged in the extraction or production of coal reserves in a foreign country, and the importation of such reserves into the United States."

By Mr. LUGAR (by request):

S. 947. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Relations.

OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1985

● Mr. LUGAR. Mr. President, by request, I introduce for appropriate reference a bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

This proposed legislation has been requested by OPIC and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis of the bill and the letter from the President of the Overseas

Private Investment Corporation to the President of the Senate dated April 3, 1985.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 947

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION. 1. This Act may be cited as the "Overseas Private Investment Corporation Amendments Act of 1985."

CREATION, PURPOSE AND POLICY

SEC. 2. Sec. 231 of the Foreign Assistance Act of 1961 is amended in the second undesignated paragraph as follows: by striking out "$680 or less in 1979 United States dollars" and inserting "$896 or less in 1983 United States dollars"; and by striking out "$2,950 or more in 1979 United States dollars" and inserting "$3,887 or more in 1983 United States dollars".

ORGANIZATION AND MANAGEMENT

SEC. 3. Section 233 of the Foreign Assistance Act of 1961 is amended in subsection (d) by striking out in the third sentence "twenty" and inserting "fifty".

INVESTMENT INSURANCE AND

SEC. 4. Section 234 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (a)(1), by striking out "and" after subparagraph (B); by inserting "and" after subparagraph (c); and by inserting the following new subparagraph (D): "(D) loss due to business interruption."

(2) in subsection (a)(4), by striking out "civil strife" wherever the same shall appear and inserting "business interruption"; and by striking out all after "analysis of the risk to be covered," and inserting "and an explanation of the underwriting basis upon which it is to be offered."

(3) in subsection (b), by striking out in the final proviso "10 per centum" and inserting "25 per centum"; and

(4) in subsection (f), by striking out before the period in subparagraph (2) the following: "on such terms and conditions as the Corporation may determine, notwithstanding the provisions of section 231 of this Act."

ISSUING AUTHORITY, DIRECT INVESTMENT FUND AND RESERVES

SEC. 5. Section 235 of the Foreign Assistance Act of 1961 is amended in subsection (a)(5) by striking out "September 30, 1985" and inserting "September 30, 1989".

GENERAL PROVISIONS RELATING TO INSURANCE AND GUARANTY PROGRAM

SEC. 6. Section 237 of the Foreign Assistance Act of 1961 is amended in the first sentence of subsection (f) by striking out the "and" preceding "(2)" and by striking out the period at the end thereof and inserting "and (3) compensation for loss due to business interruption may be computed on a basis to be determined by the Corporation reflecting amounts lost."

DEFINITIONS

SEC. 7. Section 238 of the Foreign Assistance Act of 1961 is amended in subsection (c) by striking out the "; and" in sub-subparagraph (2) and inserting the following at the end thereof: *"Provided however,* That the Board of Directors may determine that other United States entities may be eligible if United States citizens have significant trade, development or other economic interests therein; and"

GENERAL PROVISIONS AND POWERS

SEC. 8. Section 239 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (c), by adding the following at the end thereof:

"The Corporation may, when appropriate, retain a firm or firms of nationally recognized certified public accountants who shall prepare, in accordance with generally accepted accounting principles, and report an annual audit of the accounts of the Corporation including statements of the type required in section 9106 of Title 31. The General Accounting Office is authorized to conduct such audits of the accounts of the Corporation and to report upon the same to Congress, as the General Accounting Office shall deem necessary or as the Congress may request, but not less than every three years. All books, accounts, financial records, reports, files, papers, and property belonging to or in use by the Corporation shall be made available to the person or persons conducting the audit for verifying transactions"; and

(2) by adding the following new subsection (j):

"(j) The Corporation, including its franchise, capital, reserves, surplus, advances, intangible property, and its income, shall be exempt from all taxation at any time imposed by the United States, by any territory, dependency, or possession thereof, or by any state, county, municipality, or local taxing authority."

RETURN OF APPROPRIATED FUNDS

SEC. 9. Section 240B of the Foreign Assistance Act of 1961 is hereby struck out.

EMPLOYMENT OF PERSONNEL

SEC. 10. Section 625 of the Foreign Assistance Act of 1961 is amended in subsection (b) by striking out "one hundred and ten" in the first sentence and inserting "one hundred and forty".

ADDITIONAL PROVISIONS

SEC. 11.

1. Section 9(b) of the Overseas Private Investment Corporation Amendments Act of 1981 is hereby struck out; and

2. Section 709 of title 18 of the United States Code is amended by inserting the following:

"Whoever uses the words 'Overseas Private Investment', 'Overseas Private Investment Corporation', or 'OPIC', as part of the business or firm name of a person, corporation, partnership, business trust, association, or business entity; or".

OVERSEAS PRIVATE INVESTMENT CORPORATION,
Washington, DC, April 3, 1985.

Hon. GEORGE H. BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: I am transmitting today a bill to authorize a four-year extension of the investment insurance and guaranty programs operated by the Overseas Private Investment Corporation ("OPIC") and to make certain changes in its existing programs and policies. The Administration believes that OPIC has played an important role in advancing U.S. foreign economic development policies and that its programs can be of greater value in the future.

The Administration seeks amendments which would (1) permit OPIC to insure against losses resulting from business interruption, and (2) allow OPIC greater flexibility to assist investments which are extraordinarily developmental or beneficial to the U.S. economy. The bill also proposes certain other changes of lesser significance which will improve OPIC programs.

The Office of Management and Budget has advised that enactment of this proposal would be in accord with the program of the President.

Sincerely yours,

CRAIG A. NALEN.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1985

I. INTRODUCTION

The proposed Overseas Private Investment Corporation Amendments Act of 1985 (hereafter referred to as the Bill) amends the Foreign Assistance Act of 1961, as amended (hereafter referred to as the Act) in order to extend the authority of the Corporation to issue investment insurance and guaranties and to make certain changes in existing programs and policies.

II. PROVISIONS OF THE BILL

Section 1. Short Title

This paragraph provides that the Bill may be cited as the "Overseas Private Investment Corporation Amendments Act of 1985."

Section 2. Creation, Purpose and Policy

This paragraph amends section 231 of the Act, which creates the Corporation and sets forth the purpose and policy of the Corporation, by updating per capita income standards in 1983 United States dollars rather than in 1979 dollars.

Section 3. Organization and Management

This paragraph amends section 233 of the Act, which sets forth the organization and management of the Corporation, to increase the number of employees of the Corporation which may be appointed, compensated, or removed without regard to civil service laws and regulations from 20 to 50. This will allow the Corporation to more readily attract and retain employees from the private sector.

Section 4. Investment Insurance and Other Programs

This paragraph amends section 234 of the Act, which describes the programs the Corporation is authorized to operate, as follows:

(A) Subparagraph (1) extends the Corporation's authority to insure investments against business interruption. This authority will allow the Corporation to cover loss due to business interruption caused by the political occurrences it is already authorized to insure against, including political violence, expropriation, and currency blockage. This coverage could be a natural adjunct to the Corporation's existing political risk insurance authority and would only be available for new investments.

(B) Subparagraph (2) provides that the Corporation shall provide its authorizing committees a report with respect to the need for business interruption coverage, including an analysis of the risks to be covered, and an explanation of the underwriting basis upon which it is to be offered, at least sixty days prior to issuing such insurance for the first time (or any significant expansion of the type of risks to be insured).

(C) Subparagraph (3) allows the Corporation greater flexibility in identifying guaranteed lenders. The present limitation on guaranties issued to one financial institution is being approached in the case of key lenders who have long participated in the Corporation's loan guaranty program and

whose continued presence is important for the Corporation to retain. These lenders are sources of project funds and have assisted the Corporation in the past in designing effective means of utilizing the Corporation's authority.

(D) Subparagraph (4) permits the Corporation to enter into reinsurance arrangements with its counterpart organizations in other countries or with multinational entities. This would provide the Corporation with a means of achieving improved risk management and portfolio management and to foster a closer relationship with such organizations seeking to expand the scope of their activities.

Section 5. Issuing Authority, Direct Investment Fund and Reserves

This paragraph amends section 235 of the Act, which sets forth the issuing authority of the Corporation, to extend the authority of the Corporation to issue investment insurance and guaranties until September 30, 1989.

Section 6. General Provision Relating to Insurance and Guaranty Program

This paragraph amends section 237 of the Act, which describes general provisions relating to the insurance and guaranty programs, to reflect that compensation for loss due to business interruption need not be limited to the sum of the amount of the investment and attributable earnings. This authority would be used only after completion of the study to be undertaken under Section 4.

Section 7. General Provisions and Powers

This paragraph amends section 238 of the Act, which defines certain phrases. In particular, it modifies section 238(c)(2) providing for the eligibility of certain U.S. entities. As before, the eligibility requirement shall, as a rule, be read to require that at least 50 percent of each class of issued and outstanding stock be held beneficially by U.S. citizens. However, the Board of Directors may determine, in extraordinary cases, on a case-by-case basis, that an enterprise in which U.S. ownership is less than 50% shall be eligible for programs of the Corporation where there is a showing that significant developmental or U.S. economic benefits would flow from the investment to be assisted. This modification would allow the Corporation to assist projects which might generate or maintain U.S. jobs or increase U.S. exports generated in connection with the investment for which assistance is sought.

Section 8. General Provisions and Powers

This paragraph amends section 239 of the Act, which describes the general provisions and powers of the Corporation, as follows:

(A) Subparagraph (1) adds a new provision allowing the Corporation, if appropriate, to retain the audit services of private accounting firms. Appropriateness will be determined on the basis of a study of cost effectiveness under OMB Circular A-76.

(B) Subparagraph (2) sets forth the well-established principle that U.S. government agencies, such as the Corporation, are always exempt from all taxation by any and all jurisdictions.

Section 9. Return of Appropriated Funds

This paragraph deletes section 240B of the Act, which provides for the return of appropriated funds to the Treasury, as such requirement has been satisfied.

Section 10. Employment of Personnel

This paragraph is a technical change reflecting the amendment to section 233 of the Act.

Section 11. Additional Provisions

(A) Subparagraph (1) removes the requirement that the Corporation submit a report to the Congress, no later than June 30, 1982, on the methods for estimating the probability that particular investments or types of investments will or will not be made if insurance or other support by the Corporation is not provided since such requirement has been satisfied.

(B) Subparagraph (2) makes it a crime to appropriate the name of the Corporation for non-governmental purposes.●

By Mr. HEINZ (for himself, Mr. CHAFEE, Mr. HOLLINGS, Mr. SPECTER, Mr. MATSUNAGA, and Mr. BURDICK):

S. 950. A bill to amend the Communications Act of 1934 to promote fairness in telecommunications policy by providing for lifeline telephone service; to the Committee on Commerce, Science, and Transportation.

LIFELINE TELEPHONE SERVICE ACT

● Mr. HEINZ. Mr. President, a recent study suggests that over a million low-income people will go without telephone service by midyear because of spiraling residential rates. Today Senator CHAFEE and I, along with Senator HOLLINGS, ranking minority member of the Committee on Commerce, Science, and Transportation, and Senators SPECTER, MATSUNAGA, and BURDICK, are introducing the Lifeline Telephone Assistance Act of 1985, to provide for lifeline telephone service in order to assure that significant rate increases do not force many Americans to discontinue their telephone service. This legislation is necessary to reaffirm our commitment to the concept of universal service and to promote the public policy that the elderly, physically disabled, unemployed, very poor and other disadvantaged people not be denied access to a critical communication link that could mean the difference between life and death.

I am pleased to state that Congressman LELAND, a member of the House Energy and Commerce Committee, Subcommittee on Telecommunications, Consumer Protection and Finance, introduced a similar bill in the House in January. Representative LELAND has long been dedicated to the provision of telephone service for all Americans.

The problem that my legislation addresses is the precipitous increase in telephone rates caused by the introduction and expansion of competition in the telephone industry and the modification of Federal regulatory policies. As deregulation has come to a head in the past 3 years, local phone companies have asked for an unprecedented $10.9 billion in local rate hikes and have received $5.1 billion of that. Customers are now being billed separately for numerous services, such as a call to information. Increased telephone installation costs have imposed a greater financial burden on those that are acquiring or altering telephone service. Consumers are overwhelmed by changes in the industry and are bewildered as they confront a host of complex and costly options. In short, consumers are seeing their bills go up dramatically and there is mounting concern, especially among the poor and disadvantaged, about their ability to keep basic telephone service.

As chairman of the Special Committee on Aging, I am concerned about the effect of increased telephone rates on older Americans' access to telephone service. Older persons are more dependent on the telephone than perhaps any other segment of our society. For those with limited mobility or illness, and homebound, the telephone may provide their only contact with the outside world.

The elderly are particularly vulnerable to increases in telephone rates because so many live on low or fixed incomes. A survey completed in December 1984 for the American Association of Retired Persons found that older consumers are being hurt by the AT&T breakup. The survey of 1,504 persons age 55 and older found that more than 1 in 5 older Americans say they have had to curtail their use of the telephone because of higher costs. Among those who have incomes of less than $8,000 a year, 35 percent report having to cut down on their phone use. At the same time, more than two-thirds of those surveyed said that phone service was more important to them now than ever before and 38 percent reported using the phone more now than they did 10 to 15 years ago. Three-quarters of all older persons have seen the local phone service rates increase during the past year, with one-third reporting increases of $6 or more per month. Only 10 percent reported that their long-distance phone bills have gone down at all during the past year. More than two-thirds claim that it is now more confusing to make decisions about telephone service than it was a year ago. Only 5 percent of the older population has taken advantage of the opportunity to switch long-distance phone companies.

Older persons, of course, are not the only people threatened. The Consumer Federation of America released a study in December 1984 shows that 1.2 million low-income people will go without a phone by mid-1985 unless their local rates are reduced.

While experts may disagree as to the number of persons who will be forced to disconnect their phones with each dollar increase, we do know that increasing rates have a more pronounced effect on low than on high income households. Disconnects are disproportionate—they affect certain groups, such as the poor elderly, harsher than others. Yet the value of telephone

service increases as the number of subscribers on the network increases. For the health and safety of millions of Americans, and for the benefit of society as a whole, we must work to keep people from falling off the phone network.

The most feasible way we can maintain phone service for low-income households is to provide lifeline service and rates. That is the purpose of my bill. The legislation defines lifeline telephone service as basic telephone service, including telephone connection and a limited number of calls in the local exchange area. It is available only to the principal residence of an individual.

State public utility commissions would establish, at their option, special discounted rates for telephone service for low-income residential customers. The States will determine who is eligible for the service, but must take into consideration the needs of the elderly, the handicapped, single heads of households and the unemployed. All qualified local telephone companies that provide lifeline telephone service would be eligible for payments from a lifeline service fund to defray the cost of the service. The fund would derive moneys from a surcharge on interstate long-distance telephone service.

In addition to the local rate hikes we have already witnessed, consumers are in for another surprise on their telephone bills. In December 1984, the Federal Communications Commission approved $1 per month charge, called an access charge, for residential customers beginning in June of 1985 and to be increased to $2 in June of 1986. This access charge will have to be paid each month by the subscriber whether or not he or she ever picks up the receiver to make a long-distance call.

It should be noted that the FCC also addressed the harm to universal service that could result by adopting a Federal-State board recommendation to offset the effect of the access charge on low income subscribers and by directing the board to begin studying further lifeline assistance measures by the end of March. Some will say, therefore, that this legislation is premature. I am not convinced, however, that the FCC measures are enough. While the $1 a month charge may allow long distance rate cuts, the cuts will only benefit heavy users of long distance services and some residential customers may not benefit at all. Most residences make less than $10 a month in long distance calls and their savings from an expected 5 percent cut in long distance rates would be only 50 cents—less than the extra dollar they will have to pay beginning in June. An analysis by the Michigan Public Service Commission shows that almost two-thirds of one-party senior citizen telephone customers make less than $5 of long distance calls in any 1-month period. The 1984 AARP survey also shows that only about half of all low-income elderly persons make more than one long-distance call a month.

While there is no cap placed on the lifetime service fund, we will look at this issue closely and will seriously consider such a measure if it appears necessary to protect against uncontrolled costs. What we cannot afford to do is to wait and see how many people are left without telephone service when we have the ability to prevent such a consequence now.

Let me add that I have no doubt that many Americans will benefit from the introduction of new services brought about by competition in the telecommunications industry—services like home banking and shopping. But they will only benefit from it if they can afford to pay the costs of basic telephone service from which the glorified services emanate. In the meantime, this bill will help to ease the painful passage to a new era of telecommunications.

Mr. President. I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 950

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Lifeline Telephone Service Act of 1985".

STATEMENT OF PURPOSE

SEC. 2. The purpose of this Act is to provide for lifeline telephone service in order to assure that significant rate increases do not threaten universal service by forcing many Americans, especially the poor, the elderly, and the handicapped, to discontinue their telephone service.

LIFELINE TELEPHONE SERVICE

SEC. 3. Title II of the Communications Act of 1934 is amended by adding at the end thereof the following:

"LIFELINE TELEPHONE SERVICE

"SEC. 225. (a)(1) To assure that, to the maximum extent possible, all the people of the United States have continued availability of telephone service at reasonable and affordable charges, there is hereby established the Lifeline Service Fund (hereafter in this section referred to as the 'fund'). On an annual basis, the Commission shall determine uniform surcharges on the charges for interstate telephone toll service, such that the fund is sufficient beginning January 1, 1986, to make the payments under this subsection.

"(2) An exchange common carrier is entitled to receive payments from the fund for periods after December 31, 1985, if it certifies to the Commission that—

"(A) it is offering lifeline telephone service consistent with the provisions of subsection (b); and

"(B) that the payments will be used in a manner which assures that the charges for lifetime telephone service are reasonable.

"(3) The amount of the payments under paragraph (2) in the case of any exchange carrier shall be equal to 50 percent of—

"(A) the amount by which—

"(i) the carrier's average charges per residential customer for providing telephone exchange service (other than lifeline telephone service) exceeds

"(ii) the charge then in effect for lifeline telephone service, multiplied by

"(B) the number of subscribers certified by the carrier to be receiving lifeline telephone service.

"(b)(1) Not later than January 1, 1986, any State commission desiring to participate in the provision of lifeline telephone service pursuant to this section shall establish rules for the provision of such service by exchange carriers. Such rules shall provide that—

"(A) lifeline service may only be provided for the principal residence of a household;

"(B) a household may not have more than one lifeline telephone service line; and

"(C) any household receiving such service may not receive any other exchange telephone service.

"(2) Any charge for lifeline telephone service shall not be based on time of day of any local call placed, or the duration or distance of such call.

"(c)(1) For purposes of this section, the term 'lifeline telephone service' means telephone service including, telephone service connection, for any residential subscriber which is offered for a single, discounted charge and under which a subscriber can make a limited number of calls within the exchange area in which such service is offered.

"(2) A State commission may restrict eligibility for such service on the basis of low-income criteria prescribed by the State commission. In establishing such criteria, the State commission shall take into account the composition of the low-income population of the State, and specifically consider the needs of the elderly, single heads of households, the unemployed, and the disabled.

"(d) For purposes of this section, the terms 'exchange carrier' and 'exchange common carrier' mean a carrier authorized to provide telephone exchange service on a universal basis within an exchange area.".

EFFECTIVE DATE

SEC. 4. Except to the extent expressly provided therein, the amendment made by section 3 shall take effect on the date of the enactment of this Act.●

● Mr. CHAFEE. Mr. President, I am pleased to join my distinguished colleague, Senator HEINZ, in sponsoring the Lifeline Telephone Services Act of 1985. This act assures universal availability and affordability of telephone service: a goal the United States has held since the passage of the Federal Communications Act of 1934.

Our commitment to universal service has been well achieved. In my home State of Rhode Island, for example, over 95 percent of all households have telephone service. However, the forces of technological change, divestiture, and deregulation in the telecommunications industry threaten what every American takes for granted: affordable and universally available telephone service.

According to the Consumer Federation of America, local phone service rates have increased 19 percent since the court ordered breakup of AT&T. Installation charges have increased 26 percent. Considerable speculation exists concerning the future acceleration of phone rates. Some predict that phone rates may double or triple by the end of the decade. What is clear, however, is that rate increases will cause a reduction in the number of persons able to afford a telephone. We are facing the prospect of the erosion of universal service, especially for the poor, the elderly, and the handicapped, for whom telephone service is no longer a luxury but a necessity.

The Consumer Federation of America, in its report entitled "Divestiture: One Year Later," estimates that 1.2 million low-income people will be without phone service by mid-1985 unless local rates are reduced. According to a survey by the American Association of Retired Persons, 20 percent of older Americans have had to curtail their use of the telephone due to higher costs. For elderly persons with incomes below $8,000, the rate is 35 percent. The findings of these surveys point to the increasing need for a lifeline telephone service.

For senior citizens, the economically disadvantaged, and the handicapped, telephone service can provide independence, security, and a needed social outlet. Depriving these individuals of telephone service will isolate them from family, friends, doctors, community involvement, and emergency assistance. The AARP survey shows that more than two-thirds of the elderly citizens surveyed believe that phone service is more important to them than ever before. Are we to ignore their needs for independence, security, and a quality of life? Congress, along with the States, needs to address this issue before universal service is jeopardized.

The Lifeline Telephone Services Act of 1985 assures that rising telephone rates will not threaten universal telephone service for the poor, the elderly, the unemployed, and the handicapped. The bill permits States to establish special lifeline rates for low-income residential customers. Lifeline rates would include a discount installation charge and a discount basic service charge. The basic charge is intended to include a limited number of calls in the local exchange area, with an additional charge per call for extra calls.

The bill directs participating State regulatory commissions to establish the rates and eligibility criteria in accordance with local requirements for lifeline service. State commissions are directed to pay particular attention to those most in need of assistance: the elderly, the poor, the handicapped, and the unemployed.

All qualified telephone companies that provide lifeline telephone service are eligible for 50 percent funding from a national funding pool to defray the cost of the service. Using an existing phone subsidy mechanism, the cost, approximated at $400 million, could be met through a small surcharge on interstate long-distance telephone service. All interexchange carriers will be assessed equally based on interstate telephone toll revenues.

Many consumers will benefit from the increased competition caused by divestiture. We must also recognize that some subscribers will be adversely affected by the changes in the structure of the telecommunications industry. While long-distance toll rates will be declining, local monthly charges will increase. For example, residential customers will begin paying a $1 per month local subscriber line charge on June 1, 1985. These local rate increases may create hardships for low-income individuals. The lifeline Telephone Services Act establishes a mechanism enabling States to respond in the event that hardships result from rising local phone service rates. A similar mechanism, the Universal Service Fund, already exists to provide assistance to small companies with unusually high costs.

In today's society, access to a telephone is as much a necessity as food, shelter, clothing, and medical care. Escalating rates may place telephone service out of the reach of millions of low-income residential customers. Let us not deprive the elderly, the handicapped, the poor, and the unemployed of this vital link to the outside world. It's time for Congress to guarantee that all Americans have access to universal telephone service.

I urge my colleagues to join in supporting this important measure.●

By Mr. GORTON:

S. 951. A bill to amend the Fair Debt Collection Practices Act to provide that any attorney who collects debts on behalf of a client shall be subject to the provisions of such act; to the Committee on Banking, Housing, and Urban Affairs.

FAIR DEBT COLLECTION PRACTICES ACT AMENDMENTS

● Mr. GORTON. Mr. President, today I am introducing legislation to amend the Fair Debt Collection Practice Act. The purpose of my bill is to remove the statutory exemption that attorneys—and only attorneys—currently enjoy from that act.

The Fair Debt Collection Practices Act was enacted to protect consumers by curbing abusive practices by debt collectors. I can see no reason why such protection is any less necessary, simply because the debt collector happens to be an attorney or law firm. Indeed, I would hope that my own profession would provide a model for behavior in this area, but just in case it should not, we should have the protection of the act to fall back upon.

Mr. President, last year this provision was included in the omnibus banking bill which this body overwhelmingly adopted late in the session, but which did not pass the House. I intend to work to ensure that it is included in any similar bill this year.

Mr. President, I ask unanimous consent that a copy of this bill appear at this point in the RECORD.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

S. 951

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the last sentence of section 803(6) of the Fair Debt Collection Practices Act (15 U.S.C. 1692a(6)) is amended—

(1) by striking out clause (F) and redesignating clause (G) as clause (F); and

(2) in clause (E), by inserting "and" at the end thereof.

(b) The second sentence of section 803(6) of the Fair Debt Collection Practices Act (15 U.S.C. 1962a(6)) is amended by striking out "clause (G)" and inserting in lieu thereof "clause (F)".●

By Mr. EVANS (for himself and Mr. GORTON):

S. 953. A bill to validate contractual relationships between the United States and various non-Federal entities; to the Committee on Energy and Natural Resources.

REGARDING CONTRACTUAL RELATIONSHIPS WITH NON-FEDERAL ENTITIES

● Mr. EVANS. Mr. President, I rise to introduce a bill relating to the imposition of a charge by the Federal Energy Regulatory Commission for benefits derived from Federal dams and other structures by non-Federal entities. The bill would exempt from the charge entities with a contract guaranteeing they receive all income from power sales at certain Federal irrigation facilities.

The bill provides that no annual charge be assessed where an entity has a contract with the United States guaranteeing the revenue from power facilities at Federal installations. Those contracts provide that a licensee may build and own powerplants utilizing irrigation facilities constructed by the United States. The contracts further provide that all revenues from such powerplants and from the use, sale, or the disposal of power therefrom shall be and remain the property of the licensee. Where such a contract exists, the bill would provide an exemption from the annual charge levied pursuant to section 10(e) of the Federal Power Act. Only two such contracts, involving the Columbia Basin Project, Washington, and the Salt River Project, Arizona, were identified

by the administration during hearings in the 98th Congress on the issue.

Mr. President, this bill is identical to a provision in S. 1132, a bill passed by the Senate during the 98th Congress. S. 1132 would have amended the Federal Power Act to specify annual charges for projects with licenses issued by the FERC for the use of Federal dams and other structures. The bill passed both Houses, but in a different form in each House. Differences on an unrelated issue, however, prevented the bill from becoming law.

Mr. President, I ask that my colleague and friend Senator GORTON be added as a cosponsor of this bill. I further ask unanimous consent that a copy of the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 953

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

The Federal Power Act (Act of June 10, 1920, 41 Stat. 1063, 16 U.S.C. 791a et seq., and Acts amendatory thereof and supplementary thereto) is amended in section 10(e) (16 U.S.C. 803(e)) by adding the following proviso at the end thereof:

"Provided further, That no charge shall be assessed in those cases where the United States has heretofore entered into a contract with a licensee which provides that the licensee may build and own power plants utilizing irrigation facilities constructed by the United States and which further provides that all revenues from such power plants and from the use, sale, or the disposal of power therefrom shall be and remain the property of the licensee.".●

By Mr. GORTON (for himself, Mr. MCCLURE and Mr. SYMMS):

S. 954. A bill to provide for additional protection of steelhead trout as a game fish, and for other purposes; to the Select Committee on Indian Affairs.

STEELHEAD TROUT PROTECTION ACT

● Mr. GORTON. Mr. President, today I am introducing legislation for myself and Senators MCCLURE and SYMMS, which would make steelhead trout a game fish. The basic purpose of this bill is to decommercialize the taking, possession, transportation, or sale of steelhead trout.

This bill carries out the mandate of the citizens of the State of Washington, as expressed in their approval of Washington Initiative 456 on November 6, 1984 by a vote of 916,855 to 807,825. Initiative 456 comprises a set of general policy statements regarding the management of Washington State's natural resources. Specifically, section 2 of the initiative provides: "The people of the State of Washington petition the U.S. Congress to immediately make steelhead trout a national game fish protected under the Black Bass Act." I believe strongly that as an elected official of the State of Washington, it is my obligation to respond to the policy expressed by the voters last November.

Steelhead is basically a sea-run form of the rainbow trout. Steelhead migrate to the ocean, where they feed for 1 to 4 years before returning to their parent streams to spawn. Most wild steelhead in Washington State spend 2 years in a stream, reaching a size of 6 to 8 inches, before making their journey to the ocean. After spending 2 years in the nutrient-rich marine environment, most steelhead return as 6 to 8 pound adults. A few fish may remain in the ocean for 3 or even 4 years, reaching adult sizes of over 30 pounds.

There are two major types of steelhead found in the State of Washington. Winter-run steelhead return to fresh water as adult fish from late fall through late spring, peaking in numbers in December and January. They inhabit most streams in western Washington which drain into Puget Sound or the Pacific Ocean. Summer-run steelhead usually enter fresh water as adult fish from early summer through early fall, although a few leave the ocean as early as February and may remain in the parent stream up to a full year before spawning. Summer-run steelhead are found in limited numbers in some Puget Sound and coastal rivers and in larger numbers in the Columbia River system.

Steelhead are the most highly prized and sought-after game fish in the Pacific Northwest. There are roughly 130,000 anglers who fish for steelhead in Washington State, and these fishermen spend, on average, more than $100 in pursuit of each steelhead that is caught, thereby making steelhead far more valuable as a sport fish than as a commercial fish.

In 1925 steelhead were classified as "game fish" by the Washington State Legislature, thus prohibiting their commercial catch in fresh water. In 1933, when the present Washington State Department of Game was formed, sportsmen and conservationists renewed their efforts to make steelhead a game fish in both fresh and salt water. The newly formed game commission agreed with the proposal, and prohibited the commercial taking or sale of steelhead in State waters.

For nearly half a century, the State of Washington treated steelhead trout exclusively as a game fish. In 1974, however, U.S. District Court Judge George Boldt delivered his landmark decision ruling that treaty tribes have a right to harvest half of the salmon and steelhead resources. This permitted treaty Indian fishermen commercially to fish for and sell steelhead trout in Washington State. In 1979, the U.S. Supreme Court upheld the *Boldt* decision in part and established the tribes' treaty-based right to take 50 percent of the fish or a sufficient number to provide them with a moderate standard of living.

The bill we are considering today would, first of all, decommercialize steelhead trout—that is, it would designate steelhead as a national game fish and make commercial interstate transportation illegal under Federal law. Second, the bill puts all fishermen in the State on an equal footing, making State laws and regulations governing the harvest, transportation, and sale of steelhead apply to treaty Indian fishermen, just as they do to everyone else.

I would like to point out that this legislation in no way affects the tribes' treaty rights to fish at their usual and accustomed places, nor their right to engage in the fishery. Furthermore, this bill provides the States with the flexibility to recognize unique or hardship situations that treaty tribes might encounter under the bill. It thus does not impinge on tribes' ceremonial or subsistence fishing for steelhead. This bill also does not touch on the tribes' right commercially to harvest the far more abundant salmon resource or alter their right to obtain a moderate standard of living from their treaty share of salmon.

Mr. President, our bill makes steelhead the national game fish that it should be, and makes it available to all Americans on an equal basis. I ask unanimous consent that a copy of the bill appear in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 954

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Steelhead Trout Protection Act".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) steelhead trout constitute a valuable and popular recreational fishery resource;

(2) the value of steelhead trout to the economy as a game fish is substantially greater than its value as a commercial fish;

(3) several States have designated steelhead trout as a game fish, have required that such fish be taken only with sport fishing equipment, and have prohibited the commercial harvest and sale of such fish;

(4) United States Federal court decisions affecting the Pacific Northwest, which have interpreted certain treaties with Indian tribes to allow Indian fishermen to harvest and market steelhead trout commercially, have had significant and adverse effects on sport fishing, on the economies of the affected States, and on the ability of the affected States to manage steelhead trout effectively and uniformly; and

(5) the right to license sportsmen to fish for steelhead trout on Indian lands may well be more valuable to Indian tribes than is a commercial fishery for steelhead trout.

(b) It is the purpose of this Act to decommercialize the taking, possession, transportation or sale of steelhead trout, in accordance with the desires of the citizens of the State of Washington, as expressed in the Statewide vote of approval of Washington State Initiative 456 on November 6, 1984.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "person" includes any individual, partnership, association, corporation, trust, or any officer, employee, agent, department, or instrumentality of the Federal Government or of any State or political subdivision thereof, or any other entity subject to the jurisdiction of the United States;

(2) "State" means any of the several States;

(3) "steelhead trout" means the anadromous rainbow trout species Salmo gairdneri, commonly known as steelhead;

(4) except for purposes of section 6, "taking" means capturing, killing, or collecting; and

(5) "transport" and "transportation" mean to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, conveyance, carriage, or shipment.

STEELHEAD DECOMMERCIALIZATION

SEC. 4. (a) Notwithstanding any Indian treaty or any decision by a court of the United States interpreting Indian tribal fishing rights, the laws and regulations of a State prohibiting, restricting, or regulating the taking, possession, transportation, or sale of steelhead trout shall apply to and be enforceable against Indians and Indian tribes fishing at places both within and without the boundaries of an Indian reservation in such State in the same manner and to the same extent as such laws and regulations apply to other persons.

(b) The authority provided a State by this section shall be in addition to any jurisdiction to enact and enforce fish and game laws held by that State on the date immediately preceding the date of enactment of this Act. Notwithstanding the provisions of sections 401 and 402 of the Act of April 11, 1968 (25 U.S.C. 1321 and 1322, respectively), tribal consent is not necessary for a State to assume jurisdiction under this section.

(c) To the extent necessary for the purposes of this section, the rights of Indian tribes and members of such tribes to take, possess, transport, or sell steelhead trout within or without the boundaries of an Indian reservation are terminated or modified.

ENFORCEMENT AUTHORITY

SEC. 5. (a) An Indian tribe may require any person fishing, or wishing to fish, for steelhead trout on the tribe's Indian trust land or in waters within the exterior boundaries of the tribe's reservation to obtain a license from and pay fees to such tribe. A tribe may prescribe such conditions for the issuance of such a license as it determines to be necessary and appropriate for the sound operation of such licensing system.

(b) Any requirements imposed under this section shall be in addition to applicable State license requirements, except that no State may require a member of an Indian tribe to obtain a license from, or pay fees to, the State in order to fish on the tribe's Indian trust land, in waters within the exterior boundaries of the tribe's reservation, or at usual and accustomed fishing grounds of such tribe.

(c) Except as provided in subsection (a) of this section an Indian tribe may not regulate the taking, possession, transportation, or sale of steelhead trout in a manner which is inconsistent with State law and regulations.

(d) It is unlawful for any person to violate any licensing requirement or condition that applies to such person which may be prescribed by an Indian tribe pursuant to subsection (a) of this section.

(e) The Secretary of the Interior shall enforce the provisions of subsection (d) of this section, except that enforcement personnel of an Indian tribe may—

(1) arrest any person, if there is reasonable cause to believe that such person has committed an act prohibited by the tribe pursuant to subsection (a) of this section;

(2) seize any fishing vessel or fishing gear which reasonably appears to have been used or employed in the violation of a requirement prescribed by the tribe pursuant to subsection (a) of this section;

(3) seize any fish taken or possessed in violation of a requirement prescribed by the tribe pursuant to subsection (a) of this section; and

(4) seize any other evidence related to any violation of any requirement prescribed by the tribe pursuant to subsection (a) of this section.

(f)(1) Any person who is found by the Secretary of the Interior, after notice and an opportunity for a hearing in accordance with section 554 of title 5, United States Code, to have committed an act prohibited by subsection (d) of this section shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed $1,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary, or the Secretary's designee, by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, history of prior offenses, ability to pay, and such other matters as justice may require.

(2) Any person against whom a civil penalty is assessed under paragraph (1) of this subsection may obtain review of such assessment in the appropriate court of the United States by filing a notice of appeal in such court within thirty days from the date of such order. Such person shall simultaneously send a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28, United States Code. The findings and order of the Secretary shall be set aside by such court only if they are not found to be supported by substantial evidence, as provided in section 706(2) of title 5, United States Code.

COMPENSATION

SEC. 6. The United States Claims Court shall have exclusive jurisdiction to receive, hear, determine, and render final judgment on all causes of action which seek compensation for an alleged taking of Indian treaty rights arising under or growing out of this Act. Such a claim must be filed in the United States Claims Court within three years of the date of enactment of this Act. Such a claim may be filed only by an affected Indian treaty tribe. In considering the value of such a claim for compensation, the United States Claims Court shall reduce the value of any right to a steelhead trout commercial fishery by the value of the right to license a steelhead trout sport fishery.●

● Mr. SYMMS. Mr. President, I'm proud to cosponsor S. 954 introduced by my distinguished colleague from the State of Washington, Senator SLADE GORTON. This bill provides additional protection for the steelhead trout by appropriately and justifiably classifying it as a game fish.

Technically, the steelhead is an anadromous rainbow trout. To complete its 4-year lifecycle, the steelhead must make a dangerous odyssey down the Columbia River system to the ocean, spend 2 years in the deep waters of the Pacific, then fight its way back upstream to spawn in its native waters.

How this magnificent fish finds its way home is one of the mysteries that science has not yet solved. However, a precious few do return. The rest are lost along the way; lost to predation, disease, deep sea fishing, and commercial and sport fishing.

Because of downstream obstacles, steelhead populations have declined dramatically. In order to ensure continued viable populations, sports fishing particularly in Idaho, has often been severely limited or eliminated to compensate for losses incurred primarily as a result of commercial fishing. We cannot continue to allow commercial harvest of a fish whose population has not been replacing itself. This is unfair to Idaho and especially to Idaho sportsmen.

The steelhead is very important to the people of Idaho and conversely, activities in Idaho are absolutely crucial to the survival of the steelhead. Biologists estimate that about half of the steelhead in the Columbia River drainage are spawned in Idaho waters. Unfortunately, downstream losses are so great that reproduction won't perpetuate the species. To make up the difference, a very successful hatchery program has been established in Idaho. Probably one-third of the Columbia River system's steelhead come from these hatcheries.

By banning commercial steelhead fishing, Senator GORTON's bill will significantly reduce downstream losses and give the sports fishermen a greater opportunity to try their luck with the steelhead. This bill eliminates Indian commercial fishing but grants them the right to license sport fishing within the boundaries of the reservations. Remembering the glory days of steelhead fishing on the Salmon River, I'd guess that both the tribes and steelhead will benefit.

Very recently, our country signed a treaty with Canada setting up the mechanism for perpetuating and even enhancing our Pacific salmon and steelhead fishery. The Idaho congressional delegation has actively worked for many years to get our fish this

protection. Senator GORTON's bill strengthens the purpose of the treaty in a way that is beneficial to Idaho. I'm pleased to be a cosponsor.●

By Mr. MITCHELL (for himself and Mr. CHAFEE):

S. 955. A bill to amend the Internal Revenue Code of 1954 to provide funding for the Hazardous Substance Response Trust Fund, and for other purposes; to the Committee on Finance.

SUPERFUND REVENUE ACT

● Mr. MITCHELL. Mr. President, I am today introducing with my colleague, Senator CHAFEE, legislation to provide $7.5 billion over a 5-year period to fund the Superfund hazardous waste cleanup program. On March 1, 1985, the Senate Committee on Environment and Public Works approved a reauthorization of this program at a $7.5 billion level. The bill we introduce today will provide the revenue to implement that authorization.

The Superfund law first enacted in 1980, the Comprehensive Environmental Response, Compensation and Liability Act, was a major first step in addressing what was and continues to be a serious and compelling problem: the cleanup of the thousands of toxic waste sites across this country and continuing releases of hazardous substances into the environment. The law established two complementary programs, a liability regime to assure that those responsible for damage to the environment from these substances bear the cost of their actions, and a fund to finance response and cleanup actions where a liable party does not clean up, cannot be found, or cannot pay the cost of cleanup. The legislation being introduced today addresses the funding aspect of the Superfund law.

In developing this legislation we were guided by two fundamental objectives: First, that revenue be raised in such a way as to not impose disruptive economic burdens affecting the trade competitiveness of domestic industry, and second, that the revenue raising mechanism create minimal new administrative burdens on affected taxpayers and the Internal Revenue Service. We believe those concerns have been satisfied while addressing the overriding need to provide a funding level sufficient to continue to implement the objectives of the Superfund law.

The bill proposes to raise Superfund revenues from four sources: A tax on chemical feedstocks raising $2 billion, a tax on the generation of hazardous waste raising $1.5 billion, a broad based tax on corporate economic income raising $3.06 billion, and a 12.5 percent contribution from general revenues totaling $937.5 million.

FEEDSTOCK TAX

The bill proposes to continue the current feedstock tax mechanism while raising slightly more revenue—$400 million annually compared to current law which raises approximately $300 million annually. The current list of 42 inorganic and organic feedstocks is retained at a tax rate capped at 1.5 percent of the wholesale selling price of a substance or $5.35 per ton, whichever is lower. This compares to a maximum tax rate under current law of $4.87 per ton for organic feedstocks and $4.45 per ton for inorganic feedstocks. The tax rate on crude oil under this bill will be 1.13 cents per barrel as compared to 0.79 cents per barrel under the 1980 law. All tax rates will be indexed for inflation.

Inorganic substances will contribute 27.6 percent of total feedstock revenue compared to a 20 percent contribution under current law. Organic substances will contribute 57.4 percent as compared to 65 percent under current law. Crude oil will continue to contribute 15 percent of feedstock revenues.

The current list of 42 chemical feedstock substances plus crude oil was established in 1980 based on five criteria, of which a substance had to meet two:

The substance is inherently hazardous or hazardous in a number of forms—intermediates or final products;

The substance is hazardous in some form if released;

Hazardous substances are generated in the production of any form of the substance;

The substance is capable of increasing the hazard potential of other substances; or

The substance is produced nationally in significant amounts.

These criteria in our judgment remain a valid basis on which to levy a feedstock tax.

The bill increases the revenue generated by the feedstock tax by $100 million annually over current law. This will not produce a disproportionate economic burden on the petrochemical and metal processing industries. Valid concerns have been raised that a sharp increase in feedstock tax rates could have a negative impact on the chemical industry's balance of trade. We share those concerns.

There is no indication that such an impact has been experienced as a result of the current tax or will result from the modest increase we are proposing in this legislation. Although a chemical trade surplus decrease did occur between 1981 and 1983, according to EPA's section 301 Superfund study.

> This reduction was small relative to the overall deterioration in the U.S. trade balance. More important, the U.S. has not lost market share in world chemical exports since the enactment of CERCLA. The U.S. has historically maintained a substantial surplus in chemical trade that amounted to a record $12.1 billion in 1980, $11.7 billion in 1981, $10.4 billion in 1982, and $9 billion in 1983. Despite this recent reduction, the U.S. share of world chemical exports in 1983, 17 percent, was the highest in more than ten years.

The factors cited in the study as contributors to the worsening trade picture in chemicals are global recession; the overvaluation of the dollar; decontrol of U.S. crude oil prices; differential inflation rates among countries; increases in foreign capacity; gradual restructuring of the U.S. chemical industry toward downstream chemicals; debt problems abroad; counterfeiting and trademark infringement; protectionism and trade barriers; and other ways in which foreign governments support their chemical industries. The report concludes:

> • • • Although difficult to estimate analytically, taken together these market factors appear to render insignificant the impact of the CERCLA tax on U.S. chemical trade.

To ensure this will continue to be the case, we have included a limit of 1.5 percent of wholesale price on all tax rates with a further limitation of $5.35 a ton for any feedstock. As a result, 31 of the feedstocks are taxed at less than 1.5 percent of wholesale price.

WASTE GENERATION

The bill proposes to raise $300 million a year from a fee of $3.65 a ton on all hazardous waste delivered to a licensed facility for treatment, long-term storage, or disposal. A traceback rule is included to give taxpayers the option of measuring hazardous waste at the point at which it is generated prior to mixing with nonhazardous substances further in the process such as occurs at onsite wastewater treatment facilities.

All waste would be taxed at the same rate. This flat tax is designed to be a reliable source of revenue that is neutral with regard to disposal methods.

In November 1984, Congress enacted landmark amendments to the Resource Conservation and Recovery Act which place tough restrictions on land disposal of hazardous waste and require the use of best available control technology at all hazardous waste facilities. The environmental safeguards established in RCRA were carefully crafted by the Congress to provide for environmently acceptable hazardous waste management. An additional overlay of tax incentives is unnecessary. Indeed, we are concerned that a waste-end tax designed to create redundant waste management incentives could have unintended results which in fact undermine our regulatory laws. The congressional committees with environmental jurisdiction are better equipped to handle this issue than are the tax-writing committees. We therefore believe the preferable approach is a flat rate tax which does not interject Federal tax rules into hazardous waste management decisions.

In addition, we are concerned that a waste-end tax which provides for several levels of taxation is considerably more difficult to administer and more susceptible to taxpayer manipulation.

GENERAL REVENUES

Current law authorizes a general revenue contribution amounting to 12.5 percent of fund revenues or $44 million a year. This bill continues that percentage contribution, at a level of $187.5 million a year. This contribution from appropriations will assure congressional scrutiny of the use of the fund. It also reflects the fact that we are dealing with a broad societal problem to which all taxpayers should make some minimal contribution to its solution.

BROAD-BASED TAX

The final component of this legislation includes a broad based tax on the economic income of large corporations. For purposes of determining corporate economic income reference is made to existing definitions in section 312 of the Internal Revenue Code which measures corporate earnings and profits.

Earnings and profits are a measure of a corporation's economic income based on actual expenditures and receipts without accounting for the artificial tax treatment rules in the Internal Revenue Code.

Under existing tax law corporations are required to keep track of their earnings and profits for the purpose of measuring the amount of earnings that are available for distribution to shareholders. Although this type of calculation is required, we realize that as a practical matter most large corporations do not keep detailed records of their earnings and profits. There is no definite need to do so because for most large corporations, shareholder distributions rarely approach the level of corporate earnings and profits.

This is a calculation, however, that can be made with relatively little administrative burden. Under the bill, earnings and profits would be accounted for on a current basis; there would be no requirement to measure prior accumulated earnings and profits.

The tax would apply to a rate of three-tenths of 1 percent (0.003) on corporate earnings and profits in excess of $5 million a year.

A broad based tax on corporate income is undoubtedly a major step for Congress to take and it will receive close scrutiny from the corporate community which is understandably concerned about the creation of a new dedicated tax.

But this kind of approach makes a lot of sense. Hazardous wastes are a broad societal problem. As such, all segments of society and all sectors of the economy contribute to the problem.

The current Superfund depends on the petrochemical and metal processing industries for all of its tax revenue based on the sound reasoning that the hazardous waste problem can be directly traced back to the feedstock substances which produce most chemical products.

That is a tax policy that should be continued and is continued in this bill at an even higher revenue amount. In addition, the petrochemical and metal processing industries will contribute the bulk of taxes to the waste-end revenue raising mechanism.

However, while more revenue is clearly needed for the Superfund Program, there is a limit to the contribution a narrow industrial sector can make. The entire economy is at least indirectly responsible for the hazardous waste problem and therefore revenue should be raised from the broader community. In recognition of that, the Federal Government general revenues will maintain a 12.5-percent contribution. Current budget realities do not permit a greater Federal share.

This leaves us with but one option: a broad based tax. In our judgment, the most equitable and administratively reasonable broad based tax approach is to impose a small tax on corporate economic income as measured by corporate earnings and profits.

On Thursday and Friday of next week, the Senate Finance Committee will be holding hearings on legislation to fund CERCLA for the next 5 years. Several pieces of legislation will be before the committee. We believe this legislation offers the best approach to funding the Superfund Program and look forward to receiving input from witnesses testifying at the hearing.

I ask unanimous consent that a copy of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Superfund Revenue Act of 1985".

TITLE I—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Subtitle A—Feedstocks and Petroleum

SEC. 101. INCREASE IN TAX ON PETROLEUM.

(a) INCREASE IN TAX.—Subsections (a) and (b) of section 4611 of the Internal Revenue Code of 1954 (relating to environmental tax on petroleum) are each amended by striking out "0.79 cent" and inserting in lieu thereof "1.13 cents".

(b) TERMINATION OF TAX.—

(1) Subsection (d) of section 4611 of such Code (relating to termination) is amended to read as follows:

"(d) TERMINATION.—The tax imposed by this section shall not apply after September 30, 1990.".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1985.

SEC. 102. INCREASE IN TAX ON CERTAIN CHEMICALS.

(a) INCREASE IN RATE OF TAX.—Subsection (b) of section 4661 of the Internal Revenue Code of 1954 (relating to amount of tax imposed on certain chemicals) is amended by striking out the table contained in such subsection and inserting in lieu thereof the following:

"In the case of:	The tax (before any inflation adjustment) is the following amount per ton:
Organic substances:	
Acetylene	$5.35
Benzene	5.35
Butadiene	5.35
Butane	4.87
Butylene	5.11
Ethylene	5.35
Methane	3.44
Napthalene	5.35
Propylene	5.35
Toluene	5.14
Xylene	5.35
Inorganic substances:	
Ammonia	2.64
Antimony	5.35
Antimony trioxide	5.35
Arsenic	5.35
Arsenic trioxide	5.35
Barium sulfide	5.35
Bromine	5.35
Cadmium	5.35
Chlorine	3.03
Chromite	1.52
Chromium	5.35
Cobalt	5.35
Cupric oxide	5.35
Cupric sulfate	5.35
Cuprous oxide	5.35
Hydrochloric acid	0.93
Hydrogen fluoride	5.35
Lead oxide	5.35
Mercury	5.35
Nickel	5.35
Nitric acid	3.03
Phosphorous	5.35
Potassium dichromate	5.35
Potassium hydroxide	5.35
Sodium dichromate	5.35
Sodium hydroxide	2.79
Stannic chloride	5.35
Stannous chloride	5.35
Sulfuric acid	0.77
Zinc chloride	5.35
Zinc sulfate	5.35.".

(b) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—Section 4661 of such Code is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

(c) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—

"(1) IN GENERAL.—In the case of any taxable chemical sold in a calendar year after 1985, the amount of the tax imposed by subsection (a) shall be the amount determined under subsection (b) increased by the applicable inflation adjustment for such calendar year.

"(2) APPLICABLE INFLATION ADJUSTMENT.—

"(A) IN GENERAL.—In the case of a taxable chemical, the applicable inflation adjustment for the calendar year is the percentage (if any) by which—

"(i) the applicable price index for the preceding calendar year, exceeds

"(ii) the applicable price index for 1984.

"(B) APPLICABLE PRICE INDEX.—For purposes of subparagraph (A), the applicable price index for any calendar year is the average for the months in the 12-month period ending of September 30 of such calendar year of—

"(i) in the case of organic substances and other organic and inorganic substances, the producer price index for basic organic chemicals as published by the Secretary of Labor, or

"(ii) in the case of inorganic substances, the producer price index for basic inorganic chemicals as published by the Secretary of Labor.

"(3) ROUNDING.—If any increase determined under paragraph (1) is not a multiple of 1 cent, such increase shall be rounded to the nearest multiple of 1 cent (or if the increase determined under paragraph (1) is a multiple of ½ of 1 cent, such increase shall be increased to the next higher multiple of 1 cent).".

"(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1985.

Subtitle B—Tax on Hazardous Wastes

SEC. 111. TAX ON HAZARDOUS WASTES.

"(a) IN GENERAL.—Chapter 38 of the Internal Revenue Code of 1954 (relating to environmental taxes) is amended by adding at the end thereof the following new subchapter D:

"SUBCHAPTER D—TAX ON HAZARDOUS WASTES

"Sec. 4691. Imposition of tax.
"Sec. 4692. Definitions and special rules.

"SEC. 4691. IMPOSITIONS OF TAX.

"(a) GENERAL RULE.—There is hereby imposed a tax on—

"(1) the receipt of hazardous waste at a qualified hazardous waste facility, and

"(2) the exportation of hazardous waste from the United States.

"(b) AMOUNT OF TAX.—IN GENERAL.—The amount of the tax imposed by subsection (a) shall be equal to $3.65 per metric ton of hazardous waste.

"(c) INFLATION ADJUSTMENTS IN AMOUNT OF TAX.—

"(1) IN GENERAL.—In the case of any calendar year after 1985, the amount of the tax imposed by subsection (a) shall be the amount determined under subsection (b) increased by the applicable inflation adjustment for such calendar year.

"(2) APPLICABLE INFLATION ADJUSTMENT.—For purposes of paragraph (1) of this subsection, the applicable inflation adjustment for any calendar year is the percentage by which—

"(A) the implicit price deflator for the gross national product for the preceding calendar, year, exceeds

"(B) such deflator for the calendar year 1984.

"(3) ROUNDING.—If any increase determined under paragraph (1) is not a multiple of 1 cent, such increase shall be rounded to the nearest multiple of 1 cent (or if the increase determined under paragraph (1) is a multiple of ½ of 1 cent, such increase shall be increased to the next higher multiple of 1 cent).".

"SEC. 4692. DEFINITIONS AND SPECIAL RULES.

"(a) DEFINITIONS.—For purposes of this subchapter—

"(1) HAZARDOUS WASTE.—The term 'hazardous waste' means any waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act in effect on the date of enactment of the Superfund Revenue Act of 1985 (but not including any waste the regulation of which under such Act has been suspended by Act of Congress).

"(2) QUALIFIED HAZARDOUS WASTE FACILITY.—The term 'qualified hazardous waste facility' means any facility which—

"(A) qualifies for the authorization to operate under section 3005(e) of the Solid Waste Disposal Act, or

"(B) has a valid permit under section 3005 of the Solid Waste Disposal Act or under a State permit program which is authorized under section 3006 of such Act.

"(b) PERSON ON WHOM TAX IMPOSED.—

"(1) OWNER OR OPERATOR.—The tax imposed by section 4691(a)(1) shall be imposed on the owner or operator of the qualified hazardous waste facility.

"(2) EXPORTER.—The tax imposed by section 4691(a)(2) shall be imposed on the exporter of the hazardous waste.

"(c) TAX IMPOSED ONLY ONCE.—No tax shall be imposed under section 4691(a) upon the receipt or exportation of hazardous waste if such waste is received or exported directly from one or more qualified hazardous waste facilities.

"(d) ELECTION TO TAX HAZARDOUS PORTION OF WASTE TREATED IN ON-SITE WASTE-WATER TREATMENT FACILITY.—In any case in which a mixture of solid waste from one or more sources and one or more hazardous wastes from other sources is treated at a qualified hazardous waste facility which is an on-site waste water treatment facility, the taxpayer may, notwithstanding the regulation of such mixture as a hazardous waste under the Solid Waste Disposal Act, elect to have the tax imposed by section 4691(a) determined on the basis of the volume of such mixture exclusive of the volume of such solid waste that would not be regulated as a hazardous waste under the Solid Waste Disposal Act if it had not been part of such a mixture.

"(e) TERMINATION.—No tax shall be imposed under section 4691(a) with respect to hazardous waste received or exported after September 30, 1990.".

(b) CONFORMING AMENDMENT.—The table of subchapters for chapter 38 of such Code is amended by adding at the end thereof the following: "Subchapter D.—Tax on hazardous waste.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to hazardous waste received or exported after September 30, 1985.

Subtitle C—Tax on Corporate Earnings and Profits

SEC. 121. ENVIRONMENTAL TAX ON CORPORATE EARNINGS AND PROFITS.

(a) IN GENERAL.—Subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to determination of tax liability) is amended by adding at the end thereof the following new part:

"PART VII—ENVIRONMENTAL TAX ON CORPORATE EARNINGS AND PROFITS

"Sec. 59. Tax on corporate earnings and profits.

"SEC. 59. ENVIRONMENTAL TAX ON CORPORATE EARNINGS AND PROFITS.

"(a) IMPOSITION OF TAX.—In addition to any other tax imposed by this chapter, there is hereby imposed for each taxable year on each corporation a tax equal to the product of—

"(1) .003, multiplied by

"(2) the excess (if any) of—

"(A) the earnings and profits of such corporation for such taxable year, over

"(B) $5,000,000.

"(b) SPECIAL RULES FOR COMPUTING EARNINGS AND PROFITS.—

"(1) *Carryover of deficits in earnings and profits.*—In the case of any taxable year in which a corporation has a deficit in earnings and profits, the earnings and profits of such corporation for the next taxable year shall be reduced (below zero if necessary) by the amount of such deficit.

"(2) NO REDUCTIONS FOR DISTRIBUTIONS TO SHAREHOLDERS.—No reduction shall be made in the earnings and profits of any corporation for any taxable year for any distribution after September 30, 1985, to a shareholder with respect to the corporation's stock.

"(3) SPECIAL RULE FOR TAXABLE YEARS INCLUDING OCTOBER 1, 1985.—In the case of any taxable year which includes October 1, 1985, the earnings and profits for such taxable year which are taken into account under subsection (a) shall be equal to that portion of such earnings and profits which bears the same ratio to such earnings and profits as—

"(A) the number of days in such taxable year after September 30, 1985, bears to

"(B) the total number of days in such taxable year.

"(c) SECTION NOT TO APPLY TO CERTAIN CORPORATIONS.—No tax shall be imposed under subsection (a) on any—

"(1) S corporation,

"(2) regulated investment company, or

"(3) real estate investment trust.

"(d) TERMINATION.—This section shall not apply to taxable years ending after September 30, 1990.".

(b) DISALLOWANCE OF CREDIT AGAINST TAX.—Paragraph (2) of section 26(b) of such Code (defining tax liability) is amended by striking out "and" at the end of subparagraph (G), by striking out the period at the end of subparagraph (H) and inserting in lieu thereof ", and", and by adding at the end thereof the following new subparagraph:

"(I) section 59 (relating to tax on corporate earnings and profits).".

(c) TRANSFER TO RESPONSE TRUST FUND.—Subparagraph (A) of section 221(b)(1) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "section 4611 or 4661" and inserting in lieu thereof "section 59, 4611, or 4661".

(d) CLERICAL AMENDMENT.—The table of parts for subchapter A of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"PART VII.—TAX ON CORPORATE EARNINGS AND PROFITS.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after September 30, 1985.

TITLE II—AUTHORIZATION OF APPROPRIATIONS TO HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

SEC. 201. AUTHORIZATION OF APPROPRIATIONS.

Paragraph (2) of section 221(b) of the Hazardous Substance Response Revenue Act of 1980 is amended to read as follows:

"(2) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Emergency Response Trust Fund for fiscal year—

"(A) 1981, $44,000,000,
"(B) 1982, $44,000,000,
"(C) 1983, $44,000,000,
"(D) 1984, $44,000,000,
"(E) 1985, $44,000,000,
"(F) 1986, $187,500,000,
"(G) 1987, $187,500,000,
"(H) 1988, $187,500,000,
"(I) 1989, $187,500,000, and

"(J) 1990, $187,500,000, plus an amount equal to so much of the aggregate amount authorized to be appropriated under the preceding subparagraphs as has not been appropriated before October 1, 1989."●

By Mr. MOYNIHAN (for himself and Mr. CHAFEE):

S. 956. A bill to amend the Internal Revenue Code of 1954 to modify the provisions relating to minimum taxes for tax preferences of individuals and corporations, and for other purposes; to the Committee on Finance.

MINIMUM TAX REFORM ACT OF 1985

● Mr. MOYNIHAN. Mr. President, I rise today to introduce legislation to revise the Tax Code to provide that all persons who earn substantial income and all corporations that earn substantial profits pay a minimum amount to the Federal Government.

I am pleased to be joined in this effort by my distinguished friend and fellow member of the Senate Finance Committee, Senator CHAFEE.

We do not propose to raise taxes. We propose to begin to collect taxes. Those who wrote the tax laws we now propose to change cannot have thought that rich individuals and profitable corporations would not owe taxes and, in due course, pay them. Did anyone really intend to write tax law that would permit corporations earning millions or hundreds of millions of dollars in profits—even, the truth be known, billions of dollars—to pay no income tax to the Federal Government? Or individuals in not dissimilar situations?

There were 67 major corporations in America with combined profits exceeding $14 billion that paid no Federal income tax in 1983. There were 128 major corporations with combined profits of more than $57 billion that managed to pay no Federal income tax in at least one of the last 3 years for which we have data—1981, 1982 and 1983. There were some 25,000 individuals who earned at least $50,000 who paid no Federal income tax in 1982, the last year for which we have data on individuals. May I say, this is a disgrace—not to the human race, but to our ability in this body to write laws that will produce the results we intend.

The reason is fairly simple. The present Tax Code includes a remarkably elaborate catalog of deductions, exemptions and credits, all designed to encourage some kind of economic or social activity. In the main, these encourage investment for various purposes. Others recognize that there are certain expenses that must be incurred by certain kinds of businesses—life insurance companies, for example—to take account of liabilities and assets far into the future. These purposes are proper, or at least plausible, and in some instances the incentives actually work. That is not the matter before us today.

When Congress enacted these tax provisions, no one intended thereby to enable prosperous individuals or profitable corporations to avoid paying any taxes. No one intended to suspend in the Tax Code the basic principle of fairness, the basic democratic ethos of sharing the burdens as well as the bounties of the American polity.

And so Congress enacted minimum taxes. But we did not exclude many of the deductions, exemptions, and credits allowed under the regular tax. Hence, individuals and corporations could arrange their financial affairs so as to avoid paying even the minimum tax, much less the regular tax.

I have come to the conclusion that under the present arrangements, there is no way to prevent industrious and ingenious tax lawyers and accountants from figuring out how to combine just the right provisions of the Tax Code, to ensure that their clients pay no tax at all—unless we adopt a new rule. This is what we propose today.

Individuals must pay 15 percent tax on combined salary, interest and dividend income exceeding $50,000. A taxpayer can still claim the major personal deductions—charitable contributions, medical expenses, above 10 percent of income, home mortgage interest, casualty losses, and moneys paid for State and local taxes. What cannot be claimed, for purposes of the minimum tax, are losses generated by other business activities. A taxpayer could no longer invest in a tax shelter and protect his salary, interest and dividend income from a minimum 15-percent tax—which, I would note, is the lowest tax rate under the Treasury's recent tax proposal, for Americans of modest income.

Corporations must pay 15 percent tax on real profits exceeding $100,000. Corporations would be permitted some deductions in full for purposes of the minimum tax—those that reflect genuine economic costs. But those deductions and other adjustments which reduce a corporation's taxable income to encourage investment—the so-called tax preference items—would be disallowed in whole, or in part, for determining a profitable corporation's minimum tax. If a profitable corporation claimed an accelerated depreciation deduction of $20,000 for some asset, allowed under ACRS in the regular tax, and the actual economic depreciation came to $8,000, based on the useful economic life of the asset, the $12,000 difference would be disallowed for purposes of the minimum tax.

How much revenue has been foregone by the current arrangements for the minimum tax? Our estimates are preliminary, but our revision of the corporate minimum tax will likely collect some $13 billion in revenues over the first 3 years, while our reform of the individual minimum tax will likely collect at least $3 billion over the same period.

May I repeat, this is a minimum tax; we hope to ensure that everyone pays but a fair share. Consider an individual who earned $250,000 in salary, interest and dividend income. Under the current minimum tax, he could claim deductions—his accountant would call them losses—for real estate investments, oil and gas partnerships, and so forth. Under our proposal, he could take his major personal deductions—let us assume they come to $20,000 for his home mortgage interest payments, his State and local taxes, and his charitable contributions. That would leave him with income of $230,000—from which he could exempt $50,000. That leaves $180,000, on which he would owe 15 percent, or $27,000. About 10 percent effective tax on an income of $250,000; that does not seem unfair to this Senator; indeed, it seems to be what we call it—a minimum.

Last year, I proposed a major reform of the individual minimum tax in the Senate Finance Committee. It was well enough received. It was initially accepted by the committee, with some revisions. Then, in a closed caucus of committee members, it was defeated by a vote of 10 to 9.

I hope for a better outcome this time. I ask my colleagues to join me.

I ask unanimous consent that the specifications of our legislation and a copy of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as "Minimum Tax Reform Act of 1985".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. MODIFICATION OF INDIVIDUAL ALTERNATIVE MINIMUM TAX.

(a) REDUCTION IN ALTERNATIVE MINIMUM TAX RATE, ETC.—

(1) REDUCTION IN RATE.—Subsection (a) of section 55 (relating to an alternative minimum tax for taxpayers other than corporations) is amended by striking out "20 percent" and inserting in lieu thereof "15 percent".

(2) INCREASE IN EXEMPTION AMOUNTS.—Paragraph (1) of section 55(f) (relating to other definitions) is amended—

(A) by striking out "$40,000" in subparagraph (A) and inserting in lieu thereof "$50,000",

(B) by striking out "$30,000" in subparagraph (B) and inserting in lieu thereof "$40,000", and

(C) by striking out "$20,000" in subparagraph (C) and inserting in lieu thereof "$25,000".

(3) ALTERNATIVE TAX ITEMIZED DEDUCTIONS TO INCLUDE TAXES.—Paragraph (1) of section 55(e) (relating to alternative tax itemized deductions) is amended—

(A) by striking out "or" at the end of subparagraph (D),

(B) by striking out the period of the end of subparagraph (E) and inserting in lieu thereof ", or", and

(C) by adding at the end thereof the following new subparagraph:

"(F) section 164 (relating to deductions for taxes).".

(b) ALTERNATIVE MINIMUM TAXABLE INCOME NOT TO BE LESS THAN ALTERNATIVE MINIMUM TAXABLE INCOME FLOOR.—

(1) IN GENERAL.—Section 55(b) (defining alternative minimum taxable income) is amended by adding at the end thereof the following new flush sentence:

"In no event shall the alternative minimum taxable income of the taxpayer for any taxable year be less than the alternative minimum taxable income floor.".

(2) ALTERNATIVE MINIMUM TAXABLE INCOME FLOOR DEFINED.—Section 55 (relating to alternative minimum tax for taxpayers other than corporations) is amended by redesignating subsection (f) as subsection (g) and by inserting after subsection (e) the following new subsection:

"(f) ALTERNATIVE MINIMUM TAXABLE INCOME FLOOR DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'alternative minimum taxable income floor' means the sum of—

"(A) the alternative tax investment income of the taxpayer for the taxable year, plus

"(B) the greater of—

"(i) the earned income of the taxpayer for the taxable year, or

"(ii) the controlled business income of the taxpayer for the taxable year,

reduced by the alternative tax itemized deductions for the taxable year.

"(2) ALTERNATIVE TAX INVESTMENT INCOME.—

"(A) IN GENERAL.—The term 'alternative tax investment income' means the sum of the following amounts which are includible in the gross income of the taxpayer for the taxable year:

"(i) Any interest, dividends, or payments with respect to the loan of any stock or security.

"(ii) Any net capital gain from the sale or other disposition of—

"(I) any intangible personal property, or

"(II) any tangible personal property of a type which is actively traded on an established securities market.

"(B) REDUCTION FOR CERTAIN EXPENSES.—The alternative tax investment income of any taxpayer for any taxable year shall be reduced (but not below zero) by the amount of any deduction under section 163, 164(a)(1), 164(a)(2), 166, 171, 212, or 1202 which is properly allocable to such alternative tax investment income.

"(C) AMOUNTS FROM ACTIVE TRADE OR BUSINESS NOT TAKEN INTO ACCOUNT.—The term 'alternative tax investment income' shall not include any amount to the extent it is derived from the active conduct of any trade or business.

"(3) EARNED INCOME.—

"(A) IN GENERAL.—The term 'earned income' means any income which is earned income within the meaning of section 401(c)(2)(C) or 911(d)(2)(A), except that such term does not include any distribution to which section 72(m)(5), 402(a)(2), 402(e), or 403(a)(2)(A) applies.

"(B) SPECIAL RULE FOR EARNED INCOME OF 5-PERCENT OWNERS.—For purposes of this paragraph, if a 5-percent owner of any trade or business (other than a C corporation) derives earned income (determined without regard to this subparagraph) from such trade or business, then such owner's earned income from such trade or business shall—

"(i) include such owner's allocable share of the adjusted gross income (taxable income in the case of a partnership or S corporation) of such trade or business, and

"(ii) be reduced by such owner's allocable share of loss of such trade or business.

"(4) CONTROLLED BUSINESS INCOME.—For purposes of this subsection, the term 'controlled business income' means the taxpayer's allocable share of the adjusted gross income (or taxable income in the case of a partnership or S corporation) of any trade or business (other than a C corporation) which the taxpayer controls. Such term shall not include any amount treated as earned income under paragraph (3)(B).

"(5) DEFINITION RELATING TO OWNERSHIP.—For purposes of this subsection—

"(A) 5-PERCENT OWNER.—The term '5-percent owner' means any person owning interests (other than debt) in a trade or business which are 5 percent or more (by value) of the total value of all interests (other than debt) in such trade or business.

"(B) CONTROL.—The term 'control' means ownership of interests (other than debt) in a trade or business which (by value) are greater than 50 percent of the total value of all interests (other than debt) in such trade or business.

"(C) ATTRIBUTION.—For purposes of this paragraph, a person shall be treated as owning any interest in any trade or business which is owned by another person who is related (within the meaning of section 267(b)) to such person.".

"(6) CARRYOVER OF DISALLOWED LOSSES.—Under regulations, any net loss of the taxpayer from activities not taken into account in computing the alternative minimum taxable income floor which cannot be used solely because of the operation of the alternative minimum taxable income floor may be carried forward for purposes of the regular tax.

(c) MODIFICATION OF ITEMS OF TAX PREFERENCE OF INDIVIDUALS.—

(1) REPEAL OF PREFERENCE FOR EXCLUSION OF DIVIDENDS AS PREFERENCE ITEM.—Section 57(a) (relating to items of tax preference) is amended by striking out paragraph (1).

(2) CIRCULATION AND RESEARCH AND EXPERIMENTAL EXPENDITURES.—Subparagraph (B)(ii) of section 57(a)(6) (relating to circulation and research and experimental expenditures) is amended by striking out "10-year period" and inserting in lieu thereof "5-year period".

(3) RESERVES FOR LOSSES ON BAD DEBTS.—Section 57(a) is amended by striking out paragraph (7) and inserting in lieu thereof the following new paragraph:

"(7) RESERVES FOR BAD DEBTS.—The amount by which the deduction allowable for the taxable year under this chapter for a reasonable addition to a reserve for bad debts exceeds the amount allowable under this chapter for bad debts incurred during such taxable year.".

(4) INTANGIBLE DRILLING COSTS.—Section 57(a) is amended by striking out paragraph (11) and inserting in lieu thereof the following new paragraph:

"(11) INTANGIBLE DRILLING COST.—The excess of—

"(A) the amount allowable as a deduction under section 263(c) in determining taxable income (other than costs incurred in connection with a nonproductive well), over

"(B) the amount which would be allowable as a deduction if costs were capitalized and allowed as a deduction ratably over the 120-month period beginning with the month in which the production from the well begins.".

(5) ACCELERATED COST RECOVERY DEDUCTION.—Section 57(a) is amended by striking out paragraph (12) and inserting in lieu thereof the following new paragraph:

"(12) ACCELERATED COST RECOVERY DEDUCTION.—

"(A) IN GENERAL.—With respect to each recovery property, the amount (if any) by which the deduction allowed under section 168(a) for the taxable year exceeds the deduction which would have been allowable for the taxable year had the property been depreciated using the straight-line method (without regard to salvage value) and a recovery period determined in accordance with the following table:

"In the case of:	The recovery period is:
3-year property	5 years
5-year property	12 years
10-year property	25 years
15-year public utility property	35 years
18-YEAR REAL PROPERTY AND LOW-INCOME HOUSING	40 years.

"(B) SUBPARAGRAPH (A) INAPPLICABLE WHERE LONGER RECOVERY PERIODS APPLY.—If, pursuant to section 168(b)(3) or 168(f)(2), the recovery period for any property is longer than the recovery period for such property set forth in subparagraph (A), subparagraph (A) shall not apply to such property.

"(C) CONVENTIONS.—

"(i) IN GENERAL.—In the case of property other than 18-year real property and low-income housing, subparagraph (A) shall be applied by using a half-year convention.

"(ii) 18-YEAR REAL PROPERTY AND LOW-INCOME HOUSING.—In the case of 18-year real property and low-income housing, the conventions under sections 168(b)(2)(B) and 168(b)(4)(B) shall be used.

"(D) DEFINITIONS.—For purposes of this paragraph, the terms '3-year property', '5-year property', '10-year property', '15-year public utility property', '18-year real property', 'low-income housing', and 'recovery property', have the same meanings given such terms by section 168.".

(6) ADDITIONAL PREFERENCE ITEMS.—Section 57(a) is amended by adding at the end thereof the following new paragraphs:

"(13) CERTAIN INTEREST WHERE TAXPAYER HAS TAX-EXEMPT INCOME.—The amount of the interest (other than qualified housing interest within the meaning of section 55(e)(4)) paid or accured by the taxpayer during the taxable year but only to the extent of an amount equal to the interest which is excludable from the taxpayer's gross income under this subtitle, reduced by the amount of any interest paid or accrued by the taxpayer during the taxable year with respect to which a deduction is not allowable by reason of section 265.

"(14) TERTIARY INJECTANT EXPENSES.—The excess of—

"(A) the amount allowable as a deduction under section 193 for the taxable year, over

"(B) the amount which would be allowable as a deduction if tertiary injectant expenses were capitalized and amortized over the 24-month period beginning with the month in which the injectant is injected.

"(15) CONSTRUCTION PERIOD CARRYING CHARGES.—The amount of the deduction allowable for the taxable year for construction period carrying charges (as defined in section 312(n)(1)(B)).

"(16) TRADEMARK AND TRADE NAME EXPENDITURES.—The amount allowable as a deduction for the taxable year under section 177.

"(17) COMPLETED CONTRACT METHOD OF ACCOUNTING.—In the case of a taxpayer who uses the completed contract method of accounting, the excess (if any) of—

"(i) the amount of taxable income for the taxable year which would be reported if such taxpayer used the percentage of completion method of accounting, over

"(ii) such taxpayer's taxable income for such taxable year.

"(18) REFORESTATION AND LAND CLEARING EXPENSES.—Any amount allowable as a deduction for the taxable year under section 182 or 194.

"(19) CERTAIN SHIPPING INCOME.—With respect to any construction reserve fund or capital construction fund established by the taxpayer under sections 511 and 607 of the Merchant Marine Act (46 U.S.C. 1161, 1177), the net increase for such taxable year in the income and capital gain accounts under such funds.".

(d) ELECTION TO MAKE ADJUSTMENTS FOR REGULAR TAX PURPOSES.—Section 58(i) (relating to optional 10-year writeoff of certain tax preferences) is amended to read as follows:

"(i) ELECTION TO MAKE ADJUSTMENTS FOR REGULAR TAX PURPOSES.—

"(1) IN GENERAL.—The taxpayer may elect for any taxable year to have any adjustment required by subsection (b)(2) of section 55 or section 56 with respect to any item of tax preference or any corporate alternative minimum tax preference item arising in such year apply also to such item for regular tax purposes. The treatment of any item with respect to which an election has been made under the preceding sentence shall (for all later years and for purposes of both the regular tax and this section) be consistent with its treatment for the year in which it arises.

"(2) TIME FOR MAKING ELECTION.—Any election under paragraph (1) with respect to any item shall be made not later than the due date (with extensions) for filing the return under this chapter for the taxable year in which such item arose.

"(3) REVOCATION ONLY WITH CONSENT.—Any election under paragraph (1) may be made only in the manner provided by regulations, and may be revoked only with the consent of the Secretary.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years begining after December 31, 1985.

SEC. 3. IMPOSITION OF CORPORATE MINIMUM TAX.

(a) IN GENERAL.—Section 56 (relating to corporate minimum tax) is amended to read as follows:

"SEC. 56. ALTERNATIVE MINIMUM TAX ON CORPORATIONS.

"(a) TAX IMPOSED.—

"(1) IN GENERAL.—A tax is hereby imposed (in addition to any other tax imposed by this subtitle) on each corporation in an amount equal to the excess (if any) of—

"(A) 15 percent of so much of the corporate alternative minimum taxable income of the taxpayer for the taxable year as exceeds $100,000 over

"(B) the regular tax for the taxable year.

"(b) CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME.—For purposes of this title, the term 'corporate alternative minimum taxable income' means the taxable income (determined without regard to the deduction allowed by section 172) of the taxpayer for the taxable year—

"(1) reduced by the corporate alternative minimum tax net operating loss deduction provided by subsection (d), and

"(2) increased by an amount equal to the corporate alternative minimum tax preference items.

"(c) CORPORATE ALTERNATIVE MINIMUM TAX PREFERENCE ITEMS.—For purposes of this section, the corporate alternative minimum tax preferences items are:

"(1) CERTAIN ITEMS OF TAX PREFERENCE.—The sum of the amounts determined under the following provisions of section 57(a):

"(A) Paragraph (2) (relating to accelerated depreciation of real property).

"(B) Paragraph (3) (relating to accelerated depreciation of leased personal property).

"(C) Paragraph (4) (relating to amortization of certified pollution controlled facilities).

"(D) Paragraph (5) (relating to mining and exploration and development costs).

"(E) Paragraph (6) (relating to circulation and research and experimental expenditures).

"(F) Paragraph (7) (relating to reserves for losses on bad debts).

"(G) Paragraph (8) (relating to depletion).

"(H) Paragraph (11) (relating to intangible drilling costs).

"(I) Paragraph (12) (relating to accelerated cost recovery deductions).

"(J) Paragraph (13) (relating to certain interest where taxpayer has tax-exempt income).

"(K) Paragraph (14) (relating to tertiary injectant expenses).

"(L) Paragraph (15) (relating to construction period carrying charges).

"(M) Paragraph (16) (relating to trademark and trade name expenditures).

"(N) Paragraph (17) (relating to completed contract method of accounting).

"(O) Paragraph (18) (relating to reforestation and land clearing expenses).

"(P) Paragraph (19) (relating to certain shipping income).

"(2) EXEMPT FOREIGN TRADE INCOME.—The amount by which taxable income would be increased if section 923(a) (after application of section 291(a)(4)) were applied with respect to any FSC by substituting—

"(A) 'no portion' for '30 percent' in paragraph (2), and

"(B) 'no portion' for '15/23' in paragraph (3).

"(3) INTEREST ON AMOUNTS USED TO ACQUIRE ESOP.—Any amount excluded from gross income under section 133 for the taxable year.

"(4) CERTAIN LIFE INSURANCE COMPANY DEDUCTIONS.—The amount of any deduction allowable for the taxable year under subsection (a) or (b) of section 806.

In determining the amount allowable as a deduction for any taxable year, section 291 shall be applied first.

"(d) CORPORATE ALTERNATIVE MINIMUM TAX NET OPERATING LOSS DEDUCTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'corporate alternative minimum tax net operating loss deduction' means the net operating loss deduction under section 172 for the taxable year for purposes of the regular tax, except that in determining the amount of such deduction—

"(A) in the case of taxable years beginning after December 31, 1985, section 172(b)(2) shall be applied by substituting 'corporate alternative minimum taxable income' for 'taxable income' each place it appears, and

"(B) the net operating loss (within the meaning of section 172(c) for any loss year shall be adjusted as provided in paragraph (2).

"(2) ADJUSTMENTS TO NET OPERATING LOSS COMPUTATION.—

"(A) POST-1985 LOSS YEARS.—In the case of a loss year beginning after December 31, 1985, the net operating loss for such year under section 172(c) shall be reduced by the amount of corporate alternative minimum tax preference items arising in such year.

"(B) PRE-1986 YEARS.—In the case of loss years beginning before January 1, 1986, the amount of the net operating loss which may be carried over to taxable years beginning after December 31, 1985, for purposes of paragraph (1) shall be equal to the amount which may be carried from the loss year to the first taxable year of the taxpayer beginning after December 31, 1985.

"(e) SPECIAL RULES RELATING TO CREDITS.—For purposes of this section—

"(1) CREDITS NOT ALLOWABLE.—For purposes of determining any credit allowable under subpart A, B, or D of part IV of this subchapter (other than the foreign tax credit allowed under section 27(a))—

"(A) the tax imposed by this section shall not be treated as a tax imposed by this chapter, and

"(B) the amount of the foreign tax credit allowed under section 27(a) shall be determined without regard to this section.

"(2) FOREIGN TAX CREDIT ALLOWED AGAINST ALTERNATIVE MINIMUM TAX.—

"(A) DETERMINATION OF FOREIGN TAX CREDIT.—The total amount of the foreign tax credit which can be taken against the tax imposed by subsection (a) shall be determined under subpart A of part III of subchapter N (section 901 and following).

"(B) INCREASE IN AMOUNT OF FOREIGN TAXES TAKEN INTO ACCOUNT.—For purposes of the determination provided by subparagraph (A), the amount of the taxes paid or accrued to foreign countries or possessions of the United States during the taxable year shall be increased by an amount equal to the lesser of—

"(i) the foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year, or

"(ii) the tax imposed by subsection (a).

"(C) SECTION 904(a) LIMITATION.—For purposes of the determination provided by subparagraph (A), the limitation of section 904(a) shall be an amount equal to the same proportion of the sum of the tax imposed by subsection (a) against which such credit is taken and the regular tax as—

"(i) the taxpayer's corporate alternative minimum taxable income from sources without the United States (but not in excess of the taxpayer's entire corporate alternative minimum taxable income), bears to

"(ii) the taxpayer's entire corporate alternative minimum taxable income.

For such purpose, the amount of the limitation of section 904(a) shall not exceed the tax imposed by subsection (a).

"(D) DEFINITION OF CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME FROM SOURCES WITHOUT THE UNITED STATES.—For purposes of subparagraph (C), the term corporate alternative minimum taxable income from

sources without the United States' means taxable income from sources without the United States, adjusted as provided in paragraphs (1) and (2) of subsection (b) (taking into account in such adjustment only items described in such paragraphs which are properly attributable to items of gross income from sources without the United States).

"(E) SPECIAL RULE FOR APPLYING SECTION 904(c).—In determining the amount of foreign taxes paid or accrued during the taxable year which may be deemed to be paid or accrued in a preceding or succeeding taxable year under section 904(c)—

"(i) the limitation of section 904(a) shall be deemed to be the amount of foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year increased by the amount of the limitation determined under subparagraph (C), and

"(ii) any increase under subparagraph (B) shall be taken into account.

"(3) CARRYOVER AND CARRYBACK OF CERTAIN CREDITS.—In the case of any taxable year for which a tax is imposed by this section, for purposes of determining the amount of any carryover or carryback to any other taxable year of any credit allowable under section 30 or 38, the amount of the limitation under section 30(g) or 38(c) (as the case may be) shall be deemed to be—

"(A) the amount of such credit allowable for such taxable year (determined without regard to this paragraph), reduced (but not below zero) by

"(B) the amount of the tax imposed by this section for the taxable year, reduced by—

"(i) the amount of the credit allowable under section 27(a), and

"(ii) in the case of the limitation under section 38(c), the amount of such tax taken into account under this subparagraph with respect to limitations under section 30(g).

"(f) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) REGULAR TAX.—The term 'regular tax' means the taxes imposed by this chapter for the taxable year (computed without regard to this section and without regard to the taxes imposed by sections 47(a), 531, and 541).

"(2) TAXABLE YEAR IN WHICH ITEM ARISES.—in the case of any amount which is taken into account for regular tax purposes in more than 1 taxable year, such amount shall be treated as an item arising in the first such taxable year.".

(b) ESTIMATED TAX.—Sections 6154(c)(1) (defining estimated tax) and 6655(f)(1) (defining tax) are each amended by inserting ", 56," after "section 11".

(c) CONFORMING AMENDMENTS.—

(1) Section 26 (relating to definition of tax liability) is amended—

(A) by striking out subparagraph (A) of subsection (b)(2) and by redesignating subparagraphs (B) through (H) of subsection (b)(2) as subparagraphs (A) through (G), respectively, and

(B) in subsection (c)—

(i) by inserting "(1)" before "For" and by adding at the end thereof the following new paragraph:

"(2) For treatment of tax imposed by section 56 as tax not imposed by this chapter, see section 56(e).",

and

(ii) by striking out the heading and inserting in lieu thereof:

"(c) SPECIAL RULES FOR MINIMUM TAXES.—".

(2) Section 57 (relating to items of tax preference) is amended—

(A) by striking out the last sentence of subsection (a),

(B) by striking out subsection (b), and

(C) by striking out subsection (3).

(3) Section 58 (relating to rules for application of past) is amended—

(A) by striking out "$10,000" in subsection (b) and inserting in lieu thereof "$100,000",

(B) by striking out "respective regular tax deduction (within the meaning of section 56(c))" and inserting in lieu there "respective corporate alternative minimum taxable incomes (within the meaning of section 56(b))",

(C) by striking out subsection (d),

(1) by striking out paragraph (1) of subsection (f) and

(2) by striking out "the item of tax preference set forth in section 57(a)(9) and" in paragraph (2) of subsection f.

(4) Section 882(a) (relating to tax on foreign corporations connected with United States business) is amended by striking "section 11 or 1201(a)" in paragraph (1) and inserting in lieu thereof "section 11, 56, or 1201(a)".

(5) The table of sections for part VI of subchapter A of chapter 1 is amended by striking out the item relating to section 56 and inserting in lieu thereof the following new item:

"Sec. 56. Additional minimum tax on corporation.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

MINIMUM TAX REFORM ACT OF 1985—
CORPORATE MINIMUM TAX

Tax Rate: The tax rate would be 15 percent of corporate alternative minimum taxable income ("CAMTI") above $100,000. The minimum tax would be payable only if it exceeded a corporation's regular income tax liability.

Tax Base: CAMTI would be equal to taxable income (as computed under the regular income tax) with the following changes:

(1) The net operating loss ("NOL") deduction would be disregarded and instead a special alternative minimum tax NOL deduction would be allowed. This special NOL deduction would be computed under the same principles as used for the present alternative minimum tax for individuals.

(2) Items designated as tax preferences would be added back to taxable income.

The 15 percent tax would be imposed on CAMTI in excess of $100,000.

Credits: Credits would be treated the same as under the present individual alternative minimum tax, *i.e.*, no credit except the foreign tax credit (and any refundable credit) could be used to offset the minimum tax. Carryovers and carrybacks of "unused" credits would be allowed.

Election: A corporation could elect to forego the preference component of any tax preference item for purposes of the regular tax. In such case, the item would not be treated as a tax preference for purposes of the minimum tax.

TAX PREFERENCE ITEMS

(1) ACRS deductions for all real and personal property. The excess of the ACRS deduction over economic depreciation (determined under the tax code section 312(k) rules for computing earnings and profits).

(2) Amortization of certified pollution control facilities. Maintains current law.

(3) Mining exploration and development cost. Present law for individuals expanded to include corporations.

(4) Newspaper and magazine circulation expenditures. Present law for individuals expanded to include corporations.

(5) *Research and experimental expenditures.* Present law for individuals expanded to include corporations, but more favorable to all taxpayers in that a five-year, not ten-year, amortization period is used.

(6) *Depletion allowance.* Maintains present law.

(7) *Capital gains.* Retained as preference item, but without special rule for timber.

(8) *Intangible drilling costs.* Strengthens present law rule for individuals by repealing the provision exempting preference treatment for intangible drilling costs to the extent of oil and gas income, and extends the rule as modified to corporations.

(9) *Exempt foreign trade income of an FSC (foreign sales corporation).* (Section 921 et seq.)

(10) *Bad debt reserves.* The excess of the deduction for additions to bad debt reserves for *all* corporations (not merely financial institutions) over specific charge-offs. (Strengthens present law rule for financial institutions and extends to all corporations.)

(11) *Special life insurance company deductions.* The deduction allowable under section 806 (a) or (b) of the tax code.

(12) *Completed contract method of accounting.* For taxpayers using the completed contract method of accounting, the excess (if any) of the income that would be reported if the percentage of completion method were used, over the income reported.

(13) *Construction period carrying changes.* (Section 189).

(14) *Certain interest where taxpayer has tax-exempt income.* Interest deductions to the extent that tax-exempt income exceeds interest disallowed under section 265.

(15) *Excluded ESOP interest income.*

(16) *Trademark and trade name expenditure deductions.* (Section 177.)

(17) *Certain shipping income.* The annual net increase to any construction reserve fund or capital construction fund established under section 511 and 607 of the Merchant Marine Act.

(18) *Reforestation expenditure deductions.* (Section 194.)

(19) *Land clearing expenditure deductions.* (Section 182.)

(20) Soil and water conservation expenditure deductions. (Section 175.)

(21) Tertiary injectant expense deductions. The excess of tertiary injectant expense deductions (Section 193) over the deduction that would be allowable if such expenses were capitalized and amortized over two years.

(22) Railroad grading and tunnel bores. The deduction allowed under section 185.

INDIVIDUAL MINIMUM TAX

The present alternative minimum tax for individuals (Section 55) would be retained, with the following changes.

Tax rate: Reduced to 15 percent.

Alternative tax itemized deductions: The deduction for state and local taxes allowed in Section 164 would be added to the list of alternative tax itemized deductions.

Exemption amounts: The exemption amounts would be increased as follows: joint return: $40,000 to $50,000; individual; $30,000 to $40,000; married filing sep./trust; $20,000 to $25,000.

Alternative minimum taxable income floor: Alternative minimum taxable income—as produced by adding the items of

tax preference to ajusted gross income—could in no event be less than the "alternative minimum taxable income floor," a new concept added by the legislaton.

The alternative minimum taxable income floor would consist of two categories of income: (1) the individual's earned income (either from salary or business enterprises controlled by him) and (2) investment income (generally, dividend and interest income). Losses from secondary business activities and investments could not be claimed against the foregoing two income categories.

Election. Same as for proposed corporation minimum tax.

TAX PREFERENCE ITEMS

1. All of the tax preference items listed above for corporations, except the following items that are inapplicable to individuals: a. Exempt foreign trade income of an FSC; b. Special life insurance company deductions; c. Railroad grading and tunnel bores.

2. Incentive stock options. (Section 57(a)(10).) Maintains present law.

3. Dividend exclusion (Section 116). The treatment of the dividend exclusion amount as a tax preference item (Section 57(a)(1)) would be repealed.●

● Mr. CHAFEE. Mr. President, today I am joining my colleague, Senator MOYNIHAN, in introducing a comprehensive minimum tax bill for both corporations and individuals. Although the current Tax Code has an alternative minimum tax for individuals and an add-on minimum tax for corporations, neither of these tax provisions is doing the job of insuring that all Americans and corporations pay their fair share of revenues.

There will be a great deal of discussion in Congress this year about the need for tax reform. If Congress does not achieve reform of the Tax Code, I believe we will face a tax revolt of major consequence in this country. While the legislation we are introducing today cannot by itself provide comprehensive tax reform, it does address one of the major issues in the tax reform debate—the issue of fairness. It is thus an interim step pending full consideration of comprehensive tax reform.

The need for fairness is far and away the most pressing reason why we need to overhaul the U.S. Tax Code. The American public has known for a long time that too many individuals and corporations do not pay their fair share. Every time an American citizen reads in the newspaper that a major corporation pays no income tax despite millions—or even billions—of dollars in profits, it reinforces popular distrust of the present system.

Polls have consistently indicated that a vast majority of the taxpaying public would not mind paying their current level of taxes if they thought that others were paying their fair share.

When we read in the newspapers that this or that massive corporation pays less than the average wage earner in America, even though each reported large profits to its shareholders, we know something is wrong. According to a study by Citizens for Tax Justice, 128 multinational corporations paid no taxes for at least 1 of the years between 1981 and 1983 despite their having received $57 billion in combined profits.

On the individual side of the ledger, the picture is no different. Statistics from the Treasury Department indicate that in 1983, 9,000 people earning at least $250,000 legally avoided all taxes; thousands of others came close. In 1969, when outgoing Treasury Secretary Joseph W. Barr revealed that 154 people getting more than $200,000 a year had paid no Federal taxes in 1967, the public was outraged. Today, many Americans brag about tax avoidance.

The cover of a recent magazine, Money, for example, featured a picture of three wealthy citizens, all sporting formal attire and holding up champagne glasses, under the headline "These Three People Have Made Fortunes But Paid No Taxes Last Year—Here's How You Can Slash Yours."

This perception of inequity in our tax system hurts compliance with our tax laws. As with any other law, people do not tend to obey those which they do not respect and which they do not perceive as fair.

The bill I am joining in the introduction of today is designed to correct this situation. It would compel wealthy individuals and profitable corporations to pay a minimum tax of at least 15 percent for income over the threshold amounts—$50,000 for individuals and $100,000 in the case of corporations.

The current corporate add-on minimum tax would be replaced by a new alternative minimum tax. The minimum tax would apply only to income in excess of $100,000, and would work very much like the current alternative minimum tax for individuals. The corporation would compute its regular tax liability, compare it with the minimum tax and pay whichever tax is greater.

The corporate minimum tax would still allow a deduction for certain net operating losses, but no tax credits would be allowed to reduce the minimum tax, except the foreign tax credit and any refundable tax credits. Carryovers and carrybacks of "unused" credits would be allowed. The 15-percent tax rate would apply to the adjusted gross income of the corporation less the special net operating loss deduction and certain itemized deductions.

Preliminary estimates are that the corporate minimum tax provisions would raise $13.5 billion in the first 3 years: $3 billion in the first year, $5 billion in the second year, and $5.5 billion in the third year. The individual minimum tax provisions would raise approximately $1 billion a year. These are preliminary estimates which are subject to change and refinement.

The new individual minimum tax would work very much like the current alternative minimum tax except that the number of so-called preference items would be increased and the rate would actually be lowered to 15 percent from the current 20 percent. This approach is consistent with the theory of tax reform now under consideration; namely, that we should try to broaden the base and lower rates.

It should be noted that the new individual minimum tax provisions puts forth a new controversial measure for making certain that we truly have a minimum tax that works.

This new approach requires individuals who earn more than $50,000 in salary or from interest or dividends actually pay a minimum of 15 percent of that income in tax, even if they subsequently go out and invest their income and lose a portion of it. There may be some harshness in this approach, but we have seen that the current system is not assuring that everyone earning over $50,000 pays at least a minimum amount in tax.

This approach will be subject to heated debate, but it is certainly worth considering. This bill thus "puts it on the table" for discussion.

I look forward to the upcoming debate over comprehensive tax reform and I think the bill which Senator MOYNIHAN and I are introducing today is consistent with that effort. I urge my colleagues to join with us in support of this proposal. ●

By Mr. BENTSEN (for himself and Mr. WALLOP):

S. 957. A bill to amend the Internal Revenue Code of 1954 to impose an excise tax on manufacturers and producers of tangible personal property, to transfer the proceeds of such tax to the Hazardous Substance Response Trust Fund, and for other purposes; to the Committee on Finance.

SUPERFUND EXCISE TAX ACT

● Mr. BENTSEN. Mr. President, I bring to the desk today a bill to provide funding for the hazardous waste cleanup program, the so-called Superfund.

The Superfund, Mr. President, is one of the most compelling and emotional issues that we have before the Senate. It has drawn as much intensity of feeling as any environmental issue I have seen. The spector of innocent victims being exposed to waste long abandoned and forgotten has created a sensitivity to the needs of this legislation that few others have obtained.

The funding mechanism for the Superfund Program expires at the end of this fiscal year. I think everyone agrees that it should be reauthorized and that it will be reauthorized. But

paying for the program is a problem with no easy solution. The current program is financed by a tax on basic chemicals, or feedstocks, and on oil, and the tax raises about $300 million per year. However, the Environment and Public Works Committee has reported out a reauthorization bill that will require at least three times that amount of revenue. The administration similarly agrees that substantially more revenue is needed to fund the program, given the rapid increase in the number of hazardous waste sites that have been discovered.

So we have the difficult issue of how to raise the revenue. One fact is for sure: Raising the feedstock tax is a bad choice. The feedstock tax was originally enacted not for reasons of equity, but for reasons of convenience. And the revenues required by the original law could be collected without significant economic side effects. As more revenues are required, they must be raised with the recognition that hazardous substances have been used pervasively throughout our economy and that the responsibility for the program should not fall entirely on one industry.

Mr. President, the petrochemical industry is suffering considerably from the effects of the last recession and is now in a vulnerable position because of the construction of plants in the Middle East and other areas rich in cheap supplies of oil and gas. The hard fact is that when we tax our domestic chemical industry, we encourage production of chemicals outside the country, and we encourage industrial users of the chemicals to manufacture their products outside the country. That is unfair to the chemical industry and irrational for the U.S. economy.

What we are faced with are several unpleasant choices: We could fund the Superfund from general revenues. But that would exacerbate the budget deficit and could also arouse fears that Superfund moneys would never actually flow through the appropriation process. We could double or triple the feedstock tax. But as I've said, that would be to compound the current inequity. That leaves us the choice of seeking new revenue sources.

One new revenue option is to tax the disposition of hazardous waste. Late last year and again this year I introduced such a proposal with Senator MOYNIHAN. And the administration has proposed a version of such a tax. But such a tax, even with a continuation of the current level of the feedstock tax, is probably not enough.

Therefore, Mr. President, I am introducing today an additional proposal that I have developed with the Senator from Wyoming, Mr. WALLOP. What we propose is a tax on sales of all manufactured goods and raw materials from the point of production.

We want to make it clear, however, that our bill is not a final product at this time, but is merely intended to put the proposal before the public for study. The Finance Committee will hold hearings on Superfund next week, and it is important that the idea of a manufacturers tax be addressed. The bill will require extensive analysis and revision, and, obviously, a tax rate for the bill will have to be determined. The draft of the bill delegates authority to the Secretary of the Treasury to set the rate based on funding requirements for the Superfund, but it is our intention to determine the proper rate at a later time.

We think a manufacturers tax has a number of attractive features for Superfund.

First, a manufacturers tax has a rational linkup with Superfund. It may be true that chemical companies produced much of the hazardous substances that we find in waste sites, but that does not mean either that they created the waste sites or, more importantly, that they received the benefits of the inexpensive disposal in waste sites. Rather, much disposal was done by manufacturers that used hazardous substances in their manufacturing. Merely because a chemical company may have produced the substances is not a sound reason to impose the entire cleanup burden on the chemical industry. Moreover, even manufacturers who were not responsible for waste sites should contribute to the cleanup effort because their purchases of chemicals and other imputs reflected the lower prices resulting from tax disposal laws; there is no reason to believe that the chemical industry was able to capture all this benefit for itself.

Second, a manufacturers tax can be spread very broadly at a very low rate. The tax base for our proposal is over $1 trillion per year. The Joint Tax Committee staff has not yet computed a tax rate for our bill, but a rough estimate is that a rate of less than 0.1 percent would raise $1 billion per year. In other words, the tax would only be 10 cents per every $100 of sales.

An advantage of the low rate and broad base is that the tax need not be complex. In putting the bill together, we were guided by the overriding desire to make it simple. We felt we could do this because of the low tax rate. We doubt that business decisions would be skewed by a tax of such de minimis proportions.

A third major advantage of a manufacturers tax is the foreign trade aspect. Because the tax is structured as a tax on sales of manufactured goods and not on companies, we were able to exempt exports from the tax and impose the tax on imports. This is the mechanism that European value added taxes use to ensure that exports can compete in foreign markets and that imports do not have an unfair advantage in domestic markets. We should not make the mistake of enacting any additional taxes in this country that do not have this advantage.

Our bill also contains what we think is a simple provision to preclude multiple levels of taxation when products move through the chain of production. Under the bill, every manufacturer will pay the tax on its sales, but will then receive a credit based on the amount of its purchases of direct materials included in the computation of its inventory costs. The number for those purchases is already computed for income tax purposes and therefore should not represent additional burden for most taxpayers. The allowable credit would be obtained simply by dividing the purchases figure by one plus the tax rate and subtracting that result from the purchases figure. That would result in the tax that should have been paid on the inputs originally, but without any complicated recordkeeping.

Lastly, Mr. President, I note that our bill contains an exemption for small producers. Under the bill, a manufacturer is subject to tax only to the extent his sales exceed $100,000 per year.

In summary, Mr. President, I think a manufacturers' tax is another proposal that should be considered as we reauthorize the Superfund this year. I will look forward to discussing this proposal in the hearings next week.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 957

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Superfund Excise Tax Act of 1985".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. IMPOSITION OF SUPERFUND EXCISE TAX.

(a) IN GENERAL.—Subtitle D (relating to miscellaneous excise taxes) is amended by inserting before chapter 31 the following new chapter:

"CHAPTER 40—SUPERFUND EXCISE TAX

"Subchapter A. Imposition of tax.
"Subchapter B. Taxable transaction.
"Subchapter C. Taxable amount; exempt transactions; credit against tax.
"Subchapter D. Administration.
"Subchapter E. Definitions.

"Subchapter A—Imposition of Tax

"Sec. 4001. Imposition of tax.

"SEC. 4001. IMPOSITION OF TAX.

"(a) GENERAL RULE.—A tax is hereby imposed on each taxable transaction.

"(b) AMOUNT OF TAX.—

"(1) IN GENERAL.—Except as otherwise provided in this chapter, the amount of the tax shall be the applicable percentage of the taxable amount.

"(2) APPLICABLE PERCENTAGE.—For purposes of this subsection, the term 'applicable percentage' means, with respect to any fiscal year, the percentage which the Secretary determines necessary to collect a sufficient amount of tax under subsection (a) to finance the Hazardous Substance Response Trust Fund for such fiscal year.

"Subchapter B—Taxable Transaction

"Sec. 4003. Taxable transaction.
"Sec. 4004. Taxable person.

"SEC. 4003. TAXABLE TRANSACTION.

"For purposes of this chapter, the term 'taxable transaction' means—

"(1) the sale of tangible personal property in the United States,

"(2) the leasing of tangible personal property in the United States, and

"(3) the importing of tangible personal property into the United States,

by a taxable person in connection with a trade or business.

"SEC. 4004. TAXABLE PERSON.

"Except as otherwise provided in this chapter, for purposes of this chapter, the term 'taxable person' means—

"(1) in the case of a taxable transaction described in paragraph (1) or (2) of section 4003, the manufacturer of the tangible personal property, and

"(2) in the case of a taxable transaction described in paragraph (3) of section 4003, the importer of the tangible personal property.

"Subchapter C—Taxable Amount; Exempt Transactions; Credit Against Tax

"Sec. 4011. Taxable amount.
"Sec. 4012. Exempt transactions.
"Sec. 4013. Credit against tax.

"SEC. 4011. TAXABLE AMOUNT.

"(a) SALE.—For purposes of this chapter, the taxable amount for any sale shall be the price (in money or fair market value of other consideration) charged the purchaser of the property by the seller thereof—

"(1) including items payable to the seller with respect to such transaction, but

"(2) excluding the tax imposed by section 4001 with respect to such transaction and excluding any separately stated transportation charges.

"(b) IMPORTS.—For purposes of this chapter, the taxable amount in the case of any import shall be—

"(1) the customs value plus customs duties and any other duties which may be imposed, or

"(2) if there is no such customs value, the fair market value (determined as if the importer had sold the property).

"(c) LEASES.—For purposes of this chapter, the taxable amount in the case of any lease shall be the gross lease payments received during the taxable period.

"(d) TIME OF RECEIPT.—The taxable amount shall be considered to be received by the taxable person for purposes of chapter 1 at the time it is recognized by the taxable person under the person's method of accounting.

"SEC. 4012. EXEMPT TRANSACTIONS.

"(a) EXPORTS.—Under regulations, no tax shall be imposed under section 4001 on the sale of any property which is to be exported outside the United States.

"(b) SALES OF LEASE PAYMENTS OF LESS THAN $100,000 DURING TAXABLE PERIOD.—

"(1) IN GENERAL.—No tax shall be imposed under paragraphs (1) and (2) of subsection 4001(a) on any taxable person for any taxable period if the aggregate taxable amount for such period is less than $100,000.

"(2) MEMBERS OF AFFILIATED GROUPS.—

"(A) CORPORATIONS.—In the case of the taxable person which is a member of an affiliated group (within the meaning of section 1504(a)), all members of such group shall be treated as one taxable person for purposes of paragraph (1).

"(B) PARTNERSHIP, PROPRIETORSHIP, ETC. WHICH ARE UNDER COMMON CONTROL.—Under regulations, all trades or businesses (whether or not incorporated) which are under common control shall be treated as one taxable person for purposes of paragraph (1).

"(c) GOVERNMENTAL ENTITIES AND EXEMPT ORGANIZATIONS.—

"(1) GOVERNMENTAL ENTITIES.—No tax shall be imposed under section 4001 on the sale or importing of any property by the United States, any State or political subdivision, the District of Columbia, a Commonwealth or possession of the United States, or any agency or instrumentality of any of the foregoing.

"(2) EXEMPT ORGANIZATIONS.—No tax shall be imposed under section 4001 on any organization which is exempt from tax under chapter 1, unless the taxable transaction is part of an unrelated business.

"SEC. 4016. CREDIT AGAINST TAX.

"(a) GENERAL RULE.—There shall be allowed as a credit against the tax imposed by section 4001 for any taxable period an amount equal to—

"(1) the excess of—

"(A) purchases of direct materials during the taxable period, over

"(B) the amount under subparagraph (A) divided by the sum of 1 plus the rate of tax under section 4001, reduced by

"(2) the rate of tax under section 4001 times $100,000.

"(b) EXCESS CREDIT TREATED AS OVERPAYMENT.—

"(1) IN GENERAL.—If for any taxable period the aggregate amount of the credits allowable by subsection (a) exceeds the aggregate of the tax imposed by section 4001 for such period, such excess shall be treated as an overpayment of the tax imposed by section 4001.

"(2) Time when overpayment arises.—Any overpayment under paragraph (1) for any taxable period shall be treated as arising on the later of—

"(A) the due date for the return for such period, or

"(B) the date on which the return is filed.

"(c) SPECIAL RULE FOR EXPORTERS.—Under regulations, in computing the credit under subsection (a), a taxable person which sells or leases property for export shall exclude from purchases of direct materials the amount of any separately stated transportation charges, but only to the extent such charges are attributable to purchases allocable to exports.

"Subchapter D—Administration

"Sec. 4021. Liability for tax.
"Sec. 4022. Time for filing return and claiming credit; deposits of tax.
"Sec. 4023. Regulations.

"SEC. 4021. LIABILITY FOR TAX.

"The taxable person shall be liable for the tax imposed by section 4001.

"SEC. 4022. TIME FOR FILING RETURN AND CLAIMING CREDIT; DEPOSITS OF TAX.

"(a) FILING RETURN.—Before the first day of the second calendar month beginning after the close of each taxable period, each taxable person shall file a return of the tax imposed by section 4001 on taxable transactions within such taxable period.

"(b) TAXABLE PERIOD.—For purposes of this chapter—

"(1) IN GENERAL.—the term 'taxable period' means—

"(A) the taxable person's taxable year for purposes of chapter 1, or

"(B) if there is no taxable year for purposes of chapter 1, the calendar year.

"(2) EXCEPTION.—

"(A) ELECTION OF QUARTERLY PERIOD.—If the taxpayer so elects, the term 'taxable period' means a calendar quarter.

"(B) OTHER PERIODS.—To the extent provided in regulations, the term 'taxable period' includes any other period selected by the taxpayer.

"(c) QUARTERLY DEPOSITS REQUIRED.—To the extent provided in regulations, quarterly deposits may be required of the estimated liability for any taxable period for the tax imposed by section 4001.

"SEC. 4023. REGULATIONS.

"The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this chapter.

"Subchapter E—Definitions

"Sec. 4031. Definitions.

"SEC. 4031. DEFINITIONS.

"(a) MANUFACTURING.—For purposes of this chapter—

"(1) IN GENERAL.—The term 'manufacturing' means—

"(A) activities in which labor or skill is applied by hand or machinery to produce a new, different, or useful substance or article of tangible personal property, including activities such as making, fabricating, processing, refining, mixing, and compounding, and

"(B) the production of raw materials.

"(2) CERTAIN ACTIVITIES NOT INCLUDED.—The term 'manufacturing' does not include—

"(A) services furnished incidental to storage or transportation of property,

"(B) the preparation of food in a restaurant or other retail food establishment,

"(C) the incidental preparation of property by a retailer or wholesaler, including routine assemblage, or

"(D) the production of unprocessed agricultural products (except timber) or unprocessed food products.

"(b) PERSON.—For purposes of this chapter, the term 'person' includes any governmental entity.

"(c) UNITED STATES.—For purposes of this chapter, the term 'United States', when used in a geographical sense, includes a Commonwealth and any possession of the United States.".

(b) CLERICAL AMENDMENT.—The table of chapters for subtitle D is amended by inserting before the item relating to chapter 31 the following new chapter:

"Chapter 30. Superfund excise tax.".

SEC. 3. TRANSFERS TO TRUST FUND.

Subparagraph (A) of section 221(b)(1) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "section 4611 or 4661" and inserting in lieu thereof "section 4001".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to taxable amounts received in taxable periods beginning after September 30, 1985.●

● Mr. WALLOP. Mr. President, in 1980, the Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, commonly known as Superfund, to provide a Federal response to spills and leaks of toxic substances at hazardous waste sites. The legislation was developed in response to the threat to public health created by the Love Canal toxic waste dump and similar hazards which came to light in the late 1970's. The goal of the legislation was to provide a temporary program to clean up existing abandoned or inactive hazardous waste sites. When no responsible parties could be identified for a wastesite, the cleanup responsibility would be assumed by Federal and State governments. Until the passage of the Superfund legislation, the Federal Government lacked the general authority to clean up hazardous waste sites or respond to spills of hazardous substances—with the one exception of spills involving navigable waterways.

It is clear the the Superfund program has filled a dangerous void. Of course, as with most Federal programs, the actual operation of the program has not been as efficient and effective as orginally envisioned by the Congress. But, in light of our inflated expectations regarding the program, any failings are certainly understandable. Part of the problem with the program is that we relied on the wornout proposition that merely throwing money at a problem will make the problem go away. Unfortunately there are still those here in the Congress and in the world outside who rely on the discredited proposition that even more spending on Superfund is the simple solution to its shortcomings.

It is likely that anyone who now insists that the hazardous waste problem will be taken care of by appropriating massive amounts of Federal funds has simply not taken the time to review the recent critical technical reports on Superfund. It is obvious that we have neither the manpower resources nor the technical sophistication to provide permanent cleanup of the Superfund hazardous waste sites. Yet we are now being urged to rush forward with an expanded and, perhaps, permanent program.

What is perhaps most disturbing about the debate over Superfund is that we do not even have a firm grasp of what are hazardous wastes, nor do we know what are the toxic impacts of such wastes on humans and the environment. EPA has issued 4 lists classifying 400 substances as hazardous wastes. The existing feedstock tax to fund Superfund only covers 43 substances. Yet there are perhaps hundreds if not thousands of substances which may be hazardous. Some would respond to this dilemma by demanding more Federal spending to fight hazardous wastes. It makes for a great stump speech, but is not realistic. In a report issued last month, GAO stated that

> Although uncontrolled hazardous waste sites pose a substantial danger to human health and the environment, the scope of the hazardous waste problem, the degree of health risks involved, and the cost of correcting these problems are unknown.

Merely spending more money is not the answer. What is necessary is for the Congress to decide the purpose and direction of the Superfund. Back in 1980, we were talking about a short-term program to clean up abandoned waste sites. We seem to have lost that rationale somewhere along the way. We are now looking at a 5-year extension, and the identification of hazardous waste sites will result in remedial cleanup action through the end of the century. A recent OTA study indicates that there are many more hazardous waste sites than EPA estimates, and cleanup will continue well into the next century. Of course, the site problem is exacerbated by the fact that current hazardous waste removal actions merely transfer wastes from one site to another, creating new priority waste sites.

We are confronted with an endless program dealing with wastes of undetermined toxicity. And, we have no idea whether our current efforts are correcting the problem, worsening the problem, or are generally ineffective. Superfund is becoming one of those Federal programs whose purpose is lost, but whose life continues. We have not had a clear idea of what kind of program we wanted. As OTA points out, this has meant that we have not emphasized the work necessary for real progress in combating hazardous wastes, such as research, development, and demonstration of innovative, permanent cleanup technologies, and building up an adequate supply of technical personnel.

In addition to the muddled organization of the program due to faults in the original law, we also have a confusion over the ultimate goal. Both GAO and OTA point out that this program has failed utterly in deciding how to measure success. We do not know how clean is clean for a hazardous wastesite. Cleanup standards do not exist because so little information is available on the risks posed to humans and the environment by chemicals at hazardous waste sites.

It is not the purpose of the Senate Finance Committee, on which I serve, to resolve these issues. Our task is to find a way to pay for the program. But, we cannot in good conscience create new tax burdens for unclear purposes. It is clear that any new funding must be restrained while we try to make some sense out of the program. We currently rely on feedstock taxes to bear the brunt of funding. The fivefold increase in spending for Superfund that is being urged cannot be funded out of increased feedstock taxes. OTA's report, Superfund Strategy, quite correctly points out that increased feedstock taxes are not feasible. The industries who pay the tax are in a highly competitive market which would not generate sufficient revenue for an expanded Superfund program. Efforts to develop a new additional source of revenue focused on a waste end tax.

At the Federal level, a waste end tax has existed in theory only. My colleague from Texas [Mr. BENTSEN] has put together a very sensible version of the tax, one which the Treasury tax experts should have paid greater attention to as they drafted their plan. However, Treasury, the same people that produced that abomination of a tax simplification bill last winter, developed their waste end tax. It is apparent that this proposal is even more unworkable than their tax simplification proposal. The greatest problem with this proposal is the inflated expectations of revenue to be raised. As OTA points out, the tax may raise some revenue for a few years, but it will quickly phase down as waste reduction efforts reduce the tax base substantially. There is a simple, fair, and workable means to fund this program.

Today, I join with Mr. BENTSEN, in introducing a broad-based plan which is designed to give recognition to the fact that we all are beneficiaries of the activities which result in the toxic waste and thus should be willing to bear the financial burden of cleanup.

We call this broad-based system, the Superfund excise tax. It proposes to tax the value of tangible personal property which is either produced or manufactured. This tax system meets our goals of simplicity and ease of administration.

The tax will apply to the value of raw materials which are produced and the value added to materials through the manufacturing process. Since the tax applies to all raw materials, excepting agricultural products, the system could replace all other forms of Superfund taxation. In the alternative this tax could be part of the formula for raising the needed revenues in the event we decide to retain feedstock taxes.

The Superfund excise tax plan does not address the appropriate rate of taxation. This will depend on what Congress decides is the appropriate level of funding and tax base mix. I will note that this system's simplicity is based on a notion of rough justice, which depends on a very low tax rate to maintain fairness.

In addition, the definition of manufacturing now in the bill will need further refinement and development, although our concept, I think, is well de-

scribed in the bill. So the bill is not fully tested, but the concept is both workable and reasonable. The Joint Tax Committee is currently studying the proposal for language improvements and revenue impacts. Given these imperfections, we feel it is important to offer this bill now to allow discussion of the concept prior to and during the upcoming hearings scheduled for April 25 and 26. This tax system is really a hybrid, combining the simplicity of the net receipts tax and the nexus of a value added tax.

Our tax calculation refers to numbers which are currently analyzed by America's businessmen. Material purchases in this calculation is from the cost of goods sold formula, now utilized for income tax purposes, and which is a line item on the tax returns of taxpayers with inventories.

In addition, the base numbers, of gross receipts and purchases, are relatively difficult to massage, and are already subject to IRS scrutiny in their audits of income tax returns. Therefore, this adds little to the burdens of tax calculation or collection.

The tax is calculated—ignoring the $100,000 floor—in the manner indicated in this chart, for which I ask unanimous consent to be printed immediately after my statement.

As Mr. BENTSEN indicated, our bill makes provisions for exports and imports. Imports will be subject to the tax as if manufactured here, and exporters will receive refunds of the Superfund tax. The adjustment for transportation in calculating the refund amount is required in order to prevent the refunding of amounts paid for transportation which are included in the material purchases line item, and yet are not subjected to this tax. For domestic sales and imports this impurity can be resolved merely by adjustment of the Superfund excise tax rate.

I ask that my colleagues give this proposal serious consideration, and join me in acknowledging that a broad-based tax such as our proposal makes the proper balance of revenue needs, collection burdens and nexus to the problem. I ask for unanimous consent to print the bill immediately following my remarks.

Gross receipts from manufacturing and production X times Superfund excise tax	X
Less Superfund tax credit: Material purchases minus (Material purchases divided by 1+SET tax rate).	Y
Equals total Superfund excise tax burden	Z●

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, and Mr. STEVENS):

S. 958. A bill to provide authorization of appropriations for activities under the Magnuson Fishery Conservation and Management Act; to the Committee on Commerce, Science, and Transportation.

MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT REAUTHORIZATION

● Mr. DANFORTH. Mr. President, today I am introducing, along with my colleagues from Oregon [Mr. PACKWOOD], Washington [Mr. GORTON], and Alaska [Mr. STEVENS], a 2-year reauthorization of the Magnuson Fishery Conservation and Management Act [MFCMA]. The Magnuson Act, enacted in 1976, authorized the Federal Government to conserve and manage the fishery resources within the U.S. conservation zone extending from the territorial sea to 200 nautical miles from shore.

The MFCMA provided for the creation of eight Regional Fishery Management Councils with the specific responsibility of developing fishery management plans for the fishery resources found in the U.S. Fishery Conservation Zone. Each fishery plan identifies the optimum yield which could be harvested annually, the U.S. harvest, the total allowable level of foreign fishing, and the management rules governing foreign and domestic harvesting.

In order to fulfill obligations conferred under the MFCMA, the National Marine Fisheries Service conducts programs involving the budget subactivities of information collection and analysis, conservation and management, and State and industry assistance. The fiscal year 1985 appropriation for carrying out these responsibilities was approximately $69 million. The bill that I am introducing today imposes a freeze on spending under the act. It provides a simple reauthorization of the act at that same figure for next year and at a 4.5 percent higher figure for fiscal year 1987.

At this time, I am not proposing any substantive amendments to the Magnuson Act. However, a hearing will be held on funding and operation of the MFCMA. Therefore, I am not foreclosing the possibility of offering changes to the act at a later date if responsible improvements are recommended.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 958

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 406 of the Magnuson Fishery Conservation and Managment Act (16 U.S.C. 1882) is amended by adding at the end thereof the following:

"(12) $68,555,000 for the fiscal year ending September 30, 1986.

"(13) $71,639,975 for the fiscal year ending September 30, 1987.".●

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, and Mr. HOLLINGS):

S. 959. A bill to amend the Coastal Zone Management Act of 1972 to provide authorization of appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

COASTAL ZONE MANAGEMENT ACT REAUTHORIZATION

● Mr. DANFORTH. Mr. President, today I am introducing, along with my colleagues from Oregon [Mr. PACKWOOD], Washington, [Mr. GORTON], Alaska [Mr. STEVENS], and South Carolina [Mr. HOLLINGS], a reauthorization of the Coastal Zone Management Act [CZMA]. This bill reauthorizes the CZMA for 5 years. It imposes a freeze on spending under the act, setting the fiscal year 1986 authorization level at the fiscal year 1985 appropriation level and allowing for a 4.5-percent increase for subsequent fiscal years.

The CZMA was enacted in 1972 and has been reauthorized twice, in 1976 and 1980. The purpose of the act is to establish and maintain a national program for the management, protection and development of the Nation's coastal areas.

Since 1972, 28 States and territories have developed and implemented federally approved coastal management plans. The Department of Commerce, specifically the National Oceanic and Atmospheric Administration [NOAA], oversees this program which involves complex relationships between the States' traditional authority in land-use planning and regulation, and the national interest in effective coastal zone management.

One incentive to induce States to participate in the CZMA programs is financial assistance. Grants are made available to States to assist them in developing and administering coastal management programs.

Over the years, changes to the act have reflected the Nation's need to attain energy self-sufficiency and to mitigate the effects of any accelerated development plans on coastal areas.

The bill being introduced today authorizes for fiscal year 1986 $2,930,000 for the Estuarine Sanctuary Program and $1 million for the interstate grant program, which encourages states to coordinate coastal zone planning, policies and programs. Further, this bill authorizes $36 million for State grants authorized under section 306 and 306a of the CZMA. Finally, $3,275,000 is made available for administration of the CZMA programs. Each of those figures is increased by 4.5 percent for each of the 4 succeeding fiscal years.

Shortly, the Commerce Committee will conduct reauthorization hearings on the CZMA as well as the preponderance of the ocean and coastal programs administered by NOAA. After

reviewing NOAA's overall activities with regard to ocean and coastal programs, the committee will evaluate how funds should be allocated for fiscal year 1986.

This reauthorization of the CZMA reflects my commitment to maintaining a freeze on funding of existing programs. However, once a review of the programs is completed, the committee may choose to shift funds from one function to another. The committee may also choose to modify the formula for section 306a grants to States so as to decrease the Federal share and reduce the overall authorization level accordingly.

Although budget concerns dominate much of the discussion this year, the CZMA hearing will necessarily address any substantive changes in the act that may be proposed.●

● Mr. HOLLINGS. Mr. President, today I am pleased to join with Senator DANFORTH and others in sponsoring legislation to reauthorize the Coastal Zone Management Act which I initially authored 13 years ago. This bill, when enacted, will allow State and Federal Governments to continue to manage and oversee the development of the diverse resources of our Nation's coastal zone.

This management is essential. By the end of the decade, an estimated 75 percent of our population will live within 50 miles of the ocean, an increase of nearly 20 percent in 20 years. In the nonmetropolitan areas of the Southeast, this increase has been even more dramatic with the population growing 40 percent in the 10 years from 1970 to 1980. In my own home State of South Carolina, the population in our eight coastal counties is expected to more than double during the next 15 years. This phenomenal growth, if allowed to occur without proper planning and management, has the potential to cause long-term degradation of our coastal resources.

The Coastal Zone Management Act, when enacted in 1972, anticipated this trend and, to date, has provided the comprehensive approach necessary to minimize the deleterious effects caused by increased population pressure. For this reason, it is vital that we continue with our commitment to the protection, management, and development of our coastal resources.

Mr. President, it is unfortunate that this important program has been funded at only about half the authorized level in recent years. Our commitment could be much stronger. However, it is also important to the long range future of the Coastal Zone Management Act that our Nation's massive deficits be eliminated. A bankrupt Treasury cannot finance the safeguarding of our coastal areas.

Therefore, I have agreed to sponsor this 5-year reauthorization at the current funding level. This is consistent with my overall program to reduce the deficit by freezing the budget. Although this bill cuts the CZM authorization level in half, it still provides for the maintenance of the current funding level—enough money to keep the program going.

Mr. President, at a time when no domestic program is safe from the budget axe, I feel it is extremely important to stress just how vital the Coastal Zone Management Act is to our Nation. We simply must continue to provide for the effective management and utilization of our precious natural resources. Only so long as the land, the air, the fresh water, and the oceans are managed properly, can man survive. Our habitats are not only a vital living part of our Republic, but a heritage and trust to be passed inviolate to the next generation. Anyone who allows these precious resources to be lost and destroyed will have sold our American birthright. I urge my colleagues to support the reauthorization of this important legislation.●

ADDITIONAL COSPONSORS

S. 12

At the request of Mr. MOYNIHAN, the name of the Senator from Wyoming [Mr. WALLOP] was added as a cosponsor of S. 12, a bill to protect communications among Americans from interception by foreign governments, and for other purposes.

S. 27

At the request of Mr. MOYNIHAN, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 27, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes.

S. 58

At the request of Mr. BENTSEN, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 58, a bill to amend the Internal Revenue Code of 1954 to increase research activities, to foster university research and scientific training, and to encourage the contribution of scientific equipment to institutions of higher education.

S. 120

At the request of Mr. MOYNIHAN, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 120, a bill to amend the Tax Reform Act of 1984 to provide a transitional rule for the tax treatment of certain air travel benefits provided to employees of airlines.

S. 177

At the request of Mr. HART, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 177, a bill to authorize a national program of improving the quality of education.

S. 209

At the request of Mr. D'AMATO, the name of the Senator from Maine [Mr. COHEN] was added as a cosponsor of S. 209, a bill to amend chapter 37 of title 31, United States Code, to authorize contracts retaining private counsel to furnish collection services in the case of indebtedness owed the United States.

S. 231

At the request of Mr. DOLE, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 231, a bill to establish a National Commission on Neurofibromatosis.

S. 361

At the request of Mr. MOYNIHAN, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 361, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by non-itemizers.

S. 402

At the request of Mr. PRESSLER, the names of the Senator from Florida [Mrs. HAWKINS] and the Senator from Montana [Mr. MELCHER] were added as cosponsors of S. 402, a bill to amend the Communications Act of 1934 to provide for specialized equipment for telephone service to certain disabled persons.

S. 408

At the request of Mr. WEICKER, the name of the Senator from Montana [Mr. MELCHER] was added as a cosponsor of S. 408, a bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

S. 426

At the request of Mr. WALLOP, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 426, a bill to amend the Federal Power Act to provide for more protection to electric consumers.

S. 531

At the request of Mr. CHILES, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of S. 531, a bill to authorize the appropriation of funds for the operation and maintenance of a Special Operations Wing of the Air Force Reserve, to authorize the appropriation of funds for the operation and maintenance of the Directorate of the Department of Defense Task Force on Drug Enforcement, and to require certain reports.

S. 663

At the request of Mr. METZENBAUM, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 663, a bill to amend the Internal Revenue Code of 1954 to

modify the alternative minimum corporate tax.

S. 725

At the request of Mr. BENTSEN, the name of the Senator from South Carolina [Mr. HOLLINGS], the Senator from Maryland [Mr. SARBANES], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of S. 725, a bill to authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal years 1986, 1987, 1988, 1989, and 1990.

S. 729

At the request of Mr. DURENBERGER, the name of the Senator from Indiana [Mr. QUAYLE] was added as a cosponsor of S. 729, a bill to amend the Internal Revenue Code of 1954 to make permanent the rules relating to imputed interest and assumption of loans, and for other purposes.

S. 796

At the request of Mr. GORTON, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 796, a bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1986, and for other purposes.

S. 885

At the request of Mr. KERRY, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 885, a bill to establish a moratorium during the fiscal years 1985 and 1986 on the testing of antisatellite weapons against objects in space.

S. 887

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 887, a bill to amend the Internal Revenue Code of 1954 to extend the deduction for expenses incurred in connection with the elimination of architectural and transportation barriers for the handicapped and elderly.

SENATE JOINT RESOLUTION 10

At the request of Mr. KENNEDY, the names of the Senator from Rhode Island [Mr. CHAFEE] and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of Senate Joint Resolution 10, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women and men.

SENATE JOINT RESOLUTION 35

At the request of Mr. GORTON, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of Senate Joint Resolution 35, a joint resolution to authorize and request the President to issue a proclamation designating April 21 through 27, 1985, as "National Organ Donation Awareness Week."

SENATE JOINT RESOLUTION 40

At the request of Mr. LUGAR, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of Senate Joint Resolution 40, a joint resolution to designate the month of October 1985 as "National Down Syndrome Month."

SENATE JOINT RESOLUTION 72

At the request of Mr. DANFORTH, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of Senate Joint Resolution 72, a joint resolution to designate October 16, 1985, as "World Food Day."

SENATE JOINT RESOLUTION 83

At the request of Mr. DOLE, the names of the Senator from Delaware [Mr. ROTH], the Senator from Hawaii [Mr. INOUYE], the Senator from Idaho [Mr. SYMMS], the Senator from Montana [Mr. BAUCUS], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of Senate Joint Resolution 83, a joint resolution designating the week beginning on May 5, 1985, as "National Asthma and Allergy Awareness Week."

SENATE CONCURRENT RESOLUTION 6

At the request of Mr. GLENN, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of Senate Concurrent Resolution 6, a concurrent resolution expressing the sense of the Congress that the policy of separate development and the forced relocation of South African Blacks to designated "homelands" is inconsistent with fundamental American values and internationally recognized principles of human rights and should be discontinued.

SENATE CONCURRENT RESOLUTION 28

At the request of Mr. CRANSTON, the name of the Senator from Rhode Island [Mr. CHAFEE] was added as a cosponsor of Senate Concurrent Resolution 28, a concurrent resolution expressing the sense of the Congress that May 18, 1985, should be commemorated as the 20th anniversary of the establishment of the Head Start Program and reaffirming congressional support for the Head Start Program.

SENATE CONCURRENT RESOLUTION 36

At the request of Mr. PROXMIRE, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of Senate Concurrent Resolution 36, a concurrent resolution expressing the sense of the Congress regarding the establishment of a joint commission between the United States and the Soviet Union to study the concept of "nuclear winter" and its impact for the national security of both nations.

SENATE RESOLUTION 130

At the request of Mr. WALLOP, the names of the Senator from Pennsylvania [Mr. HEINZ], the Senator from California [Mr. CRANSTON], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Michigan [Mr. RIEGLE], the Senator from Arizona [Mr. GOLDWATER], the Senator from Iowa [Mr. GRASSLEY], the Senator from Georgia [Mr. NUNN], the Senator from Nevada [Mr. LAXALT], the Senator from South Carolina [Mr. THURMOND], the Senator from Georgia [Mr. MATTINGLY], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Resolution 130, a resolution relative to the Sport Fish Restoration Trust Fund.

SENATE CONCURRENT RESOLUTION 41—RELATING TO GRADUATED CORPORATE TAX RATES

Mr. BAUCUS (for himself, Mr. ARMSTRONG, Mr. WEICKER, Mr. BUMPERS, and Mr. HEINZ) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 41

Whereas small businesses account for approximately 40 percent of the gross national product and two-thirds of all new employment;

Whereas this entrepreneurial spirit needs to be encouraged, not stifled by Federal tax policies which run counter to the interests of the Nation's small businesses;

Whereas certain recent tax reform proposals would repeal graduated corporate tax rates for small businesses with taxable incomes of $100,000 or less while imposing a flat corporate tax rate;

Whereas the Federal tax system has included graduated corporate tax rates in various forms since 1935;

Whereas because of economies of scale, small businesses compete at an economic disadvantage with larger businesses and therefore bear higher capital and operating costs;

Whereas the replacement of graduated corporate tax rates with a flat rate would result in a substantial tax increase for many small businesses, making it difficult for them to retain the capital they need to generate economic development and new jobs and in some cases threatening their economic viability: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the retention of graduated corporate tax rates is essential to the continued viability of the small business community and to the Nation's economy.

● Mr. BAUCUS. Mr. President, today I am submitting a concurrent resolution, for myself, Senator ARMSTRONG, Senator WEICKER, Senator BUMPERS, and Senator HEINZ, which would express the sense of the Congress that corporate tax rates should remain graduated. Congressmen RANGEL and CAMPBELL are submitting an identical resolution in the House.

THE IMPORTANCE OF SMALL BUSINESSES

Mr. President, small businesses are vital to America's economy. They account for more than 40 percent of our gross national product and two-thirds of our new jobs. What's more, they provide an important outlet for the entrepreneurial spirit that drives our economy.

This is especially true in Montana where only 13 businesses employ more

than 500 people, but over 18,000 employ 50 or less.

Many of these small businesses are fighting for their economic survival. One of the main problems they face, of course, is coping with the Federal income tax.

GRADUATED CORPORATE TAX RATES

When the Federal corporate income tax was enacted in 1909, it applied to all corporations at the same 1 percent rate. Over the next 26 years, the rate steadily rose but remained proportional; that is, a small corporation still had to pay the same tax rate as the largest conglomerate.

In 1935, this changed. In a message to Congress, President Roosevelt noted that:

* * * Our smaller corporations are fighting not only for their own local well-being but for that fairly distributed national prosperity which makes large scale enterprise possible.

Therefore, he continued:

* * * [it] seems only equitable * * * to adjust our tax system in accordance with economic capacity, advantage, and fact. The smaller corporations should not carry burdens beyond their powers * * *.

Accordingly, President Roosevelt proposed revising the corporate tax by establishing graduated corporate tax rates, so that small corporations would be subject to lower marginal rates than large ones.

Since enactment of President Roosevelt's proposal, the number of brackets and the rates have frequently changed. However, as the Congressional Research Service recently noted, "rate graduation has been a part of the United States corporate tax structure since 1935."

Under current law, the corporate tax rates are 15 percent of the first $25,000 of a corporation's taxable income; 18 percent of taxable income between $25,000 and $50,000; 30 percent of taxable income between $50,000 and $75,000; 40 percent of taxable income between $75,000 and $100,000; and 46 percent of taxable income over $100,000. As a result, corporations pay $20,250 less income tax on their first $100,000 of taxable income than they would under a flat 46 percent rate—under a provision of the 1984 Tax Act, corporations whose taxable income exceeds $1 million lose this benefit.

REFORM PROPOSALS

Recently, several proposals have been made to overhaul the Tax Code. The most prominent is the Treasury Department's proposed "Tax Reform for Fairness, Simplicity, and Growth."

This is a serious proposal that contains many sound elements. But its suggested new corporate rate structure is not one of them. Treasury proposes replacing the current system of graduated rates with a flat rate of 33 percent. On its face, enactment of this particular proposal would mean a massive tax increase for the smallest of our corporations, who now are subject to rates of 15 or 18 percent. Indeed, the National Federation of Independent Businesses recently estimated that enactment of the Treasury proposal would result in a tax increase for 75 percent of America's smallest corporations.

PROS AND CONS

I guess you could say that the Treasury's proposed flat corporate rate will simplify the Tax Code, because it will reduce the section 11 corporate rate schedule from nine lines that take up about one-half of one page to one line that takes up even less space. But it might simplify some small businesses right out of existence.

So what are the Treasury's reasons for this change? On pages 128 and 129 of volume II of the Treasury proposal, Treasury gives two. First, Treasury argues that a system of graduated rates must be based on the ability-to-pay concept and that ability to pay has no application to corporations. Second, Treasury argues that the existence of corporate rates that are significantly lower than individual rates creates sheltering opportunities that can be reduced only by the imposition of complicated personal holding company rules and similar restrictions.

This reasoning overlooks several important points.

First, the corporate income tax itself is partly based on the notion that corporations are independent entities that obtain valuable privileges from the Government and may, in return for these privileges, be subject to tax. It follows, as President Roosevelt said in his 1935 message to Congress, that "the advantages and the protections conferred upon corporations by Government increase in value as the size of the corporation increases," and that a graduated corporate tax rate takes this into account.

Second, many small businesses have difficulty obtaining loans for operating and expansion capital and must use retained earnings instead. As the 1980 White House Small Business Commission noted—while advocating a corporate rate structure that would be even more graduated than the current one:

[a] more graduated corporate tax would help expand the retained earnings available to a small company for reinvestment, and retained earnings are the soundest and most reliable source of business capital.

Third, it may be possible to revise the personal holding company rules and other similar antishelter rule so that we an achieve tax simplification without imposing a massive tax increase on the supposed beneficiaries of the simplification.

Finally, our graduated corporate rates are partly based on the fact that we want to give small corporations a break. An economist might argue that it's unfair and inefficient to tax a corner grocery at a lower rate than Safeway or A&P. But we've long believed that small businesses provide special benefits to our society and deserve reasonable incentives that help them thrive. A system of graduated corporate tax rates is a straight-forward way to provide such incentives. Some might call graduated corporate rates a "tax loophole." But even if that's true, it's one I'm not going to apologize for.

THE GRADUATED RATE RESOLUTION

Mr. President, tax reform is a worthy goal and the Treasury Department's proposal and others like it are valuable contributions to our pursuit of that goal.

But, just as the Treasury Department acknowledges that there's no need for tax reform to mean the elimination of graduated individual rates, there's no need for tax reform to mean the elimination of graduated corporate rates. They are a traditional part of our corporate tax system, have not been subject to widespread abuse or otherwise generated public discontent, and make good economic sense.

That is why we are submitting a concurrent resolution that notifies the administration, before it submits its revised tax reform proposal, that Congress believes that "the retention of graduated corporate rates is essential to the continued viability of the small business community and of the Nation's economy."

I hope that many of our colleagues will cosponsor this concurrent resolution. That way, we may be able to convince the Treasury Department and others to withdraw their opposition to graduated corporate tax rates, so that we can put this issue behind us and move on to debate other important tax reform issues.●

● Mr. WEICKER. Mr. President, as many of my colleagues know, for the past several months various members of the Small Business Committee have been holding field hearings on the subject of tax reform and the effect of reform on small businesses. It is clear after this first round of hearings that one of the most important concerns that small businesses have is whether the current graduated corporate tax rate will be retained in the various tax reform proposals that Congress will consider. It is, in fact, a universal feeling among small business persons that have appeared at these hearings that the graduated corporate rates have been of incalculable benefit in terms of their ability to retain the capital they need to grow.

As chairman of the Senate Small Business Committee, I have placed the need for graduated corporate rates that reflect the special needs of small businesses high on my legislative agenda. The importance of these rates

is not just for the survival of small businesses, however, but for the economy as a whole since it is small businesses that generate the great majority of new jobs in this country.

Fortunately, over the past few years those of us who recognize the importance of the graduated rates for small businesses have been successful in getting legislation passed that preserves, and refines, the tax rates that apply to small businesses. One of the more important elements of the 1981 Economic Recovery Tax Act [ERTA], for example, was a provision that reduced the lowest corporate tax rate from 17 percent to 15 percent. This amendment, which was offered by Senator NUNN and myself, and which passed the Senate by a vote of 92 to 0, may have been one of the reasons that small businesses were able to create all of the net new jobs during the 1982-83 recession.

In addition to the 1981 amendment, a provision was added to the Deficit Reduction Act of 1984 that was designed to ensure that a greater amount of the benefits of the lower rate enacted in 1981 would accrue to small businesses. As a means of achieving this end, the provision added a surtax on all corporate taxable income over $1 million. The intended effect of the provision is spelled out in the conference report that accompanied the bill:

The graduated corporate rate was added in 1978 to ease the burden on small business. However, large corporations as well as small corporations, are entitled to these benefits. Congress believes that large corporations should not be able to take advantage of this small business provision. Therefore, the benefits of graduated rates are generally eliminated for any corporation with large income.

Today, the special and appropriate tax treatment that has been carefully crafted for small businesses over the last decade is in danger of being eliminated. Furthermore, what should not be lost in all of this discussion of tax reform, is that much more needs to be done today to correct the current discrimination against small businesses even with a graduated corporate rate.

Fortunately, we have before us a resolution that expresses these sentiments quite forcefully, stating that, " * * * it is the sense of Congress that the retention of the graduated corporate tax rates is essential to the continued viability of the small business community * * *." For the benefit of my colleagues who are wondering why this resolution is offered at this time, I would like to point out that the Treasury Department is in the process of rewriting their earlier proposal keeping in mind the concerns expressed about many provisons, including the possibility of a single corporate tax rate, that was a part of their earlier draft. Thus, while there is still some internal debate within the administration about the wisdom of eliminating graduated corporate rates, we should make every effort to demonstrate the importance of these rates to the Nation's small businesses and our economy as a whole.

I think this resolution sends a clear and convincing signal to the administration, and anyone interested in tax reform, that retention of the current graduated corporate tax rates is indispensable to the health and welfare of our Nation's small businesses and to our economy as a whole. I commend my colleagues, Senator ARMSTRONG and Senator BAUCUS, for introducing this resolution and I urge the rest of my colleagues to support its passage at the earliest possible time.●

SENATE CONCURRENT RESOLUTION 42—URGING THE PRESIDENT TO RECONSIDER AND CANCEL HIS PROPOSED VISIT TO BITBURG

Mr. CRANSTON (for himself, Mr. METZENBAUM, and Mr. KENNEDY) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 42

Whereas President Reagan has announced his intention to visit the Bitburg military cemetery in his forthcoming trip to West Germany;

Whereas the German soldiers interred at Bitburg fell during the 1944 Battle of the Bulge, a German offensive that cost 81,000 U.S. casualties, including 19,000 American men who made the supreme sacrifice in this battle to oppose Nazi terror;

Whereas the German Sixth Panzer Army of the Waffen S.S. was led in this battle by S.S. General Joseph "Sepp" Dietrich, who was subsequently convicted of war crimes, including responsibility for the massacre by S.S. troops of American prisoners of war at Malmedy, some thirty miles from Bitburg;

Whereas survivors of victims of Nazi terror and American veterans who courageously fought against Nazi genocide and oppression are understandably offended by the President's proposed visit to Bitburg;

Resolved that it is the sense of the Senate that the President should reconsider this decision to visit Bitburg and should omit this visit from his proposed itinerary.

SENATE RESOLUTION 134—RELATING TO COST-OF-LIVING INCREASES FOR SOCIAL SECURITY RECIPIENTS

Mr. BYRD (for himself, Mr. MOYNIHAN, Mr. RIEGLE, Mr. CRANSTON, Mr. BURDICK, Mr. FORD, Mr. GORE, Mr. KENNEDY, Mr. KERRY, Mr. METZENBAUM, Mr. SARBANES, and Mr. LAUTENBERG) submitted the following resolution; which went over under Rule XIV:

S. RES. 134

Resolved, That it is the sense of the Senate that the Budget Resolution for fiscal 1985 and succeeding years shall include sufficient amounts under function 650 (Social Security) so as to allow full funding of the Cost of Living Adjustments for fiscal years 1985 through 1988.

SENATE RESOLUTION 135—ORIGINAL RESOLUTION REPORTED AUTHORIZING EXPENDITURES BY THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. HEINZ (for Mr. GARN), from the Committee on Banking, Housing, and Urban Affairs, reported the following original resolution; which was referred to the Committee on Rules and Administration:

S. RES. 135

Resolved, That, in carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Banking, Housing, and Urban Affairs is authorized from March 1, 1985 through Februay 28, 1986, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $1,878,550, of which amount (1) not to exceed $1,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $1,000 may be expended for training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1986.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 136—TO DIRECT REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. SIMPSON (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 136

Whereas, in the case of In re WHET, Inc., et al., pending in the United States Court of Appeals for the First Circuit, the constitutionality of sections 106 and 121 of the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law 98-353, has been placed in issue;

Whereas, the Department of Justice, on behalf of the executive branch, has intervened in this case to assert that these sec-

tions of the Bankruptcy Amendments and Federal Judgeship Act, which provide for the limited extension of the terms of bankruptcy judges appointed prior to the Act, violate the Appointments Clause, Article II, Section 2, Clause 2 of the Constitution;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288l(a)(1982), the Senate may direct its Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of In re WHET, Inc., et al.

SENATE RESOLUTION 137—RELATING TO COST-OF-LIVING INCREASE UNDER SOCIAL SECURITY

Mrs. HAWKINS submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 137

Whereas the Congress approved legislation in 1972 to provide automatic cost-of-living adjustments in old-age, survivors, and disability insurance benefits payable to individuals under title II of the Social Security Act;

Whereas the social security program is a self-financing program of social insurance, has adequate reserves, and is expected by the trustees of the Federal Old-Age and Survivors Insurance Trust Fund to operate at a surplus well into the next century;

Whereas the social security program is a compact into which the Federal Government has entered with the workers of this country, and those now retired have made a lifetime of payments into the social security program with the expectation of receiving adequate benefits, including cost-of-living adjustments;

Whereas old-age, survivors, and disability insurance benefits are the only source of income for millions of Americans living on fixed incomes, and the cost-of-living adjustments due to recipients under current law are the only means for such Americans to keep pace with increased prices for essential goods and services;

Whereas tampering with social security benefits, including the cost-of-living adjustment provided under current law, in order to accomplish short-range budgetary and economic objectives undermines the confidence of the public in the future of the social security program; and

Whereas the social security program is not part of the deficit problem, and any changes in the program should be made solely on basis of the constraints of the program and the effect such changes will have on the program: Now, therefore, be it

Resolved, That it is the sense of the Senate that any cost-of-living adjustment made during fiscal year 1986, fiscal year 1987, or fiscal year 1988 under title II of the Social Security Act should be made in accordance with section 215(i) of such Act, as in effect on the date of the introduction of this resolution.

● Mrs. HAWKINS. Mr. President, I am submitting a resolution today to restore the American public's confidence in the Social Security Program. For months, Social Security recipients have had to live in suspense—never knowing if their cost-of-living increase, which they are entitled to receive by law, would be increased or cut. The well publicized speculation has been followed by predictions on whether or not this year's budget resolution will include a freeze or partial decrease in the COLA—and all of this has been at the expense of the millions of Americans receiving Social Security payments.

Mr. President, I find it necessary to remind my colleagues that the Social Security Program is not a discretionary spending program. It is self-supporting. It is financed entirely by its own tax—a tax that can be used for no other purpose. If Social Security is reduced, including any delay or reduction in the cost-of-living increase, the money cannot be used for any other program. Why, then given these facts, is Congress anticipating a budget resolution that includes a reduction in benefits paid to Social Security recipients based strictly on budgetary reasons and not at all on the constraints of the program itself. Is it because it makes the proposed spending restraints in programs that are financed by the General Fund easier to swallow?

I take the size of the Government's outrageous deficit as seriously as any Member of this body, and I will work hard when the budget resolution comes to the floor to reduce that deficit, but cutting the Social Security COLA will not effect the deficit. I have heard the age-old argument that the elderly should also bear the burden of putting this country's financial house back in order. Well, Social Security is not part of the deficit problem. Social Security is included in the overall calculation of total outlays and receipts for the Government, but Social Security is running a surplus, and is predicted to run large surpluses for many years to come. If anything, its effect on the deficit is to hide the true figures. Our efforts to reduce this $200 billion deficit should be earnest and their impact be real, not cloaked in reduced figures on paper.

The Federal Government has made a compact with the workers of this country and those now retired made a lifetime of payments with the expectation of receiving their benefits—including the cost-of-living increase. We cannot and should not renege on that agreement. I am submitting this resolution today to enable a coalescence of Senators to unite with me on this important issue—to show the senior citizens of this country that we intend to honor that compact.●

SENATE RESOLUTION 138—ORIGINAL RESOLUTION REPORTED AUTHORIZING EXPENDITURES BY THE COMMITTEE ON APPROPRIATIONS

Mr. HATFIELD, from the Committee on Appropriations, reported the following original resolution; which was referred to the Committee on Rules and Administration:

S. RES. 138

Resolved, That, in carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings and making investigations as authorized by paragraph 1 of rule XXVI of the Standing Rules of the Senate, the Committee on Appropriations is authorized from March 1, 1985 through February 28, 1986, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the proper consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $4,594,665, of which (1) not to exceed $115,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202 (i) of the Legislative Reorganization act of 1946, as amended), and (2) not to exceed $8,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

SEC. 3. The Committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but no later than February 28, 1986.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER AND POWER

Mr. MURKOWSKI. Mr. President, I would like to announce for the information of the Senate and the public that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources has scheduled a public hearing on Tuesday, June 11, 1985, in Washington, DC. The Subcommittee will receive testimony on the following bills:

S. 403. To amend the Federal Power Act to establish policy and procedures to guide the Federal Energy Regulatory Commission in the issuance of new licenses to operate existing hydroelectric facilities.

S. 426. To amend the Federal Power Act to provide for more protection to electric consumers.

The hearing will be held in room SD-366 of the Dirksen Senate Office

Building, Washington, DC, at 10 a.m. Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Water and Power, U.S. Senate, Washington, DC 20510.

For further information regarding this hearing, please contact Mr. Russ Brown of the subcommittee staff at 202-224-2366.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES

Mr. COCHRAN. Mr. President, the Senate Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs will hold a hearing on Monday, April 22, 1985, in Cincinnati, OH, on the management of health and safety at Department of Energy facilities. The hearing will be held in room 300 of the Council Chambers of the Cincinnati City Hall in Cincinnati beginning at 9:30 a.m. For further information, please contact June Walton at 202/224-3158 or Len Weiss at 202/224-4508.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources.

On Friday, April 26, 1985, beginning at 9:30 a.m., in room SD-366 of the Dirksen Senate Office Building, the committee will consider the following nominations:

Helmut A. Merklein, of the District of Columbia, to be Administrator of the Energy Information Administration; Theodore J. Garrish, of Virginia, to be an Assistant Secretary of Energy, congressional, intergovernmental and public affairs; J. Michael Farrell, of the District of Columbia, to be General Counsel of the Department of Energy; and Joseph Frank Salgado, of Virginia, to be Under Secretary of the Department of Energy.

Those wishing to testify or to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510.

For further information regarding these hearings, you may wish to contact David Doane at 202-224-5305.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate, on Thursday, April 18, 1985, in closed executive session to meet with the Swedish Minister of Defense for discussion on security issues in Northern Europe.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INVESTIGATIONS

Mr. SIMPSON. Mr. President, I ask unanimous consent that the permanant Subcommittee on Investigations, of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Thursday, April 18, 1985, to conduct a hearing on the U.S. Government's Personnel Security System.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

REMEMBRANCE OF THE VICTIMS OF THE HOLOCAUST

● Mr. LAUTENBERG. Mr. President, today, April 18, 1985, begins the Days of Remembrance of the Victims of the Holocaust. This year's commemoration is particularly poignant because it marks the 40th anniversary of the liberation of the concentration camps in Europe.

The liberation of the camps in 1945 revealed to the entire world the horrible evidence of the Holocaust. From the day the first Allied soldiers opened the gates of the camps, revealing their ghastly history, remembrance became an obligation for those who endured, those who saw the horror firsthand, the rescuers, and for those who were only distant witnesses.

The term Holocaust uniquely defines this, one of the most profound of tragedies in the history of our civilization. It is not now, nor may it ever be, fully understood. No sane person could conceive the magnitude of this devastation of humankind. The destruction of Eastern European Jewry, both the people and their life, their history and culture, was uniquely the Holocaust.

The Holocaust was a reign of terror in this, the most advanced century of mankind. Six million Jews and millions of other innocent victims of Nazi oppression had their lives extinguished by a modern state using the full powers of the law, not to preserve or enhance human life and dignity, but to events of the Holocaust were not, as we would often prefer to think, a random outbreak of maniacal lawlessness; rather they were the rigorous, systematic, bureaucratically organized, legally sanctioned murder of millions of innocent people whose only crime was the Jewish identity of one of their grandparents.

The evil did not begin with extermination. It commenced slowly, in gradual stages, escalating from discrimination and random violence. After each move, Hitler and his Nazi colleagues waited, assessing the reaction, wondering aloud if anyone cared. By 1941, Hitler was ready to go forward with what was called "The Final Solution of the Jewish Question." That was the terrible bureaucratic name for the plan to annihilate the Jews of Europe. And so the concentration camps became death camps. The drum roll of their names echoes inside our heads with a chilling awesomeness: Auschwitz, Maidanek, Treblinka, Belzec • • •

And while the death camps were performing their dreadful tasks, the civilized world stood silent. In the chronicles of those horror-stricken days, while the odor of burning flesh putrified the air of the rural countryside where the death factories did their work, not a single bombing raid on the railroad tracks leading to the camps or the mass destruction machinery was permitted. Even a few days of interruption in the death works might have saved thousands of lives. By silence, by inaction, those who knew of the horror, without intention or malice, contributed to the process. Silence helps only the oppressor, never the victim.

As we recall the memory of inhumanity in its most extreme form, we must not become indifferent to the more ordinary forms of evil which surround us; rather our understanding of the past must sharpen our sensitivity to the present and our stake in the future. In the midst of the most evil period in modern history, human resilience persisted. In the Warsaw Ghetto, young Jews resisted the efforts of the Germans to deport them. To almost the last person, they held the German Army at bay for more than 3 weeks, longer than the armies of many European countries were able to do. And non-Jews, like the Danish people, showed courage too. They resisted the Nazis and saved almost all the Jews in their land. They merely treated these citizens as neighbors in their community. The ordinary became extraordinary in the Holocaust.

We must also remember the survivors. Forty years ago, their skeletal bodies and staring eyes shocked the world. Even more than the rows of stacked corpses, the sight of those ravaged faces represented the horror of the Holocaust to the outside world.

The courage, the indomitable human spirit of the survivors, must truly be remembered and honored. They endured the worst hell that man can contrive, and they maintained the will to live. Theirs was the true victory, not the victory of the battlefield.

The exceptional determination of the survivors is a true wonder. Women who saw their first families perish in flames somehow found the courage to bring human life into this world again. Sons who parted from fathers had the tenacity to share life anew with their sons. The people who saw the collapse

of all vision, who understood that despair was a correct understanding of our reality, learned to dream and to hope. Many rebuilt their lives in this country, while others restored themselves in a recreated homeland in Israel.

And so we set aside the Days of Remembrance each April to keep alive the memory of those who were killed and to honor the survivors. If we let the memory slip away, if we fail to remember, then the enemies of humanity will finally conquer. That would be unthinkable. And so we pause in the daily rhythm of our lives to remember.

I fear that unless we remember, unless we act, the tragedy of the Holocaust may become a precedent, and precedent invites repetition. Human solidarity, our collective efforts, and our sense of empathy can make a difference. Together we must strive to affirm the resilience of the human spirit and the power of compassion while recognizing the vulnerability of life and its value. We must strive to live in harmony and in peace, and to use government in service of humanity. Together, we pause to remember those who died in the Holocaust so that their memory may serve as a warning and as a blessing in our rededication to life.●

AMERICAN CAPTIVES IN LEBANON

● Mr. SIMON. Mr. President, today I wish to bring to the attention of my colleagues the continued captivity of five American citizens in Lebanon.

On February 14, 1985, we were all relieved by the return of Jeremy Levin, Beirut bureau chief for Cable News Network, who had been kidnapped on March 7, 1984. We were pleased that one of the Americans had achieved safety and was reunited with his family.

However, remaining hostages in Lebanon are:

William Buckley, a 57-year-old Embassy political officer who was kidnapped on March 16, 1984.

Rev. Benjamin Weir, a 62-year-old Presbyterian minister and educator who was kidnapped on May 18, 1984.

Peter Kilburn, a 60-year-old AUB librarian who was last seen on November 30, 1984.

Father Lawrence Jenco, a 51-year-old Catholic priest from Joliet, IL, who served as director of the Catholic Relief Services in Beirut until his kidnapping on January 8, 1985.

Terry Anderson, Middle East bureau chief for the Associated Press, who was kidnapped on March 16, 1985.

I recently met with members of the Jenco and Weir families. They are urging their Government officials to secure the release of these men. They are asking us to put the safe release of these hostages on the front burner. They are pleading with us to make serious efforts on behalf of their family members, who appear to have been kidnapped in spite of their humanitarian services.

I urge my colleagues and the administration to continue all efforts being made on behalf of these families. Because of the deteriorating situation in Lebanon, there is an increasingly urgent need for a concentration of diplomacy to secure the liberation of American hostages in Lebanon

The families of these distingushed men pray and anxiously plead for their safe release. Let us be confirmed that we are pursuing all available sources of assistance.●

"COMMUNISTS FOR SALE?"

● Mr. ARMSTRONG. Mr. President, if you paid Ronald Reagan enough money, do you think you could persuade him to become a Communist?

What a ridiculous question. But for some reason, a lot of people seem to take seriously an equally farfetched idea—that the United States can buy off Marxist client states in the Third World. According to this theory, new Communist regimes are not necessarily anti-American but only become so because the United States hard line policies drive them into the arms of Moscow.

Communist regimes in Nicaragua, Angola, Mozambique, Ethiopia, Vietnam, North Korea, Cuba and elsewhere have been hinting that they might be more friendly toward the United States if we overlooked their Marxist-Leninist doctrines and turned on the spigots of economic assistance. Some people sincerely believe these countries and others are asking us to wean them away from Moscow.

There are some pretty obvious problems with this theory. So far, the only evidence of new-found flexibility from the regimes in question is just a willingness to accept American largess. None of these regimes has given the slightest indication that it would be willing to modify its brutal internal system in any meaningful way, such as opening a dialog with internal opponents or permitting free expression.

Nor do such regimes seem able to kick the habit of supporting wars of national liberation that destabilize their neighbors, or to quit voting in lock step with the U.S.S.R. in international forums. But still the West is hopeful. We are sending literally hundreds of millions of dollars in food aid to the wretched and starving people of Marxist Ethiopia, while the Soviet Union is sending an aerobic exercise team.

The fact is, Communists are not for sale, and all past attempts to curry favor with such regimes have been distinctive failures. People said for years that we drove Castro into the Soviet camp by overreacting to a popular uprising with democratic potential. The Carter administration, in an experimental whimsey, put this theory to test in Nicaragua. In the first 2 years after the revolution that toppled Somoza in 1979, the United States funneled more aid to the Sandinistas than Somoza had received in the previous 20 years. The aid was later suspended as the Marxists consolidated their rule.

For Communist regimes this is the oldest trick in the book. The prototype for this scam was the U.S.S.R.'s so-called "New Economic Policy" of the 1920's. Frankly described by Lenin as a partial return to capitalism, the Soviets permitted small tradesmen, private agriculture and foreign investments beginning in 1921. Foreign opinion hailed the NEP as the Soviet Union's economic thaw and predicted the rapid demise of the Bolshevik experiment and a return to normality. Such talk ended with the NEP in 1928 when the Soviets closed out the foreign investors, collectivized agriculture, expropriated the tradesmen and inagurated the first 5-year plan for superindustrialization. The NEP was revealed for what it was: a temporary correction of a defective command economy and a means of building the capital plant for the construction of socialism.

This kind of passion about socialism and communism seems a complete mystery to advocates of conversion through aid. Some people really believe the ultimate goal of the Sandinistas is as innocent as giving Managua health care second to none. Or that Castro worries because ordinary Cubans can buy only one new shirt a year. Or that North Korea's Kim Il-sung transformed himself into a secular deity so as to set up the world's best food stamp program.

The Mengistus, Machels, Ortegas, Pol Pots and other Communist despots realize that in their Marxist-Leninist ideology they have the most powerful and comprehensive force yet devised for reducing people to complete and total subservience. They are kept secure in their power by the two great ironies of Marxism. First, despite its atheism, Marxism itself has become a kind of religion, with its practitioners clinging to their beliefs with a kind of faith that defies all objective evidence of failure. Second, though touting itself as the scientific means to communal rule by the toiling masses, Marxism has resulted in the modern equivalent of the absolute monarch. Today's Marxist princes know Communist ideology and its worldwide movement are essential to them. They are not about to give them up.

The idea that their conviction, privilege and personal security are for sale to the West is patronizing as well as absurd. It assumes that Third World

radicals are not independent actors, but instead are automatons reacting to stimuli of our choosing. There appears to be at least a germ of cultural arrogance, if not racism, in this view, which refuses to take other ideas and intentions seriously.

As several young Communist regimes in the Third World totter on the brink of overthrow by popular forces, why should we bail out the unpopular regimes? For that matter, why shouldn't we lend a hand to freedom fighters if we can?

No, not all things are for sale. No Marxist prince will sell his Leninist birthright for a mess of capitalist pottage. And no one who lives in a free country should sell out those who do not.●

UNITED STATES-SOVIET UNION RELATIONS

● Mr. SIMON. Mr. President, it is of paramount importance to all of us that we improve the relations between the Soviet Union and the United States. Because I strongly believe that, several of the weekly columns that I write for the newspapers in my State have focused on United States-Soviet Union relations. I ask that the following three columns be reprinted in full in the RECORD.

Th articles follow:

SOVIET TRADE: AN IMPORTANT ISSUE

While the focus of world attention is on the arms talks in Geneva, Secretary of Commerce Malcolm Baldridge will hold a meeting on trade in Moscow that has a much better chance than the Geneva talks to get somewhere—and should be watched with great interest.

We have been stumbling badly in world trade. The Japanese car decision by President Reagan is an example of doing the wrong thing on trade with Japan. Unfortunately, we also have been discouraging world trade with many other nations and the Soviet Union is one of them.

The Soviet are eager to trade more with us, and that is in our interest as well as theirs. Almost all the trade with the U.S.S.R. up to this point is in grains. That could be increased.

In 1983 the Soviets bought about $40 billion worth of manufactured goods from Western Europe and about $110 million from us.

One top U.S. industrial leader told me the other day that when his U.S. company—based in Illinois—does business with the Soviet Union he runs into all kinds of problems with the U.S. government. There is clear resistance. When a firm he owns in West Germany wants to do business with the Soviet Union, West Germany does everything it can to encourage trade. When does the business go? The answer is obvious.

And that is just one of a host of illustrations.

We require that Soviet ships, coming here to pick up grain and manufactured goods, give our ports 14 days' notice. Ships from other countries are required to give only three days' notice. If the same Soviet ships dock in Canada or Argentina or France they are given the same treatment accorded other nations. That encourages the Soviets to buy from other countries rather than the U.S.

We seem intent on placing as many barriers as possible in the way of more sensible relations between our two countries.

Another example: we have banned seven different types of furs from the Soviet Union.

The result is that the furs are sent to other countries—like Canada—and the coats and hats and other products are manufactured in their countries and then the final product is shipped into the United States. We have banned Soviet furs—and also American jobs in the process.

When the Soviets wanted to build a pipeline, we sanctimoniously issued an order that our suppliers could not provide the earthmoving machinery and pipes for the pipeline. The Soviets simply bought from France and Japan—and finished their pipeline ahead of time. Who was hurt? Not the Soviet Union, other than perhaps their pride a little. Those hurt were employees of the Caterpillar company and other Americans who lost their jobs.

Our trade deficit right now is causing the loss of approximately three million U.S. jobs. That has to be turned around, on a country by country basis.

One of the nations that is most important is the Soviet Union, not because they are a huge trading partner, but because the more we can have normal relations in trade and student exchanges and the arts with them, the more we improve the atmosphere which could make possible success in arms control. The real problems in the arms control talks are not the technical problems with Pershing II's and SS-20's and the weapons that we argue about, but the atmosphere, the mood of distrust. That is not going to turn around overnight but it can gradually be improved through things like trade.

The meeting between Secretary of Commerce Malcolm Baldridge and Soviet Deputy Trade Minister Vladimir N. Sushkov is one of those meetings that will not provide headlines. But it is a meeting that can improve our economy by providing more American jobs, and it can help to avoid grim arms headlines in the future.

Secretary Baldridge is on an important assignment and I wish him well.

P.S./WASHINGTON

In the hundreds of comments and observations about the change in Soviet leadership, perhaps the one with the greatest insight was that of columnist Georgie Anne Geyer who pointed out that the greatest change in the Soviet Union is not that at the top which is so visible, but the generational change that signifies a shift in attitude.

She quotes a Soviet sociologist, Vladimir Lisovsky, who, in an in-depth study of Soviet youth, found these were their hopes for life, in this order: To get an interesting job, to receive a higher education, to visit foreign countries, to be well off, to have good living conditions, to improve their qualifications for work, to find loyal friends, to bring up children to be worthy people, to find their true love, to build a family, to buy a car, to receive secondary education.

What is interesting in that list is there is no Communist ideological tilt to the list. While if differs somewhat from a list American youth would put together because of a different culture, there is more similarity than difference.

Soviet leadership cannot completely ignore public opinion. Soviet leaders have a total hold on the media that helps to create public opinion, but the list of youthful dreams and ambitions suggests that media manipulation has its limits.

How will the new Soviet leadership respond to these hopes?

No one knows with any certainty.

But it seems reasonable to conclude that among the ambitions of the new Soviet leadership is the desire to develop some degree of grass roots popularity, as well as a favored place in history. Politicians the world over have that in common.

The United States, through our policy makers, must make clear to the Soviet leaders that popularity, both today and in history, is more likely if the Soviets do three things:

First, exercise restraint in foreign policy; no more Afghanistans.

Second, enter into agreements with the United States on arms, trade, and cultural exchanges.

Third, tone down their anti-American rhetoric.

The last two points will require more positive action on the part of the United States than has been in evidence in recent years. Agreements require action by two sides; and we also need to talk less stridently.

If the Soviets sense that the United States is willing to work with them on the last two points—agreements and toning down hostile talk—my instinct is that Soviet adventurism will diminish.

It is at least worth a try.

NEW LEADERSHIP IN SOVIET UNION

What does the death of Soviet leader Konstantin Chernenko mean?

A great deal of speculation is going on now, but a few conclusions can be drawn:

1. The emergence of Mikhail Gorbachev as the Soviet leader is good news. His leading rival for that position, Grigori Ramanov, is a hard-liner. Romanov was in charge of the Leningrad region and was harsher in his treatment of refuseniks, dissidents, and foreigners than those in charge of the Moscow area. Gorbachev appears to be more open to the west, both in style and substance.

2. Little immediate change in policy is likely. There is a remarkable stability in the Soviet government and policy for a government based on such radical premises. Andrei Gromyko has been Foreign Minister since 1957, and during that period we have had nine secretaries of state. Anatol Dobrynin has been the Soviet ambassador to the United States since 1962, and during that period we have had seven ambassadors to Moscow. For the immediate future, change is likely to come slowly.

3. Long-range changes will be both good and bad. Bad in the sense that Moscow is likely to put on a more pleasant face and that could cause the Soviets to be more effective politically. Good in that there will come some significant modifications of the Soviet economic policy; many Soviet officials are semi-open about their realization of major flaws in the present system. They expected changes under Yuri Andropov, but illness and death prevented that. Chernenko was always regarded as an interim leader with no changes expected. But now hopes and expectations will rise, and changes of substance are likely on how they manage their economy.

The good news could also be greater flexibility at the arms control talks, though that is a two-way street and the Reagan adminis-

tration must demonstrate greater flexibility also if the talks are to be more than cosmetically meaningful.

Depending on how well the arms talks go, the good news could be that people like Anatol Schransky and Andrei Sakharov and Naum Meiman will have a chance to emigrate, and that the harsh treatment of Soviet Jews and Pentecostals will improve slightly.

It is very unlikely that the Afghanistan situation will change. If Gorbachev wanted to send a really impressive signal to the world of more moderate Soviet policy, this would be it. But internal Soviet politics make this most unlikely.

Nothing is more important to the survival of life on this planet than an improved U.S.-Soviet relationship.

We need gestures of friendship on both sides. We do not like the Soviet system of government and they do not like ours. We ought to be able to accept that without blowing up the world.

The change in leadership may open the door slightly to greater understanding.●

EXTENSION OF EXPENSE DEDUCTION—S. 887

● Mr. D'AMATO. Mr. President, I rise today to add my name as a cosponsor of S. 887, legislation introduced by the distinguished majority leader, Senator DOLE, to extend the current deduction for expenses incurred in removing architectural barriers to the handicapped.

Under current law, a company may deduct up to $35,000 annually for expenditures made in making a building more accessible to the public. The deduction would be in lieu of depreciating the property. This provision now is scheduled to expire on December 31, 1985.

Senator DOLE has championed this cause since these provisions were first enacted in 1976. S. 887 would extend the deduction for expenses incurred in removing barriers to the handicapped through 1989.

I believe it is absolutely imperative that the Federal Government encourage businesses to make their buildings accessible to the handicapped. Without Senator DOLE's efforts there would be little or no incentive for employers to take care of the needs of the handicapped.

It is my hope that S. 887 will be passed by the Senate in the near future. Businesses need time to plan necessary rehabilitation. With the current provisions expiring at the end of this year, companies cannot otherwise be certain that their costs will be expensable. I urge my colleagues in the Senate to support the prompt enactment of S. 887.●

INCOME TAX RETURN OF SENATOR CRANSTON

● Mr. CRANSTON. Mr. President, I am inserting in the CONGRESSIONAL RECORD all the information on my form 1040 for the tax year 1984. I ask that the form be printed in the RECORD at this point.

The form follows:

Alan and Norma Cranston, 2024 Camden Avenue, Los Angeles, California 90025; [redacted] xxx-xx-x...; xxx-xx-xxxx.

Your occupation, U.S. Senator. Spouse's occupation, Housewife.

Filing status: (2) Married filing joint return (even if only one had income).

Exemptions: (6a) Yourself, (b) Spouse, 65 or over—3.

Income:

(7) Wages, salaries, tips, etc.—72,600.

(8) Interest income *(also attach Schedule B if over $400)*—3,188.

(9a) Dividends *(also attach Schedule B if over $400)*—6,419, (9b) Exclusion 200—6,219.

(11) Alimony received—

(12) Business income or (loss) *(attach Schedule C)*—21,700.

(13) Capital gain or (loss) *(attach Schedule D)*—4,861.

(16) Fully taxable pensions, IRA distributions, and annuities not reported on line 17—28,544.

(17a) Other pensions and annuities, including rollovers. Total received—836.

(b) Taxable amount, if any, from the worksheet on page 10 of Instructions—466.

18. Rents, royalties, partnerships, estates, trusts, etc. *(attach Schedule E)*—78,985.

(21a) Social security benefits. (see page 10 of instructions)—5,656.

(b) Taxable amount, if any, from the worksheet on page 11 of instructions—2,828.

(22) Other income (state nature and source—see page 11 of Instructions).

(23) Add lines 7 through 22. This is your total income—219,391.

Adjustments to income:

(25) Employee business expenses *(attach Form 2106)*—2,222.

(29) Alimony paid—45,584.

(31) Add lines 24 through 30. These are your total adjustments—47,806.

Adjusted gross income:

(32) Subtract line 31 from line 23. *This is your* adjusted gross income. *If this line is less than $10,000, see "Earned Income Credit" (line 59) on page 16 of Instructions. If you want IRS to figure your tax, see page 12 of Instructions*—171,585.

Tax computation:

(33) Amount from line 32 (adjusted gross income)—171,585.

(34a) If you itemize, attach Schedule A (Form 1040) and enter the amount from Schedule A, line 26—45,304.

(35) Subtract line 34a or 34b, whichever applies, from line 33—126,281.

(36) Multiply $1,000 by the total number of exemptions claimed on Form 1040, line 6e—3,000.

(37) Taxable Income. Subtract line 36 from line 35—123,281.

(38) Tax. Enter tax here and check if from Tax Rate Schedule X, Y, or Z,—43,432.

(40) Add lines 38 and 39. Enter the total—43,432.

Credits:

(45) Add lines 41 through 44. These are your total personal credits—0.

(46) Subtract line 45 from 40. Enter the result (but not less than zero)—43,432.

(50) Subtract line 49 from 46. Enter the result (but not less than zero)—43,432.

Other taxes: (56) Add lines 50 through 55. This is your total tax—43,432.

Payments:

(57) Federal income tax withheld—18,948.

(58) 1984 estimated tax payments and amount applied from 1983 return—33,361.

(64) Add lines 57 through 63. These are your total payments—52,309.

(65) If line 64 is larger than line 56, enter amount overpaid—8,877.

Refund or amount you owe:

(67) Amount of line 65 to be applied to our 1985 estimated tax—8,877.

Medical and dental expenses:

(1) Prescription medicines and drugs; and insulin—413.

(2a) Doctors, dentists, nurses, hospitals, insurance premiums you paid for medical and dental care, etc.—9,789.

(3) Add lines 1 through 2c, and write the total here—10,202.

(4) Multiply the amount on Form 1040, line 33, by 5% (.05)—8,579.

(5) Subtract line 4 from line 3. If zero or less, write 0. Total medical and dental.—1,623.

Taxes you paid:

(6) State and local income taxes—23,679.

(7) Real estate taxes—1,486.

(8a) General sales tax (see sales tax tables in instruction booklet)—608.

(9) Other taxes (list—include personal property taxes) Schedule attached—6.

(10) Add the amounts on lines 6 through 9. Write the total here. Total taxes—25,779.

(11a) Home mortgage interest you paid to financial institutions—4,965.

(13) Other interest you paid (list) Schedule attached—8,618.

(14) Add the amounts on lines 11a through 13. Write the total here. Total interest.—13,583.

(15a) Cash contributions. (If you gave $3,000 or more to any one organization, report those contributions on line 15b.)—5,070.

(18) Add the amounts on lines 15a through 17. Write the total here. Total contributions—5,070.

Miscellaneous deductions:

(21) Tax return preparation fee—2,250.

(22) Other (list type and amount) Schedule attached—399.

(23) Add the amount on lines 20 through 22. Write the total here. Total miscellaneous—2,649.

Summary of Itemized Deductions:

(24) Add the amounts on lines 5, 10, 14, 18, 19, and 23. Write your answer here—48,704.

(25) If you checked Form 1040. (Filing Status box 2 or 5, write $3,400)—3,400.

(26) Subtract line 25 from line 24. Write your answer here and on Form 1040, line 34a. (If line 25 is more than line 24, see the Instructions for line 26 on page 22.)—45,304.

SCHEDULE B—INTEREST AND DIVIDEND INCOME

(2) Other interest income (list name of payer) Schedule attached—3,188.

(3) Add the amounts on lines 1 and 2. Write the total here and on Form 1040, line 8—3,188.

Part II dividend income:

(4) Schedule attached—6,419.

(5) Add the amounts on line 4. Write the total here—6,419.

(10) Subtract line 9 from line 5. Write the result here and on Form 1040, line 9a—6,419.

(11) At any time during the tax year, did you have an interest in or a signature or other authority over a bank account, securities account, or other financial account in a foreign country? (See page 23 of the Instructions for exceptions and filing requirements for Form TD F 90-22.1)—No.

(12) Were you the grantor of, or transferor to, a foreign trust which existed during the current tax year, whether or not you have any beneficial interest in it? If "Yes,"

you may have to file Forms 3520, 3520-A, or 926.—No.

PROFIT OR (LOSS) FROM BUSINESS OR PROFESSION

(F) Was there any change in determining quantities, costs, or valuations between opening and closing inventory? No.

(G) Did you deduct expenses for an office in your home. No.

Part I Income:

(1a) Gross receipts or sales—21,700.

(c) Subtract line 1b from line 1a and enter the balance here—21,700.

(3) Subtract line 2 from line 1c and enter the gross profit here—21,700.

(5) Add lines 3, 4a, and 4b. This is the gross income—21,700.

(32) Net profit or (loss). Subtract line 31 from line 5 and enter the result. If a profit, enter on Form 1040, line 12, and on Schedule SE, Part I, line 2 (or Form 1041, line 6). If a loss, you MUST go on to line 33—21,700.

CAPITAL GAINS AND LOSSES

Part I Short-term Capital Gains and Losses—Assets Held One Year or Less (6 months if acquired after 6/22/84):

(4) Net short-term gain or (loss) from partnerships, S corporations, and fiduciaries—112.

(5) Add lines 1 through 4 in columns f and g—112.

(6) Combine columns f and g of line 5 and enter the net gain or (loss)—112.

(8) Net short-term gain or (loss), combine lines 6 and 7—112.

Part II Long-term Capital Gains and Losses—Assets Held More Than One Year (6 months if acquired after 6/22/84):

(12) Net long-term gain or (loss) from partnerships, S corporations, and fiduciaries—11,872.

(13) Add lines 9 through 12 in columns f and g—11,872.

(14) Combine columns f and g of line 13 and enter the net gain or (loss)—11,872.

(17) Combine lines 14 through 16—11,872.

(19) Net long-term gain or (loss), combine lines 17 an 18—11,872.

Part III Summary of Parts I and II:

(20) Combine lines 8 and 19, and enter the net gain or (loss) here—11,984.

(21) If line 20 shows a gain, enter the smaller of line 19 or line 20. Enter zero if there is a loss or no entry on line 19—11,872.

(22) Enter 60% of line 21—7,123.

(23) Subtract line 22 from line 20. Enter here and on Form 1040, line 13—4,861.

SUPPLEMENTAL INCOME SCHEDULE

Part I Rent and Royalty Income or Loss:

(1) Did you or a member of your family use for personal purposes any rental property listed below for more than the greater of 14 days or 10% of the total days rented at fair rental value during the tax year? No.

Property A. Schedule attached.

Rental and Royalty Income: 100,911.

(17) Total expenses other than depreciation and depletion. Add lines 4 through 16—29,149.

(18) Depreciation expense (see instructions), or depletion—5,336.

(21) Add properties with profits on line 20, and write the total profits here—66,426.

(23) Combine amounts on lines 21 and 22, and write the net profit or (loss) here—66,426.

(25) Total rental or royalty income or (loss). Combine amounts on lines 23 and 24, and write the total here. If Parts II, III, and IV on page 2 do not apply to you, write the amount from line 25 on Form 1040, line 18. Otherwise, include the amount in line 39 on page 2 of Schedule E—66,426.

Schedule attached—1,325.

(26) Add amounts in columns (d) and (e) and write the total(s) here—1,325.

(27) Combine amounts in columns (d) and (e), line 26, and write the net income or (loss) here—1,325.

(28) Deduction for section 179 property (from Form 1065, Schedule K-1). (See Instructions for limitations.)—(0).

(29) Total partnership income or (loss). Combine amounts on lines 27 and 28. Write the total here and include in line 39 below—1,325.

Schedule attached—11,234.

(30) Add amounts in columns (d) and (e) and write the total(s) here—11,234.

(31) Total estate or trust income or (loss). Combine amounts in columns (d) and (e), line 30. Write the total here and include in line 39 below—11,234.

Part IV Summary (39) Total income or (loss). Combine lines 25, 29, 31, 35, and 38. Write total here and on Form 1040, line 18—78,985.

COMPUTATION OF SOCIAL SECURITY SELF-EMPLOYMENT TAX

Regular Computation of Net Earnings from Self-Employment: (2) Net profit or (loss) from Schedule C (Form 1040), line 32, Schedule K-1 (Form 1065), line 17a (other than farming), and Form W-2 wages of $100 or more from an electing church or church-controlled organization (See instructions for other income to report)—21,700.

(3) Maximum income for optional methods—$1,600.

(8) Enter the amount from Part 1, line 2, or, if you elected the nonfarm optional method, Part II, line 6—21,700.

(9) Add lines 7 and 8. If less than $400, you are not subject to self-employment tax. Do not fill in the rest of the schedule. (Exception: If this line is less than $400 and you are an employee of an electing church or church-controlled organization, complete the schedule unless this line is a loss. See instructions.)—21,700.

(10) The largest amount of combined wages and self-employment earnings subject to social security or railroad retirement tax (Tier I) for 1984 is—$37,800.

(11) (a) Total social security wages and tips from Forms W-2 and railroad retirement compensation (Tier I). Note: U.S. Government employees whose wages are only subject to the 1.3% hospital insurance benefits tax (Medicare) and employees of certain church or church-controlled organizations, should not include those wages on this line (see instructions)—37,800.

(c) Add lines 11a and 11b—37,800.

If line 13 is $37,800 or more, fill in $4,271.40 on line 14. Otherwise, multiply line 13 by .113 and enter the result on line 14—.113.

EMPLOYEE BUSINESS EXPENSES

Employee Business Expenses Deductible in Figuring Adjusted Gross Income on Form 1040, Line 32:

(1) Reimbursed and unreimbursed fares for airplane, boat, bus, taxicab, train, etc.—6,138.

(3) Reimbursed and unreimbursed car expenses from Part II.—40.

(5) Reimbursed expenses other than those shown on lines 1 through 3 (see instructions)—13,214.

(6) Add lines 1 through 5—19,392.

(7) Employer's payments for these expenses only if not included on Form W-2—17,170.

(8) If line 6 is more than line 7, subtract line 7 from line 6. Enter here and on Form 1040, line 25—2,222.

Mileage Rate:

(9) Enter the smaller of (a) 15,000 miles or (b) the total mileage (Car 1+ Car 2+ Car 3) from line C, above—194 miles.

(10) Multiply line 9 by 20½¢ (.205) (11¢ (.11) if applicable, see instructions)—40.

Alan Cranston, 1984 individual income tax return

Employee business expenses:

Living expenses, Washington, D.C	$3,000
Travel	6,138
Expenses in maintaining office in home state	10,214
Auto expense—194 miles × 20½¢.	40
Total	$19,392
Less reimbursements	17,170
Total	$2,222

CERTIFICATE

I hereby certify that I was in travel status in the Washington, D.C., area, away from my home in my home state of California, in the performance of my official duties as a Member of Congress for 137 days during the year 1984 and that my deductable living expenses while in such travel status amounted to $3,000.

(Signature of Member)

NOTE.—(If such living expenses exceeded $3,000, the deduction is limited under section 162(2) of the Internal Revenue Code of 1954 to $3,000).

DEPRECIATION AND AMORTIZATION

C. Cost or other basis Schedule attached.

F. Deduction—79.

(f) 15-year real property other than low-income housing.

(6) Other depreciation (see instructions)—5,257.

(7) Total (Add deductions on lines 1 through 6). Enter here and on the Depreciation line of your return (Partnerships and S corporations—DO NOT include any amounts entered on line 1.)—5,336.

A. Description of property Lease commission—Schedule attached.

B. Date acquired Var.

C. Cost or other basis—13,155.

E. Amortization period or percentage Var.

F. Amortization for this year—2,191.

Total. Enter here and on Other Deductions or Other Expenses line of your return—2,191.

(1) Adjusted gross income from Form 1040, line 33 or Form 1040NR, line 32 (see instructions)—171,585.

(2) Deductions (see instructions):

(a)(1) Medical and dental expense from Schedule A, line 5—1,623.

(2) Multiply Form 1040, line 33 by 5% (.05)—8,579.

(3) Subtract line 2a(2) from line 2a(1). (If zero or less, enter zero)—0.

(b) Contributions from Schedule A, line 18—5,070.

(c) Casualty and theft losses from Schedule A, line 19—0.

(d) Qualified interest on property used as a residence from Schedule A, line 11—4,965.

(e)(1) Interest, other than line 2d above, from Schedule A, line 14—8,618.

(2) Net investment income (If zero or less, enter zero)—43,234.

(3) Enter the smaller of line 2e(1) or line 2e(2)—8,618.

(h) Add lines 2a(3), b, c, d, e(3), f, and g—18,653.

(3) Subtract line 2h from line 1—152,932.

(4) Tax preference items:

(a) Dividend exclusion—200.

(b) 60% capital gain deduction—7,123:

(c) Accelerated depreciation on nonrecovery real property or 15 (or 18)-year real property—33.

(l) Add lines 4a through 4k—7,356.

(5) Alternative minimum taxable income (add lines 3 and 4(l)) (short period returns, see instructions)—160,288.

(6) Enter: $40,000, if married filing joint return or surviving spouse—40,000.

(7) Subtract line 6 from line 5. If zero or less, do not complete the rest of this form—120,288.

(8) Enter 20% of line 7—24,058.

(9) Amount from Form 1040, line 50 or Form 1040NR, line 51 (Do not include Form 1040, line 39 or Form 1040NR, line 41.) (estates and trusts, see instructions)—43,432.

(10) Subtract line 9 from line 8. If zero or less, enter zero—0.

(12) Alternative minimum tax (subtract line 11 from line 10). Enter on Form 1040, or Form 1040NR, line 52, Form 1041, line 32, or Form 990-T, page 1, line 14—0.

THE HOLOCAUST

● Mr. CHAFEE. Mr. President, I want to say a few words today in commemoration of the 40th anniversary of the end of the Nazi Holocaust.

Each generation carries with it memories of events that shaped the world, for good or evil. For those of my generation, it was the rise of fascism in Europe and Japanese militarism in Asia, leading inexorably to World War II, that changed and altered our lives, just as these events remade the world in a cataclysm of carnage and destruction.

For that reason, those of my generation retain a special obligation to bear witness to the world, for as long as it is within our power to do so, of the unspeakable evil of that time—the Nazi Holocaust in which 6 million Jews and millions of other individuals were slaughtered in a racist nightmare identified by its perpetrators as the "final solution."

Through all of recorded human history there is no precedent for the evil of the Holocaust; it is very nearly beyond human comprehension.

In a few years, those who lived through the years of the Holocaust, either as victims or as witnesses from afar, will be gone. The burden of remembrance and comprehension will fall to succeeding generations. It is a burden not lightly carried, but one that must be borne. We and those who are to follow must understand that because this evil did take place, vigilance is forever necessary to prevent it in the future.

Only the victims who survived the Holocaust can give adequate voice to the terror they and so many others experienced. Yet that must not prevent the rest of us from joining in their plea to the world of today and tomorrow:

"Do Not Forget!"●

ARKANSAN TO RECEIVE INTERIOR'S CITATION FOR VALOR

● Mr. PRYOR. Mr. President, on April 24, 1985, Richard E. Brown, of Japser, AR, will receive the Interior Department's Citation for Valor at its 50th Departmental Honor Awards Convocation.

Mr. Brown is being so honored for an act of heroism on the Buffalo National River which resulted in the saving of a life. While on a routine canoe patrol on April 30, 1983, to warn floaters of swift currents, Park Technician Brown came upon two individuals who had been thrown from their canoe. While the male occupant of the canoe sought to help his female companion, he became pinned between his canoe and another toward which they were being driven. After pulling the female occupant to safety, Mr Brown singlehandedly prevented the canoes from crushing the male occupant. He put his own life jacket on the man to keep his head above water during periods of unconsciousness.

With the help of eight volunteers and after a 15-minute struggle, Mr. Brown was able to free the man from the canoe. As the canoe was released, Mr. Brown and one of the volunteers were swept downstream by a swift current. Mr. Brown grabbed the volunteer and caught hold of a willow branch until both men could regain their balance and be helped to safety. Despite the wet and cold, Mr. Brown then organized and directed the evacuation of the victim 2 miles over land.

Without Mr. Brown's selfless initial act of courage, it is probable that the Buffalo National River would have recorded its first canoeing fatality.

I want to join the Department of the Interior in recognizing this act of courage on the part of Richard E. Brown and I join in congratulating him on the occasion of his being selected for the Department of the Interior's Award of Valor.●

OPPOSITION TO CONTRA FINANCING MEASURE

● Mr. MATHIAS. Mr. President, the United States has financed the operations of the Contras in Nicaragua, either overtly or covertly, for several years. During this time, the justification of U.S. assistance has been succinct, reasonable, and defensible. The Sandinistas were having a significant impact on the war in El Salvador by providing weapons to the rebels there. It was our policy to reduce the conflict in El Salvador by applying pressure in various ways, including funding the Contras, in an effort to stem the flow of arms to the rebels in El Salvador.

The President's current proposal to appropriate $14 million to support the Contras, however, rests on entirely different grounds. The justification has shifted from interdiction of arms to altering the fundamental domestic policies of the Government of Nicaragua. Indeed, the United States has come close to advocating the overthrow of the current Nicaraguan Government by force of arms.

The original objective of support for the Contras has in large measure now been achieved. Administration officials confirm that the current flow of arms through Nicaragua to El Salvador has been substantially reduced. And there are alternative measures, short of supporting current efforts by the Contras, to ensure that the flow of arms does not increase once again.

While some of the ideals of the Contras are noble, their tactics have been costly. They have weakened Nicaragua's economy by destroying rural farms and, in some cases, assassinating local farmers. Such tactics should not be supported by the United States and, in fact, we condemn similar efforts by the rebels in El Salvador.

The President's new policy on Nicaragua is more flexible than previous policies in that it is intended to encourage negotiations between the Sandinistas and the Contras. That is commendable. But, under the proposal, the Contras could ensure that they receive military aid after 60 days, regardless of what the Sandinistas do, simply by refusing to negotiate. Not unnaturally, the Sandinistas do not find this a compelling formulation.

A final consideration is the perception of many governments in Latin America that the United States is violating the principle of nonintervention in Nicaragua. This principle, although badly battered, is still cherished in the Western Hemisphere. It is given pride of place in the Charter of the Organization of American States. And, if the United States appears oblivious to this strongly held sentiment, it can color our relations with our neighbors for years to come.

Taking the long view of our national interest, it would seem that we have more to lose here than a position relative to Nicaragua. Our moral leadership of the hemisphere is certainly a national asset that would not be immune, if we were condemned for intervention without adequate cause.

Our previous policy toward Nicaragua was clear. It was to stop the Sandinistas from destabilizing El Salvador. That objective has been in large measure attained, and the current Contra operation is not critical to reducing the flow of arms. We should not pick a new fight for a new cause that is neither understood nor supported by the people of the United States or most countries in Latin America. For these reasons, I will vote against Senate Joint Resolution 106.

I would hope that we could instead use this money to work with the Contadora nations and other countries to provide economic incentives toward a solution to the conflict in Nicaragua.●

HOLOCAUST REMEMBRANCE DAY

● Mr. SIMON. Mr. President, I rise today to address a solemn day in our

history. Today marks the 40th anniversary of Holocaust Remembrance Day. The horrors of the Hitler regime must be deeply etched in our minds, and in the minds of our children.

Recently, a documentary appeared on television which depicted the story of Raoul Wallenberg, a Swedish diplomat whose courage and determination saved the lives of thousands and thousands of Hungarian Jews. As a result of the airing of the Wallenberg story, I have received letters from all over my State of Illinois which express disgust and anger at the Hitlerian era and express the sentiment that we all share: Never again.

We have a grave responsibility to our youth, who must learn that Hitler was much more than an evil face in a history book. Hitler's infectious hatred is a lesson which must never be repeated.

Institutional racism is intolerable. Even as we commemorate the Holocaust, there is still hatred and oppression in the world. This 40th anniversary holds special significance for all those who cherish freedom and life. The world cannot stand silently by as South African blacks become victims of hatred and contempt.

For 12 years, Europe was encased in a shroud of fear, hatred, and death. Today, we celebrate the anniversary of the triumph of good.●

ORDER OF BUSINESS

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

SENTATE JOINT RESOLUTION 116—ASSURING THE COST-OF-LIVING ADJUSTMENTS FOR SOCIAL SECURITY RECIPIENTS

Mr. BYRD. Mr. President, I have in my hand a Senate joint resolution which I shall introduce on behalf of myself, Mr. MOYNIHAN, Mr. RIEGLE, Mr. CRANSTON, Mr. BURDICK, Mr. FORD, Mr. GORE, Mr. KENNEDY, Mr. KERRY, Mr. METZENBAUM, Mr. SARBANES, and Mr. LAUTENBERG, the purpose of it being to insure the cost-of-living adjustments for Social Security recipients. It reads:

It is the policy of the United States that the Budget Resolution for fiscal 1985 as revised shall be deemed to include amounts sufficient under function 650 (Social Security) so as to insure the full Cost of Living Adjustments for Social Security Recipients through fiscal 1988.

The statement I made earlier with the sense of the Senate resolution dealing with social security benefits adequately explains the joint resolution I am about to offer.

I send this joint resolution to the desk. I ask that it be read the first time.

The PRESIDING OFFICER. The clerk will report the joint resolution.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 116) to insure the cost-of-living adjustments for social security recipients.

Mr. BYRD. Mr. President, I ask that the Senate joint resolution be read a second time.

The PRESIDING OFFICER. Is there objection?

Mr. SIMPSON. Mr. President, I feel constrained to object at this time to assure a proper location on the calendar for this item.

The PRESIDING OFFICER. Objection is heard. Objection having been heard to the second reading on this legislative day, the joint resolution will remain at the desk pending its second reading on the next legislative day.

Mr. BYRD. Mr. President, I ask unanimous consent, with respect to the Senate joint resolution which I have just introduced and had read the first time, that the word "insure," which is part of the title of the resolution, be modified to "assure".

The PRESIDING OFFICER. Is there objection to the unanimous consent request? Without objection, it is so ordered.

The title, as modified, reads as follows:

To assure the Cost of Living Adjustments for Social Security Recipients.

The text of the joint resolution reads as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

It is the policy of the United States that the Budget Resolution for fiscal 1985 as revised shall be deemed to include amounts sufficient under function 650 (Social Security) so as to insure the full Cost of Living Adjustments for Social Security Recipients through fiscal 1988.

AUTHORITY FOR COMMITTEES TO FILE REPORTS ON FRIDAY

Mr. SIMPSON. Mr. President, having consulted with the minority leader, I ask unanimous consent that the committees have between the hours of 9 a.m. and 3 p.m. on Friday, April 19, to file reports.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 5 P.M.

Mr. SIMPSON. Mr. President, after consultation with the minority leader, I ask unanimous consent that the RECORD remain open today until the hour of 5 p.m. for the introduction of bills, resolutions, and the submission of statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 136—TO DIRECT THE SENATE LEGAL COUNSEL TO INTERVENE IN RE WHET, INC., ET AL.

Mr. SIMPSON. Mr. President, I send a resolution to the desk on behalf of Senator DOLE and Senator BYRD, and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 136), to direct the Senate Legal Counsel to intervene in re WHET, Inc., et al.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, the Department of Justice is challenging provisions of the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law 98-353, which provide for limited extensions of the terms of bankruptcy judges who had been appointed prior to the 1984 act. Focusing on the brief gap between June 27, 1984, when the terms of the bankruptcy judges arguably lapsed, and July 10, 1984, when the President signed the 1984 act, the Department contends that the Congress violated the appointments clause of the Constitution by retroactively extending the terms of bankruptcy judges. Senate Resolutions 444 and 471 of the 98th Congress directed the Senate Legal Counsel to intervene in several cases in the name of the Senate to defend the act, and also established a procedure to authorize intervention in related cases during the final adjournment of the 98th Congress.

The district courts have unanimously upheld the 1984 act by concluding either that the holdover provisions of earlier bankruptcy legislation kept bankruptcy judges in office throughout the purported gap, or that the Constitution does not prohibit the brief retroactive extension of the terms of sitting bankruptcy judges. The objective of the Congress was to avoid disruptions in the bankruptcy system during its transition under the 1984 act, and not to abridge the appointing power of either the executive or the judiciary by selecting individual bankruptcy judges. The extension provisions are applicable to all sitting bankruptcy judges, each of whom had been appointed by the district courts

and are removable by the courts of appeals.

In those cases in which the Senate Legal Counsel had intervened in the district courts there is no need for further authorization to permit him to defend the favorable judgments of those courts on appeal. However, the Department of Justice recently has intervened in an appeal pending in the U.S. Court of Appeals for the First Circuit, In re WHET, Inc. et al., a case in which neither the Department nor the Senate or House had appeared in the district court. The enclosed resolution would authorize the Senate Legal Counsel to intervene in the name of the Senate in that case in order to present to the first circuit the Senate's defense of the 1984 act.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 136) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 136

Whereas, in the case of In re WHET, Inc., et al., pending in the United States Court of Appeals for the First Circuit, the constitutionality of sections 106 and 121 of the Bankruptcy Amendments and Federal Judgeship Act of 1984, Public Law No. 98-353, has been placed in issue;

Whereas, the Department of Justice, on behalf of the executive branch, has intervened in this case to assert that these sections of the Bankruptcy Amendments and Federal Judgeship Act, which provide for the limited extension of the terms of bankruptcy judges appointed prior to the Act, violate the Appointments Clause, Article II, Section 2, Clause 2 of the Constitution;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288l(a) (1982), the Senate may direct its Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of In re WHET, Inc., et al.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR MONDAY, APRIL 22, 1985

ORDER FOR RECESS UNTIL 12 NOON, MONDAY, APRIL 22, 1985

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 12 noon on Monday, April 22. There will be no Friday session of the Senate this week.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. SIMPSON. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order, there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE], for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, I further ask unanimous consent that, following the special order for Mr. PROXMIRE, there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, following morning business on Monday, April 22, it will be the intention of the majority leader to begin consideration of Senate Concurrent Resolution 32, the budget resolution, under a 50-hour statutory time limitation.

On Tuesday, April 23, by unanimous consent, at 9 a.m., the Senate will turn to consideration of Senate Joint Resolution 106, supporting military or paramilitary operations in Nicaragua under a 10-hour statutory time limitation. Therefore, assuredly a rollcall vote will occur during Tuesday's session of the Senate. I am advised by the majority leader and share with my colleagues that Wednesday, Thursday and Friday of next week will likely be long days, so to speak, with the Senate convening at a rather early hour in the morning and continuing late into the evening hour for the purpose of addressing the business I have just described. Consequently, Members should be aware that numerous rollcall votes can be expected throughout the session next week.

RECESS

Mr. SIMPSON. Mr. President, I now move, in accordance with the previous order, that the Senate stand in recess until 12 noon on Monday, April 22, 1985.

The motion was agreed to; and the Senate, at 2:34 p.m., recessed until Monday, April 22, 1985, at 12 noon.

HOUSE OF REPRESENTATIVES—*Thursday, April 18, 1985*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Grant us, O gracious God, during this time of remembrance of the days of the Holocaust, an understanding of the suffering of those victims and families who experienced such terror. May the events of that darkness encourage us to give light to our world; may the despair of those tragedies cause us to find hope in our world; may the evil that was practiced be overcome by deeds of justice in our world. Forgive us, O God, that we do not appreciate that all people are created by You, and we should live as one people in peace, demonstrating Your creation and glory. May we realize that the suffering of some is the suffering of all, and by sharing and understanding together we better reflect the bond that exists between us. Help us, O God, in all the paths of life, to do justice, love mercy, and ever walk humbly with You. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 236. Joint resolution commemorating the twenty-fourth anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 597. An act to amend subtitle II of title 46, United States Code, "Shipping", making technical and conforming changes, and for other purposes;

S. 817. An act to authorize appropriations under the Earthquake Hazards Reduction Act of 1977 for fiscal years 1986 and 1987, and for other purposes; and

S. 818. An act to authorize appropriations for activities under the Federal Fire Prevention and Control Act of 1974.

INSENSITIVITY AND CONDESCENSION TOWARD HANDICAPPED NOT ACCEPTABLE

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, for my entire 16 years in the House, I have served with pride, on the Education and Labor Committee. It has produced hundreds of important laws in that time. I was especially proud to be an original cosponsor of the Rehabilitation Act of 1973 and the Education for All Handicapped Children Act of 1974.

These two laws established the philosophy that Congress saw its role as advocates for the disabled, and its recognition that the disabled had a right to be fully participating members of society.

The remarks attributed to Dr. Eileen M. Gardner, a newly appointed official in the Department of Education, reflect another philosophy of Government toward the disabled—one of insensitivity and condescension. These two philosophies are not compatible. Dr. Gardner's is contemptible and offensive to me and to many in this institution.

I intend to look very closely at the Department of Education's budget for fiscal year 1986. In my mind, I see no justification to spend 1 cent of appropriated funds to set up a new Office of Education Philosophy and Practice if it is staffed by people whose philosophies could influence practice and produce policy that is inimical to the disabled of our Nation.

LET US CELEBRATE THE LIBERATION OF EUROPEANS

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I got up this beautiful spring morning, turned on my TV, and watched a "PR presidency" go mad.

First of all, we heard that the young 8-year-old girl that we were told was a Nicaraguan refugee was really an American citizen. Mr. President, that was a tad deceptive.

But then across the TV screen came a very official Government car, and we were told that it was the White House advance team on concentration camps. What are they looking for? The right light angle? Are they looking for concentration camps that had carpet?

Really, how sick is this. Let us remember what this celebration in June of the 40th anniversary of the end of World War II in Europe is to celebrate. It is to celebrate the end of a government that went mad in Europe. It is the 40th anniversary of finally liberating all Europeans, including Germans from this incredibly mad government. I stand here with a German last name, Mr. President, and I say to you: Do not go to the cemetery where people are buried who tried to perpetrate these things. Don't look for the nicest concentration camp you can find. You can't sugarcoat the Holocaust. Instead, let us honor our American heritage and celebrate the liberation of Europeans. Germans will not be angry. They were liberated also.

SECRETARY WEINBERGER'S NEW MONOPOLY GAME

(Mr. SIKORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKORSKI. Mr. Speaker, some 95 million Americans filed our taxes by last Monday, and as we signed those forms we swore that we told the truth. We do it when we get a drivers license, a fishing license, even a dog license. If we lie, we're in trouble and we might go to jail.

But when defense contractors like General Dynamics bill the taxpayers for tens of billions of dollars, they don't have to swear they honestly earned it.

After the Energy and Commerce Committee began our investigation of defense contracting, Defense Secretary Weinberger announced a new "get tough" policy. He said he would make contractors swear not to lie when they bill the taxpayers. That was on nationwide TV. But the defense contractors complained and Weinberger quietly reversed himself. Now he says to his pals: "I was only kidding, you don't have to swear to the truth."

It's the Secretary's newest version of monopoly: Do not go to jail. Pass go and collect billions from the taxpayers.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will remind the visitors in the galleries that under the rules of the House they

must refrain from demonstrations of any type.

THREAT OF NICARAGUAN AIRFIELDS

(Mr. HUNTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUNTER. Mr. Speaker, several years ago when the President went before the American people and showed photographs of the 10,000-foot airfield that was being constructed in Grenada, the Marxist government immediately retorted that that airfield would, in fact, be used to ship only spice and would not be used by the Soviets or the Cuban military.

After we captured the documents in Grenada, the 26,000 pounds of documents, we found a record of a secret Central Committee meeting in which Liam James stated it was decided in the meeting that the airfield would be used by the Soviet and Cuban military.

Let us not be so naive as to believe that the airfields being constructed in Nicaragua will not be used by the Soviet and Cuban military.

□ 1110

BUDGET RESTRAINT URGED ON FORMER PRESIDENTS' ALLOWANCES

(Mr. ERDREICH asked and was given permission to address the House for 1 minute.)

Mr. ERDREICH. Mr. Speaker, former President Nixon has taken the lead. Now will Mr. Ford and Mr. Carter follow? I doubt it.

Mr. Nixon has decided to forego his taxpayer-paid security, saving the U.S. Treasury over $3 million annually. Budget restraint has not been seen in this area of former Presidents' allowances. The President's fiscal year 1986 budget calls for a 3.2-percent increase in spending on former Presidents, on top of a 12-percent increase since fiscal year 1984.

For this reason, I am reintroducing legislation which I sponsored during the last session to place realistic limits on the amount which taxpayers must spend for the benefits that former Chief Executives receive. While my bill will make certain that former Chief Executives have the protection and the benefits they earned, it will limit the excessive growth of this spending and assure that a new royalty for former Presidents has not been established at taxpayers' expense.

Last year when I introduced this legislation, a resident of my district urged support for my bill as she put it: To "limit how much we might pay to keep our former Presidents living the good life." She went on: "Why should we pay to support these men in such a fashion? Expenses within reason are fair, but extravagant luxury is not."

Her opinion is even more valid today, and I ask my colleagues to join me in this effort to place realistic limits on the benefits that our former Chiefs of State receive.

LEGISLATION TO INCREASE PENALTIES FOR KIDNAPING

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, I am today introducing legislation which would go a long way toward closing the loopholes which now exist in the Federal law under kidnaping.

Kidnaping under any definition is an act of terrorism, and we must do all we can to deter that type of criminal activity. The important feature of this bill is to recognize that too often our children are the targets of would-be kidnapers, so to help deter that kind of activity we are asking through this bill that we increase the penalties for attempting kidnaping of children under 13.

Mr. Speaker, this should act as a signal to would-be kidnapers that this society will not tolerate that type of despicable behavior.

FORTY "GHOST VOTERS" IDENTIFIED IN INDIANA CONGRESSIONAL RACE

(Mr. DURBIN asked and was given permission to address the House for 1 minute.)

Mr. DURBIN. Mr. Speaker, the race in the Eighth Congressional District of Indiana is coming down to the wire. Last night my Republican colleagues again took the floor in special orders to rail about the recount, but what we did not hear was any attention of the 40 "ghost voters" who have been found in two counties carried by the Republican candidate. You see, there were 40 more votes on the voting machines in those counties than the total number of voters who walked into the polls.

If those 40 "ghost votes" are removed from the totals, the Democrat, Frank McCloskey, will be the winner. If they are counted, the Republican candidate may win.

I am calling on the task force that is investigating the Eighth Congressional District not to demean the real voters in that district by letting ghost voters influence the outcome.

Mr. Speaker, the next time our Republican colleagues take the floor on the election contest in the Eighth District I hope they will open their remarks by agreeing that the Eighth Congressional District contest should be decided by real voting citizens, not by 40 ghost voters.

MEMBERS URGED TO REMAIN STEADFAST IN REFUSING AID TO CONTRAS

(Mr. MITCHELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL. Mr. Speaker, there are times in this House when I have a great pride in this U.S. House of Representatives and I am grateful for the opportunity to serve therein. We are now in the midst of one of those times. I am referring to the steadfastness that the House is evidencing in refusing to accept the ill-conceived notion by the administration that we ought to put $14 million into the Contras in Nicaragua.

Fourteen million dollars is not the issue, although it should be when our people are being forced back into poverty. We should not be spending $14 million for military aid. But there is a larger issue, and it gnaws at me, it gnaws at you, and it gnaws at the American public. We do not want another entanglement that is going to quagmire us in Central America. We do not want another Vietnam.

I do not want to see another black wall with the names of more than 50,000 young Americans killed in a senseless war. I do not want to see another 300,000 Americans wounded in a war we should not be involved in. I respect the veterans but not the war. I do not want to see more numbers of our people mentally and spiritually ill because of their involvement in a war in Nicaragua.

I say to the Members of this House that this is the time that we refuse this $14 million. The threat of another Vietnam, the threat of being quagmired again in a senseless war is absolutely abhorrent to the American people, and I urge that we defeat any such ill-conceived notion that $14 million from this country should go to the Contras.

Mr. Speaker, this week the Reagan administration will attempt to expand its agenda of military and paramilitary activities against the Government of Nicaragua when President Reagan seeks $14 million in funds from Congress for the Contras—rebels whom he refers to as freedom fighters. I believe the means by which the administration is attempting to resolve matters, by overthrowing the government not to its liking, is counterproductive to American interest and the interest of our allies abroad.

In February 1985, President Reagan brazenly admitted to wanting to remove the Sandinista government, or making it cry uncle. This means that once again, the administration's actions are being performed without regard to the historical examples of the tragic consequences in that region. Now, the Congress must decide wheth-

er to approve $14 million for these mercenaries in the service of the Reagan administration.

The World Court has determined that the United States has already committed aggressive acts against Nicaragua, such as mining its harbors and aiding and abetting the Contras, and therefore is in violation of international law. In other words, the administration proposal to continue Federal funds for the Contras against the Sandinista government in Nicaragua is strictly punitive, and devoid of reason. These Contras have demonstrated beyond all reasonable doubt their violent, bloodthirsty nature.

If the administration continues to violate the sovereignty of Nicaragua by openly invading with armed might, and by openly supporting the Contras with arms, then this country will be headed for a serious crisis. Continued support for the Contras will only serve to draw us steadily into an expanding military role in Central America without any clear long-term objective. We need a more sensitive policy designed to negotiate long-term solutions.

It is my firm belief that the United States should support measures at the Organization of American States, as well as efforts of the Contadora group which seek to end support for terrorists, subversive, or other activities aimed at the violent overthrow of the governments of the countries in Central America. Working through the Organization of American States and the Contadora process is the proper and most effective means of dealing with threats to peace in Central America.

I shall continue to vote against any Federal funds for the Contra forces in Central America.

WHO WILL INVEST IN OUR CHILDREN'S FUTURE?

(Mr. PORTER asked and was given permission to address the House for 1 minute.)

Mr. PORTER. Mr. Speaker, the children of today—the kids in the playgrounds, in the elementary schools—will enter the labor force around the year 2000. The jobs they will find, and the pay those jobs can offer, will hinge on the capital investments made over the next 15 years.

Those 15 years will see the U.S. Treasury becoming an ever more active competitor for the lender's dollar. The Treasury has already saturated the long-term bond market—its issuance of long bonds has increased by 2½ times in just 5 years—and our heaviest borrowing years lie ahead.

As we plunge ahead through the debt-laden 1980's, private borrowing will become more risky, more expensive, and less predictable.

But what is predictable is that new job-creating and productivity-enhancing investments—investments that would benefit our children—will not be made at the rate they should be, and would be if we weren't running huge budget deficits year after year.

THE APPALACHIAN REGIONAL COMMISSION—A WISE INVESTMENT

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, this spring the Appalachian Regional Commission celebrates 20 years of service to the lesser developed areas of 13 Eastern States.

Through the provision of public facilities in the form of roads, sewer and water systems, clinics, libraries, and vocational schools, the ARC has made the Appalachian region more attractive to industries seeking new plant locations.

Economic development in my southwest Virginia district has been substantial and can be attributed directly to ARC assistance. Other Appalachian States have enjoyed a similar experience. Clearly, this Federal effort in partnership with local governments is succeeding.

But the work must go on. Many of our localities do not have sufficient public facilities to accommodate further growth, and they can acquire those facilities only with the help of ARC.

The President is asking that the Appalachian Regional Commission be abolished. I strongly disagree with this proposal. ARC produces substantial returns. It is a wise investment in our economic future.

UNFORTUNATE COMMENTS REGARDING HANDICAPPED BY EILEEN GARDNER

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, seldom if ever do I mention the fact that as a teenager I had polio and seldom do I ever refer to it, but I refer to it today because it has come to my attention that the President, through his Secretary of Education, Mr. Bennett, has appointed an Eileen Gardner to head the handicapped programs in the Department of Education.

Eileen Gardner has issued some very unfortunate comments regarding the handicapped and has set a very improper tone, among them referring to the handicapped as being "ineffective malcontents."

I think that is crass, Mr. Speaker. I speak not only for myself, but I would also like to tell you about the fact that several of us are graduates and former patients of a place called Warm Springs, GA. The Congressman from New York, JIM SCHEUER, and I were patients there together.

Bo Ginn, former Congressman from Georgia, followed me at Warm Springs, GA.

Senator EAST followed me by several years.

I also think on behalf of the 25,000 American disabled veterans, the 33 million handicapped across our Nation, that we take offense at her comments and we certainly ask that the President withdraw her appointment, because she certainly is not deserving of such a high office.

REMEMBERING THOMAS JEFFERSON

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, during the last week we celebrated a lot of things in Washington, DC. One of the things we celebrated was the birthday of Thomas Jefferson, on April 13. As we know, Mr. Jefferson was the author of the Declaration of Independence. The Declaration of Independence spoke about "inalienable rights."

Mr. Speaker, that means those rights are given by God. They cannot be taken away, that they are universal and all people have the right to them.

The democratic Contras in Central America that are fighting now are fighting for those rights. People in Central America that are desirous of establishing true democracy are really Jeffersonians and let us not forget that.

Remember, this is not a fight between Contras and another group of people. This is a fight for liberty, the principles that the Declaration of Independence and Thomas Jefferson stood for. When we celebrate the birthday of Thomas Jefferson, let us really celebrate it by giving liberty an opportunity next week.

TIME TO ABANDON FAILED POLICIES OF THE PAST IN CENTRAL AMERICA

(Mr. KLECZKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KLECZKA. Mr. Speaker, the President argues that a dollar for the Contras is a dollar for peace. This twisted logic will lead to nothing but further bloodshed and further alienation of all Nicaraguan people.

President Reagan has also said that Calvin Coolidge is his favorite President, and I believe him. Under President Coolidge, nearly 6,000 marines oc-

cupied Nicaragua to protect so-called "American interests." What have 80 years of American protection produced for Nicaragua?

Mr. Speaker, it is time to abandon the failed policies of the past. Negotiation, not confrontation, is the answer.

The Contadora process, by bringing together all concerned nations in a spirit of cooperation, is the best chance we have to start bringing stability and peace to Central America. It is the region's future which is at stake here, and it is the region which must develop a solution.

I am encouraged to hear that the Contadora talks are resuming in Panama City, and that Canada has offered to monitor compliance with any agreement. Isn't it time the United States threw its full weight behind this bargaining process?

No one says the process will be easy. Central America is beset by economic as well as political problems which are centuries old. The Contadora initiative offers the most positive step toward a lasting peace in the region.

Mr. Speaker, the President has not learned from the Coolidge policies of the past. The Contras represent not the future of Nicaragua, but a sad and brutal past. Let's face the future with courage, and vote no on more military hardware for the Contras.

THE BALTIMORE CONNECTION AND THE U.S. AIR FORCE CORPS

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute.)

Mrs. BENTLEY. Mr. Speaker, the Baltimore Connection, an innovative civic group in my district, is trying to make it happen for kids. In an effort to promote and encourage the talent and ability of the young aspiring musical artists throughout Maryland, the Baltimore Connection is attempting to create a corps comprised of young adults throughout the State. Drum and bugle corps activities presently comprise both the largest youth oriented and spectator appealing activities in the United States and Canada.

Tomorrow and Saturday, the U.S. Air Force Academy Drum and Bugle Corps and Stage Band is going to perform in my district. One of the three Academy performances is going to be sponsored by the Baltimore Connection. The visit of the Air Force Drum and Bugle Corps will allow the youngsters the opportunity to observe and perform with accomplished and experienced musicians.

The goal of the Baltimore Connection Drum and Bugle Corps is to portray a musical image of Baltimore and Maryland throughout the State, while at the same time developing the talents of our youth. The development of their skills is not only important to the State of Maryland but to the entire country.

THE PROGRAMMABLE IMPLANTABLE MEDICATION SYSTEM (PIMS)

(Mr. NELSON of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELSON of Florida. Mr. Speaker, a million Americans suffer from diabetes, a disease that destroys the body's ability to control its blood sugar and produces such serious complications as heart disease, kidney malfunction, and blindness, and thus causing its victims to lead very restrictive lifestyles.

A new technology has emerged that may ultimately free diabetics and victims of other long-term diseases from their restrictive lifestyles. NASA is working with private corporations and health care organizations in developing programmable, implantable medication systems [PIMS] that will automatically deliver prescribed doses of medication to key areas in the human body.

In 1979, NASA determined that existing technologies from several NASA research centers could contribute to the development of a PIMS. NASA along with Applied Physics Laboratory of Johns Hopkins University proved that the PIMS could work and encouraged further development of the system.

Today, the PIMS is a reality. It is performing well in long-term animal implants and will soon be tested in humans. Prospects for the PIMS are excellent, and researchers are investigating the possibility of applying it to a variety of other disease treatment programs.

The PIMS stands as an excellent example of how NASA technology, effectively applied, can help private industry solve important technical problems.

□ 1130

CENTRAL AMERICA: DOSE OF REALITY—NO. 3

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, pursuant to the War Powers Act, the President must submit to Congress a written report within 48 hours of taking any one of three specified acts.

I discussed the first specified act yesterday, which refers to the introduction of U.S. Armed Forces into hostilities or situations where imminent involvement in hostilities is clearly indicated. Today, I'll talk about the second specified act.

If the President sends U.S. Armed Forces into the territory, airspace, or waters of a foreign nation while equipped for combat, he must report to Congress.

Has our President sent U.S. forces into the territory, airspace, or waters of a foreign nation? Of course he has, We have CIA personnel in the territory of Nicaragua; we have 20,000 U.S. troops in the territory of Honduras; we have military in the territory of El Salvador; we participate in regular reconnaissance flights throughout the airspace of Central America; we have mined the waters of Nicaragua; and we have ships lodged in the waters of Honduras. These are all foreign nations, and the President is occupying their territory, their airspace, and their waters without reporting to Congress. This is a clear violation of the law.

And are the Americans who are occupying the territory, airspace, and waters of Central America "equipped for combat?" Of course they are. Our troops participating in exercises in Honduras are using live ammunition and tanks and weapons, so they are well-equipped for combat. The mines the CIA planted in the waters of Nicaragua were real mines. Our military personnel are carrying rifles, not just pistols. All these weapons are used in combat, not just for personal protection. The President has not only provided these weapons to the people of Central America, but he is using them himself in an illegal undeclared war.

PRESIDENT REAGAN'S NICARAGUAN POLICY

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, the deliberate effort by President Reagan and members of his administration to deceive the American people regarding his Nicaraguan policy almost defies belief. Let me cite some examples.

Mr. Reagan tells the world that President Betancur of Colombia supports his proposal to provide $14 million to the counterrevolutionaries. Mr. Betancur then denies that he ever expressed such support and in fact he says he opposes that funding. Ditto with eight other Latin American heads of state whose letters expressing support for negotiations is transformed by the administration into support for funding, only to have Langhorne Motley, Under Secretary of State for Latin American Affairs, acknowledge yesterday at a Foreign Affairs Committee hearing that none of those leaders ever expressed such support publicly. And finally, yesterday the President announces that the Pope supports his proposals, only to evoke

an immediate denial from the papal representative in Washington.

Why all the deception? Why is the administration so afraid of the truth?

Because the Reagan policy for Nicaragua is dangerously bankrupt and the American people have rejected it. Now it is the turn of Congress to do so unequivocally.

HAPPY BIRTHDAY TO THE HONORABLE JAMIE L. WHITTEN

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, today is the birthday of one of our most esteemed colleagues, JAMIE WHITTEN, the dean of the House and the chairman of the House Committee on Appropriations.

The State of Mississippi, the Congress of the United States, and the Nation as a whole owe JAMIE a special vote of thanks for his 54 years in politics. He began his political career when he was 21 as a member of the Mississippi House and continued his service as district attorney until he was elected to the 77th Congress. As the senior ranking member of the Committee on Appropriations, I work closely with JAMIE on a daily basis. I can tell you that he is amiable, fair, and diligent in all of his efforts to bring the many bills to the floor that fund our entire Government's activities.

He has the institutional memory to tell us the why and the wherefore of programs developed in the days of President Franklin Roosevelt and up through the Republican and Democrat administrations alike to the present. He is also an institution in this body because he knows how to legislate and how to get others together to do so. JAMIE is young at heart and vigorous. Although he will not give Jack Nicklaus or Arnold Palmer scratch competition on the links, they can only spot him a few strokes before they get in trouble. So to my chairman and our dean, I want to take this opportunity to express for all of us here a continued good fortune for many more years to come. Happy birthday, JAMIE.

FARMWORKERS FIELD SANITATION STANDARDS

Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, some distinguished voices have recently said the Labor Department's refusal to issue a farmworker field sanitation standard was nothing short of outrageous. No—in truth what is outrageous is this matter being a subject of disputation at all.

We are a nation priding itself on our inbred compassion and sense of dignity. Hygiene, I would have thought, is something which should not be bantered back and forth like any other socioeconomic question debated in a public tavern. We're not talking about interest rates on T bills; we're talking about the kind of health problems that should not exist in a technologically advanced civilization. Dysentery, cholera, hepatitis, and the like are infections we associate with standards of living from our distant past.

It would be only the most inhumane farm owner who would deliberately put his field workers at risk of contracting those avoidable infections. But what is the extent of such inhumanity?

Are we truly a nation of Simon Legrees forcing tens of thousands of fruit and vegetable fieldworkers to routinely endure sickness, dehydration, and digestive disorders for the sake of a bucket of tomatoes? No—I do not think this is the case. But I am certain there still exists a sizable number of farmworkers who lack the sanitary means to ensure good health. It is those people we must address ourselves.

The Labor Department tells us in its April 16, 1985, final determination by the Occupational Safety and Health Administration that over 75 percent of all fieldworkers now labor in States where there are statutory and regulatory provisions on field sanitation. Is this a statistic which can be refuted? Would a Federal standard improve the conditions under which this 75 percent population toil?

A Federal standard would extend an umbrella over the remaining 25 percent population who currently work in States where there is no sanitation standard. In those few States, are farmowners complying voluntarily to any degree? Can we assume with any justification that they are not?

And what are we to make of OSHA's declaration that of the 13 States which presently enforce field sanitation standards, 10 of them have stricter rules than those which our own Congress instructed OSHA to promulgate? The other three States have standards that somewhat parallel the Federal OSHA proposal. Is OSHA deceiving us with numbers we cannot instantly verify?

Mr. Speaker, it is my belief that a Federal standard would principally satisfy a problem that exists in farm labor States with no statutory requirements. The States which now have enforceable standards are California, Colorado, Connecticut, Florida, Idaho, Illinois, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Texas, and Maine, for blueberry pickers only. The extent to which any of these 13 States have fully implemented their sanitation standards is not precisely known to me—but all these States have regulations on their books. But other States where perishable commodities are prevalent need some protection. How are we to provide it if OSHA refuses to act?

That is a question we cannot immediately answer. Farm labor groups will play a key role in convincing certain State legislatures to get on with the task of doing what their neighboring States have done. It must be done. I find it personally inconceivable that the States lacking any sanitation guidelines have made no progress toward that end.

It seems to me the question here is not one of commitment to health. Absolutely everyone would agree to that. Even the groups representing agricultural employers did not argue to OSHA that farmworker health was not a desirable thing. Their principal argument was economics—and that is a pretty standard argument. It's a weak one, too. Fresh water and a portable toilet don't cost much to provide. I reject these arguments about cost-benefit ratios. They are inhumane in themselves. We are speaking of a question of basic morality and human decency.

What we need to address at this sad juncture in our efforts is the need for a Federal presence. OSHA claims it does not have the enforcement personnel to service a Federal standard. I won't argue with that—OSHA has been RIF'd like every other agency. Our several State departments of health and/or agriculture currently manage and oversee many Federal programs as well as indigenous State programs. Can those State agencies pick up the enforcement responsibility if a Federal standard were issued? It is a possibility. The OSHA belief that no Federal standard is needed because it can't be enforced is ludicrous.

Now what do we do. If a Federal standard whose rough silhouette was drawn by Congress is issued, it would preempt better standards in 13 States. It would seem to me that we have a choice. Congress can begin the process all over again, issue new legislative instructions that match or exceed the existing rules in those 13 States, and let OSHA proceed with a new round of rulemaking.

Our other choice is to support the efforts of existing groups to lobby in State capitols where there are no standards and apply some firm persuasion to get those States to do what is proper. It seems to me that instead of arguing over whether the Federal executive should take the lead or the States should take the lead—we should all be working toward our goal down the quickest avenue possible.

Mr. Speaker, how long can we sit back and allow these indignities to be suffered by human beings?

THE VOTE FOR AID TO THE FREEDOM FIGHTERS IN NICARAGUA

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, many of my colleagues have said that the polls show that President Reagan's Central American policy is unpopular. Now that is turning around.

But even if it were not, remember the people of this country trust and respect Ronald Reagan. The initial polls showed the people opposed his actions in Grenada, but within days, no, hours, that opinion changed.

The Communists are bent on revolution throughout Central America and Ronald Reagan knows it. You and I know it. And soon the people of America will know it as well.

If you vote against the President's peace proposal next Tuesday because you think it is politically popular, remember those who opposed President Reagan's Grenada rescue mission ended with egg on their face. This vote will come back to haunt you if you make the same mistake again. We will make sure of that.

The next time you may lose your political head.

SANITATION STANDARDS FOR FARM WORKERS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, it is shameful that most of the Nation's farmworkers have never had sanitary standards. After OSHA's refusal to promulgate sanitation standards, one wonders if OSHA really stands for Occupational Safety and Health Administration. There are thousands of pages of evidence that documents a high incidence of infectious and parasitic diseases, toxic disorders, and other ailments that are caused by a lack of fresh water and rest rooms. I say to all of my colleagues, we cannot turn away from these workers, whose working conditions compare only to certain areas of the Third World. OSHA has dismissed the plight of thousands of farmworkers as if they lacked the human dignity we claim to accord to everyone. How are these workers to wash the pesticides from their hands, to quench their thirst, and relieve themselves during the day. According to OSHA these necessities are not a top priority. What are the priorities, Mr. Speaker? The people of this country can figure this out. Why can't OSHA.

I appeal to the Secretary of Labor designate, Mr. William E. Brock to immediately issue regulations for field sanitation standards for farmworkers. I also appeal to Mr. Brock to ask for the resignation of OSHA Director Robert Rowland, who had the audacity to say to the Federal appeals court he was not aware of a report by OSHA's own health expert's which recommended the sanitation standard.

On April 17, I went to the Department of Labor to offer a rebuttal and was shocked at being refused access to the building. Mr. Speaker, I believe we might expect such action from the South African Embassy, but not here on Capitol Hill. Why was a Member of Congress prohibited from entering the Department of Labor. I want an answer to this question, and I want to see labor standards issued now.

AID TO THE FREEDOM FIGHTERS IN NICARAGUA

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, next week we will vote on the critical issue of the U.S. assistance to the freedom fighters in Nicaragua. There are some people who say this is not America's business and, Mr. Speaker, I would like to tell you yes, it is America's business because America is a nation that was founded on an idea, on a principle that all men are created equal and endowed by their creator with certain inalienable rights. Not just Americans, but all men.

□ 1140

And, Mr. Speaker, history proves that all men know they have such an endowment of rights because throughout history all men have been willing to fight for their freedom and, failing in that fight, all men have shown that they are willing to vote then with their feet to move to a better place, and a better place indeed has proven historically to be the United States.

Should the people in South America not get the assistance they need to win this fight for their freedom, for their right to live free in their own land, they almost certainly will run free and they will run north to the U.S. border, to that haven that has been proven throughout history.

Mr. Speaker, I do not want to be faced with the moral dilemma of having failed to give the assistance of materials to these people at a time when they were fighting for their freedom, to have to stand at our border and deny them the freedom and the right to come to our country, as they most certainly will try, as people throughout the world have most certainly done in the past.

I thank the Speaker.

COVERT AID TO NICARAGUA

(Mr. AuCOIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AcCOIN. Mr. Speaker, knowing that aid to the Contras was "dead in the water" in Congress, the administration has pulled a new Nicaraguan peace plan out of its hat: For 60 days, American covert aid would be strictly "humanitarian." After that, barring a negotiated settlement, the aid would become military.

What a plan. Who supports it? Not the Contadora nations who have worked for 2 years on an agreement to ease tensions in Central America. Not Colombian President Betancur who said that covert aid is "a preparation for war." By the way, you don't hear leaders like him calling the CIA-backed rebels as freedom lovers who are desired to Thomas Jefferson!

The only people who like the peace plan are White House strategists who dreamed it up to get Congress to release the $14 million. Mr. Speaker, in the upside down world of this Administration. This plan should be called a peace threat.

This is a no-lose situation for the administration, and a no-win situation for Central America. It assures the Contras $14 million in military aid—if they don't reach an agreement with the Sandinistas. And, until the charade of negotiations is over. The Contras will get "humanitarian" aid such as trucks, uniforms, and logistical support.

Mr. Speaker, there is no such thing as humanitarian aid to a mercenary army. Especially an army that the President says he wants to increase in "size and effectiveness" if he wins this $14 million kitty.

Mr. Speaker, let's end the covert war and push for a policy that can bring peace to Central America.

THE TASK FORCE HAS RUN AMOK

(Mr. WALKER asked and was given permisson to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, when discussing the Eighth District race in Indiana in recent weeks we have heard the Democrats talking all the time about "Let's count all the ballots." We did not know until yesterday just how far they are prepared to go on that, because now we find that counting all the ballots means reaching into the next district, finding a Democratic ballot over there for Mr. LEE HAMILTON and counting that for Mr. McCloskey. In the count yesterday we found out that they got a ballot that was evi-

dently wrongly distributed but, nevertheless, has LEE HAMILTON's name on it, where they voted straight Democratic. But they decided now to count that vote for Mr. McCloskey, saying that the guy who voted for Mr. HAMILTON really meant to vote for Mr. McCloskey in that race.

That one vote could be the difference in this race, it is that close. I suggest that a task force that is going to count ballots cast for one person for someone else is a task force that has run amok. The kinds of things we have seen happening with this task force's voting rules and the rules they have set up for counting just has become an issue that is absolutely ridiculous.

LIMITING SHELTERING OF OFF-FARM INCOME TO $25,000 PER YEAR

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, today I am introducing legislation that will limit to $25,000 per year the amount of off-farm income which could be sheltered by farm losses.

This legislation will close a tax loophole which is aggravating our mounting agricultural crisis. This is a way to help our family farmers and save the Government money at the same time. Farmers and ranchers not only have to deal with low commodity and livestock prices, high interest rates and declining agricultural exports, but they also must compete with so-called gentleman farmers who are more interested in farming the Tax Code than in producing food and fiber. These investors use tax benefits from farming, such as investment tax credits or depreciation on farm equipment and livestock, to shelter nonfarm income.

Tax investors compete with genuine farmers and ranchers for farm and ranch land, add to surplus production problems, and sometimes farm marginal lands, thus aggravating soil and water conservation problems. This legislation will go a long way toward restoring commonsense to our Nation's tax policy as it applies to agriculture. Overproduction due to tax-beneficial investments by nonfarmers results in lower prices for consumers, but devastates legitimate farmers. Meanwhile, farmers with no income to shelter get no benefits. My legislation protects farmers who need nonfarm income in order to stay afloat over the long term by excluding from the tax-loss limitation farmers with nonfarm income if they are actually in the business of farming to make a profit and if they received the greatest share of their income from farming in 3 of the past 7 years.

Current tax programs stimulate production, while farm programs prop up prices, subsidize farmers, and pay them not to grow more food. Tax policy throws farm production out of sync by bringing in investors who care less about farming than they do about sheltering outside income from taxes. My bill is a good opportunity to add some revenues to the Federal coffers while sending some absentee farmers to look for shelter somewhere else.

THE EVOLVING RATIONALE FOR CONTRA AID

(Mr. MOODY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOODY. Mr. Speaker, let us review for 1 minute the conveniently evolving rationale for Contra aid.

First, we were told that it was to help interdict Nicaragua arms shipments to Salvador guerrillas.

Then we were told that it was to put external pressure on the Sandinistas to honor their revolution's goals.

Those early rationales proved false when we learned the CIA was conducting a deadly war inside Nicaragua, shooting unarmed civilians and officials, publishing assassination manuals, mining harbors, and blowing up economic targets—terrorism sponsored and financed by the CIA, in violations of the Boland amendment, international law, and the Treaty of Rio.

Twice Congress said no to this policy. We turned off the financial spigot.

Last March we learned of a new rationale for Contra aid when President Reagan and Secretary Shultz admitted that the real goal was to overthrow the Nicaraguan Government.

Now the President has a new rationale with a ribbon tied around it called peace talks.

The real issue here is not the $14 million itself, regardless of how packaged. It is: Do we want to turn on that spigot again?

Once we do, we once again head down the road of overthrowing an internationally recognized sovereign government—a return to Yankee style "might makes right" which hurts us badly in the region—a policy which brushes aside the Contradora opportunity of negotiated settlement.

It is a policy that the American people disapprove of and Congress has rejected twice.

Congress must say no again.

□ 1150

FUNDING THE CONTRAS WILL MAKE THE PROBLEM OF NICARAGUA WORSE, NOT BETTER

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, Central America has two problems: poverty and war. Reagan's proposal means more of both.

I was in a God-forsaken refugee camp in the hills of Nicaragua last week, and Lucia Zamora, a woman who has lost three nephews to the Contras, came up to me and said, Please don't send more money to the Contras. We need it more here, in the villages.

These are the people whose lives are being destroyed. Not by the Cubans, not by the Soviets. They are being destroyed by the Contras and their war. Do not compare the Sandinistas to the Almighty; compare them to the alternative.

Funding the Contras will make the problem of Nicaragua worse and not better. President Reagan may be trying to prevent another Cuba, but his policy is going to create another Cuba.

If we want humanitarian assistance to Nicaraguan refugees, we will have the chance to debate that later.

Let us not let the President muddy the water.

The question is crystal clear: The issue is $14 million for war in Nicaragua. The vote is yes or no.

REAGAN ADMINISTRATION APPOINTEES ATTACK PROGRAMS FOR THE HANDICAPPED

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, yesterday two Department of Education appointees of the Reagan administration had the following to say about programs for handicapped people.

Mrs. Gardner said:

> What happens to a person in life, the circumstances a person is born into . . . those circumstances are there to help the individual grow toward internal spiritual perfection.

Then Mr. Uzzell testified that he once again was urging that the 1975 law for the education of handicapped children be abolished.

Well, whatever one's religious beliefs might be, those two statements are not ones of morality but are statements of moral bankruptcy. Those beliefs do not stand for the law and the rights of the individual but instead result in the law of the jungle.

There is still a sense of community in this country. I hope, as urged by the gentleman from California yesterday on this floor, that Mrs. Gardner's appointment will be withdrawn.

PROTECT OUR SENIOR CITIZENS

(Mr. KANJORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KANJORSKI. Mr. Speaker, the American Association of Retired Persons has estimated that a typical retired couple will see its Social Security and Medicare benefits cut by more than $2,000 over the next 4 years if the revised White House budget is implemented. The AARP further estimates that permanently lowering Social Security benefits by 6 percent would force almost 1 million additional elderly below the poverty line over the next 3 years.

Mr. Speaker, there is no need to steal $22.6 billion over the next 3 years from our senior citizens when Social Security is financially sound and funded out of its own trust fund, and not out of general revenues. Cutting Social Security will not reduce the deficit, it will only increase the surplus in the Social Security trust fund.

As responsible legislators it is our duty to put this so-called Diet COLA where it belongs—in the can. I urge all of my colleagues to reassure their senior citizens that their COLA's are safe by cosponsoring House Concurrent Resolution 116.

NATIONAL BUREAU OF STANDARDS AUTHORIZATION ACT FOR FISCAL YEAR 1986

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules I call up House Resolution 128 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 128

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1617) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of clause 2(l)(6) of rule XI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, each section of said substitute shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5(a) of rule XXI and section 303(a)(4) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore [Mr. TORRES]. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, for the purpose of debate only, I yield 30 minutes to the gentleman from Missouri [Mr. TAYLOR], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 128 is the rule providing for the consideration of H.R. 1617, the National Bureau of Standards Authorization Act, for fiscal year 1986. It is an open rule, providing for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. The resolution makes in order the committee amendment in the nature of a substitute as an original bill for the purpose of amendment, and provides that each section shall be considered as read.

There are several waivers of points of order in this rule, Mr. Speaker. The first waiver is of the 3-day layover rule for committee reports. Although the Committee on Science and Technology ordered the bill reported on April 3, the report was not actually filed until Tuesday, April 16. Since the printed copy of the report has not been available for the required 3 days, the waiver of rule XI, clause 2(l)(6) is necessary.

Mr. Speaker, points of order are also waived under section 303(a)(4) of the Congressional Budget Act—which provides that it shall not be in order to consider any bill which provides new entitlement authority first effective in a fiscal year until the first budget resolution for such fiscal year has been adopted. Section 6 of H.R. 1617, as reported, provides new entitlement authority by setting the rate of compensation for the Director of the Bureau at level 4 of the Executive Schedule. Since this new entitlement authority is first effective in fiscal year 1986 and since no conference report on the first budget resolution for fiscal year 1986 has been adopted, the bill violates section 303(a)(4) of the Budget Act. However, the Committee on Science and Technology intends to offer a floor amendment during this violation.

Mr. Speaker, House Resolution 128 also provides a waiver of clause 5 of rule XXI to allow consideration of the committee substitute. That rule prohibits appropriations in a legislative bill. H.R. 1617 would authorize the Secretary of Commerce to acquire capital equipment and inventories with receipts for work or services performed. Since the provision makes existing funds available for a new purpose, it is construed as an appropriation. Again, it is our understanding that the Committee on Science and Technology will offer a floor amendment that will cure this violation. Mr. Speaker, upon conclusion of consideration of the bill, one motion to recommit with or without instructions would be in order.

Mr. Speaker, H.R. 1617 authorizes $143.9 million for the activities of the National Bureau of Standards for fiscal year 1986, as follows: $139.9 million for programs conducted at the National Bureau of Standards, $2.8 million for the Office of Productivity, Technology, and Innovation, and $537,000 for the National Technical Information Services. In addition, H.R. 1617 restores three centers which have received strong bipartisan support by the Congress but which have been proposed for elimination or reduction. They are the Center for Fire Research, the Center for Building Technology, and the Institute for Computer Sciences and Technology.

The Committee on Science and Technology voted to restore $9.7 million for these two critically important centers and also restored $5 million to the funding level to the Institute for Computer Sciences. This institution plays a critical role in improving our Nation's use of computer and telecommunication technology.

Mr. Speaker, I support this bill and I urge support of House Resolution 128 so that we may proceed with this important legislation that would allow the National Bureau of Standards to conduct the programs that Congress mandated.

□ 1200

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 128 waives three points of order against consideration of the 1986 authorization bill for the National Bureau of Standards. That bill, H.R. 1617, is yet another example of the failure of our committees to even attempt to reduce Federal spending.

This rule is yet another example of the failure of the Rules Committee to require the legislative committees to live up to the requirements of the Budget Act. The rule also offers another sad example of our failure to force legislative committees to comply with the rules of the House.

Mr. Speaker, this rule is a prescription for bad legislative procedure. The

fact that it provides a whole set of waivers for a bill that contains excessive increases in the budget points out the necessity for the House to stop this practice of business as usual.

The resolution waives the 3-day layover rule against consideration of the bill. Despite the fact that the Committee on Science and Technology reported the bill 2 weeks ago, they did not file their report in the House until Tuesday. With this waiver, the Members will be asked to work on a bill that has been available only since yesterday afternoon.

Mr. Speaker, regarding the availability of the bill and the committee report, I would also point out that even the Committee on Rules did not have the final printed versions of them when we met Tuesday morning to report this rule.

This resolution waives the Budget Act, because the Committee on Science and Technology wants to provide a pay raise to the Director of the National Bureau of Standards, but does not have the necessary new entitlement authority to do so.

The resolution also waives clause 5(a) of rule 21 of the rules of the House, because the committee substitute contains appropriations language in a legislative bill in violation of the rule.

Mr. Speaker, there are only two good things one can say about House Resolution 128: It is an open rule and it does provide for one motion to recommit with or without instructions. The rule will allow an amendment or amendments to reduce the level of authorization for the Bureau of Standards, such as the budget freeze proposal to be offered by the gentleman from Michigan [Mr. PURSELL] and the gentleman from Connecticut [Mr. MORRISON].

Mr. Speaker, as reported by the Committee on Science and Technology, H.R. 1617 authorizes an increase of $20.7 million over the budget request of the administration. The authorization level contained in the bill is $143.9 million, an amount that is a $16 million increase over the current funding level.

The bill is opposed by the administration, and it should be opposed by the Members of the House.

Mr. Speaker, if the Congress doesn't put a stop to this kind of spending authorization, we will never be able to deal effectively with the growing Federal deficit.

Mr. Speaker, there is ample reason to oppose this rule. Because of the three waivers recommended by the Committee on Rules, this rule is bad legislative procedure. On the other hand, because it is an open rule, it is fair to those who want to attempt to hold the line on Federal spending and reduce the authorization levels in the bill.

Mr. Speaker, I yield such time as he may consume to the distinguished minority whip, the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, I opposed this rule in the Rules Committee and I oppose it now, both for procedural and substantive reasons. We considered this bill in the Rules Committee in violation of our own committee rule that requires 24-hour advance availability of bills and reports. Now, we are being asked in this rule to put the House at the same disadvantage by waiving the House rule that requires that reports be available for 3 days before legislation can be considered on the floor. We should not condone flying blind and voting blind, either in committee or on the floor. It's no way to legislate in the world's greatest deliberative body.

But this rule contains other waivers that point more to the substantive faults in this bill. Not only do we waive the House rule that prohibits appropriations in an authorization, but we waive the Budget Act prohibition on new entitlement authority being enacted before adoption of the first budget resolution. Those waivers are necessary because this bill contains authority for salary increases—yes, salary increases at a time when we are talking about freezing Federal salaries.

The Committee on Science and Technology tells us in its report that this bill authorizes $143.9 million, plus such other sums as may be necessary for the pay raises. According to the CBO estimate in the report, that will cost another $2.3 million for a total authorization of $146.2 million. That's $18.4 million or 14.4 percent more than last year's spending.

So this legislation is not just a procedure-buster, but a budget-buster as well. It's actually $21.4 million over the budget request of $122.5 million.

If my colleagues are experiencing a sense of déja vu over this legislation, it is well justified: You have indeed been here before—just a year ago this month. At that time, the Science Committee brought us a fiscal 1985 authorization that was some $6.7 million over the administration's request. The House, in its wisdom, adopted the Gregg amendment to reduce spending to the level requested by the administration, at which time the Science Committee pulled the bill. But the Gregg amendment was upheld when we resumed consideration. Despite our valiant efforts, we subsequently agreed to some objectionable amendments from the other body that prompted a veto at the end of the 98th Congress.

Mr. Speaker, fortunately, we will have an opportunity again this year to strike a blow for fiscal sanity and deficit reduction. The gentleman from Pennsylvania [Mr. WALKER] and the gentleman from Michigan [Mr. PURSELL] will be offering amendments to cut back the authorization level to the administration's request of $122.5 million—a $21.4 million reduction and for a freeze at the fiscal year 1985 level. I strongly support this amendment and hope the House will demonstrate the same courage and foresight it demonstrated last year on the NBS bill when it adopted a similar amendment. Otherwise, I fear our sense of déja vu will be completely fulfilled with another Presidential veto. And make no mistake about it—the administration is opposed to this bill in its present form. Let's support the Walker amendment to bring this back to the level of funding requested in the budget and continue with our deficit reduction efforts.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Pennsylvania [Mr. WALKER], a member of the Committee on Science and Technology.

Mr. WALKER. I thank the gentleman for yielding, and I want to congratulate him and the gentleman from Massachusetts for pointing out accurately that this bill does indeed contain a budget waiver.

Now, it is my understanding that out of my committee we are going to have an appropriate amendment that cures that budget waiver problem. But I will say that I am going to try to point out each and every time we come to the floor with these budget waivers and I am going to try to bring to the House's attention that these budget waivers cumulatively are what are resulting in the kinds of spending problems we have got around this House, that over and over again the Rules Committee is allowing budget waivers to come through, that then we get authorization in appropriations that far exceed what we say in the budget we are going to spend. Those figures are not small figures. In the last 5 years this Congress has overspent its own budgets by $150 billion. We have added $150 billion to the national debt over and above what we said we were going to spend simply because on a regular basis we have waived the Budget Act, on a regular basis we have come in here with supplemental appropriations with budget waivers to them, and consistently what we have set out is a budget and then on the other hand set out a pattern that simply violates that budget time after time after time.

Personally, this Member is getting a little sick of this idea around here that we politically run around the country telling everybody all this good stuff we are doing on the budget and then have the pattern of operation around here a waiver of the Budget Act on every conceivable item that comes before us.

□ 1210

In this particular case, we are going to end up trying to correct it within the legislation. Thank goodness, thank goodness. But it is a pattern that we see around here all the time, that we play the politics of the budget out there, but the fact is we really do not want to obey it.

I want to congratulate the gentleman from Missouri for pointing out to the House that indeed we are proceeding right along that course with this bill. The gentleman from Massachusetts also mentioned in his remarks that we have a budget waiver in here. Again, I say I am thankful we are going to correct it in this particular case, but I would hope that the Rules Committee would begin to say flatly to the people coming before them that we are not going to accept your budget waivers anymore.

If this House cannot live within its own rules, then we better change the rules. If we cannot live within our own procedures, then we better change the procedures. But we ought not let this pattern go on where we fool people with the budget only to violate that budget day after day after day.

Mr. WALGREN. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. WALGREN. I thank the gentleman for yielding.

We should lay out what we are talking about here on this budget waiver question, because the way it has been set out, it would seem like a floodgate was opened through which a lot of money is pouring.

As I understand it, we are going to be proposing a technical amendment which will bring this bill back into conformity with the Budget Act, and the only effect of that technical amendment would be that the salary of the Director of the Bureau of Standards would be made comparable with other national laboratory directors, an amount of $3,600 the spending of which is not in dispute, but simply the account from which it will be drawn from a different account.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. TAYLOR. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. WALKER. I yield to the gentleman from Pennsylvania [Mr. WALGREN].

Mr. WALGREN. I thank the gentleman for yielding.

We are talking about a very technical amendment here, and there will be no change in the amount of money that is spent because of the budget waiver that the Budget Committee included in this rule.

Mr. WALKER. I thank the gentleman. The gentleman is absolutely correct. My question here is more one of process than of substance, because if this were the only budget waiver we were going to consider, I would not have so much problem. The fact is that this is part of a pattern that I am really referring to.

I would point out to the gentleman though that $3,600 represents the entire tax bill of one average American family in this country. So for that particular family, the fact that we are including a budget waiver for $3,600 is in fact a big amount of money.

Mr. WALGREN. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. WALGREN. I would spend an awful lot of time in pursuit of $3,600. I think that is a significant amount of money. No amount of money is small in this body, and that is not a small amount of money. I do appreciate the gentlemen's point on process; I think that is a good point. But we should not, or no one should take the impression that we are going to be reducing the amount of spending involved in the Bureau because of this technical amendment to the budget waiver process.

Mr. WALKER. I thank the gentleman for his point and I yield back my time to the gentleman from Missouri.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the gentleman from New Mexico [Mr. LUJAN], the ranking member of the Committee on Science and Technology.

Mr. LUJAN. I thank the gentleman for yielding me this time.

Mr. Speaker, let me give some perspective to the House as to what happened when we were in subcommittee and in committee. The bill that we came out with was $143 million. The administration had requested $122 million, but it turns out here that the 1985 level, instead of being $122 million, as the administration requested, is $127 million. About $5 million difference.

Now, what I understand will happen here today is that there will be an amendment offered to go back to the 1985 level, and then there will be an amendment that takes it down to the request level. The request level being $5 million below the 1985 level.

I think it is reasonable to support the amendment that takes it down to the request level. The agency has gone through all of the different things that they have to do to reduce their expenditures, and they have told us that $122 million is an amount that they can live with.

Why do we need to stuff $5 million down their throats that they did not even ask for, and that, if you take their word, that they do not need? I think we set a precedent in the two bills that we had last week and yesterday, the NASA authorization and the National Science Foundation; those bills were brought down to the 1985 level.

Now, in this one, do we bring it down to the 1985 level or the agency's request? I think we would be smart to take the position that whichever is the lower of the two figures, that that is the amount that we should fund. The National Bureau of Standards, the National Science Foundation, NASA; those are all agencies that I feel very kindly toward. If we were going to give an increase to any of them, those would be as deserving as any of the others because that is where the future jobs will come from.

However, we have got to be realistic in this whole budget process that our primary objective here is to reduce expenditures, and it would make a lot of sense to me that if the agency has said all we need is $122 million, why should we give them $127 million, and even worse, why should we give them $143 million as it called for in the bill?

As they say, some of my friends are for $127 million.

The SPEAKER pro tempore. The time of the gentleman from New Mexico [Mr. LUJAN] has expired.

Mr. TAYLOR. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. LUJAN. As the old saying goes, some of my friends are for $127 million; I will support that. Some of my friends are for $122 million; I am going to stick with my friends on that one also. But that then gives us a reduced amount down to the $122 million, and that is the lowest, and that is what the agency has said that they can spend and they would like.

Mr. MOAKLEY. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. BROWN].

Mr. BROWN of California. I thank the gentleman for yielding me this time.

Mr. Speaker, I am provoked into speaking on this rule because of the remarks of my good friend from New Mexico, who is being very generous in offering to go to the lowest possible level on this bill authorizing the National Bureau of Standards. I admire him for that. As I pointed out in connection with the debate on the NASA bill a few days ago, I hope that he will exercise similar discipline when a really important bill comes along like the defense bill.

If I were certain that he would, and that a majority of the House would, I would join him in his request here today. But I do not think that we are going to see that kind of discipline when it comes to the other bills. Hence, I am extremely reluctant to gut a bill for authorizing the program of an agency which is universally recognized as contributing a great deal to the welfare of this country; to its eco-

nomic development and to its scientific development.

I would like to clarify, just very briefly, some of the numbers that were mentioned here. The gentleman from New Mexico referred to the agency's request as being $122 million. Actually, the agency requested a figure of $226, as shown on page 5 of the committee report. It then went to the Department level, the Department of Commerce, which requested $146 million, above the level that is contained in this bill. Then it went to the Office of Management and Budget, which produced the final cut and gave us the figure that is in the President's budget.

Now, you may say that this is the agency's request; we know that it is not the agency's request, that it is the agency's request pared down by two further levels of review, and I just want to make that clear. We have not, in this authorization bill, gone back up to the agency's request, we have gone back to less than the Department of Commerce request to OMB, a request which was then cut back by OMB.

I think that the committee level is a reasonable level, and if you look at the specific programs that are incorporated in this legislation, they are programs of vital importance to the future of this country. There is a new biotechnology initiative, for example, which the entire biotechnology industry has recognized is of vital importance if we are going to maintain this industry on the path of growth which it seems to be taking.

There is an initiative there for new developments in materials technology, in ceramics. On the very floor of this House, in just the last year, we have had Members come in and add millions to fund the laboratories which are doing materials research, laboratories which will require the technical resources of the NBS and this program in order to monitor and to set the standards for the research they will be engaged in.

□ 1220

So there is no question about the value of the NBS programs, and I think my friend, the gentleman from New Mexico, could recognize that. These programs were, as a matter of fact, requested by the administration at the same time that they requested cuts in the Center for Building Technology and the Center for Fire Research and in the Institute for Computer Analysis, which this House has repeatedly gone on record as supporting in the past.

So this is a little more complex problem than was represented by the gentleman from New Mexico, and I hope I have not said anything that contravenes anything that he has said.

Mr. LUJAN. No, if the gentleman would yield, because I do want to tell him that the gentleman is correct, that the work that goes on there is excellent.

I just wanted to answer one thing. Since the gentleman said he would probably join me if I were of the opinion that maybe we ought to freeze everything, including defense, let me tell the gentleman that I am prepared to support either the Presidential request or the 1985 level, whichever is the lowest, in all cases. So having said that, I assume that the gentleman would vote for the $122 million.

Mr. BROWN of California. I accept the gentleman's statement in good faith.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 128 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1617.

The Chair designates the gentleman from Michigan, Mr. LEVIN, as Chairman of the Committee of the Whole, and requests the gentleman from Maryland [Mr. MITCHELL] to assume the chair temporarily.

□ 1225

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1617) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes, with Mr. MITCHELL (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Pennsylvania [Mr. WALGREN] will be recognized for 30 minutes and the gentleman from New York [Mr. BOEHLERT] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Pennsylvania [Mr. WALGREN].

Mr. WALGREN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 1617. This bill would provide authorization for the National Bureau of Standards in the amount of $140 million, along with $2.8 million for the Office of Productivity Technology and Innovation, and $537,000 for the National Technical Information Service.

The vote in our committee on final passage showed strong bipartisan support for sustaining what are clearly important and unique functions at the Bureau of Standards, and I hope that the Members will think carefully about exactly what the National Bureau of Standards is all about.

The National Bureau of Standards is not a bureaucracy as its name would imply. It is a national laboratory, a national laboratory that is a unique and almost the sole source of excellence in its area of science in our country. It is in that sense a jewel in our crown and one that we undercut at our risk.

I hope that Members will stop to think of what we are talking about in the area of standards. At bottom, all science begins with measurement. If you are to conduct an experiment, you must observe what happens, and the way we observe is by measurement. We literally cannot know anything without being able to measure it. It is like in the Bible, we have a relationship with others only if we know their names, and a name was given to the Lord at a certain time in the Bible. The same is true in science. We have no power unless we can measure. It is the science of measurement that we are talking about. It is literally the linchpin to all scientific programs.

I hope that when we deal with the various efforts to reduce this budget that the Members will consider the importance of the measurement function of the Bureau of Standards. We should remember that, if we want the benefits of the laser technology that has been mentioned on the floor of the House several times recently, where we have hopes to be able to disssolve by lasers blockages in the human circulatory system, then we ought to support the science that is behind the tuning of the laser.

If we, as Members of Congress, want to write notes to people in the hospital and say we are glad they are recovering from a heart attack, we hope we should be able to also say that we supported the science that saved their lives, and not be in the position of saying we are glad you survived, but we don't really think you should have recovered.

If we want American manufacturing to be able to compete with foreign products, we should support the science that is behind the automation that is necessary. That is the science of measurement and the ability to create the microchips that are necessary in that area.

If we want to have any progress in the weapons systems of this country, I hope we realize that it was the Colt six-shooter that sort of established the need for standards. Without the concept of standards, the interchangeable

parts that led to the machinegun and the victory of the North over the South in the Civil War would not have been available to our country. In a very real sense, the mission of this laboratory is at the heart of the existence of the Nation.

Somebody said in our hearings, with a real grain of truth, that we could probably eliminate the budget of the Department of Commerce. I think there is probably a good argument that could be made by many that we ought to eliminate the Department of Commerce. But we would not be able to sustain our way of life if we eliminated the Bureau of Standards. There is a very real core of truth in that statement.

The administration has proposed an institutionally damaging budget of $120 million for the Bureau for 1986. This budget is $4 million lower than the 1985 appropriation. It contains $25 million in program reductions and $21 million, approximately, in new initiatives. The committee accepted the new initiatives proposed by the Bureau inasmuch as they were very much viewed as in the national interest. These include almost $2 million for process and quality control, $3 million for biotechnology, and $3.5 million for advanced ceramics.

In addition, the committee agreed with the administration decision to provide $8 million for construction of a new laboratory related to cold neutron source science. This involves a new level of measurement with the ability to evaluate the molecular structure of materials by a nondestructive cold neutron penetration and measurement of the effects thereof, rather than some of the destructive testing mechanisms we have which really do not tell us very much about the materials.

□ 1230

The NBS initiative in advanced ceramics is critical for the leading edge of our technology in the next several years, and that means our commercial technology. The ability of ceramics to contribute to the energy-related innovations by the development of new engines based on ceramics rather than metal is obvious to all observers, and we would fail to proceed in that area at our peril.

The initiative in biotechnology clearly is an area that is crying out for standards to enable the industry to function. In biotechnology, we need to measure things that have never existed before. Measurements of qualities of specific biologically active agents have to be developed, and there will be little progress in the industrialization of biotechnology until we do that. This is to outline how important these initiatives are to our national interest, and I hope the Members of the House of Representatives will support them.

Once again this year, the committee did not accept the administration's request that the Centers for Fire Research and Building Technology be eliminated. The Congress has never accepted the elimination of the Centers for Fire Research and Building Technology, even though it has been proposed several years in the past. Many of us are truly perplexed as to how a proposal could be made to eliminate these centers which have both contributed most important things to our national life and promise to do that in a magnified form in the future. In a sense, this almost seems to be a Washington Monument-type approach to the budget by the administration, where they propose eliminations that cannot be accepted on their face. When we consider the role of the Center for Fire Research, for example, in the development for the low-head sprinkler system which we hope will be the lifesaver for residential fire death in this country, it becomes obvious that this is an area that we should certainly not be wiping out, as the administration's budget proposes.

Second, the Center for Fire Research is now embarked on one of the most exciting adventures in the control of fire death in our time, the computer modeling of the progress of fires so that homes can be constructed not only in a most cost-effective way but in a way that takes into account the way a fire would move and would, therefore, be able to protect people in those structures by the construction of the building in a way that we have never been able to do in the past.

The fact that the United States has the highest death rate from fire in the industrial world among all nations comparable to our society is a disgrace, and it literally would be a disgrace, with the lives that will be lost to fire if we back up and wipe out that Center for Fire Research.

The same thing can be said about the Center for Building Technology. Nothing has more concretely, on a cost-effective basis, contributed to the well-being of the American public than the Center for Building Technology. In one little measure, the development of an insulation measurement technique that allowed the building industry to save literally $90 million a year, the Center for Building Technology justified its existence ad infinitum. If we take the $90 million that the American public saved from the single development alone, and put it in an endowment, it would give us year by year the $5 million that we invest in the whole range of building technology functions that are carried out. And there is a host of them that would be absolutely essential and would not be picked up in any other way.

The Institute for Computer Sciences and Technology is authorized in the bill at the rate of $10 million. The administration cut that by about $5 million on the rationale that somehow or other we should limit their involvement to international computer standards. I support their involvement in international computer standards. I am remembering in years past that the administration did not support the international program despite the fact that we would be left out of a multitrillion-dollar business as France and other countries occupy the rest of the world in computer technology if we do not engage in the international development of standards.

But the domestic contribution of the Center for Computer Standards and Computer Technology is absolutely essential. It is the only place where we now, as a Government, go for up-to-the-moment solutions of computer problems for Government computer work. The fact is that we are saving the taxpayer money head over heels in the application of computer technology to Government work. To simply remove ourselves from any ability to do that in the best way we can is to tie our hands behind our backs and just engage in wholesale waste.

The bill also has in it $2.5 million for steel research. This is not additional spending. This is money set aside in one of the research directorates within the basic authorization. But this is a most important effort that the Bureau of Standards is able to contribute to. If we are not going to protect our producers in this country from imported goods, either steel or otherwise, the least we can do is put them on an equal footing with respect to the other kinds of advantages that foreign producers have. One of the most important of these is at least the cooperative help of Government science skills in helping to advance the technology of their industry.

If our wage standards and our living standards are to be equal to the rest of the world, we have to produce smarter. The only way we can produce smarter in the steel industry is to have the kinds of initiatives and the forces of scientific talent that are provided in this bill so that we can produce "smarter" and essentially "leapfrog" the present methods of producing steel. We must do better than the rest of the world in the use of our scientific knowledge so that our producers will be able to be competitive even though they support the living standards of the United States of America rather than those of South Korea or Taiwan.

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. WALGREN. I am happy to yield to my friend, the gentleman from Pennsylvania.

Mr. RITTER. Mr. Chairman, I thank my colleague, the gentleman from Pennsylvania, for yielding.

Mr. Chairman, this initiative is a unique initiative that has been functioning, and it has brought leading scientists from the steel industry together on problems of common interest so as to develop the kinds of new technologies that make our steel industry once again preeminent in the world.

I think what the Members of this body need to recognize is the extraordinary amount of industrial cooperation stimulated by the governments of our foreign competition. Nowhere is this truer than in the country of Japan where scientists and engineers and technologists from various competing industrial entities combine together to work on common problems, solve those common problems, go on to compete with one another, and then go on to compete in the world with countries like the United States.

We do this to a very limited extent, and the small program within the Bureau of Standards which has been so successful in bringing these industry scientists together is something we can look to with pride.

I might add that the National Bureau of Standards has provided a kind of model framework for other National Government research and development facilities when it comes to having industry scientists work together on common problems, solve those common problems, and then go off in their various competitive directions. That is something that I just mentioned that is carried on by our competition. There is a range of industrial competitive efforts brought together by the National Bureau of Standards which extends beyond the steel industry to other basic industries in this country. It is my opinion that the Federal research and development economy must acknowledge these kinds of successes and must in other Federal laboratory facilities move toward the kinds of programs that have brought industry scientists and engineers together to solve common problems.

□ 1240

It is a worthy model and the successes are worthy of the support of the Members of Congress.

I thank the gentleman for yielding and thank him for his leadership in this area.

Mr. WALGREN. Mr. Chairman, I thank the gentleman for his statement and would like to be associated with his remarks and his fundamental appreciation of the contribution that the Bureau of Standards has made to our science and can make in the future to our industry.

I think one other point I would like to make or one last point I would like to make is that we will be dealing with various proposals to reduce this budget that have been brought forth out of the committee. As the gentleman from California said, the budget request that came from those who are most in touch with the programs within this national laboratory were some $40 million above the amount that was originally requested by the administration.

We have certain add-ons in this bill. We chose as a committee to respect the importance that the administration gave to the initiatives in ceramics and in other areas. At the same time, we were unable to give up the amounts that have been invested in the past in the Center for Fire Research and the Center for Building Technology and in the computer technology area.

This puts us in the position of having a bill in which the President is below the freeze level of last year's appropriations. We are, as a body, going to have to choose at what level we would respect and believe it is in the national interest for this budget.

I understand going to the freeze level. There is much to be said for that, inasmuch as this country has a large overall problem and we are trying to set precedents of restraint in this House. We will, at the appropriate time, be offering a budget which goes to the level of 1985 appropriations.

There are those in the body who want to go below that, that will either in their view go to 1985 freeze levels or the President's recommendations, whichever is lower.

I would like to say that those same individuals have not accepted the President's judgment about what is in the national interest in the area of NASA or in some of these initiatives that the President has recommended as important for the national interest.

It seems that the underlying rationale then to go below a freeze level is simply to vote for the lowest amount that is offered on the floor of the House of Representatives, whatever that might be.

I would hope that people would think twice about that, because that is essentially a very arbitrary approach to budgets that are as important to the national interest as this budget is.

"Daffy Duck," although he may not be a Member of Congress, could conceivably have an amendment offered on the floor of the House of Representatives which provided zero funding for this kind of effort; but the truth of the matter is that we would not respect that. We have an obligation as Members to try to preserve the value of these programs, make a judgment as to the level that is most appropriate in view of their contribution to the national interest. That may be a freeze level, but there is one thing it is not. It is not the lowest level that is ever offered on the floor of the House of Representatives.

I would hope that people would approach this with a good deal of care and recognize that this may be the most important and interesting bill up yet, because we will have a choice between freezing at the 1985 level or going below the 1985 level to one that happened to be recommended by the President, but I would hope we would remember that we did not take the President's recommendations when he was above the 1985 levels and I would think that should make us think twice about whether we should take the President's recommendations in areas where he might be below.

Mr. Chairman, I reserve the balance of my time.

Mr. BOEHLERT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Committee on Science and Technology brings forward H.R. 1617, a bill to reauthorize the National Bureau of Standards and for other purposes.

The committee sought to report a bill having the greatest bipartisan support, doing so on a recorded vote of 30 to 7. I emphasize, however, that the conditions we faced in deciding the Bureau's budget were far different from that of the National Science Foundation. There were several new and exciting initiatives being proposed in the administration's submission to Congress. We, on a bipartisan basis, supported those administration initiatives. However, the total dollar amount for these initiatives were essentially equal to the proposed decreases. The administration's request for the Bureau for fiscal year 1986 is $120 million, including program increases totaling $16.4 million. The request also includes proposed program reductions of $16.5 million and decreases of $7.6 million attributed to the President's deficit reduction program and $1.2 million to carry out the Deficit Reduction Act of 1984.

For some 4 years now, the administration, in an effort to curb the growing deficit faced by this Nation, has proposed cuts in three programs which cause problems for members of this committee. They are: First, the Center for Fire Research; second, the Center for Building Technology, each of which have been slated for elimination; and third, the Institute for Computer Science and Technology which is slated for a 50-percent reduction. The committee has made a concerted effort to substantiate the justification which the administration states for the elimination of these programs. It is clear to the committee that no other entity will take on this effort and our record is very, very extensive. In the past, the full House, on a strong bipartisan basis, has supported the reinstatement in full of these three centers.

The administration is requesting some admirable increases for efforts at the Bureau. These proposed program increases are in process and quality

control measurements at a level of $1.9 million, a biotechnology initiative at $3 million, advanced ceramic activities at $3.5 million and a continued effort to establish a national center using the cold neutron facility, a fiscal year 1986 request of $8 million.

NBS is clearly a national resource which could be leveraged at a time when our American industries are competing quite vigorously in an international market. NBS offers a clear and distinct opportunity to link U.S. industry and commerce, to those factors which hinder their performance in the marketplace. In performing its functions, the Bureau of Standards must remain a state of the art, scientific organization. It must have the resources to interact with the industrial community as well as technical resources to promote and preserve the standardization problems facing American industry.

The United States is in a race for its technological life. That race is under way today, but it will continue well into the 21st century. NBS is a high-tech agency with an outstanding track record of working on key areas of industrial competitiveness and working closely with industry. The authorization for NBS which we bring before the full House will help foster the climate for American industrial competitiveness and U.S. resurgence in the world economy.

Unlike many other Federal agencies that operate national laboratories, the entire work force of the Bureau is the national laboratory. There is not an overflow in administration's GS level 11-15 employees. These people represent the meat, the technical support, the bench type scientists. Among all the Federal research establishments the National Bureau of Standards has done more to couple Federal R&D resources with the private sector than any other institution in the Federal Government.

They have exceeded the reasonable amount of funds an R&D agency should seek from other Federal agencies. In fiscal year 1985, $124 million was appropriated, however, this amount is being leveraged by sources reaching a level of $86 million.

Yet while the fiscal year 1986 proposal returns the Bureau to $120 million which was the level held through fiscal years 1982-84. Yet, again NBS will seek out sources of outside funding amounting to $89 million for fiscal year 1986. Even the Grace Commission, in its report to the President on cost control in the Government, recommends that the ratio of technicians to professionals in NBS laboratories be increased. They recommend that NBS leverage more university students as NBS technicians. Yet NBS does not, under the fiscal year 1986 proposed budget have the resources to implement this recommendation. In fact, during the period, from 1980 to present, full time equivalents [FTE] have gradually dropped from 3,659 in fiscal year 1980, to 3,079 in fiscal year 1986, leaving us 23 percent below fiscal year 1980 funding and a reduction of FTE's of 580 positions or 16 percent. The committee is greatly concerned with the ability of NBS to maintain and attract a quality scientific work force, as the Grace Commission would even recommend.

H.R. 1617 reauthorizes appropriations for the National Bureau of Standard [NBS], the Office of Productivity and Technology Innovation [OPTI], and the National Technical Information Service [NTIS].

As described by our subcommittee chairman, this bill authorizes $139.96 million for NBS. This figure accounts for the new initiatives proposed by the administration in process and quality control. Biotechnology ceramics and the beginning construction phase of the cold neutron facility.

In addition, the bill restores three centers which have received strong bipartisan support by the Congress but which were proposed for elimination or reduction. These are the Center for Fire Research, the Center for Building Technology, and Institute for Computer Sciences and Technology.

The bill restores $6.8 million of the $12.2 million cuts to the administrative and capital equipment budgets of NBS. The Office of Productivity and Technology Innovation received level funding in H.R. 1617 as compared to fiscal year 1985 appropriated levels and the request for the patent licensing program was accepted at the administration's request.

The subcommittee chairman, Mr. WALGREN and I have had discussions regarding the role of NTIS in Japanese translation of technical information, to make those resources more available within the United States.

In the past 2 years, this committee has authorized moneys for this effort, but appropriations did not occur. The chairman and I have agreed not to authorize new spending in section 2, section 9, or section 10(B) of the bill, because of the budgetary constraints the Federal Government faces.

Nevertheless, the committee continues to be concerned about the imbalance in the exchange of scientific and technical information between the United States and Japan. Significant advances in science and technology, along with a National policy of emphasis on R&D, are expected to continue in Japan in the coming years. The United States is not getting the benefit of this information, either to enhance its data bases or to understand better the relative technological strengths of United States and Japan, because it does not have an adequate system in place to explore properly these scientific and technical developments. The committee intends to pursue this issue further by exploring the possibility of using excess foreign currencies to allow the translation and dissemination of Japanese technical information and by holding congressional hearings later in the session on this issue. The committee strongly encourages the Assistant Secretary of Commerce for Productivity, Technology and Innovation and the Director of NTIS to likewise pursue finding options to conduct this effort.

In closing, I would like to note that there has been considerable discussion between members of the Science and Technology Committee regarding the funding level of H.R. 1617. It is the belief of the majority of the members on the Science and Technology that the recommendation the committee wishes to bring to the floor is the most sound funding level NBS requires to accurately conduct the programs Congress mandated.

□ 1250

As I stated yesterday in this floor debate on the National Science Foundation authorization, I am not wedded to the mentality that we should freeze everything. I do not like deficit spending any more than any other of my colleagues here. But the last time I checked, we get paid a pretty good buck in this Congress, and I think we should establish some priorities.

The bills that we are dealing with on the floor of this House this week are extremely important to the future of this Nation, to guarantee that we can maintain our No. 1 position in terms of our industrial competitiveness. Once again, to trot out an old saw that you have heard from me many, many times, let us put things in perspective.

The total budget we are requesting for the National Bureau of Standards, this vital agency, so essential to American industry, the total budget we are requesting represents less than one-half cent per pack excise tax on cigarettes, and yet this Congress is standing idly by and on October 1 of this year the excise tax on cigarettes will go from 16 cents a pack to 8 cents a pack.

Now, you say that is no big deal. But every 1 penny in Federal excise tax on cigarettes generates $212 million for the U.S. Treasury.

I do not want deficit spending. I want to get at that deficit. The American people demand it.

But let us establish some sensible priorities. Let us put our money where our mouth is in terms of fostering the growth and dynamism of agencies like the National Bureau of Standards. And let us not give a 50-percent tax reduction to people who are misguided enough, like me, to smoke.

I reserve the balance of my time.

Mr. WALGREN. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. BROWN].

Mr. BROWN of California. Mr. Chairman, there is very little that I can add to the extremely eloquent remarks made by the chairman of the subcommitee, the gentleman from Pennsylvania [Mr. WALGREN], and the ranking minority member of the subcommitee, the gentleman from New York [Mr. BOEHLERT]. It is almost unique in my experience to see such well thought out, balanced, and eloquent statements coming from both the chairman and the ranking minority member about an agency and about a program brought before the floor of this House. As a matter of fact, I call to the attention of all of the Members the additional fact that even those who are going to propose the gutting of this bill are going to have words of praise for the Bureau, the very agency which they are proposing to gut.

Their reasons for the cuts they propose go beyond anything having to do with the agency and its work, which is widely recognized for its excellence and for the contribution which it makes to the highest priority problems of this Nation.

That is why I say that we are in a unique situation.

I want to point out a fact which has already been mentioned more than once as to why we are going to be confronted with an action which will be disastrous, and which I, for one, will not be able to support. The administration itself came in with a request for $16 million in additional funding for this agency, for the National Bureau of Standards, and then, continuing a game that they have been playing for the last 4 years, they proposed to cut out an equivalent amount of money for portions of the NBS Program which this House for the last 4 years has consistently put back.

In effect, the Office of Management and Budget is saying to us here in the Congress, "We are going to show you guys for not going along with us in the past. We are going to request the funds for the new programs that we think we need in the Bureau, vitally important to this Nation, and then we are going to take it out of your hide and see what you do about it." And that leaves us in the position of having an overall administration budget which is $16 million or $18 million less than it should be because they knew we would put that money back in for the programs which they cut.

Now, we may end up in a parlimentary situation in which we are going to achieve a result we don't want. In the words of the old song "You always hurt the one you love." And we are going to end up hurting the Bureau as a part of this game playing which is going on by the Office of Management and Budget.

Now, the actual facts are reflected in the committee report. I would like to request every Member of this House and everyone listening to my words to just read the first two or three paragraphs of that committee report. The actual programs covered by this bill, the funding for them last year was $135,802,000. That is at the second line of page 5 of the report. If we did what we did with NASA and with NSF, we would authorize that amount of money for the next year. That is a freeze. That is the same amount spent for these same programs last year.

What we are going to have before us are amendments to cut it back to $122 million or to $127 million, because of this game playing which is going on.

I personally think that the amount that the committee recommends for these programs, $143,869,000, roughly $8 million more than last year, or about 6 percent, is absolutely the minimum level that we ought to have. That $8 million add on is only half of the $16 million that the administration itself added on. I think it is a conservative way to go. And yet because of the parliamentary situation and this history of game playing, this Washington Monument syndrome referred to by the chairman of the subcommittee, OMB is going to get even with us and we are going to end up voting not for last year's dollar amount, $135 million, but something substantially below that.

I think that is ridiculous, and I think the OMB is to be condemned for that. I think that those of you here on this floor who have said that you are independent of the OMB, including my good friend from Pennsylvania [Mr. WALKER] who has said that many times, ought to reject this ploy.

Mr. WALKER. Will the gentleman yield?

Mr. BROWN of California. I will be happy to yield.

Mr. WALKER. I thank the gentleman for yielding.

As the gentleman well knows, we are not taking OMB's figures in my amendment either. We are taking their overall spending approach, but we defined the priorities in almost the same way as the committee defined the priorities, except at the lower levels. And so I would say to the gentleman that I am very sensitive to the work that the committee did in terms of defining priorities, and am not sensitive to OMB's priorities. I just feel their spending level is one that we ought to think about in this House, and certainly ought to have a vote on.

I thank the gentleman for yielding.

Mr. BROWN of California. Would the gentleman respond to this question: If this House were to be thoroughly consistent with what it did on NASA and NSF, which was to vote last year's funding level, would we not be voting on the figure that NSB and the other related agencies spent last year of $135,800,000?

Mr. WALKER. If the gentleman would yield further, the gentleman knows well that the situation is somewhat different. In both of those instances the freeze figure was lower than the figure requested by the administration.

The administration had prioritized some of those science programs at higher levels, which I know the gentleman was pleased by the administration's increasing priority there. The House decided that we wanted to bring it down to the lower figure, which was the 1985 figure.

In this case what we have is the administration saying that we think as the people who run the programs that we can spend even less than what we spent in 1985, and so the question before the House is whether or not you want to have a lower figure than what is in the freeze. And my proposal is going to be that we ought to give to the administration that amount of money which they say they need in order to administer the program.

Mr. BROWN of California. But would not the gentleman sympathize with my characterization of the OMB action here as a little game playing when they add in $16 million in new programs, and then cut out the equivalent amount that the House has voted for the last 4 years?

□ 1300

Mr. WALKER. Mr. Chairman, would the gentleman yield further?

Mr. BROWN of California. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I appreciate the gentleman yielding to me.

That is the reason why in my amendment we switch around those priorities because what we have done we have taken and moved toward the committee priorities in my amendment to reflect the fact that we do think there was some game playing going on in there and that we ought to come closer to what the committee has determined to do in some of these programatic areas.

Mr. BROWN of California. I appreciate the comments of the gentleman.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield to me?

Mr. BROWN of California. I yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, I want to compliment the gentleman and also the gentleman from Pennsylvania [Mr. WALGREN] for pointing out that essentially what we are dealing with here is an investment in our future, an investment in competitiveness. The NBS is probably the Federal laboratory that shows the greatest col-

laboration and cooperation between industrial research and public-supported research. If you compare this to the cost of the R&D tax credit which I happen to support, I think that this is really a prudent investment and to cut out such things as advanced ceramics which are targeted by the Japanese and where our world market share has been consistently falling to where we now have less than 50 percent—to cut another $1.5 million out of that research in this amendment process—would, to my way of thinking, be really foolish. Biotechnology, is the same.

If you want to cut out the Center for Fire Research, I would ask you to go back home and talk to your volunteer firemen; if you want to cut out the Center for Building Technology, go out to Kansas City to talk to the people who suffered from the structural defects in that hotel out there.

So we are not talking about a lot of money, but we are talking about an investment in this country's industrial competitiveness.

I believe the gentleman has made that point very well but I wanted to echo his remarks and perhaps expand slightly upon them.

Mr. Chairman, I again thank the gentleman for yielding.

Mr. BROWN of California. Mr. Chairman, I appreciate the comments of the gentleman from New York.

Mr. Chairman, I repeat that I rise in support of H.R. 1617, and in opposition to amendments to reduce the authorization level for the National Bureau of Standards. At the $143.9 million authorization level approved by the Science and Technology Committee, the Bureau represents a relatively small but important investment in the Nation's standards and measurements work. The Bureau's programs contribute to ensuring our competitiveness in foreign markets, to understanding hazards such as fires and earthquakes, and provides a resource for State and local governments in standards work involving safety programs. In short, the National Bureau of Standards is perhaps the best example of getting the best bang for the Federal buck. The Bureau's programs should be supported enthusiastically and without reservation.

Mr. Speaker, I am amazed that the administration continues to advocate the elimination of important programs such as the Fire Research Program and the Center for Building Technology. Countless witnesses have testified that neither the States nor the private sector are equipped to conduct this type of research independently. Each year that the administration has proposed the elimination of these programs the Science Committee has restored them.

The Center for Fire Research provides the scientific and technical basis for efforts to reduce the Nation's fire losses and the cost of fire protection. The program develops the technical basis for improved practices for fire hazard assessment, prediction, and reduction. It is directed especially toward reducing the problem of residential fires which account for the majority of fire-related deaths and injuries in the United States. The committee has received testimony from a wide variety of witnesses refuting the argument that this type of research can be conducted by individual States or the private sector. These witnesses have provided substantial evidence that if the Bureau stopped its work in this area, no one else could or would do it. The administration's insistence on elimination of the Fire Research Program is the height of irresponsibility. I strongly support the committee's action in restoring funds for this program.

I also strongly support restoration by the committee of funds for the Center for Building Technology. This program has also been proposed for elimination for the third consecutive year by the administration. Research conducted at the Center provides the technical basis for voluntary standards, building codes, and specifications through development of improved measurement techniques, test methods, and technicals data not available from other sources. The Bureau is in a unique position to provide unbiased and pertinent information in this field. The private sector and State and local governments cannot or will not carry out nonproprietary technical research needed in this area. The Bureau also has a key role to play in the National Earthquakes Hazards Reduction Program. It provides reseach and technical support for the development of seismic design and construction provisions.

Mr. Speaker, I support the restoration of funds by the Committee for the Institute for Computer Science and Technology which the administration again tried to cut in half. The mission of ICST is essential to the development and implementation of a coherent national information policy and to the management of Federal information resources. ICST also plays an important role in increasing the competitiveness of U.S. telecommunications, computer and information products and services; in increasing the acceptance of international technical standards based on U.S. technology; and in improving the Federal Governments use of computer and telecommunication technology.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. WALGREN] has expired.

The gentleman from New York [Mr. BOEHLERT] has 23 minutes remaining.

Mr. BOEHLERT. Mr. Chairman, I yield such time as he may consume to our distinguished ranking member, the gentleman from New Mexico [Mr. LUJAN].

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, this bill authorized $140 million for the National Bureau of Standards, $2.8 million for the Office of Productivity Technology and Innovation and $537,000 for the National Information Center. This totals $143.3 million which is $20 million above the President's request and $16 million above the 1985 level.

The bill prompted considerable debate in committee and was passed by a vote of 30 to 7. Those of us who opposed the bill felt an increase of more than 40 percent was excessive in a year of budget constraints.

While I share those reservations, Mr. Chairman, I feel that we should make it clear that these reservations do not reflect opposition to the basic goals of the National Bureau of Standards. NBS's role is well documented not only in the scientific community but in everyday life.

The differences instead reflect a question over the depth of involvement in certain fields. We know there will be an amendment to freeze funding at the 1985 level which would result in a reduction of $16 million. It should be noted, however, that freezing the funding at the 1985 level would still be $4.7 million over the President's request.

The administration has requested $8 million to begin construction on a cold neutron source. There is a need to get started on this facility and I certainly support this position. But we must face the reality of a deficit and a need to keep spending under control and we certainly stand ready to abide by the will of this body and I would hope that any budget reduction would not indicate a lack of support for this program.

Therefore, Mr. Chairman, I feel free in saying that we on this side of the aisle expect a lively debate on this authorization.

Mr. Chairman, I will make one other point and that is about some of the programs that the administration, and I assume when we say the administration, the National Bureau of Standards is part of the executive branch of this body, that not only because certain research programs have been going on but that they would have to be continued ad infinitum.

The time comes when you must choose between programs because of budget constraints, and the National Bureau of Standards has told us in their request that they have made those choices and that some programs need to go because some are more worthy than others.

I am not saying that the type of research that has been going on there

and which is now slated for cutting out are not worthy programs; they certainly are. But, you know, among worthy programs, there are worthier programs.

But we have to take a strong look and be realistic about the types of programs that we can afford.

I thank the Chairman.

The CHAIRMAN pro tempore [Mr. PEASE]. The gentleman has consumed 3 minutes.

Mr. BOEHLERT. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. Pursuant to the rule the committee amendment in the nature of a substitute now printed in the reported bill shall be considered as an original bill for the purpose of amendment, and each section shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Bureau of Standards Authorization Act for Fiscal year 1986".

The CHAIRMAN pro tempore. Are there any amendments to section 1?

If not, the Clerk will designate section 2.

Mr. WALGREN. Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The text of the committee amendment in the nature of a substitute, following section 1, is as follows:

AUTHORIZATIONS FOR PROGRAM ACTIVITIES

SEC. 2. (a) There are authorized to be appropriated to the Secretary of Commerce (hereinafter referred to as the "Secretary") for fiscal year 1986, to carry out activities performed by the National Bureau of Standards, the sums set forth in the following line items:

(1) Measurement Research and Standards, $39,985,000.

(2) Materials Science and Engineering, $23,184,000.

(3) Engineering Measurements and Standards, $34,846,000.

(4) Computer Science and Technology, $10,000,000.

(5) Center for Fire Research, $5,827,000.

(6) Technical Competence Fund, $8,745,000.

(7) Central Technical Support, $9,368,000.

(8) Cold Neutron Source Facility, $8,000,000.

(b) Notwithstanding any other provision of this or any other Act for fiscal year 1986—

(1) of the total amount authorized under paragraph (2) of subsection (a), not less than $2,500,000 shall be available for steel technology;

(2) of the total amount authorized under paragraph (3) of subsection (a), not less than $3,895,000 shall be available for the Center for Building Technology, and not less than $3,000,000 shall be available for Robotics;

(3) of the total of the amounts authorized under paragraphs (1), (2), (7), and (8) of subsection (a), not less than $5,608,000 shall be available for transfer to the Working Capital Fund; and

(4) of the total of the amounts authorized under paragraphs (1), (2), and (3) of subsection (a), not less than $3,000,000 shall be available for an Evaluated Engineering Data Base.

(c)(1) Funds may be transferred among the line items listed in subsection (a) so long as the net funds transferred to or from any line item do not exceed 10 percent of the amount authorized for that line item in such subsection.

(2) In addition, the Secretary may propose transfers to or from any line item exceeding 10 percent of the amount authorized for that line item in subsection (a); but a full and complete explanation of any such proposed transfer and the reason therefor must be transmitted in writing to the Speaker of the House of Representatives, the President of the Senate, and the appropriate authorizing committees of the House of Representatives and the Senate, and the proposed transfer may be made only when 30 calendar days have passed after the transmission of such written explanation.

(3) No transfer described in paragraph (1) or (2) may have the effect of reducing the amount available for any of the particular purposes set forth in subsection (b) below the applicable dollar amount specified in that subsection.

(d) The National Bureau of Standards shall seek reimbursements of not less than $500,000 from other Federal agencies to expand its efforts in support of basic scientific research on the atmospheric, climatic, and environmental consequences of nuclear explosions and nuclear exchanges.

AUTHORIZATION FOR EXPENSES OUTSIDE THE UNITED STATES

SEC. 3. In addition to the sums authorized in section 2, there is authorized to be appropriated to the Secretary for fiscal year 1986 the sum of $600,000 for expenses of the National Bureau of Standards incurred outside the United States, to be paid for in foreign currencies that the Secretary of the Treasury determines to be excess to the normal requirements of the United States.

AUTHORIZATION FOR SALARY ADJUSTMENTS

SEC. 4. In addition to the sums authorized in the preceding provisions of this Act, there are authorized to be appropriated to the Secretary for fiscal year 1986 such additional sums as may be necessary to restore the salary, pay, retirement, and other employee benefits of the National Bureau of Standards to the levels in effect at the end of fiscal year 1985 and to make any adjustments in the Bureau's salary, pay, retirement, and other employee benefits which may be provided for by law.

COST RECOVERY AUTHORITY

SEC. 5. (a) Section 12(f) of the Act of March 3, 1901 (15 U.S.C. 278b(f)), is amended by inserting immediately before the period at the end thereof the following: "; and second to ensure the availability of working capital necessary to replace equipment and inventories to the extent provided in advance in appropriation Acts".

(b) Fees for calibration services, standard reference materials, and other comparable services provided by the National Bureau of Standards shall be at least sufficient to meet the requirements set forth in the amendment made by subsection (a), and any funds recovered in excess of such requirements shall be returned to the Treasury of the United States.

(c) The amendment made by subsection (a) (and the provisions of subsection (b)) shall be effective October 1, 1985.

COMPENSATION OF DIRECTOR

SEC. 6. (a) Section 5 of the Act of March 3, 1901 (15 U.S.C. 274), is amended—

(1) by striking out "He" at the beginning of the second, third, and fourth sentences and inserting in lieu thereof "The Director"; and

(2) by adding at the end thereof the following new sentence: "The Director shall be compensated at the rate now or hereafter in effect for Level IV of the Executive Schedule under section 5315 of title 5, United States Code.".

(b)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Director, National Bureau of Standards, Department of Commerce.".

(2) Section 5316 of title 5, United States Code, is amended by striking out "Director, National Bureau of Standards, Department of Commerce.".

(c) The amendments made by this section shall be effective October 1, 1985.

FINANCIAL ASSISTANCE TO INSTITUTIONS OF HIGHER LEARNING

SEC. 7. (a) In order to secure the services of the broadest possible range of talent in carrying out the programs of the National Bureau of Standards, the Act of March 3, 1901 (15 U.S.C. 271-278h), is further amended by redesignating section 18 as section 19, and by inserting immediately after section 17 the following new section:

"SEC. 18. The Director is authorized to expend such sums, within the limits of 10 percent of appropriated funds, as the Director may deem desirable for awarding research contracts, grants, research fellowships, and enter into other forms of financial relationships with institutions of higher learning within the United States and their faculties and students. The selection of persons to receive such contracts, grants, fellowships, and assistance shall be made on the basis of ability and of the relevance of the proposed work to the mission and programs of the National Bureau of Standards.".

(b) The amendments made by subsection (a) shall be effective October 1, 1985.

SCIENTIFIC POSITIONS

SEC. 8. In order to maintain a highly qualified scientific staff at the National Bureau of Standards, a goal of 20 positions is established for the Senior Scientists Program at the National Bureau of Standards.

OFFICE OF PRODUCTIVITY, TECHNOLOGY, AND INNOVATION

SEC. 9. In addition to the sums authorized in the preceding provisions of this Act, there is authorized to be appropriated to the Secretary for fiscal year 1986 the sum of $2,777,000 for the activities of the Office of Productivity, Technology, and Innovation.

NATIONAL TECHNICAL INFORMATION SERVICE

SEC. 10. (a) Section 2 of the Act of September 9, 1950 (64 Stat. 823; 15 U.S.C. 1152), is amended by adding at the end thereof the following new subsection:

"(d) To acquire capital equipment and inventories from receipts for work or services

performed or to be performed under this section.".

(b) In addition to the sums authorized in the preceding provisions of this Act, there is authorized to be appropriated to the Secretary for fiscal year 1986 the sum of $537,000 for the patent licensing activities of the National Technical Information Service.

AVAILABILITY OF APPROPRIATIONS

SEC. 11. Appropriations made under the authority provided in this Act shall remain available for obligation, for expenditure, or for obligation and expenditure for such periods as may be specified in the Acts making such appropriations.

COST REDUCTION REPORT

SEC. 12. Within 90 days of the enactment of this Act, the Director of the National Bureau of Standards shall review those recommendations of the President's Private Sector Survey on Cost Control and such other recommendations as may be included in the Office of Management and Budget report entitled "Management of the United States Government—1986", and shall submit a report to the Speaker of the House of Representatives and the appropriate committees of the House and Senate on the implementation status of each such recommendation which affects the National Bureau of Standards and which is within the authority and control of the Director.

AMENDMENT OFFERED BY MR. WALGREN

Mr. WALGREN. Mr. Chairman, I offer an amendment to section 6.

The Clerk read as follows:

Amendment offered by Mr. WALGREN: At the end of section 6, insert the following new subsection:

"(d) The amendment made by subsection (a) shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts."

Mr. WALGREN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALGREN. Mr. Chairman, this amendment corrects an error in the bill brought to our attention by the Committee on the Budget of the House and does not affect, as I understand it, the outlays under the bill. The amendment is technical in that sense.

Mr. BOEHLERT. Mr. Chairman, we have the same understanding. We have no quarrel with that amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALGREN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALGREN

Mr. WALGREN. Mr. Chairman, I offer an amendment to section 10, and I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. WALGREN: in section 10, strike "(a)" and all that follows through "(b)".

Mr. WALGREN. Mr. Chairman, this subsection was requested by the administration to clarify the authority of the National Technical Information Service to purchase equipment and inventories from receipts for work performed or services performed by the NTIS. Pursuant to our committee's agreement with Mr. DINGELL, the chairman of the Committee on Energy and Commerce, who expressed reservations about this section, we are offering an amendment for its deletion.

Mr. BOEHLERT. Mr. Chairman, we have had occasion to examine the amendment.

Mr. Chairman, we accept the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALGREN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALGREN

Mr. WALGREN. Mr. Chairman, I offer a substantive amendment to section 2.

The Clerk read as follows:

Amendment offered by Mr. WALGREN: In section 2(a)(1) strike "39,985,000" and insert "$36,607,000",

In section 2(a)(2) strike "$23,184,000" and insert in lieu thereof "$21,943,000",

In section 2(a)(3) strike "$34,846,000" and insert in lieu thereof "$33,555,000",

In section 2(a)(4) strike "$10,000,000" and insert in lieu thereof "$9,393,000",

In section 2(a)(6) strike "$8,745,000" and insert in lieu thereof "$8,481,000",

In section 2(a)(7) strike "$9,368,000" and insert in lieu thereof "$8,179,000",

Strike section 2(a)(8),

In section 2(b)(3) strike "$5,608,000" and insert in lieu thereof "$2,405,000", and

Strike section 2(b)(4).

In section 3 strike "$600,000" and insert in lieu thereof "$508,000".

Mr. WALGREN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALGREN. I thank the chairman.

Mr. Chairman, this is the freeze amendment. This amendment would reduce the totals throughout the bill in various line items so that the bottom line matches the appropriations for the National Bureau of Standards for fiscal year 1985.

□ 1310

It brings the bottom line to $127.8 billion. It represents a total reduction in various functions throughout the amendment of a total of $15,970,000.

I have to say that, from my point of view, I view these efforts we make through the National Bureau of Standards as an investment; I think that they should be considered in that light rather than pure expense, as such, but I do recognize that we are all reaching for some kind of principle that we can get broad enough support on the floor of the House of Representatives so that we can bring real restraint to Government budgets in this year.

I think it is fair to say that the freeze amendment, as developed by both Mr. MORRISON and Mr. PURSELL, and others who have worked in that area, does represent that kind of broad consensus that can get the necessary political support.

In that sense, it can be recommended. It is not without loss that we make these reductions. We would be eliminating all inflationary adjustments in the NBS; a pattern that we should remember has been largely true over the last decade or so that has resulted in essentially flat budgets for this Agency on an effective purchasing power level over these 10 years.

We would be reducing the initiatives that the President called for. We would be delaying at least, and certainly not now providing for the construction of the cold neutron source facility.

There is a certain sense that this cut could be made because the building has not yet started construction. But at the same time we all ought to realize that any delay in bringing this facility to reality is something that will prevent us from making future progress in materials at least as fast as we could make them, and perhaps as our economy would need them.

Mr. MORRISON of Connecticut. Would the gentleman yield?

Mr. WALGREN. I would be happy to yield to the gentleman.

Mr. MORRISON of Connecticut. I thank the gentleman for yielding to me.

Mr. Chairman, I want to first state my support and appreciation for the committee coming forward with this freeze amendment.

In doing so, it vindicates two points; both of which are equally important. It first recognizes the movement forward that we have made over the last few weeks in the House to restrain Federal spending, to say that a very wise place to start in the process of dealing with the budget deficit is to say that at last year's spending level, or the 1985 spending level, the level that we are at now, is one that we have reached an agreement on and that we can use as a consensus.

Beyond that, by the committee offering this amendment, it is setting the priorities, the choices. That is not something that should be done on the

floor of the House for a random reason or which should be left solely to the agency. The correct balance between congressional oversight and the priorities of the agencies is established when the authorizing committee comes in and makes the choices about where we should be concentrating our resources.

So in that sense this amendment does exactly what needs to be done. The gentleman from Pennsylvania is absolutely correct when he says there is going to be some loss involved in this. There is going to be some loss in dealing with the Federal budget deficit.

It is wrong to suggest, as some would from time to time, that we can deal with this budget deficit crisis with all fat and no meat, without hardship to anyone. The fact is that there is going to be hardship; we have allowed ourselves to get into a very dangerous situation overall, and we are going to have to make tough choices to reclaim a reasonable Federal budget.

It is unfortunate that sharing in this must be those agencies which are focused on the future. But the future as a whole will be denied if we do not deal with the Federal budget deficit, and that has to be a priority.

But let me also say that we should not go to excess. There may be an amendment to reduce the authorization levels in the bill below the freeze level, below a level that we agreed last year was needed for this Agency.

(On request of Mr. MORRISON of Connecticut and by unanimous consent, Mr. WALGREN was allowed to proceed for 5 additional minutes.)

Mr. WALGREN. I continue to yield to the gentleman from Connecticut, and then would be happy to yield to the gentleman from New Mexico.

Mr. MORRISON of Connecticut. I would oppose such an amendment. It would be a mistake to decide to move in the direction of the President's budget, which proposes a lower level of funding for NBS, rather than the consensus level which is a result of the House and the Senate and the President's agreement last year. That is the position that ought to prevail, and I am pleased that that is the position the committee has come to, not because it prefers it, but because it realizes the balance that must be struck.

Mr. WALGREN. I thank the gentleman for those thoughts.

I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding to me, and I ask for this time to ask a question of the gentleman from Connecticut.

Yesterday we had the discussion about what we ought to do, whether to freeze everything at the 1985 level or the request level. Is the gentleman telling me now that he is prepared to vote for an increase of $4 million over what the Agency requested? Was that what I gathered from your remarks?

Mr. MORRISON of Connecticut. If the gentleman from Pennsylvania would yield.

Mr. WALGREN. I continue to yield to the gentleman.

Mr. MORRISON of Connecticut. I am prepared to vote for the 1985 appropriation level. The level that the House and the Senate and the President agreed upon last year for the current year of operations. That is a consensus position; it is not the House position, it is not the Senate position; it is not the President's position. It is the product of debate and compromise and consideration.

I think that level is preferable to the level recommended by the President and even more preferable than the level which I understand may be offered as an amendment later today and which would cut the authorization below the level recommended by the administration.

I oppose that. It is not the right direction for us to take. If our committee had come to us saying that they agreed that this amount could be saved, if that was their recommendation, I would be happy to support it.

But our committee has said not only that the freeze level is appropriate, but that we should be spending significantly more. That is their initial position.

So it is up to the committees to come forward to us with their views on what the Agency itself says is an appropriate level for 1986.

Mr. LUJAN. If the gentleman will continue to yield, I might tell the gentleman that that is not a unanimous position of the entire committee, that we funded at $127 million. There are some of us that believe that there are some items in there that could very well stand scrutiny, and that we could very well go to save an additional $4 million for the purpose of balancing the budget.

So that during the debate you will notice that there are a number of us who have some specific reasons in addition to balancing the budget, for wanting to reduce it to the request level of the Agency.

Mr. MORRISON of Connecticut. If the gentleman would yield for one moment more, I think that there is always room for debate about particular line items, but I think if what the gentleman is advocating is further specific savings based on the merits of that particular proposal, then we ought to adopt the freeze amendment, and you ought to make your arguments specifically on the merits and not confuse the issue as to whether we are pursuing here a strategy toward dealing with the deficit which cuts across many authorizations, or a specific debate about a particular priority the committee has chosen.

Mr. WALGREN. I yield initially to the gentleman from Michigan, who has been on his feet.

Mr. PURSELL. I would like to address the House for 5 minutes in support of the amendment.

Mr. WALGREN. Then I would yield to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. Mr. Chairman, I rise in support of the amendment offered by the chairman of the committee, but I do so reluctantly.

The gentleman offers a very thoughtful proposal for freezing the NBS at the 1985 appropriated level. He does so, it seems, in the least painful manner by preserving the current programs at the bureau including the center for fire research, center for building technology and the vast majority.

He seeks to maintain the in-house capabilities of the bureau which we have stated previously is, in itself, a national laboratory for standardization of weights and measurements. This amendment would allow the biotechnology, ceramics, and process and quality control new initiatives to go forward at somewhat reduced schedules, however, it would not authorize new construction of the cold neutron facility. The cold neutron program proposed by the administration is $8 million. The committee is very supportive of this initiative.

As a matter of fact, the President's Science Adviser tells me that it is the only major scientific construction initiative in this budget.

Certainly, this is reflected in the committee report, it concerns me that in this "freeze" mode, exciting initiatives such as this are pushed to the side.

I would urge the committee and the full House to look favorably on possible alternative means of providing for this construction project.

I urge my colleagues to support this amendment offered. In a freeze mode, this amendment, is by far, the more sound with respect to scientific and technological mandated programs at NBS.

□ 1320

Mr. PURSELL. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in favor of the amendment.

First of all, I want to salute and congratulate the bipartisan effort on behalf of the Republican and Democratic leadership of the committee. We have turned the corner, I think, after the historic early vote on NASA in which we had a significant, overwhelming majority vote in favor of reducing the authorization of expenditures for 1986 back to the 1985 level. That was 2 weeks ago. Yesterday we had another significant, overwhelming

majority vote in favor of accomplishing that same goal, achieving a freeze on fiscal year 1986 authorization at the fiscal year 1985 appropriated levels for the National Science Foundation. That was yesterday. Today we are looking at the third bill. So on behalf of many in the House, we feel very confident that this amendment, introduced by the committee following my and the gentleman from Connecticut's [Mr. MORRISON] declaration of intent to introduce a similar amendment, will achieve the third step in that movement toward addressing the fiscal deficit of this Nation—now well over $200 billion.

This amendment will bring down 1986 authorizations for NBS to the 1985 current budget levels. So I believe, with both Republicans and Democrats trying to reach a balanced budget as soon as possible, that this is probably the best compromise that the gentleman from Connecticut [Mr. MORRISON] and myself, and others, now with the committee support on both sides can accept. As I understand it, the majority of the committee members on both sides—I cannot speak for all of them—really feel confident that we are achieving a major, significant breakthrough in the fight for a balanced budget.

Now it has been true during the years that I have been here, now over 8 years, and during my years as a member of the Appropriations Committee, now over 6 years, that we have developed battles between the Democrats and Republicans on national priorities. We will continually have that, as it should be. But I think this is significant, historically, that we are changing with the mood of the public and the American taxpayers to balance the budget. It is quite clear to me that it is time we move above partisan politics and develop good public policy in trying to achieve some compromise to reach that lower level, namely, a balanced budget ultimately and I hope, as soon as possible.

This is round three. We won round one. Round two has been completed and won. This is round three.

I think the administration would like fewer dollars for the National Bureau of Standards. I think the difference in the administration's figure and the fiscal year 1985 appropriated level is only about $4 million. So I understand there is a difference in principle. We may fight that out subsequently this afternoon on another amendment. And that is the way it should be. But, frankly, I am very supportive of the committee amendment. It is a step in the right direction. The trend in Congress is changing and, quite frankly, I think the administration would accept this freeze amendment and sign this bill. I cannot speak for the administration, I do not have anything in writing, I am not sure anybody else does. But as a member of the Committee on Appropriations, I am sure in achieving that trend in turning the country around toward a balanced budget goal ultimately, and in bringing down the interest rates and improving our economy, I really, frankly, believe that the administration would sign this bill if it were at the freeze level.

We will discuss it and debate it and probably have two votes here this afternoon—one on the freeze, and one on dropping below the freeze to the President's request. I would recommend very strongly that the House on both sides of the aisle adopt the committee amendment, the freeze, which I fully support and have participated in developing along with the gentleman from Connecticut.

Mr. MORRISON of Connecticut. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Connecticut.

Mr. MORRISON of Connecticut. I want to commend the gentleman from Michigan. I have been very pleased in the way our cooperation together has been reflected by a bipartisan coalition throughout the House. The gentleman from Michigan was prepared to offer this freeze amendment but because of procedural reasons it is being offered by the committee, and in many ways that it is even superior because it shows an acknowledgement by the committee of trying to meet the standard that the House has begun to set on these matters in terms of overall spending levels.

I want to commend the gentleman on this leadership and I hope that we will continue to move on beyond round three, to later rounds, to deal with the Federal deficit in a realistic way.

Mr. PURSELL. I think, in my closing remarks here, that it is important to emphasize that the personalities and who gets credit for what amendment is irrelevant. This issue is so deep and so difficult and so dramatic and traumatic in respect to what we are doing with the deficit. However, you have not seen anything yet if you compare what we are doing in compared to the out years of 1987 and 1988. My God, a freeze will do nothing to any extent to really get to that balanced budget. Some day we are going to have to look at a serious reduction across the board.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. PURSELL] has expired.

(On request of Mr. WALGREN and by unanimous consent, Mr. PURSELL was allowed to proceed for 2 additional minutes.)

Mr. WALGREN. Mr Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Pennsylvania.

Mr. WALGREN. I just wanted to say, on behalf of many members of the committee, that we certainly appreciate the spirit in which the gentleman from Michigan [Mr. PURSELL] and the gentleman from Connecticut [Mr. MORRISON] have joined in this effort, and particularly that the gentleman from Michigan has supported the distribution of the cuts which we can fashion from our committee's perspective. I would like to recommend the distribution of those cuts to the rest of the body as being very responsible. We cut a total of $15 million, $5 million from current programs and $10 million from new initiatives. It is balanced through there quite delicately with the hope of preserving as much value as we possibly can.

We do not take the position that you cannot cut this bill further. The gentleman from New Mexico said, clearly, you could cut some budgets almost anywhere. And that is true. But we do feel there is a place for rescissions in our process, that these are the responsible levels to give to the programmatic areas, then there is another chance for the administration to come back to us requesting rescissions if there are some particular items, as the gentleman from New Mexico suggested, that could be taken down further. This is not the end of the process but this is the responsible place for the House.

Mr. PURSELL. I concur with the chairman. I did not, in initially offering the amendment, want to preempt the priorities of the jurisdiction of the committee; namely, Science and Technology. I served on this great committee at one time. I have a great respect for the leadership, the members and the staff of the committee. They are appropriately set to develop public policy by reprogramming within the freeze levels, and I congratulate the committee for taking that leadership here today, and I again hope that we adopt the amendment as offered.

AMENDMENT OFFERED BY MR. WALKER TO THE AMENDMENT OFFERED BY MR. WALGREN

Mr. WALKER. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER to the amendment offered by Mr. WALGREN: Strike the amount "$36,607,000," and everything that follows, and insert in lieu thereof "$38,607,000";

In section 2(a)(2) strike "$23,184,000" and insert in lieu thereof "$22,443,000";

In section 2(a)(3) strike "$34,846,000" and insert in lieu thereof "$33,555,000";

In section 2(a)(4) strike "$10,000,000" and insert in lieu thereof "$9,393,000";

In section 2(a)(6) strike "$8,745,000" and insert in lieu thereof "$8,481,000";

In section 2(a)(7) strike "$9,368,000" and insert in lieu thereof "$1,697,000";

Strike section 2(a)(8);

In section 2(b)(3) strike "$5,608,000" and insert in lieu thereof "$1,405,000"; and

Strike section 2(b)(4).

Strike section 3 and renumber accordingly.

In section 9 (page 10, line 13) strike "$2,777,000" and insert in lieu thereof "$1,991,000".

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, I think with certainty that there is a tide running through the Congress, which I applaud, and I certainly want to applaud the chairman of the subcommittee, the gentleman from Pennsylvania [Mr. WALGREN], the gentleman from Connecticut [Mr. MORRISON], the gentleman from Michigan [Mr. PURSELL], and others, who have spoken out on the freeze amendment here, because I think we are finally on the verge of actually putting the reins on some of the runaway spending and taking control of some of our deficit problems with some of the things we have done on the floor in the last couple of weeks.

In recent days we have shown a willingness to cut the budget requests back to the fiscal year 1985 freeze level for both the NASA authorization and the National Science Foundation. While both of these programs are extremely important to our Nation, I am glad that the membership of this House was willing to make the tough policy decisions to start to address overall our budget problems.

Today we ought to make some similar decisions concerning the National Bureau of Standards. The President submitted a budget this year for the Bureau which calls for a reduction from last year of less than $4 million from a total budget of $123.9 million. Also included in this bill are the activities of the Office of Productivity, Technology, and Innovation and the National Technical Information Service of the Department of Commerce. That adds a little bit more money in this overall picture. However, the administration, it should be realized, has come forward with a budget request that indicates that they can carry out all of the activities for $5.278 million less than last year. Remember what we are talking about here. We are talking about the people who have the responsibility for running these programs. They say that they can run all of these programs for a figure of $5.278 million less than they spent last year.

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Pennsylvania.

□ 1330

Mr. WALGREN. I thank the gentleman for yielding.

Unless I misunderstand, I thought the administration was saying we could run it for $5.27 million less if you eliminated the Center for Fire Research, and if you eliminated the Building Technology Center.

Mr. WALKER. If the gentleman will allow me to go on with my remarks, the gentleman will find out that in my amendment I have preserved those options, so that, in fact, I come down to the committee's priorities. What I am saying is that the administration says that they can run this agency for this amount of money. I do not necessarily buy their priorities, and if the gentleman will allow me here, I will point out that in the amendment that we are offering, we preserve those priorities of the committee, but come in at a spending level which is at the administration's request level.

As I said just a minute ago, I agree that some of the proposals made by the administration did not conform to the priorities of the Committee on Science and Technology. There are several programs which we on the committee felt strongly should be continued. One excellent example of that is the Center the Fire Research, which the administration has totally zeroed out and which the committee restored. In this amendment, that particular commitment on the part of the committee remains; the Center for Fire Research remains in the Walker amendment.

My amendment would hold the bill to the administration request, but not the specific administration numbers. If there ever was a case of having the opportunity to give the people who actually run executive bureaus the opportunity to show us that they can run their program effectively with the amount of money that they have requested, here is the perfect opportunity.

The Director of the National Bureau of Standards came before the committee and testified that he fully supported that figure in the President's budget request. I think that we should, and in fact, we must, give him and them the opportunity to show us that they can live within that budget.

Both Chairman WALGREN and I would change the numbers on various line items, and in general, our numbers are closely in agreement. However, I would hold their feet to the fire just a bit more closely and require them to accomplish their missions at the budget level.

There has been a lot of talk on the floor of the House about a freeze at the 1985 level. In some programs, that may make sense, because what we are doing is reducing, in order to do something about the deficit, we are reducing from proposals that the administration has put forward that would increase spending in 1986.

In others, however, such as programs contained in this bill, it makes no sense that we should be bound today by the funding priorities of yesterday, because in this case what the freeze does is say that the administration's attempt to lower our spending should not be complied with; that we ought to indeed raise spending to the freeze level.

Well, I do not think we ought to be raising spending to the freeze level; I think what we ought to be doing is lowering spending to the requested level. That is what my amendment would do.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, on the flip side of that coin the administration is asking for increases in foreign aid. Are you supporting increases over 1985, above the freeze, for additional money for foreign aid, because the administration is making that request?

Mr. WALKER. I would say to the gentleman that that is the issue that we had here on the floor.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 5 additional minutes.)

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. PURSELL. I would say to the gentleman would he support the freeze level on foreign aid?

Mr. WALKER. Yes; I certainly would. As a matter of fact, I would support cutting foreign aid.

Mr. PURSELL. So then, in effect, you are not in favor of the administration's additional increase in foreign aid?

Mr. WALKER. That is the point. Let me say to the gentleman that that is the question I thought we settled out here in the past week, where the administration has come in with requests above the 1985 levels, as they did with NASA, as they did with NSF, we made a determination on this floor that we would cut back to the 1985 level. I would say that we ought to at least do that much with foreign aid.

However, this is a little question that we have got before us. In this case, in order to get a freeze level, you have to raise the spending above the administration's request. The administration here is lower than what the 1985 spending level was. What I am suggesting is if we really want to do something about the deficit, what we

ought to be doing is taking the lower of the two figures. Either the freeze level, when that is lower, or the administration's level, when that is lower. That will really begin to get us a handle on deficits, because at that point then you begin to cut back from the 1985 deficit level.

You know, the 1985 deficits were not exactly a bed of roses. I mean, we had plenty of deficits in this fiscal year. We are talking about hundreds of millions of dollars worth of deficits right now. So it seems to me that maybe what we ought to do is be doing a freeze plus. As a matter of fact, I heard the gentleman from Connecticut say here a few minutes ago that the freeze was a good place to start, and I agree with him. It is a place to start. But ought we not be doing more? We ought not just start there, we ought to move beyond that. Good heavens, if you cannot cut $5 million out of the National Bureau of Standards to get down to below the freeze, where can you cut? Is there any place we can cut below the freeze level if we cannot do it in the National Bureau of Standards? I cannot imagine that there is very much that we can do if we cannot go below this by $5 million.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. PURSELL. I thank the gentleman.

Many of us have worked to try to establish a bipartisan support to achieve a $50 billion-plus. A freeze will only get us about $38 billion.

Mr. WALKER. I agree.

Mr. PURSELL. I think everyone in the House is looking for $12 to $15 billion more in the 1986 budget, so I do not think the gentleman suggests that the Members here are just looking purely at a simple freeze.

We are not, and I have not heard of any Member, including Chairman BILL GRAY, who said last night, he is looking for additional money to achieve a $50 to a $53 billion figure. So I am suggesting that we ought to be very careful and try to establish a principle here that historically could be successful in a bipartisan effort, rather than trying to play, and I am not going to accuse the gentleman from Pennsylvania of playing games, because it is what the administration wants. The fact is that we are writing a new budget. The Reagan budget is dead on arrival; it was dead 2 months. The Senate is writing a new budget. Over in the Senate.

Now, you have not referred to what the Senate is doing.

Mr. WALKER. I would say to the gentleman that it is against the rules of the House to refer to what the Senate is doing.

Mr. PURSELL. We may not agree with the Senate budget, so we, in preserving the integrity of the House, are asking for a compromise here to write a House budget for the American people. That will achieve a $50 billion-plus goal for 1986, which is exactly what the President is asking Congress to do. It is not a question of the goal, it is a question of how do we accomplish that. The principle here of the budget freeze will establish that plus additional costs.

I think the gentleman and I are in agreement on the additional cuts; the question is where and how, and this is not the time to do that.

Mr. WALKER. That is the point that I am making with the gentleman; that here we have a chance to get $5 million of that additional $12 billion you say we need. We are going to get a measly $5 million of the $12 billion that you have just said that we need.

Now, if we cannot take $5 million out of the National Bureau of Standards, where in the world are we going to be able to cut? What programs are we going to cut it out of if we cannot get it here? We are talking about only $5 million, and we are talking about $5 million which the people who run these programs say that they can get along without. Now, if we cannot do that, I would suggest that it is not really in the best spirit of a debate to suggest that we are going to do more at some point in the future. That is the problem; where are we going to do more?

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. BOEHLERT. I thank the gentleman for yielding.

I would point out to the gentleman that we have achieved something unique here this week, in this body, with bipartisan cooperation to get at what we all want to get at, and the gentleman in the well has been a leader in it, and that is the deficit facing the American people.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania [Mr. WALKER] has again expired.

(By unanimous consent, Mr. WALKER was allowed to proceed for 4 additional minutes.)

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I continue to yield to the gentleman.

Mr. BOEHLERT. But when you point out, and you are very eloquent and you do so very well in the well of the House, but let me point out we are only talking about $5 million. Let us look at some of these figures. The Bureau of Standards asked for $226 million. Then the Department of Commerce asked for $146 million. The committee came, well, 40 percent below the Bureau's request. We came below the Department's request, and now we are lopping off an additional $12 billion.

When you give blood a pint here a pint there is OK, but you cannot give 15 quarts.

Mr. WALKER. I thank the gentleman and, of course, every bureaucracy comes in with all kinds of big requests. You know, the bureaucrats have all kinds of things they can spend money on. Our point here is to set priorities. The only point that I am making is that here we come to that key decision; a precedent-setting decision as to whether or not we are simply going to have the freeze, which gets us $38 billion, as the gentleman from Michigan has told us, or whether or not we are going to get more than the freeze.

If you are going to get more, I would suggest that here is the place you are going to have to start. This is the first time you have had a chance to focus on whether or not you are going to increase spending as a result of freezing. You see, it is easy for some of our folks here to say that we are going to decrease the administration's request by freezing because they do not agree with the administration's priorities. I wonder now what is going to happen when they start increasing spending by freezing. Because the effect of what they will do unless they support my amendment is the fact that they will spend, they will bust the President's budget by $5 million by freezing.

□ 1340

I am suggesting we ought not to be busting the President's budget on the National Bureau of Standards; that we ought to try to do what we can to bring the level down to the President's budget and make certain that we accept the lower of the two figures if we are really going to fight deficits.

I thought that was what this freeze movement was all about, really fighting deficits.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. BROWN of California. I thank the gentleman for yielding.

Mr. Chairman, I have come to have a great deal of respect for the gentleman's eloquence and consistency, and I think there would be considerable merit in the position that he takes, particularly from the standpoint of his own philosophy, but look at the position that it puts me in.

In effect, the gentleman is saying that I have to take either this year's President's priorities or last year's President's priorities, and I do not agree with either one of them. So I am in the position of having to reject that course, although I, too, am seeking the same goal of deficit reduction. I would like to get that $50 billion-plus reduc-

tion, but I have to be consistent with my own priorities for what is good for the country, rather than to allow a President with whom I vigorously disagree set those priorities for me.

Mr. WALKER. I agree with the gentleman, but I would say to him that then he probably has problems with the whole freeze idea, too, because what we are doing there is locking in priorities at a 1985 level kind of regardless of whether or not those were the right priorities.

I understand where the gentleman comes from on that issue and that he must have problems under the freeze. All I am saying in this instance is if we are focusing on deficit numbers that it makes some sense to take the lower figure, whichever that lower figure is, whether it be the President's figures or whether it be the freeze figure, and we have decided to take the lower figure, on the freeze when it was lower than the President's request. Now we have a chance to take the President's figure when that is the lower figure.

That is the opportunity I am offering to the House. We do so by maintaining the committee's set priorities, and I would hope the House would decide not to bust the President's budget but, rather, save us money and help in real deficit reduction.

Mr. FUQUA. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Pennsylvania and in support of the amendment offered by the committee.

It appears that my friend from Pennsylvania is trying to have his cake and eat it, too, and at the same time he has a little arsenic in the dessert.

As I understand the amendment, and the gentleman can correct me if I am in error, in the area of a biotechnology initiative, the committee reduced by $2 million, and the gentleman is restoring that $2 million back into that area.

Mr. WALKER. The gentleman from Florida is correct.

Mr. FUQUA. That is my understanding. What we have here is a new program, new initiatives, which will require in 1987 and 1988 and 1989 moneys to support those programs at this level.

What does concern me is down in the area of central technical support where the administration requested $9,368,000, the committee has reduced that about $1.2 million to $8,179,000, and as I understand the gentleman's amendment, he reduces that by $6,482,000, leaving there $1,697,000 in the budget. That is still $7,671,000 below the administration's request.

Mr. WALKER. If the gentleman will yield; yes, the gentleman is correct, and the reason why that was done was because in discussions this morning with the Under Secretary of Commerce, a former member of this body, I was assured that what we have is a $12 million carryover in that area and that, in fact, they can maintain their programs at the levels that I am seeking in this particular portion of my amendment by utilizing that carryover.

I thank the gentleman and he is correct in the point that he makes.

Mr. FUQUA. I appreciate the gentleman's comments.

I am informed that the $12 million does not exist and I would be glad to yield to the gentleman from Pennsylvania (Mr. WALGREN), the chairman of the subcommittee.

Mr. WALGREN. Things are happening relatively quickly here on the floor, and as the gentleman from Pennsylvania says, he was informed just this morning, and we did not have this amendment until about 10 minutes ago. It strikes me as not the best way to structure the budget of the Bureau of Standards.

We talked to the Bureau yesterday with respect to the working capital fund and it is our information that every dime of the working capital fund that the gentleman says is there to be carried over to be used for some of these essential functions is committed to a purchase of equipment or a commitment this year. So there is not one penny there that can be put to this other use.

I would only like to say that this is a national laboratory that we are trying to preserve. If we do not have the equipment there at the right time for the right mind, the mind goes someplace else or does something else, so the working capital fund is the last point where you would want to disrupt a national laboratory.

Mr. WALKER. If the gentleman would yield, I would simply point out that it is the Under Secretary who has the responsibility for administering the programs of the agency. The Under Secretary obviously would be very concerned, I would think, about stripping bare one of the main operating accounts if, in fact, he did not have that kind of money. It is his personal representation that this is, in fact, the situation and that we can get that kind of money out of that particular category because of the $12 million carryover.

Mr. FUQUA. I appreciate that and, of course, the Under Secretary is a good friend of mine and we served in this House together and on another committee together, and I wish he would visit the NBS more often if he has visited it, because I think it would be very enlightening, and also the Secretary.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

But one of the problems we have is that the money is committed. For instance, right today, starting this month, they are in the process of installing a class 6 supercomputer that will be in the process of being installed and be ready to operate in fiscal year 1986, which begins in October.

What we are doing by this amendment, they will not have any money to operate that computer system. There are also several other things. There is some important maintenance on the laboratory where we have millions of dollars worth of equipment. There are two roofs that are in serious need of repair and that money is being removed, and those are set for repair in fiscal year 1986.

We have replacement for boiler refractory brick that must take place in order to keep that operating correctly, and also some electrical power distribution replacement. As we move along and have more energy requirements, particularly electrical energy requirements, they must be upgraded, and these are very critical things. So that the laboratory can operate in an efficient manner.

I do not think we in this Congress want to add additional money for ceramics and biotechnology and at the same time turn around and say, "Well, we are sorry but you do not have any money to keep the lights on and keep the place operating, and your supercomputer that you have paid a considerable amount of money for, the taxpayers of this country, we are sorry but there will not be any money to operate this."

This is the difference between the two amendments. We can philosophize all we want to about a freeze. Unfortunately, this agency has been treated for many years, not under this administration but other administrations of my own party, like a stepchild, and one that was not very welcome.

□ 1350

I would hope that my friend, the Under Secretary would visit the NBS and learn more about that because it certainly does not get very high attention in the hierarchy of the dining halls of the Department of Commerce, and it would be a great help if he would do that and better understand it.

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I am glad to yield to my friend, the gentleman from Pennsylvania.

Mr. RITTER. Mr. Chairman, I understand what the gentleman is saying. Maybe if the food was a little better, we might see the Under Secretary there. No, I am not really at all

familiar with the food at the National Bureau of Standards.

I would like to point out, in support of what the gentleman in the well is saying, that if you look at the National Bureau of Standards as a model Federal laboratory working collaboratively with industry, you see a kind of a gem out there in the Federal R&D establishment that probably should be rewarded. Over the past 5 or 6 years, there has been essentially, in real dollars, about a 25-percent cut. Now, the administration's policy to support science and technology is clear.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(On request of Mr. RITTER, and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. RITTER. Mr. Chairman, will the gentleman continue to yield?

Mr. FUQUA. I am hpapy to yield to my friend, the gentleman from Pennsylvania.

Mr. RITTER. Mr. Chairman, this science and technology budget is essentially flat adjusted for inflation. It is essentially frozen. It makes no sense to take this agency, which is perhaps doing its job better than some of the other agencies within the Federal R&D establishment, and cut it. It makes no sense, as we find ourselves in a race for our technological lives, to pull the rug out from under one of the best performers that we have.

It seems to me that a freeze is enough, that if we have a policy of freezing science and technology overall within the administration's budget and allowing for inflation, and we are not even allowing for inflation in this budget, a freeze is enough.

There are a number of things that persons like myself would like to see done at the National Bureau of Standards, but I am willing to forgo them in accepting a freeze. So I do not think a cut at this stage is the right way to go.

I would like to point out that I am not sure about this $12 million. I would hope that while the jury is out and while we try to get this number firmed up, Members do not make a decision on this. This is something that is coming to certain Members this morning, and I just do not have the right kind of information.

Let me say this: Everybody has his or her story as to how certain agencies dump money out before the end of a fiscal year deadline simply to get it spent so that they will not lose it in the upcoming year.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has again expired.

(On request of Mr. RITTER, and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. RITTER. Mr. Chairman, if the gentleman will continue to yield, if you really want to plan a program and you want to make your investments flow naturally, you do not just throw the money out the door at the end of the fiscal year deadline. You can plan for it. And my view at this point, not knowing the full details of the circumstances, is that there is probably some good reason why these funds were planned to be spent this time around, as opposed to getting rid of them before the deadline.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for his contribution.

It is my understanding that while there may be $12 million there, those moneys have been committed during the course of this fiscal year, and by going back and removing those, we are doing a very serious injustice to a very fine agency of this Federal Government, and a lot of fine and dedicated scientists and personnel that make it work.

Mr. GREGG. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New Hampshire.

Mr. GREGG. Mr. Chairman, I appreciate the gentleman's yielding.

Although I no longer serve on the committee, last year I had the opportunity to offer the amendment which basically froze the agency's levels into the prior-year levels, so the proposal of the gentleman from Florida and the committee proposal would basically be a 2-year freeze of the agency, as I understand it, which is a fairly significant retarding of spending and represents, in my opinion, a very appropriate level.

The Walker amendment, as it is proposed, presumes that the initial administration budget as sent up was a respectable budget, and I have to admit that when I was the ranking member on this committee, I was a little discouraged with the approach that OMB took in sending its budget up, because essentially they took the classic approach that you ran into if you happened to be on the school board and you asked your superintendent of schools to make a cut in your school department. OMB cut out or eliminated two major programs of the Bureau of Standards, knowing full well that those programs were going to have to go back in.

The CHAIRMAN. The time of the gentleman from Florida [Mr. FUQUA] has expired.

(On request of Mr. GREGG, and by unanimous consent, Mr. FUQUA was allowed to proceed for 3 additional minutes.)

Mr. GREGG. Mr. Chairman, if the gentleman will continue to yield, it was as if on a school board budget, the superintendent had come in and cut out the football team, the baseball team, and the school bus, and then added new initiatives, knowing full well that they were going to leave it up to the school board to put back in the football team, the baseball team, and the school bus and then deal with the new initiatives. That is exactly what the OMB has done here.

They eliminated the Fire Program, which is the core program in the Bureau of Standards. It is the program that develops the standards by which it is determined whether or not fabrics are flammable. It is the type of standards that are universally accepted so that children can wear fabrics which do not ignite if they are playing with fire and so if people fall asleep smoking on their couch, their couch will not burn them to death and burn the house with them. That program is a core program. But OMB zeroed it out.

There was also the construction program which they zeroed out, the Buildings Institute, which is a core program that dealt with the structural aspects of buildings such as what we are concerned with in the Kansas City case, and they know those programs are going to come back in.

Thus they put the committee between a rock and a hard place, essentially saying to the committee, "All right, we have zeroed out these programs, but we have added $16 million of new initiatives. Now you have to figure out how you are going to handle it, but we have given you a reasonable budget that is under the freeze level."

That is intellectually dishonest, and in my opinion, a freeze of this agency, which would be a 2-year carryforward freeze, is a fair level of funding. And I do not think anybody in this House can accuse me of being a spendthrift. In fact, I think I probably rank as one of the more conservative Members on the issue of spending.

Mr. Chairman, I certainly will support a freeze level, but for me to support the proposal of the administration, I think, would be to support a funding level which is unjust and done with mirrors.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for his contribution.

Mr. Chairman, let me just say, as has been outlined very clearly, that the agency has been frozen. It is in a retrenched position. To adopt the Walker amendment over the committee amendment even further punishes the agency. The agency does not deserve that, and the American people do not deserve that. I urge the Members to vote for the committee amendment and against the Walker amendment.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the discussion here today about cutting back the National Bureau of Standards is a painful dis-

cussion to a lot of us. I would have just as soon last week left the funding as the committee brought it in for NASA. I would have been perfectly happy yesterday to have had the funding remain as the committee brought it in for the National Science Foundation, and because I do support the National Bureau of Standards, the $143 million under normal circumstances would have been something that I would have enjoyed supporting.

But we are faced with a different sort of decision here today. The gentleman from Michigan a little while ago was saying that the group they have was looking for $50 billion in reductions, but they can only find $38 billion if they freeze everything—being short some $12 billion. Well, here is $5 million of that $12 billion. So we have to look at that lowest figure.

I am afraid that today we are setting a precedent for how we conduct the authorizing of other agencies. We are setting a precedent that it will be at the freeze level if we accept the first amendment that was offered.

Let me say that I support both amendments. From my point of view, we cannot lose whichever one happens to win. But if we are going to look at only freezing at the 1985 level, we are going to be short on spending by $50 billion in this country.

Now, there is a rationale for the cuts. We had in committee some discussions about an item in there for overhead. There was $4.8 million in there for overhead, for such things as travel, public relations, increases in salary, and advertising—and those kinds of things can be reduced.

□ 1400

Consultant fees were in that $4.8 million. Coming on to the floor, we had cut that by $1.2 million by agreement in the committee, but that still left the $3.6 million in this committee bill today.

I think it is reasonable to be able to say that if you cannot cut the overhead, where are you going to cut?

One of the things in the report says that we will take the Director from a level 4 to a level 3. Let me tell you that I have the highest regard for the Director of the National Bureau of Standards. I think he ought to be paid a lot more than he is being paid, but under the circumstances, under the budget constraints that we have, perhaps this is not a good time to do it.

So I would support first the Walker amendment which takes it down to $122 million and then the Walgren amendment which takes it to $127 million. I will not be unhappy with either one of those amendments that happen to make it, but I think I have a suspicious mind in this particular instance. I do not know why it keeps reoccurring to me that there has been an examination of the budget and that by freezing some favorite programs at 1985 would be higher than recommended by the administration and so we are looking for an increase from the recommendation by using the word "freeze."

I would be much more comfortable in all our authorizations to have it either at the freeze level or at the requested level, whichever is lowest.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I would be glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

I just want to make one point. Some of the people who have been opposing my amendment have opposed it on the grounds that somehow we are launching a vicious assault on the agency. I want to assure the gentleman and those others that that is not the intent. What we are trying to do is launch a vicious assault on the deficit. I think it is maybe something that we ought to do, but I certainly believe the NBS is a valuable, useful agency. It is just that we have some tough decisions to make, as the gentleman has said, and I appreciated the gentleman's support.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think this is a very welcome set of votes that we are going to be having here in the House in a few minutes with respect to these two amendments. The gentleman from New Mexico and I discussed this issue yesterday and I think it is properly a question that will send a signal to the Budget Committee as to what the thinking of the House is, so I think it is a good situation to have.

I very much support, as I said earlier, the freeze proposal coming from the gentleman from Pennsylvania on behalf of the committee and I oppose the further cut that is recommended in the amendment from the gentleman from Pennsylvania [Mr. WALKER].

Now, let us look at what we are actually doing here. We are going to be voting, not on the validity of the Bureau of Standards or its budget; obviously, if we were voting on just that program and nothing else, probably the committee's recommendation of $144 million would receive support in the House, because the committee has made a considered judgment far below some of the requests that have come out of the administration for the specifics and it has come to us with a reasonable budget; but we are debating here an overall budget policy and how that is going to be implemented.

Now, the freeze is one way to go. The gentleman from New Mexico questions whether this is some kind of stalking horse in order to spend a lot more money on some other program. That is not the case.

The Budget Committee can come to us with further reductions even in the National Bureau of Standards after we pass this authorization. This is the first step. This is the authorization. We are establishing the maximum, not the minimum amount that can be spent. Therefore, if the Budget Committee determines in reaching that $50 billion or more in spending cuts, this is where to get $5 million, they will be in a position to do that. I doubt this is where they will find the $5 million. I doubt that is the case and I do not think the House should find it for them there right now.

We are at the first stage of the budget process. We are establishing a principle. The principle is that until money is available to pay for it, if ever, we should not spend more in 1986 than we will spend in 1985. That is not the whole solution to the deficit, but if you do not start there, how will we ever tame it?

We have plenty of opportunity to find more money to be saved; but the one thing we ought not to do is blindly accept the administration's budget as the guide to where the money ought to be saved. The administration's budget is a disaster in many other places, not only in the Bureau of Standards. The administration's budget is shortsighted. It is unwise. It does not reflect the priorities that this House ought to adopt.

We have a choice. The choice is clear. Shall we freeze or will we vote for the President's budget?

I think the President's budget is ill-advised in this area and a freeze is a sensible position.

I urge a "no" vote on the Walker amendment and a "yes" vote on the Walgren amendment.

Mr. LUNDINE. Mr. Chairman, would the gentleman yield?

Mr. MORRISON of Connecticut. I would be glad to yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, I would like to compliment the gentleman for the leadership that he has provided in bringing this House to some degree of fiscal restraint in these times when we are so addicted to public debt and foreign capital to finance that debt, but I join him in urging my colleagues in this House to vote against the Walker amendment and to support a freeze, not more than a freeze, as is being proposed under that amendment.

I just would like to additionally point out that if you support this amendment, you are not cutting out fat. You are cutting into the very muscle and fiber of our efforts at high tech development in this country. Advanced ceramics and biotechnology suffer deep and severe cuts if this

amendment is accepted. These areas our competitors are investing much more money than we are. I just seems to me that it would be foolish to the ultimate degree and hurt our sustained economic prosperity if we are to make those kind of cuts now.

I think the gentleman for his leadership in fiscal discipline, but his restraint in showing that there comes a limit in the authorization process and you have to preserve the essence of this National Bureau of Standards program.

Mr. MORRISON of Connecticut. Mr. Chairman, I thank the gentleman for his comments. I just want to commend the gentleman for bringing before the House this key concern in all these determinations as to where we are going in the future.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding. I just wanted him to yield because I do want to correct a statement made by the gentleman from New York.

My spending in biotechnology and in ceramics and so on is precisely the same as the spending that is in the freeze amendment as proposed, so that in those areas there are no massive cuts. The spending is the same.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

(At the request of Mr. LUNDINE, and by unanimous consent, Mr. MORRISON of Connecticut was allowed to proceed for 2 additional minutes.)

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I will be glad to yield to the gentleman from New York.

Mr. LUNDINE. Mr. Chairman, I stand corrected. This amendment gets changed so often that it is kind of hard to know the players without a scorecard.

Now what the gentleman is doing is taking it out of the Supercomputer Program, which as I understand it—where is he taking it?

Mr. MORRISON of Connecticut. Well, I have the time, and I would say from all I have heard, the gentleman is taking it out of the operations of the national laboratories, which sounds like a poor place to do it. The gentleman seems to be finding a mythical or a shadowy $12 million to pay for it and that does not sound like a good way for the Congress to proceed, but I will let the gentleman explain it.

I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

What we are doing is taking the money out of an area where the Under Secretary of Commerce told us we have a $12 million surplus and where we can spend that $12 million in surplus in a way that will not impact upon these new starts; so in fact what we are doing is trying to get that surplus for the future.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield to me one more time?

Mr. MORRISON of Connecticut. I yield to the gentleman from New York.

Mr. LUNDINE. I am going to have the opportunity next Tuesday with the Under Secretary of Commerce to go to Elmira, NY, where Westinghouse and Toshiba are building a new industrial operation of the highest technology. I will talk to the Under Secretary of Commerce about where this $12 million is; but the gentleman from Connecticut has made the essential point. If there is some kind of a surplus out there, the Budget Committee and the Appropriation Committees can find it. It is not presented to this authorizing committee and it would be indeed foolish at this point to cut this amount of money which could cut into very vital and essential functioning of the National Bureau of Standards.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. MORRISON of Connecticut. I yield to the gentleman from Florida, the chairman.

Mr. FUQUA. Mr. Chairman, I thank the gentleman for yielding. I appreciate his cooperation.

If I understood the gentleman from Pennsylvania [Mr. WALKER] a while ago in relating to ceramics, the committee had taken $5 million out of that and now the gentleman has added it back in.

The CHAIRMAN. The time of the gentleman from Connecticut has again expired.

(By unanimous consent, Mr. MORRISON of Connecticut was allowed to proceed for 2 additional minutes.)

Mr. MORRISON of Connecticut. I yield to the gentleman from Florida.

□ 1410

Mr. FUQUA. In addition, there has been $2 million put back in biotechnology initiative. These are fine initiatives and the committee supports these programs. But when you take the money out of the operating money there is not going to be any funds there to initiate the programs in the coming year. And the gentleman has put a ceiling on the amount of money that can be spent.

If there is money in the budget, even if the $12 million is still there, it cannot be spent because all they can spend under the gentleman's amendment is $1,697,000, a little over $1.5 million to operate. We are informed by the agency that that $12 million is already committed to carry out the funding for the remainder of this fiscal year. It may be unspent as of today but it is obligated because they still have another 6 months to go in this fiscal year.

So I am very concerned that we will have an agency, a fine agency and no gas.

Mr. MORRISON of Connecticut. I think the gentleman's point is very well taken. Even if the money is not obligated or it will not be available for these purposes because of the legal effect of the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of H.R. 1617, the National Bureau of Standards authorization bill for fiscal year 1986. Considering the huge budget deficits we have been having over the last several years, I want to congratulate Chairman FUQUA and the Committee on Science and Technology for doing an outstanding job under difficult circumstances. In my view, the National Bureau of Standards [NBS] has much to contribute to the well-being and the increased productivity of this Nation. In this regard, proper funding of its activities will ensure that NBS fulfills its mandated mission.

I also want to take this opportunity to express my appreciation for the strong support that the Science and Technology Committee has given to the Institute for Computer Science and Technology [ICST]. Public Law 89-306, which I authored, established for the first time a program to develop ADP and communications standards for the Federal Government. The Institute, which has administered this program for almost 20 years, has done a commendable job in developing standards that have greatly benefited the Government as well as the private sector.

More than 3 years ago, Joe Wright, then Deputy Secretary of the Department of Commerce, testified that the results of the Institute's work in the standards area was saving the Government about $132 million annually. Clearly, any program that is saving the Government more than $13 for every dollar spent is worth funding adequately and deserves the full support of Congress.

I support strongly Chairman FUQUA's amendment as offered by the gentleman from Pennsylvania [Mr. WALGREN] and I oppose the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] and would ask all Members to support the Fuqua proposal.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

I would say first of all to the gentleman from Texas [Mr. BROOKS] that I do not quite understand his point. There is nothing in my amendment which emasculates these programs. In fact, as the gentleman from Florida has just pointed out, I put some money back in in my amendment for new starts that in fact help us move toward trying to get some of these things done. And I think the gentleman from Florida would agree with me that the ceramics engine work is extremely important. It puts us in competition with the Japanese in the hopes of trying to get some technology where they will be able to compete.

So in that vein we are moving ahead with my amendment over and above what the committee wants to do.

I just want to make the point back to the gentleman from Florida with regard to the $12 million; as the gentleman knows, what I am doing is setting a level of appropriations or authorizations out of this year's funding level. But the $12 million of carryover money can certainly be spent without reference to this particular ceiling, so there is no problem on that.

In fact, we can move ahead and spend that money, and that is what the Under Secretary intends to do.

Mr. RITTER. Will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. I thank my colleague from Pennsylvania for yielding.

I would just like to enter into a colloquy with the gentleman to clarify what his amendment does with respect to the Office of Productivity and Technology Initiatives.

As I understand it, the gentleman's amendment keeps the administration figure at $1.8 million, down from $2.7 million, but does not provide for a phaseout in subsequent years and would then keep that program level?

Mr. WALKER. The gentleman is almost right. It is actually $1.9 million which is the present level of funding. I keep that, but instead of being a phaseout amount in my bill, it is, in fact, a retention amount in the bill. So the program would continue to go forward, but at the lesser amount that the administration originally requested.

Mr. RITTER. I thank the gentleman. I would like to point out that this program, this Office of Productivity and Technology Initiatives has been responsible for many of the private sector initiatives stimulating research and development in this country, like the R&D limited partnerships, like reducing antitrust barriers to research and development and like the R&D tax credits. It has been headed by Dr. Bruce Merrifield who has done a splendid job and in fact I am supporting in the Fuqua position keeping this office frozen at its current level.

Why cut something by one-third that has been doing a job with a minuscule amount of funding, that is doing a job for the industrial competitiveness of this country that we really need done.

I yield back to the gentleman from Pennsylvania.

Mr. WALKER. I yield back the balance of my time.

Mr. NELSON of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, my comments are purely to put into context the overall discussion that we are having here on the issue of freeze to the previous year's spending levels or increase.

This is the third in a row of authorization bills that we have had. Today we are talking about a national laboratory for precision measurements. It is a part of our overall research and development, our production of science and technology.

Yesterday we had the bill that authorized the National Science Foundation, and 2 weeks ago we had the authorization bill for the National Aeronautics and Space Administration. In each of these situations we are taking the committee recommended level lower, back to the present year's spending level. And I think that we have to remind ourselves that if this is going to be a pattern that will replicate itself throughout the budgetary process then that is well and good because the Nation will be the better off for it.

However, if in the process of this budgetary system it starts to unravel, and certain agencies of Government have whopping increases and others have cuts, then it is incumbent upon us, particularly those of us Members that are here on this floor right now who understand the future of this country is involved with its production of science and technology, for us to come back and to raise that level to the committee recommended level.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] to the amendment offered by the gentleman from Pennsylvania [Mr. WALGREN].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WALKER. Mr. Chairman, on that I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred and ninety-three Members have recorded their presence, a quorum is present, and the committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania [Mr. WALKER] for a recorded vote.

PARLIAMENTARY INQUIRY

Mr. MORRISON of Connecticut. I have a parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Connecticut will state his parliamentary inquiry.

Mr. MORRISON of Connecticut. Mr. Chairman, my parliamentary inquiry is as follows: Do I understand correctly that the amendment before the body about to be voted or on which a recorded vote has been requested and will be ordered is the Walker amendment to the Walgren amendment; the Walgren being a freeze amendment to the underlying proposal from the committee. Is that correct?

The CHAIRMAN. The gentleman from Connecticut is correct, and the Chair will make that clear again as the Chair puts the vote.

The pending business is the demand of the gentleman from Pennsylvania [Mr. WALKER] for a recorded vote.

A recorded vote was ordered,

The CHAIRMAN. Members will have 5 minutes in which to record their votes.

The vote was taken by electronic device, and there were—ayes 196, noes 201, not voting 36, as follows:

[Roll No. 56]

□ 1440

The Clerk announced the following pairs:

On this vote:

Mr. Quillen for, with Mr. Ford of Michigan against.

Mr. Solomon for, with Mr. Hawkins against.

Mr. Horton for, with Mr. Bustamante, against.

Messrs. VALENTINE, WATKINS, HUTTO, ANDREWS, and DE LA GARZA changed their votes from "aye" to "no."

Mrs. BENTLEY changed her vote from "no" to "aye."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentle-

man from Pennsylvania [Mr. WALGREN].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. MORRISON of Connecticut. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 398, noes 2, not voting 33, as follows:

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there further amendments?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. BENNETT] having assumed the chair, Mr. LEVIN of Michigan, Chairman of the Committee of the Whole House on the State of the Union reported that that Committee, having had under consideration the bill (H.R. 1617) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal years 1986 and 1987, and for other purposes, pursuant to House Resolution 128, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LUNGREN. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 282, noes 103, not voting 48, as follows:

□ 1520

The Clerk announced the following pairs:

On this vote:

Mr. Ford of Michigan for, with Mr. Rudd against.

Mr. Hawkins for, with Mr. Crane against.

So the bill was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1986, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mrs. LONG. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks and to include extraneous matter on H.R. 1617, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Louisiana?

There was no objection.

CRIME VICTIMS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 109) to designate the week of April 14, 1985, as "Crime Victims Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, however, I do not object, but simply would like to inform the House that the minority has no objection to the legislation being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 109

Whereas crime often inflicts considerable physical and emotional pain and financial hardship upon its victims, disrupting their lives, and placing great strains upon their families;

Whereas our criminal justice system has often failed to provide the victims of crime with the compassionate treatment they deserve;

Whereas it is the fundamental obligation of government to protect its citizens from the criminal element;

Whereas there is a national movement in support of more just and compassionate treatment of victims of crime;

Whereas the establishment of the President's Task Force on Victims of Crime and an Office for Victims of Crime in the Department of Justice, and enactment of the Victim and Witness Protection Act of 1982 and the Victims of Crime Act of 1984 evidence the Federal Government's increased awareness of the plight of crime victims; and

Whereas further efforts are needed, at all levels of government and in the private sector, to help ease the trauma suffered by crime victims: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating April 14 through April 20, 1985, as "Crime Victims Week" and calling upon the people of the United States, State and local government agencies, and interested organizations to observe that week with appropriate ceremonies, activities, and programs.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DES AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 63) to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Reserving the right to object, Mr. Speaker, however, I do not object, but simply would like to inform the House that the minority has no objection to the legislation being considered.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, I thank the distinguished gentleman for yielding. I want to express my appreciation

to him and to the distinguished chairman of the subcommittee for the urgent and immediate consideration of this legislation.

Mr. Speaker, diethylstilbestrol [DES], a powerful synthetic hormone, was prescribed to an estimated 3 million women in the United States from 1941 to 1971 for the purpose of reducing complications in childbirth. Use was continued despite reports as early as the 1950's that the drug was ineffective. It was not until early 1971 that use was banned by the Food and Drug Administration when medical research revealed a strong connection between DES and cancer of the reproductive organs. More recent studies have linked DES to cancers and abnormalities in mothers, daughters, and sons.

It is imperative that the women who took DES during pregnancy and their daughters and sons be made aware of the effects of the drug. Early detection and treatment are necessary to contain the resulting cancers and preserve the reproductive capabilities of DES' victims. The effort to reach these people has been difficult because of the time which has elapsed since exposure. Many women were not familiar with the drugs prescribed to them, and some are not aware of the risks now facing their children. "DES Awareness Week" is an important step in the effort to locate and educate the many men and women exposed to this dangerous drug.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 63

Whereas Diethylstilbestrol (DES), a powerful synthetic hormone was given to over three million pregnant women in the United States from 1941 to 1971 for the purpose of reducing miscarriages, despite reports as early as the 1950's that the drug was ineffective;

Whereas it is estimated that over three million "DES daughters and sons" were also exposed in utero;

Whereas mothers who have been exposed to DES have been demonstrated to have a higher incidence of breast cancer with that risk becoming increasingly more pronounced with age;

Whereas approximately one out of one-thousand DES daughters will develop a rare cancer of the cervix and vagina known as Clear-Cell Adenocarcinoma;

Whereas these cancer victims are subject to hysterectomies, vaginectomies and lymphotomies with a 25 percent possibility of death as a result of such exposure;

Whereas a second type of cervical and vaginal cancer known as cervical dysplasia (pre-cancerous) and carcinoma in situ (CIS) has been shown to have a higher incidence in DES daughters affecting more than eighty-thousand women with at least five thousand developing the actual cancer;

Whereas problems with pregnancies have been reported to affect a large proportion of DES daughters including ectopic pregnancies, miscarriages, infertility and premature deliveries;

Whereas DES sons have shown a higher incidence of maldescent of the testes, a known risk factor for testicular cancer; and

Whereas identification, appropriate evaluation, and treatment of individuals exposed to DES is dependent upon a greater public awareness: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of April 21, 1985, through April 27, 1985, is designated as "National DES Awareness Week" and the President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask, unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the two Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

□ 1530

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I ask to proceed for the purpose of inquiring of the distinguished majority leader the program for the balance of this week and next week.

Mr. WRIGHT. Will the distinguished minority leader yield?

Mr. MICHEL. I will be happy to.

Mr. WRIGHT. This concludes our business for the week. The legislative business schedule for this week has been concluded. There will be no session tomorrow, therefore.

We will ask unanimous consent that when we come in on Monday we convene at 3 p.m. on next Monday.

Mr. MICHEL. Will the distinguished majority leader mind advising the House as to why we would under normal circumstances coming in at 12 delay that until 3 on Monday?

Mr. WRIGHT. I will be delighted to respond.

There is scheduled, and has been for some long while, a dedication of the library at Queens College in New York in the memory of our late colleague, Ben Rosenthal. That ceremony takes place late morning on Monday next. The New York delegation desires to attend that ceremony and other Members desire to attend, and in deference to them and in the honor of our late colleague we are asking that the House convene at 3 p.m. rather than at 12 o'clock noon on Monday.

Mr. MICHEL. I thank the gentleman.

Mr. WRIGHT. There are three bills planned to be taken up under suspension of the rules, all of them from the Committee on Foreign Affairs. The first is a resolution condemning the Soviet Government for the murder of Maj. Arthur Nicholson, Jr.; another expressing support for Costa Rica's neutrality; and a third calling for the restoration of democracy in Chile.

Members should be advised, in addition to those three, that on Monday it is likely, assuming that the Committee on House Administration has completed its work and has made a finding with respect to the winner in the contested election in the Eighth District of Indiana, that a motion would be made to seat the winner, whoever he may be.

On Tuesday we will ask unanimous consent to convene at 9 o'clock in order that we may take up consideration of the bill scheduled for action by reason of the legislation adopted last year, appropriations for aid to the Contras in Nicaragua.

That, as the gentleman may know, is a 10-hour rule. We will be considering the rule providing for 10 hours of debate and a vote as the statute commands, providing also for an opportunity after that has been done, an opportunity for a substitute to be offered on behalf of the House Committee on Foreign Affairs and the House Committee on Intelligence, and finally for a Republican motion to recommit which would be formed in whatever fashion the gentleman from Illinois or his designee may desire, and a guarantee that there will be an opportunity for the Members to vote on each of the three options.

Mr. MICHEL. I gather from what the distinguished majority leader is saying, your effort here is to circumvent the Appropriations Committee itself, who has original jurisdiction over the resolution which several Members on our side introduced; is that not correct?

Mr. WRIGHT. I do not believe that I would express it in terms of circumvention. The Appropriations Committee, to my knowledge, is not objecting to this procedure which fulfills the law adopted by our Congress last year calling for a vote to be taken within a given envelope of time.

The purpose, therefore, I would describe not as, certainly not to circumvent the Committee on Appropriations, but rather to facilitate action by the House.

Mr. MICHEL. Can the gentleman tell me if the Rules Committee has ac-

tually met yet on the procedures the gentleman has outlined here briefly?

Mr. WRIGHT. It is my understanding, though I am subject to correction, that they are in the process of meeting now. I am not sure that that is true, but I think that is true.

Mr. MICHEL. So that I have no assurance of what kind of rule we are going to be talking about here until actually finally the committee has concluded its work?

Mr. WRIGHT. I think that is true. You have no absolute assurance, nor have I. But I have described to you what I believe it will be.

Mr. MICHEL. I thank the gentleman.

Mr. WRIGHT. And what the Democratic leadership of the House has requested that it be.

Mr. MICHEL. And I assume then by way of brief review that would call for the 10 hours of debate originally prescribed in the continuing resolution, plus an opportunity for the chairman of the Intelligence Committee to offer whatever amendment he might want to offer, and reserving to this side an opportunity for a substitute, or would it be limited, or would it be a free-standing substitute or just a motion to recommit? Could the gentleman inform me?

Mr. WRIGHT. I am not able to answer the gentleman with specificity. It is my understanding, however, that it would reserve to the gentleman's side of the aisle the right to offer a motion to recommit in whatever manner the gentleman or his designee may prescribe it.

Mr. MICHEL. Might I further inquire as to the time that would be allocated beyond the 10 hours of general debate. If the gentleman from Indiana [Mr. HAMILTON] has an amendment, would there be a time allocation beyond the 10 hours of general debate for his amendment?

Mr. WRIGHT. It has been our purpose to request of the Rules Committee that 2 additional hours would be allowed for the substitutes to be discussed.

Mr. MICHEL. What kind of time would be reserved then to the minority?

Mr. WRIGHT. Half that time. Half that time, 1 of the 2 hours.

Mr. MICHEL. And would that include the time for offering our substitute if we chose to offer one, or would we have such time allocated to the minority?

Mr. WRIGHT. The minority, of course, would be free to use that time in such manner as it might choose to describe its own substitute, to extoll reasons for the virtues inherent in the minority substitute as superior in your view to those contained in the substitute offered by the chairman of the Committee on Intelligence. For whatever purpose the gentleman may desire to use the time, I think it would be available to him at his option.

Mr. MICHEL. I guess the bottom line, though, is if it is limited to a motion to recommit, would the time be limited to a mere 10 minutes, or would we be getting an hour of time?

Mr. WRIGHT. I would hope that the gentleman would elucidate the contents of the motion to recommit in the process of our debate in order that all Members might understand what was contained in the motion to recommit. I am not aware of any effort on the part of the Rules Committee to extend the normal time for motions to recommit.

If the gentleman desires that, he might want to consult with the Rules Committee members.

Mr. MICHEL. Well, the gentleman from Illinois has not been advised that there is an emergency meeting of the committee being held in order to testify in behalf of his own proposition. And I guess I raise the point that under normal rules of procedure, even under an emergency situation, the courtesy ought to be shown to at least the author of the resolution being considered that we are having an emergency meeting to consider your resolution. And I would make that point, and just for future reference, hopefully that we will make a point.

Mr. WRIGHT. I take the gentleman's point as well intentioned and a proper statement. I think it is surely the intention of the Democratic leadership to preserve and protect for the gentleman from Illinois whatever motion he may want to offer, and not to restrict him in any artificial way whatsoever.

Mr. MICHEL. I thank the gentleman. I think I interrupted him when we were on about Tuesday.

Mr. WRIGHT. We were at Tuesday, and that is all that is planned for Tuesday. We would hope to be able to come in at 9 o'clock and would not schedule any other actions on Tuesday.

On Wednesday we would ask unanimous consent that we may be able to meet at noon in order that we may take up H.R. 2068, the State Department authorization bill. That, of course, is subject to the granting of a rule, but I know of no impediment to the rule being granted.

□ 1540

If we can complete these heretofore listed actions on Monday, Tuesday, and Wednesday, then we would have a pro forma session on Thursday, meeting at 11 a.m. as prescribed in the general rules of the House and would not have to have a session on Friday, April 26.

Mr. MICHEL. I thank the gentleman.

Mr. Speaker, I yield back the balance of my time.

ADJOURNMENT TO MONDAY, APRIL 22, 1985, AND HOUR OF MEETING ON THAT DAY

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 3 p.m. on Monday next.

The SPEAKER pro tempore. It there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON TUESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, it adjourn to meet at 9 a.m. on Tuesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday it adjourn to meet at noon on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that business in order under the Calendar Wednesday rule shall be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONGRESS AND THE CONTRAS

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LIVINGSTON. Mr. Speaker, the Times-Picayune/the States-Item of New Orleans recently joined the growing ranks of influential journals backing President Reagan's program for the freedom fighters in Nicaragua. The paper cannot understand why so many in this Congress have not done likewise. Frankly, I don't understand it either, and I doubt the American people will, should the aid package be defeated and Nicaragua be allowed to consolidate its antidemocratic state.

The Picayune reminds us of recent votes in this Congress for aid to Cambodians battling Vietnamese Communist invaders, and of congressional

support for covert aid to Afghan rebels fighting the Soviet puppet regime there. Then the paper hits the main point:

But what is really remarkable is that Congress should be concentrating opposition on countering a demonstrable threat to U.S. and free world interests right in our own neighborhood in Nicaragua. The opposition is full of arguments that seem to amount to little more than excuses.

Mr. Speaker, I urge my colleagues to support the President and to carefully consider the cogent Times-Picayune editorial, which follows in its entirety.

CONGRESS AND THE CONTRAS

Congressional sentiment is running generally against renewing aid to the "contras" battling the Sandinista regime in Nicaragua. We find it remarkable, then, that the House Foreign Affairs Committee last week voted overwhelmingly to approve $5 million in military aid to Cambodians battling the Vietnamese communist invaders.

We find this remarkable because the Cambodians we would be providing money to are the lesser factions in a coalition that includes the savage communist Khmer Rouge. The chances of "our" group's prevailing are virtually nil.

We find it remarkable, too, that there is no congressional sticking at increasing our aid to the Afghans fighting the Soviets and the Soviet puppet regime. This aid is being funneled through the Central Intelligence Agency, a method many in Congress found so distasteful when applied to the contras. The Afghanistan resistance, too, is not likely to succeed.

Both these distant wars are of strategic importance to the United States. The conflict in Cambodia threatens our ally Thailand. The conflict in Afghanistan costs the Soviets money and threatens not only our ally Pakistan but threatens to achieve for the Russians their long-sought access to warm seas.

But what is really remarkable is that Congress should be concentrating opposition on countering a demonstrable threat to U.S. and free world interests right in our own neighborhood in Nicaragua. The opposition is full of arguments that seem to amount to little more than excuses.

The Sandinistas, for example, are only homegrown revolutionaries reacting to long-standing domestic problems. But, to continue, even if they are communists, they have the support of their people. The Sandinistas, some argue, have built their disproportionate military force purely in defense—against potentially hostile neighbors and the United States itself. The contras, some charge, are Somoza men bent on returning to dictatorship. In any event, for the clincher, the United States should not finance guerrillas against an established government we formally recognize.

None of this can stand up. The Sandinistas were one faction in a broad uprising against the Somoza dictatorship, and when Somoza was expelled, they took full power and set up their own proto-dictatorship; the contras are the other uprisers who are still trying to establish a pluralistic democracy. The United States is helping them finish the revolution, whose goals coincide with our own.

An entrenched Sandinista regime, even if Cuba and the Soviets lifted not a finger nor provided a cent to its victory, would be a Soviet comrade on the hemisphere's mainland and an exporter of its own brand of dictatorship in a region of direct strategic importance to us.

Congress must stand in defense of our and our free (or freeable) neighbors—the amount and the means being, to some extent, negotiable. If it does not, it will be sending a signal to the Soviets and their potential agents that the United States has lost its nerve and has no stomach for resisting the program of aggression by proxy that serves them far better than nuclear missile rattling in expanding their global power.

HOLLYWOOD STARS LOBBY AGAINST AID FOR FREEDOM FIGHTERS

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MARLENEE. Mr. Speaker, this week a group of Hollywood stars with limited foreign policy knowledge or experience invaded the Halls of this Congress to lobby against aid for the Nicaraguan freedom fighters.

The stars are beautiful, persuasive people but have any of my colleagues met face to face with people who have been disfigured, imprisoned, and tortured by the Marxist Sandinstas? Why haven't my colleagues talked to those who tell a story different from what they want to hear, a story of brothers and sisters, sons and daughters being brutally tortured, disfigured, by the Sandinistas? Do the Hollywood stars know or care that last year the Soviet Union sent more than $250 million in military aid to Nicaragua. The American public should ask is that foreign intervention, $250 million for activities to destroy democracy.

While we do nothing but equivocate, for the first time Soviet military officers are engaged in the fighting in Nicaragua. Castro said his Cuba will, and I quote, "continue arming and training terrorists in Central America." Do the Hollywood stars know this? Are they of the same ilk as those who fought along side of Castro in the hills of Cuba.

I ask you, what does this Nation and this Congress stand for if it does not have the guts to say no to the pro Marxists lobbyists, no to the Soviets fighting in Nicaragua, and no to the Sandinistas.

Today I am introducing parts 3 and 4 of the Washington, DC's major newspaper, the Times "Network" articles entitled "Accuracy and Balance, Lies and Deception."

Read the "Network" articles to see who the real enemy is.

ACCURACY, BALANCE OF WOLA FOUND LACKING BY ITS CRITICS

(By Roger Fontaine)

When a congressional delegation arrived in Managua in 1979 shortly after the Sandinista takeover, a member of the group recalls that the first person they met at the airport was an employee of the Washington Office on Latin America.

According to at least one report, a WOLA staffer later showed up at the U.S. ambassador's residence on the arm of one of the Sandinista comandantes. The comandante, Jaime Wheelock, was then as now in charge of the regime's agriculture program.

Among the hundreds of groups that comprise the left-wing "Network" working to radically influence the administration's policies toward Central and Latin America, WOLA could probably lay claim to being one of the most senior, if not effective, in its area.

Founded in 1974—and therefore "ancient" as these organizations go—WOLA is headquartered on Maryland Avenue on Capitol Hill, almost across the street from the Supreme Court in a suite of offices located in the United Methodist Church building.

A major focus of WOLA's activities is Nacaragua. WOLA is providing information in opposition to the Reagan administration's proposed assistance to the resistance forces fighting the Sandinista government.

Unlike some other groups in The Network, WOLA is not a "one-man-with-a-mimeo" affair—the kind of political activist group that once flourished in the heat of Vietnam but then was left to wither.

Rather, WOLA is established Part of its funding comes from such respectable sources as the MacArthur Foundation and Ford Foundation as well as from mainline church bodies. In 1983, WOLA raised $340,866, more than one-third of it from religious organizations, according to its Annual Report.

The key to WOLA's effectiveness, according to one former legislative staffer familiar with the organization, lies in its ability to provide a steady stream of information to members of Congress and their staffs. "On Capitol Hill, information is everything," the former aide said.

But it is the accuracy and balance of WOLA's information that its critics have called into question.

WOLA literature describes the organization as "an information source for interested officials, providing resources for documenting information, briefing those traveling to Latin America, facilitating interviews between prominent Latin American leaders and U.S. officials, organizing background briefings for congressional staff and giving testimony before congressional committees."

Amid all these activities, one of the major criticisms leveled at WOLA is for practicing a double standard on human rights.

Governments and organizations that are either anti-communist or non-communist, particularly if they are U.S. allies, typically come under WOLA's close scrutiny, while allegations of human rights violations by socialist states, such as Nicaragua and Cuba, are not subjected to the same degree of attention.

"It means all criticsm is directed at one set of problems, and that leads to an unbalanced situation," one WOLA critic said.

"WOLA has been a faithful spokesman for the Sandinistas and El Salvador's guerrillas," said a State Department offical.

"They [WOLA] consistently have distorted the fatalities in El Salvador and blurred it so it all appears to be coming from the right," the official said.

Penn Kemble, founder and director of the Institute on Religion and Democracy, said of this double standard, "from a Christian

perspective that argument is wholly unacceptable.

"Christians are obliged to judge all governments and institutions from the standpoint of the churches," Mr. Kemble said.

Castro's Cuba has received mention in WOLA reports only in the context of U.S.-Cuban relations. Human rights abused documented by the Organization of American States and other organizations have been largely ignored.

In fact, according to Update's 1984 index, Cuba went unmentioned the entire year, despite the fact that the newsletter had space for 44 articles on 12 other Latin American countries.

"Our interest is helping to make available to the public a concern for the way, the effect, the impact that U.S. policies have on people who live in this hemisphere," said Joseph T. Eldridge, WOLA's director, in an interview.

Contributions in 1983 from religious institutions totaled $124,602, according to WOLA's Annual Report. Some of the contributors included the National Council of Churches, the American Lutheran Churches, American Baptist Churches, Maryknoll Fathers and Brothers, Maryknoll Sisters, the Presbyterian Church, the Episcopal Church and Jesuit Missions.

Mr. Eldridge, a Methodist clergyman, is paid his salary by the United Methodist Church Board of Global Ministries, according to a Heritage Foundation analysis published in 1984.

Although WOLA's annual budget may be small by Washington standards, observers point out that WOLA increases its budget's effectiveness by using hardworking volunteers.

Not all critics, however, speak harshly of WOLA.

Elliott Abrams, head of the State Department's Bureau of Human Rights and Humanitarian Affairs, said WOLA "has political prejudices just as we all do, but it makes a real effort to promote human rights progress.

"So while I disagree with WOLA, I work with them."

Some sources, including critical ones, give WOLA credit for quality reporting on some aspects of Latin America.

One former Foreign Service officer critical of WOLA's support of the Sandinista government, nevertheless credits the organization for "excellent, responsible, objective reporting . . . on various issues—both political and human rights."

But not on Nicaragua.

"I find it difficult to explain why they [WOLA] have taken this turn to the left and why they are associated with this so-called Sandinista lobby since they have projected themselves earlier as a very reputable, balanced, objective research organization," the former officer said.

Mr. Eldridge told The Times that, "Our concern is whether U.S. policy either encourages or discourages human rights.

"Our view is that what Latin America needs is not a lot of emphasis on military support. Rather, what Latin America needs is economic development and social change," he said.

In the recent past, WOLA also has opposed the bipartisan Kissinger Commission report on Central America. Mr. Eldridge said WOLA opposed the Kissinger Plan because it "places a lot of emphasis on military support for the region."

But WOLA was also opposed to El Salvador's land reform, according to one U.S. consultant who worked on the program.

"They [WOLA] were worse than the landlords," the consultant said "Land reform just drove them up the wall. They really hated it."

Earlier when the Sandinista opposition in Nicaragua was struggling to overthrow the government of Anastasio Somoza Debayle, WOLA participated in exposing the former president's human rights record and also introduced pro-Sandinista spokesmen to Washington—particularly to members of Congress and the media.

Some of its more prominent guests were Ernesto Cardenal and Miguel D'Escoto. As priests, they were particularly effective witnesses before congressional committees, observers recall. Later, both joined the Sandinista government.

Nicaragua's Marxist Sandinista regime has been in power for nearly six years. WOLA, according to its critics, has put the best face it can on that regime's human rights record, first and foremost, by not reporting on it.

Mr. Eldridge contends that WOLA has been critical of the Managua regime.

"We're not here to exonerate the Sandinistas." he said.

"We've been highly critical of Sandinistas [in direct communications with them]" he said "Our concern is to do what we can to create a climate in the United States international public opinion, to bring all pressures on both sides.

* * * * *

U.S. labor officials contacted by The Times said that, to their knowledge, WOLA has not shown any interest in the Nicaraguan government's suppression of independent labor unions in that country—unions that have the support of the State Department, AFL-CIO and others.

WOLA remains active on the Nicaraguan front. In late February, for example, WOLA and the International Human Rights Law Group requested a follow-up investigation of alleged atrocities committed in Nicaragua—not by the Sandinista government, but its armed opposition.

For a week, two investigators toured Nicaragua to investigate allegations made by New York attorney Reed Brody.

Their investigation was limited to the FDN (Fuerza Democratica Nicaraguense). They described the FDN as a group that has received support from the CIA and whose military leaders are "former Somoza National Guard officers."

Thirty people were interviewed, according to the authors of the report, and their principal conclusion was "the Contras are committing serious abuses against civilians."

"The weight of probative evidence indicates a reasonable basis to believe that the Contras engage in arts of terroristic violence against unarmed civilians."

The authors also drew a policy conclusion: "To the extent that it is reasonably foreseeable that they will continue to engage in such acts, any provision of aid to the Contras, directly or indirectly, by the government of the United States would render our government responsible for their acts."

The report of the two investigators received Mr. Eldridge's approval.

"Our report took some of the affidavits that Mr. Brody had collected to see if they could be validated, to see if in fact there was some substance to these charges," he said.

"I found that these accusations had been collected as a matter of fact were, in fact, true, discovering there was a pattern [of atrocities]." he said.

Some previous supporters of the Sandinistra revolution have become disillusioned with WOLA.

Geraldine Macias and her husband were supporters of the Sandinistas before and for three years after the revolution. They left Nicaragua in 1982 and came to the United States after government-led mobs burned their house.

Mrs. Macias, who is now vice president for the Washington-based New Exodus—an organization aiding Central American refugees—said she contacted the WOLA staff and explained what happened to her and her husband. Mrs. Macias said that, after making a few telepone calls to Managua, WOLA "did nothing"

Mrs. Macias said that WOLA was nothing more than "an apologist for the Sandinistas."

Adriana Guillen, a Sandinista supporter during the revolution and an officer in the Sandinista government for six months tells of a similar experience.

"Several times, I have been contacted by COHA (Council on Hemspheric Affairs) or WOLA and I have also called Americas Watch . . . So they know the sources, they know where to go and find the information. But they don't care . . . about reflecting the truth," she says

"We have not hesitated in our communication with government representatives to raise objections and criticisms that are presented to us."

Regarding Miss Guillen, he replied, "I don't know what her expectations were," adding he tries to pass along such reports whenever he receives them.

Miss Guillen's disillusionment has led her to conclude that WOLA and other organizations "are dealing with protecting the left, not protecting human rights."

CISPES' Strategy: Lies and Deception for Salvadoran Left

(By Bill Outlaw)

In "The Network" of organizations that are engaged in a massive effort to turn opinion against U.S. policies toward Central America, CISPES is one of the more active and visible.

"CISPES has launched a national grassroots canvassing effort to reach hundreds of thousands of people in their communities and bring many new people into active opposition," according to a CISPES report.

But CISPES appears to be much more than just another "grass-roots" organization disagreeing with specific administration policies.

Documents obtained by The Washington Times and CISPES own publications reveal that the organization openly supports the Marxist Sandinista guerrillas (FMLN-FDR) in El Salvador and elsewhere in Central America.

Moreover, documents indicate that CISPES was itself a creation of the FMLN-FDR and was, among other things, designed to generate support for guerrilla activity in El Salvador among members of the U.S. Congress and the American public.

CISPES organizers in Washington did not return several telephone calls from The Times for comment. But one researcher reports that CISPES officials have denied the allegations.

An integral component of CISPES activity is to counter Reagan administration policies in Central America.

"Stop U.S. Military Intervention in Central America," reads a headline on the front

page of CISPES' April issue of Alert. "Support human freedom and dignity by also ending intervention in the Caribbean, Middle East, Asia, the Pacific and Europe."

Administration officials and observers of the group say CISPES is the largest and most effective of the solidarity organizations, which include the National Network in Solidarity with the People of Nicaragua, the Network in Solidarity with the People of Guatemala and the Network in Solidarity with the People of Central America.

Solidarity groups exist for other regions as well, such as for the people of Vietnam, Laos and Cambodia.

CISPES offices in Washington are located on the seventh floor at 930 F St. NW, next to the office for the Guatemalan solidarity group. The Nicaraguan solidarity group used to be located there, but they have moved to a nearby location on I Street NW.

Observers of the organizations report that they often appear together at protests and demonstrations. However, there is no specific evidence to link these groups.

CISPES' own literature claims that the organization has grown to more than 300 local chapters and affiliates, with seven regional offices.

Each local chapter "includes a series of outreach groups oriented toward the religious community, organized labor, schools, and other community groups and organizations," a CISPES brochure distributed in 1984 states.

CISPES literature further states that it "lobbies Congress, coordinates protest efforts, and conducts humanitarian aid campaigns."

"CISPES activities include fund raising and legislative campaigns, educational and outreach programs, and mass mobilizations, conducted on national regional and local grassroots levels" according to Alert.

CISPES has taken part in or has helped organize many of the major protest demonstrations in the United States over the past few years. Its most recent efforts will be seen in the upcoming "Four Days In April" protest in Washington scheduled for April 19–22.

According to a CISPES document entitled, "CISPES Structure and Funding," other major activities in which the group has organized or participated in include:

A "massive demonstration" in Washington on March 27, 1982, that was timed to coincide with "the U.S. orchestrated elections" in El Salvador.

A "people-to-people" aid drive to provide medical assistance to Salvadorans "living in the FMLN-FDR zones of control. Through hundreds of grass-roots fund-raising activities, CISPES committees raised more than $150,000, surpassing the goal of the campaign."

"Highly visible protest actions including civil disobedience" at Fort Benning, Ga., and Fort Bragg, N.C., where Salvadoran troops were being trained by U.S. soldiers.

A rally at the State Department to protest the "presidential certification amid growing human rights violations in El Salvador."

A protest at the Honduran embassy and consulates in major cities to oppose "Honduran intervention in El Salvador and the growing use of Honduras as a base of U.S. directed military operations in the region."

CISPES and some other solidarity groups have also promoted letterwriting campaigns about U.S. policy to members of Congress and to U.S. officials in other parts of the world, according to CISPES literature and other sources.

According to Greg Lagana, who was a press attache at the U.S. embassy in El Salvador from 1982 to 1984, the embassy received hundreds of form letters and telephone calls from U.S. citizens during the time he was there.

These calls and letters were protesting alleged atrocities committed by the U.S.-backed government, Mr. Lagana said.

Mr. Lagana said he could not prove the telephone calls or letters were encouraged by CISPES or an affiliated group, but he said the embassy received calls about alleged atrocities involving labor unions members in El Salvador from some labor unions in the United States. Telephone calls concerning teachers in El Salvador came from some teachers in the United States, and calls about health care came from some health care solidarity groups.

But what disturbed Mr. Lagana the most, he said, was that the information the U.S. citizens were commenting on was frequently wrong or misleading at best.

As an example, he said some human rights groups in El Salvador who were known to be sympathetic to the Sandinistas would put out information that civilians had been killed in guerrilla skirmishes with government troops when what really happened was that some guerrillas themselves had been killed. But calls would come pouring in anyway to the U.S. embassy from Americans complaining about civilian atrocities committed by government troops.

Quite often Mr. Lagana said, the complaints were form letters which contained a "central Spanish syntax that a native speaker of English would not use. That led me to conclude they were being written in Salvador," Mr. Lagana said.

CISPES activities on college campuses were well organized three or four years ago, said a trade union official who frequently spoke at various colleges nationwide.

According to an article published by Inter Press Service in New York on Dec. 3, 1984, CISPES "has also been visited by FBI agents and many of its 10,000 members have been questioned."

Inter Press also stated that the group "has also been infiltrated by FBI officials," citing an alleged "FBI internal document that CISPES lawyers obtained under the Freedom of Information Act."

A story in this month's Alert, CISPES' monthly publication, outlines what they call a recent case "involving the FBI's seizure of a personal address book and diary" of Ed Hasse, as he was returning home from a trip to Nicaragua. Mr. Hasse works for the National Network in Solidarity with The Nicaraguan People, the report said.

A spokesman for the FBI said yesterday, "The FBI does not expand on documents that have been released under the Freedom of Information Act. They stand by themselves.

Regarding Mr. Hasse's claim, "it is before the courts and it would be inappropriate to comment," the spokesman said.

The Fund for a Conservative Majority (FCM), in November filed a letter of complaint against CISPES to the Federal Election Commission. The FCM alleged that CISPES "apparently violated the provisions of [the law] in making expenditures for the purpose of financing communications which expressly advocate the defeat of Ronald Reagan."

An Associated Press report quoted Van Gosse, a national student organizer for CISPES, as saying. "We have taken an explicit position that we have not endorsed any presidential candidate * * *."

A spokesman on behalf of the FCM said they have not heard back from the FEC regarding their complaint.

"They were on every campus [he went to], they provided speakers, they had their membership at the meetings with banners who would heckle speakers with opposing points of view," the official said.

He added that the harassment often was so great that many of the meetings were disrupted. But the official added that recently, "they lost their punch."

"Meetings are orderly now, and while the college audiences may not be sympathetic, they will listen," the official said.

He said he has noticed a decline in CISPES activities on college campuses recently—a decline he attributes to Salvadoran President Jose Napoleon Duarte's victory in the elections.

Nonetheless, CISPES remains active in other areas, and its activities have not gone unnoticed by others.

The Committee Strategy Proposal obtained by The Washington Times states that the group had established the following goals for 1984:

"1. Impede the escalation of U.S. intervention in Central America by (a) making the political costs of a full-scale, direct intervention too high; (b) obstructing the step-by-step escalation of U.S. Intervention in Central America.

"2. Provide political and material support to the FMLN-FDR of El Salvador; and

"3. Defend the Sandinista reputation.

"Our defense of the Sandinista revolution will directly contribute to the Nicaraguan people's efforts to consolidate their revolution," the document states. "It will also undermine Reagan's attempts to build a 'strategic consensus' in the U.S. for intervention in all of Central America."

Other CISPES literature describes its "public projection strategies (propaganda)" for 1984:

"Portray each stage of U.S. intervention as a step toward a Vietnam war. Project the urgency of stopping intervention.

"Project an emerging 'Vietnam war-type' movement.

"Project Reagan as a warmonger and his policies as a threat to world peace.

"Refocus concern on the issues of human rights and democracy in Central America.

"Project the advances being made by the people of Central America, particularly in Nicaragua and the FMLN-FDR zones of control."

Some critics raise questions about CISPES' origins.

According to independent research studies and documents released by the State Department, CISPES was formed in 1980 as a result of an organizational tour by an agent for the Salvadoran FMLN guerrillas.

In February and March 1980, a Farid Handal traveled to the United States for the purpose of "the creation of the International Committee in Solidarity with the People of El Salvador," according to a report he made after the trip.

A copy of the report was obtained by Salvadoran military officials after a raid on a guerrilla location in El Salvador, according to the State Department, which subsequently released the report and a translation.

Mr. Handal's purpose in coming to the United States was to "coordinate" activities among the already-existing "solidarity committees," including non-communist, political, religious and human rights groups, in order to form a nationwide umbrella organization in support of the FMLN-FDR "with

the help of the CPUSA [Communist Party USA]," according to the documents.

According to his report, Mr. Handal stated, ". . . the offices of Congressman Dellums were turned into our offices. Everything was done there."

Mr. Handal also met with other congressmen in Washington and with officials from the Cuban Mission to the United Nations in New York, he wrote.

The Communist Party USA (CPUSA) and the United States Peace Council (USPC) were both instrumental in aiding Mr. Handal in his efforts to form a solidarity committee, he wrote.

* * * the Directorate of the CPUSA, among them "the person responsible for the U.S. Peace Council," according to the documents.

That individual was Sandy Pollack, who Mr. Handal identified as the "solidarity coordinator for the U.S. Peace Council."

"Sandy proposed a national conference under the auspices of the US Peace Council, the National Council of Churches, Amnesty International, WOLA, and various important unions of the US," Mr. Handal wrote.

"The objective of the conference would be to establish a support mechanism for the solidarity committees in those states where it does not already exist," he wrote.

Ms. Pollack died in a plane crash on a flight from Cuba to Nicaragua last January.

An FBI report released in 1982 entitled "Soviet Active Measures," states that at the time of Mr. Handal's trip to the United States, the FMLN was setting up a political front in Mexico City.

In June 1980, Salvadoran leftists created the United Revolutionary Directorate (DRU), the central political and military planning and tasking operation for the insurgents, the report states.

Mike Waller, an analyst and coauthor of a soon-to-be published book on "The Revolution Lobby," said that CISPES has engaged in "a massive effort to oppose Reagan administration policies."

They "called for the establishment of 'solidarity committees'" worldwide "to serve as propaganda outlets, conduits for aid, and organizers of solidarity meetings and demonstrations," Mr. Waller wrote. The first solidarity committee was CISPES, he said.

On March 13, 1980, FMLN Radio Venceremos in El Salvador reported: "We have organized a large solidarity apparatus that encompasses the whole planet, even in the United States, where one of the most active centers of solidarity exists."

CISPES leaders have denied that the group was founded or influenced by the FMLN, according to Mr. Waller.

Some CISPES critics charge that the group's activities should require them to register as an agent of a foreign government under the Foreign Agents Registration Act.

The Foreign Agents Registration Act requires that organizations in the United States which are acting on behalf of foreign powers to register as agents and make reports identifying their lobbying activities, expenditures and literature it distributes.

According to officials, it may be difficult to investigate groups to determine whether or not they should come under the act. And proving that an organization is acting on behalf of a foreign power is often difficult, according to officials.

Joel Lisker, who was in charge of enforcing the Foreign Agents Registration Act for the Justice Department, said the law needs to be "* * * authority akin to administrative subpoena power," Mr. Lisker said. He is now staff director for the Senate Subcommittee on Security and Terrorism.

According to another official, it is difficult for the Justice Department to collect information about organizations unless the groups cooperate or unless the Justice Department has "probable cause" to seek grand jury action or request an FBI investigation.

"CISPES' objective is a guerrilla victory in El Salvador by the [guerrillas]," said Sam Dickens, Latin American expert for the American Security Council Foundation. "In fact," he said, "it's the propaganda arm of the FDR in the U.S.

Without any question they should be registered under the Foreign Agents Registration Act," Mr. Dickens said. "I'm greatly disturbed that they have not—to my knowledge—been investigated by the FBI."

□ 1120

REAGANISTAS VERSUS COMMUNISTAS

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DORNAN of California. Mr. Speaker, let justice be done. Please seat Rick McIntyre.

Mr. Speaker, we are entering into one of those extremely tense periods in the history of our Congress where there is going to be copious impassioned oratory on this House floor about the President's foreign policy in Central America. Yesterday one of your leaders on the majority side of the aisle, Mr. Speaker, referred to the Contra democratic resistance freedom fighters as "Reaganistas." Has a certain ring to it, doesn't it? One of the distinguished Members of my side of the aisle with a bicultural Hispanic background remarked later, "I rather like the sound of that, 'Reaganistas.' Yes, the Reaganistas versus the 'Communistas.'" I'll accept that characterization.

Well, if that is the way this debate unfolds next week, Mr. Speaker, so be it.

However, in the interests of collegiality and fair play, I would like to say, Mr. Speaker, "en garde" to you and your team opposing the foreign policy of the President of the United States.

As a great American, and I have referred to you more than once in that manner on this House floor, prepare to hear the words of one of your heros, President John F. Kennedy, repeated over and over and over again on my side of the aisle in the debate next week. Because it is the Kennedy doctrine, I and others will be espousing and defending here in the debate on aid to the Nicaraguan resistance.

I stand before you as a proud Republican who repeats again what I have told you before, that the best Presidential speech I have ever heard in my life was the inauguration address of young President John F. Kennedy on a biting cold January in 1961. In that magnificent rallying call for freedom, President Kennedy laid it on the line. His words ring down through the decades as true and relevant as the day he spoke them.

Mr. Speaker, the Communists are in control of the Government in Managua. You and your leadership team are on the wrong side again.

Here is the recently declassified series of minibios on the nine Commandantes, study them. Please. And support your President.

I repeat what was told to me by Commando Eden Pastora, the number one original Sandinistas' combatant, the hero of the July 19, 1979, revolutionary takeover of Managua. Pastora maintains that "not one of the nine ever heard a shot in combat against Samoza." Of course they did rob banks a decade earlier. Bank robbing is hardly to be compared with military combat. Bank guards, while sometimes armed, are not comparable to trained soldiers.

I submit for the RECORD the bios of the Managua Communistas. I chose support to the Reaganistas, those who serve with the Democratic resistance forces.

The material is as follows:

JOSÉ DANIEL ORTEGA (PHONETIC: OR TAY GA)

President (since January 1985).

Addressed as: Comandante Ortega.

Elected President of Nicaragua in November 1984, Daniel Ortega continues to be a member of the nine-man National Directorate of the Sandinista National Liberation Front (FSLN), which was formed in 1979. During 1981–84 he also served as Coordinator of the Junta of the Government of National Reconstruction, a post which gained him at least de facto recognition as chief of state. He is a committed Marxist-Leninist, who often appears to view the world almost solely in terms of his own political beliefs. He announced in a June 1984 interview that his government was holding elections "in order to go beyond the notions of traditional bourgeois democracy" and "to consolidate the revolutionary government."

Ortega has been particularly acerbic in his criticism of President Ronald Reagan, calling him a witch hunter and a McCarthyite. He has also accused the Reagan administration of seeking to "Vietnamize" Central America. In addition, he has praised the aid Nicaragua receives from Cuba and the Soviet Union.

Ortega, 39, comes from a family that was heavily involved in the guerrilla war to topple the Somoza regime. His brother, Humberto, is a member of the FSLN National Directorate, Minister of Defense, and Commander in Chief of the Sandinista People's Army. A third brother, Camilo, was killed during the anti-Somoza insurrection. During the early 1960's Daniel was a member of the leftist Revolutionary Student Front. He joined the FSLN in the mid-1960s and was arrested in 1967 for robbing a bank. In late 1974, after FSLN negotiations with the government to exchange several prominent Nicaraguans held hostage by the FSLN, Ortega was released and went into self-imposed exile in Cuba. Because he was a leader of the insurrection that toppled the

Somoza government, Ortega holds the honorary rank of comandante de la revolución (commander of the revolution). The Ortega brothers lead the Tercerista Faction of the FSLN. Ortega is married and has at least three children.

JAIME STANLEY WHEELOCK ROMÁN (PHONETIC: WEELOKE)

Minister of Agrarian Reform and of Agricultural and Cattle Development.

Addressed as: Mr. Minister.

Jaime Wheelock has been Minister of Agrarian Reform since July 1979 and of Agricultural and Cattle Development since December 1979. In addition, he has been a member of the nine-man National Directorate, the decisionmaking body of the Sandinista National Liberation Front (FSLN), since March 1979. He is also a member of the newly created (January 1985) National Planning Council, which drafts economic guidelines for the directorate. He holds two party positions: coordinator of the State Committee and member of the Political Committee. Wheelock is often described in the press as the least ideological of the directorate members, but he was quoted in a 1983 interview as saying, "When Lenin led the Bolsheviks to the seizure of power . . . socialism triumphed. . . . The Soviet Union . . . has helped the revolutions on all continents, particularly in small countries, to have their path better cleared."

Wheelock has stated that the appointment of a member of the FSLN National Directorate to the Agrarian Reform portfolio demonstrates the importance of agriculture and the peasants to the Sandinista leaders. After the FSLN came to power, the Agrarian Reform Ministry announced a program in which land ownership would take one of three forms: large-scale production state farms, agricultural cooperatives, and individually owned plots. Wheelock's 1983 agrarian reform program has not been able to make improvements in Nicaragua's agricultural output.

Wheelock has visited numerous countries, including Costa Rica, the United States, and Libya, on behalf of the Government of National Reconstruction and the FSLN. He has accused the United States of attempting to isolate Nicaragua economically, subjugating the Costa Rican Government, turning Honduras into a fascist-like state, and intervening in El Salvador.

Wheelock comes from a wealthy family. He is a former law professor. According to press reports, he was accused of killing a National Guard officer in 1970. He subsequently fled to Chile, where he studied agricultural law. In 1973, he returned to Nicaragua, where he remained underground until emerging as a guerrilla commander during the civil war against President Anastasio Somoza in the late 1970s. He is a leading member of the Proletariat Faction of the FSLN. Because he was a leader of the insurrection that toppled the Somoza government, Wheelock holds the honorary rank of *comandante de la revolución* (commander of the revolution).

Wheelock, 37, has written two political monographs. He is married to the former Vanesa Castro Cardenal, who is a member of the Sandinista Assembly and the State Committee. She is related to Minister of Culture Ernesto Cardenal.

CARLOS NUNEZ TELLEZ (PHONETIC: NOONYEHS)

President, National Assembly (since January 1985).

Addressed as: Mr. President.

Carlos Nunez has been a member of the nine-man National Directorate of the Sandinista National Liberation Front (FSLN) since 1979. He has actually headed Nicaragua's legislature since 1979, when he became President of the Council of State (the legislature during 1979-84). Nunez has a reputation as a political lightweight who follows the lead of others. Under his guidance, the National Assembly has become little more than a rubberstamp. It is charged with writing a new constitution and passing laws; however, no bill reaches the floor without Nunez approval, and no bills pass without the consent of the FSLN majority in the Assembly. Nunez is also head of the Propaganda and Political Education Department of the FSLN and takes a frequent hand in the direction of the official FSLN daily newspaper, Barricada. He is unimaginative, however, and often falls back on dogmatic rhetoric. Nunez has publicly accused the United States of destabilizing Central America.

Nunez has been described in the press as an experienced guerrilla. Because he was a leader of the insurrection that brought the FSLN to power, he holds the honorary rank of commandante de le revolucion (commander of the revolution). He is a member of the Proletariat Faction of the FSLN. Since 1979 he has traveled to the Soviet Union, Cuba, the United States, and Eastern and Western Europe on behalf of the FSLN.

Nunez, 33, is married to the daughter of Central Bank President Joaquin Cuadra Chamorro and is the brother-in-law of Army Chief of Staff Joaquin Cuadra Lacayo. Two of his brother and a sister hold high-level government or party positions.

HENRY ILDEFONSO RUIZ HERNÁNDEZ (PHONETIC: ROOEES)

Minister of Foreign Cooperation (since January 1985).

Addressed as: Mr. Minister.

Henry Ruíz has been a member of the National Directorate, the decisionmaking body of the Sandinista National Liberation Front (FSLN), since March 1979 and a member of the State Committee of the FSLN since September 1980. As Minister of Foreign Cooperation, he is responsible for developing foreign trade and dealing with international trade organizations. He is also an important member of the National Planning Council, a Cabinet committee that provides the nine-man directorate with economic policy guidelines and suggestions. He served during 1979-84 as Minister of Planning and was responsible for formulating and implementing Nicaraguan economic policies. Many times Ruíz has denounced what he calls US economic aggression against Nicaragua. During the past six years he has traveled extensively in Soviet Bloc countries to gain economic and political support for the Sandinista government.

Ruíz received his early education in Nicaragua, where he won awards as best student in several schools. In the late 1960s he studied for a year in Moscow at Patrice Lumumba University on a scholarship from the Nicaraguan Socialist Party. Upon his return to Nicaragua, he joined the FSLN's armed struggle against President Anastasio Somoza Debayle. In late 1967 Ruíz was sent to Cuba for six months of training. Before the FSLN takeover in 1979, he spent much of his time in the mountains of northern Nicaragua. Because he was a guerrilla leader in the insurrection that brought the FSLN to power, Ruíz holds the honorary rank of commandante de la revolución (commander of the revolution). He is a member of Tomás Borge's Prolonged Popular War Faction of the FSLN.

Ruíz is 41 years old.

BAYARDO ARCE CASTAÑO (PHONETIC: ARSAY)

Member, National Directorate, Sandinista National Liberation Front (since March 1979).

Addressed as: Comandante Arce.

Former journalist and professor Bayardo Arce is one of the most hard line of the nine members of the National Directorate of the Sandinista National Liberation Front (FSLN). From May until September 1980 he was President of the State Council, and he has served since September 1980 as coordinator of the FSLN Political Committee and its National Secretariat. Since the FSLN came to power in July 1979, Arce has consistently manifested hostility toward the United States in his public statements. He has accused this country of having warlike intentions toward Nicaragua and of being the main cause of his country's economic problems. In a May 1984 address to leaders of the Moscow-line Nicaraguan Socialist Party on the basic goals of the Sandinista leadership, he affirmed that "Sandinism is . . . Marxism" and explained that "we have not, [however], declared this publicly and officially" because "our strategic allies tell us not to declare ourselves Marxist-Leninist, not to declare socialism."

Acre holds a degree in journalism from the National Autonomous University of Nicaragua. During his student days there he worked for two years (1968-70) as a reporter for the opposition daily *La Prensa* and served as vice president (1969-70) of the student governing body. He first became involved with the FSLN in 1971, when he was a member of the Revolutionary Student Front, a Communist group affiliated with the Sandinistas. Arce travels to Cuba frequently, and he has represented the FSLN at meetings of the Socialist International. Because he was a guerrilla leader in the insurrection that brought the FSLN to power, he holds the honorary rank of *comandante de la revolución* (commander of the revolution). He is a member of Tomás Borge's Prolonged Popular War Faction of the FSLN.

Arce, who is about 35, is married and has children.

HUMBERTO ORTEGA SAAVEDRA (PHONETIC: ORTAYGA)

Commander in Chief, Sandinista, People's Army; Minister of Defense.

Addressed as: Mr. Minister.

In addition to serving as Commander in Chief of the Sandinista People's Army (since August 1979) and as Minister of Defense (since December 1979), Humberto Ortega has been Commander of the Sandinista People's Militia since July 1981. He has also been a member of the National Directorate, the decisionmaking body of the Sandinista National Liberation Front (FSLN), since March 1979. He serves as coordinator of the Defense and Security Committee of the FSLN and is a member of the party's Political Committee. He has traveled to various countries, including Cuba, the USSR, and Vietnam, to establish military supply and training relationships. In a well-publicized speech in 1981 Ortega equated Sandinism with Marxism-Leninism. US Drug Enforcement Agency investigations during 1983-84 indicated that Ortega was aware that drugs were being illegally transported through Nicaragua.

According to the press, Ortega has said that his country's military buildup is the result of mounting internal and external counterrevolutionary threats. As Defense Minister, he has stressed that strengthening

defense in the face of what he calls US aggression is the first priority of the revolution. In statements in the spring of 1983, he threatened the Honduran Government with internal reprisals from Honduran leftists if it continued to support the anti-Sandinista forces. He has threatened to hang members of the opposition from lamp posts in the event of any armed intervention in his country. According to a September 1983 New York magazine article, Ortega implied that he would be willing to spread the revolution in Central America. He stated, "Of course we are not ashamed to be helping El Salvador. We would like to help all revolutions."

The son of revolutionaries, Ortega became active at an early age in a student movement dedicated to overthrowing President Anastasio Somoza Debayle. He joined the FSLN in the mid-1960s, and by 1972 he had become one of its leaders. His revolutionary activities have included participation in a 1966 assassination attempt against Somoza and a 1969 attempt to free from a Costa Rican jail FSLN founder and leader Carlos Fonseca (who was killed in 1976). During the rescue attempt, Ortega was wounded and taken prisoner; he lost the use of his right hand and has only partial use of his left hand. He is widely known as the principal stategist of the insurrection that overthrew Somoza in July 1979. Because he was a leader of that insurrection, he holds the honorary rank of commandante de la revolución (commander of the revolution). He is a leader of the Tercerista Faction of the FSLN.

During the past several years, Ortega has visited Vietnam, Cambodia, Laos, Cuba, the USSR, Algeria, and countries in Eastern Europe. He is about 43 years old. He is married. His brother Daniel is President of Nicaragua and also serves on the FSLN National Directorate. Another brother, Camilo, was killed in a battle with Somoza's National Guard.

LUIS CARRION CRUZ (PHONETIC: CAHREEOHN)

Member, National Directorate, Sandinista National Liberation Front (since March 1979).

Addressed as: Comandante Carrión.

Luis Carrión has been a member of the National Directorate, the decisionmaking body of the Sandinista National Liberation Front (FSLN), since its inception in March 1979. Press reports indicate that he has sometimes been the directorate's spokesman in dialogues with non-Sandinista groups in the country. Since late 1984 he has been involved in talks about cease-fire proposals with Indian opposition leader Brooklyn Rivera. He has also served since April 1980 as Vice Minister of Interior and has Cabinet rank. Carrión has publicly criticized US policy toward Central America, especially this country's military support to Honduras. In a speech in February 1982 he repeated charges that the US Government had a $19 million plan to destabilize Nicaragua, and he linked the plan to a bombing that month at Sandino Airport. In an interview published the following July, he stated that "The war with the counterrevolutionaries" had begun. He blamed the increase in counterrevolutionary operations in his country on activities of the US Government, Latin American mercenaries, and the Honduran military.

Carrión is the son of a businessman and banker. He was active in FSLN activities at the National Autonomous University of Nicaragua during the late 1960s. In 1970 he joined a rural guerrilla command. He became vice commander of the Sandinista People's Army in August 1979. He is a member of the Proletariat Faction of the FSLN. During December 1979-April 1980 he was Vice Minister of Defense. Because he was a leader of the insurrection that brought the FLSN to power, he holds the honorary rank of commandante de la revolución (commander of the revolution).

Carrión, who is about 33, is married to the former Patricia Lacayo. A brother, Carlos, is the national coordinator of the 19 July Sandinista Youth. A sister, Gloria, is a former secretary general of the Sandinista Women's Organization. A cousin, Javier, is a commander in the Sandinista Popular Army.

VÍCTOR TIRADO LÓPEZ (PHONETIC: TEERAHDAH)

Member, National Directorate, Sandinista National Liberation Front (since March 1979).

Addressed as: Comandante Tirado.

As a member of the nine-man National Directorate, Víctor Tirado belongs to the decisionmaking body of the Sandinista National Liberation Front (FSLN). In a reorganization of the FSLN in September 1980, Tirado, who has served as a member of the Executive Commission of the FSLN National Directorate and as chairman of the State Committee of the FSLN National Secretariat, was transferred to the Department of Organization and Mass Work and placed in charge of labor activities. During February-September 1980 he also served as coordinator of the State and Military Commissions of the National Directorate. At the opening session of a seminar on Marxist political economy in Managua in February 1983, Tirado discussed the links between Marxism and the Sandinista revolution. He affirmed that Marxism was the basic component of the ideology of the revolution and said that without both Sandino and Marx, the revolution would not have been possible.

Tirado has frequently criticized the policies of the United States. In January 1985 he stated that "Reagan's policy is not eternal. It will collapse any time because it represents a mistake, not only for the United States but for the world capitalist system . . . the imperialist policy toward Nicaragua and other backward countries is a terrorist policy aimed at destroying our economic independence through financial embargoes or military aggression. In a speech in February 1982, Tirado accused the US Government of complicity in a bomb explosion in Sandino Airport that month.

Tirado was born in Rosario, Mexico. He first came in contact with Nicaraguan Sandinistas in Mexico in 1961 and has participated in FSLN activities since then. He was a friend and companion of FSLN founder Carlos Fonseca Amador, who was killed in 1976. According to the Mexican press, Tirado was a member of the Communist Party of Mexico during the early and mid-1960s. Other press reports state that he participated in guerrilla activities in northern Nicaragua throughout the 1970s and for a long time lived and worked with the peasants in that area. Because he was a leader of the insurrection that brought the Sandinistas to power, he holds the honorary rank of comandante de la revolución (Commander of the revolution). Moreover, the Nicaraguan Government of National Reconstruction granted him citizenship in September 1979 in recognition of his important role in the revolution. He is a member of the Tercerista Faction of the FSLN. Since the FSLN came to power, Tirado, 45, has visited Algeria, Czechoslovakia, Cuba, Syria, Poland, East Germany, Vietnam, and the United States.

TOMÁS BORGE MARTÍNEZ (PHONETIC: BORHAY)

Minister of Interior (since July 1979).

Addressed as: Mr. Minister.

Tomás Borge is the last surviving member of the trio that founded the Sandinista National Liberation Front (FSLN) in 1961. He serves as a member of its National Directorate, a nine-man group that plans and directs the party's activities. As Interior Minister, he is in charge of the police and internal security apparatus. He often uses the police to intimidate and control dissenters. Borge also serves on the Defense and Security Committee of the FSLN and is assistant commander in chief (the third highest post) of the Sandinista People's Army. He is dedicated to Marxism-Leninism and to the FSLN's commitment to establishing a Communist political and economic order in Nicaragua, closely aligned with the Soviet Union and Cuba. In a Playboy interview in September 1983 he stated: "I told [my mother] that I would not be blackmailed by her gentleness and her naivete and that I was a Communist." He has stated that a mixed economy can exist in Nicaragua only in the context of the revolution, "where social criteria predominate over the individual's wishes." In an interview in Le Monde Diplomatique in September 1984, he stated: "There cannot be a mixed economy here identical to the one in Venezuela or a political pluralism identical to Mexico's . . . we are Marxists."

As Minister of Interior, Borge has defended his government's human rights policies and has stated that police abuses will be corrected. In addition, he has criticized the Nicaraguan private sector, claiming that businessmen were guilty of "genocide" against the common man and responsible for the social and cultural backwardness of the people. He has further criticized political activism in the private sector. Borge has been critical of US policy toward Central America, claiming, for example, that the administration of President Ronald Reagan has used the possible threat of the installation of Soviet missiles in Nicaragua to justify giving US military aid to Honduras, El Salvador, and Nicaragua anti-Sandinistas. US Drug Enforcement Agency investigations in 1983-84 implicated a Nicaraguan who reportedly had close ties to Borge in narcotics trafficking.

Borge studied law at the National University of León. He was jailed from 1956 until 1958 for student activism. Imprisoned again in 1976, he was released and flown to Panama in August 1978 as one of a group of FSLN prisoners exchanged for more than 1,000 hostages held by the Sandinistas in Managua's National Palace. Borge is the leader of the Popular Prolonged War (GPP) faction of the FSLN. During the struggle against President Anastasio Somoza in the 1970s, the GPP attracted a following of students and other youths who declared their belief in Cuban-style guerrilla warfare as a way to overthrow the regime. Because he was a leader of the insurrection against Somoza, he holds the honorary rank of comandante de la revolución (commander of the revolution).

Borge, 55, has been married at least twice. A wife was murdered by the Nicaraguan National Guard in July 1979.

PROPOSED ELIMINATION OF TERRITORIAL EXEMPTION

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. DE LUGO. I thank the Speaker.

Mr. Speaker, we are a great nation, but sometimes we can do some unwise things.

I received in my office yesterday an excellent letter from my good friend, JAIME FUSTER, the distinguished Resident Commissioner of Puerto Rico. Copies of this letter with the attachment were sent to all Members of Congress. I want to urge all Members of the House to take a moment to read the letter from the Resident Commissioner and the attachment, an article which appeared in the Wall Street Journal on April 11 of this year, written by Norman Ture, who, from 1981 to 1982, was the Under Secretary of Tax and Economic Affairs in the Department of the Treasury.

The Commonwealth of Puerto Rico is an American success story in the highly volatile and important Caribbean. The success came about through "Operation Bootstrap" which is based on section 936 of the Tax Code, the so-called territorial exemption.

Now, under the Treasury tax simplification proposal, they want to do away with section 936. This section 936 provision is the basis of an American success story, the transformation of a poverty-stricken island in the Caribbean into a prosperous island community that all Americans can be proud of. I hope that my friends will read this letter and think very carefully before taking action which could be disastrous for Puerto Rico and extremely harmful to the best interest of our country.

HOUSE OF REPRESENTATIVES,
Washington, DC, April 15, 1985.

DEAR COLLEAGUE: The Congress may soon be faced with some hard choices regarding tax simplification measures. One of them, a matter of vital importance to the 3.5 million American citizens of Puerto Rico which I represent, is the elimination of Section 936 of the IRS Code, better known as the "territorial exemption" slated for extinction by the U.S. Department of the Treasury.

Needless to say the people and Government of Puerto Rico are opposed to that proposal which would substantially escalate the already dismal unemployment situation in the island, officially estimated at 23% of the labor force right now. The repeal of Section 936 will cause severe economic and social hardships in Puerto Rico while producing no appreciable revenue gains and a significant net revenue loss for the U.S. Treasury. It would also undermine the United States security interests in the political stability of the Caribbean region and place an onerous strain on U.S.-P.R. relations. Both Puerto Rico and the United States have a big stake in forestalling the economic chaos that could ensue in an island proud of its long term association with the United States.

Norman Ture has contributed an enlightening article to the debate on Section 936 entitled "Treasury Prepares a Caribbean Austerity Initiative" published in *The Wall Street Journal* of April 11, 1985. I share it with you on the reverse of this letter in the hope that you will agree with us that the elimination of Section 936 from the Tax Code would be untimely, very detrimental to the U.S., and, as Ture says:". . . repealing a useful tax provision is hardly the best way to simplify it. . . ."

Cordially,

JAIME B. FUSTER,
Member of Congress.

[From the Wall Street Journal, Apr. 11, 1985]

TREASURY PREPARES A CARIBBEAN AUSTERITY INITIATIVE

(By Norman B. Ture)

A Treasury Department official once calculated on the back of an envelope what the "cost" was of not applying the corporate income tax to Puerto Rican subsidiaries of mainland corporations. It went like this: You figure out what the corporations would pay if they had to pay the tax and, of course, nothing else changed. You assume, that is, that the plant would still be in Puerto Rico, or at least in territory subject to U.S. taxes. Then you divide this number by the number of Puerto Ricans on the payrolls of these plants. You find that it's "cheaper" to give the Puerto Ricans more food stamps.

Ever since this idiot calculation was first made, the Internal Revenue Service has been gunning for Section 936 of the IRS code, the possessions corporation tax credit.

Under this provision, affiliates of U.S. mainland companies engaged in business in a U.S. possession, chiefly in Puerto Rico, may claim a credit against their federal income-tax liabilities with respect to the income produced by these affiliates in the possession. Coupled with the tax holidays granted by Puerto Rico under Operation Bootstrap, qualifying possessions corporations are substantially free of Income tax on their possessions source income. The Treasury Department's tax-reform proposal wants to repeal the Section 936 tax credit because it believes that the current possessions corporations tax system is complex, expensive and inefficient.

The complexity in the possessions corporations provision is, of course, primarily of the Treasury's own making. Treasury is to be commended for acknowledging this complexity, but repealing a useful tax provision is hardly the best way to simplify it. The charge that the credit is expensive and ineffective is based on the Treasury's gross overestimate of the tax revenue it forgoes because of the credit and an equally gross underestimate of the number of jobs that result from the operations of possession corporations in response to the Section 936 credit.

The Treasury Department, not willing to give the Puerto Ricans cold turkey, acknowledges that repeal of the credit will cause disruptions in the possessions, particularly in Puerto Rico. It proposes, therefore, to replace the present Section 936 credit with a "wage credit" that, it asserts, will be more cost-effective.

The Treasury Department is wrong.

The so-called wage credit would be a fixed dollar amount per hour worked by all people employed in the possession by an establishment engaged in manufacturing. This amount would be 60% of the minimum wage applicable to such employees in the first year—1987, decreasing by 10% a year beginning in 1993 until it is completely phased out in 1998. The credit would apply against the federal income-tax liability on the possession source profits of the company. For this reason, it is obviously wrong to treat the wage credit as a subsidy for employment. The credit would reduce the tax on profits, not on wages. It would, therefore, reduce the cost of using capital, although not to anywhere near the same extent as the present credit. It would not reduce the cost of labor.

The proposed wage credit is nothing more than a severe cutback in the existing Section 936 credit. As such, it would do little to reduce complexity, and it certainly would not be more effective in promoting employment. And unless one relies on the Treasury's implicit assumption of inert, non-responsive taxpayers, it won't produce any of the revenue gains so extravagantly estimated by the Treasury Department.

Far more is at stake than merely the tax purity, tidiness or revenue gains that the Treasury presumably is seeking by repeal of Section 936. The combination of Puerto Rican tax holidays and the Section 936 tax exemptions induced a flood of new business investment and business ventures into Puerto Rico from 1948 until the mid-1970s. The resulting expansion of production, employment and income transformed the Puerto Rican economy from a dismally unproductive agricultural society into a highly advanced industrial economy. It has made the Puerto Rican economy the model for economic development and growth orginating in the private sector.

When the Reagan administration was seeking to develop a Caribbean Basin Initiative emphasizing the private sector's responsibility for development and growth generating activity, it could have done no better than to implement a Section 936 approach. Instead, the Treasury successfully pushed for highly punitive limitations on Section 936 that were included in the 1982 tax increase. The Puerto Rican economy, which had been faltering since the late 1970s as a result of IRS efforts to cancel the tax exemption afforded by Section 936, was stunned; it has yet to share in the mainland's economic recovery. Repeal of Section 936 as the Treasury proposes would be a devastating blow to the island's economy and might well send it tumbing back toward its pre-1948 status as the poorhouse of the Caribbean.

Even if the Treasury and Congress were to be unconcerned about these economic consequences, they would have to be concerned about the enormous increases in relief outlays of various sorts that the federal government would have to make attempt to relieve the Puerto Ricans' economic distress. The results would be a significantly greater fiscal burden on the federal government and a far poorer, less productive Puerto Rico in which the unemployment rate would attain unthinkable levels.

As serious as these distressing outcomes would be, they do not tell the entire story. The geopolitical consequences of pulling the rug out from under the Puerto Rican economy should be recognized. Only the most naive believer in the beneficent intentions of Fidel Castro would believe that a Puerto Rico in economic collapse would not entice Cuba to try to foment revolution on the island.

For the Treasury and Congress to consider repealing Section 936 without providing

equally effective incentives would not only be unfair but would utterly erode the credibility of U.S. efforts to promote economic development and progress throughout the Caribbean and Latin America.

(Mr. Ture is president of the Institute for Research on the Economics of Taxation. From 1981-82 he was undersecretary for tax and economic affairs in the Treasury Department.)

LEGISLATION MAKING TECHNICAL CORRECTIONS TO THE RETIREMENT EQUITY ACT OF 1984

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ROSTENKOWSKI] is recognized for 5 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, today I am introducing legislation making technical corrections to the Retirement Equity Act of 1984. This bill would make technical, clerical, conforming, and clarifying amendments to provisions of both the Internal Revenue Code of 1954 and the Employee Retirement Income Security Act of 1974, which were amended by the Retirement Equity Act of 1984. While most of the amendments would be effective as if included in the Retirement Equity Act or are prospective, there is one amendment which is effective as of the date of introduction of this bill. Specifically, that provision would require spousal consent for using plan assets as security for loans, effective for loans made after the date of introduction.

The bill has been prepared by the staffs of the Committee on Ways and Means, Committee on Education and Labor, Senate Finance Committee, Senate Labor and Human Resources Committee, and the Joint Committee on Taxation, with valuable assistance from the Treasury Department. The Committee on Ways and Means intends to hold early hearings on this bill. It is my hope that interested members of the public will carefully review the introduced legislation and bring to the committee's attention any additional corrections which are truly technical in nature. As with H.R. 1800, the Technical Corrections Act of 1985, the standard for determining whether an amendment is technical will be quite rigorous. This legislation is not intended to be the vehicle for any substantive changes to the act.

A summary of the amendments made by the bill follows:

SUMMARY

A. MINIMUM PARTICIPATION, VESTING, AND BENEFIT ACCRUAL STANDARDS

Break-in service rules

The bill generally conforms the break in service standards applicable to class year plans to the break in service rules added by the Act. Thus, under the bill, a class year plan generally must provide that a participant's rights to benefits derived from employer contributions for any plan year are nonforfeitable not later than the close of the fifth "plan year of service" following the plan year for which such contribution was made. If the participant incurs five consecutive one-year breaks in service before the completion of five plan years of service following the year for which a contribution was made, the participant's rights to any contributions for such year may be forfeited.

In addition, the bill makes conforming changes to the rules governing the taxation of certain lump sum distributions. Under the bill, in determining whether any distribution payable on account of separation from service is a lump sum distribution, the balance to the credit of the employee is to be determined without taking into account any increase in vesting that may occur if the employee is reemployed. However, if an employee is reemployed and the vested interest in the amount of pre-break benefits subsequently increases, making the prior distribution ineligible for lump sum treatment, the Secretary of the Treasury is authorized to issue regulations to recapture the reduction in tax attributable to the prior election to treat the distribution as a lump sum eligible for the special 10-year income averaging tax treatment.

Maximum age requirement

The bill reduces from 25 to 21 the maximum age requirement that a simplified employee pension (SEP) may impose as a condition of plan participation. Thus, a SEP may not require, as a condition of participation, attainment of an age greater than 21 or the performance of services for three of the immediately preceding five calendar years (whichever occurs later).

B. SURVIVOR BENEFIT REQUIREMENTS

Coordination between qualified joint and survivor annuity and qualified preretirement survivor annuity

The bill provides that a qualified joint and survivor annuity is to be provided in the case of a married participant who does not die before the annuity starting date unless the benefit is waived in favor of another benefit. Accordingly, under the bill, the qualified preretirement survivor annuity rules apply in the case of death before the annuity starting date and the qualified joint and survivor annuity rules apply in the case of death on or after the annuity starting date.

Transferee plan rules

The bill includes two provisions relating to the transferee plan rule of the Act. First, the bill clarifies that the transferee plan rule does not apply with respect to transfers made before January 1, 1985. In addition, the bill clarifies that if separate accounts are properly maintained for the transferred assets and investment yield attributable to those assets, then the transferee plan rule applies only with respect to the transferred assets, rather than the entire assets, of the plan with respect to the participant for whom the transfer was made.

Qualified preretirement survivor annuity in case of terminated vested participant

The bill clarifies that, in the case of a participant who separates from service prior to death, the amount of the qualified preretirement survivor annuity is to be calculated by using the actual date of separation from service, rather than the date of death.

Spousal consent requirements

Under the bill, a spouse's consent to waive a qualified joint and survivor annuity or a qualified preretirement survivor annuity is not valid unless the consent (1) names a designated beneficiary who will receive any survivor benefits under the plan or (2) acknowledges that the spouse is relinquishing all rights to name a designated beneficiary. If the consent names a designated beneficiary, the beneficiary designation is not to be changed subsequently without the spouse's consent.

In addition, the bill provides that a plan is to provide that no portion of the accrued benefit of a participant may be used as security for any loan unless the participant's spouse (determined at the time of the loan) consents to the use of the accrued benefit as security. This rule overrides all of the qualified joint and survivor and qualified preretirement survivor annuity rules, including the rules that a spouse's consent is valid only with respect to that spouse.

The provision relating to spousal consents for beneficiary designations is effective for consents given after the date of enactment of the bill. The provision relating to accrued benefits pledged as security for a loan is effective for loans made after the date of introduction of the bill.

Notice requirement for individuals hired after age 35

The bill provides that the period for giving notice of the right to waive a qualified preretirement survivor annuity is a reasonable period after the date of hire in the case of a participant hired after age 35.

C. QUALIFIED DOMESTIC RELATIONS ORDERS

Tax treatment of divorce distributions

The bill provides that the Act's special rules for determining the taxability of benefits subject to a qualified domestic relations order apply only to distributions made to an alternate payee who is the spouse or the former spouse of the participant. Thus, distributions to a spouse or former spouse generally will be taxed to the spouse. However, with respect to distributions made to any other alternate payee (such as a child of the participant), the participant generally will be required to include the amount of the distributions in gross income.

Determination by plan administrator

The bill makes it clear that the 18-month period during which benefits may be deferred begins with the date on which payment would, but for the deferral, be required to commence.

Coordination with qualified domestic relations orders

In addition, the bill authorizes the Secretary of the Treasury to issue such regulations as may be necessary to otherwise coordinate the provisions affecting qualified domestic relations orders (sec. 401(a)(13)(B) and sec. 414 (p)) with the overall qualification requirements. The Secretary of Labor has authority to issue regulations under the qualified domestic relations order provisions of ERISA and Sec. 401(a)(13)(B) and sec. 414(p) of the Code, and the bill does not affect the authority of the Secretary of Labor to prescribe such regulations.

Coordination with qualified plan requirements

The bill makes it clear that a plan is not treated as failing to satisfy the qualification requirements of the Internal Revenue Code, which prohibit payment of benefits prior to termination of employment, solely because the plan makes payment to the alternate payee, even if such payments are made prior to the date at which the participant would have attained the earliest retirement age under the plan. This exception applies, how-

ever, only if the present value of the benefit to be paid to an alternate payee does not exceed $3,500.

D. NOTICE OF ROLLOVER TREATMENT

The bill clarifies that a plan administrator is required to provide notice to plan participants of eligibility to roll over plan distributions when any eligible rollover distribution is made, including a distribution of amounts eligible for rollover treatment pursuant to the partial rollover rules.

E. EFFECTIVE DATES

The bill clarifies the application of the transition rule relating to qualified preretirement survivor benefits in situations in which the participant had designated a beneficiary other than the participant's spouse. Thus, under the bill, the total death benefits payable to any beneficiary with respect to an individual who (1) performs at least one hour of service under the plan after the date of enactment of the Act, (2) dies before the annuity starting date, and (3) dies before the effective date of the Act, is to be reduced by the amount payable to the participant's surviving spouse pursuant to the transition rule.

However, the bill also permits the surviving spouse to waive the right to receive any qualified preretirement survivor benefit, provided such waiver is made on or before the close of the first plan year to which the Act applies. Such waiver is not to be treated as a transfer for purposes of Federal gift taxes or as a prohibited assignment or alienation for purposes of ERISA or the Code.●

COMMEMORATING THE LIBERATION OF THE NAZI DEATH CAMPS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. WEISS] is recognized for 5 minutes.

Mr. WEISS. Mr. Speaker, the gentleman from New York [Mr. SOLARZ] later on this afternoon has reserved time for a special order to commemorate the liberation of the Nazi death camps at the end of World War II, 40 years ago, just about this time.

I had intended to participate in that special order and I wanted to commend the gentleman for having taken the time to do so. Unfortunately, because of my schedule, I will not be able to stay for that. So I wanted to just take a few minutes to make special note of my joining in the commemoration of the liberation of those death camps.

I wish to take this opportunity to thank my friend and colleague, Congressman SOLARZ, for convening today's special order in remembrance of the victims of the Holocaust.

This year marks the 40th anniversary of the liberation of Nazi death camps—as well as the anniversary of the defeat of Hitler's Germany. On this anniversary, we must remember and honor the 6 million Jews who died in those camps, along with the millions of others who fought against the Nazi nightmare which nearly engulfed Europe and the world.

George Santayaha cautioned that "Those who do not learn from history are doomed to repeat it." To recall the suffering of a generation of European Jews is not an effort to revive Germany's sense of guilt, but a reminder to the world of this tragic period in its history. To resurrect from the now empty gas chambers of Auschwitz and Buchenwald the memories of millions who lost their lives there 40 years ago is to insure against others suffering similar fates.

The Holocaust cannot—indeed, it must not—be put behind us. Neither Jews, many of whom lost close relatives at the hands of the Nazis, nor non-Jews, who also died in Hitler's death camps, can afford to forget.

We are all responsible for remembering that it was Germany, the most civilized of all Western societies, that unleashed upon Europe a moral barbarism that had not been seen on such a wholesale scale for centuries. We must recall that Hitler's final solution, which in 4 years resulted in the deaths of 6 million Jews, was intended to exterminate an entire culture and race of people. And we must not forget that the Nazis could not have killed so many, for so long if, it had not been for the hatred stirred by centuries of anti-Semitism in Germany and the rest of Europe.

Today, the ghost of Nazism has reappeared in the guise of a school of historical revisionists, who claim that the mass gassing of Jews did not occur at the Dachau and Buchenwald camps. Others lobby against the valiant efforts of organizations such as the U.S. Office of Special Investigations which labors to find and prosecute Nazi war criminals.

To halt the resurgence of anti-Semitism and other forms of hatred, we must keep alive our history, however painful it may be. Our remembering the horror of the Holocaust enables us to renew our commitment to preventing future genocides.

Earlier today during the noon hour we had occasion to have celebrated under the auspices of the National Council on the Holocaust, a celebration or commemoration ceremony in the Rotunda of this Capitol Building of the 40th anniversary of the liberation; and there were magnificent statements and speeches made, outstanding among which were a statement by the gentleman from New York [Mr. SOLARZ] and the statement by the distinguished scholar and survivor of the Nazi concentration camps, Mr. Elie Weisel, who is the chair of the Holocaust Council.

Mr. Speaker, I simply want to add some few words of personal history in noting this anniversary date.

Mr. Speaker, I am one of those fortunate ones who was not counted among the 6 million Jews who were killed during World War II because I, together with my mother and sister, was able to come to the United States and we arrived here on March 12 of 1938.

I and my family, of course, will be enternally grateful for the shelter and refuge which we received from the United States, and for the rest of my days I will hope to conduct myself in such a fashion as to demonstrate my undying appreciation of the safe harbor and refuge which we were granted, as were literally tens of thousands of others prior to and succeeding the Second World War.

The date on which I arrived, on March 12, was significant because the very day before, March 11, 1938, was, in essence, the beginning of the Nazi invasion and accretion of the rest of Europe. It was the day of the Anschluss when Hitler marched into Austria to merge Germany with Austria.

The Jews of Hungary, which is where my family lived and where I came from, survived intact until some time in April 1944, again almost to the day 39 years ago, and on the eve of Passover the Eichmann forces and insistence could no longer be resisted and those Jews living on the outskirts, that is not in the central area of Budapest, were herded up and taken to the various camps.

Among the people who were taken who ultimately perished were my grandparents on both sides of my parents, that is, paternal and maternal grandparents, aunts, uncles, cousins, the vast bulk of my family.

I think that it is worth noting at this time each year the occurrence of that bestial act by the Nazis resulting in the death not only of my family but, as I say, 6 million Jews, countless millions of other nationalities, gypsies, Czechoslovaks, Ukrainians, Romanians, Poles, Christian, and Jew alike.

It is to be hoped that my commemorating that event we will keep the memory of that evil alive so that we can learn from it and make sure that it does not happen again.

I am hopeful that discussions ongoing right now among the President's party, the advance party, as to what would be appropriate for him to do, that in fact he will seek and find the time to visit one of those exconcentration campsites, and that if he pays honor to any of those who died during the Second World War in the military force that he will do so to those who were not part of the SS, who were the executioners of the Jews and others who died in those concentration camps during the Second World War.

Mr. Speaker, at this point I yield back the balance of my time.

□ 1550

EILEEN GARDNER SHOULD BE REMOVED

The SPEAKER pro tempore (Mrs. LONG). Under a previous order of the

House, the gentleman from Kansas [Mr. GLICKMAN] is recognized for 5 minutes.

● Mr. GLICKMAN. Mr. Speaker, today I speak for my uncle who walks with a limp resulting from childhood polio. For my administrative assistant's son who is hearing impaired and for my press secretary's son who is blind. I speak for one of my campaign volunteers who has lived her life in a wheelchair and for the director of a veterans group in my district who has only one arm. I speak for a friend's mentally retarded child. Today I speak for those who are without sight and sound, without full mobility or full intellectual capacity but who are full of life and feeling.

Today I speak to those in the administration who have placed Eileen Marie Gardner in a position in the Department of Education where she has found a wider audience for her unfortunate prejudices against the handicapped. Her views did not begin with her; unhappily they will not end with her. She speaks an age-old narrowness which has the capability to demean every American whose arbitrary distinctions—sex, race, age, ethnic heritage and/or handicap—fit into her twisted beliefs about equality, justice and spiritual capacity.

We need not give her or her views credibility by giving her a forum by which to espouse them. She very simply preaches bigotry and we are surely not blind enough to assume those views stop with those who are handicapped. History show us those views have a way of spreading to other groups. Today I speak for those who recognize how such views can—if embraced by the majority—undermine the very fabric of our democracy.

She should be removed from her position.●

INTRODUCTION OF ECONOMIC GROWTH AND DEBT REDUCTION ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. LUNDINE] is recognized for 5 minutes.

● Mr. LUNDINE. Mr. Speaker, today I am introducing legislation to impose a temporary, declining surcharge on all imports coming into the United States. Imposition of a surcharge as I am proposing it will reduce the serious twin deficit problem facing our economy—that of the Federal budget deficit and trade deficit.

If substantial deficit reduction action is not taken, the Congressional Budget Office estimates that our Federal budget deficit will exceed $215 billion in fiscal year 1986. Our trade deficit is expected to exceed $140 billion during the 1985 calendar year. These two deficits pose a threat to our capacity to sustain economic growth.

It is clear that we are living on borrowed time. We are financing our budget deficit with increasing amounts of foreign capital. The United States has become a net debtor country this year. By 1990, we will owe other nations of the world an unprecedented $1 trillion. This is more than the combined debt of all the developing countries today.

One of the chief underlying causes of our escalating trade deficit is our budget deficit. The large Federal budget deficit is keeping real interest rates at historic highs, which as I stated is attracting foreign capital to finance these Federal deficits. The large flows of capital into the United States are keeping the value of the dollar on international exchange markets abnormally inflated and certainly out of reasonable balance with other major currencies. This makes it very difficult for U.S. exporters to compete abroad and makes it very easy for foreigners to export to the United States.

If we can deal with our budget deficit, progress on reducing our trade deficit will follow. The surcharge I am proposing is aimed primarily at reducing the Federal deficit. If adopted, my proposal, will enable us to get our budget deficit down under $100 billion by fiscal year 1987. If combined with $40 billion of other deficit reduction measures, the surcharge could yield a total of $80 billion or more in deficit reduction measures during fiscal year 1986 and fiscal year 1987. Such a significant deficit reduction would lessen interest rates, and help bring the value of the dollar down on international currency markets, which in turn would result in improvement in the U.S. trade deficit.

The surcharge would be a 2 year, temporary, declining fee on all imports coming into the United States. The rate of the surcharge for the first 8 months would be 20 percent, 15 percent for the second 8 months, and 10 percent for the third 8-month period. Imposition of the surcharge would be conditioned upon enactment of at least $40 billion in other deficit reduction measures in fiscal year 1986 and a similar amount in fiscal year 1987. The only modification to the imposition of the surcharge would be for lesser developed countries who are experiencing serious balance of payments problems. The President would be granted authority to decrease the surcharge to one-half the proposal's rate for these countries upon a finding that these countries' markets are reasonably open to U.S. products.

We cannot realistically expect to sustain the current economic recovery indefinitely. If the United States heads into another recession with a $200 billion Federal deficit and our very high external debt, we could experience an economic shock of unprecedented proportions. Under those circumstances, reducing budget deficits and restoring economic growth could prove very difficult.

We must act now to substantially reduce these Federal deficits. I have examined the strengths and weaknesses of imposition of a surcharge for many months. I am convinced that the major criticisms of a surcharge given our grave fiscal problems should not disuade us from moving forward with one. In addition, I have tried to fashion my proposal to address the major criticisms.

There is a fear that the surcharge would be highly inflationary. While undoubtedly it will have some modest inflationary impact, I believe less than 1 percent of the CPI, the 2 year, temporary nature of my surcharge helps mitigate the inflationary impact. A minimum amount of import substitution is likely to take place as long as it is understood to be a temporary measure. In addition, realizing it is a temporary measure, many foreign producers will have to absorb a good portion of the surcharge from their inflated profit margins to protect their market shares in the United States. As their currencies have depreciated in relation to the dollar, prices of imports have not been reduced appreciably. Foreign firms have plenty of absorption capacity. Therefore, prices will not be significantly raised by this measure.

Others fear that foreign governments would retaliate against the United States if a surcharge is imposed. I believe foreign governments are unlikely to do so if they understand that the surcharge is temporary and aimed at correcting the serious macroeconomic misalignment. Exchange rate imbalances adversely affect foreign economies by draining their investment capital. Moreover, the United States is the largest market for our trading partners, so they have more to lose than the United States from substantial retaliation. They will come to realize that the surcharge, while adding a tariff, still keeps the U.S. market open to their products, unlike more stringent protectionist measures being threatened today.

Finally, the surcharge I am proposing is consistent with the general agreements on tariffs and trade and in fact historically has been used by many countries, including the United States, to address serious balance of payments problems. In 1971, President Nixon imposed a 5-month 10-percent surcharge on imports into the United States as part of an effort to deal with U.S. balance of payments problems. Article XII of the GATT specifically grants a contracting party the right to impose certain trade restraints in order to safeguard its external financial position and its balance of payments.

In normal times, I would not be proposing a surcharge. But these are not normal times. The prospect of $200 billion budget deficits and $140 billion trade deficits spells disaster for the American economy. With this type of massive debt hanging over our heads, sustained economic recovery is simply not possible.

The future of our agricultural and industrial economy is at stake in how we address our twin deficit problem. The bottom line is jobs. We need econmic growth to sustain acceptable levels of employment. If the United States continues to accumulate public debt at a rate of more than one-half trillion dollars over the next 4 years, our present prosperity and future improvement in our standard of living will be seriously threatened. What if our foreign lenders suddenly decide to call their demand loans? The value of the dollar could fall precipitously, interest rates would skyrocket, and another serious recession will surely follow. Unless we significantly change our present course, there wil be no soft landing.

The bold proposal contained in this legislation will lead to sound U.S. fiscal policy and stimulate economic growth through lower interest rates. It will be a strong signal that America means business. It will contribute to our competitiveness and improve prospects for long-term economic prosperity.●

SALUTE TO WALTER TROTTER

The SPEAKER pro tempore. Under a previous order to the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I would like to ask the Members of the House of Representatives to join with me in congratulating Mr. Walter Trotter on his retirement after 10 very successful years as chief of the Big Sur Volunteer Fire Brigade. I know the people of the Bug Sur area join with me in thanking Chief Trotter for a decade of dedicated service.

In 1974 Walter Trotter helped form the Big Sur Volunteer Fire Brigade, becoming its first chief and the driving force behind the brigade's survival. I understand that there had never been a structure fire in Big Sur that did not result in the complete destruction of the building before the founding of the Volunteer Fire Brigade. Chief Trotter has played a vital role in the fire fighting effort in every major fire in the Big Sur area in the last 10 years.

Over the last decade under Walter Trotter's leadership, the brigade has responded to over 137 fire calls, including the disastrous Marble Cone fire. Chief Trotter is responsible for the brigade's position today as a nonprofit, tax exempt corporation with an annual budget of some $25,000 being supplied solely by donations and community fundraising events. The donated funds are used to maintain the fire fighting equipment Chief Trotter has managed to acquire from public agencies over the years, and to insure that the volunteer brigade members receive the courses they require in fire suppression, first aid, and basic life support and fire prevention.

In addition to his duties as chief of the Volunteer Fire Brigade, Walter Trotter has actively served as a member of the Big Sur Rescue Team and the Big Sur ambulance crew. He has volunteered his time to respond to emergency calls when accidents occur or when vehicles and/or people go over the steep cliffs along California Highway 1.

On Saturday, April 20, friends and members of the Big Sur Volunteer Fire Brigade are gathering to honor Walter Trotter on the event of his retirement as chief. In recognition of his dedication and his contributions to the Big Sur area, I would like to add my commendation to Chief Trotter and I know that my colleagues will join me in thanking him for his commitment and in extending to him our heartfelt congratulations on his retirement. Walter Trotter has left a deep imprint on Big Sur and on the Volunteer Fire Brigade. I want to wish him the very best in all his future endeavors.●

NICARAGUAN LABOR: ANOTHER VIEW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. CROCKETT] is recognized for 5 minutes.

● Mr. CROCKETT. Mr. Speaker, In January, the AFL-CIO circulated a report prepared by its American Institute for Free Labor Development [AIFLD] which charged that the Sandinista Government in Nicaragua was harassing independent unions there and repressing the workers' right to organize, bargain, and strike. The AIFLD report gave a chronological listing of alleged violations and oppressive acts to support its contentions.

The conclusions in the AIFLD report have not been challenged by a delegation of labor lawyers who visited Nicaragua in order to investigate first-hand the specific accusations made in the AIFLD reports. The delegation, which was sponsored by the National Lawyers' Guild and was composed of nine attorneys who represented a variety of trade unions, declared the AIFLD report to be "a grossly inaccurate and misleading document."

In its 62-page response to the AIFLD report, the lawyers' group urged the AFL-CIO to retract the "flawed document" and to reconsider its position on the status of organized labor in Nicaragua in support of the Nicaraguan guerillas.

So that my colleagues may be better informed on this important issue, I am inserting for their reading the introductory and concluding remarks sections of the lawyers' report which is entitled, "Are Nicaragua's Trade Unions Free?"

ARE NICARAGUA'S TRADE UNIONS FREE?

(A Response To The American Institute For Free Labor Development (AFL-CIO) Report, "Nicaragua, A Revolution Betrayed: Free Labor Persecuted")

I. INTRODUCTION

A. THE AFL-CIO'S POSITION ON NICARAGUA

In 1983, the AFL-CIO Executive Council adopted a resolution stating its position on developments in Nicaragua since the July 1979 overthrow of Somoza. The resolution claims that the Sandinista Government "has become dominated by totalitarian elements which have established a dictatorship that all but destroyed the right to strike, to organize, or to bargain collectively without interference" and condemns the "betrayal of the Nicaraguan revolution by the Sandinista Government."

The AFL-CIO position is based on a report prepared by William Doherty. Executive Director of the American Institute for Free Labor Development, an AFL-CIO affiliated organization charged with promoting the development of trade unions in Latin America.[1]

The report, entitled, "Nicaragua, a Revolution Betrayed: Free Labor Persecuted" purports to explain, "in detail how the Sandinista government has all but destroyed the free trade unions in Nicaragua."

AFL-CIO President Lane Kirkland sent a copy of this document to AFL-CIO affiliates on April 10, 1984, describing it as a "historical as well as a current documentary proof of the beginnings of the destruction of the free trade unions in Nicaragua." Kirkland explained that the report was begin distributed in order to help union members "deal with the campaign of disinformtion which has been undertaken by the government of Nicaragua and their representatives and supporters in different parts of the world and, especially here in the United States."

On February 28, 1985, Senator David Durenberger (R.-Minn.) inserted this report into the Congressional Record, declaring that it "documents in stark detail the Sandinista's efforts to destroy independent labor organizations within Nicaragua."[2]

The twelve page report consists of 29 separate allegations of government repression of Nicaraguan trade unions by arresting union members in retaliation for their union activities; discriminatorily enforcing Nicaraguan labor laws in favor of pro-government trade unions; and staging violent attacks against union facilities and members.

The National Lawyer's Guild, a 58 year old organization of lawyers and legal workers with a long history of support for the rights of organized labor both in the United States and abroad, was concerned about the serious allegations contained in this report. On December 4, 1984, a Guild sponsored delegation of labor law practioners visited Nicaragua in order to investigate first-hand the specific accusations contained in this report as well as the general conditions faced by organized labor in Nicaragua. The

Footnotes at end of article.

delegation consisted of three employees of the National Labor Relations Board and six attorneys who represent a variety of unions, including many affiliated with the AFL-CIO.[3]

The delegation set its agenda with the cooperation of the Nicaraguan Jurist Association, an independent lawyer's organization. During its ten day stay, the delegation discussed this report and the role of trade unions in Nicaragua with officials in the Labor Ministry,[4] Justice Ministry,[5] Judiciary,[6] industrial, farmworkers,[7] teachers,[8] and health care workers unions,[9] newspaper editors,[10] community and women's groups, and rank and file workers at the Victoria Brewery and the recently constructed TIMAL sugar refinery. The delegation also met with representatives of the two primary opposition trade unions which the AFL-CIO report claims are the target of government repression, the AFL-CIO affiliated Confederation of Trade Unions (CUS)[11] and the Nicarguan Workers Confederation (CTN).[12]

In addition, the delegation reviewed allegations of mistreatment which CUS and CTN brought to the attention of the International Labor Organization, Amnesty International, and the America's Watch Committee. The Labor Ministry provided a written response to the AFL-CIO report, with attached documentation.

This report discusses the delegation's findings.[13] It begins with a brief description of the history and structure of the Nicaraguan labor movement and the impact of the civil war against the U.S. backed counter-revolutionary guerrillas (*contras*) on organized labor. The next section provides a point-by-point analysis of the accusations made in the AIFLD report. The report concludes with a summary of the achievements of the Nicaraguan labor movement since 1979.

B. SUMMARY OF FINDINGS

1. The leadership and many members of the two Nicarguan trade unions supported by the AFL-CIO have close ties with counter-revolutionary guerrilla groups which have committed numerous atrocities in violation of international law.

2. Virtually every claim of trade union repression made in the AIFLD report is disputed by representatives of CUS and CTN, by respected human rights groups, or by credible evidence provided by the Nicaraguan government. The delegation urges union members to demand that this fundamentally flawed report be retracted and that the AFL-CIO reconsider its position on the status of organized labor in Nicaragua.

3. The Nicaraguan labor movement has enjoyed a rapid growth since 1979 and has achieved significant gains for Nicaraguan workers.

D. CONCLUDING REMARKS ABOUT THE AIFLD REPORT

Our investigation of the AIFLD report revealed significant disputes with regard to virtually every allegation of trade union repression in Nicaragua. The AFL-CIO's accusations were directly contradicted by CTN and CUS leaders with whom we met, reports of respected international human rights groups, and documentary evidence provided to the delegation by the Labor Ministry.

Thus, for example, CTN leader Huembes flatly denied the AFL-CIO's allegation that Sandinista troops occupied and shot-up the union's headquarters. A document prepared by the CTN concerning alleged mistreatment of its members by the Government from 1980 to 1984 made no reference whatsoever to the arrest of 40 CTN members during the months of March and April 1982, as alleged in the AIFLD report.

Moreover, many of the allegations contained in the AIFLD report were dismissed by ILO report based on a detailed investigation conducted by an ILO representative in December 1983. For instance, contrary to the AIFLD report, the ILO found that the Port Workers Union of Corinto at no point "formally announced" that it was leaving the CST to affiliate with CUS. Instead, the ILO found that in May 1983 these dock workers voted overwhelmingly to remain with the CST. In addition, the CTN admitted to the ILO that no less than 17 CTN members which it claimed were arrested for their union activities were in fact arrested for engaging in illegal activities on behalf of the contras, such as economic sabotage.

Documents provided to us by the Labor Ministry also directly contradicted numerous AFL-CIO allegations. For example, a report submitted to the Government by CUS official indicated that the Chinandega Transport Union was never affiliated to the CST, as alleged by the AIFLD report, but was always a CUS affiliate.

Finally, our investigation revealed numerous examples of exaggerated and possibly fraudulent accusations of Government repression made by CUS and the CTN to the ILO and other human rights organizations. Thus, CUS leader Guthrie claimed both to the ILO and to the delegation that the Nicaraguan Supreme Court deliberately refused to issue a decision concerning the recognition of a CUS affiliate at the San Antonio Sugar Mill, which in fact had been issued in January 1984. The ILO dismissed numerous CTN allegations that its members were arrested when the CTN was unable to document them. Further, the delegation has reason to believe that the CTN may have fabricated an allegation that 18 of its members were arrested in May or June of 1983, which it reported to Amnesty International and America's Watch.

As a result of these numerous conflicts between what the delegation believes to be credible and reputable sources and the AIFLD Report, the delegation concludes that what AFL-CIO President Lane Kirkland says is a "historical, as well as current documentary proof of the beginnings of the destruction of free trade unions in Nicaragua" is a grossly inaccurate and misleading document.

The delegation is deeply disturbed that the AFL-CIO has permitted this fundamentally flawed document to be used by the Reagan Administration in its campaign to seek congressional approval of funds to assist the Contras in their efforts to violently overthrow the democratic government of Nicaragua.

The delegation urges all principled trade unionists to demand that the report be retracted and that the AFL-CIO vigorously oppose the resumption of U.S. aid to the Contras.●

FOOTNOTES

[1] The AIFLD receives most of its funding from the U.S. Government through Agency for International Development and private business groups. The Reagan Administration recently appropriated funds to AIFLD through the Caribbean Basin Initiative. AIFLD has been accused of involvement with various CIA activities in Latin America, including the U.S. invasion of the Dominican Republic in 1965, and the military coup in Chile during 1973. *See* Phillip Agee, *Inside the Company: A CIA Diary* (New York: Stonehill Publishing Company, 1981) (P. 64); Jack Scott, *Yankee Unions, Go Home!* (Vancouver, B.C.: New Start Books Ltd., 1978) (pp. 223-226).

[12] Carlos Huembes, Secretary General, and Eugeno Mendrano and Jose Altamirano.

[13] After the delegation returned from Nicaragua, AIFLD issued a supplemental report, titled "The Sandinistas And The Workers—The Betrayal Continues," containing four additional allegations of government harrassment of trade union activity during 1984. This report does not discuss these new allegations except for one concerning the strike at the Victoria Brewery which we visited.

TRIBUTE TO MRS. MAVIS HURT

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to and in memory of a longtime friend of mine, Mrs. Mavis Hurt of Kirksey, KY, who died on February 27 of this year at the age of 87.

Mavis McCuiston Hurt was the daughter of the late Thomas Montie McCuiston and Flo Hamlin McCuiston. A native of Calloway County, KY, she was a respected and influential lady in Murray—the county seat—in Kirksey, a small town near Murray, and throughout western Kentucky. I believe it is a tribute to her memory that a scholarship fund in behalf of Mavis and her husband Max B. Hurt has been established at Murray State University.

Mavis and Max Hurt were married 64 years, an accomplishment that is certainly rare these days. Mavis Hurt was a member of the Kirksey United Methodist Church and was active in her community. If all people were as devoted to and conscientious about our country and our future as Mrs. Mavis Hurt, America would be an even better place in which to live.

In addition to her husband Max—a highly respected and influential Calloway countian in his own right—Mavis is survived by her daughter,

Mrs. Van (Geraldine) Dunn of Delaware, OH; her grandson, Dr. Max Gilbert Dunn of Charlottesville, VA; three granddaughters, Mrs. Steven (Susan) Hoffius of Charleston, SC, Mrs. Randy (Sheila) Rutledge of Seattle, WA, and Mrs. Saul (Joan) Solomon of New York, NY; and one great-granddaughter, Annie Hoffius.

Also surviving are four sisters, Mrs. Newell (Esther) Doores of Kirksey, KY, Mrs. Lola Morgan and Mrs. Sonny (Hilda) Parkhill, both of Hazel, KY, and Mrs. Norvie (Ruth) Riley of Mayfield, KY. Three surviving brothers are Rupert McCuiston of Kirksey, State Senator Pat McCuiston of Pembroke, KY, and Macon McCuiston of Nashville, TN.

My wife Carol and I extend our sympathy to the family of this outstanding Kentuckian who was an inspiration to those of us who knew her.

MY ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Madam Speaker, my colleagues, I say that I continue with my advice to the privileged orders. This time, very much right in line with Joel Barlow, the one who coined that phrase, and used that approach at the time of the American Revolution, where he served as a chaplain in George Washington's revolutionary army.

Let us never forget that that was the name of our fighting men; they were rebels; they were revolutionaries in the true sense of the word. The American Revolution was indeed an indigenous, a native, a civil war so to speak, and we had the essential decisions to make then, and Joel Barlow, who was also an outstanding poet, who wrote a great epic poem in which, peering into the future he visualized this great contest between what he called the two gods.

He entitled it: "The Olympiad." In it, he visualized what he called the sons of the god Hestor or the black race, in the struggle ultimately to develop because of their then-continuing enslavement by the white.

He was that kind of a mind, but he was also a true revolutionary. He joined Tom Payne the great revolutionary radical pamphleteer. As a matter of fact, if I were to extract some paragraphs from Tom Payne's basic writings and just date them today, they would be attributed to what everybody calls a radical socialist thinker in this day and time.

So that those most revolutionary words, in the Preamble of the Constitution, that did not appear until oh, more than 10 years after the point, were actually those that were inspired by men like Joel Barlow and Tom Payne.

They felt so keenly that they went to Europe to foster revolution. It was Joel Barlow's advice to the privileged orders of Europe for the need for revolutionary change.

So my advice, in the series of special orders, along two basic lines that I think are fundamental at this point in which we have yet to reaffirm and rededicate ourselves to the form of government we enjoy and have attained such high privileges of freedom under the Constitution of the United States, whose 200th anniversary remains yet to be celebrated in 1989.

The common opinion is that we had our bicentennial in 1976. That was just the bicentennial of the struggle that won our independence, but it was not until 1789, the adoption of the Constitution, and the convocation of the First Congress on March 4, 1789 in New York City, in which spelled out in word and in deed were the basics in what we call our system of government in America.

It was most revolutionary, as evidenced by the first few sentences in the preamble in which reference was made to where true sovereignty, where the true power; is.

Now this was most revolutionary then because the whole world was governed by kings or czars or potentates who said that their sovereignty; that is, power, came from God. Well, you could not go any higher that that. Even though the people really never ever said that, this is what kings had maintained for centuries, and which ruled the world in its entirety, no matter what part of the globe; until the Americans came and said, No, all power comes from the people.

So that in the preamble, we read: "We the People of the United States, in Order to form a more perfect Union * * *" I think these words ought to be inscribed, and that the preamble ought to be memorized by every single American citizen, from school child to adult, because they are still highly revolutionary; radical, if you please.

You talk to all the wielders of power today, you will find out why it is that the American people have been usurped in their power to control their destiny with respect to such vital things as their economic well-being, because the power and control of the people through their representatives, whether they are legislative policy-making body representatives or Presidential or Executive representatives; the President and the Vice President.

Up to 1974, 1975, it would have never been thought possible that the United States would end up with an unelected President and two unelected Vice Presidents. In fact, this was the most horrible possibility that the men who wrote the Constitution could think of.

So the Constitution was constructed in such a way, and after much debate. Remember that the first 10 years of our national existence, they thought so little of such an office as the Presidency which, during the debates in the Constitutional Convention, they referred to as the "chief magistrate," not President.

They thought so little of that office that they provided no such thing during the first 10 years of our national existence as a national entity.

The First Continental, the Second Continental Congress, the Articles of Confederation—that is the last thing they wanted, because they were still very much fearful of that all-powerful potentate, and they wanted to make sure that that startling revolutionary concept, that power came not from an individual who in turn said he got it from God, but it came from the people.

Then that basic, basic division of human thought as to government from the very beginning of human history, the two basic philosophies: The one that says that unless you have some superkind of men, an elite, a special genius kind that knows more and has a better idea than anybody else of what is good for the people.

You have that thinking. You have it today, throughout the world; and then you have the other, upon which ours is predicated. And that is, very simply, that in the long haul, the people themselves know best what is better for them. That yes, in the short run they will make very disorderly mistakes, but that in the long run they know best and better.

□ 1600

Then the rest followed—the great system of education, based on the fact that unless we had an enlightened citizenry, in the words of Thomas Mann, that we could not expect to have self-government without it eventually dissolving, as the few experiences in past human history had demonstrated amply, into an oligarchical or an authoritative or anything but a self-government on the part of the people.

We are still predicating our basic faith and philosophy on the fact that the overwhelming majority of the American people do know what is best for them if they are informed, if they are knowledgeable, and that, second, the processes of democracy are not neat, they are not mathematically correct and orderly, that, yes, that is the difference between a unitary or an authoritative single-person government. You do not have to waste time with debate, you do not have to hear 535 different individuals. And this is also the reason why at this point in the 20th century we have more need than ever to have the advice to the privileged orders that Barlow so much an-

ticipating an age in which the 3 million, or so, that constituted the population of the Thirteen Colonies would ultimately be a grand, grand realm, a vast realm, and the principles upon which this meager beginning were so securely founded were so great and so true and so much the fruit of the distilled wisdom of centuries that there could be no course but one of steady progress and evolution of self-government or democracy.

And it has happened. But in order for that to have happened we had to have this other thing that has been so unique, and still is, to the American system—that is, up until lately—and that is what we call our public school system, the idea that no American, no matter what his economic or any other social position, that if motivated and equipped with the zeal and the desire and the ambition to gain knowledge, to gain in the ability to lead a rich and rewarding life, a productive life, a creative life, that his education would not be denied because of either class status or economic inability.

But just 100 years ago, for example, we still had the vestiges of the indenture system. You read the deed records in Shelby County, TN, in the other counties in Kentucky, and to this day you look and see, "Sheriff's notice: Failure to serve because GTT," gone to Texas.

Well, what was the sheriff serving? He was serving summons on an individual because he had jumped his indenture.

What was an indenture? An indenture was a contract by which one American indentured himself to another for a period of time, glad to be able to be given a chance to work, no wages, no nothing, not a property owner. Almost 100 percent of the jurisdictions, if not 100 percent of the jurisdictions, did not have universal suffrage. In the first place, women could not vote.

I might remind my colleagues that women in my State of Texas did not have the right to vote until 1919, after World War I. But on top of that, if you were not a property owner, you could not vote either. And this was a vestige that lasted in many of our States, including Texas, until as late as the decades of the 1940's. And our concept of universal manhood suffrage has really blossomed in such a way that it is unknown in any other realm. But it does no good to have that free access to the ballot box that so many Americans have given life, blood, property, and all of their possessions in order that we could have that right if we are economically in serfdom. If we are not free economically, it does not matter if we are relatively free politically. And this is a point where I think it is appropriate to remind my colleagues and others in the privileged orders of our country that time is upon us. Why? As I have pointed out in my three preceding discussions, we have, ironically, turned full cycle in just 4 years, just 4 years. This little delicate flower of democracy is very delicate. It has to be nurtured. We have to work at it. Democracy is a very lonely activity in the world today. Even in the countries that we call democracies and allies, I want my fellow Congressmen and all the citizens in this country to have a chance to go live in those countries and see the difference.

But this is what is at stake today: Whether or not we in our time will continue to provide the basis for economic equality, economic freedom, without the loss of the basic freedoms such as the price that has been paid in other modern day structured governments, whether it was under what we call an oligarchical or a corporate or a Fascist state or the other side of the metal, a socialistic or a true socialistic government or communistic government—it all depends on what you define the terms as to what we are talking about. But in the structured nature of those governments we do not have the basic essence that we take for granted when we define a democracy, and that is that no government is at sufferance to exist except and until it has the just consent of the governed.

Now, in the last few years, when it comes to our dealings with other parts of the world, including that in the new world that we share with about 21 republics or countries, we lose sight of that. We are not talking about that. We are talking about something else. And so when we use the word "democracy," it can be variously used in these other countries to fit their cultural acclamation or understanding of that word. As an example: What good does it do to have the right to go vote if the citizen has a lack of knowledge as to the issues involved.

Example one: Last year we had a Presidential election year. What were the issues? How were they discussed? One of the basic issues, I would think, would have been the horrendous real threat not only to the economic well-being of our country, which has already suffered because of it, but for the world itself, given the interdependence and the interplay between the economic lives in each one of these countries today, the so-called international accounts deficit, the so-called trade deficit.

In the United States as of December 31 we ended up with over $139 billion deficit. Now, we can piddle around, as I have said ad nauseam, with our so-called domestic deficit for a couple years more, maybe—unless this other impinges a little more drastically and quickly than some of our whistlers in the dark seem to think—but we cannot tolerate any kind of an imbalance of that nature, given the structured economy of the American system and the way we perform our economic activities.

Why is that? Because for every $110 billion of that $140 billion deficit, we have lost forever one-quarter of a million American jobs permanently. So I have read into the RECORD—I am not going to repeat it today—some of the things that are happening now in which our fundamental economic activities, even the funding of basic research and development in the two areas in which the tremendous push for jobs and job creation exists in the so-called space communication world, which the United States had the lead in before 4 years ago, and the so-called robotics.

□ 1610

What do we find? We find that whatever research and development is being performed in our universities and other places in the United States, they have to go to Japan and France for allocations of credit to conduct them. France has taken the lead in robotics; it is also stealing our bacon in the contest for contracts on space communications as of today. So is Japan.

There has to be a cause, and, of course, there is. But nobody wants to be interested in debating that. So last year, when everybody knew, at midyear, at the end of that quarter, that the imbalance in our trade deficiency was so great that even if we tried to stabilize it as of September 1 at the end of the year, we would have a horrendous deficit, and that it has dire, immediate implications. I had been speaking since 1965 on that fact that that was a grave potential then; that it looked to me as if we were going to face such rising costs in interest, for example, which in turn are like an impact of the steel ball games that you see that bounce one against the other in sort of an inertial collision that keeps almost a perpetual motion. This is the way these activities have rebounded.

Essentially, that formula was well known to us because it was used successfully by the debtor nations after World War I, in which Americans and Uncle Sam were outwardly ridiculed as "Uncle Sap."

I am going to read at this point from a book that I have had since I was 14 years of age in the middle of the beginning of the disastrous Depression. From that book I am going to select excerpts, and some of them, in view of the President's recent utterances about saying at firest he would not visit, he would not visit Buchenwald because it would hurt the sensibilities of the German people, and it would revive old memories.

Here are a few, and I think they are very pertinent to what is happening today with the President, finally, after the great outcry, and even despite that says, well, I will not go to Buchenwald, but I will go to the cemetery where the German soldiers died who were actually burning the fires in the ovens that were cremating people, and were also doing a few other things that were a threat to liberty to every single country in the world.

The same thing happened after World War I. Soon after, when it became apparent as a result of the Treaty of Versailles, that the United States was the only creditor nation. If American credit had not been available, World War I would not have lasted 6 months for the Allies.

The same thing happened in World War II; we were the only creditor nation. Now, as of 4 years, we are a debtor nation. Now, what does that mean? What it means is exactly what it meant after 1930. I remember as a child, I remember, I have total recall, and though I visibly understood some things, I remember the headlines. The Treaty of Lucarno, where we will have some kind of understanding. The moratorium proposed by Herbert Hoover because of the inability of the debtor nations to pay us their debts, and they in turn, getting their money to pay their debts to us from the German reparations which the Germans soon, soon began to disclaim against and protest.

Here is an example of what was being said in 1932. The great August Crisis of 1932. This is from German publications:

> The war has lasted 16 years. German guilt was a lie. The Treaty of Versailles is a great crime of modern history. Reparations are tribute. In 1917, America joined the Allies against Germany because then her money was on that side. Among nations, the debtor is dear to the creditor. The Hoover Debt Holiday Plan in 1931 was to protect 2 billions of American money in Germany, for now America is bound by what Germany owes here to be Germany's political friend.

Well, we had the same scenario; different countries because some of the countries that existed up to after World War I disappeared in the interim, and certainly after World War II. We did the same thing.

We talk about the process that I give to Dr. Hjalmar Schacht, that great financial wizard, they called him. Hitler's wizard, who was able to get some of our principal corporations to actively finance Adolf Hitler.

Now how did that happen? Well, the same way it is happening now. All debtor nations were going to meet their foreign obligations from a favorable balance of trade. Now that sounds familiar. Japan says, hey, wait a while. Sure, we have a favorable balance of trade right now with you, but we will have a depression if we do not have access to your markets. And we say, hey, but wait awhile.

We did not say that until this year, but you will not let our goods in there. Now, England, for years our aircraft manufacturers could not be allowed to compete in England because England had certain standards that were constructed in such a way that the American manufacturers could not meet. It is the same thing with American-made cars in Japan. The standards of acceptance were of such a nature that they could not qualify American cars for importation.

We have blindly, for a mess of potage, sold out America's heritage. So all debtor nations, and remember that America was the only creditor nation in both wars, were going to meet their foreign obligations from a favorable balance of trade. A nation's favorable balance of trade is from selling more than it buys. Was it possible for nations to sell to one another more than they bought from one another? So that everyone should have a favorable balance of trade? By lending one another the credit to buy one another's goods, that would be the way. All nations would not be able to lend equally, of course; each would lend accordingly to its means.

Where is the profit in trade for the sake of which you must lend your customers the money to buy the goods? The answer was, but unless we lend them the money to buy our goods, they cannot buy them at all. Then what should we do with our surplus? As it appeared that European nations were using enormous sums of American credit to increase the power of the industrial equipment parallel to our own.

This is what we did during and after the Marshall plan. All with intent to produce a great surplus of competitive goods to be sold in foreign trade. Another question was sometimes asked: Are we not lending American credit to increase Europe's exportable surplus of things similar to those of which we have ourselves an increase in surplus to sell?

□ 1620

Is it not true that with American credit, we are assisting our competitors to advance themselves against American goods in the markets of the world? The answer was, of course that is so. You must remember that these nations you speak of as competitors are to be regarded as our debtors. They owe us a great deal of money. Unless we lend them the credit to increase their power of surplus production for exports, they will never be able to pay us their debt.

Lingering doubts, if any, concerning the place at which a creditor nation might expect to come out were resolved by an eminent German mind, with its racial gift to subdue by logic all the difficult implications of a grand illusion. That was Dr. Hjalmar Schacht, formerly head of the German Reichsbank. He was speaking in this country what I have just said. For creditor nations, principally this one, he reserved the business of lending credit through an international bank to the backward peoples of the world for the purpose of moving them to buy American radios and German dyes.

By this argument, for endless world prosperity, as a product of unlimited credit bestowed upon foreign trade, we loaned billions of American credit to our debtors, to our competitors, to our customers, with some beginning toward the backward people. We loaned credit to Germany, who loaned credit to Russia—at that time, Russia was a developing nation; it was still sunk in peasantry—for the purpose of enabling Russia to buy German things, including German chemicals.

Well, now, let us see. Talk about modern days. The Russians decided, after commercial consultation with the Western countries of Europe, that they could provide gas for Europe, which would enable Europe to be free of its dependence on that Middle East oil, but also free of America, because interest rates that we, in this country, have so blithely imposed and have crucified our businessmen and our average families with an extortionate rate of credit and interest—extortionate, usurious. As I have pointed out, even 7,000 years before Christ, they were passing laws against usury. So here we are, blitheful Americans, thinking that you can have extortionate, usurious rates of interest and can continue free so-called business. Of course you cannot. You cannot continue this other.

But let us look at this gas pipeline. President Reagan said, "Hey, look, we are not going to let those Russians do this, so I admonish you West Germans and Frenchmen and in between, you better not have anything to do with it."

So they said, "Hey, wait a while, though. The pipe, the knowhow, much of the equipment has been supplied by your businessmen. All we want is a piece of the action and we also want to have gas. We want to have natural gas delivered to our doors so that we can really increase our commercial potential, the well-being of our people, increase the level of the standard of living, and you certainly do not want to stand in the way of that."

President Reagan said, "Well, I am going to insist, and we might even consider some kind of an embargo."

Then they really got down to business, as they are going to get next month at the economic summit meeting in Bonn, Germany, and all of a sudden, you are going to start hearing

a little bit more about the ECU, the European Currency Unit, and the EMF, the European Monetary Fund. You have not heard anybody but myself even mention those terms in this Congress on either side of the Capitol, but I say to you, my friends, and my colleagues, you soon will be, but it will be too late. It will be just like after the Hoover moratorium, too late, too late, and after having drained the American people of its lifeblood in the allocation of credit against all the warnings of the greatest leaders our Nation has had since the initial period of history—Thomas Jefferson telling us in plain words, "It will be worse than having a standing army in the country if you allow the bankers to take over the credit allocation of this country, to decide for you what is good for you in credit allocation."

We had the same warning from President Jackson in the 1830's, and then later, almost a week before he died, Abraham Lincoln saying in almost the same words the same thing except that he went one step further and predicted the greatest tide of corporate corruption that would be invading this country and taking over. And it did, for it was less than 10 years after his death that we had the smelly corruption, the Grant administration, and infecting our Congresses for the first time, having quite numerous expulsions and bills to expel Members for corruption, the Crédit Mobilier scandal, and all that kind of stuff. All of this President Lincoln foresaw, and warned against.

And then came the big bust of 1907-08, the great travail throughout the land, for the same basic reasons, the overweening, greedy grasp for power to allocate credit resources where the country's needs were not being met. The country was burgeoning. Little businessmen wanted to go West. The country was expanding, but not its allocation of credit, because that was being tied up by the great speculators, and finally you had the bust of 1907-08.

Then you had a great travail in the Congress and you finally got the so-called Pujo committee. This was a House committee, and it led to finally, 5 years later, the enactment in 1913 of the Federal Reserve Act and what has happened is that we have come full circle. We have undone all of the basic congressional intention in the passage of the Federal Reserve Board Act. There is not a man among us here who will tell me that the Federal Reserve is not a Federal agency. You will say, "Of course it is." I say to you, as I have for years, it is not. It is more of a private entity than a public one. Yet it is to them that you, my colleagues, have abdicated the constitutional responsibility of coining money and allocating the credit of this Nation. You have allocated and you have abdicated and you have given it to the most greedy interest ever known to man.

Certainly they are unaccountable. The Federal Reserve Board does not account to you. I can tell you that. I have been a member of the Banking Committee since I came here 24 years ago. I have seen five or six different Chairmen of the Federal Reserve Board. Not once did any one of them come up to offer an accountability. What is more, the real power, which is in the so-called Open Market Committee, who are they? Do they have to come before you, the American people, and your representatives? They do not. They think that is foolish. They ridicule it like one of the Chairmen of the Federal Reserve Board, who contemptuously looked up after I asked a question during my 5-minute period, and said, "Well, what do you want to do? Do you want the politicians to run the banks?"

In other words, the people, through their representatives, are quite unfit to determine their economic well-being. And here is the Federal Reserve Board, a creature of the Congress. It is not something that came down from on high, as John Adams referred to George Washington, booted, spurred, ready to ride on the hapless backs of mankind, sent from heaven to do so.

□ 1630

It is responsible under the law and under the intent of Congress, but it is not now. As I have said repeatedly—and I ask you to do it now—get a dollar bill out of your pocket, and you will see if it does not say, "Federal Reserve Note," not "Treasury Note." Yet the law says that the Federal Reserve Board shall be the fiscal agent of the U.S. Treasury, not the master but the agent.

But which one of you would join me in trying to recall that responsibility and accountabilility that the Congress, in enacting the Federal Reserve Board Act of 1913, really mandated? Which one of you will join me?

I have been putting in a bill to do that since 1965. I have been putting a bill in there to abolish the Open Market Committee. You know, England and the exchequer did that until some time after World War II when freeborn Englishmen were not going to allow it, but it was in the power of the exchequer to guarantee the building up or the downfall of any government. And it is the same thing today. Yes, as long as there have been Republican chairmen and as long as there have been these powerful bankers, the Rockefellers and the others from the First City National Bank, and these great panjandrums of power who certainly are not mindful of the greatest interest of the greatest number of Americans.

And what is pitiable is that these men have again failed because of their inability to compete with these minds over in Europe that have 400 years of experience, whether it is the gold merchants or the silversmiths there or in Zurich, where we have been so vulnerable to the fickle foreign investor that, for the first time in our history, when that fickle foreign money man loses a little faith and pulls his money out of the Continental Illinois Bank and causes a collapse, we nationalize a bank.

This is a measure, my friends, that I believe, and in a manner that I know, would require under the law the Federal Reserve Board to come to this Congress for authorization, but it has been allowed to do that and put $6 billion of the taxpayers' money in there in order to nationalize and take over the Continental Illinois.

Now, how many more can the resources stand? And the Chairman of the Federal Reserve Board told me—it is in the record, too, in the proceedings of the hearings we had some 6 years ago—he told me to my face. He said, "Absolutely, we will stop at nothing. We will use all of the resources"—meaning resources of the country—"in order to save those banks."

And they have done what? The same thing they did, and others with them at that time, the Wall Street bond dealers. After World War I, they just took money from good hardworking Americans and put it in German Government bonds and in Imperial Japanese Government bonds. To mature when? In 20 years. That was 1921. Well, we got the maturity payment with Pearl Harbor.

And in Europe, our credit was used. When they could not pay back our debts with our own money, then they just repudiated the whole deal. And what happended then?

Well, let us continue because the gas pipeline construction—incidentally, the gas pipeline was completed. We did not hear one peep from President Reagan or anybody else. But what is the story? Well, the pipeline company is known as Ruhrgas, named after its basin, Ruhr. But it is principally owned by Exxon, Mobil, and the British. But in turn, Exxon and Mobil are controlled by Chase Manhattan and the First City National, so they were not about to let Ronnie Reagan mess up a good deal.

It is as David Rockefeller said on the trip back after the Polish bank crisis. We might have been hearing a lot about the freedom fighters in Poland and Solidarity, but the real issue was the $20 billion that those German, American, and British banks wanted to make sure they would not lose—at least not too much of it. And they could not care less. And David Rockefeller, coming back on the plane, was interviewed and he said, "Well, of course there are some Communist

countries that we can do and we must do business with."

Well, I remember, preceding the 1941 bombing, a lot of businessmen and, in fact, General Electric and some of the big American corporations that were actively and directly financing Adolf Hitler, said, "We can do business with Hitler." In fact, it took the famous Walter Winchell to say it. I will never forget it because I heard him on the radio when he said it.

We had the great hero, Charles Lindbergh, who made a trip and went to Germany. The Fuehrer gave him the Iron Cross, and he came back and he said, "There is nothing that can resist Germany. I visited decadent England and France, and they have nothing. That German Luftwaffe is invincible." And Walter Winchell came out one night and he said, "To all those who say that America cannot be invaded, I appeal to them to ask our Native American Indians." I remember that because it was a one-liner that caused a lot of ripple at that time.

But here we are in the 1980's, and we see the same principle, German credit involved in the pipeline with future freedom from the United States.

Yesterday in the RECORD, I put a little news item from the Dallas Times Herald in which it was said that Chairman Volcker went to Germany about a month ago, and he said, "Hey! you fellows, you've got to do something. We are now depending on you because you are coming in and you are invading American markets in such ways."

Well, of course, I gave those statistics in the first Advice to the Privileged Orders, about how the Japanese banks are supporting the University of Virginia in vital research. They had to go to Japan to get the line of credit. Why? Because they can get a line of credit from 9 percent or less, whereas here at their bank in Virginia, they could not get it for less than 15—not less than 14½ percent or 15 percent.

Why can the Japanese do that? Because in Japan there is no such thing as having any legal ability to charge anymore than 9 percent interest, but the average conventional interest is 7 percent or less.

So all of that has a cause and effect, as I have vainly been trying to point out since I wrote a letter to President Lyndon Johnson. Certainly no one can accuse me of having been partisan. The President then bucked it over to an underling in Treasury and ignored it, and then I became very critical. Nobody accused me of being partisan then. In fact, I guess I had about as much attention then as I am getting nowadays.

So I continue the reading. Remember, this is 1932.

For several years there was ecstasy in the foreign trade. All the statistical curves representing world prosperity rose like serpents rampant.

In fact, I told one of the Chairmen of the Federal Reserve Board that if they had a coat of arms, I would suggest a serpent rampant.

Result: Much more debt, a worldwide collapse in foreign trade, prostration of the statistical serpent, credit representing many hundreds of millions of labor days locked up in idle industrial equipment both here as well as in Europe. It is idle because people cannot afford to buy its products at prices which will enable industry to pay interest on its debt. Yet you will be almost persuaded that tariff barriers as such were the ruin of foreign trade, not credit, inflation, not the absurdity of attempting by credit to create a total of international exports greater than the sum of international imports so that every country should have a favorable balance out of which to pay its debts, but only this stupid way of people, all wanting to sell without buying.

□ 1640

Well, if we just change the dates, I think we can say that we have come full circle and we can go back and America can find itself as it was in its beginnings in the colonial era back in the mercantile system where we were the consumer dumping ground of the products. We no longer are the producer as of 4 years ago. From a producing nation we are now a consuming nation and a dumping ground. The German imports have risen in just a period of three-fourths of a year last year about 33 percent. The same with some of the French, not counting the Japanese; but what is more insidious is that the other day we had a hearing of the subcommittee of the illustrious gentleman that asked a while ago that I yield, the gentleman from Kentucky, Mr. CARROLL HUBBARD, his subcommittee of which I am the ranking member as well and the Banking Committee on Oversight.

I asked one of the regulators from the Comptroller's Office, because now they are beginning to get concerned after the fact, and I asked him, I said, "What is the volume of foreign financial involvement, and he said, "Gosh, I don't know."

I said, "Well, can you find out for me?"

He said, "Well, I'll try."

Now, for years I had been asking the various Chairmen of the Federal Reserve Board, but mostly the years beginning with 1971 and thereafter, what was the volume of incursion into such activities as banking of foreign interests from Arab to Japanese?

Finally, I had to go out from the Department of Commerce, because the Federal Reserve Board said they could not give me that statistic, and from the annual Federal Reserve Board reports, I extrapolated from some of their graphs and statistical tables in the Department of Commerce and in the Comptroller of the Currency, but even then it was a very conservative amount.

In New York alone, in the banking there, 25 percent of the short-term deposits were Arabic. In 1979 I rose here on this House floor after fruitlessly trying to get the committee and the committee chairman then to call hearings on this and also the contemporaneous phenomena of the main banks of our country lending in a period of 1½ years from $3 billion to $47 billion of their credit resources to nations that anybody studying their national ledgers would know did not have the ability to pay; so that today the nine principal banks of this country have such an overhang of bad loans in these countries that they exceed 100 percent of the capitalization structure of these banks.

Now, if this would have happened to a local bank back home, it would have been declared illiquid or under some kind of governmental regulatory control, if not completely closed; so that these are the things that my advice to the privileged orders, that is, we are in need of vast revolutionary change and this is my advice to the privileged orders that have been in power for more than 300 years south of the border, who have callously, cruelly, tortured, imposed tyranny, exploited, and debased their own citizens, continuing today.

It hurts my soul to see this great American leader forsaking the most precious element of all that the world looks to, moral leadership, and substituting for that worship before the false bitch goddess of war our destinies. It is folly. It is a calculated course for disaster, but it is also tied in with this other generalized program.

It also is part and parcel of the calamitous results of the misperceptions that our leaders in and out of the Congress, in and out of the Oval Office, have persisted in maintaining about the real world to the south of us and the real world in Europe.

In middle Europe we have a recrudescence of ancient history, but animosities and enmities, bitter, bitter.

France, for example, is no longer in NATO. It broke off. Nobody has ever wanted to debate or even discuss why. What is the reason?

What is the tenuous hold we have on the leadership there?

We have been insisting and we started that in the 1950's in rearming Germany, West Germany. Always the bogey man has been communism, communism. Always it has been on the basis of a refusal to want to understand the reality of the world.

In Germany today on the threshold of power is a new generation that does not recall World War II, but they see 300,000 of our military there. We have changed the designation of those troops from occupation to defense, but all you have to do is read the poets, the writers, the thinkers, the journals

in Germany, like in 1932, All you have to do is read where you have strong opinions that those Silesian Germans, which they consider refugees in Germany, want to have the Silesian province now in Poland restored to Germany.

And what is the reply of the present leader, Mr. Kohl, who was 15 years of age during World War II, as well as the Russian leader, who was also his contemporary? He was 15 years of age more or less in World War II.

We have a mindset basing 315 billion dollars' worth of defense taxes on the 1945–46 Europe, not the 1984.

I say to my colleagues, that I think is an error. Even granting that I am not 100 percent correct, and I certainly do not think I am, certainly the basis upon which I am appealing for discussion is tenable and worthy of consideration.

I am basing it on these specific things that I see and I read and I know. I read those journals. I read those newspapers. I read those books and I can see and I know that if we blithely continue to ignore what that real world is south of us, if we insist on saying that we will demand democracy and ideological purity from one nation that has just barely captured freedom for itself from the most tyrannical regime known to mankind that we imposed.

The United States cannot escape that judgment. we imposed Somoza. We kept him in power. We did not care a tinker's hoot whether there was freedom or torture or not in that country all during that regime. All of a sudden we do.

Coming north to Guatemala where at this moment American bayonets are ripping open the bellies of 7-month-old Indian children that the government has practically exterminated—talk about genocide, it has happened right here south of us with our help, with our armament. There is not one Russian gun involved in the struggle in Guatemala. It is 100 percent American. We cannot say and you do not hear the President saying that Nicaragua is shipping arms to Guatemala, yet Guatemala is on the verge of blowing up.

I say to my colleagues, what more do we want to wait on? We have to develop a policy based on our ability to still resurrect the moral leadership potential that our country can and will and should assert or reassert, if it is not too late, because in the invasion of Grenada, which the President has highly touted, we violated all basic international law, including the three basic treaties we had entered into solemnly with our Western Hemisphere partners.

□ 1650

Not any longer are we amenable at this time for that moral collective leadership. But I feel that even despite the losses, despite the fact that we confess the bankruptcy of our diplomacy by resorting to military unilateral intervention, that it is still not too late, that we can, and I have offered suggestions, I have not been critical, I have offered suggestions since the President before this one and nobody could accuse me then of being partisan. Critical, yes; partisan, no. But my essence of position and advice remains the same. And what is that? To come back to the basic tenets so proudfully enunciated by Joel Barlow, that great poet, that great leader, that great American, a revolutionary, a true democratic spirit, republican government, form of government, a Democrat, and which we have so carelessly abdicated, and for a mess of pottage have traduced.

It is no wonder to me as Shakespeare said when nations become arrogant and complacent, they become enamored of their follies and errors, and they strut in their utter confusion, laughettes, that is laughed at by the world.

Let me assure you that every single nation from Canada, skipping the United States, and south of us is not with us. They are against our basic policy thrusts.

Mind you, I include Canada because of the similarity of background, origins, aspirations, institutional government, would certainly have no communistic persuasive element in their criticism of our policies.

I yield back the balance of my time.

REMEMBRANCE OF THE VICTIMS OF THE HOLOCAUST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. SOLARZ] is recognized for 60 minutes.

● Mr. SOLARZ. Mr. Speaker, today in the beautiful rotunda of our Nation's Capitol we observed the national civic commemoration of the liberation of the Nazi death camps by the U.S. Army. And we paused to remember the 6 million Jewish victims of the Holocaust as well as the Christians, gypsies, gays, and others who perished in the incredible death machine of the Nazi regime.

It is hard to believe that only 40 years ago our Nation's fighting men set free the few remaining victims of the death camps. Some say these events never happened—yet the veterans in the audience today were there and they shall never forget. Nor can the thousands of survivors, many of whom live in my congressional district, forget or erase the memory of that terror. Nor can anyone forget who claims to be a part of the civilized world.

Eli Weisel, the Chairman of the National Holocaust Memorial Council, has eloquently explained a fundamental truth about the Holocaust, "those who forget will be forgotten, those who remember, will be remembered".

I recently looked back at the CONGRESSIONAL RECORDS covering the years from 1933 to 1945, to see how often our former colleagues in these historic Halls, referred to the horrors of the Holocaust and to the Nazi death machine which developed and perfected the art of mass killing and the dehumanization of its victims. In that period, there were some 78 specific mentions of the persecution of the Jews in Nazi-controlled Europe, and at least 11 other times, when Members called attention to the incredible horrors being perpetrated against those groups or individuals who were deemed a threat to the new order being built in Germany.

Unfortunately those speeches, hearings, and resolutions were not sufficient. The killing went on, and the cries of the dying and desperate went unheeded. Our immigration policies were unchanged, and later our military plans would not be modified to even bomb the railways and prevent the deaths of thousands of more victims at places like Auschwitz.

Many claimed not to know what was happening, and what could be done to aid those in desperate need.

But today we know all too clearly what happened, and we must be determined to ensure that those who died will not be forgotten, and that those who were responsible for these artocities must bear that burden and be brought to the tribunals of justice, no matter who they may be, nor where they may try to hide.

For we who are privileged to stand in the Halls of the Congress must never forget that World War II was not simply a conflict between competing armed forces, but a fight to overcome those who were bent on world domination and the annihilation of the Jewish people. The supreme sacrifice of over 500,000 Americans in World War II demands that we, as Americans, must never forget the fundamental distinction between the friends of freedom and the forces of unspeakable evil. And that is what today's commemorative observances were all about.

Many of us in the Congress have been deeply disturbed by the President's decision to visit a cemetery next week where lie the remains of some of the Nazis who not only were responsible for the systematic slaughter of the Jews but also for the slaughter of American POW's during the Battle of the Bulge. Our veterans and those who made the supreme sacrifice in the effort to stop the slaughter and destruction of the Third Reich demand that we pay homage to these brave men and women, and to the others

who perished in and survived the Holocaust, and thus reaffirm our commitment to the sanctity of life and the value of freedom.

GENERAL LEAVE

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Maryland [Mr. HOYER].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REMEMBERING THE HOLOCAUST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mr. HOYER] is recognized for 60 minutes.

Mr. HOYER. Mr. Speaker, I want to thank my colleague from New York who is not here today, Mr. STEPHEN SOLARZ, and could not be here, but who has himself taken out a number of special orders and who organized many of us in this House to remember on this day of remembrance, this day when we commemorate the 40th anniversary of the liberation of the death camps.

The years of the Holocaust did more than physically exterminate a people. It ravaged the soul of a people, extinguished all hope and trampled upon their dignity. A people's very survival hung in a precarious balance. The magnitude of the tragedy is without equal in history, but as we have seen in history, its poignancy and its underlying causes are not without parallel. The tragic encounters that comprise Jewish history culminated in the years of the Holocaust and reached a degree of such demonical depths of inhumanity, of such staggering dimensions of inflicted agony, that one reels from this encounter with history.

But remember, Mr. Speaker; remember, we must.

The systematic killing of one-third of the world's Jewish people occurred within a period of history in which the world appears to have been stricken with moral paralysis and naive indifference. This silence and this indecision by other nations and peoples at a time of such wretching inhumanity resounds through the deserted barracks, rooms, and hallways of Auschwitz, Treblinka, and Dachau along with the haunting, plaintive cries of its victims.

The United States and its people were among the ranks of those who stood by in silence and inaction. And so, Mr. Speaker, we must remember, and we must continue to remember to teach our young the lessons of history in the hope that never again shall we allow such an event to happen.

It is but a short journey from subjugation to annihilation and from indifference to acceptance. The scholar and author, Elie Wiesel, himself a survivor of the Holocaust, as a small boy enduring the horrors of the Holocaust said to his father: "If this were true, the world would not be silent." His father replied: "Perhaps the world does not know."

What his father was saying to Elie Wiesel was perhaps the explanation for the inaction and the apparent indifference of the world was their lack of knowledge. Would, Mr. Speaker, that that was true. It would be perhaps easier for all of us to live if the facts were that we did not know, and not knowing did not act.

But history is clear. History tells us again and again and again that we did know, that the messages were coming out, that the inhumanity of the Nazi regime not only toward the Jews but toward Christians, toward people who were different than the norm set by the Nazis were being systematically destroyed.

Our obligation, Mr. Speaker, is clear. We must continuously raise our voices so that they will be heard and our presence felt when the dignity of individuals in any nation is compromised.

Mr. Speaker, if I spoke an hour or 2 or 3, or 10 times 3, I would not have the ability to articulate or dramatize or make as real the horror of the Holocaust as we ought to remember it.

□ 1700

Remember it and be ever vigilant to make sure that we as individuals, we collectively as a House of Representatives and we as a nation never again stand by so that Elie Weisel hears from his father that the reason for action is perhaps "They do not know" when in fact we did.

Mr. Speaker, again I want to say to my colleague and friend, STEVE SOLARZ, a fighter for the rights of all people in all parts of the world: Thank you, not only for taking this special order, not only for including the remarks of many of my colleagues, but also for giving one of the most eloquent and compelling addresses that I have had the opportunity to hear.

I yield to my good friend from Texas.

Mr. GONZALEZ. I thank the gentleman for yielding.

Mr. Speaker, first I want to thank the gentleman from Maryland for his taking time and pausing and waiting this long on this special order. I wish the record to show that I join him wholeheartedly in his very eloquent statement and referral to the most tragic period known in human history, and to thank him once again for taking time and pausing to commemorate this sad and tragic event.

Mr. HOYER. I am particularly honored, Mr. Speaker, to hear the words of the gentleman from Texas [Mr. GONZALEZ] who has himself probably stood on this floor longer than any other Member, probably in history, to speak out on behalf of the rights of individuals, individually and collectively, and I am therefore honored by my friend from Texas, who is one of the great protectors of the civil rights and human rights of people in this body, that he would join me in my remarks and make those comments.

Mr. Speaker, I insert at this time in the RECORD the remarks made by Congressman STEPHEN J. SOLARZ of New York during the course of the ceremony in the Capitol today at 12 noon sponsored by the U.S. Holocaust Memorial Council, entitled "Days of Remembrance."

Four decades ago, the allied armies brought to an end the most cruel and cold-blooded evil in the long history of man's inhumanity to man.

This is most assuredly a time for both remembrance and reconciliation.

But if it is incumbent upon us to mourn the victims of the Holocaust, it is not, nor can it ever be, appropriate for us to pay tribute to the villains whose service to the Nazi regime made it possible.

The Second World War was not, as perhaps we should have learned from the global conflict that preceded it, the war to end all wars. But it was the war which forever stamped the mark of Cain on the brow of man.

Now we know, as we never knew before, the depth of depravity to which the human spirit can sink.

It was not just the splitting of the atom but, even more, the institutionalization and industrialization of death, in the service of abiding racial and religious hatreds, which has created the shadow and spectre of mass destruction under which we are doomed to live for the rest of time.

There is nothing we can do to bring back to life those whose souls and spirit were snuffed out in the gas chambers and killing fields of Nazi-occupied Europe. We cannot even adequately pay homage to the courage and dignity they displayed on the altar of hate and cruelty.

But we can invest their sacrifice with a redeeming significance, if we resolve to do everything within our power to prevent such an evil from ever happening again.

In the aftermath of the Holocaust, nothing will ever be the same. The memory of the 6 million has irrevocably shaped the consciousness, if not the conscience, of mankind.

Here in our own great country, the indifference with which we once witnessed the attempted extermination of an entire people and the elimination of a flourishing civilization, has been transformed into an emerging willingness to use our influence and our resources on behalf of the noble work of rescue and relief.

Where we once rejected the St. Louis, we have welcomed the boat people.

Where we once turned our backs on the Jews of Europe, we have participated in the rescue of the Jews of Ethiopia.

Where we once were indifferent to the fate of the Jewish people, we now provide

the support which makes possible the survival of the Jewish homeland.

This is the legacy of the Holocaust.

This is the obligation of our Nation.

From their final resting place, the 6 million call upon us to never forget.

From our earthly abode, we can only respond: Never again.●

● Ms. FIEDLER. Mr. Speaker, this week the Nation commemorates the 40th anniversary of the Holocaust. Ceremonies are being held here in the Capitol as well as throughout the country.

Several weeks ago, I was invited to speak to a B'nai B'rith chapter in Chicago. The occasion of the dinner was their own commemoration of the Holocaust.

This chapter has a number of members who are survivors of the Holocaust. Their evening, in contrast to the solemn occasions to be held this week, was one of celebration—a celebration of life and having survived one of the darkest periods in man's history.

I had prepared a speech to give to the nearly 400 people there, but the emotion of the evening did not lend itself to formal speeches. However, I would, for my colleagues and those others who would read it, like to have reprinted here the remarks I prepared for that evening.

I'm prepared to be a little philosophical this evening, because I've spent the last 2 days listening to New York cab drivers.

One of those cabbies was a Soviet Jew who came here 3 years ago. We talked about how he felt about America. For him everything in this country is marvelous. He's particularly proud that his daughter can speak english without an accent.

He escaped from a regime that has been practicing cultural genocide against our people for nearly 60 years.

I think the question facing the civilized world today, is how do we prevent what happened to the Armenians in Turkey, the Jews in Europe, or the Cambodians in southeast Asia, from ever happening again.

History teaches that the roots of genocide always sprout in totalitarian regimes. "Power corrupts, and absolute power corrupts absolutely."

On the other hand, democratic forms of government, with their emphasis on individual rights, obstructs the kind of discrimination that has led to the annihilation of our people.

So as American Jews, we should do everything we can to promote democracy. We should actively oppose totalitarianism and we should work to move authoritarian regimes toward democracy.

We have done the latter in El Salvador, and Argentina and we are doing the former in Nicaragua.

I cannot mention the Nicaraguan situation, without mentioning what happened there recently.

Shortly after the Sandinistas seized power from Somoza, they expelled the moderate elements from the junta; and the Marxist-Leninist faction took over. The moderates are today fighting as the Contras.

Not only have the communists brought in Cuban and Soviet advisors, but the PLO is a growing force in Nicaragua. In fact, the Venezuelan government intercepted a Libyan plane full of PLO arms, bound for Nicaragua several months ago.

The Sandinistas are so close to the PLO, that they call them their "blood brothers." Shortly after the moderates were forced out, a region of terror against the Jews in Nicaragua began. This culminated with the Sandinistas torching a temple while it was filled with Sabbath worshipers.

Today there are no Jews left in Nicaragua. They fled for their lives.

I am enormously proud that this 40th anniversary honoring the liberation of the Holocaust survivors, can be celebrated by a new group of Jewish survivors.

The leadership which the free Jewish community has shown, in conjunction with our government and that of Israel, has been responsible for the saving of 1,000's of Falashas.

While we are all aware of our governments part in airlifting the Falashas from the Sudanese Desert, there is something that happened a few months ago, that took place without much notice.

For years, the Libyan madman, Mu'ammar Qadhafi has been trying to acquire an atomic bomb. If he had that awesome power, you can be sure that he, and the PLO terrorists he is harboring would use it at the first opportunity against Israel.

Our government succeeded in persuading Belgium not to enter an agreement with Libya, to build a nuclear powerplant. That plant would have been capable of producing weapons grade plutonium.

While our international relations are important in our advocacy of democratic principals, we must also be vigilant in our own communities.

I have been deeply saddened at the growing public attention given Lewis Farakan, and the platform given Jesse Jackson. Their views cannot be accepted as legitimate public comment. But all we have to do is look at the influence they had on the Democratic Party platform, and its silence on anti-semitism, to know that their impact has been felt.

While I was deeply disappointed at that exclusion, I was pleased to have participated in the writing of the Republican plank against antisemitism.

Around the world, it is going to take Jews who live in the light of freedom, to stand up for those who do not.

Our actions do make a difference. For example when members of Congress protest to the Soviets over their treatment of refuseniks, they do listen.

Lev Elbert had his labor camp sentence reduced from 4 years to 1 year, after congressional action. I have been working for years on behalf of Lev Shapiro and his family. While they haven't yet received their visa, Lev has not been arrested as threatened. Since I introduced legislation on his behalf the intense harassment against him and his family has stopped.

We must, as free citizens, speak out for those who cannot. We must urge our government not to accept the status quo.

We must use our influence to cut off funds going to nations and organizations like Unesco that preach anti-semitism.

We must make certain that Israel continues to receive the funds and support she needs.

Most of all, we must be ever watchful, for all that is needed for evil to triumph, is for good men and women to do nothing.

Never again!●

● Mr. SMITH of Florida. Mr. Speaker, on this occasion of the 40th anniversary of the liberation of the Nazi concentration camps, it is our duty as public servants to pay homage to the survivors of this dark period in world history. As a Jew and an active member of the Jewish community, and as one who personally suffered family losses, I strongly feel that by recalling the horror of the Jews and others killed at the hands of the Nazis, society can prevent this tragedy from ever happening again to any people.

We are the heirs of the Holocaust and the guardian of our parents' and families' painful legacy. I strongly feel that it is our duty and our obligation—yours, mine and our children's, to honor the memory and the courage of Jews who were arrested, uprooted from homes and families, imprisoned, and murdered by Nazi invaders. We must also dedicate ourselves to Judaic causes—the plight of Soviet and Ethiopian Jewry, peace in the Middle East, a safe and secure Israel, and the cases of unprosecuted Nazi war criminals.

We know the pain of remembering the Nazi genocide committed against our people. Each survivor has their own story and private nightmare. But only by recalling that sacrifice can we prevent this atrocity from happening again. Therefore, President Reagan's visit to a German military cemetery is of concern to those of us who were personally touched by the Holocaust. Reconciliation is a goal that all Americans support, but not with the price of clouding the memory of American soldiers and Jews who died in World War II.

The Jewish people need to fight the recent rise of anti-Semitism by educating present and future generations in the lessons of the Holocaust. For the first time in Florida history, the Dade and Broward secondary schools taught Holocaust studies as part of the 9th grade world history class curriculum 2 years ago. I believe in the importance of remembering and educating our children to preserve our traditions, and most importantly to remember the ghettos, the death camps, the resistance and the martyrs.

Educational endeavors to promote an understanding of the Holocaust and its implications are springing up all over the United States. A mutual understanding between the Jewish community and other ethnic and religious groups will provide an impetus to the visible expression of our commitment to the Jewish heritage: We shall never forget. One such Holocaust awareness institute is the Southeastern Florida Holocaust Memorial Center of Miami, FL, that has an unique feature—an international network of children of Jewish Holocaust survivors who are dedicated to preventing history from repeating itself. This center included an audio-video library with the testimony of survivors

which reflects the need of the U.S. Jewish community to remember. Other programs throughout the United States include; presentation by members of the clergy, academicians, professionals, Holocaust survivors, and their children—the second generation; second interfaith workshops; and third, outreach to the non-Jewish community.

Recently, the first national mass gathering of American Holocaust survivors was held in Washington to express the commitment to our heritage that we will not forget. This message should be passed from generation to generation. The survivors and their families should be commended for their efforts to preserve our traditions. I will long remember the gathering on the Capitol steps, the singing, the prayers, the joyous reunions, and the tears. The inspiration they gave me, I will pass along to my children, and they will remember.

God bless the memory of the Holocaust victims and the survivors.●

● Mr. GILMAN. Mr. Speaker, I rise to join my colleague, the gentleman from Maryland [Mr. HOYER], in taking this opportunity to commemorate the liberation of the Nazi concentration camps throughout Europe 40 years ago. We thank the gentleman for making this time available to us on this important occasion.

In the last century our civilization had progressed rapidly. Man began stretching the limits of his knowledge on so many horizons that it is hard to fathom that we exist in a world today that is so vastly different from what previous generations knew. At the same time, as this technology was evolving, we did not conceive that it could possibly be used for so evil a purpose as to dispose of an entire race. Today, only a few survivors remain from what was Hitler's "final solution"—a systematic, organized attempt at removing all traces of the Jewish people from the many nations of Europe. The solution came close to becoming final with 4.5 million adults and 1.5 million children perishing in the gas chambers and crematoria of Auschwitz, Dachau, Bergen-Belsen, Buchenwald, Majdanek, Treblinka, and so many other factories of death.

On this 40th anniversary of the Allied liberation of the Nazi concentration camps, commemorative ceremonies are being conducted throughout our Nation. Earlier today I joined my colleagues in the great rotunda of our Capitol to mark this solemn occasion in a national civic commemoration and to witness the bearing of the colors of the troops who liberated the camps 40 years ago. These armed forces flags will be housed in the Holocaust Memorial Museum that will be erected in our Nation's Capital near the Washington Monument.

Today's memorial activities in the rotunda were especially poignant, as we were privileged to listen to the spellbinding words of U.S. Holocaust Memorial Council Chairman, Elie Wiesel. For many years he has borne the responsibility of bearing witnesss to the the Holocaust through his many writings, and by his very existence in our midst. Although I am requesting to have his entire remarks reprinted in the RECORD, a few of his words today sum up my personal feeling—"we must invoke the past for the sake of the future."

During the ceremony, we were joined by our distinguished colleague, TOM LANTOS, with his wife and grandchildren; TOM and Annette credit their survival of the Holocaust to Raoul Wallenberg, the Swedish diplomat who singlehandedly saved over 100,000 of Hungary's Jews from death in the camps. Their grandchildren are their future and ours.

We were also moved by the remarks made by our Secretary of State, George Shultz, who, in his statement, emphasized the contribution and sacrifice made by our soldiers during the course of the liberation of the camps. It is also appropriate that the Secretary's thoughts be printed as part of this special order.

Mr. Speaker, although 40 years have passed, the pain has endured. The haunting legacy left by the 6 million remains as prominent and as thought-provoking as ever. We cannot know the depth of suffering experienced by the survivors, nor the pain of discovery felt by our liberating troops. We see the newsreels and are awed by the sheer dimension of death. Yet, we were witnesses to the greatest evil man has ever perpetrated against his fellow man, and we must remember. Generations upon generations must be taught what happened 40 years ago in Europe if we are to prevent such a tragedy from ever again staining the history of mankind. We must remember, and we must state loudly and unequivocably, "never again."

Mr. Speaker, at this point in the RECORD, I am requesting inserting of the remarks of Mr. Wiesel and Secretary of State Shultz:

REMARKS BY HON. GEORGE P. SHULTZ

As the 40th anniversary of the Allied victory in Europe draws near, we in America remember not only the triumph of our soldiers and the peace-loving nations of the world, but the rescue of the Jewish people from the Nazi evil.

Every year thousands of Americans visit the memorial to the victims of the Holocaust at Yad Vashem. I myself will be going there next month. The images of Jewish suffering at Nazi hands still burn in our memories. We will never forget, and the world must never forget, the inhumanity of which mankind is capable when it disregards the sanctity, the dignity, and the human rights of all men and women. Our nation shared the grief of those who had survived the concentration camps. We mourned for those who had not. And we made one very simple pledge: Never again.

Today we are assembled to pay tribute to the American soldiers who liberated the prisoners of Nazi concentration camps toward the end of the Second World War. Nothing we say here can have much significance compared with the noble and selfless act of those American liberators. When those soldiers walked into the camps and saw the horrors wrought by Nazi fanaticism, they recognized at once the enormity of the evil they had just conquered. And they forced the world to recognize it, as well.

Never has civilization been confronted by such an unmitigated, monstrous evil as Hitler's Nazism. Never have the will and strength of the democracies been so severely challenged. Never has one people been singled out for such grievous suffering at the hands of their fellow human beings.

The rise of Nazism, and most particularly, the ruthless murder of six million Jews, together dealt an almost devastating blow to all our most fundamental hopes for the modern world. Those who prior to the war had maintained their faith in the possibility of human progress, in the idea that with high culture and high civilization would come the end of man's inhumanity to man, those who had envisioned the day when respect for the dignity, the sanctity, and the human rights of every individual on earth would be universal—all of us who shared these dreams were stunned by the Holocaust. We castigated ourselves for the world's collective failure to stop it sooner. And after the war, after the concentration camps had been liberated and the bodies of the dead had been buried, we all promised ourselves that next time it would be different. Never again would we allow a monstrous evil to go unchallenged. Never again would we appease the aggressor. Never again would we lose sight of the fundamental moral principles upon which our free society depends.

The men who liberated the camps in a sense liberated the world, as well. They put an end to the physical tragedy, though they could not put an end to the spiritual anguish. We will never forget the atrocities committed by Hitler, and we will continue to pursue the criminals who carried out his awful designs. We will bring them to justice no matter how long it takes.

But the Americans who liberated the camps four decades ago also gave us hope. They made it possible for us to look forward, to start again, to begin to restore our faith in the possibility of a better world, even while the memories of the recent horrors lived on. They offered a new chance for all peoples in all nations to join together in defense of humanity. These brave men showed that the evil ever-present in mankind can be confronted and eventually defeated by an even more powerful devotion to justice and the will to sacrifice for a greater good.

We must never forget that lesson.

The principles that the rescuers upheld, and for which many gave their lives, continue to animate heroic idealists of our own day, whose consciences will not permit them to acquiesce in injustice. It is the principle summed up by one of the spiritual mentors of the American Revolution, Edmund Burke, when he said: "The only thing necessary for the triumph of evil is for good men to do nothing."

When Andrei Sakharov denounces the systematic denial of human rights by Soviet totalitarianism, and exchanges a position of

honor and comfort in the Soviet elite for a life of persecution and exile, he honors the example and the memory of those who have fought tyranny and liberated the oppressed. So do the brave individuals administering the funds provided by Alexander Solzhenitsyn to aid the families of Soviet dissidents. And Anatoly Shcharansky's courageous stand against the Soviet police state is a testament to the human will. He not only endures, he prevails through his example to others.

We have seen the spirit of the rescuers in the mothers of Buenos Aires' Plaza de Mayo, who protested the disappearance of their children week after week, year after year—even after some of their own numbers "disappeared"—until democracy was reborn in Argentina. And that spirit lives on today in the acts of those courageous South Africans, of all races, who have sacrificed—sometimes their privilege, sometimes their lives—to protest and expose the cruelties of apartheid.

Thank God most Americans have never had to face choices like this, but a few of us have. One who did was an American officer who was captured during the Vietnam war and survived an 8-year ordeal in a North Vietnamese POW camp. As Admiral James Stockdale put it:

"From this eight-year experience I distilled one all-purpose idea. * * * It is a simple idea. An idea as old as the Scriptures, an idea that naturally and spontaneously comes to men under pressure. That idea is, you are your brother's keeper."

The magnitude of these injustices, I repeat, is not the same. They cannot be equated with Nazi genocide, which was unique in the annals of human depravity.

But the principle applies universally: We are our brother's keeper. We must never turn a blind eye to the sufferings inflicted around the world. We must always draw strength and inspiration from the courage and altruism of the rescuers.

And we must never delude ourselves. Mankind's capacity for evil did not die in the bunker with Hitler. We see evil in the world all around us, in efforts to impose totalitarian authority on unwilling peoples, in efforts to subjugate, suppress, and sometimes vanquish entire races, classes, and religions.

The legacy of the rescuers admonishes us all to stand up and fight back.

The memory of the American liberators will live on forever, as will the memory of the evil they put an end to. We can only be thankful, and proud, that Americans were willing to make the ultimate sacrifice to defend freedom and the rights of mankind. May we always have the courage, and the vision, to meet such challenges. Only then can the better world we all seek become a reality.

REMARKS BY ELIE WIESEL, CHAIRMAN, U.S. HOLOCAUST MEMORIAL COUNCIL

Secretary Shultz, Secretary Marsh, distinguished members of the Senate and the House, members of the U.S. Holocaust Memorial Council and its Advisory-Boards, Ambassador Rosenne, Ambassadors:

Forty years after the event that remains a watershed in recorded history, let us remember its awesome legacy.

Let us remember those who took up arms and fought and those who chose to die with prayer or in resignation—and those who chose to live but were killed all the same.

Let us remember those who were tormented by the SS executioners and those who were persecuted by their accomplices, those who had faith in humankind and those who lost it.

Let us remember them all, for all shared the same fate—all were condemned for belonging to an ancient people whose forefathers had stood at Sinai and received the commandment: "Thou shall not kill."

Old and young, rich and poor, beggars and visionaries, scholars and poets, sages and workers, all were marked, all were singled out, all were hunted down: the heroes perished as martyrs and the victims as heroes.

They shared one dominant obsession: to be remembered. The enemy sought to destroy their memory. He killed them twice, the second time by burning their corpses, dispersing their ashes, so as not a trace of their beings remained.

Let us remember them, friends, for they had no friends. Forty years later we know what they, then, could not know: that they were alone, outside society and civilization, outside time.

Forgotten by humankind, forsaken by the Almighty Himself, they despaired alone, fought alone, died alone. Alone they faced mighty legions, among the mightiest in Europe.

Why was so little done to save them? Why weren't the railways leading to Auschwitz bombed? Why didn't the advancing armies alter plans and liberate the camps one day earlier?

These questions are painful for they demonstrate the insensitivity of our own allies to Jewish agony and death—but they equally indict the Russian government. Russian tanks were closer to Auschwitz than the Allies' were. Their warplanes could have bombed the railways in minutes—why didn't they? And what are the Russians doing now?

Whereas our people, our nation, and other Western nations are now endeavoring to serve the noble cause of memory, the Russian regime is still today guilty of distorting it. In the monuments of Auschwitz, the largest killing center of European Jews, the word Jew hardly appears. In Buchenwald, it is altogether eliminated—as is the memory of the valiant, brave and wonderful American soldiers who liberated us. Shame on Moscow—shame on the Communist rulers of East Germany who twist and distort and falsify history.

And honor to you, distinguished representatives of the American people.

In saluting these flags, Secretary Marsh, we proclaim our belief that evil must and can be defeated. Each flag enfolds its own tale of heroism and nobility. We honor the youth of America and of the Allied countries who fell in the Battlefields to liberate humanity from its nightmare. It was a moral war, a war between the forces of light and the forces of darkness, and it is in the presence of this conquering light that we gather to celebrate liberty. In our celebration we do not seek revenge or humiliation.

Just as forty years ago we did not seek revenge against the fathers, so today we do not seek humiliation of their sons and daughters. We seek, however, a commitment to memory and a true reconciliation, one based upon historical truth.

Mr. Secretary, we have not learned much—surely not enough—of the lessons to be drawn from the Holocaust experience. But we do know that one of them is to humiliate no one and another is to seek to enlarge the scope and intensity of human brotherhood. Yet another is to be sensitive to other people's feelings. And so we look with understanding upon our government's efforts to deal delicately with German sensitivities.

But what about American sensibility? Why is that not a factor in the high-level decision process? Did no one consider the pain and the shame some, if not most Americans, would feel upon learning that the President of the United States plans to visit a cemetery in which there are a good number of SS graves?

Have our policy planners forgotten what SS stands for? Auschwitz was conceived, structured, elaborated, perfected, built, organized and implemented by the SS. They were the killers of Jews primarily, but not only of Jews. They butchered Poles and Czechs, French and Dutch, Norwegians and Danes, Yugoslavs, Ukrainians, Greeks, Gypsies, homosexuals: Auschwitz was a universe and the SS were its gods. Why then should our President visit and honor their cemetery as though they had been nothing but patriotic soldiers who died for their fatherland?

Have we forgotten that those SS units were a part of the troops that launched the Battle of the Bulge; that they infiltrated American lines wearing American uniforms? That they slaughtered defenseless American war prisoners at Malmedy? Why did no one at the decisionmaking level think of what all those Americans who lost a son, a father, a brother might feel as they watch their leader—our leader—visit such a cemetery?

Mr. Secretary, please be our emissary. Tell those who need to know that our pain is genuine, our outrage deep and our perplexity infinite.

In this hall—in your midst—we feel strengthened. Your commitment to justice equals ours to memory. Thanks to you we are given to believe that what happened once will not happen again. Laws will not be distorted again—nor will man's vision of his own power on earth.

These ceremonies mean much to us, survivors. During a few moments we participate in something intimate and awesome. We are grateful to you for sharing them with us.

For us, to remember means to remain vulnerable. We see what you will never see: lines of shadows forming nightly processions under distant, tormented skies, drawn by mysterious sounds to eerie encounters with death and eternity. We discern some faces—we gather some tears, some words, some sighs, and make them our own. Do they hurt? They do. And why shouldn't they?

Memories of fear and silence, words of solitude and melancholy eyes filled with terror and despair. They represent our legacy. What will happen to it? Who will receive it? By what means will it be communicated? In agonizing image and anguished words? How are we to tell a story that cannot but must be told?

Somewhere in Eastern Europe, in places called Treblinka and Majdanek, Belzec and Auschwitz, hundreds and hundreds, thousands and thousands of human beings are being led into modern, scientific death-factories. With words and pictures we may follow them to the gate. Not beyond. What is awaiting them inside is so terrifyingly simple—and so heartbreakingly human—that one has no right to describe it.

And yet, we want everyone to know. We want you so much to know.

We invoke the past for the sake of the future; not to dwell on our pain, but to exorcise it. We remember what has been done to

the victims, not to spite the world, but to enlighten it.

If we forget, we too will be forgotten; but if we remember, we too will be remembered.●

● Mr. KOLBE, Mr. Speaker, earlier today, I stood together with hundreds of other Americans in the rotunda of this great Capitol to mark the "Days of Remembrance." It is altogether fitting and proper that we commemorate the 6 million European Jews who were martyred during World War II in this, the 40th spring after V–E Day.

There are no words to convey the totality of what the Holocaust signifies. The magnitude of this most heinous of Nazi crimes is beyond easy verbal description. Indeed, a vast body of literature ranging from scholarly histories to memoirs encompasses this subject. Fortunately, in recent years the neglect of the Holocaust in school texts has finally been addressed. This topic is now better placed and discussed in classrooms around the country.

The Holocaust has increasing significance for the world we live in today. It stands out as the single time in this century when morality vanished. The condemnation of civilized men and women everywhere is justifiably directed at the Nazis and their collaborators. But it is equally true that the judgment of history cannot be too kind to those persons and governments in the free world who were indifferent during the 1930's and whose actions were too little and too late in the early 1940's.

It is not my purpose to account for a history of the events that struck down the Jews of Europe between 1933–45. But the painful lessons of the past must not be forgotten. They must serve to point out to us where we failed, where we learned, and how we can prevent a repetition.

This month marks the 42d anniversary of the uprising in the Warsaw Ghetto. The particulars of this event have been admirably detailed in a number of excellent works: The Bravest Battle by Dan Kurzman, Uprising in the Warsaw Ghetto by Ber Mark, and in novels such as The Wall by John Hersey and Mila 18 by Leon Uris. The horrors endured by the inhabitants of the Warsaw Ghetto are beyond imagination: starvation, exposure, disease, torture, and murder. And yet, the revolt begun by a small band of survivors stands out as the most outstanding example of resistance to nazism through the whole of World War II. Armed with but a few guns and light weapons, the fighters in the ghetto held the SS off for over a month. Long after the revolt had been subdued with flamethrowers, aerial bombardment, the introduction of poison gas, starvation, and the systematic destruction of all buildings, Jewish fighters refused to surrender. Their martyrdom was not in vain because it served as a catalyst for future revolts that would take place in other ghettos and death camps.

It was also in the month of April 1944, that the Germans began implementing the "Final Solution" in Hungary. With the knowledge of Auschwitz fully known in the West, the Nazis set forth to exterminate the 400,000 Jews of Hungary. Even when the war was clearly lost and the Red Army was rapidly closing in, the Germans never lost sight of their goal in making those areas of Europe under their control free of Jews, or "Judenrein."

The Hungarian situation posed a challenge to the United States. Unlike previous years of Nazi rule that found the United States looking on passively as millions of Jews were put to death, our Government swung into action. Through the offices of the War Refugee Board, Raoul Wallenberg of Sweden was dispatched to Hungary to save as many lives as possible. In the midst of a continent dominated by madmen, Wallenberg rose to heroic heights of endeavor. Using every conceivable means, he confronted the architect of the "Final Solution," Adolf Eichmann, and thwarted the Nazis at every turn.

Wallenberg, at great personal peril, persuaded the Hungarian Government to stop the deportations to Auschwitz. When Eichmann attempted to get the death trains rolling again, Wallenberg went to border stations and literally prevented the trains crammed with people from leaving Hungary. In all, Wallenberg and his colleagues are credited with saving the lives of tens of thousands of Jews. One can only speculate on how many others could have been rescued had the truth of Auschwitz been known earlier. Even so, in an era of darkness and indifference, Wallenberg represents a shining light of courage and compassion.

The decision by this body to confer honorary American citizenship on Raoul Wallenberg in the hope of learning the true facts about his whereabouts from the Soviet Union is laudatory. Whether he is still alive or not, Wallenberg will always live on in the hearts of men and women of goodwill—a giant among heroes.

It was also in April of 1945 that American soldiers first glimpsed the hellhole that was Nazi Germany. As our forces pushed on toward victory, the concentration camps in western Germany were liberated. Along with our British allies, we learned that the atrocity stories had been woefully understated. Our vocabularies soon included places such as Dachau, Bergen-Belsen, Mauthausen, and Thereisenstadt. As we recall V–E Day, we must also remember these places where millions of innocent men, women, and children lost their lives. If there is to be a lasting meaning in why we fought the Second World War, it is to be found in the evil that conceived an ideology based upon racial arrogance, bigotry, hatred, and militarism.

Even now, four decades later, there are constant reminders of the Holocaust affecting us all. The Office of Special Investigations in the Department of Justice continues to research those instances where Nazi war criminals and collaborators gained both admittance and citizenship in our country. Since the program began in 1979, a number of mass murderers who fraudulently entered the United States have been denaturalized and deported.

We hear from time to time that old crimes should be forgotten and that the money spent on prosecution of war criminals could be better used elsewhere. Nothing could be more wrong. Murder is the ultimate crime. There can be no statute of limitations on murder. We cannot compromise this fundamental principle of justice. Regardless of how long ago, irrespective of age, those who went beyond the pale of civilized man and commited genocide must be ferreted out. I applaud the efforts of the Department of Justice and will lend my full support to their continued actions in this struggle to bring murderers to justice.

In a related vein, I wish to add my voice to those here in the Congress and out who seek to bring the "Angel of Death," Josef Mengele, to justice. Few men represent the embodiment of evil that we find in this loathsome human being. His role in selecting victims for the gas chambers at Auschwitz and in experimenting on people, particularly children, speaks volumes about the Holocaust and its horrors. For years Mengele has flouted the rules of society. But we will not rest until he is brought before the bar of justice. It is my hope that the cooperation of everyone working to apprehend Mengele will result in his early incarceration.

No expression of any of us can properly convey the significance of the events we remember today. No words can erase the scars, ease the pain, or undo the tragedy inflicted on so many millions of our fellow men and women. Over 1 million Jewish children were murdered along with 5 million of their parents and families. These losses are irreplaceable and we shall forever be the poorer for them. However, by acknowledging where we erred and by resolving to never let this happen again, to a degree we insure that the 6 million did not die in vain. We must not forget. No; we cannot ever forget the tragedy we call the Holocaust.●

● Mr. MACK. Mr. Speaker, I want to thank my distinguished colleagues for participating in this very important special order "On the Days of Remem-

brance of the Victims of the Holocaust."

Last fall, as many of us took time from our daily activities to pause in an earlier reflection of the 40th anniversary of the Holocaust, I had the opportunity to participate in services at our Nation's Capitol—memorial services that were the most moving of any I'd ever experienced.

For several minutes, I closed my eyes and as I listened intently to speaker after speaker retell the tragedies of the Nazi regime. I found myself truly understanding (as well as one who had not been there could) the horror, the pain, the suffering, and the absolute hopelessness which gripped those people, people who for no other reason other than the fact that they were Jews, were subjected to the most inhumane of treatment.

The world community could never properly make amends for such injustice but what all of us can and must do is dedicate ourselves to ensuring that time and distance do not allow us to ever forget.

For to forget is to somehow lay ourselves vulnerable to a reoccurrence. And that must never again be allowed to happen.

That is why it has become so very important that the doctor responsible for hundreds of thousands of deaths and hideous medical experiments at Auschwitz—Josef Mengele—be tracked down and returned to West Germany for trial. We must all pledge to make the bringing to justice of Josef Mengele, and others like him, a top priority.●

● Mr. COUGHLIN. Mr. Speaker, 1985 marks the 40th anniversary not just of the end of World War II, but of the liberation of hundreds of thousands of Jews and other captives from Nazi concentration camps. This weekend, starting with a memorial ceremony at the Monument to Six Million Martyrs, Philadelphia will welcome the inaugural assembly of the American Gathering of Jewish Holocaust Survivors. It is a time for remembering all those who died in the concentration camps and those, like Raoul Wallenberg, who risked their lives to help save others.

Among the darkest pages in the history of mankind are those that mark the Holocaust—the systematic slaughter of 6 million Jewish men, women and children during World War II by Nazi Germany and its minions. Would that this Remembrance of the Victims of the Holocaust be unnecessary. But it is necessary. It is necessary that we recall this unprecedented barbarism of the Holocaust so that today's generations—and those yet to come—understand what can happen when hatred overcomes reason.

The Holocaust, so overpowering in numbers killed and depravities committed, numbs the heart and the mind. The tableau is so unbelieving that it becomes an almost surrealistic nightmare from the newspapers and news films of a past to be forgotten. This we cannot let happen, lest history be permitted another atrocity equal or greater.

The Holocaust is remembered also so we do not forget that lesser slaughters of peoples because of religion, color or ethnic origin have been taking place around the globe since the end of World War II. Along with the rest of the civilized world, perhaps, we in this country have looked the other way or have not exerted enough effort to prevent future slaughters or to bring those responsible to account.

I am reminded at times like these of an old World War II saying: "First, they came for the Jews and I did not speak. Then, they came for the Catholics and I did not speak. Then, they came for me and there was no one left to speak." Let us remember the bitter lessons of history as we look for peaceful solutions to today's problems. Surely, it is not an impossible dream to envision a world where Jews, Christians, Moslem, blacks and whites can live together without terror and war.

I know I shall be haunted constantly by the memories recalled when I stood at the Martyrs' Shrine, Yad Vashem, in Jerusalem. In that cradle of Christianity, Yad Vashem stands as an unforgiving reminder of how far we have traveled from Bethlehem to Dachau, and how little we have learned. Let it also stand as a reminder that the civilized world can do better—and we must.●

● Mr. ROE. Mr. Speaker, it is with a sense of dignity and moral purpose that I rise to participate in this special order commemorating the victims of the Holocaust on the 40th anniversary of the liberation of the death camps.

As a young GI who helped take part in the liberation of one of those infamous camps, I was able to witness first hand the victims of those heinous crimes against humanity that were committed there. What I saw there can never be erased from my mind, and it can never be forgotten, certainly not in 40 years.

Forty years is the biblical time for a generation, and it is highly appropriate that we mark this 40th anniversary of the liberation of those camps with these solemn and dignified ceremonies. The countless generations of Jews and non-Jews who were gassed to death and were the victims of the most inhumane tortures ever conceived of by so-called civilized leaders cry out to us to remember what was done to them and why it was done to them. One especially thinks of the more than 1 million Jewish children who perished in the gas chambers and crematoria built by the Nazis, and of the lives, careers, families, and contributions to society that those children were never able to fashion. Neither can we forget those righteous gentiles, who, at the risk of their lives, tried to protect and shield their Jewish friends and relatives from the Nazi butchers.

Only a generation after the Holocaust and the liberation of the camps, voices are being raised in America and elsewhere claiming that the Holocaust is a hoax, that the death camps are a myth, that 6 million Jews were not murdered merely because they were Jewish, and that Jewish leaders helped participate in the slaughter of their own people. Nothing could be further from the truth! Six million people do not simply disappear, towns and communities do not vanish into the night, and a whole culture and civilization does not fade away in 6 years. The death and destruction of European Jewry was planned, plotted, and carried out by Hitler and his henchmen, and we dare not forget that fact. Neither can we forget that what the Nazis did to the Jews and all those peoples who they deemed as "subhuman" was done in accordance with the laws that the Nazis promulgated in Germany, laws that were defended and justified by Nazi judges.

Voices are also being heard today that seek to stop the continued attempts to bring all surviving Nazi criminals to justice. Mr. Speaker, we must reject that effort, because 40 years is a mere moment when compared to the enormity of the Nazi crimes, and we will not be able to rest until justice has been done and the remaining Nazi war criminals are tried for the monstrous crimes that they committed.

On this day commemorating the victims of the Holocaust and the liberation of the survivors, we would do well to pause and consider what the Jewish people recited as they were being led to the gas chambers: "I believe in perfect faith in the coming of the Messiah, and even though he may tarry, I still will wait for him." For the Jews who survived Hitler's hell on Earth, the American GI's who liberated the camps were the Messiah, and to those soldiers every Jewish person alive today is eternally grateful.●

● Mr. BOLAND. Mr. Speaker, I am pleased to join with my colleagues in commemorating the 40th anniversary of the liberation of the Nazi death camps.

Time is a great healer of physical and emotional wounds. There are some events in human history so monstrous, however, that we cannot afford to allow the passage of the years to fully mask their horror. Such an event was the Holocaust.

It is almost difficult to imagine, 40 years after the fact, that human beings could subject other human beings to the suffering that was a fact of daily existence in the death camps. The uprooting of an entire population

and the separation of families which followed, the slave labor and the lack of adequate food, health care, and clothing under which it had to be performed, and the deaths—the 6 million deaths—which resulted from the Nazi's program of extermination in all of its twisted manifestations nearly defy comprehension. Because it is so hard to believe that such a thing could happen, it is imperative that we never forget that it did. In our remembrance we must commit ourselves as individuals, and as a people, to ensuring that, to the extent we can control events in the world, similar acts of horror are not repeated.

Today we particularly remember the inmates of the death camps, the other victims of the Holocaust, and the heroic Allied soldiers who fought their way across Europe to end their oppression. In remembering, we underscore their sacrifice and the need to speak out and act to prevent similar sacrifices in the future. The lessons of the Holocaust were lessons learned at a terrible price, and we can ill afford to forget them and risk paying that price again.●

● Mrs. BURTON of California. Mr. Speaker, I join my colleagues today in commemorating the Days of Remembrance of the Victims of the Holocaust. As the world marks the 40th anniversary of the liberation of the Nazi concentration camps, it is painfully obvious that too many Americans are uninformed about the origins, the terrible toll, and the horrors of the Holocaust.

Today we remember the victims of the Holocaust, so that we may keep that memory fresh, and thus ensure that history does not repeat itself.

To further this effort, today I have introduced legislation to express the sense of the Congress that the teaching of the Holocaust be included in the curriculum of high school students. The Holocaust is one of the most important periods in modern history and yet it receives only cursory treatment in many, if not most, history courses taught at the secondary level. Clearly, we want our children to learn about the Holocaust so that they can be vigilant in their efforts to prevent any possible recurrence of this dark episode in history.

This resolution encourages the inclusion of the study of the Holocaust in the history or social studies courses developed by State and local school administrators. No history that gives short shrift to the Nazi atrocities can be considered comprehensive—students miss an important moral lesson—a lesson our civilization can ill afford to forget.

There is nothing more important than to make sure the memory of the Holocaust never fades. Let us today rededicate ourselves to a future where such a tragedy will not occur again and let us not forget the millions who gave their lives for their faith and love of freedom.●

● Mr. ANNUNZIO. Mr. Speaker, I rise to join with my colleagues in commemorating the 40th anniversary of the Days of Remembrance of the Victims of the Holocaust. The Holocaust was one of the darkest chapters in human history, and remembering what happened during this period of annihilation and barbaric atrocities committed by the Nazis must be the basis for preventing similar tragedies from occurring in the future.

The world must never forget the unspeakable crimes systematically perpetrated against the Jewish people and against all humanity, and we must continue to keep the lessons of this destruction alive for all generations to follow.

When I was in Israel, I had the opportunity to visit Yad Va'shem, the stirring monument to the six million Jewish victims of the Nazis' persecution. The photos, artifacts, library, and ashes of the victims from every death camp serve as a permanent living memorial to the victims of the Holocaust, informing all those coming after the Holocaust generation of this terrible occurrence.

Our commemoration in the House of Representatives may be a painful reminder of a dark past. However, it is essential that our Government take the time to remember this outrageous crime against humanity, and to commemorate the victims of the Nazis. Out of our efforts come hope and renewal culminating in an unwaivering determination to prevent future genocides and defend liberty, self-determination, and religious freedom for all.

Yom Hashoah, the day of the Holocaust, is an important step in firmly implanting the memory of the Holocaust and the permanent documentation of this tragic event in the annals of human history. The horrors of the Holocaust and the memory of the millions who perished at the hands of the Nazis should never be forgotten by our Government. All of us who value justice and human freedom must work continually to insure that the Holocaust is not forgotten and that we all learn from the enormity of this atrocity.

Mr. Speaker, on these solemn days of remembrance, I join with the many Holocaust survivors living in the 11th Congressional District of Illinois which I am honored to represent, and all Jews throughout the world, as we remember the victims of the Holocaust and renew our commitment to preventing another genocide from ever occurring again.●

● Mr. ROSE. Mr. Speaker, I have only two words to say about the unspeakable horrors of the Holocaust, and the enduring tragedies it generated. These words are—"never again."

Never again, so long as mankind endures, Mr. Speaker, should civilized people let holocausts occur.●

● Mr. FRANK. Mr. Speaker, this evening we commemorate the 40th anniversary of the liberation of the concentration camps operated by the Nazi regime. I am greatful to my friend and colleague Mr. SOLARZ for calling this special order so that this body can mark this occasion in an appropriate fashion. Nothing we do can ever bring back to life the millions of innocent individuals who perished under that evil tyranny, but we must do everything we can to keep the horror of the Holocaust fresh in our memories. Freedom now flourishes in West Germany; this is a democracy which was built with the support of the American Government and people. The nurturing of the free institutions and friendship of our former adversaries, Germany and Japan, is one of the proudest achievements of American foreign policy. But it would be foolish to suggest that this is any reason to be less mindful of the terrible infamy that was inflicted on the Jews and other innocents during that war. Quite the opposite, Mr. Speaker. Our love of liberty is only strengthened when we recall what happens to a nation that allows itself to fall under a regime of terror. We take time to mark this anniversary, and we carry the sadness in our hearts throughout the year.●

● Mr. MORRISON of Connecticut. Mr. Speaker, I join my colleagues today in honoring the survivors, relatives, descendants, and friends of the 6 million Jews who were viciously and systematically slaughtered in Germany during the Nazi era of the 1930's and 1940's. This year marks the 40th anniversary of the liberation of the concentration camps.

The Holocaust was an event so tragic and so senseless that even now, 40 years later, we find ourselves asking why it happened and, more importantly, how it could have happened. We are still not able to fully understand the incredible depravity of the Nazi planners and executioners and the shameful indifference of the rest of the world at that time.

The purpose of this special order, I believe, is not to dwell on the despair of the Holocaust, but to remember it well and to use its memory to strengthen us in never allowing such a thing to happen again. The Holocaust was not just a grotesque crime against Jews, but a crime against all of humanity. What happened in Auschwitz and Dachau could happen again elsewhere as long as there is tyranny among the powerful and silence among those able to prevent such crimes.

The burden is on all nations that value human life and share a belief in even the most basic human rights to

keep the memory of the Holocaust alive and to never again allow such cruelty and barbarism to occur.●

● Mr. LEHMAN of Florida. Mr. Speaker, the 1985 national observance of the days of remembrance of the victims of the Holocaust began on Sunday, April 14 and continues through Sunday, April 21. Sponsored by the U.S. Holocaust Memorial Council, of which I am a member, the annual national civic commemoration takes place at noon today in the rotunda of our Nation's Capitol.

This year marks the 40th anniversary of the liberation of Europe from nazism. Representatives of the U.S. Army units that liberated the concentration camps will also participate in the national commemorative ceremony today.

Sadly, not all remnants of nazism have been eradicated. Neo-Nazi and right-wing fascism remains a most disturbing phenomenon. And there are others as well who would sooner forget the Holocaust than pay heed to its lessons. It is our continuing obligation to remember those who were the victims and to commemorate them—the men, women, and children whose lives were brutally taken from them.

The Holocaust is and always will be a part of German national heritage, as it will be a part of the dark side of recent history. Whether today marks the 20th or the 40th anniversary, the horrible deeds committed remain the same. Justice demands remembrance.

I strongly urge President Reagan to cancel his plan to visit a cemetery in Bitburg on his upcoming trip to West Germany. To lay a wreath at the graves of the SS, those elite Nazi soldiers who committed unspeakable crimes against humanity, would be to forget what our country has finally begun to remember.

Elie Wiesel spoke about the meaning of remembrance at the first national civic Holocaust remembrance ceremony in the Capitol rotunda in 1979. Shortly thereafter, Congress agreed to establish a living memorial to the victims of the Holocaust and to honor their memories in annual days of remembrance ceremonies. Elie Wiesel's story, "The Holocaust: Beginning or End?" is reprinted here for our attention.

THE HOLOCAUST: BEGINNING OR END?

Allow me to tell you a story. Once upon a time, far away, somewhere in the Carpathian mountains, there lived a small boy, a Jewish boy, whose dreams were filled with God, prayer, and song.

Then one day, he and his family, and all the Jews of his town, were rounded up and exiled to a dark and evil kingdom. They arrived there at midnight. Then came the first separation, the first selection.

As the boy stood with his father, wondering whether his mother and sisters would come back, an inmate came to tell him the truth; this road led to the final destination of the Jewish people; the truth was there; in the fire, the ashes, the truth was in death. And the young boy refused to believe him; it had to be a lie, a nighmare perhaps, this could not be happening, not here, not in the heart of civilized Europe, not in the middle of the twentieth-century. "Father," said the boy: "If this were true, the world would not be silent. . . ." "Perhaps the world does not know," said the father. And father and son walked on, part of an eerie nocturnal procession, toward mysterious flames of darkness.

Thirty-five years later—almost to the day—the same Jewish boy stands before you with a deep sense of privilege, to remind our contemporaries that in those times of anguish and destruction, only one people—the Jewish people—were totally, inexplicably abandoned—only one people were simply, cynically handed over to their executioners.

And we, the few survivors were left behind to bear witness and tell the tale.

On my first night in the camp, which was the last for most of my friends, my family, my relative, my teachers, I wrote:

"Never shall I forget that night, which has turned my life into one long night, seven times cursed and seven times sealed. Never shall I forget that smoke.

"Never shall I forget the little faces of the children whom I saw being thrown into the flames alive beneath a silent blue sky. Never shall I forget that sky.

"Never shall I forget those flames which murdered my hopes forever.

"Never shall I forget that nocturnal silence which deprived me, for all eternity, of the desire to live.

"Never shall I forget those moments which murdered my soul and turned my dreams into dust, into smoke.

"Never shall I forget these words even if I am condemned to live as long as God himself."

But what does one do with such memories of fire—with so many fragments of despair? How does one live in a world which witnessed the murder of one million children and remained world?

Those of us who were there are haunted by those whose lives were turned into ashes, by those whose cemetery was the sky.

Terror-stricken families hiding in ghetto-cellars. Children running with priceless treasures: a potato or two, a crumb of bread. Endless lines of quiet men and women on their way to mass graves, reciting the Kaddish, the prayer for the dead, over themselves. Teachers and their pupils, mothers and their infants, rabbis and their followers, rich and poor, learned and illiterate, princes and beggars—all pushed inexorably toward death. "Father," says a young boy," is it painful to die? Must I die?" "Think of something else," answers the father. "Think of tomorrow."

Treblinka and Ponar, Auschwitz and Babi Yar, Majdanek and Blezec: What happened? Did creation go mad? Did God cover his face? Did the God of Israel turn against the people of Israel? The question everyone asked upon arrival inside the gates was: What does it all mean? Was there a design, a secret pattern?

We didn't know, we still don't. How can anyone explain evil of such magnitude? How can anyone comprehend so much pain and anguish? One cannot conceive of Auschwitz with or without God. But what about man? Who can understand the calculated deprivation of the killers? The indifference of the onlookers? When Jews did have a possibility of leaving Europe, how many countries were there ready to accept them?

What was the Holocaust: an end or a beginning? Prefiguration or culmination? Was it the final convulsion of demonic forces in history? A paroxysm of centuries-old bigotry and hatred? Or, on the contrary, a momentous warning of things to come?

Turning-point or watershed, it produced a mutation on a cosmic scale, affecting all possible areas of human endeavor. After Auschwitz, the human condition is no longer the same. After Treblinka, nothing will ever be the same. The Event has altered man's perception and changed his relationship to God, to his fellow man and to himself. The unthinkable has become real. After Belsen, everything seems possible.

Admittedly, I belong to a tarumatized generation, hence I speak of my people, the Jewish people. But when I, as a Jew, evoke the tragic destiny of Jewish victims, I honor the memory of all the victims. When one group is persecuted, mankind is affected. Still, for the sake of truth, we must remember that only the Jewish people's extermination was an end in itself. Jewish victims, stripped of their identity and of their death, were disowned by the whole world. They were condemned not for what they did or said, but for who they were: sons and daughters of a people whose suffering is the most ancient in recorded history.

Every occupied nation, every underground movement received help from London, Washington or Moscow. Not the Jews: they were the loneliest victims of the most inhuman of wars. A single airdrop, a single rescue mission would have proved to them, and to the enemy, that they were not forgotten. But, Mr. President and friends, the truth is that they were forgotten.

The evidence is before us: The world knew and kept silent. The documents that you, Mr. President, handed to the Chairman of your Commission on the Holocaust, testify to that effect. Actually, pictures of Auschwitz and Birkenau had reached the free world much earlier. Still, when the Hungarian Jews began arriving there, feeding the flames with ten to twelve thousand persons a day, nothing was done to stop or delay the process. Not one bomb was dropped on the railway tracks to the death factories. Had there been a similar Joint Session of Congress then, things would have been different for many Jews.

And yet, and yet when the nightmare lifted, there was no hate in the hearts of those who survived. Only sadness. And, paradoxically, hope, hope as well. For some reason they were convinced that out of grief and so much suffering a powerful message of compassion and justice would be heard and received. They were convinced that the Messiah would come and redeem the world. They were convinced that, after Auschwitz, people would no longer yield to fanaticism, nations would no longer wage war, and racism, anti-Semitism and class humiliation would be banned forever, shamed forever.

Little did we know that, in our lifetime, we would witness more wars, new racial hostilities, and an awakening of Nazism on all five continents. Little did we know that, in our lifetime, books would appear in many languages offering so-called "proof" that the Holocaust never occurred, that our parents, our friends did not die there. Little did we know that Jewish children would again be murdered, in cold blood, by killers in Israel.

The survivors advocated hope, not despair. Their testimony contains neither rancor nor bitterness. They knew too well that hate is self-debasing and vengeance

self-defeating. Instead of choosing nihilism and anarchy, they chose to opt for man. Instead of setting cities on fire, they enriched them. Many went to rebuild an ancient dream of Israel in Israel; they all chose to remain human in an inhuman society, to fight for human rights everywhere, against poverty everywhere and discrimination, for humankind, always.

For we have learned certain lessons. We have learned not to be neutral in times of crisis, for neutrality always helps the aggressor, never the victim. We have learned that silence is never the answer. We have learned that the opposite of love is not hatred, but indifference. What is memory if not a response to, and against, indifference?

So let us remember, let us remember for their sake, and ours: memory may perhaps be our only answer, our only hope to save the world from the ultimate punishment, a nuclear holocaust.

Let us remember, let us remember the heroes of Warsaw, the martyrs of Treblinka, the children of Auschwitz. They fought alone, they suffered alone, they lived alone, but they did not die alone, for something in all of us died with them.●

● Mr. KEMP. Mr. Speaker, today I joined my colleagues, friends, and survivors of the Holocaust in the Capitol Rotunda to help commemorate the 40th anniversary of the liberation of the Nazi concentration camps. It was an indescribably moving ceremony in which the regimental colors of the liberating troops were presented to the U.S. Holocaust Memorial Council, Sam Bloch led the Kaddish, and the Partisans' Hymn was sung by Cantor Isaac Goodfriend.

We remember and commemorate the victims of the Holocaust. By doing so we accept the obligation this memory places upon us to help prevent this evil from ever occurring again. The U.S. Holocaust Memorial is a memorial to those who died, and a reminder that eternal vigilance is required so that the potential for evil within humanity is not realized.

My colleague from New York and member of the Holocaust Memorial Council spoke eloquently on the lesson that the United States has learned from the Holocaust. He pointed out that where we had once turned our backs on the Jews of Europe, we have participated in the rescue of the Jews of Ethiopia; where we were once indifferent to the fate of the Jewish people, we now provide the support which makes possible the survival of the Jewish homeland.

I would also like to quote from the heartfelt words of Secretary of State George Schultz, who said

The men who liberated the camps in a sense liberated the world as well. They put an end to the physical tragedy, though they could not, and we should not, put an end to the spiritual anguish. We will never forget the atrocities committed by Hitler, and we will continue to pursue the criminals who carried out his awful designs. We will bring them to justice no matter how long it takes.

Our good friend Elie Wiesel reminds us that we must invoke the past to preserve the future, that there is a lesson in remembering, that if we forget we too will be forgotten, but if we remember we too will be remembered. Elie accuses the enemies of World War II of killing their victims twice, the second time by buring the corpses and distributing the ashes. I concur and I go on to say let's not kill a third time—by forgetting.●

● Mr. FISH. Mr. Speaker, during the 1930's the early 1940's, a commitment by the United States to rescue the Jews of Europe was tragically lacking. The history of the Nazi period haunts us with the lost lives of innocent men, women, and children—some of whom could have been saved if the governments of the Western world had shown more compassion. This period of history, for me, clearly establishes that Jews suffering persecution today are of special humanitarian concern to the United States.

This concern, is the basis for my policy of strong support for Israel. A strong, secure Israel guarantees that never again will Jews have to depend on the sufference of other nations for survival.

In addition, there is more the United States can do. We have recently seen tangible evidence of this in the key role the United States played in support of the transfer of Ethiopian Jewry to Israel.

But while we see renewed hope in the return of Ethiopian Jewry, the situation in the Soviet Union worsens.

As the ranking Republican on the House Judiciary Committee, I am one of the four Members of the House of Representatives consulted by the administration on levels of refugee admissions. My commitment to a U.S. refugee policy that is responsive to the needs of Soviet Jews is a matter of public record. I have asked for and received assurances from State Department officials that should the Soviet Union allow increased numbers of Jews to leave, we will raise our refugee admissions accordingly. I also have been assured that there will be no delay in initiating consultations under the emergency flow provisions of the Refugee Act if the gates are opened.

It is important that all know that our Government is unified behind one policy. We must firmly and consistently pursue our humanitarian aim and stand ready to act quickly and with compassion in response to any relaxation in current Soviet policy.●

● Mr. DWYER of New Jersey. Mr. Speaker, it is with pride and sorrow that I join my colleagues in commemorating the 40th anniversary of the liberation of the death camps. In light of this historical tragedy, Mr. Speaker, Americans and many foreign friends are inspired to observe this important day year after year.

History books tell countless stories of individuals who suffered at the hands of the Nazi regime. Over 6 million innocent Jewish men, women, and children were slaughtered during World War II. They were subject to a multitude of physical and psychological abuses at the hands of the Nazis. The world must never forget the unspeakable crimes committed against the Jewish population. I suggest that, as the leaders of this great Nation, we must at the very least, pay tribute to those who have died and suffered immeasurably.

As we reflect upon this terrible atrocity let us continue to challenge violations of human rights wherever and whenever they occur. Privileged as we are to live in a democratic society, we tend to take for granted the freedom of speech, of thought, and of worship that we enjoy. Let us pledge our support for the countless prisoners of conscience and the dissidents who continue to challenge the policies of authoritarian and totalitarian regimes that have led to direct aggression and the enslavement of nations.

The memory of the millions of innocent human beings who perished at the hands of the Nazis will live forever in the hearts and minds of those who cherish individual freedom, if we act to ensure those memories. Today's commemoration is an important aspect of that process and one which will have great meaning to freedom loving people everywhere.●

● Mr. FORD of Michigan. Mr. Speaker, I wholeheartedly support Senate Joint Resolution 15 calling for the designation of May 7, 1985, as "Helsinki Human Rights Day." It was nearly 10 years ago that the 35 signatories representing Europe and North America established the Helsinki Final Act pledged to respect human rights and fundamental freedoms, including the freedom of thought, conscience, religion, or belief, for all without distinction as to race, sex, language, or religion. On May 7, human rights experts from all 35 signatories will convene in Ottawa, Canada, to review the provisions of the Helsinki accords dealing with many aspects of East-West relations, including standards relating to human rights.

Unfortunately, the great potential of the Helsinki accords has not been fulfilled to date. Continuing violations of human rights in the areas of family reunification, right to travel and emigrate, and freedom of religion, throught, and conscience are evident. Such is the case for Abe Stolar, an American citizen and Soviet refusenik. In 1931, Stolar went to the Soviet Union with his parents who were natives of that country. When they arrived, their U.S. passports were taken and Soviet citizenship papers were issued. Stolar later received a new U.S. passport and he intended to stay only 2 years, but found he could not leave the country, even to visit Europe. In

1975, he, his wife, and son filed for exit visas to leave the Soviet Union, however, they were denied the right to emigrate.

Stolar has lived as a law-abiding citizen in the Soviet Union for the last 52 of his 71 years and the only crime he has committed is filing for exit visas with his family in 1975. Now after waiting 9 long years. Stolar has been informed that he, his wife, and son, Michael, can emigrate from the Soviet Union. However, he has been told that Michael's wife will not be allowed to join the Stolar family as they begin their new life in Israel this Saturday, April 20, 1985. The Government of the Soviet Union has refused to recognize the marriage of Michael and his wife Julia because it was performed by a rabbi. Such action is clearly a violation of the spirit of the Helsinki accords which guarantee freedom of religious practice to citizens of the signatory nations.

As a member of a free nation we must speak out against such violations by the Soviet Union. We must seek the enforcement of the Helsinki accords and impress upon the Soviet Union our objection to the denial of basic human rights. It is my hope that the government officials in the Soviet Union responsible for this unfortunate situation reconsider their decision and allow Julia Stolar to join her family this weekend as they emigrate to Israel.●

● Mr. BERMAN. Mr. Speaker, as we gather this year to observe the days of remembrance of the victims of the Holocaust we should make particular notice of this year being the 40th anniversary of the liberation of the extermination camps. It brings to mind that the single greatest abuse of human rights happened within our lifetime. Yet, the President of the United States tried to excuse himself from visiting a Nazi concentration camp on this trip to Germany because, as he said, "the German people have very few alive that remember the war, and certainly none of them who were adults and participating in any way." It is to combat attitudes such as this—that the Holocaust is merely another event mentioned in history books, to be studied then forgotten—that we stand here today.

When the soldiers of the Allied army broke through the gates at Auschwitz and Dachau and Treblinka and all the other camps which carried out the Nazi extermination policy they broke through a veil of ignorance that was wrapped around most of the world. These soldiers became witnesses for us all. If anyone will claim that the deaths that we remember today did not happen—there are men throughout this world who can say, "They did. I know. I was there."

Witnesses are a crucial part of remembering the Holocaust. It is not something of the distant past totally unrelated to current society. It cannot be excused as something which could not happen in our modern, civilized world. Today, the honor of living amongst those who survived the nightmare and the lesson of living amongst those who perpetrated the terror makes each of us a witness. And as witnesses we have a responsibility. We know what happens when people look the other way. It is up to us to pass the lesson on to our children and make sure that they never forget.

By remembering, we ensure that the world never forgets that a people and a culture were destroyed for all time. There are still Jews today, but the world that encompassed the Jews of Europe will never return. During the Nazi reign two-thirds of all Jews in Europe were destroyed; with them died a cultural tradition of 1,000 years. Although the fact of their existence has been extinguished, they will never be completely gone as long as we remember.

Members in this Chamber know better than most that the public never likes to be reminded of unsettling or bad news. This is one time when they must have the facts placed before them. This is one issue that we cannot afford to forget about. As lawmakers we must also review the facts, because the Holocaust was based firmly in Nazi law.

The laws were written to define Jews, to determine how Jews would be treated; then, step by step, the Jews were denied their rights. They lost their jobs, they could no longer participate in society. Next they lost their property, or were forced to sell their titles, claims, and ownership. Finally, they were separated from the rest of society and crowded into ghettos; after that the mass killing began. In Eastern Europe, the process sometimes was not so orderly. Teams of security police would rove from town to town simply exterminating the Jewish population. The expropriation of land and property followed later.

When we look back on these events we do so not to magnify this catastrophe above all others that resulted from the Nazi era. But this evil was unique among all others. The destruction of the European Jews was a cold and careful implementation of a policy. Vast bureaucratic machinery was created to carry out that goal. And every aspect of the murder, within the context of the Third Reich, was perfectly legal.

The complete extinction of the Jews as the "final solution" makes the Holocaust a uniquely Jewish issue. But we must never forget the others, the Gypsies, the Poles, the Slavs, and the remaining 30 or so nationalities who were represented amongst the millions of victims. The Nazi's chose to eliminate those who were "inferior" and in being allowed to make such a judgment, made all mankind a Holocaust victim.

There are many things to remember about the Holocaust. These are only some of them. As we commemorate the casualties of this abomination, we should celebrate its survivors. These witnesses contribute much to our understanding. We commend them for their courage and their ability to maintain their humanity after experiencing unimaginable evil. Today we let them know that we will not forget.●

● Mr. LEVINE of California. Mr. Speaker, this is the week during which communities throughout the world will gather to commemorate the 40th anniversary of the liberation of the Nazi death camps. We are gathered here this evening to join in sharing the painful memories of the Holocaust and in paying tribute to the more than 6 million innocent lives that perished. We also join in sharing the survival of all those who escaped the death sentence of the Holocaust and the survival of a people the Nazis sought to annihilate.

This anniversary is an occasion marked by both solemnity and hope—solemnity because it is a reminder of one of the most heinous and horrific eras in the history of humankind, and hope because it is a reaffirmation of the lives of all those who survived and all those who are yet to come.

The lessons of the Holocaust must be taught from generation to generation so that humanity will never forget those dark days of 40 years ago. Through this commemoration we help to fulfill our collective responsibility to transmit the lessons of history, to endeavor to make known the unspeakable horridness of it, and to help ensure that never again will a Holocaust happen to any people.●

● Mr. DAUB. Mr. Speaker, I am grateful for this opportunity to join my colleagues in reiterating our commitment to the commemoration of the Holocaust. Such demonstrations are critical if we are to remember the moral obscenity of a government against 6 million people. In this combined effort of myself and my colleagues in Congress, we seek to alert the world to the atrocity which was the Holocaust and which still haunts us today.

The unbelievable human suffering that millions of Jews experienced in Nazi concentration camps must never be forgotten, erased by a government, or distorted through history.

We have not forgotten those victims who suffered beyond anything we have experienced or can even imagine today. But most importantly, this commemoration today shows our resolve to continue to work toward freedom of religion, freedom of association, and freedom from oppression and physical

harm, so that this tragedy can never happen again.●

● Mr. ERDREICH. Mr. Speaker, I join with my colleagues today in this very important special order commemorating the 40th anniversary of the liberation of the death camps.

Forty years ago, the world witnessed the atrocities of the most shameful and horrible events of all times. It was an era of madness and evil. Six million Jews were put to death along with several million other victims of the Nazi's heinous crimes.

One only need to talk to the survivors of the Holocaust to become even more cognizant of the reality of the horrors. These survivors are growing small in number making it even more imperative that we never let their spirit, their courage, their message to the world be forgotten.

Mr. Speaker, this is a day of reckoning for those who choose to forget and for those whose crimes go unpunished. It is a chapter of history we must never forget for the greatest crime would be to let the memory of the Holocaust fade and not to learn from the horror of this history.

In his remarks in last year's Holocaust Days of Remembrance ceremony, Elie Wiesel, chairman of the U.S. Holocaust Memorial Council, poet, author and a survivor stated:

Memory is not exclusive. Memory is inclusive. It is because we remember the singular aspect of the tragedy that we remember its universality. We must also think of tomorrow as though it would be part of our memory. I think the world unleashed madness 40 years ago and that madness is still dominating spirits and minds of too many countries. There are too many signals of danger-racism, anti-Semitism, bigotry, fanaticism. We are scared of what humankind could do to itself. Therefore we tell the story.

We must continue to tell the story, to speak out against genocide of any people or faith, and most of all to remember.●

● Mr. ADDABBO. Mr. Speaker, I rise to join my colleagues in commemorating the 40th anniversary of the liberation of the Nazi death camps.

The greatest tribute we can pay these millions of martyrs is to ensure that their ordeal is never forgotten and their tragedy is never repeated. Let us resolve that we will never again remain silent in the face of evil.

While we all happily mark 40 years of peace in Europe, it would be wrong to commemorate this event without properly recognizing the victims of the Holocaust. The peace we now enjoy came at a very high price. We cannot mark this anniversary without remembering the victims who suffered the most at the hands of the Third Reich. Their tragedy must be a constant reminder to us of the price of silence.●

● Mr. GREEN. Mr. Speaker, I address this distinguished body today both as a Member of Congress and of the Jewish community. I rise, on this Day of Remembrance, to honor and commemorate those who suffered the atrocities and inhuman cruelty of the Holocaust.

This year we mark the 40th anniversary of the liberation of the concentration camps in which 4 million of our people were gassed, and where an additional 2 million died of starvation, disease, and torture during the Second World War. I therefore believe it fitting, as we reflect on the horrors of 40 years ago, that we recall the worlds of those brave men and women who were the liberators, or witnesses, if you will, of the victims of Hitler's atrocities.

"They were the first free men," Elie Wiesel has said, "to see the world of horror," Although they have spoken simply of what they confronted, the sense of anger and profound sadness which their words convey are testimony to the enormity of the tragedy which they uncovered. The following are statements taken from testimony of U.S. Army Veterans given at the International Liberators Conference in 1981:

Anton Bild, a soldier involved in the liberation of Dachau recalled that:

After six months of combat duty with the Seventh and Third Armies, I thought I could take just about anything. But to be confronted with the realization of the concentration camp Dachau was an earth shaking, cataclysmic event in my life. It was a day for me when humanity failed miserably in the world. As we approached the camp and came into the railroad siding, I was confronted with these thirty or forty boxcars crammed with people that had starved to death in the cars. No one should have to face a death like this.

The recollections of Richard Elberfeld, a liberator at Bergen-Belsen, are no less horrible to contemplate. "We found thousands of unburied bodies when we went in. We found other thousands of people who were near death, who were in the huts or the fields . . . I had no idea anything like this really existed."

Other eyewitnesses to the horror of the camps speak of lingering and tormenting memories. Kenneth Colvin, assigned to the 515th Medical Clearing Company, administered emergency medical treatment in many of the camps. "We didn't talk much about what we saw," he recalled. "It wasn't until about 15 years after the war that this thing hit me, I started getting nightmares. About 2 years ago I thought I could handle it. I went back to Katzen Friedhoff. All that was left of that camp was half of the crematoria door, and I just collapsed when I saw that.

Some recollections, such as that of Leon Freedman, a liberator at Buchenwald, evoke an overwhelming sense of sadness. Noticing the pitiful condition of small groups of people gathered along the road as the 76th Army Division to which he was attached approached the camp, Mr. Freedman recalled that:

It became clear to us that something dreadful had happened. As we approached this huge complex of buildings with barbed wire fences, we began to notice a very distinct foul odor * * * And shortly before coming to the gates we had noticed some railroad cars on a siding. One was partially opened up. We could see bits of clothing. We noticed that it was composed all of children's clothing, shoes, sweaters, hats, mittens, coats, clothing of all description, only of children. We couldn't seem to understand it. We saw no children.

Many of the eyewitness accounts focus on the response of the victims to the arrival of their liberators. Many greeted their rescuers with only dazed silence. For others it took several days before they would be convinced that their tragic ordeal was finally over. Marie Ellfrity, who served as a nurse at Mathausen, related that still others, a few days after the liberation, "simply laid down and died. They refused to die as prisoners, they wanted to die in freedom, and so, after they were convinced of who we were and why we were there, they simply laid down and died."

Perhaps most disturbing of all is testimony which speaks of the indifference of the outside community to the plight of the victims. Reginald Ashby of the 11th Armored Division, liberators of Gaussen One, recalled that for him:

The most shocking thing that took place was the indifference to the civilian population to what had been going on in the camp. They seemed to have been well aware of what had been going on. I couldn't then, and I can't now, come to any conclusions as to what could have possibly gone on in their minds to have permitted something like this to take place. There are no words to describe this kind of condition. It's beyond comprehension, what people can do to people.

Another liberator, Alexander Breuer, recalled that because he spoke German he had been ordered to join a team designated to negotiate the surrender of Weimar. In their negotiations with the city's mayor, Breuer recalled that the subject of Buchenwald had been brought up as an aside. "Incidentally," the Americans were informed, "there is this place called Buchenwald." The mayor was asked to bring them to the camp and escort them through it. Although he knew of Buchenwald he had never seen it; he was unaware of its enormity. Three days after his visit he took his own life.

The Rabbi Gunter Plaut, attached to the 104th Timberwolf Division, which liberated the camp at Nautthausen on April 11, 1945, stated his belief that until that morning many of our men didn't really fully understand what the war was all about. Reflecting on what he himself had seen on that morning, Rabbi Plaut felt it to have

been too enormous a crime against humanity to be the responsibility of man alone. "I believe," he said, "that God must also share a measure of responsibility. His responsibility is and was that He gave us the freedom to decide. He gambled on us in a sense * * * and in this instance He lost."

The events which these men and women have recalled represent the most tragic and shameful ever to have occurred. They describe a world from which all compassion and sense of human dignity and worth had been driven out, a world of abysmal horror and loneliness for the Jewish people. The crimes of Nazi Germany were of such a magnitude that they must never be forgotten, and such that they can never be forgiven. In the anger, outrage, and sadness which their testimony expresses, however, we can also extract a measure of hope that events such as these will never be allowed to occur again.

Thus, it is of paramount importance, on this Day of Remembrance, that we refresh in our minds the tragic memory of the Holocaust and vow to do what we can to assure that it will never happen again.●

● Mr. MANTON. Mr. Speaker, I would like to begin by commending my distinguished colleague from New York, STEPHEN SOLARZ, for organizing the special order today commemorating the 40th anniversary of the liberation of the death camps.

One might think that it would be trite to say we must never forget the Holocaust, but unfortunately, it appears that that message is one we must strongly emphasize today. The President has added a ceremony to commemorate the victims of the Holocaust as an afterthought to a planned trip to Germany to celebrate 40 years of peace. Such an event should have been a priority on the President's agenda. Therefore, today's special order takes on an even greater importance.

The murder of 6 million Jews, as part of a planned genocide on behalf of the Nazis, is a part of world history that we can never forget. All people of the world share in the responsibility for that horrible chapter in our history. It was only 40 years ago that the camps were liberated, survivors of that horrible experience are alive today, and yet we hear people questioning the occurrence of the Holocaust. This is an insult to those who died in the Holocaust, their families and the survivors.

It is hard for us today to understand the terror of the "Crystal Night" when Jewish stores were looted and destroyed, Jewish homes were broken into and thousands of Jews were rounded up and put onto cattle cars for that long, and usually fatal trip to the Nazi concentration camps. It is hard for us to understand today how anyone who lived near the camps could not be outraged by the stench from the ovens as Jewish men, women, and children were cremated. When an event is too confusing or too painful, it is human nature to say that is the past, we must put the past behind us. But that is something we cannot affort to do.

Each and every one of us has a responsibility to teach our children about the Nazi regime, its philosophy and the tragic events which were a result of Hitler's reign of terror. Only by understanding what happened during those dark years, by knowing that the Nazi philosophy is the antithesis of what we in America believe and what we fought to preserve in World War II, only by never forgetting, can we ensure that it will never happen again.

Mr. Speaker, today I celebrate the liberation of the Nazi death camps by the Allied soldiers and I mourn the tragic, meaningless deaths of millions of men, women, and children. But the best way to commemorate the liberation, and the most effective way to show respect for the murdered, is to remember their deaths and to pledge, never again.

● Mr. LENT Mr. Speaker, I join my colleagues today in observing this Day of Remembrance for the Victims of the Holocaust. In conjunction with the U.S. Holocaust Memorial Council, ceremonies are taking place here in our Nation's Capital and throughout the country commemorating the end of the Holocaust and the liberation of Nazi death camps at the end of World War II.

As participants in this solemn tribute, we believe very deeply in the need to remember the cruel and inhuman tragedies of the Holocaust. It's almost inconceivable that one group could systematically annihilate 6 million innocent Jews. Yet that is what happened.

It's a painful and emotional experience to look back and recall what happened during that terrible chapter in history, 40 years ago. It's painful to think of the families torn asunder, the lives ripped apart, and the broken bodies left behind.

Nevertheless, the survivors and witnesses to the horrors of the Holocaust are a living testament to the truth. And so their story is never forgotten; we must maintain a constant vigil against anyone who would belittle the suffering of the Jewish people, or deny that the Holocaust ever happened. We have an important responsibility to past and future generations to see that such evil crimes never go unchallenged. We must ensure that the memory of the Holocaust is always fresh in our minds and in the minds of our children. Only in this way, can we hope to prevent such atrocities from recurring.

The story of the Holocaust must also be a story of faith and freedom. In the death camps and throughout much of Europe during the war, the mere act of existence was a form of resistance. This is a story of humanity overcoming inhumanity.

Our actions today are in menory of the victims of the Holocaust. Let us send the message that they have not suffered in vain, and let us reaffirm our pledge to mankind for the future when we say: "Never again."●

● Mr. GALLO. Mr. Speaker, today I join with my colleagues in national observance of the Days of the Victims of the Holocaust. Forty years ago, 6 million Jews and millions of other victims were murdered in the systematic genocide perpetrated by the Nazis. Deprived of their political rights, occupations, and property, the Jews in Germany suffered physical violence, mental anguish, and death at the hands of the Nazis. We come here today because, in the words of Holocaust survivor, noted author and theologian, Elie Wiesel, "This is our duty as well: to bear witness. For 6 million Jews who perished in the Holocaust * * * for the Holocaust was a Jewish tragedy with universal implications."

My personal understanding of the Holocaust comes from my long association with refugees of the concentration camps who reside in my district. From them, I have learned of the horrors of the Holocaust and of their personal tragedies. From their example, I have also learned the depth of the human capacity for strength and survival.

It is then our duty to remember those whose lives ended in the Nazi concentration camps and to insure that they not be forgotten. We must also give comfort and support to those who survived and through much courage and strength have managed to rebuild their lives and contribute greatly to our own.

For them, I solemnly stand here in remembrance of their loss and the loss to the world of 6 million Jews and others who perished in Nazi Germany.●

THE GROWING FEDERAL DEFICIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. PENNY] is recognized for 60 minutes.

Mr. PENNY. Madam Speaker, the crucial issue facing this Congress is how best to reduce these growing Federal deficits. Our national economy cannot withstand deficits of $200 billion piled one on top of the other. It is unfair to future generations to burden them with this debt.

These huge Federal deficits result in the Federal Government borrowing

much of the money that ought to be available to the private sector. That increased Federal borrowing crowds out the private sector and, therefore, results in our citizens and our businesses and our farmers paying higher rates of interest than they ought to pay.

If the deficits continue to grow, at some point in time interest rates will only go higher, and when that point arrives, we will see a recession beyond the depths of any recession we have experienced in recent history.

Those higher interest costs would push even more farmers off the land, would push even more businesses into failure, and will bankrupt our Nation.

Those high deficits will have an effect on the value of the dollar. The value of the dollar is high because we are financing this deficit by the sale of Treasury bills, many of which are purchased by foreign investors. And it is the purchase of those Treasury bills by foreign investors that helps to push up the value of the American dollar.

So not only our farmers but other industries in America that are sensitive to interest rates, that are sensitive to the value of the dollar, and in need of export markets are adversely affected.

So we are losing millions of American jobs; in fact, we are exporting American jobs due to these Federal deficits.

Mr. Speaker, I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I really want to compliment the gentleman for what he is talking about.

Mr. Speaker, I am the mother of an 18-year-old, and I suppose the gentleman's age is closer to the 18-year-old than to mine, but nevertheless if I were a young person in this country I would be very concerned about where the jobs are going to be, and I find that my young son and his friends in college are all saying, "Where are our markets, where are we going to have jobs, where are we going to be able to work and who is talking about it in this country?" I think when you see the trade deficit, when you see the foreign deficits, I think all of those things become terribly critical.

Nobody has really drawn a road map to the horizon. We keep worrying about our ingrown toenail. The only problem is now that ingrown toenail is this massive debt. I always remember people used to say, "Blessed are the young for they are going to inherit the national debt."

Well, they are going to inherit a lot at the rate we are going.

So I think what the gentleman is talking about makes an enormous amount of sense.

You look at this whole hemisphere and the questions for young people are not only where the jobs are going to be and where we are going to be competitive in all sorts of different areas, it is also going to be what kinds of relations are we going to have in this hemisphere and where are they going to end up, what are they going to end up doing?

I think the last thing they want are jobs going into South America in some kind of a war. That is one of the things that we will be debating next week.

I think when they talk about jobs what they have in mind is something where they can have a decent standard of living. We see the cutbacks in student aid really meaning that it is going to be much tougher for kids to get an education. I think everybody in the world is aware of the fact that America is going to need more education, not less. You have to have a real optimistic view of the world to think everybody is going to be able to get by with less education.

I think what we talk about here in a big, big picture type of view, translates down to the man on the street in a very painful manner. We talk about all of this. I was on the streets of Denver talking to one of the policemen who said, "Well, I always thought I was middle class, and now I find I am not." I said, "What do you mean by that?" He said, "Well, I have been a policeman all my life, and I thought I earned a good living. My daughter has been admitted to the Colorado School of the Mines"—which is a private and expensive school—and he said, "I cannot send her. I feel absolutely terrible. I feel like I have let my whole family down. I cannot send her. I have other children and I would have to sell them" and so forth and so on. So she would have to compromise at a much lower level.

Now the Colorado School of the Mines is a high tech type of education. Those are the kinds of jobs to see young people with capabilities but whose parents feel that they cannot send them because they do not have the money, is very troublesome. So no matter what part of the equation you look at, there does not seem to be a lot of progress. There also does not seem to be much progress in the whole piracy area. When we talk about jobs, we keep forgetting that probably the one area where America can compete will be in intellectual properties, intellectual properties, which is writing books, writing music, doing software for computers, doing video tapes, doing whatever it is because of that wonderful American creativity which is there, the essence of it being able to be distilled, and so forth and so on.

□ 1710

But what is happening to it? It is one of the few things left in our whole international trade area that has a balance of trade that is favorable. We make more money exporting records; we make more money exporting movies, exporting TV shows, exporting software, but it is all getting ripped off.

This administration is not being aggressive at all about pursuing pirates, and some of those pirates are our best friends, supposedly; pursuing them as they copy this stuff. You watch more and more of our companies having to move offshore or move somewhere else because what, when you back up and think about what would you have to sell an automobile for if people could drive it somewhere and make a copy of it?

So I could buy an automobile and I could go make a copy of it and give it to you. And then you could go make a copy of it and give it to your friends, and so forth and so on, and they would never get another penny. The only money you would get would be from the first automobile, because I can tell you everybody would go make a copy from then on.

That is what is happening in books; that is what is happening in records; that is what is happening in videotapes; that is what is happening in software. As a consequence, you cannot sell the first item for enough money to keep the money coming back to you so you can then go ahead and design the next automobile or the next thing.

We understand the intangible property; that is, automobiles, but we do not understand it when it moves to intangible property.

So I think what the gentleman is talking about is really important, and there are so many different facets of it, and I just do not see an aggressive enough policy going on, and a defining of what the policy is. I only see that we want to a meeting and agreed to have another meeting, or we went to a meeting and we were really pleased because they did not growl at us; they smiled at us; or we went to a meeting and they said, "Well, maybe next year."

I also know the gentleman comes from a State like mine, that has a lot of agriculture. I think that is one of the areas, too, where you could have all sorts of things being done.

For example, we could send beef from Colorado to some of the countries that are our trading partners—to whom we owe great debts at the moment, now that America has become a debtor nation. We could send cattle over there first class, on airlines, sitting in seats and still make money at their own domestic market.

We could do all sorts of things. I think that is very important to point out; that it is not just the Japanese; it is us or Europe. They protect all of their agriculture markets.

I am for free trade, but it must be reciprocal. I think America competes,

but it must be reciprocal. You have to allow our products in freely, and you also cannot allow piracy to go on.

Piracy is going on in some of the Southeast Asian countries that rely on us the most to defend them.

Where are the jobs? It goes back to the 18-year-olds sitting around in the college dorms saying to me, "Hey, you're Scott's mother, you're supposed to know everything, where are the jobs? What should we study? You know, what's going to be out there?"

At this point, it is really very hard to answer that question. I do not see an aggressive enough policy going on in that area.

I thank the gentleman for bringing this up.

Mr. PENNY. I thank the gentlewoman for her comments. It is of great concern to all of us, what we can do to reinvigorate our economy, to make sure that the jobs are there for these students today, students who in the very near future will be leaving their vocational school or their college, and planning to enter the work force, but in what capacity?

As I started out remarking in just one area, Madam Speaker, our policy is woefully inadequate because we are piling up these deficits that are exporting jobs, because the high deficits lead to a high value of the dollar, and it means that we lose that competitive advantage in the world market; other nations take up those markets from us, and we are left with declining employment in a number of our American industries.

The high deficits are hurting the farm sector, because of the high interest rates that it causes for our farmers. Farmers have to borrow a lot every year to put in their crop, and when they cannot make a profit at the end of that year because, again, the value of the dollar is high and they cannot sell as much overseas, that higher interest rate gets rolled forward year after year, and pretty soon our farmers go out of business; and when they fail, businesses and banks in their community fails and the employment of the American workforce—and about 20 percent of our jobs in America are jeopardized because that is how many of our jobs are related to agriculture, one way or another.

So what does this kind of a deficit policy mean to the future? It means kind of a shaky future for a number of these students that are preparing their minds for their place in society. but we are not offering them a place because those jobs may not be there on the trend we are following.

Mr. SCHROEDER. If the gentleman will yield further, one of the interesting things that I find is, I grew up with my parents saying that it was the duty of each generation to turn the country over to the next generation in a little better shape than they found it. If you had just accomplished that, that you had accomplished a lot.

I am not sure we are going to be able to say that to this next generation. We are certainly not turning it over in better shape; we are turning it over in much deeper debt.

The other piece of all this is how precarious it all is. As the gentleman mentioned, when you have this high level of the dollar being so high, then we attract foreign money in here.

All that has to do is change a little bit, and it all goes home. Then they control whether our economy comes crashing down, not us. So I do not really like relying on other people keeping their money deposited in this country. That is also quite frightening, as you look at it, and as you attract "scare" money, then it starts to scare you; it can turn around and bite you right back if the mood changes, and we have all seen those kind of swings back and forth.

If the gentleman would not mind my changing the subject just a tad, and I feel bad about interfering in the middle of his special order on something that I think is so terribly important.

I wanted to talk about one other thing that I had mentioned this morning that some people did not understand. I wanted to explain it a little bit further. There are several things.

I had mentioned this morning how I stand here with a German name, and am really rather offended by what the White House is saying they have to do not to offend German sensibility.

I find that going to Bitburg and laying a wreath offends my German sensibilities. I do not think that Bitburg stands for what Germany stood for. It is not what we are celebrating in this celebration going on in June.

Europeans are celebrating the 40th anniversary of the end of World War II in Europe. The end of World War II in Europe means that they finally contained a government that had gone mad; that is, Nazi Germany.

But they also liberated Germans from that government, too. There were some people there who did not like it, believe it or not.

So to go there and lay a wreath in the cemetery where the SS is buried—and the SS were not innocent young boys that were called in; these were the hardcore, these were the intelligence officers, these were the guys who ratted on people. They knew full well what they were doing. They were party members.

To go there violates the whole idea of what this celebration in Europe is about. I think it is very important for German-Americans to speak out on that, too. If I had to look and say, What is the spirit of Germany? The spirit of Germany is Konrad Adenauer, who tried to rebuild Germany in a very difficult period after the war, to return to the democratic principles and to return to freedom and so forth.

That is who we should be celebrating, that Germany was allowed to finally rise up from under this yoke.

I also said this morning how offended I was that the TV cameras were showing the White House advance team going around and visiting different concentration camps, looking for the right one.

Now, what does that mean? Are you looking for the nicest one? One with carpeting? Come on.

□ 1720

There is nothing nice about the concentration camps. They were all horrendous. I think one of the brave things that Germany did, and it took a lot of guts, was to preserve those concentration camps so that people could go see them and see how horrible it was and to see what happened when a government goes mad with power. I have gone through several of those camps. I must say it was the most horrendous experience of my life. It causes nightmares forever, because you see it, and you just cannot believe that it went that far; but it did.

So here is the German Government, they are not afraid to run from their past. They set it out there, and they say, "this was wrong, and we want people to come here because we never want this type of horrible thing to happen again."

And we have the President saying he is not going to go there because it would offend German sensibilities.

I think it is all mixed up. And I certainly hope over this weekend that they can get it straightened out, because when you see the leader of the free world putting wreaths on a cemetery where there are SS graves, something is turned upside down, and I am sure Europeans are scratching their heads trying to figure out, "what in the world is it that the Americans think we are celebrating here?"

I also think that out of respect to the millions of people who were lost and the awful Holocaust that went on in World War II—and I realize this is probably not your age span, but it was mine, and I do not feel like a total dinosaur it was in my age frame that that terrible thing occurred—we should remind ourselves that it was not something that happened in the deep, dark, ancient past, it happened within a generation that is still alive and kicking and around. Germany is doing everything that it can to make sure it never happens again. We should, too. We should dedicate ourselves to that over and over again.

I think, again, our young people would feel more comfortable about where we are steering the course of this Government if they saw that kind of commitment coming out of this

Government, not only to where the jobs are, but to traditional things the Government has always stood for—human rights, liberty, freedom, all those kinds of things. They are not just words. They are conditions, they are conditions that are very hard to maintain. Someone is always tempted to steer a little further.

If I had my way, I think I would mandate that every leader of every state had to go through those concentration camps, because it is such a graphic example of how horrendous absolute power can be. We all say absolute power corrupts absolutely. You do not understand what it means until you walk though there and see what human beings did to other human beings and the kind of insane rationale they put behind it.

But the United States is going out on the wrong side on this, and it disturbs me very, very much. My German sensibilities are disturbed by the way we are coming out on the wrong side. I would really like to make that very clear. I only had a minute to do it this morning.

So I again thank the gentleman for yielding to let me clear that up.

Mr. PENNY. I certainly do not mind yielding to the gentlewoman for that purpose. It is an important issue and one that does need further discussion.

As someone who serves on the Veterans' Affairs Committee, I am fully familiar with the attitude of American veterans about this upcoming trip by the President to Germany, and they are somewhat baffled by the confusion over the schedule, baffled on the one hand that the President would schedule that kind of a visit to a cemetery where some of the soldiers who were responsible for those atrocities are buried, and baffled, as well, by the indecision that the President seemed to have over whether or not to visit one of those concentration camps as a reminder that in fact we do not want the world ever to witness that kind of holocaust again.

I am reminded of last year when the President went to Europe to celebrate the D-day invasion, the time when all of the allied forces came together to launch an offensive that eventually brought about the end of that war and the end of that Nazi regime, and how proud we all were as our President stood there reminding us of the principles that brought the allies together and the kinds of freedoms that our Nation stood for and the freedom that we now have helped to provide for Europe, the kind of freedom that their governments have maintained in the years since that war. It stands in sharp contrast to the pride all of us—veterans and all Americans—felt when the President was there just last year commemorating that day to have this kind of contradiction exist in the schedule that he has set for his trip back in Europe in the coming weeks.

Mrs. SCHROEDER. If the gentleman will yield further, I think the gentleman makes an excellent point, because the spirit of Normandy was one that we were all very proud of, and we were very proud, even though it was also painful to recall the horrendous losses that were sustained by American young people and by young people of all of our allies.

But nevertheless we won, we persevered, and we were willing to pay a very high price for it.

And yet by these actions, this June and this May, it appears that that was all celluloid, that we did not understand what it was all about, we did not understand the depth and the feeling and what it all meant. And I just really hope this can get clarified. Maybe it is because of the transition in leadership, maybe it is lots of other things. I do not know what it is. But I certainly hope it all gets clarified.

I had the privilege of being in Europe last week with parliamentarians from all over Europe who were meeting in Stockholm when this all came out, and they were stunned. They were saying, "What? what? He is doing what? Does he know what Bitburg stands for? Does he know who is there?"

We can try and brush it off here and say, well, it was just innocent 17-year-old kids who happened to sign up for the military; but everyone In Europe knows that that is where the SS is, and those were not innocent 17-year-old kids. So it does not sell, it does not sell at all.

I just hope that gets clarified. And I also hope that we can stop the images of the advance team being out looking for the right—whatever that means—concentration camp. There is no right concentration camp. They were all horrendous. And the quicker we can get it all turned around and get back to the real spirit of Normandy and the real spirit that our veterans want us to commemorate, I think we are all going to be much better off. So if you take the veterans, if you take the religious community, if you take the European community and you take the Germans—I think Germans are much prouder of where they were, when Conrad Adenauer rebuilt them and what it took—when you put all of those together, it really seems to be incumbent that we move and get all of this straightened out.

So, again, I thank the gentleman very much for pointing that out.

Mr. PENNY. I thank the gentlewoman.

Madam Speaker, if I might, I want to return to my discussion on the deficit, because I would like to elaborate on one possible approach to reducing this red ink.

The question is often asked: How do you stop this deficit from growing? And I think the simple answer is: you just stop spending more.

I once had a senior citizen back in my district tell me: Why don't you folks out in Washington do like we do here in our own budgets? When we run out of money, we just quit spending money.

And that is simply the best way to get at this Federal deficit. That means we freeze at last year's spending level; you do not authorize or appropriate more money to be spent this year than we spent last year. And that, then, allows a growth in the economy. And in spite of some of the areas in our economy where there are difficulties—and certainly the farm sector is one of them—we do have enough growth in our economy that this coming year we are going to generate about $70 billion of tax revenues over and above that which we are bringing in the current fiscal year.

So if you do not spend more, and therefore the only addition to your budget that would occur is the addition that is caused by interest on the deficit, which must be paid, and by demographics in some of the programs, like our retirement programs, where new people are reaching retirement age, you can reduce the deficit next year by about $50 billion. And that, after all, is the deficit reduction target set by the President when he submitted his budget to Congress this year.

There are a lot of proposals around here that talk about freezing the budget, including the administration's proposal, which does amount to a spending freeze. But most of these budget-freeze proposals are unacceptable politically because they either exempt certain programs or, while freezing total spending, they allow for major shifts in spending priorities; they are not across the board.

The administration's proposal is not across the board. While they would cut deeply into other programs below this year's funding level, they offset all of those savings by increasing spending in other areas. So they are not being evenhanded. As a consequence, I do not think, politically, that kind of a budget can sell.

I have been told by people across my congressional district that they would be willing to sacrifice if only they knew that everyone else would share in that sacrifice. That is the attraction of an across-the-board spending freeze.

How do we make sure that that sacrifice is borne equally? We do it by an across-the-board freeze on function levels. The function for our Federal budget is divided into 17 categories. Those categories are: Defense; international affairs; general science, space, and technology; energy, natural resources, and environment; agriculture;

commerce and housing credits; transportation; community and regional development; education, training, employment, and social services; health, Social Security, and Medicare; income security; veterans' benefits and services; administration of justice; general government; general purpose fiscal assistance; and net interest.

□ 1730

There are other categories; allowances and undistributed offsetting receipts that are not actual spending categories as part of our basic budget, but they make up the remaining two items in our functional categories.

If we would freeze spending authority in each one of these functional categories at fiscal year 1985 levels, for fiscal year 1986, we would result in a freeze that would keep Federal spending in fiscal year 1986 at $974 billion. That compares almost identically with the spending level that would result under the administration's plan submitted to Congress. The only difference is that whereas their proposal cuts deeply into some portions of this budget, cuts deeply into some of those functional categories, it offsets those savings by increasing dramatically spending in other areas. It is not fair; it is not across-the-board. We ought to begin with an across-the-board lid on spending in each of these categories as the fairest way to address this deficit.

If then there are programs within each of those functional categories, programs within Transportation, or within Health Care, or within Income Security, or Energy, where you want to spend a little more within that same category, find another program where you can spend a little less, so all in all you do not spend any more next year than this on that functional category. That is the way my across-the-board freeze would work. Most people recognize that that would be the fairest way to hold the line on Federal spending. An across-the-board freeze, in my judgment, is the only way to approach this Federal deficit with fairness.

There are those who say, "Yes, but can we not go farther than an across-the-board freeze?" I think perhaps we can, but I think you need to begin with a freeze so that the element of fairness, the element of equal sacrifice is an essential part of our budget policy, telling everyone that is a beginning point no function within the Federal budget is going to get more than it received last year. Once you have asked everyone to make that equal sacrifice, if, based on priorities, if based on our need to further reduce that deficit below these levels, you can find some programs where you in fact can spend less, then let us make that choice and let us get 218 votes for that kind of a budget option.

This budget freeze will be introduced next Tuesday here in the House. I have sent a letter to my colleagues asking them to join me in the introduction of this across-the-board freeze so that we have this option on spending control on the table ready for consideration by the Budget Committee, as it continues its work to develop a budget for this coming fiscal year.

I would hope that my colleagues would join me in cosponsoring that legislation and join all of us who are trying to present freeze amendments to authorization bills as they come to the floor. Join all of us in supporting this kind of a freeze alternative for this year as we complete our budget work here in the House.

In speaking about the Federal deficit, I want to enter into the RECORD two articles that have been written recently addressing this issue. The first is an article which appeared in the Washington Post and it was written by the chairman of the Budget Committee, our friend and colleague from Pennsylvania, Mr. WILLIAM GRAY. This article is entitled, "A Deficit We Can't Outgrow." The article begins:

Will the real President Reagan please stand up? Or, at the very least, will he tell us whether he thinks America has a deficit problem?

On one hand, there's the President Reagan who delivered, as only he can, a stirring and uplifting State of the Union address. He said that the best way to reduce deficits is through economic growth—that "each added percentage point per year of real GNP growth will lead to a cumulative reduction in deficits of nearly $200 billion over five years."

Then there's the President Reagan who signed the president's Budget Message. Here, he acknowledges that we face deficits of $225 to $250 billion under current policies, and that he wants to cut spending by about $240 billion over the next three years to reduce them.

While the president's message does not name any of the "excessive federal benefits" he proposes to eliminate or reduce, David Stockman follows with several hundred pages of painful detail. Strangest of all, there's no mention of "growing our way out" of the deficit. Indeed, Part 3 of the budget explains why it is "highly unlikely" that the economy could grow continuously, without high inflation, at 5 percent per year—i.e., that "added percentage point per year" above the optimistic 4 percent per year assumed in the budget.

Because the president has given such ambivalent signals, there is a real doubt in our land whether a deficit-reduction effort is necessary. The House Budget Committee recently held hearings across the country to find out what the deficit and the president's budget proposals mean to Main Street. Not surprisingly, we found many citizens who were not eager to climb aboard the Spending Cut Special. Many are simply puzzled. If the president's economic program has worked as well as he claims, if indeed we are safely launched on a second American revolution of hope and opportunity, why worry about the deficit?

Main Street's puzzlement and reluctance, of course, is reflected in Congress, especially as spending reduction moves from rhetoric to painfully real choices. If the president is on their side, the supply-side preachers may have their tents filled with eager converts before the economic revival meeting is over. What could be more appealing to a Senate Republican weary of the budget stalemate than a little true economic faith? What could be more appealing to a House Democrat disagreeing strongly with the president's priorities and what surer formula for political stalemate on the budget?

Unfortunately, the reality is this: We're not going to outgrow Reagan's deficits. The evidence of the last several years is compelling. We've now had more than two years of near-record recovery, faster than almost anyone projected. Yet, the deficit has not fallen. Our recession-bloated deficit in 1983 was $195 billion; in more prosperous 1985 we expect $203 billion.

Why? Simply because the Reagan administration's tax and spending policies have produced a *structural* deficit—that part of the deficit not related to economic performance—that rises too rapidly to be submerged by the rising revenues from economic growth. Without the growing structural deficit, the strong economic recovery should have reduced the deficit by about $70 billion in the last two years. However, the structural deficit has expanded at the same time by slightly more than $70 billion, offsetting the effects of recovery.

In the next few years the situation will get worse. As the economic expansion inevitably slows, its deficit-reducing effects are sharply reduced. But the structural deficit just keeps growing, by about $25 billion each year to the end of the decade.

So the problem is real enough, and many of us in the House and Senate, Democrats and Republicans alike, are trying to mobilize our colleagues and the American people to accept the harsh necessity of painful spending cuts.

We need the president's help. We will need his support eventually for a budget that is more fair and balanced than his proposal. But most of all we need his leadership now in explaining to the American people that the deficit problem is real; that we're not going to outgrow it with supply-side hormones; and that the cuts are going to hurt.

□ 1740

The next article on the budget that I think is especially important is an article written by Senator CHARLES GRASSLEY, Republican of Iowa, who serves on the Senate Budget Committee. This appeared in the Wall Street Journal on March 4, 1985. For those who may not know, Mr. GRASSLEY is one of those in the Senate who has proposed an across-the-board spending freeze. He has joined together with Senators KASSEBAUM, BIDEN, and BAUCUS to propose that kind of a freeze before the Senate and in this article he answers the question, can we realistically freeze military spending as well as other programs? I think the answer is quite enlightening.

Before I get on with reading the article, I will yield to my friend and colleague, the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. I thank the distinguished gentleman from Minnesota. He and I have had occasion to discuss, after a couple of my special orders in the past, and I am very grateful for his keen interest in these matters. I just wanted to interrupt, and I thank the gentleman for yielding.

On this question of freeze, I am not one of those that really accepts the fundamental premise upon which apparently the majority of the Democrats, that is, the Democratic membership on the House side, proceeds. I think it is a continuation of the erroneous approach in confronting an individual such as President Ronald Reagan.

The reason I say this is that it goes back to the beginning 4 years ago, and when I saw the thrust of his approach. For example, a freeze to me is really sucking in, as a matter of generalized policy, where you say no matter what, domestic, nondefense or defense, a freeze, because it flies in the face of reality.

I think the basic issue the Democrats have got to decide is whether or not we will continue to be entitled to have the confidence of the American people to continue as the majority party, at least in the House. Certainly we have lost that in the Senate and we have lost that nationally. But what is the reason? I do not attribute it to the fact that the American people are so gullible, they are so easily brainwashed that the massive, skilled PR, the total, obliterative control of the media, the brilliant performance of the President as an actor does it. I think the reason is that the Democrats have accepted the basic Republican fundamental approach which for four decades earned them the minority position, and that was, "Me, too, but not as much."

Now, let us talk about a freeze, and remember that I am speaking here as a sort of a maverick Democrat. I come from the land of Maverick. In fact, my predecessor in Congress from the same district I represent now, the Alamo district, the Alamo is in the center of the 20th Congressional District, was Maury Maverick, Sr., himself, the original Maverick, the great Maury Maverick, Sr., and his son, Maury, Jr., is a great and intimate friend of mine.

But we have got to decide whether or not we really stand up for a basic choice between Republicanism, Reaganism and the burgeoning needs coming from not a frozen country. You know, freeze means death. We freeze dead material. We do not freeze living material, and this country is burgeoning, it is a dynamic people, it is a dynamic country.

If my friend and all of the others advocating a freeze, which apparently the Republicans have joyfully said, "Oh, yes, we are for that," except their definition of a freeze, like the President's definition of a freeze.

Now, my friend, look: The President that is coming in and saying, "Even though you have already cut, and even though I will not stand for any reduction, real reduction in the military spending, I will go along if you call it a freeze, but that does not apply to me."

I have not heard anybody, Democratic Member or Republican, talk about the fact that the President's discretionary budget, in less than 2 years, in fact it coincides with the cutting off of aid by the Congress, direct aid to the Contras in Nicaragua, his discretionary budget has increased exponentially 750 percent. Does that sound like a sincere freezer? Hardly. Why is that not challenged?

If we speak of a freeze, then I say freeze all births in the country. Let us prohibit Americans from being born. And even freeze all necessary human activities like going to the john, because the country is growing while what is called by the big word "infrastructure" is collapsing around our ears. That means sewage lines. That means sewage systems. That means water systems. We have had cities in the Northeast whose entire water system has collapsed around their heads. Our country is dying on the vine, and yet we have a President who has been able to suck us all in; that is, the majority. I am proud to say he has not done that to me. The other day the AP or somebody had some kind of a summary and they showed those least supportive of President Reagan, and I am proud to say that I was there among that less than 3 percent. That is a badge of honor to me, and I will tell you why.

When you ask for a freeze, and you go along, and you accommodate a President, you are sucking in on his ground, you are buying his argument. You will not provide a true freeze on expenditures except the ones he thinks ought to be frozen, and what are those? They are the 1,700, young men and young ladies in my district who last year were not able to go to college because this President and the majority of the Congress scaled back enormously the student loan aid, 1,700.

Now here is the same President who has generated a war psychosis against Russia and paints Russia as the dreaded, moral enemy of America. But never once stops to ask how a country that just 50 years ago was sunk in peasantry can emerge today and outproduce us in petroleum, can come in and produce such things as, in 1957, I was filibustering a cold October night the race bills of that day, when the spectacular news swept the United States that the Russians had put up sputnik. That was 1957, October. Then, and not until then, and 6 months later did the Congress pass the Defense Education Act. Up to that time what had been considered, oh, improper invasion by the Federal Government, oh, socialistic, was suddenly approved, the Defense Education Act, national education programs, but only for what? To produce engineers, because the Look magazine and the Life magazine of that day had full-page pictures showing American kids dancing, the rock and roll was the urge then, just rocking and rolling, and then they had a full-page picture of Russian students of equivalent age, big mathematical geniuses before a blackboard with big calculus symbols, which, of course, was ridiculous and untrue and unfaithful and a distrust of America's true nature.

The point is that when the Russians put up sputnik in 1957, that was the end of the 17th year program. They called it the 17th year plan. What was that plan? That plan was to provide education for any Russian, young, old, middle-aged, factory worker, student or what have you, to have a chance to go free of charge from the lowest to the highest grades of education in Russia. At the end of that 17th year was when they put up sputnik.

Meanwhile, we have a President who says we are going to develop the most spectacular, the end-it-all mechanism that is going to give us supremacy in defense, the so-called star wars, which are based on the most sophisticated knowledge man has developed, but reducing the ability of our young to produce that skilled and knowledgeable manpower because he is asking for a reduction in the opportunities that will give education to the average American young man or young woman.

□ 1750

In my district 1,700 minds that can be creative forces in our community cannot go to college as of last year because President Reagan talked about not a freeze but a reduction and a freeze. So I say to my friend I do not mean to be critical. I am just expounding on my thinking.

Mr. PENNY. Madam Speaker, if I may reclaim my time, I appreciate the comments of the gentleman from Texas. I simply want to acknowledge his points concerning the priorities.

Mr. MOAKLEY. Madam Speaker, will the gentleman yield?

Mr. PENNY. I will yield in just a moment.

Mr. MOAKLEY. It is very important. Will the gentleman yield?

Mr. PENNY. I know why the gentleman is here, and I yield to the gentleman from Massachusetts.

REQUEST FOR PERMISSION FOR COMMITTEE ON RULES TO FILE PRIVILEGED REPORTS ON HOUSE JOINT RESOLUTION 239 AND H.R. 2068

Mr. MOAKLEY. Madam Speaker, I ask unanimous consent that the Com-

mittee on Rules may have until midnight tonight to file two privileged reports, a report on House Joint Resolution 239 and report on H.R. 2068.

Mr. LIVINGSTON. Madam Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. PENNY. Madam Speaker, I simply want to acknowledge the point the gentleman from Texas made about the priorities that are a part of the current budget deficit, and by freezing those priorities the gentleman's argument is that we lock in place priorities that are not paying attention to some of these crucial needs in our society like education and the rest.

GONZALEZ. That is right.

Mr. PENNY. I do not quarrel with the point the gentleman made and the need, I think, to invest in those areas. My point on holding the line on spending across the board is that it is the best way in my view to get a handle on the deficit and to stop those priorities from becoming further skewed in future years, and, of course, they will if we continue to increase certain parts of the budget like the military by 8 percent. When other portions of the budget are reduced to offset that kind of increase, then problems only get magnified in future years.

It is for that reason that I think it is really in our best interest for the time being to put a lid on spending across the board to hold the line on these deficits, but, by the same token, to stop that kind of a shift in priorities from continuing away from some of these areas which are really an investment in our future.

Madam Speaker, I thank the gentleman for his comments.

Mr. GONZALEZ. Madam Speaker, will the gentleman yield further?

Mr. PENNY. I yield to the gentleman from Texas.

Mr. GONZALEZ. But here is a fact: As Abraham Lincoln said, if we do not know whither we are headed, we cannot figure out the road to follow.

If we refuse to understand the cause for what the President says is now built-in, monstrous deficits for the foreseeable fiscal future, no less than 3 fiscal years, what good does it do to offer this kind of a palliative, which is not a palliative at all because it is based on assumptions that are not valid? For example, just the incremental in the prime interest rate in just the last 3 months has eroded half of the proceeds of revenues from the last so-called tax measure, or what they call the tax equity measure, and what I am saying is that the basic assumption that the President is predicating it on is one based on blight, on a giant, suffocating blanket of blight on a country that is still dynamic, a country that is still growing.

Our country has not reached the point or the pinnacle of absorption of growth. It is a dynamic country, and I do not care what the President says or the majority of Congress says, nobody is going to straitjacket this country. The only thing that can happen is that we have built in such great abnormalities.

Mr. PENNY. Madam Speaker, may I reclaim my time?

Mr. GONZALEZ. I yield back to the gentleman from Minnesota.

Mr. PENNY. Madam Speaker, I thank the gentleman for that. As I understand it, I have only about 8 minutes left in my special order, and I am not positive whether this article from the Senator from Iowa is going to take that long to read, but I want to make sure I get this submitted for the RECORD.

Mr. GONZALEZ. I thank the gentleman for his generosity in allowing me to participate.

Mr. PENNY. I thank the gentleman for his interest and for his comments.

Madam Speaker, the article is entitled "A Freeze Is Just What the Pentagon Needs." Again it is an article written by Mr. GRASSLEY because Mr. GRASSLEY is a Member of the other body, a Senator from Iowa and a member of the Budget Committee and is a cosponsor of an across-the-board spending freeze. This article appeared in the Wall Street Journal on March 4, 1985. Again it is entitled "A Freeze Is Just What the Pentagon Needs," and Mr. GRASSLEY writes as follows:

Those who argue that the defense budget cannot be frozen actually show why it should be frozen. Their argument is that Congress has tied its own hands; that we are unconditionally bound by past decisions; that we must pour more and more fertilizer on mushrooms we planted the past four years.

It is precisely this kind of budget rigidity that a freeze addresses. Budget rigidity is a result of poor management. We have experienced this problem for the past decade with entitlement programs, where cost of living adjustments and other benefits grow automatically. The defense budget has, in effect, become the nation's largest entitlement program, and has nursed a new generation of welfare queens: the defense industry.

A budget freeze is intended as an abrupt change in policy to highlight the fact that spending is not an act of nature, but a conscious act of Congress. Its application must be to defense and non-defense spending alike. Provided, that is, it can be demonstrated that a defense freeze will not weaken the security of the nation. The argument that follows proves this contention beyond a shadow of a doubt.

BUYING HIGHER COSTS

Not only is a defense freeze necessary to reduce the federal deficit, it is essential to prevent a further erosion of our military capability. Those who have argued for increased defense budgets have failed to recognize that recently increased defense budgets have actually bought high costs and overhead rather than more tanks, ships and planes. Given the disappointing returns from recent unprecedented defense budget growth, it is evident that fundamentally improved management will yield far greater returns than budget increases. A budget freeze is the first step toward defense management reform.

Over the last four years, the defense budget has grown from $211 billion in fiscal 1982 to $292 billion in 1985, a 39% growth rate in current dollars and 22% in constant dollars. This growth is unprecedented in the post-World War II era. As the accompanying table shows, the last four appropriations exceed, in constant dollars, the four most costly years of the Korean and Vietnam wars. More important, the table shows that the cumulative effect of a hypothetical four-year freeze at today's levels would exceed the cumulative expenditures of the last four years by 10% in constant dollars. In short, the defense budget would be frozen at a very high level.

The stated aim of the growth in the defense budget has been to enlarge, to modernize and to improve the readiness of our conventional forces. However, when comparing the output derived from the recent budget growth with the output of the previous periods we find that, notwithstanding unprecedented budget increases, changes and improvements have been minimal at best. In fact, there has been little evidence of force modernization; in many cases fewer quantities have been produced at higher costs, and readiness improvements have been marginal. In short, increases in output have not been proportional to increases in input.

This input vs. output problem is illustrated by the case of aircraft procurement. Taken together, the Air Force and Navy aircraft procurement budgets amounted to 36% of the total Defense Department procurement budget between fiscal 1982 and fiscal 1985. In spite of a constant-dollar, four-year budget increase of 75% above that of the Carter administration, 11% fewer airplanes were procured.

Similarly, in the case of Navy ship construction, major surface combatants decreased 17% from the Carter years despite a 47% increase in funds—in constant dollars. Even when procurement quantities increase, as in the case of key weapons and tracked vehicle procurements in the Army, they increase at a much slower rate than procurement budgets. For example, the number of tanks increased 30% and helicopters 45% from the Carter years. But their budgets increased 85% in constant dollars, indicating growing unit costs. The unit cost is supposed to decline as production rates increase. This obviously has not been the case. Simply put, we are buying fewer weapons for considerably more.

As with procurement, more money has failed to solve the readiness problem. With the exception of improved personnel recruitment and retention rates, improvements in readiness have not been proportional to the increased resources appropriated over the four years. Total funding for Operations and Maintenance in the past four years increased 25% from the previous four years in constant dollars. Furthermore, Congress appropriated more O&M funds in the last four years than the four largest O&M budgets in either the Korean War ('51-54) or the Vietnam War ('67-70). In both wars we were operating larger forces at much higher operational tempo, and we were absorbing significant equipment losses.

Despite the 25% increase in O&M appropriations, training tempos are not significantly different from those of the previous four years. For instance, Army monthly flying hours per crew have fallen from 18.8

hours in fiscal 1980 to 16.4 hours in fiscal 1984; Navy quarterly steaming days per ship have risen only slightly, from 32.4 days in fiscal 1980 to 34.9 days in fiscal 1984; and Navy monthly flying hours per crew have fallen from 24.2 hours in fiscal 1980 to 23.7 hours in fiscal 1984.

Finally, despite these relatively constant training tempos, the 25% increase in the constant dollar O&M budget of the last four years has *not* resulted in major improvements in materiel readiness as measured by the mission capable (MC) or fully mission capable (FMC) rates, according to a May 1984 Pentagon report to the Senate Armed Services Committee. The report points out that the increased operating costs of the more complex equipment entering our inventory is a major cause of this disturbing state of affairs. This problem will compound itself in the future as more and more new weapons systems come on line.

Given these input/output disasters in both procurement and readiness, one wonders where the bulk of the unprecedented budget growth has gone. The answer is high costs and overhead. Startling evidence of this has recently been gathered by Congress. The evidence shows we may be spending up to 18 times more for our weapons systems than defense contractors' own data suggest we should pay for in-house factory work, if their plants were run at normal factory efficiency.

For example, we paid one major defense company working on the MX missile for 5,050 direct labor hours when its own factory efficiency data say the same work should take only 370 hours. That means we pay for 7% factory efficiency on work done by that contractor. This example is by no means unique. We have been paying for enough work for 17 Maverick missiles but getting only one.

When factors other than labor are considered, we have paid more than $600 per standard hour for the kind of work that is normally done in the private sector for $40 to $60. Other such examples throughout the defense industry are common. Some are better, some are worse. What is clear is that this problem is pervasive.

This egregious situation can occur only because competition is alien to the defense world. Only 5% of all defense dollars are truly competitive; the rest are negotiated. It is the negotiated contracts that are responsible for allowing huge variances between standard hours and actual incurred hours for work done in defense manufacturing plants. These variances primarily result from three factors: (1) scrap and rework due to poor quality control; (2) labor inefficiency due to poor management, and (3) continuous design changes due to poor planning. The extent to which each of these contributes to overall inefficiency varies with each system.

Congress and the public suspected the inefficiency problem in the defense industry was bad when examples surfaced such as $1,000 stool caps or $7,000 coffee makers. These were explained away by the Pentagon as "accounting quirks." The argument was that overhead is evenly allocated to each item the department buys. This argument has since been diffused because the Pentagon cannot produce a single example to support the contention. The fact is, defense industry overhead is enormous, the magnitude of which measures the industry's inefficiency. Rhetoric to the contrary is no longer sufficient to deflect public and congressional scrutiny.

FACTORY EFFICIENCY OF 5%

Congress, in fact, has begun to systematically uncover cost data on defense manufacturers' factory performance. Some of the data have surfaced recently at congressional hearings. The figures show factory efficiency as low as 5%. That is no typographical error. Five percent efficiency, for certain in-house work. This can happen only because competition is nonexistent. We are, in effect, subsidizing overhead. As we conservatives say, if you subsidize something, you get more of it. To claim, then, that more money is needed for the defense budget in light of this appalling situation makes as much sense as the prices we are paying for our defense.

The facts in my arguments come from the Pentagon itself. They graph the performance of the department over the past four years, and reveal a systematic weakening of our military at an ever-increasing cost. That is why I believe the Congress this year will ignore the cries of a bureaucracy whose performance is as poor as the one described here. We will politely listen to all the threats from the defense community, and then give the department a budget it desperately needs—a freeze.

□ 1800

NICARAGUA: A REPORT BY WESLEY R. SMITH AND RICHARD H. RYGG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana [Mr. LIVINGSTON] is recognized for 60 minutes.

Mr. LIVINGSTON. Madam Speaker, on April 4, 1985, two young men by the name of Wesley R. Smith and Richard Rygg compiled a report written by Wesley R. Smith on the status of conditions relating to human rights violations in Nicaragua.

Wesley Smith and Richard Rygg conducted the interviews presented in this report. They speak fluent Spanish and each has experience working with farmers and peasants in Latin America. The Nicaraguan refugee populations in Costa Rica and Honduras are largely comprised of farmers and peasants.

Wesley Smith is a 23-year-old senior studying international relations at Brigham Young University. He served as a missionary to Spanish speaking people in Argentina and Arizona.

From May 1, 1984, to July 15, 1984, Wes worked as an intern in Costa Rica for the newspaper La Nacion Internacional. The interviews appearing in this report from Costa Rica were conducted by him at this time. He was in Nicaragua from December 14, 1984, to January 13, 1985, interviewing.

Richard Rygg is 28 years old and will receive his MBA from Pennsylvania State University in June 1985. He served as a missionary in Nicaragua, Costa Rica, and Honduras from 1977-79. His work involved extensive interaction with the Nicaraguan peasantry and middle class.

Both of these students visited Honduras from March 4 to March 16. While there they visited the refugee areas of Teupasenti, Roos Roos, Danli, El Paraiso, Jacaleapa, El Triunfo, and Cholutecs. They funded their own trip to Honduras.

The report follows:

INTRODUCTION

This report emanates from a compilation of interviews conducted in Costa Rica, Nicaragua, and Honduras during 1984-1985. During this time period over 250 Nicaraguans, inside as well as outside Nicaragua, were interviewed. The few interviews and stories selected for this report are representative of the majority of the people we spoke with during our visits.

We did not go to Central America looking specifically for evidence in support of one side or the other. Rather, we wanted to speak with individuals that represented that majority which wears neither the Sandinista nor the Contra uniform. Our main purpose was to find out what the Nicaraguan people had experienced and why so many people were fleeing their country.

Those people interviewed within the refugee camps were randomly selected to insure a representative statistic of all the refugees within those camps. In speaking with the Nicaraguan people we worked in conjunction with no one else—no ecclesiastical authorities, government agencies, human rights organizations, or international groups. This unobtrusive approach allowed us access to information which, according to those refugees interviewed, generally is not expressed by them.

In publishing this report we are not endorsing either side of the conflict. The stories, feelings, and opinions of the Nicaraguans represented here are not in favor of the Sandinistas. However, this is not a deliberate attempt by us to show only one side of the story. In this report we have simply compiled the stories of the Nicaraguan people that represent the groups we talked with.

We were asked by most of the people we spoke with not to reveal their names for fear of reprisal. Therefore we have substituted most names, but we will be glad to furnish the real names to responsible reporters who will not jeopardize these peope's safety. They took us into their confidence and we are obligated to respect their wishes.

NOTE.—The questions of international law are not examined in this report although we address the abuses which have arisen because of the internal conflict in Nicaragua between the Sandinistas and the Contras.

FINDINGS

Contras

We have no evidence on the Misura nor the Misurasata because there was not enough time in those areas to investigate the truthfulness of the reports received.

In interviewing refugees, many of which were inside Sandinista controlled areas like Managua, Matagalpa, and Leon, Wes could find no specific incidents of Contra atrocities. He did interview with Sandinistas involved in the conflict. They told him of Contra atrocities in general but did not supply any specific instances or relate any personal experiences.

The refugees interviewed mentioned some civilians were killed as Sandinista and Contra forces fought in the mountains.

No accusations were received which spoke of Contra forces intentionally killing, torturing, or raping civilians or Sandinista war

prisoners in fact, almost the opposite was true. Of those Nicaraguans who spoke of civilians being killed, nearly all mentioned that only Sandinistas were participating in such activities—indiscriminate bombing, shootings, torture, etc.

The Nicaraguans interviewed said their attitudes toward the Contra forces had changed during the last 2 years. According to statements, the towns in which they lived did not support or sympathize with the Contra movements in 1981-82. Although no specific reasons were given they referred to the Contras as rebels and most said they had been indifferent to their existence during this early period.

However, those interviewed said their feelings toward the Contras changed and they now sympathized with the Contra movement. They mentioned how after 1982 the Contras stopped their abusive tactics. In addition, they explained that the Sandinista policy of land reform, especially among the peasants, religious persecution, and repression of those who did not support the Sandinista process, were factors causing them to now sympathize with the Contras. One young boy told us that, "the Contras had problems before because they robbed a lot and killed people. Now they're part of the people."

About 20 percent interviewed felt that they had been caught in a cross fire between Sandinistas and Contras and had not sided with either one. These people said they began sympathizing with the Contras when the Sandinista policies became too repressive for them.

While in Nicaragua Wes interviewed several Sandinistas including those from the Juventud Sandinista 19 de Julio. Their feelings about the conflict were generally the same. One Sandinista Youth leader in Leon was interviewed and although she mentioned no specific cases, her feelings represent those of other Sandinistas interviewed in Managua, Matagalpa, and Leon.

"We know about the aggression of the United States and of President Ronald Reagan. The mercenaries (Contras), we know that they come, not only to make money but to burn farms, schools, and kidnap peasants. Over 70 percent of the youth are involved in Sandinista organizations. The Contras are ex[Samoza] guards."

Sandinistas

Evidence gathered during these three visits points to a systematic process of human rights abuses conducted by the Sandinista government against the Nicaraguan people including those who have taken up armed resistance against the Sandinista government. The abuses reported to us or witnessed by us personally, fall under the following categories.

Forced recruitment of Nicaraguan youth by the Sandinista militay.

Religious persecution.

Indiscriminate shelling of villages.

Mistreatment of prisoners.

Forced volunteerism in the coop system.

Repression of the opposition.

FORCED MILITARY RECRUITMENT

In the last six months forced recruitment of youths by the military has increased dramatically. We received numerous accounts of young men being forcefully taken from their homes, local theatres, discoteques and parks. These stories were from eyewitness accounts and from young boys who had been taken but released or who deserted. Some boys as young as 14 have been taken by the military.

While in Nicaragua Wes witnessed one such incident in the town of Nagarote. He arrived at the town at about 11 a.m. Two young girls snuck him through some back roads. While there he spoke to 15 people who related their story to him and saw 10 people who had been beaten by the military. One man received a severe gash. A "mobster" wearing a military uniform had entered his home, and struck him with the end of a hoe.

A 14 year old girl, Eliana Mejilla, described to Wes what had happened earlier that morning.

"At 6:30 a.m. on 27 December 1984 the Sandinista military arrived on the outskirts of town. They came in 2 IFA troop transports and about 15 jeep with the yellow triangle insignia "Prevencion" sprayed on the side. When they started rounding up the young boys from the streets and the parks the people organized themselves. The Catholic father sounded the church bells and the people built barricades on the streets leading into the center of town.

"The Sandinista soldiers beat those families members who resisted the military when they forced themselves into the homes. After the barricades were broken down the military sent in two IFA trucks. Half of the mobsters in those trucks were military soliders who had laid down their weapons outside the town and had replaced them with clubs. Only three boys had been taken but 47 adults were taken prisoners for "counterrevolutionary" activities. The people who resisted the military were not armed Contras but strictly civilians. Around 40 people received injuries from being struck by the military soldiers. Then the mobs returned in two IFA military trucks, broke into a house facing the TelCor office and burned a jeep."

While in Honduras we spoke to a group of 35 Nicaraguan youth who had come across the border several weeks before. They said they had fled Nicaragua because of the military draft. Several had already served in the Sandinista military and had deserted, while others had gone into hiding inside Nicaragua to avoid the military draft. Many of these youth had been imprisoned for not joining the servicio patriotico [patriotic service].

Andres Cornejo was inscripted into the military on 15 January 1985 and deserted one month later. He describes the treatment while in the military.

"The Sandinistas grabbed me on 15 January 1985. I was in the training camp called San Gabriel. While there we [those inscripted] were constantly threatened by our Cuban advisers that if we tried to desert there was a good chance we might get "shot" or thrown in prison or be taken to the most dangerous zones where there was no escape. I was there for one month and then was transferred to the base called Oscar Curos. From there I deserted and came across the border."

NOTE.—All those interviewed who had been imprisoned or served in the military spoke of Cuban advisors which worked in the prisons and within the military system. In asking these Nicaraguans how they knew they were Cubans they gave similar reports: the accent; phrases such as "tu chico"; their mannerisms; and even the type of cigarettes they smoke, etc. One Nicaraguan who spent 16 months in prison told me, "we as Nicaraguans know our own people and we have seen enough Cubans to know who they are and how they act."

RELIGIOUS PERSECUTION

The groups most hard hit by systematic persecution of religion in the northern regions of the country are the Pentacostals and Evangeicals. According to their reports their practice of individuality and belief in God has created friction between them and the government.

A peasant living in the northern zone of San Jose described the religious persecution he received from the Sandinistas.

"I have been serving God for 7 years in the Pentacostal church, Assembly of God. I was preaching in the fields and was persecuted. I have been imprisoned three times for preaching the gospel. I don't know what it is like to take up arms but when they had me they threatened to kill me if I didn't join the military. You were forced to take arms and this pressure happened all over the zone where I lived. In that area they gave me 8 days to decide whether to fight or disappear. We didn't have any other choice but to flee. We were in the mountains for 18 days before arriving in Honduras."

Two other families that fled with him across the border were in the same camp and substantiated the story he gave.

Lidia Herrera and her two children Maritza and Jose Alberto, were victims to a Sandinista attack during a prayer meeting on 7 February 1985. The following is their story:

"We were praying during a religious meeting when we heard bullet shots from outside. When we heard the shots we continued praying and then a member of the Sandinista military entered the house and told us to stay inside or we would be shot. The Sandinista then left the house and we continued praying and heard a rain of bullets. When we looked around seven people were dead and three were wounded. One of the dead was my son Jose Alberto. He had been hit in the face with bullets. The Contras hadn't been in that area that day. In fact we hadn't seen them for a long time."

These peasants not willing to take up arms are branded as counterrevolutionaries. Many peasants testified that they had been imprisoned and tortured for their religious beliefs. Gerrardo Bustomonte also received persecution by the Sandinistas for his religious beliefs.

"The Sandinistas had called me into the prison and then they accused me of working with the counterrevolution. They asked me how I could preach the "message" and be a counterrevolutionary since Christ himself was a revolutionary. They told me I was going to tell them the truth. They put a .45 pistol here [motioning to the temple] and said, "you are going to tell us the truth that you are a contra and that you collaborate with the contra. You're a contra because you won't take up arms.

"He then hit me in the chest and let me free. Before I left he told me that if he caught me working the counterrevolution he would eliminate me. He then said that according to them the counterrevolution was preaching the Word of God. Even if you don't have any arms they accuse you of being a contra if you're not willing to take up arms."

MISTREATMENT OF PRISONERS

It should be noted that many of the prisons in Nicaragua are clandestine and known only to those who have experienced them. They are nick-named by the Nicaraguan prisoners that know of them. The prison names used in this report are those mentioned repeatedly by the Nicaraguan people interviewed.

The prison system in NIcaragua is supplied by the Judicial system which is run by the Sandinista party. Those who have been imprisoned speak of tortures and abuses of human rights. While in prison they receive insufficient clothing, food, and medical attention.

In many instances prisoners, over 90 percent of whom are peasant farmers were forced to make confessions, then tried and sentenced because of these confessions.

The following are torture methods used on prisoners.

Water is dropped on their heads for days at a time.

Light deprivation.

Interrogations in the middle of the night.

Beatings with sticks wrapped in wet towels.

Guards using boxing gloves repeatedly beat prisoners.

Sleep deprivation.

In the northern provinces prisoners are put in tubs of cold water for extended periods of time.

Hanging by the wrists.

Isolation from any human contact.

Forcing prisoners into cells where they cannot sit down or stand up completely.

There were repeated testimonies of this occuring in the Department of Chontales, City of Juigalpa.

The Permanent Commission of Human Rights of Nicaragua (CPDH)

The CPDH receives testimonies from people who were imprisoned and then set free or had finished their sentencing. It estimates it only receives 10 percent of the total incidences of human rights violations. In order for the CPDH to process accusations the victims must supply names and residences. Because of fear of retribution people are afraid to give this information.

Wes conducted several interviews in December 1984 and January 1985 with Lino Hernandez, one of the directors of the CPDH.

From testimonies and evidence gathered, the CPDH estimates that over 95 percent of those convicted by the Popular Anti-Somoza Tribunals were convicted by accusations against themselves while in State Security prisons. Of that 95 percent nearly all have been tortured into accusing themselves. On the average, those accused spend more than 6 months in prison before coming before the Tribunals. Those brought before the Tribunals are condemned by evidence gathered in three ways:

1. Confessions of prisoners against themselves while in State Security cells.

2. Confessions of prisoners against other prisoners.

3. Testimony of State Security guards who heard prisoners confessions during interrogations.

In the majority of the cases the peasants were accused of giving food or logistical aid to the contras. The following part of an interview with Lino Hernandez of the CPDH in January 1985.

"In principal every person that arrives at the State Security prisons is declared guilty. They have a method for each person. We have received testimonies of tortures that don't leave marks or scars. While in State Security they are subject to isolation in dark cells without any light. They are not given food either. We have received information that they use both physical and psychological torture."

Wes interviewed Ramon Melendez in Managua, January 1985. Wes was referred to him by the OPDH. Ramon was released from prison in November 1984. He spent 17 months in prison. He was accused of counterrevolutionary activities. His story follows:

"I was sleeping in my house at 5 a.m. when eight guys arrived with machine guns. They pushed the doorbell and the maid let them in. They took me to the State Security [behind the Hotel Intercontinental] and placed me in cell number 18. I entered the cell and you couldn't see anything. There was only light when they opened the door to interrogate me. I spent 96 days in that cell. I got a skin fungus on my feet and all my hair fell out, because in the interrogations the Sandinista grabbed me by the hair and told me 'you're going to talk or else', and when he did this the hair stayed in his hand.

"After being imprisoned for five days they showed me my wife at the other end of the hall wearing a prisoners uniform. They quickly put me back into the cell and from that day on they told me that my wife was dying. I heard my wife saying 'my love, I can't stand it anymore. I'm dying My children'. It must have been a tape recorder or another woman because my wife was only in jail for one day but they made me believe she was in jail permanently. In my cell I could only imagine the days passing, because in there I didn't know if it was night or day."

Ramon spent 3 months in solitary confinement and six months in a cell with other prisoners. While in El Chipote they told him if he signed a confession his wife would be released. State Security then condemned him with his own accusation. He was given 7 years imprisonment at his first trial, but the appellate court raised it to 15 years. The Sandinistas said he deserved the extra 8 years for complaining to the human rights commission that they, the Sandinistas, were torturing him. He was later transferred to the prison called "Zona Franca" near the Managua International Airport. He said there were over 800 political prisoners in the "Zona Franca" and he estimated thousands are being held in other clandestine prisons within the country. He spoke with hundreds of prisoners that had been transferred from outlying areas into the Zona Franca.

Several defense lawyers that were interviewed in Managua also estimate there are thousands of unaccounted for Nicaraguans who have become victims of the clandestine prison system in Nicaragua.

Rogelio Benavides is 33 years old, from Ocotal, Santa Clara. He describes his treatment while in prison. He was accused of hiding arms for the counterrevolutionaries.

"On 20 March 1984 they took me from my house in Santa Caira at midnight and took me to Ocotal. I was in prison for three months. They investigated [interrogated] us. At night they bathed [soaked] us with cold water. For eight hours we had to stand up soaking wet. They stuck us in [the water] and soaked us and then investigated [interrogated] us. It was painful and we always got out trembling. We were many. They did it the first time to interrogate us. The interrogater asked us where we had the arms. They made me take off my shirt, pants and underwear. The next day they stuck us in again. I left the prison with pnuenomnia."

Pedro Ruiz Alfaro left Nicaragua on 16 January 1985 with his wife and two children. He spent 1 year in Esteli in a prison called "La Barranoa" from July 1983-84. The Sandinistas then transferred him to Chinandega where he was kept in "El Penal" and released him four months later in November 1984.

"I was accused of hiding arms for the counterrevolutionaries inside my house. They brought me before the Anti-Somoza tribunals in Esteli. I had several witnesses which defended me but it didn't matter because they had their frogs [informants] from the CDS [Sandinista Defense Committee] which accused me. The two CDS members were Amado Arados and Dela Segovia. They searched the house and found nothing, but they accused me anyway.

"While in prison several Cuban and Nicaraguan guards tortured me. After being there for two weeks they injected me two times, with a yellow fluid. With these injections I felt like running, yelling and crying. I laid on the floor and trembled. They placed a small tape recorder next to my mouth but didn't ask me any questions. The next day they gave me a second injection much more powerful than the first. They interrogated me around 20 to 30 times. The Cubans would put a pistol to your head called a "Macaron" until you confessed you were a contra. When I was transfered to Chinandega they treated me with more consideration."

The CPDH has investigated several reports of prisoners shot while trying to "escape". These investigations have shown that many of these prisoners were tortured before they were killed. Similar reports obtained during our investigations substantiate these claims. The following story was provided by the CPDH.

"Jose Esteban Lazo Morales (correct name), 39 years old is from Chontales. He was captured 14 November 1983 in San Pedro de Lovago and was taken to the State Security prison in Juigalpa. Four days later he was taken to his home in a coffin which had been sealed with screws. They told the family that they couldn't open the coffin because it would be a health hazard and they would have to bury him immediately at sunrise.

"When State Security left, the family opened the coffin. Jose had a fractured nose, and bruises covering his face. His head and ears were bleeding, his ribs were broken and his genitals were badly bruised. He had been knifed in the back many times which left marks in the shape of a half moon. When State Security found out the family had opened the coffin they sent a forensics doctor to check him out. He diagnosed Jose as having died of a heart attack. They told the Sandinistas that he was bruised on the forehead after falling while showering. And that his nose was fractured because he had fainted and fallen on his face."

Felipe Hidalgo was in prison from March 1982 to September 1982. He told us the following story.

"I first spent two nights in the prison in Jalapa. I was then in Ocotal for 15 days and from there was transferred to La Barranca in Esteli for 45 days. The last four months I spent time in a prison in Esteli called 19 de Julio". In Jalapa they hung me over an open sewer because I didn't obey them. There were eleven of us there. All 11 were transferred from Jalapa to Octogal in the middle of the night. While in route, three of the prisoners were taken out and carried down to the side of the road. The first one lowered from the truck was Eduardo Herra Bustamante. I knew him because he was from a small town near Limon. The next one lowered from the truck was a photographer from Jalapa named Fidel Gabona. He already had a broken arm from before. The

third one was Eriberto Gonzalez. He was from the aldea called Sante Barbara."

Felipe said he learned that these three had been killed because when he was released from prison shortly after his prison transfer his family told him that the Sandinistas said the three had been found in the mountains with their throats slit. Family members said the Sandinistas had blamed the contras for the massacre. He said the story had been written up in La Barricada as a contra massacre.

Pedro Ruiz Alfaro (see story above) is from Esteli and left Nicaragua 16 January 1985. From July 83 to July 84 he was in "La Barranca" prison in Esteli. From there he was transferred to El Penal in Chinandego and was released in November 1984. The following is his story.

"Two weeks after leaving prison in Chinandega I started to work driving a sand truck with two other helpers on the road that leads out of Maouelizo. When we arrived at the river near Maouelizo we left the truck and started searching for sand down by the river. While there we ran across a shallow grave, what we call an aguacera. To us an aguacera is where they kill people. In this aguacera were two men I knew from San Fernando. We calculate there were from 50 to 60 bodies but I could identify only two. I recognized the two because their faces where only bloated. The rest I didn't recognize because their faces were all bruised. They had been with me in La Barranca. The Sandinistas took me out [to Chinandega] but these two men stayed. After I saw them dead I returned and told the families of the dead men. They said they had gone to the Barranca only a few days earlier and the Sandinistas told the families they were no longer there in prison."

Ismael Herrera, a 55 year old farmer from Mora, Nueva Segovia left Nicaragua 5 November 1983. He was imprisoned in April 1983 in the prison La Barranca.

"They put me in jail because one of my sons had joined the counterrevolutionary forces. They put me in a small cell and all I could see was darkness—no light. It felt like you were being hit in the heart every time they came by to take you out of the cell. You feared, because you thought they would take you out to kill you. I know they killed some because they would investigate [interrogate] people at midnight and some never returned. They grabbed me by the hair and put a knife in my throat and an AK in my kidneys and kicked me. They did this so I would say I had been helping the contras. If I had told them that, they would have killed me."

In addition to the mistreatment of civilian prisoners many refugees and people still living in Nicaragua reported incidents of mistreatment of contra prisoners and Sandinista deserters.

A nurse stationed in a Zone called "La Guinea" described an incident with a contra prisoner. She was in a place called "La Fonseca" near Verdun in September 1983 when this occurred.

"I was stationed in this town in the health center when one day they [the Sandinistas] captured a contra boy up in the mountains. They brought him into town behind a horse. The boy was wearing a blue outfit and didn't have any shoes on. He was blindfolded and had his hands tied behind his back.

"They took him to the town square where I was stationed by the health center. There, the Sandinistas shot off their AK 47's and when they did that the horse took off running. The boy was tied to the horse and it dragged him away—tied and bound. The rope then hit a rock and tore. The boy just laid their on the ground badly beaten. They then took the boy and tied him onto a horse that had arms and took him out of the town. The whole town saw this happen."

Luiz Payan is a 37 year old farmer from Jicaro. He witnessed a similar treatment in his home town in November 1983.

"They captured a commander there in Jicaro. He was the one they tortured after he was dead. They spit on his face and stabbed him with a bayonet. They paraded him around the city tied to the fender of their car. The whole town saw it and they almost made me go out and trample on the commando myself. This happened at about 9 a.m. and they called all the people out into the plaza and told us this is what would happen to people who fought against the Sandinistas."

Indiscriminate imprisonment

In the last half of 1984 forced military recruitment increased rapidly. With this conscription came an increase in indiscriminate imprisonment and detainment of youth which appeared to be within the qualified age limit. While in Managua Wes spoke with youth who had been detained by the military longer than 24 hours. In many instances family members don't know the location of their children until they are released.

Salomon Calvo Arrieta is a lawyer in Managua and worked as correspondent for the Costa Rican radio "Impacto". While in Nicaragua Wes investigated the case of his imprisonment thoroughly.

"Salomon was imprisoned 29 December 1984. Two days before his imprisonment he broadcast information about the insurrection in Nagarote which occurred on 27 December 1984. He was taken from his home at 8 p.m. and carried to the military complex called "El Chipote". For the first three days his wife attemped to visit her husband and find the reason for his imprisonment. She was told they weren't sure what law he had exactly broken but it had something to do with "counterrevolutionary" activities. His wife and Wes visited him in prison on 5 January 1985. He was still incommunicado and the authorities would not permit the visit. They accused him of supplying false information about the insurrection in Nagarote—saying that the insurrection hadn't occurred when it actually had. When the international press received the Nagarote story the State Security then accused Salomon of paying money to Manuel Urbina to exile himself in the Costa Rican Embassy in Managua."

INDISCRIMINATE SHELLING OF VILLAGES

Refugees not involved in the conflict but living within the war zones have come under repeated attacks by the Sandinistas. The Sandinistas indiscriminately use artillery against civilian population areas in the Segovias mountain region and have done so along the southern border as well.

Since July 1984 to as late as February 1985 the area around and including "Los Harrados" has come under heavy artillery fire at least 5 times. In the first week in January 1985 a man, Donald Lario, was killed when a mortar fell on his house. The account of Sandinista bombing and mortaring of civilian areas were taken from eight different people in three different refugee camps. Their stories coincide with each other on the shelling incidents although the number of bombings reported ranged from 5 to 7. One specific bombardment was reported by Christina Mariana Reyes. She left her home in Los Harrados near Monsonte, Department of Nueva Segovia on 21 February 1985.

"My own people have been bombed five times in our community. They say the contras are living there but that is not true. It is true they have passed by our way before but, it has been months since they did that. My nephew was killed in December when a mortar fell through his house. They mortared us from the town of Monsonte. The people protested but they would not listen to us. On my way to Ocotal I saw the cannons from where they fired at us."

In August 1984 in an area near "Los Harrados" the Sandinistas bombarded several areas from their bases in "Plan de Gramma" and a place called "La Joba". Ramos Portocarrero Sirias is from Jinotega, residence of Laguna Verde, Jurisdiction of Wiwili. He left Nicaragua in October 1984 after his community was mortared by the Sandinistas. His story was supported by 3 other refugees not related to him.

"We are talking about a bombing which happened in August 1984 that left the valley all burned. We know it was the Sandinistas because we, the peasants, are united and we communicate with one another. We know where the Sandinistas are and what they're doing. The place [where they bombed] is called Laguna Verde and about 6 or 7 powerful grenades were thrown. They have a high powered rocket launcher, mortars and cannons. The bombs came from "La Joba", a place close to Wiwili in Jinotega. There are about 20 houses there and they are pretty spread out. In Plan de Gramma they [the Sandinistas] have a base and they also mortared from that area. It is located about 4 kilometers from Laguna Verde."

Felix Monteguello is from Laguna Verde and left that community in November, 1984. He fled because one of the shells dropped on his ranch and burned it. His ranch was located in El Triunfo, an area close to Laguna Verde. His story supported the testimony given by Alejandro Jordian Bucardo.

REPRESSION OF THE OPPOSITION

Many of those interviewed said they had been accused of counterrevolutionery activities simply because they didn't support the Sandinista political process. This would include absence from DDS meetings, weekly vigilance duty, absence from participating in the cotton and coffee harvest and from attending revolutionary rallies. Those involved in political and civic opposition groups have come under increased persecution by the "divine mobs" and paramilitary groups supported by the Sandinistas.

Guadalupe Castellanos is from the town of Dipilto, Nueva Segovia. [She permitted the release of her real name since she no longer has any family in Nicaragua.] She left Nicaragua in April 1984 after recovering from grenade wounds to her back and arm.

"I went to church a few days before Christmas in 1983 and there was a State Security man named Manuel Martinez who was there preaching to us. He said we had to have a bible in one hand and a rifle in the other so that the revolution would be successful. I had an argument with him and then went to cut coffee with my two children.

"They came with me because as poor people one needs to work hard for a living and they were small so they accompanied

me. We were let off work at midday since the next day was December 24. I stayed to gather big leaves at the bottom of the gulley so I could make a Christmas decoration for my children. While in the gulley I ran into some Piri who were still there guarding the coffee fields. They started harassing me and tried to grab me but I ran away from them for a short distance. They then caught up to me and started beating me. I told my two children to run up the mountain and catch up with the other group of coffee pickers that had already left.

"After the Sandinistas beat me they left me there and went off a little way. Maybe they thought I was dead or they were just waiting to see if my sons would return to help me. I'm not sure, but what I am sure of is that I got up and started running up the hill to reach my children. I caught up with them and then passed them because I knew which way we needed to go. I turned around to see if they were still following us and yes, they were behind us.

"Just as we were getting to the top of the hill a grenade exploded in the middle of us. We all fell on our faces and when I turned around I could tell my 6 year old boy, Luis Alonso was dead. The crown of his head had been cut right off and it was laying there a few feet from his body. It was a clean cut because you could see the bone of his skull. My 12 year old son Misael had been hit in the ear and I tried to help him up but he couldn't hold out his arms. He had a shrapnel wound in his back and it looked like the shrapnel had severed his [spinal] column. He told us to pray and then he told me to return and get some help. I left them together and was taken to the hospital. We weren't allowed to return for six days. When we returned six days later both of them were dead but the older boy must have lived several days because his body was fresh compared to Alonso's body."

In the first interview Guadalupe Castellanos said the Sandinistas had prohibited the people in her hometown from returning to the area where the grenade exploded. In her second interview she only mentioned that they did not locate the bodies until the sixth day but another independent witness testified that the Sandinistas had not permitted them to return and look for the bodies. The 12 year old, Misael was still alive when she left them. Guadalupe received two shrapnel wounds—one in her back and the other in her right elbow.

In responding to questions about how she knew it was the Sandinistas and not the Contras or a land mine she stated:

"It was a grenade because all the other people that were cutting coffee had passed through that same path and nothing had happened to them. You see, this isn't something invented or made up but is a reality because if my companions had passed by there and nothing happened to them, how was something going to happen to me. They had gone ahead of me and I was the last one to go up the path so there had been nothing in the path. The Sandinistas were the ones following us and the Contras weren't anywhere around so it would have to have been them."

Guadalupe's story was supported by almost undeniable evidence. Wes interviewed her on March 9 at about 11 a.m. That same day Wes interviewed a different group of 20 Nicaraguans in a different refugee camp that had arrived from the border only two hours before. Within this group was a 60 year old lady named Juana Maldonado de Castellano. When she mentioned she was from Dipilto Wes asked her if she remembered about anything that happened in her town two Christmases ago. She then responded:

"You must be talking about Guadalupe Costellanos. Her two sons were killed that Christmas when the Sandinistas threw a hand grenade at them. We [the people] weren't allowed to go look for the bodies out by the coffee fields for six days because the Sandinistas prohibited it. A piece of shrapnel had severed the young boy's [spine] column and he died hugging his younger brother because that is the way we found them, except the younger boy was decomposed."

Persecution of political opposition

Repression of Civic opposition groups has been extensive within Nicaragua since the revolution. Political dissension, especially among the youth, is not tolerated by the Sandinistas. Aside from the majority of those youth interviewed who fled to avoid the military draft, there were many who belonged to civil opposition groups inside Nicaragua. These Nicaraguan youth testify they were persecuted for their political divergence from the Sandinista revolutionary process.

While in Nicaragua Wes interviewed Manuel Urbina Lara's brothers. Manuel Urbina was the Nicaraguan youth who had exiled himself in the Costa Rican Embassy in Managua. On December 24 1985 he was forcefully taken out of the Embassy by Sandinista State Security. There are conflicting reports as to what actually happened at the Embassy compound on December 24.

Wes had an interview with the Costa Rican Ambassador a week after the incident. The Ambassador emphatically stated that Urbina must have been forced to leave the Embassy. Manuel Urbina's two brothers—one is named Luis Corronado Urbina Lara—were interviewed in the first week in December. Their version of Manuel's exile in the Costa Rican Embassy is different from the Sandinistas:

"Manuel was a law student at the Central American University in Managua. There he belonged to the political branch of ARDE. In October 1983 he and 50 other students were accused of counterrevolutionary activities and imprisoned. While in State Security custody they were placed in cells of 1 cubic meter and were forced to stand in cold water up to their ankles and were left there for several days. During this time the State Security forced them into collaborating with them. They were to return to their activities within the political branch of ARDE and find ways of discrediting the organization. After 12 days they were sent to the "Zona Franca" because of protests the government received from the CPDH. They were released on December 22, 1983 in pardon given by the Sandinista government. Six months later Manuel Urbine sought asylum in the Costa Rican Embassy."

On May 2, 1964, Cesar Augusto Miranda Ortega, member of the Social Democratic Party (PSC) in Nicaragua was forcefully taken out of his classroom by members of the Sandinista Youth 19 de Julio. They shaved his head, whipped him with belts and covered his body with oil paint putting it into his nose and ears. They did this while Sandinista police stood by watching. He was then taken to the Sandinista Police Sub-Station and interrogated by State Security. Six hours later he was transferred to the Hospital Manolo Morales.

They took him out of the classroom because, as a member of the political opposition, he voiced his opinions about the Sandinista ideology. His accusation appeared in the CPDH. While in Managua, Wes interviewed several ex-students who witnessed the event. One of the female students said many people quit studying at the University after Cesar Miranda was beaten. They said they feared for their lives and couldn't study under such conditions.

A similar incident occurred in the town of Matayalpa in April 1983. Esteban Martinez witnessed "divine mobs" attack a student named Cesar Flores. The following is his story:

"Cesar Flores belonged to an organization which opposed Sandinism called the Social Christians. One day the mobs, the Sandinista Youth, came to class and took him out and humiliated him. They cut his hair and made him swim in the open sewer there by the school. I saw this happen in April of 1983."

Demonstration in Chinandega

There was a demonstration in Chinandega one week before Arture Cruz visited there during his political campaign for the Presidency in November 1984. Several civic and political youth organizations were protesting against the forced military recruitment. The "turbas" attempted to break up the demonstration but were outnumbered by the students involved in the protest. Fabian Gustavo Betancour was the Secretary General for the Social Democratic Party in Leon and Chinandega and was involved in organizing the demonstration. He is now a refugee in Honduras. He describes the following incident:

"I am here [in Choluteca Honduras] and fled political persecution because I am a member of the Social Democratic Party. We had a protest one week before Arturo Cruz arrived. In this demonstration there were anywhere from one to two thousand students. The Mercantil college had asked me to organize a protest against military conscription. The Sandinistas arrived at this school and carried a list of all those who would serve in the military. We organized a peaceful demonstration because we didn't want to serve. We didn't want to kill our brothers and we wanted all this to end. We started the protest and took to the streets. Since the "divine mobs" couldn't attack us because there were only a few, they called in to Leon and Managua. Close to 1000 turbas arrived in IFA troop transports. Nearly all the schools were there with us. The streets were full of students, fathers. The turbas arrived and started hitting us with clubs. The police not only didn't stop them but joined in to help them attack us. As I told you before, this was a peaceful demonstration against the military service. During the demonstration a girl had her throat slit. Many people saw that a CDS woman who works in the market had done it. The Sandinistas said she had been asphyxiated, but how could she be asphyxiated with all the blood all over. There were journalists from La Prensa but they censored the paper so we couldn't read about it."

Four students from Chinandega substantiated Fabian's story about the murder of the girl. Two of the students were interviewed in the Jacaleapa refugee camp and the others were interviewed in Teupesenti.

FORCED VOLUNTEERISM

Eduardo and Maritza Pereira left Nicaragua May 19, 1984. They lived in an aldea

called "Las Playas" In Nuevo Segovia. Olivia's family wouldn't sell their grain to the government cooperative store in the area in which they lived. This incident occured on June 26, 1983:

"Olivia's father, Alejandro, would not accept the low price which the government offered him for his grains. When he refused to sell them the grain at that price they said they would force him to. The next day the Sandinistas arrived at Olivia's home and forced their way into the home. Alejandro and Olivia's two brothers were taken out to the back of the house. One brother managed to escape through the corn field. The father and son were put against the House and shot. Those who witnessed the shooting were Olivia's mother, a neighbor girl about 25 years old and Olivia's brother that had escaped. She said they had come to the house to teach her father to cooperate and not ever sell his grain to anyone but them."

Rodriguez Sanchez from Murra, Nueva Segovia is another peasant farmer who felt pressured by the Sandinista Cooperative system:

"The Sandinista regime made life impossible. Before there was a free commerce. Now if you sell your grain without permission they'll throw you in jail. Many of my friends were jailed for doing that. I left Nicaragua because I realized that the Sandinista regime didn't support the working campesino."

The students coming across the border told us that they are pressured, through the educational system, to work on the cooperatives. A common feeling among these youth was, "If you don't cut coffee and cotton then you are not advanced into the next grade."

CONCLUSION

As stated in the introduction, we have tried to follow the guidelines of objective research. Except for certain political and civic leaders in Nicaragua, we randomly selected all other sources from which we wrote this report. The testimonies were checked against other stories to verify their accuracy. Many testimonies were discarded in this process. The testimonies used in this documentary represent common themes encountered during the investigations. This report is based on personal testimonies given to us. We used only a few examples to illustrate the abuses we heard during our interviews. We have many more which would further substantiate our findings.

From the 100's of interviews conducted we conclude that the Sandinista regime has systematically repressed those Nicaraguans who are not in support of their government.

The Sandinista government has lost popularity among the Nicaraguan people and has attempted to retain it's stronghold in Nicaragua through the use of force and terror.

Those groups most affected by the Sandinista's systematic use of force and repression are:

Religious groups, especially evangelic and pentecostal movements;

Peasants not willing to farm cooperatives or sell food in the government;

Teenage youth from 15 years and older not willing to serve in the military.

Civic and political organizations which don't support the policies of the government; and

Nicaraguans not actively involved in promoting the growth of the Sandinista system.

There is an underlying fear among all the Nicaraguans interviewed which should be mentioned in order to explain the diversity of stories currently coming out of Nicaragua. The people feel betrayed by their government and by the international community as a whole. They are very cautious about speaking out against a government they feel has control of the international humanitarian groups as well as the international journalists.

Many refugees said it was too dangerous to tell visitors about their experiences while they were still in Nicaragua. Others mentioned how they told reporters and Sandinista officials that their sons and daughters had been kidnapped by the Contras when in reality they had fled the country voluntarity or had joined the Contras themselves. To lie was the only way for them to avoid reprisals. We believe the type of systematic repression instituted by the Sandinistas has been successful in keeping much of this information from leaving Nicaragua.

We ask human rights organizations and journalists to talk to refugees in Honduras and Costa Rica. If they do this, a new side of the conflict in Nicaragua will become even more apparent. If groups choose to continue to ignore the causes of the steady stream of refugees and the stories they bring, reporters and human rights activists will not be doing justice to truth, nor to the common people of Nicaragua.

□ 1850

I yield to the gentleman from Ohio [Mr. MCEWEN].

Mr. MCEWEN. I thank the gentleman for yielding to me.

Mr. Speaker, I would just like to underscore something that the gentleman just said moments ago about a Nicaraguan citizen who was murdered under the Sandinista government. He was taken out into the mountains or elsewhere and left to be found and then was attributed, his death, to Contra activity.

I would like to augment that with information that I received upon a visit to El Salvador in meeting with the Human Rights Commission and others, who explained to us how that whenever there is support for the prodemocratic forces, that the left guerrillas can, at will, murder anyone, indiscriminately; throw them on the steps of the local news bureau or any of the international news organizations; point to that as activity by the death squad, that then gets full coverage across the globe as death squad activity. It leaves the prodemocratic, profreedom forces in the position of having to justify why this activity went on.

That has been so successful in El Salvador and has been brought to a successful art in Nicaragua where now they have formed Contra forces in the Sandinista Army. The Sandinista Army dresses up as though they are freedom fighters; they enter a village; declare themselves as prodemocratic, profreedom Contras; of course, they are warmly received by the citizens of the Nicaraguan village. Once they have identified who the potential supporters of the Contra forces would be, they then herd them into the center of town; murder them, and then leave.

Of course, an international news bureau that were to reenter that village; were to pose the question to the wives or mothers or surviving children of the murdered citizens of Nicaragua, would then report that the Contras came into our village, they murdered the men, the women and the children, and they left. That has been a very successful tactic, and I can say that over this following weekend, those forces that are antidemocratic, pro-Communist, pro-Sandinista will attempt to use that Communist tactic in every conceivable fashion over these next 72 hours. They will attempt to broadcast it on television and on radio.

I appreciate the gentleman for bringing that particular tactic to our attention.

Mr. LIVINGSTON. I appreciate the gentleman raising that fact. As a matter of fact, I might say that I just spoke with a citizen of Nicaragua not more than 2 days ago and he detailed the same account to me. In fact, he named the individual in charge of that Sandinista squad. Unfortunately, I cannot remember his last name, but his first name was Irene, I-r-e-n-e. I will get his last name for the RECORD so that we can supplement the RECORD for posterity.

I appreciate the gentleman pointing that out. I might also say that these incidents have been documented on a regular basis. There is adequate testimony if only people want to sit down and listen to it. There are plenty of people in Nicaragua who will talk about this stuff.

□ 1900

Madam Speaker, I have just come back from Managua. I have spoken to lots and lots of people on my own, and I can tell you that all of the stories I have heard from the people who do not favor the Sandinista regime back up, confirm, corroborate exactly what is in this report by these two Morman missionaries, Wesley Smith and Richard Rygg.

I might also add that there seems to be a trend of, well, a whole stream of American citizens and internationals, Canadians, and other people from Western Europe who are taking advantage of the opportunity afforded them by the Nicaraguan government, the Sandinista government, the Stalinista government, to get cheap airline fares to fly to Nicaragua to watch a dog-and-pony show put on by the Nicaraguan government and come back and blast the United States and blast anybody who would try to help the Contra movement.

But the fact is that is a trumped-up charge and those people are either being suckers or overtly allowing themselves to be used by the Sandinista government, because if anybody is truly interested in the plight of the

Nicaraguan people, they need only read this objective report by these two young missionaries who went down with no bias whatsoever and came back with this amazing account of one atrocity after another, perpetrated by the Sandinista, the Stalinista government, against the people of Nicaragua.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 239, TO APPROVE THE OBLIGATION OF FUNDS AVAILABLE FOR SUPPORTING MILITARY OR PARAMILITARY OPERATIONS IN NICARAGUA

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-50) on the resolution (H. Res. 136) providing for the consideration of the joint resolution (H.J. Res. 239) to approve the obligation of funds available under Public Law 98-473 for supporting military or paramilitary operations in Nicaragua, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2068, DEPARTMENT OF STATE, THE U.S. INFORMATION AGENCY, AND THE BOARD OF INTERNATIONAL BROADCASTING AUTHORIZATIONS, 1986 AND 1987

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-51) on the resolution (H. Res. 137) providing for the consideration of the bill (H.R. 2068) to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the U.S. Information Agency, the Board of International Broadcasting, and for other purposes, which was referred to the House Calendar and ordered to be printed.

INTERVIEW WITH ARCHBISHOP OF MANAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DORNAN] is recognized for 60 minutes.

Mr. DORNAN of California. Madam Speaker, as I said this morning in opening remarks during a 1-minute speech, we are entering a very tense period in the history of the Congress of the United States. We are going to begin that tense period, it appears, with a statement on whether or not Mr. Rick McIntyre, from the Eighth District of Indiana, who was twice certified as the winner of his congressional election last November 6, is going to be seated amongst us here in this body.

I am afraid the way events seem to be coming down in that story that a lot of good will is going to be lost in this House and there will be much hard feeling. The timing could not have been worse, and I was afraid this was going to happen: That it would come in conjunction with the beginning of the debate toward a vote on whether or not to support President Ronald Reagan's policies in Central America and the Caribbean.

Because of the late hour tonight, and our staff of recorders and clerks here, as usual working so hard and being so patient, and all of our brilliant staff members in the two cloakrooms, I am going to defer much of what I wanted to say tonight about the Nicaraguan problem to Monday night, but I would like to insert in the RECORD for my colleagues to read, and hopefully a handful will read, because I have this horrible feeling that we are talking past one another on this issue, and that nobody will listen to the thoughtful comment on the opposing side that each of us take on this issue of aid to the Nicaraguan democratic resistance forces, as I choose to call them.

I am trying not to do that. I am trying to listen to the documentation of the atrocities on the other side and seek out truth, because very rarely is anything in life black and white, there are always shades of gray; however, I have this feeling that those in the leadership on the majority side of the House of Representatives have closed their minds completely to the fact that there may be as many atrocities on the side of the Communist government in Managua as there were earlier when the Contras were first out in the field and they had not developed the discipline of a military structure, as I believe they have now.

I also, like the gentleman from Louisiana who just spoke, Mr. LIVINGSTON, have just returned in the last couple of weeks from three countries in Central America. It was my eighth trip in just 4 years to that region, and I had probably one of the most fascinating interviews in Managua with the archbishop of that archdiocese, Archbishop Miguel Obando y Bravo.

I said when I returned on April 3 in this Chamber that I have never met a more courageous man in this Hemisphere, and I mean that. Here is a man who truly accepts the full responsibility of being the shepherd of his flock there and he has been the president alternately of all the nine bishops in Nicaragua, and the things he told me in a long interview that I sat in on with Congressman VIN WEBER of Minnesota sharing the questioning with me, fortunately was tape recorded and has been carefully transcribed so that we could bring back for the first time, I believe, to this chamber in depth the remarks of the archbishop, the only archbishop of the nine in Nicaragua.

The interview was conducted, the dialog on March 30, 1985, and I would like to submit that for the RECORD:

INTERVIEW WITH ARCHBISHOP OBANDO Y BRAVO, MANAGUA, NICARAGUA, MARCH, 30, 1985

SERRA, HUNDLEY & FLORES,
St Paul, MN, April 15, 1985.

Mr. FRANK GRAVES,
476 Woodlawn,
St. Paul, MN.

DEAR MR. GRAVES: Thank you very much for considering us to do the translation of the tape taken from the interview with the Archbishop Obando y Bravo of Nicaragua.

Present at the interview were Congressman Vin Weber, R-Minnesota, Congressman Robert Dornan, R-California and Frank Graves National committeeman of the Independent Republican Party of Minnesota. Also present were Jack Meeks, Chief of Staff to Vin Weber in Minnesota, Brian Barnett, Administrative Assistant to Bob Dornan, Lynn Bouchey, Director of the Council of Inter American Security, and the interpreter. Because of difficulties in distinguishing the individuals asking questions, we have not identified them individually in the transcript. Most questions were asked by Robert Dornan, Vin Weber, and Frank Graves.

This interview took place on March 30, at the residence of Archbishop Obando y Bravo. It began at 1:30 p.m. and lasted for more than 90 minutes. The translation as represented in the attached transcript is as accurate as we could make it. However, there are problems with the audio tape, in that at times too many people are speaking at once and quite a few times the instantaneous translation superimposes the English over the Spanish. Occasionally neither are intelligible. In such cases, where translation is not possible, we have attempted to construct "the sense of the conversation" based upon contextual continuity. Such passages are indicated by underlining the section in question. In most cases we have translated directly from the Spanish. Whenever the original Spanish has been unintelligible, we have used the English version of the interpreter.

We have, in some cases, rearranged the punctuation and the structure of some of the paragraphs to make them more intelligible for the English reader. In no instances have the meaning of the statements been changed.

Thank you again for using the services of Serra, Hundley & Flores.

Sincerely,

ENRIQUE SERRA,
President.

BRAVO: No doubt that groups from the United States come here, and some of these groups are already prejudiced and have contacts with the Antonio Valdivieso Center, which is an ecumenical center in the sense that they represent both Catholic and Protestant groups, but they support the government. This is the institute of the Popular Church. At the bare grass roots level this Popular Church does not have any force, but it does at the propaganda level and it has many dollars and for the most part these groups from the United States come to this Center. The Center distorts a little bit the information and they go back to the United States saying that this is a marvelous system. Some come to find the truth, but the groups who come already

prejudiced rarely change their way of thinking.

INTERVIEWER: Do you think that they already come with a closed mind?

B: Some groups have already taken a position. When they speak to us they take a defensive attitude supporting the Sandinista government. We have also brought some Bishops from the United States, so they will know the realities and we have facilitated their meetings with different groups. We have been visited recently by the Archbishop of New York, O'Connor, the Archbishop of Washington, Hickey, Bishop John O'Mally and the Bishop of Corpus Christi. We have helped them to meet with people who have different ways of thinking. I have recognized that the Sandinistas have carried out a great amount of propaganda, not only in Nicaragua, but also in Europe. I have been to Germany and Italy. I think they have many sounding boards. International communism has given them a great deal of support.

I: Did not Archbishop Roach visit Nicaragua?

B: He was here for three days last year.

I: He has always been supportive of the Sandinistas and critical of President Reagan, but when he returned from his visit with you, he said that there was no choice but for the American Bishops to support the Bishops of Nicaragua. This was perceived by most people as a change in his position and that statement was very helpful to guide people from my part of the country. As an example of the kind of help that you can provide to us in your conversation with American Bishops, we need them to make those kind of statements they have not made before.

B: Some American Bishops have priests who advise them a little bit inclined toward the left and I think that these priests play an important role and they always come here with them. There are Maryknolls. Brian Heheir is always with them and they are inclined toward the left. Gallivan is another one.

I: Brian is the one who wrote the letter on capitalism and nuclear arms. He is the brains behind this group. He is machiavillian.

B: The Bishops in the United States say on the one hand that they are in agreement with the Bishops in Nicaragua, but on the other hand that they cannot justify Reagan's policy. I think that they are also under great pressure in the U.S. They told us to stop worrying, "Don't worry about what we say in the United States. We are under very strong pressure". On the other hand the Sandinistas send groups there and also the Maryknolls are very powerful.

I: Isn't that saying; don't mind us if we hurt you with what we say in the United States because we have pressures. We are supposed to lead.

I: We are elected. We are the ones who have to worry about the country. We are accountable only to the Holy Father and to God.

B: But there is no doubt they have pressure and Sandinistas visit all these Bishops and Archbishops and send the newspaper "Barricada" to them. And this is the kind of information that each Sandinista ambassador takes and not only to the Bishops of the United States, but also to other Bishops and Cardinals of South America.

I: Where is Father Pena?

B: He is in the Church of the Holy Spirit.

I: Is he in danger?

B: No, we have protected him, but to live here is always dangerous.

I: Have you gone to his church and said mass with him?

B: We have been in mass together. We are very good friends.

I: Have you had to telephone Daniel Ortega?

I: Well, when he was arrested we tried to establish a dialogue with Tomas Borge. He promised us that he would not do anything to him, but that very same day he sent a mob (turbas) that beat some of the people who were at the church. Then we limited ourselves to public statements and after a few months he was set free.

I: Was he beaten in prison?

B: He was under house arrest in the seminary. He was there for a few months.

I: Is your seminary allowed to operate here to train your people?

B: Yes, for the time being we are giving the philosophical orientation that we want. We have asked the government that they be excused from military service.

I: Have they threatened you?

B: Well we have to send them the list to see if they are going to excuse them from the military draft.

I: Is that still up in the air?

B: For the moment it has been resolved.

I: Let's come back to the Popular Church (Iglesia Popular). Do the priests of the Popular Church say they are not under your discipline as the shepherd of Nicaragua?

B: According to their public statements they are in communion with the Pope. But this is only of a tactical nature because in reality they follow a sectarian politics. They support the government in everything, even if it means going against the Pope himself.

I: Have they said this to you?

B: They have said it through the newspapers. For instance, when the Pope declared himself against the participation of priests in the council of ministers, these priests were against the orders of the Pope. They have very strongly criticized the Bishops publicly.

I: How many priests are in the Popular Church?

B: There are about ten Nicaraguans, but there are Canadians, Spaniards, and other foreigners.

I: How many Americans?

B: There are South Americans and North Americans. There are some nuns and priests who come from all over to organize seminars. They are sort of traveling in a laboratory.

I: Don't they come to you when they arrive? Don't they come for facilities?

B: That is arranged by the Popular Church. They organize seminars in the Valdivieso Center, the Historic Institute and they leave making statements to the effect that the only solution is Marxist-Leninism and struggling because Marxist-Leninism advocates class struggle.

I: We probably have some more technical questions but let me get a little philosophical now. Our Bishops that we love are in redemption, not in revolution; they don't go around recommending bombs or guerrilla movements, they don't talk about Jesus, so we have no Bishops on our side. Those who have to be secular, political and paid for (unintelligible) but the priests into revolution, defend killing, terrorism, bombs and they defend atheistic governments, Moscow or Cuba. How can we win? If our Bishops are silent and these priests slap the Bishops face, do what they want and ask me to pay for their clothes, their food, their houses, their gasoline and their car. I am very frustrated.

B: There is no doubt, I have been in meetings with American Bishops from C.E.L.A. and they demand that the U.S. disarm. I think that it is also necessary to disarm the Soviet Union, because if you only disarm one part it becomes very dangerous. There are groups of priests who think that Marxist-Leninism can be used to interpret social, political and economic realities, ignoring, so they claim, ideology. But it is impossible to define it this way, because they accept class ideology and they arrive at the conclusion that the end justifies the means.

I: Have some of these priests lost their vocation?

B: They deny it, but in practice they are orientated toward marxism, yes, they are marxist.

I: Do any of the "nine comandantes" go to church, go to communion or go to confession?

B: No, none of them.

I: Does Miguel de Scoto still go to church?

B: Well, it might be that he goes to church in the United States, but here in Nicaragua, I have never seen him in any church.

I: We were discussing before coming here, the status of the priests in the government; de Scoto, Cardenal etc. According to common law, what is their status within the church?

B: This problem was handled by the Vatican with the Bishop superior of these people, naturally the Holy See stated that priests must not occupy ministerial positions within the governments. During the first stage, the Holy See extorted the Bishops of Nicaragua to have a dialogue with these individuals and we concluded with them, that as long as they were members of the council of ministers, they would not be able to exercise their priestly duties neither publically nor privately. During the second stage, the Holy See asked them to resign from their posts but they refused. They are suspended, yet they continue on their jobs.

I: What's the difference between the first stage and the second one?

B: In the first stage, legally they could not be suspended (a divine). It was agreed with them that as long as they were members of the council of ministers, they could not exercise their priestly duties, whether public or private. In the second stage, they were told that if they did not leave their post, they would be. * * *

I: A decree from the Vatican.

B: From the Vatican or the Bishops, some of them are diocesan, like Ernesto Cardenal. His Bishop was instructed to send him a decree stating that if he didn't leave his position in fifteen days he would be suspended. He answered refusing to do so because he was going to be faithful to the revolution.

I: Fernando Cardenal is the minister of Education and Ernesto is * * *

B: Ernesto is minister of Culture and a diocesan priest. Fernando was a Jesuit priest and he was expelled by the Jesuits.

I: According to common law they are all forbidden to exercise their priesthood.

B: They would not be able to do it legally.

I: The next step; if they did something disloyal to the Pope, would be to defrock them.

B: An additional step would be for them to lose their priesthood in a legal sense. A priest may lose legally his status of priesthood through a very grave fault and when there is a rescript (official written order) from the Holy See. But this rescript can only be given by the Vatican and no Bishop can give it. Things are kind of tranquilizing,

but their status of priesthood can legally be taken away from them.

I: One more step could be excommunication.

B: The worst thing you can do is to take away their state of priesthood.

I: Has this been suggested to the Vatican?

B: The Vatican has remained silent about it.

I: But they are still thinking about the whole matter.

B: I thought that the Vatican was going to continue giving, but they just have been silent.

I: If Father Pena is ever beaten to death by the "turbas divinas", would the Pope move swiftly?

B: It depends on the information received by the Holy Father because, the first person in the church to defend a priest must be his bishop.

I: These people who come here with their prejudice; they are coming here to reinforce their prejudice. They come back to Minnesota to preach to the Lutheran congregation and their message is that there are now in Nicaragua two churches; the rich church and the people's church, and they say that the rich church, the traditional church, is out of touch with the people and has no following any more because everybody is going to the Popular Church. Then I hear from other people that this is a lie. So I would like to hear from you the Archbishop, what the truth is.

B: That is the kind of propaganda that the Frente Sandinista carries out in favor of the so called "Popular Church", but this is not the reality. If you are here tomorrow morning in Nicaragua, you can come to mass here at eleven o'clock and you will be able to see a good number of people. If you stay here until Holy Thursday you will see around ten thousand people. If you remain here until Good Friday, you will see around one hundred and twenty thousand, while the Popular Church will be able to assemble only a few people. But of course when they want to organize a show of public display, be it Catholic or not, they do it in a small church to give the impression that it is filled. I have been out in the country this week and I have seen many farmers (campesinos). Obviously, if you talk about the church of the poor, you are talking about us. We have visited the rural areas. This morning I visited with the sick of a church. We are the poor ones because we don't have any access to television. Our Catholic radio programs are censored by the government. But, there are certain priests that can make use of radio, television and government newspapers. They can say anything they want to while we suffer censorship. At the economic level we are the Church without land or property. We must live from what the leaders want to give us. There are some priests that receive not more than fifty dollars a month.

I: Does the Popular Church get money?

B: Yes, last year the Antonio Valdivieso Center received half a million dollars.

I: I would like to ask one more question. Geraldine Macias told me and a few other people, that to the unescapable detriment of the Sandinistas, that the people who now are reading the Bible, whether it is in the Popular Church or the other one, are not being deceived by marxist rhethoric. When they read the word of God they will sooner or later see the truth and her organization "The New Exodus" in Washington, most of the refugees who are coming from Nicaragua are people who have made a decision based on what they have read in the Bible. Is that what is happening?

B: I don't know if I am following your question.

I: The point is that she says that the word in the Bible overcomes propaganda.

B: There is no doubt that some of these priests from the Popular Church try to interpret the Bible from a marxist viewpoint. A good example of this is their interpretation of the passage of the good samaritan. Imperialism passed by, he saw him wounded and he closed his eyes. The Church passed by and also closed her eyes and did nothing until the Sandinistas Front came, cured him and housed him. Here they have not had too much success because the Bishops have exercised great leadership and they are believed by the people. That has stopped them a little bit, but probably with time the government may pressure the people and take advantage of that. Now they are having problems because the people believe the Bishops.

I: Evidently, their tactic of misinterpreting the Bible is backfiring. It's not working.

B: No doubt this has damaged them because we have been clear on this. You can not betray or distort God's words. We have spoken honestly, even though that we are aware that this could place us in danger of being attacked by the "turbas" (the mob).

I: Are all the Bishops of Nicaragua in total solidarity?

B: We are together. Each Bishop has a different temperament. Some are more independent, others are a little more generous toward the government. But when it comes to a pastoral letter, all of them sign it. Some Bishops are more combative, others are more passive.

I: Bishop Vega is like a rock.

B. He balances himself out.

I: Do you receive support from Rivera y Damas of El Salvador and the rest of the Bishops of Central America?

B: I am a good friend of Rivera y Damas, he was my law professor and we are from the same order, the Saleseans.

I: We met with him yesterday.

B: Yes, we are friends. He is going through a very different situaion, but we talked recently. We were in Costa Rica and we traveled together on the same plane. I tell him my experiences and he tells me his. We are friends but our situation is different.

I: Do you have a friendship with Bishop O'Connor?

B: Yes, I have been a guest of Bishop O'Connor twice in New York.

I: So you were meeting him for the first time?

B: No, I had already written him a letter inviting him to here.

I: Who was the boss of that committee, Bernardine or O'Connor?

B: O'Connor.

I: Was it obivous?

B: If he was not the boss, at least he made it look like he was.

I: Is Hickey more realistic about it?

B: I have been a guest of his, he asked me to stay at his house if I visit the U.S. I think that he understood the reality a little better. I think that he has always been influenced by some groups. He has been to Nicaragua twice.

I: He is a problem for us in the United States.

B: That's because he has pressure groups there and he greatly admires the Maryknoll nuns.

I: He feels responsible that Jean Donovan and one of his nuns were killed in El Salvador. They were from Cleveland. Did he tell you that?

B: No, he did not, but I know he has a picture of those nuns in his house.

I: Another problem is of course the bureaucracy of the U.S. Catholic Conference and that means Father Heheir, and that is bad news.

I: Archbishop, I am 51 years old, for 50 years, priests and nuns were my heroes. Last year, in coming back to Congress, eight nuns and priests told a lie. They took a full page ad in a newspaper, stating that abortion was not important, and Central America was everything. My political opponent has voted for abortion, so what, the House of Representatives, we have one hundred and twenty six Catholics. They are many. All the Catholics who vote for abortion, maybe two dozen of them, don't go to church any more, laugh at their Bishops on moral issues, but love the Bishops on Central America and disarmament and quote them on this every day. Those of us who practice our faith, go strong on moral issues such as abortion, narcotics and pornography, find ourselves opposite to our Bishops. One man; Brian Heheir is like Rasputin, he is behind everything and he is splitting us.

B: He is a very intelligent man.

I: Yes, Lenin was very intelligent.

I: Let me tell you what a sister said. Three nuns came here on a quick trip of two or three days; Sister Kromer Corandelay, Marianne Hepper and Sister Shinhoover, sister of St. Joseph. They said that there were no problems with the church in Nicaragua and the Popular Church was the real one and that the nine Bishops, then she paused, and said, "You know what Bishops are like; there is a misunderstanding with the hierarchy, our problem is our Bishops, and the church in Nicaragua is not oppressed." They denied when I said, quoting you, that Marxist Leninist literature is forced in parochial schools.

B: There is a materialistic orientation in the schools. The teachers must attend workshops and the workshops give them orientation. All schools have to attend these programs. Of course we try to introduce religion in one way or another, but the program is materialistic.

I: Can you give an example of how it is materialistic?

B: They disregard God and emphasize evolution. Likewise they also emphasize biology, economics and politics. They also insist on teaching about the martyrs and heroes of the revolution.

I: What about the members of the resistance, the contras? Are they friends of the Church where they are active or do they persecute the Church? What is your relationship with them?

B: I don't have any direct relationship with them at a personal level. They are in the mountains of Matagalpa, Jinoteca and the Atlantic coast. The reports sent to me by the Bishops who work there show that they have not received any problems from them, none.

I: Less problems than priests and Bishops have had from the government?

B: The reports that I have received from the priests of those areas, is that they have not had any problems with them.

I: Do any priests travel as chaplains with the contras? Enrique Bermudez in the north and Eden Pastora in the south have chaplains?

B: There are no priests, that I know of, working as chaplains.

I: What is your appraisal of the proposal made by Arturo Cruz to the Contadora regarding dialogue?

B: We Bishops put out a short while ago, a communique. In this communique we agreed that we could serve as mediators as long as the two sides in conflict want a dialogue and will accept us as mediators. We cannot impose the dialogue. The government has not given us an official response, but in government media, there has been an attack against the Bishops, accusing them of wanting dialogues with criminals and that they (the Sandinistas) will only dialogue with the master of the dog. The only thing they said is that they will only dialogue with the mouth of the machine gun.

I: That's pretty hard. I don't know if you can approve of aid to the contras resistance, but do you condemn them? If President Reagan asks for aid or we vote for aid, would you condemn that?

B: We have always been clear on this. We have stated that the ideal would be to find political solutions; that would be ideal. But of course, the layman can take their own attitudes and positions. The layman can choose his options without the need to consult with the hierarchy.

I: Can a campesino fight with the contras in good conscience and go to communion?

B: This depends on his conscience. I accept that in the moral field, and I quote from the words of Paul VI at Medellin (Colombia), violence is neither Christian nor Evangelical. But then he says that when there is an unjust situation and everything else has been tried, you can take up arms as a last resort, provided that the situation will get better and not get worse. The same it is said in number thirty eight of (unintelligible) when there is an institutionalized injustice and as a last resort, you can go as far as that. This is as long as you have used up every other means. The layman could make up his own reasoning if he believed that this is his last resort.

I: As long as you hold to the promises of improvement.

B: Not if they are going to get worse, but if they are going to get better, the answer is yes.

I: This is an important point, moral theology. This is an issue of moral truth.

B: This is based on Thomestic ethics; in the presence of an unjust agressor, I have the right to legitimate defense.

I: I have a different question. We can leave the Catholic area for a minute. As difficult as conditions have been for the Catholic Church here, we have heard even more horrible stories about the treatment of other religions in Nicaragua by the Sandinistas, particularly the Pentecostals, and to an extent the Jews. Can you comment for us on the treatment of the smaller religions, such as the Protestants, by the government. Are they oppressed?

B: Some Protestants are on the safe side. They had their problems. They took synagogues away from the Jews. The Protestants who have not been aligned with the government have been harassed. Most people here are Catholics. When there is a confrontation with the Catholic Church it has great publicity. Around here the Catholic Church is stronger.

I: In April of 1984 you had a pastoral letter that the Church was being oppressed. This is what I told Marianne Hepper the nun. Do stand by that letter, that you being oppressed then?

B: We the Bishops had established conversations December 24th of last year. At present there is a commission of Bishops that continue conversations with a commission of the government. We have had difficulties in obtaining visas for foreign priests who want to come here. Many of the missionaries who were here were getting tourist visas rather than resident visas, so we have started a dialogue to see if all these problems are solved. They have not been solved entirely. They are being partially solved. There is no doubt that there have been problems for us. People in our Church are being pressured by the CDS's block committees. Some catechists have been sent to jail. There have not been any more attacks by the "turbas" as the one in June of last year. As you know my car was twice destroyed by the "turbas". They broke the glass windows.

I: Were you in the car?

B: I was dressed in red very solemnly.

I: Were you both times in the car?

B: Not the first time. The second time I was inside. They threw rocks and they broke all my windows, but not my head (laughter).

I: That would have been a sacrilege. May I give you an opinion in closing?

B: O.K.

I: I believe monsignor, that things are a little better because young men in Nicaragua are fighting with the democratic resistence. And I am saying a rosary for them every day at work and every day at home and I go to communion every day.

B: And for the Bishop also (laughter).

I: I am going to vote for aid for the democratic resistance in good conscience.

B: That's good. Does the other congressman have a last word?

I: The Archbishop mentioned that he had been to Washington, perhaps he is coming again soon?

B: I have been invited to go to Washington the 15th of April, but I can't go. I haven't announced it. I am being invited by the State Department. I have to consult on this, as a matter of courtesy, with the Bishop there and my presence there always receives wide publicity.

I: It would be very helpful for us, whenever you can, to come to Washington and talk to the people and the news media as well as people in Congress. When you come to Washington we will be honored if you will allow us to arrange private meetings, off record, unpublicized, with members of Congress.

B: I will let you know when I go there. I think that Monsignor Carballo might be going there by the middle of April. I am abstaining from going because as Archbishop it will attract so much publicity and as a matter of courtesy I have to count on the Bishop there. All this creates a little bit of a problem for me.

I: He is the priest who was set up and ran on up the street naked (only in English).

I: With your permission.

I: He works for you.

B: We are very grateful for what you are doing for Nicaragua. Thank you for this pleasant visit.

Mr. DORNAN of California. Also, I want to put in the RECORD, having just come over to the Chamber from the conclusion of the Subcommittee on Western Hemisphere Affairs of the Committee on Foreign Affairs, of which I am a member—I served 2 years in 1981 and 1982 on the Western Hemisphere Subcommittee and passed up an opportunity to serve on it during the next 2 years and, of course, when heightened debate begins on this issue I am going to regret that decision, but I chose instead to serve on the Arms Control Subcommittee and the Subcommittee on the Middle East, Europe, and the Soviet Union, because I believe that time will bear me out that in the next 2 years those may be coequally if not more important than what is happening here in our own hemisphere.

But there is no getting around the fact that the doctrine outlined by President John F. Kennedy in the most amazing inaugural address I have ever heard by a President in my life, that address that was given by young John Kennedy on that biting, cold morning of January 20, 1961, he laid out what I will call during the debate next week the Kennedy doctrine, and it was very clear, very succinct, and it has rung like a powerful bell down through the decades as a guide to how we should approach an alliance of friendship and progress and brotherhood and sisterhood with these tiny little nations in the isthmus of Central America that is truly a part of the North American Continent.

□ 1910

You can feel that when you arrive at one of the airports down there in Guatemala, El Salvador, Honduras, and Nicaragua. We are truly closer to the United States in my State of California, Arizona, New Mexico, Texas, the Deep South, and certainly much closer to Miami, when we are down there than Miami itself is, or any Texas cities are to the Capital, Washington, DC.

At the subcommittee hearing, the hearing of the Subcommittee on Western Hemisphere Affairs, this afternoon and into the evening, one person's testimony, I think, with all due respect to all the fine people who testified, stood out head and shoulders above all the rest. He is a distinguished educator in our country, a professor of great renown, president of the esteemed Boston University, and was a member of the Presidential Commission on Central America. In shorthand, that was referred to in the media as the "Kissinger Commission." I am speaking of Mr. John R. Silber.

Mr. Silber gave much testimony on the Kennedy doctrine, and I will be putting some of that in next week. But in the eight pages of his opening remarks that he delivered in totality with great feeling in front of the subcommittee, there was one paragraph I would like to read, and I hope, although I am going to try to make it a rule for myself, that Members on both sides of the aisle, particularly on the majority side, will realize that these words of Mr. Silber not only apply to the debate over aid to the resistance forces of the so-called Contras, but

they really should apply to any debate here. We very often, I think, forget them, and I think there is going to be a temptation to forget this friendly admonition or this friendly observation this time.

Professor Silber, President Silber, said this: "I am aware that many patriotic Americans, some of them distinguished members of this subcommittee, oppose aid to the Nicaraguan rebels and do so on highly principled grounds." And I am sure he would not mind my paraphrasing that to include the whole House and the other body.

I acknowledge that. I know that there are many Members who on principle have problems with covert action or overt action and have problems with a not duly recognized fighting force. However, please, all Members, recognize that there are those of us who want to support the partisans in the hills of Nicaragua, the resistance in Nicaragua, the democratic forces in Nicaragua, what we believe to be the freedom fighters in Nicaragua, and that we are also basing our support on highly principled grounds.

Where I feel a terrible frustration in this debate is that much of the testimony, such as the brilliant testimony brought forward by the gentleman from Louisiana [Mr. LIVINGSTON] in the last hour, should have been discussed on this House floor all during November, up until the adjournment for the November 6 election, and that somehow or other Congressmen should have found ways to write op-ed news pieces in the newspapers of this country and call their local television stations and, yes, even call CBS, NBC, and ABC, the owned and operated stations, and Management Process in New York to ask them to make sure that both sides of this story be presented before the American people. That has just simply not happened. We are playing catchup.

I hope the rule that was just introduced by the chairman of the Committee on Rules, the distinguished gentleman from Florida [Mr. PEPPER], on this debate on the foreign policy of our President toward Nicaragua will make provision for as much debate as is humanly possible to get all aspects of this story out before the American people.

Madam Speaker, I submit the opening eight pages of Mr. Silber's remarks before the Subcommittee on Western Hemisphere Affairs, as follows:

TESTIMONY OF JOHN R. SILBER, PRESIDENT, BOSTON UNIVERSITY, APRIL 18, 1985

In 1962 the United States met a major Soviet challenge in Cuba decisively and directly. Under President Kennedy's firm leadership, we forced the removal from Cuba not only of Soviet missiles that threatened the eastern half of the United States, but of aircraft, troops and all offensive military hardware. Regrettably, in the years that followed, distracted by Vietnam and Watergate, we allowed the Soviets to return offensive weapons to Cuba in carefully graduated increments. Cuba now provides them with bases for anti-submarine aircraft, a submarine base tending nuclear and conventional submarines, a massive intelligence installation which monitors communications within the United States, and airfields capable of receiving supersonic intercontinental bombers.

In short, Mr. Chairman, the island of Cuba has become a massive Soviet forward base from which revolution is exported to Central America. It is not my purpose to trace the steps by which this came to be but to ask whether the United States is prepared to tolerate in our hemisphere the consolidation of a second Soviet satellite.

In my opinion, our country is now confronted with problems less sensational but no less dangerous than those which President Kennedy faced and solved, however temporarily. (See Appendix A, *The Kennedy Doctrine.*)

All discussions of United States policy in Central America are bedeviled by historical myth. This is especially true of our policy toward Nicaragua. There are three controlling myths: the first is that the Sandinistas were incipient democrats whom an unkind United States drove into the arms of Cuba and the Soviet Union, and who would yet create a democratic Nicaragua if only approached diplomatically. No one who has read the pronouncements of the present Sandinista leadership before it took power could fall victim to this delusion. The Sandinistas described themselves as Marxist-Leninists long before 1979, and subsequent pronouncements by Sandinista leaders once in power only confirm this.

It is crucial to understand, moreover, that "Marxism-Leninism" is neither buzzword nor epithet but the name of a precisely defined political system whose nature has been revealed in nearly 70 years of unvarying practice. No Marxist-Leninist regime has ever submitted itself to the discipline of free elections, nor to the discipline of a free press, nor of free trade unions. Such regimes have permitted no genuine competitors for political power. Indeed such regimes have not even tolerated unauthorized private organizations.

This brief recapitulation of the obvious enables us to understand and predict the behavior of the Sandinista regime. It began, like most such regimes, with the seizure of power, first from the tyrants of the old order, and then from the democrats who had helped drive them out. It continued with the suppression of free speech and free media, curbs on free trade unions and private enterprise, and restrictions on the free exercise of religion. No Leninist regime has ever voluntarily moderated such behavior. The precedent, on the contrary, is for its intensification until the Sandinistas have throttled the last remains of free insititutions in Nicaragua. If the regime in Managua does not yet perfectly resemble that in Havana or Moscow, it is only because, for reasons to which I will return, it has not yet managed to consolidate its power.

All historical experience suggests that hopes of a merely diplomatic solution to the crisis posed by the Sandinistas are almost certain to be disappointed. The only solution likely to come from diplomacy unsupported by intensive pressure is the sort reached at Munich in 1938. Diplomacy is a complement to, not a substitute for, the measured application of geostrategic pressure.

The myth that the Sandinistas are misunderstood democrats, as well as others I will be discussing, did not just grow. They have been hyped through the latest marketing techniques by, among others, a Washington- and New York-based p.r. firm working on behalf of the Sandinista leadership. (See Appendix B, Fenton Communications, Inc. Newsletter.)

The second myth is that the military and political forces now opposing the Sandinistas are dominated by former associates of the Somoza regime who are fighting to restore the bad old days. This argument conveniently overlooks the major role played in the struggle against Somoza by many of the figures now fighting for democracy against the Sandinistas. One of these leaders, Eden Pastora, was a hero of the Sandinista forces before the revolution, described by Somoza himself in his memoires as "a communist terrorist." Others, such as Arturo Cruz and Violeta Chamorro, were members of the revolutionary junta before being forced out by the Sandinistas. Many others, including Alfonso Robelo, Adolfo Calero, and Alfredo Cesar, had actively opposed Somoza. The fact is that the so-called "contras" are the democratic leadership of the betrayed Nicaraguan revolution. When they call themselves "freedom fighters," they speak no more than the truth.

It is equally true that the Sandinistas are themselves employing the apparatchiks of the Somoza regime. Many former Somocistas now serve as leaders of the Committee for the Defense of the Revolution, a fact noted by Robert Leiken in his famous *New Republic* article repudiating his earlier support of the Sandinistas. (See Appendix C, *The Future of Democracy in the Hemisphere.*) This practice is in the tradition of Leninist regimes, which frequently make bureaucrats of the old despotism into useful servants of the new.

A third myth is that armed revolution led by the extreme left will bring democracy to Central America. The fact is that armed revolution has brought despotism, not democracy, to Nicaragua. In El Salvador, by contrast, Jose Napoleon Duarte's courageous democratic leadership, backed politically, militarily, and economically by the United States, has produced an increasingly broad-based and democratic government despite the pressures and chaos imposed by a Marxist-Leninist insurgency.

We must realize that El Salvador and Nicaragua pose instructive opposites: El Salvador is an imperfect democratic government. Its failures in human rights are most accurately described as its inability to embody its own principles, while it resists overthrow by totalitarians. Nicaragua is a totalitarian government. Its failures in human rights are most accurately described as the fulfillment of its own principles, while it resists overthrow by the forces of democracy. In El Salvador, we have a government whose inadequate guarantees of human rights demonstrate its present inability to live up to its ideals; in Nicaragua, the inadequacy is much more serious: it reveals the programs of a government fully living up to its ideals, under which the very concept of human rights independent of the state is meaningless.

Nothing is more reasonable, therefore, than that the United States should support both democracy in El Salvador by aiding a freely elected government against its armed enemies and democracy in Nicaragua by aiding the democratic opponents of a totalitarian regime.

I am aware that many patriotic Americans, some of them distinguished members

of this subcommittee, oppose aid to the Nicaraguan rebels and do so on highly principled grounds. I should like to pose, for these and other Americans, several questions. If we should not be aiding the Nicaraguan rebels now, at what point, if any, should we aid them? Those who would answer "never," whether they know it or not, are consigning the people of Nicaragua to an enduring Leninist despotism. If the Congress refuses to support those fighting for democracy in Nicaragua, the Sandinistas will conclude that they have succeeded in neutralizing the United States. We can then expect an immediate consolidation of the regime. Let us be clear what this consolidation will mean: the final surpression of free speech, free press, free trade unions, free religion, and the utter abolition of any vestige of pluralism in Nicaraguan society. It would certainly mean a vastly increased persection of the Miskito Indians.

To those who would answer "We will support democracy in Nicaragua eventually, but not now," I would ask, "When?" When the Sandinistas finally snuff out the flickering light of *La Prensa*? When they abolish the last free trade union? When they abolish all political parties but their own? I have said "when" rather than "if" because all these actions are inevitable.

There is another series of contingencies to which "if" applies. Would one favor support for the rebels if the Sandinistas acquire MIG fighters or more attack helicopters? If they step up their support of the rebels in El Salvador? If they begin exporting revolution to Honduras, to Guatemala, and to Costa Rica? If they invade any of these countries? At this point, of course, the question of aid to the freedom fighters will be moot, for they will long since have been crushed. The question will be whether one favors the survival of freedom and democracy in Central America, for by that time, the Cuban and Soviet forces will pose a serious and direct threat to Mexico and to the United States.

The price of containing Soviet adventurism in the Americas will never be as cheap, in dollars and blood, as it is today. Better by far to aid the so-called "contras" today than to send in the Marines later. Absent pressure of the type and intensity brought to bear by the democratic rebels, the Sandinista leadership will have no reason to negotiate a democratic outcome.

It is crucial in this to distinguish between El Salvador, where the overwhelming majority of those in authority are committed to democracy (and where, despite the doubts of many Americans, the vector seems solidly aimed at a democratic society) and Nicaragua, where those in power are committed to totalitarianism. We must not be misled by the noble ends professed by the Sandinistas. Like all Leninists, they ostensibly pursue splendid goals that can be summed up in two words: freedom and abundance. And like all Leninists, they will fasten upon the Nicaraguan people a system irrefragably opposed to freedom and irrefragably incapable of producing abundance.

The vote on aid to the "contras" is crucial. We stand where the British and French stood in 1936 when they faced Hitler's comparatively unconsolidated totalitarian regime. Unfortunately, they acted as if diplomacy and power were opposed concepts and allowed Hitler the first of his bloodless victories. The lessons of their folly should be entirely clear to all of us today: Totalitarians do not stop; they must be stopped.

The price Americans are now asked to pay for ending the Soviet-Cuban adventure in Nicaragua is very small. Each month it will rise. The United States, like Britain and France, will eventually pay the greatly escalated price that inaction will make inexorable. The Congress still has a chance to keep the price low by continued support of the Nicaraguan rebels.

In aiding the "contras," the United States has the opportunity to avoid the errors of the democracies in the late 1930s. Had the French, for example, sent no more than a division into Germany when Hitler remilitarized the Rhineland, he would have been forced into a humiliating withdrawal that would probably have precipitated his removal from power. Had Chamberlain not gone to Munich, a well-advanced plot by the German High Command to remove Hitler would have been put into effect and almost certainly succeeded. But the allies preferred to believe that Hitler would respond to diplomacy devoid of power and, acting on this illusion, they left no alternative to war. Their intentions were admirable: to avoid a repetition of the carnage of the First World War. But their admirable intentions did not prevent the carnage. The lesson lives on.

COMMUNICATION FROM THE HONORABLE LYNN MARTIN, A MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable LYNN MARTIN, a Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, April 18, 1985.

Hon. THOMAS P. O'NEILL,
Speaker, House of Representatives, H204 Capitol, Washington, DC.

DEAR MR. SPEAKER: This is to notify you, pursuant to Rule L(50) of the Rules of the House of Representatives, that Ms. Allison Goddard of my district office has received a subpoena issued by the State of Illinois, County of Winnebago.

I will, in consultation with the General Counsel to the House, make the determination required by the Rule and will promptly notify you of those determinations.

Sincerely,

LYNN MARTIN,
Member of Congress.

RULES OF THE SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL FOR THE 99TH CONGRESS

(Mr. RANGEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. RANGEL. Mr. Speaker, pursuant to rule XI, clause 2(a) of the Rules of the House of Representatives, I present for printing in the CONGRESSIONAL RECORD the rules of the Select Committee on Narcotics Abuse and Control for the 99th Congress, adopted at the committee's organizational meeting on April 3, 1985:

RULES OF THE SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

(Adopted April 3, 1985, 99th Congress, 1st Session)

RULE 1: GENERAL

The Rules of the House of Representatives, to the extent they apply, together with the following rules, shall be the rules of the Committee.

RULE 2. MEETINGS

(a) The regular meeting day of the Committee for the conduct of its business shall be on the second Thursday of each month while the Congress is in session.

(b) Additional meetings may be called by the Chairman and a regular meeting of the Committee may be dispensed with when, in the judgment of the Chairman, there is no need therefor.

(c) Special meetings may be convened as provided for by clause 2(c)(2) of Rule XI of the Rules of the House.

(d) At least 3 days (excluding Saturdays, Sundays, and legal public holidays) before each scheduled Committee meeting, each member of the Committee shall be furnished a list of the subjects to be considered or acted upon at such meeting.

RULE 3. HEARINGS

(a) Members of the Committee shall be advised and a public announcement shall be made of the time, date, place, and subject matter of any hearing to be conducted by the Committee at least one week before the commencement of such hearing, unless the Chairman determines that there is good cause to begin such hearing at an earlier date, in which event the Chairman shall advise Committee members and make the public announcement at the earliest possible date. Any announcement made under this paragraph shall be promptly published in the Daily Digest and promptly entered into the committee scheduling service of the House Information Systems.

(b) Unless authorized by the Chairman, a witness shall not be permitted to testify or present evidence at a hearing of the Committee, and such testimony or evidence may not be included in the Committee hearing record, unless 50 copies thereof have been delivered to the Committee at least 48 hours prior to such hearing.

(c) A Committee member may question a witness only when recognized by the Chairman for such purposes. In accordance with clause 2(j)(2) of Rule XI of the Rules of the House, each Committee member shall be allowed 5 minutes to question a witness until each member who so desires has had such opportunity. The Chairman shall, insofar as practicable, recognize alternately on the basis of seniority those majority and minority members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the discretion of the Chairman.

(d) At any hearing the minority party members of the Committee shall be entitled, upon request to the Chairman by a majority of them before the completion of the hearing, to call witnesses selected by the minority to testify with respect to the subject matter of such hearing during at least one day of hearing thereon.

(e)(1) The Chairman at an investigative hearing of the Committee shall announce in the opening statement the subject of the investigation.

(2) A copy of the Rules of the Committee and clause 2 of Rule XI of the Rules of the House shall be made available to each witness.

(3) Witnesses at an investigative hearing may be accompanied by their own counsel for the purpose of advising them concerning their constitutional rights.

(4) The Chairman may punish breaches of order and decorum, and of professional

ethics on the part of counsel, by censure and exclusion from the hearing; and the Committee may cite the offender to the House for contempt.

(f) Any witness may obtain a transcript copy of his or her testimony given at a public session or, if given at an executive session, when authorized by a majority of the members voting, a majority being present.

RULE 4. COMMITTEE PROCEDURE

(a)(1) Unless otherwise required or permitted by these rules, one-third of the members of the Committee shall constitute a quorum for the transaction of Committee business. Any Committee member present at a Committee meeting may make a point of order that a quorum is not present, but a quorum shall be deemed present unless a member who is present objects.

(2) Two members shall constitute a quorum for the purposes of taking testimony and receiving evidence.

(b) Meetings for the transaction of business and hearings of the Committee shall be open to the public or closed, in accordance with clauses 2(g)(1), 2(g)(2), or 2(k)(5) of Rule XI of the Rules of the House. No evidence or testimony taken in executive session may be released or used in public session unless authorized by a majority of members voting, a majority being present.

(c) A vote by any member of the Committee with respect to any matter being considered by the Committee may be cast by proxy if the proxy authorization is in writing, asserts that the member is absent on official business or is otherwise unable to be present at the meeting of the Committee, designates the member of the Committee who is to execute the proxy authorization, and is limited to a specific matter and any amendments or motions pertaining thereto (except that a member may authorize a general proxy for motions to recess or adjourn, or for other procedural matters). Each proxy to be effective shall be signed by the member assigning his vote and shall contain the date and time of day that the proxy is signed. No proxy may be counted for the purpose of constituting a quorum.

(d) Every motion made to the Committee and entertained by the Chairman shall be reduced to writing upon the demand of any member, and a copy made available to each member present.

(e) In the absence of the Chairman at any meeting or hearing of the Committee, the ranking member of the majority party on the Committee who is present shall preside at such meeting or hearing.

(f) A complete record of all Committee action, including a record of all votes on any question on which a rollcall vote is demanded, shall be maintained by the Committee. The result of each such rollcall votes shall be available to the public for inspection at the offices of the Committee during normal working hours.

(g) Any member of the Committee may demand and the Chairman shall order a rollcall vote on any matter considered by the Committee.

RULE 5. COMMITTEE REPORTS

(a)(1) Except as provided in paragraph (b), any Committee report shall be approved by a majority of the members voting at a meeting at which a majority is present.

(2) A proposed report shall not be considered in a Committee meeting unless a copy of the proposed report is provided to each member of the Committee at least 5 days (excluding Saturdays, Sundays, and legal public holidays) prior to the meeting.

(b) The Chairman is empowered to obtain the approval of any report in any appropriate manner, including by polling the members of the Committee in writing. In such cases, a copy of the proposed report shall be made available to each Committee member for at least 5 calendar days (excluding Saturdays, Sundays, and legal public holidays) and the approval of a majority of the Committee is required. The Chairman shall promptly notify Committee members in writing of the approval or disapproval of the proposed report.

(c) Supplemental, minority, or additional views may be filed in accordance with clause 2(l)(5) of Rule XI of the Rules of the House. The time allowed for filing such views shall be 3 calendar days (excluding Saturdays, Sundays, and legal public holidays) after approval of a proposed report in a meeting of the Committee or after the Chairman issues a notification of approval pursuant to paragraph (b).

(d) If hearings have been held on the subject matter of the proposed report, every reasonable effort shall be made to have such hearings available to the members of the Committee before seeking approval of the proposed report.

RULE 6. POWERS AND DUTIES OF COMMITTEE

(a) For the purpose of carrying out any of its functions and duties, the Committee is authorized to sit and act at such times and places within the United States, including any Commonwealth or possession thereof, or elsewhere, whether the House is in session, has recessed, or has adjourned.

(b)(1) The Committee may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, documents, and other exhibits and materials, as it deems necessary.

(2) A subpena may be authorized and issued by the Committee in the conduct of any investigation or series of investigations or activities, only when authorized by a majority of the members voting, a majority being present.

(3) Notwithstanding subparagraph (b)(2) of this rule, a subpena may be authorized and issued in the conduct of any investigation or series of investigations or activities by the Chairman upon the concurrence of the ranking minority member on the Committee.

(4) Authorized subpenas shall be signed by the Chairman or by any member designated by the Committee, and may be served by any person designated by the Chairman or such member.

(c) The Chairman, or any member of the Committee designated from time to time by him, shall report on the meetings, hearings or other activities of the Committee to any other committee of the House which has subject matter jurisdiction therein.

RULE 7. BROADCASTING

(a) Whenever any hearing or meeting conducted by the Committee is open to the public, the Committee may permit such hearing or meeting to be covered, in whole or in part, by television broadcast, radio broadcast, and still photography, or by any of such methods of coverage, under the rules established by paragraph (b) of this rule: Provided, however, that the Chairman shall determine, in his discretion, the number of television and still cameras permitted in a hearing or meeting room.

(b)(1) If television or radio coverage of any hearing or meeting of the Committee is to be presented to the public as live coverage, such coverage shall be conducted and presented without commercial sponsorship.

(2) No witness served with a subpena by the Committee shall be required against his or her will to be photographed at any hearing or meeting or to give evidence or testimony while the broadcasting of such hearing or meeting, by radio, or television, is being conducted. At the request of any such witness who does not wish to be subjected to radio, television, or still photography coverage, all lenses shall be covered and all microphones used for coverage turned off.

(3) The allocation among the television media of the positions of the number of television cameras permitted by the Chairman shall be in accordance with fair and equitable procedures devised by the Executive Committee of the Radio and Television Correspondents' Galleries.

(4) Television cameras shall be placed so as not to obstruct in any way the space between any witness giving evidence or testimony and any member of the Committee, or the visibility of such witness and such members to each other.

(5) Television cameras shall not be placed in positions which obstruct unnecessarily the coverage of the hearing or meeting by other media.

(6) Equipment necessary for coverage by the television and radio media shall not be installed in, or removed from the hearing or meeting room while the Committee is in session.

(7) Floodlights, spotlights, strobelights, and flashguns shall not be used in providing any method of coverage of the hearing or meeting, except that the television media may install additional lighting in the hearing or meeting room, without cost to the Government, in order to raise the ambient lighting level in the hearing or meeting room to the lowest level necessary to provide adequate television coverage of the hearing or meeting at the then current state of the art of television coverage.

(8) In the allocation of the number of still photograhers permitted by the Chairman to cover a hearing or meeting, preference shall be given to photographers from Associated Press Photos and United Press International Newspictures. If requests are made by more of the media than will be permitted by the Chairman, for coverage of a hearing or meeting by still photography, that coverage shall be made on the basis of a fair and equitable pool arrangement devised by the Standing Committee of Press Photographers.

(9) Photographers shall not position themselves at any time during the course of the hearing or meeting between the witness table and the members of the Committee.

(10) Photographers shall not place themselves in positions which obstruct unnecessarily the coverage of the hearing or meeting by other media.

(11) Personnel providing coverage by the television and radio media shall be then currently accredited to the Radio and Television Correspondents Galleries.

(12) Personnel providing coverage by still photography shall be then currently accredited to the Press Photographers Gallery.

(13) Personnel providing coverage by the television and radio media and by still photography shall conduct themselves and their coverage activities in an orderly and unobtrusive manner.

RULE 8. AMENDMENT OF RULES

The Rules of the Committee may be modified, amended, or repealed, by a majority of the members voting at a meeting at which a majority is present. Written notice of any proposed change shall be provided to each member of the Committee not less than 3 calendar days (excluding Saturdays, Sundays, and legal holidays) before the meeting date on which such change is to be considered.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ACKERMAN (at the request of Mr. WRIGHT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. FRANK, for 60 minutes, today.

(The following Members (at the request of Mr. MCMILLAN) to revise and extend their remarks and include extraneous material:)

Mr. LIVINGSTON, for 60 minutes, today.

Mr. ROWLAND of Connecticut, for 60 minutes, today.

Mr. LAGOMARSINO, for 60 minutes, today.

Mr. RIDGE, for 5 minutes, today.

(The following Members (at the request of Mr. FRANK) to revise and extend their remarks and include extraneous material:)

Mr. WEISS, for 5 minutes, today.

Mr. GLICKMAN, for 5 minutes, today.

Mr. LUNDINE, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. HOYER, for 60 minutes, today.

Mr. PENNY, for 60 minutes, today.

Mrs. SCHROEDER, for 60 minutes, today.

Mr. FEIGHAN, for 60 minutes, April 25.

(The following Members (at the request of Mr. LIVINGSTON) to revise and extend their remarks and include extraneous material:)

Mr. DORNAN of California, for 60 minutes, April 22.

Mr. DORNAN of California, for 60 minutes, April 23.

Mr. DORNAN of California, for 60 minutes, April 24.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MCMILLAN) and to include extraneous matter:)

Mr. MCKERNAN.
Mr. PARRIS.
Mr. SILJANDER.
Mr. CLINGER.
Mr. CONTE.
Mr. GREEN.
Mr. COUGHLIN.
Mr. DAUB.
Mr. SHAW.
Mr. MCEWEN.
Mr. FIELDS in two instances.
Mr. DREIER of California.
Mr. COURTER.
Mrs. ROUKEMA.
Mr. KOLBE.
Mr. STUMP.
Mr. LAGOMARSINO in three instances.
Mr. SKEEN.
Mr. SHUMWAY in two instances.
Mr. COATS.
Mr. MOORE.
Mr. GALLO.
Mr. FRENZEL in five instances.
Mr. GROTBERG.
Mr. CAMPBELL.
Mr. MOLINARI.
Mr. SAXTON.

(The following Members (at the request of Mr. FRANK) and to include extraneous matter:)

Mr. MANTON.
Mr. LOWRY of Washington.
Mr. SCHUMER.
Mr. HERTEL of Michigan.
Mr. KASTENMEIER.
Mr. HEFTEL of Hawaii.
Mr. YATRON in three instances.
Mr. BARNES in six instances.
Mr. GAYDOS in two instances.
Mr. FEIGHAN in two instances.
Mr. DOWNEY of New York.
Mr. RANGEL in four instances.
Mr. DELLUMS in two instances.
Mrs. LLOYD.
Mr. KANJORSKI in two instances.
Mr. UDALL.
Mr. BOLAND.
Mr. LIPINSKI.
Mr. LANTOS.
Mr. LEHMAN of Florida.
Mr. CROCKETT in five instances.
Mr. SOLARZ in two instances.
Mr. ROSTENKOWSKI.
Mr. SWIFT.
Mr. GUARINI.
Mr. KOSTMAYER.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 236. Joint resolution commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 109. Joint resolution to designate the week of April 14, 1985, as "Crime Victims Week."

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and joint resolutions of the House of the following titles:

On April 4:

H.R. 730. An act to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, AZ;

H.R. 1239. An act making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency famine relief and recovery in Africa, and for other purposes;

H.R. 1847. An act to amend title 28, United States Code, with respect to the U.S. Sentencing Commission;

H.R. 1866. An act to phase out the Federal supplemental compensation program;

H.J. Res. 74. Joint resolution to designate the week of September 8, 1985, as "National Independent Retail Grocer Week"; and

H.J. Res. 186. Joint resolution designating April 2, 1985, as "Education Day, U.S.A."

On April 18:

H.J. Res. 236. Joint resolution commemorating the 24th anniversary of the Bay of Pigs invasion to liberate Cuba from Communist tyranny.

ADJOURNMENT

Mr. DORNAN of California. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 15 minutes p.m.), under its previous order, the House adjourned until Monday, April 22, 1985, at 3 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1058. A letter from the Director, Office of Management and Budget, transmitting the President's revised estimates of the 1986 budget, pursuant to 31 U.S.C. 1106(b) (H. Doc. No. 99-57); to the Committee on Appropriations and ordered to be printed.

1059. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's plans to study the conversion of various functions at different installations from in-house operation to private contractor performance, pursuant to 10 U.S.C. 2304 nt. (Public Law 96-342, section 502(a) (96 Stat. 747)); to the Committee on Armed Services.

1060. A letter from the Secretary of Health and Human Services, transmitting a

draft of proposed legislation to amend the Federal Food, Drug, and Cosmetic Act and related statutes, and for other purposes; to the Committee on Energy and Commerce.

1061. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs; transmitting a report of political contributions by Douglas W. McMinn, Assistant Secretary of State for Economic and Business Affairs-elect, and members of his family, pursuant to Public Law 96-465, section 304(b)(2); to the Committee on Foreign Affairs.

1062. A letter from the Comptroller General, General Accounting Office, transmitting a list of reports issued by the General Accounting Office in March 1985, pursuant to 31 U.S.C. 719(h); to the Committee on Government Operations.

1063. A letter from the Chairman, Board of Directors, Tennessee Valley Authority, transmitting a report of the Authority's activities under the Government in the Sunshine Act covering calendar year 1984, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1064. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation to amend the Inspector General Act of 1978 to include the Offices of Inspector General of the Department of Energy and the Department of Health and Human Services, and for other purposes; to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. Report on the Federal response to the homeless crisis (Rept. No. 99-47). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on OPM's questioning of nonpartisan State voter registration activities constitutes a misuse of the Intergovernmental Personnel Act (Rept. No. 99-48). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on GSA's multiple award schedules (Rept. No. 99-49). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONIOR: Committee on Rules. House Resolution 136. Resolution providing for the consideration of House Joint Resolution 239, joint resolution to approve the obligation of funds available under Public Law 98-473 for supporting military or paramilitary operations in Nicaragua (Rept. No. 99-50). Referred to the House Calendar.

Mr. BONIOR: Committee on Rules. House Resolution 137. Resolution providing for the consideration of H.R. 2068, a bill to authorize appropriations for fiscal years 1986 and 1987 for the Department of State, the U.S. Information Agency, the Board of International Broadcasting, and for other purposes (Rept. No. 99-51). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MITCHELL:

H.R. 2106. A bill to authorize the Secretary of Housing and Urban Development to provide loans to very low income families to permit such families to purchase single-family dwellings owned by the Department of Housing and Urban Development; to the Committee on Banking, Finance and Urban Affairs.

By Mr. JONES of Tennessee:

H.R. 2107. A bill to provide agricultural credit and rural development assistance, and for other purposes; to the Committee on Agriculture.

By Mr. JONES of Tennessee (for himself, Mr. COLEMAN of Missouri, Mr. MADIGAN, and Mr. JEFFORDS):

H.R. 2108. A bill entitled: the "Soil Conservation Act of 1985"; to the Committee on Agriculture.

By Mr. BEREUTER:

H.R. 2109. A bill to direct the President to liquidate assets of Vietnam or a national thereof in order to pay certain awards made by the Foreign Claims Settlement Commission; to the Committee on Foreign Affairs.

By Mr. ROSTENKOWSKI (for himself, Mr. DUNCAN, Mr. CLAY, and Mrs. ROUKEMA):

H.R. 2110. A bill to make technical corrections related to the Retirement Equity Act of 1984; jointly, to the Committees on Education and Labor and Ways and Means.

By Mrs. BURTON of California:

H.R. 2111. A bill to amend the Higher Education Act of 1965 to improve the access to higher education of low-income parents in need of child care services and for other purposes; to the Committee on Education and Labor.

By Mr. DAUB:

H.R. 2112. A bill to retake and expand export markets for agricultural commodities, extend and revise price and income protection programs for farmers, provide for resource conservation, reform certain provisions of the Internal Revenue Code relating to agriculture, ensure consumers an abundant supply of food and fiber at reasonable prices, realign authority within the Department of Agriculture and for other purposes; jointly, to the Committees on Agriculture, Ways and Means, and Foreign Affairs.

By Mr. ERDREICH:

H.R. 2113. A bill to reform the laws relating to former Presidents; jointly, to the Committees on Government Operations, House Administration, the Judiciary, and Post Office and Civil Service.

By Ms. FIEDLER:

H.R. 2114. A bill to amend the Internal Revenue Code of 1954 to provide a refundable tax credit for taxpayers who maintain households which include elderly persons who are determined by a physician to be disabled; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

H.R. 2107

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. JONES of Tennessee. Mr. Speaker, today I am introducing the Agricultural Credit and Rural Development Act of 1985. It is my intention that this bill be used as the basis for markup next week when the House Agriculture Subcommittee on Conservation, Credit, and Rural Development, which I chair, begins work on a credit and rural development title for inclusion in the 1985 omnibus farm bill.

Nothing in this legislation I am introducing today is particularly controversial or costly. In fact, virtually every provision of this bill, in similar form, has been approved by the House on at least one occasion in the past 3 years: H.R. 5831, passed House on September 9, 1982; H.R. 1190, passed House on May 3, 1983; and H.R. 1035, passed House on February 27, 1985. Unfortunately, in all three cases no further action was taken on these bills once they passed the House.

As I view it, this bill is a compilation of basic agricultural credit and rural development initiatives which have surfaced over the past several years, and which continue to enjoy broad support, even today. I have purposely not included certain controversial provisions which have been contained in previous bills of this kind when Congress was considering emergency credit legislation. Obviously, the 1985 omnibus farm bill will not be enacted for months to come, and can be of little comfort to farmers who are strapped for operating credit this spring. By his veto last month, the President effectively ended any hope for substantive emergency credit relief for American farmers this year.

Once the committee begins its work on the credit and rural development title of the farm bill, this legislation will, of course, be open to changes and subject to any germane amendment. However, it is my hope that the Agriculture Committee and the Congress will focus on the problem of lack of profitability in agriculture instead of expending its efforts on an attempt to substitute credit for profit.

Following my remarks I insert a brief explanation and the legislation text of the Agricultural Credit and Rural Development Act of 1985:

BRIEF EXPLANATION—AGRICULTURAL CREDIT AND RURAL DEVELOPMENT ACT OF 1985

(By Mr. Jones of Tennessee)

I. WATER AND WASTE FACILITIES

(1) Direct the Secretary of Agriculture to establish a graduated scale of grant rates reflecting higher rates for communities with lower population and income levels which demonstrate a financial need, and fix the maximum grant rate (75 percent of costs) for projects in communities with a population of 1,500 or less and an income level not exceeding the higher of the poverty line prescribed by the Office of Management and Budget (OMB), or 80 percent of the Statewide nonmetropolitan median household income.

(2) Direct the Secretary to establish a projects selection system for choosing among applicants for loans and grants, the system to give equal weight to factors of (i) low community income, (ii) small population, and (iii) health hazards resulting from lack of potable water or inadequate waste disposal. These three factors would account for not less than 75 percent of the total rating points in the project selection system.

(3) Authorize grants to private nonprofit organizations for the purpose of enabling them to provide technical assistance and training to associations likely to receive loans or grants.

(4) Authorize up to $10 million per year in grants to associations to test new, cost effective methods of serving communities which do not have and cannot afford safe drinking water.

(5) Change the standard for low-income areas eligible for 5 percent interest rate loans from those having an income level below the poverty line to those having an income level below 80 percent of the Statewide non-metropolitan median household income or the poverty line, whichever is higher.

(6) Establish a 7 percent maximum loan interest rate for borrowers which do not qualify for 5 percent loans but which have an income level not exceeding 100 percent of the Statewide nonmetropolitan median household income.

(7) Provide that interest rates on loans for water and waste facilities and loans for essential community facilities shall be the lower of (i) the rate in effect at the time of loan approval, or (ii) the rate in effect at the time of loan closing.

II. BUSINESS AND INDUSTRIAL LOAN LIMITS

Impose a limit of $25 million on the size of any individual Business and Industrial loan which may be made, insured, or guaranteed by the Farmers Home Administration (FmHA).

III. ELIGIBILITY FOR EMERGENCY LOANS

Make clear that eligibility of applicants for FmHA emergency disaster loan assistance based on production losses is to be based solely on criteria specified in the Consolidated Farm and Rural Development Act and is not to be affected by whether or not the Secretary designates a county under a disaster declaration.

IV. FMHA COUNTY COMMITTEES

(1) Provide for FmHA county committees of three members, two of whom to be elected by farmers residing in the county, and one appointed by the Secretary. Committee members would serve staggered, three-year terms.

(2) In selecting the appointed member, the Secretary would ensure to the greatest extent practicable, that the Committee is fairly responsive of the farmers in the county.

(3) Authorize the Secretary to appoint an alternative for each member, and to remove members for cause.

(4) Authorize the Secretary to issue necessary regulations for election and appointment of members and alternatives.

V. REAUTHORIZATION

Add to the Consolidated Farm and Rural Development Act provisions reauthorizing program lending levels for each of the fiscal years 1986-1988 as follows:

(1) Real estate loans: insured (direct), $650 million; guaranteed, $50 million; total $700 million.

(2) Operating loans: insured (direct), $2,500 million; guaranteed $650 million; total $3,150 million.

(3) Emergency disaster loans: Such amounts as may be necessary.

For the real estate and operating loans, authority is provided to transfer 25 percent of the funds between direct and guarantee loan categories.

At least 25 percent of any amount available for insured (direct) farm real estate and operating loans would be for low-income, limited-resource applicants.

(4) Insured water and sewer facility loans: $340 million.

(5) Industrial development (Business and Industrial) loans: $250 million.

(6) Insured community facility loans: $150 million.

VI. ADMINISTRATION OF GUARANTEED FARM LOAN PROGRAMS

To achieve greater participation in FmHA's farm loan guaranteed programs, direct the Secretary to ensure that loan guarantee programs are responsive to the needs of borrowers and lenders. Direct the Secretary to establish a procedure for making advances to lenders on guarantees on nonperforming loans prioir to liquidation.

VII. ADVANCE RECOURSE COMMODITY LOANS

For the 1986 through 1990 crop years, provide discretionary authority for the Secretary to make advance recourse loans through the CCC available to producers of program crops if the Secretary finds it necessary to ensure adequate operating credit is available to farmers.

H.R. 2107

A bill to provide agricultural credit and rural development assistance, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Credit and Rural Development Act of 1985".

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

WATER AND WASTE DISPOSAL FACILITIES

SEC. 2. Section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)) is amended by—

(1) adding at the end of paragraph (2) the following: "The Secretary shall fix the grant rate for each project in conformity with regulations promulgated by the Secretary that shall provide for a graduated scale of grant rates establishing higher rates for projects in communities that have lower community population and income levels: *Provided,* That the grant rate shall be the maximum rate permitted under this paragraph for any project in a community that has a population of fifteen hundred or less inhabitants and a median household income level which does not exceed the higher of the poverty line prescribed by the Office of Management and Budget, as adjusted under section 624 of the Economic Opportunity Act of 1964 (42 U.S.C. 2971(d)), or 80 per centum of the statewide nonmetropolitan median household income."; and

(2) adding at the end thereof new paragraphs (16), (17), (18), and (19) as follows:

"(16) In providing financial assistance for water and waste disposal facilities under this section, the Secretary shall use a project selection system to determine which of the applicants for assistance meeting the basic requirements of this section shall be selected to receive assistance. Such project selection system shall provide for the objective and uniform comparison of requests for assistance (in the form of preapplications) on the basis of relative need as reflected by factors to be determined by the Secretary: *Provided,* That such factors shall include (A) low community median income; (B) low population; and (C) severity of health hazards resulting from inadequate provision for the reliable supply of potable water or from inadequate means of disposing of waste: *Provided further,* That these three factors shall be weighted equally and shall account for not less than 75 per centum of the total rating points in the project selection system.

"(17)(A) The Secretary may make grants to private nonprofit organizations for the purpose of enabling them to provide to associations described in paragraph (1) of this subsection technical assistance and training to—

"(i) identify, and evaluate alternative solutions to, problems relating to the obtaining, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas;

"(ii) prepare applications to receive financial assistance for any purpose specified in paragraph (2) of this subsection from any public or private source; and

"(iii) improve the operation and maintenance practices at any existing works for the storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas.

"(B) In selecting recipients of grants to be made under subparagraph (A), the Secretary shall give priority to private nonprofit organizations that have experience in providing the technical assistance and training described in subparagraph (A) to associations serving rural areas in which residents have low income and inwhich water supply systems or waste facilities are unhealthful.

"(C) Not less than 2 per centum of any funds provided in appropriations acts to carry out paragraph (2) of this subsection for any fiscal year shall be reserved for grants under subparagraph (A) unless the applications for grants received by the Secretary from eligible associations for the fiscal year total less than 2 per centum of any such funds.

"(18) In the case of water and waste disposal facility projects serving more than one separate rural community, the Secretary shall use the median population level and the community income level of all the separate communities to be served in applying the standards specified in paragraphs (2) and (16) of this subsection and section 307(a)(3)(A) of this title.

"(19) The Secretary may make grants, aggregating not to exceed $10,000,000 in any fiscal year, to associations described in paragraph (1) of this subsection to test cost-effective methods of meeting the basic needs of rural residents who do not have and cannot afford safe drinking water services. Such grants may include, but are not limited to, financing for—

"(A) costs associated with the development or improvement of individual or small, multiuser drinking water facilities; or

"(B) costs associated with enabling such rural residents to connect to community water supply systems, such as the payment of connection fees; or

"(C) costs associated with improving the operation, maintenance, or management of small community water systems that are currently unable to provide safe drinking water at affordable rates to such rural residents; or

"(D) costs associated with implementing other alternatives to meeting the basic drinking water needs of such rural residents.".

INTEREST RATES—WATER AND WASTE DISPOSAL FACILITY LOANS

SEC. 3. Section 307(a)(3)(A) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)(A)) is amended by—

(1) striking out "where the median family income of the persons to be served by such facility is below the poverty line" and inserting in lieu thereof "where the median household income of the persons to be served by such facility is below the higher of 80 per centum of the statewide nonmetropolitan median household income or the poverty line";

(2) inserting before the period at the end thereof the following: "; and not in excess of 7 per centum per annum on loans for such facilities that do not qualify for the 5 per centum per annum interest rate but are located in areas where the median household income of the persons to be served by the facility does not exceed 100 per centum of the statewide nonmetropolitan median household income"; and

(3) adding at the end thereof the following: "The interest rate on loans for water and waste disposal facilities and loans for essential community facilities shall be the lower of (i) the rate in effect at the time of the loan approval, or (ii) the rate in effect at the time of the loan closing.".

EFFECTIVE DATE OF SECTIONS 2 AND 3

SEC. 4. The amendments made by sections 2 and 3 of this Act shall become effective on October 1, 1985, and shall apply to any association described in section 306(a)(1) of the Consolidated Farm and Rural Development Act without regard to whether the application for the loan or grant involved was made by such association before such effective date.

BUSINESS AND INDUSTRIAL LOAN LIMITS

SEC. 5. Section 310B(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(a)) is amended by adding at the end thereof the following new sentence: "No loan may be made, insured, or guaranteed under this subsection that exceeds $25,000,000 in principal amount.".

ELIGIBILITY FOR EMERGENCY LOANS

SEC. 6. (a) Section 329 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1970) is amended by adding at the end thereof the following new sentence: "Notwithstanding the second sentence of section 321(a) of this subtitle, eligibility of an applicant for assistance under this subtitle based upon production losses shall be determined solely on the basis of the factors designated in this section without regard to the Secretary's failure to designate a county or counties for emergency loan purposes.".

(b) The amendment made by this section shall be applicable to disasters occurring after September 30, 1985.

COUNTY COMMITTEES

SEC. 7. Section 332(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1982(a)) is amended to read as follows:

"(a) In each county or area in which activities are carried out under this title, there shall be a county committee composed of three members. Two members shall be elected, from among their number, by farmers deriving the principal part of their income from farming who reside within the county or area, and one member, who shall reside within the county or area, shall be appointed by the Secretary for a term of three years. At the first election of county committee members under this subsection, one member shall be elected for a term of one year and one member shall be elected for a term of two years. Thereafter, elected members of the county committee shall be elected for a term of three years. The Secretary, in selecting the appointed member of the county committee, shall ensure that, to the greatest extent practicable, the committee is fairly representative of the farmers in the county or area. The Secretary may appoint an alternate for each member of the county committee. Appointed and alternate members of the county committee shall be removable by the Secretary for cause. The Secretary shall issue such regulations as are necessary relating to the election and appointment of members and alternate members of the county committees.".

REAUTHORIZATION

SEC. 8. Section 346 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1994) is amended by adding at the end thereof the following new subsection:

"(f) Notwithstanding the provisions of subsection (a) of this section—

"(1) loans for each of the fiscal years 1986, 1987, and 1988 are authorized to be insured, or made to be sold and insured, or guaranteed under the Agricultural Credit Insurance Fund as follows:

"(A) real estate loans, $700,000,000, of which $650,000,000 shall be for insured loans and $50,000,000 for guaranteed loans, with authority to transfer 25 per centum of such amounts between categories;

"(B) operating loans, $3,150,000,000, of which $2,500,000,000 shall be for insured loans and $650,000,000 for guaranteed loans, with authority to transfer 25 per centum of such amounts between categories; and

"(C) emergency loans in amounts necessary to meet the needs from natural disasters.

Not less than 25 per centum of the funds that may be used for insured loans for farm ownership purposes and not less than 25 per

centum of the funds that may be used for insured loans for farm operating purposes shall be made available for loans to low-income, limited-resource applicants to the extent needed to meet applications filed by such farmers who are eligible for such loans. The Secretary shall inform in writing all applicants for loans for farm ownership and farm operating purposes of the availability of the loan program for low-income, limited-resource borrowers and the general nature of the program.

"(2) loans for each of the fiscal years 1986, 1987, and 1988 are authorized to be insured, or made to be sold and insured, or guaranteed under the Rural Development Insurance Fund as follows:

"(A) insured water and sewer facility loans, $340,000,000;

"(B) industrial development loans, $250,000,000; and

(C) insured community facility loans, $150,000,000.".

ADMINISTRATION OF GUARANTEED FARM LOAN PROGRAMS

SEC. 9. The Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 349. Notwithstanding any other provision of this title, the Secretary shall ensure that farm loan guarantee programs carried out under this title are designed so as to be responsive to borrower and lender needs and to include provision under reasonable terms and conditions for advances, prior to completion of the liquidation process, of guarantee proceeds on loans in default.".

ADVANCE RECOURSE COMMODITY LOANS

SEC. 10. Effective for the 1986 through 1990 crops, the Agricultural Act of 1949 is amended by adding at the end thereof a new section 424 as follows:

"SEC. 424. Notwithstanding any other provision of this Act, the Secretary may make advance recourse loans available to producers of the commodities of the 1986 through 1990 crops for which nonrecourse loans are made available under this Act if the Secretary finds that such action is necessary to ensure that adequate operating credit is available to producers. Such loans may be made available under such reasonable terms and conditions as the Secretary may prescribe.".

EFFECTIVE DATE

SEC. 11. Except as otherwise provided herein, the provisions of this Act shall become effective upon enactment.●

HIS EXCELLENCY TURGUT OZAL, PRIME MINISTER OF THE REPUBLIC OF TURKEY

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RAHALL. Mr. Speaker, I would like to take this opportunity to submit for the RECORD remarks made by His Excellency Turgut Ozal, Prime Minister of the Republic of Turkey, before a group of Members of the House of Representatives on April 3, 1985. I believe the Prime Minister's speech, which addresses Turkey's external relations, geographic conditions, domestic political scene, and economy will be of interest to many.

TURKEY FACING UP TO CHALLENGES

It is indeed a great pleasure and honor for me to address such a distinguished gathering.

Before I proceed, I would like to express my sincere appreciation to Dr. Jordan, President of the Center for Strategic and International Studies. I believe I am the first Prime Minister of Turkey to address so large a group of members of Congress under its own roof.

The topic which I address today, "Turkey Facing up to Challenges" is a four dimensional subject. Those dimensions are Turkey's external relations, its geographical conditions, its domestic political scene and its economy.

Four sets of constants traditionally shape the foreign policy of Turkey.

The first is the geopolitical significance of Turkey's position as a gateway between the three continents of Europe, Asia and Africa. Due in part to its geographic location, Turkey plays a key role in both global strategic balance and regional equilibrium.

The second factor is the strong desire of the Turkish people for rapid socio-economic development and modernization. Turkey faces complex social and economic challenges. To cope with these challenges, it stands in great need of capital and technology as well as markets. Turkey's strategic location, with its accompanying national security concerns, make industrialization an even more urgent task, for these concerns continually require allocation of substantial national resources.

The third factor concerns the political aspirations and moral values of the Turkish people. Since the establishment of the Republic and the initiation of Atatürk's reforms Turkey has become a society oriented on democracy based on human rights and fundamental freedoms. Democracy has become an irrevocable process in Turkey leading to progress and establishing an ideological connection between Turkey and the Western world.

The fourth factor is Turkey's multi-regional cultural heritage and affinities resulting from its geographical location.

These factors explain Turkey's strong commitment to the western ideals, its major contribution to the collective defense system and its friendly relations and close cooperation with the Free World. They also shape Turkish policies toward the Middle Eastern and Islamic countries. With the prestige and confidence that Turkey has gained in its relations with the countries of the region, it can provide a direct and increasingly effective economic and political link between the West and the Middle East.

On the other hand, Turkey's maintenance of good-neighborly relations and expanded commercial exchanges based on mutual respect and non-interference in internal affairs with the Soviet Union can also be explained in the light of these four factors.

The same factors determine Turkey's efforts aimed at the development of harmonious and mutually beneficial ties with the Balkan countries and with Greece. Aware of the utmost importance of the friendship and cooperation with Greece, we have several times appealed to the Greek Government for the establishment of a dialogue to resolve our differences. Turkey unilaterally abrogated the visa requirement for Greek citizens, confident that people-to-people contact between our two nations will promote a friendlier atmosphere. Unfortunately the Greek Government has not only rebuffed our advances but it has continued to pursue a course of deliberate confrontation aiming at reducing military assistance to Turkey or conditioning it on irrelevant criterias. We have repeatedly declared that we seek only peace and cooperation. We do not covet an inch of Greek territory. However, the Greek Government has continued with the propaganda of a so-called, imaginary Turkish threat. Beside this, Greece causes serious concerns for all of us by taking steps such as venturing to establish "nuclear free zone" in the Balkans, and redeploying Greek forces allotted to NATO along the borders of Turkey under what is called the "New Defense Doctrine of Greece", all of which are in contradiction to the fundamental spirit of Western Alliance.

My Government keenly desires the normalization of our relations. I, have, very recently reiterrated this desire and called upon the Greek Government to join Turkey in initiating the necessary process of dialogue, reconciliation, cooperation and friendship that good sense and mutual interest demand. Animated by such a spirit, I propose today to Greece that we sign an Agreement of "Friendship, Good-Neighborhood, Conciliation and Cooperation". Such an agreement can establish procedures and mechanism that will facilitate the solution not only of present disagreements but also those which may emerge in the future. In this agreement we can also mutually guarantee the inviolability of the present legal boundaries. We believe Greek and Turkish interests are not incompatible. Turkey and Greece were able, more than fifty years ago, under more difficult times, to make friendship. We are neighbours. Geography has imposed this on us. We should benefit from it. Our nations should know each other better. We should remove all obstacles so that journalists, businesswomen, artists and man in the street can freely contact one another.

I am ready to meet any time, anywhere with the Greek leadership to discuss all these issues.

I am ready to meet my Greek counterpart to give this process of peace and reconciliation the momentum it needs.

I am ready to meet at any proper time.

I am ready to meet at any proper place.

I am ready to see this necessary reconciliation through its earliest and widest application.

I offer this observation to the Greek leadership for what is is worth.

I am prepared to trust in the good sense of the Greek people just as I trust in the good sense of the Turkish people.

On the issue of Cyprus, I must say that we feel the Turkish Cypriots have recently made an outstanding effort to solve the island's problem. In fact, as the Secretary General Perez de Cuellar's press release made it clear the Turkish Cypriot side had accepted the draft in-full of the agreement proposed by him, while the other side has not. Despite the great disappointment felt by the Turkish side, we are pleased that it has kept the door open for negotiations leading to establishment of a federal government.

My Government continues to support a workable and just solution of this problem, along the lines of establishment of an independent, territorially integral, bi-zonal, federal republic in which the two communities can cooperate with equal political status.

The current military and security relationships between Turkey and the United States are defined in a comprehensive De-

fense and Economic Cooperation Agreement concluded in 1980. Under it, Turkey authorizes the United States to use some of its defense facilities for the purposes of collective defense. In return the United States undertakes to provide defense equipment, so that Turkey can effectively carry out its crutical defense responsibilities. In addition to its indispensable geopolitical value as a strategic bastion of the West, Turkey has critically important military contribution to Western defense. Valuable as they have been, Turkey's contribution to NATO have taken on even greater significance. As the result of extensive integration of U.S. forces into the defensive capabilities of Europe, reinforced by the presence of tactical nuclear weapons on European territory, the Central front of NATO is now regarded as a militarily static area. The Strategic center of gravity can be considered to have shifted to the Middle East and Southwest Asia regions. Therefore, the strengthening of Turkey's military abilities should and must be a major NATO priority because Turkey presents an area where force improvement offers a maximum contribution to the NATO function of deterrence to aggression and to the peace of security of Europe and America.

I feel I must point out in this discussion a complication regarding full utilization of Turkey's potential. I refer to a resolution introduced in the 99th Congress aiming to maintain the so-called seven-to-ten ratio. This resolution contains totally baseless and erroneous accusations against Turkey. The ratio itself is totally arbitrary. It completely disregards the great disproportion between the NATO assigned missions of the two countries involved and makes Turkey's needs for military assistance dependent on those of Greece. I must say as well that this proposed resolution also manifestly ignores the evident disparity between the political and military commitments of the two countries to NATO and its objectives. The Turkish army has a well-merited reputation as a fighting force. However, the equipment of our armed forces require upgrading to meet current-day needs and missions. Although Turkey allocate 5% of its gross national product to defense, it still cannot make up deficiencies resulting from inadequate military assistance allocations of the past.

There is a second international issue in which Turkey and the United States share a major concern and in which a complicating factor threatens to jeopardize our mutual interests. I refer to international terrorism. The governments of Turkey and the United States as two countries which have suffered most heavily from terrorism must work together to put an end to it. This bond of common cause now stands in jeopardy becaue of the introduction in the Congress of House Joint Resolution 37, which would proclaim that the Armenian population in Turkey was the victim of genocide in 1915. Let me clearly state that we respect the Armenian communities around the world and appreciate their culture. Our problem is solely with the terrorists who murdered 41 Turkish diplomats and whose aim is to defame Turkey and to carve out certain parts of its territory and annex them to the Armenian Republic in the Soviet Union. Turkey joined NATO and made special security arrangements with the United States to guarantee its territorial integrity. One should realize that the support of the Armenian claims no matter under which disguise they are presented, contradicts the spirit of our bilateral relations with the United States, they very principle of the foundation of NATO and even the commitment of the United States within NATO.

During the years preceding September 1980, Turkey's ve_y existence was threatened. Along with the terrorism and anarchy, fragmentation of the parliament, succession of weak coalition governments, inflation, shortage of foreign currency and lack of many basic articles had led to paralysis of state governance. The country was on the brink of a civil war. These circumstances brought about a reluctant and temporary assumption of the reins of government by the military. The 3 year rule of the transitional government where I served as Deputy Prime Minister accomplished much. Terrorism was eradicated, a new Constitution was prepared and approved, a massive economic reform was undertaken.

With the general elections held on November 6, 1983 a new era was inaugurated in Turkey. My Party won a resounding victory. Local elections in March 1984 gained the stature of a nationwide referendum on the government. The result was a demonstration of strong popular support for the government.

It is our proud belief that we now have a stable democratic structure with all its institutions reconciling government efficiency with legitimacy and exercising authority while safeguarding individual freedoms.

I believe that political democracy is best able to have a healthy existence when coupled with a free market economy. Historical evidence supports that truth. Although not all free market systems are democratic, every functioning democracy has been coupled with an economy based primarily on free enterprise and private initiative.

During the fifteen months since we took office, the following measures have been taken.

A determined effort has been made to reduce bureaucratic formalities and unnecessary red tape,

Foreign exchange restrictions have been reduced to a minimum,

A programme has been launched for the gradual privatization of state economic enterprises,

Within the context of our privatization program, the private sector has been allowed to enter fields which were formerly reserved to the public sector,

Agribusiness and food processing constitute one of the major focus of our investment encouragement programs,

New legislation has been enacted and new procedures have been put into effect to encourage and facilitate foreign investments in Turkey,

All protectionist walls were demolished and all protective quotas and restrictions on imports were removed,

The tax system has been radically reformed through the introduction of the value added tax,

A flexible exchange rate policy has been adopted and steps were taken towards full convertibility of Turkish currency.

As a result of our policies, growth last year was 5.7 percent in real terms and exports increased by 25 percent in dollar terms.

We are trying to achieve two things at a time, namely strengthening democracy and furthering free enterprise and free market economy. All this program which has been successful now so far has been carried out at the expense of great sacrifices, by the Turkish people alone. This heavy burden still lies and will do so for some time, on the shoulders of our people. Turkey's success can be a model for the others to follow. Therefore, the West has as much interest as we Turks do. With the support you can render, this system can be established more easily and strongly. The strong establishment and success of such a system in Turkey will rebuff the internal forces that oppose this system and will also be an answer at the international level to the forces that advocate the economic development and welfare of a country can not be achieved through free market economy and democracy.

We believe that Turkey's key location, large and growing domestic market, vast natural resources, availability of qualified manpower at very competitive wage levels, and experienced local partners make Turkey an ideal location for the establishment of export-oriented co-production undertakings and joint ventures. We are pleased to find that American business people are beginning to take note of the access offered by Turkey to regional markets.

I will conclude my words by saying that I have been and I am always optimistic about our relationships because Turkey and America share a common political philosophy, a common set of values, a common strategic orientation, a common determination to preserve freedom, a common commitment to free-market economic enterprise and a common desire for the betterment of our people's and of world society.

With so very much in common, I am confident that working together we can overcome all the challenges for our mutual good and for the good of the free world.●

THE ASSAULT ON BENEFITS: DEFICIT THINKING

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SOLARZ. Mr. Speaker, as the administration and Congress seek to reduce the soaring budget deficit and to reform or simplify the Tax Code, the current tax treatment of employee benefits—pension and savings plans, life insurance, health insurance—is being increasingly jeopardized. It would seem that retirement security programs in particular are being singled out as easy targets for revenues to resolve the deficit.

This is not an easy issue to resolve and is one which will be given particularly close scrutiny by this body, especially by the Education and Labor Committee on which I serve as well as the Ways and Means Committee.

Recently, this very critical subject was discussed in a speech by Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans [APPWP]. As Mr. Brahs has noted in his remarks, "For decades, the Congress encouraged American business and labor to create and maintain employee benefit programs for the security of the Nation's workers and their families." It would appear that these important benefits may not

be reduced or, in some instances eliminated entirely.

I offer, herewith, for inclusion in the RECORD the text of Mr. Brahs' speech. While I do not necessarily subscribe to the views expressed in this statement, this is a vital public policy issue which we will be debating during the 99th Congress and I believe our colleagues will find Mr. Brahs' comments to be timely and thought-provoking.

THE ASSAULT ON BENEFITS: DEFICIT THINKING

(By Stuart J. Brahs, Executive Director, Association of Private Pension and Welfare Plans, Inc., Washington, DC)

Everywhere you go in Washington today you hear discussion of the prospects for tax reform or tax simplification. Tax reform is a revolutionary concept and is increasingly being considered a likely outcome of the current Congressional session. It is perceived that the public is clamoring for a more equitable and simpler tax system. And the President and Congressional leaders are grasping for the Holy Grail of tax reform perhaps as a means of securing their niche in history.

Reform, flat tax, tax simplification—whatever it's called, if enacted, will be a fundamental shift in economic policy for the United States and would impact every American and every institution—far beyond what we can know or imagine. Simplification and equitable reform are laudable goals and the time is ripe to pursue them. However, we cannot, in the name of reform, spawn revolution in the lives of millions of American workers, their families and their secure futures; nor can we weaken beyond repair our nation's employee benefit system that has been carefully built over seven decades as good social policy.

In their attempts to come to grips with the soaring federal deficit, however, the Administration and the Congress are frantically searching for sources of revenue wherever they believe it can be found. Unfortunately, it has become axiomatic that employee benefits, in general, and retirement security programs, in particular, are easy targets for revenue. In the guise of tax reform, an assault on benefits has been launched.

A national trade publication very aptly noted earlier this year that government's attitude toward private pensions and employee benefits has changed dramatically—

"Increasingly, they are being viewed not as a social good to be promoted through tax policy but as simply another big tax loophole—the biggest of all—which, like oil-drilling schemes and cattle partnerships, favors the wealthy and robs the Treasury of billions in revenues each year."

These vital life security benefits are being viewed as "fringes"—something on the periphery of workers' income. They are not!

How very short-sighted can this perception be? Taxation of employee benefits in the name of simplification and reform is not fair. It's not flat. It's not fat.

IT'S NOT FAIR

Testifying before the House Committee on Education and Labor, AFL-CIO President Lane Kirkland observed: "The attack on employee benefit programs is taking place at a time of huge and deepening federal deficits. But the tax treatment of benefits is not the source of this crisis. The attempt to raise revenues by taxing workers' benefits and reducing their standard of living is patently unfair."

For decades, the Congress encouraged American business and labor to create and maintain employee benefit programs for the security of the nation's workers and their families. Out of the tragic experience of the Depression our political leaders recognized the need to make saving for one's retirement a more painless and automatic discipline. And thus, through incentives built into the tax code over the decades, we have achieved these results:

One hundred sixty two million American workers and their dependents are protected by a half-million employee benefit plans.

Seventy five percent of these workers earned less than $25,000 in 1982.

Ninety six percent of all workers in medium and large firms were covered by group life insurance in 1983, according to a government survey.

Approximately 8 in 10 of all Americans under age 65 are covered by employer-sponsored group health insurance policies.

Some 74 percent of full-time, year-round workers participate in pension plans and 72 percent of those retiring in 2007—just a bit more than two decades from now—will receive pension benefits. (Can the same be said about Social Security?)

Seventy-four percent of the benefit for contributions to a qualified pension plan goes to individuals with incomes less than $50,000.

Seventy-eight percent of the benefit for employer contributions to group-term life, accident and disability insurance goes to individuals with incomes less than $50,000.

Millions of Americans—represented by these data—have come to depend upon, and have too often taken for granted, benefits promised to them. It isn't fair now to pull the rug out from under these workers and their families. Taxing and limiting these benefits will be the descent down the slippery slope that will undermine and destroy this system of economic security for these millions.

The Administration and tax reform gurus on and off Caplital Hill seek to justify the increased taxation of employee benefits through so-called horizontal equity. While it may, in fact, be unfair that all American workers do not benefit equally from an adequate medical program, pension protection, life and health insurance, and similar employee benefits, such inequities should be resolved through public and private policies that encourage a "leveling-up" of benefits. It makes no sense to resolve this perceived inequity through policies that seek to reduce everyone to the lowest common denominator. Union leader Kirkland quite appropriately stated that "Such a narrow view of equity ignores the far greater inequity that would result from a lowering of benefits and fewer participants. That viewpoint also implies that tax justice means merely rearranging the tax burdens of working people."

Over the years the Congress has also mandated requirements to make coverage more widely distributed among all income groups. Taxation of benefits would undermine such hard won equity. It would be unfair to tinker with the benefits many workers willingly opted for instead of higher wages and other short-term economic improvements.

It would also be unfair to eliminate one of the most popular and accessible retirement savings programs provided for in the tax code.

One of the particularly onerous proposals currently on the table is the elimination of cash-or-deferred arrangements under Section 401(k) of the Internal Revenue Code. Available statistics from the APPWP, the Hewitt Co. and the Census Bureau indicate, however, that contrary to the view of the proponents of this ill-considered scheme, low-income workers are more likely to participate in a 401(k) plan than in an IRA. Also, there is a discrimination test to assure that 401(k) plans do not favor higher paid employees. These savings plans are particularly favored by a younger, more mobile workforce. The addition of a $2,500 IRA for a non-employed spouse is of little benefit to lower-income families with little disposable income. Expanding IRAs would, in fact, favor relatively higher income families with one wage earner who have a lot of discretionary income. The Treasury proposal, therefore, is wholly inconsistent with social objectives and equity, as well as the long recognized need to encourage savings by Americans.

Companies responding to a recent APPWP survey reported that nearly 60 percent of employees in the lower two-thirds income group were participating in the company's 401(k) plan. Further, almost 70 percent of all employees represented by the companies with 401(k) plans who responded to the APPWP survey—over 3.3 million workers—were eligible to participate in the plan.

The 401(k) plans make a significant contribution to the nation's economic recovery by providing investment capital, thereby generating new employment opportunities from current income tax revenues. In contrast to IRAs, 401(k) plans typically provide a company "match" on employee contributions, which, in turn, significantly enhances the individual's long-term financial savings. 401(k) plans are so flexible, useful, and valuable that the federal Office of Personnel Management has recommended establishing such a savings program as part of its reformed pension program for millions of civil servants!

IT'S NOT FLAT

Besides the ill-considered notion of mandating horizontal equity by diminishing promised benefits and eliminating retirement savings options, is the notion that tax reform will be "revenue neutral;" i.e. peoples' taxes will generally go down and the revenue flow into the Treasury will not go up.

It just isn't so for the average American. The cost of pensions, life and health insurance and other critical economic life support benefits would rise appreciably because of increased taxes. Surveys indicate that employers and employees alike believe that if they are taxed on the provision and receipt of these programs, the benefits may well disappear. No matter how innocent or inconsequential it may appear when presented by proponents, taxation would dismember America's model benefit structure.

While the tax code has created this comprehensive system, its breadth of coverage has sustained it. Tinker with that and you will destroy the system. Tax reform proposals envision the individual—not group—approach to benefits. The economic advantages gained by including in the system workers from all age groups, from all industries and from all geographic areas would disappear. If the direct cost of these benefits to the employee is increased, many will have to limit their participation in what they can currently afford. In many instances, such as with health insurance, cov-

erage will be substantially reduced—younger and healthier workers would be motivated to consider avoiding taxation by having their employers drop coverage of certain services. Those left in the system would be those who could afford the higher costs, and whose who are older and more in need of frequent health care services. This will cause plan premiums to go up, thus raising taxes further. Many plans would be discontinued altogether causing many to seek individual programs in the market place. Disarray and chaos would result. Almost everyone understands that group risk-sharing brings down the cost of these programs. Everyone, that is, but those two want to reform taxes by taxing benefits. Such reform is really a hidden tax that would hit middle and lower income workers the hardest.

IT'S NOT FAT

While the level and availability of employee benefits would be reduced, the need for them would not vanish. A recent survey showed that 73% of corporate CEOs believe that if employers cut back on benefits, the government will be pressured—particularly by the aging baby boom—to increase Social Security and add other welfare benefits. At best it could be expected to do no better than private enterprise has done but it would be safe to suggest that it would probably do much worse! All one has to do is examine the Government's current record of efficiency in delivering health care, food, and other life security benefits, and compare it to this exemplary private-sector structure. Sen. Packwood, Chairman of the Finance Committee and long-time champion of employee benefits, has said that if the government were to provide the health care benefits currently provided by the private sector, it would cost $100 billion a year, compared to the $30 billion cost by the private sector.

But clearly, the proponents of taxing benefits believe they are profitable targets for the Treasury. Independent studies have shown conclusively that their revenue estimates are bloated and misleading. It would be a grave mistake to act on the erroneous assumption that all employee benefits are forever lost to the tax base. About 70% of the Treasury's statistics, used to justify their raid on employee benefits, include legally-required or fully-taxed benefits. Other studies show that the Government will eventually recoup 60-86% of all tax expenditures for employee benefits that are currently tax-favored.

Those who think employee benefits are rich fields ready to be plucked are sadly wrong-headed. Attempts to tax away these benefits will only assure their diminishing existence; it would be folly to tax a disappearing revenue source. And, as a recent Library of Congress study revealed, the "relative level of U.S. fringe benefits still remains a smaller part of total compensation than it is in most other industrialized nations." Our system is good, not perfect. If the current programs are not undermined and the tax laws now on the books are not gutted, these benefit plans will continue to grow, improve, and meet future demands. They are not fat fringes that created—or can solve—our deficit crisis.

BENEFITS COALITION NEEDED

Curiously, there is really no one "against" employee benefits. However there is a vast sea of myths, half-truths and serious misunderstandings about the nature and extent of employee benefit programs and their critical role in protecting millions of workers, their dependents and retirees. We must take positive steps to correct this information gap.

We must forge a broad-based, nationwide coalition to protect and preserve our system of employer-provided, health and income security benefits. Recent legislative assaults on benefits in the Congress have taught us too well that employers and employees, as well as other advocates of employee benefits, need to be energized and catalyzed to act on this critical public policy issue.

The APPWP has been on the leading edge of efforts to develop this broadbased national coalition of employers, workers, pension and benefit providers and consultants to work to preserve and protect the private pension system. This national trade association of over 475 members—representing the entire spectrum of the pension and benefits community—has taken initiatives to educate federal lawmakers and other decisionmakers in the Nation's Capital about the irreparable damage which will be done to employee benefit plans if ill-considered tax and pension policy proposals become law.

Through the successful Grassroots Program, our network of state and regional chairmen have conducted effective one-on-one educational briefings with Senators and Representatives in their home states and districts. We bring together major employers and Congressional representatives to discuss the salient issues involved in tampering with America's comprehensive private employee security benefits system.

The APPWP has let lawmakers hear about these critical issues—about the security private pension and employee benefits programs provide for American workers and the disastrous consequences if they are taxed. We have urged that they look beyond simplistic calculations about how much tax revenue is theoretically lost in a given year, and address the broad public policy aspects of the issue.

In the coming debate on tax reform, the business community will be keenly divided on many key issues. But there is one issue where they are uniquely united: Not taxing employee benefits. And as the statements of Lane Kirkland make clear, labor and management also see eye to eye on this issue.

The APPWP urges all those concerned about proposals which would eventually destroy this system to communicate immediately with the President and to write, visit, call or wire your Senators and Representatives in Congress—let them know where you stand. Tell them in the strongest language not to tax employee benefits and to oppose legislation which would destroy a pension and benefits system which it has taken employers and workers decades to build.

CONCLUSION

America's employee benefits system provides most workers with a remarkably varied, flexible, and comprehensive program that delivers an important measure of financial security both now and for retirement.

Yet the powerful Chairman of the tax-writing Ways and Means Committee, Dan Rostenkowski—whose influence over the shape and scope of any tax reform legislation is enormous—has said that "everything is on the table"—nothing is sacred in the tax reform debate, not even employee benefits.

Tax reform and simplification should fix what's broke: paralytic complexity in the tax code, unintended and wasteful investments in tax shelters, egregious inequities. Reform must not become a fundamental and reckless abandonment of a benefits system that has become a model for the world.

If every American better understood what's on the table—what tax reform may mean for his or her family's economic future—you'd find employee benefits as sacred as mortgage interest deductions.

Although we support efforts to bring federal budget deficits under control, raising the needed revenue by taxing employee benefits is simply the wrong approach. Whatever the arguments for tax reform or simplification, they fail to make either economic of social sense when they lead to taxing employee benefit plans and thereby discourage their availability or erode their value.

For decades we have consciously bolstered the three-legged stool of private pension, private savings, and social security to enable today's workers to enjoy an unprecedented degree of financial security. Those who wish to tamper with a good—not perfect system—threaten to kick a leg out from under that carefully crafted stool.●

VIEWS OF FORMER DEFENSE SECRETARY McNAMARA ON CENTRAL AMERICA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, in view of our upcoming vote on President Reagan's request to renew funding for the Contras, I wanted to share with my colleagues a letter that former Defense Secretary Robert S. McNamara wrote last year to Dr. Henry A. Kissinger, Chairman of the National Bipartisan Commission on Central America, on which I had the honor to serve as a senior counselor. I would call my colleagues' attention to Secretary McNamara's statement that we should not use force in Central America except through the OAS, a view he reiterated to me as recently as last week. This is a prescription that we have systematically violated by funding the Contras. I thought the Members would be interested in the views of this distinguished former official.

WASHINGTON, DC, *September 12, 1983.*

Dr. HENRY A. KISSINGER,

National Bipartisan Commission on Central America, Washington, D.C.

DEAR HENRY. Upon returning to my office two days ago I found your letter of August 18th awaiting me. In it you asked for my "insights" on any aspects of your Commission's Mandate. Because my knowledge of the problem you are studying is limited, this reply will be brief:

In sum, I believe:

1. You are quite correct both in restricting your study to long-term issues and in broadening its focus beyond Central America.

2. We greatly over-estimate the effect of political instability in Central America on our security, and we seem unaware of the danger to us of such instability in Mexico.

3. For the next decade or two, Mexico's labor force will grow at the highest rate of any large country in the world. Unless the

government creates jobs to absorb that labor force, a significant part of it will flow across the 2,000 mile border into the United States. Neither the United States nor Mexico has begun to lay out the political and economic programs which are necessary to effectively address this problem. Failure to do so carries with it enormous political, economic, and security risks for our country.

4. The problem in Central America is essentially economic, social, and political in origin. It has been exacerbated by, but not caused by, Soviet and Cuban intervention. The solution to the problem requires action by the Central American governments in each of these fields.

We can assist the governments in implementing such programs, but we can not impose them upon their societies. Moreover, the "absorptive" capacity of their leaders and their institutions to receive foreign technical and financial assistance is limited. It should not be over-loaded. A "Marshall Plan" for Central America is likely to do so.

5. Because of such "capacity limitations", the majority of the countries in Central America are likely to be unstable for years to come. What we can do is contain the effects of such instability by:

(a) Maintaining a unified approach to the problem with the major countries of the Region—particularly Mexico, Venezuela, Columbia and Panama (we have not done so).

(b) Making clear to the Soviets we will not accept their "offensive" forces in the hemisphere, now or later.

(c) Joining with the Latin American countries in their efforts to normalize relations with Cuba, and to obtain agreement that Cuba will not use one country in the hemisphere as a base from which to subvert the established government of another country.

6. We should not use military force in Central America unless we are asked to do so by the OAS, and then only if our forces are accompanied by troops of major Latin American nations.

I will be happy to try to answer any questions which your staff wishes to put to me.

With best wishes.

Sincerely,

ROBERT S. MCNAMARA.●

WORK PLACE TRAINING

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. CLINGER. Mr. Speaker, it was a pleasure for me to learn last week that our House colleague, Representative NANCY L. JOHNSON and I, are the recipients of the American Society for Training and Development's [ASTD] Award for Public Service to Human Resource Development in National Affairs. It is certainly an honor for me to receive this prestigious award. As you know, the ASTD represents nearly 50,000 of America's employer-based trainers and resource development specialists.

Mr. Speaker, I believe you will agree that the issue of worker retraining has not received the national attention it merits. As the ASTD points out: "Workplace training and development is generally under-reported in the national human resources debate, and remains the dark continent in the national training and development system."

During the last several weeks we have heard several of our colleagues refer to the ongoing problems of international trade and how foreign workers have in effect, taken away jobs from American workers. Though we may disagree about the methods in which to deal with those problems, one conclusion is inescapable. Many other industrial nations have met the challenge in training and retraining their workers to meet technological change. In addition, many of our unemployed workers cannot find jobs simply because they have yesterday's skills and are unable to compete for tomorrow's jobs.

In order to deal with these concerns, Congresswoman JOHNSON and I recently were joined by a bipartisan group of 32 of our House colleagues in reintroducing H.R. 1219, the National Training Incentives Act of 1985. This bill provides employers with a 25 percent tax credit for training expenses over a 5-year average—thereby rewarding the type of retaining, on-the-job training, which labor and business agree is the most effective—and permits workers to finance retraining with money withdrawn, without penalty or taxation, from their IRA or annuity accounts. This provision would allow over 15 million largely working class households to take advantage of an already established network of retirement financing.

Mr. Speaker, I would hope that our colleagues would join us in this effort in order that we may meet the global challenges which await us.

In this regard, I would also commend to our colleagues the following research summary written by ASTD chief economist, Anthony Carnevale, which outlines available data on the economic role of employer-based training and retraining.

WORKPLACE TRAINING

(By Anthony P. Carnevale)

As the representatives of nearly 50,000 of the nation's employer-based specialists who train, retrain and educate the workforce, the American Society for Training and Development commends Representatives Johnson and Clinger's interest in workplace training.

Workplace training can be a powerful lever for resolving many of the nation's economic and human problems. Although employer-based training has attracted little public attention, it has been a critical aspect to the nation's education and training system since the great industrial expansion in the late nineteenth century. To some extent employer-based training and development has remained the dark continent in the public training and development system for good reason. The employer-based training and human resource development system has operated smoothly, informally, efficiently, and has little connection to the public funding of institutions that dominated the human resources debate over the postwar period.

This employer-based "shadow education system" exists for many reasons: First, since 1946 the nations principle human resource development problem has been that of providing elementary, secondary and post-secondary education for the baby boom as that burgeoning population shouldered its way through childhood, adolescence and young adulthood. Second, throughout most of the postwar economic era the competitive adaption of human skills to factor price changes, new technologies, new products and shifting competitive advantage occurred smoothly and without major dislocation and disruption. Third, where major public efforts have been mounted to redistribute income toward the disadvantaged or ease transitions for dislocated employees, policymakers have relied almost exclusively on public education and training.

The growing importance of employer-based training and development is partly due to changing circumstances that have altered or challenged all of the latter presumptions. The baby boom has aged beyond the reach of elementary, secondary and even post-secondary educational institutions. Training and human resource development services are increasingly delivered to a working population. Moreover, available data suggests that adult Americans would prefer that their developmental services be delivered through the workplace.

ECONOMIC ADAPTION

The processes of competitive skill adaption have also accelerated as the internationalization of the American economy has intensified the pace of economic and technological change. On balance these forces have created more jobs than they have destroyed. At the same time, however, those who get the jobs that trade and new technologies create are rarely the same people who lose jobs to technology and trade. Those who are dislocated by healthy economic and technological changes need to be retrained. In general these dislocated workers represent a relatively small proportion of the nation's labor force. According to a November 30, 1984 Bureau of Labor Statistics report, of the 5.1 million employees who had been on the job for three years before being displaced over the four year period between January of 1979 and January of 1984, 60 percent had been reemployed, 25 percent were still looking for work and 700,000 had dropped out of the labor force. Those former employees actually forced to drop out of the labor force amounted to little more than one half of one percent of American workers in January 1984. Other studies suggest that displaced workers number 100,000 employees per year—less than one tenth of one percent of the current labor force.

The problems of dislocated workers are significant, real and deserving of public remedies; but America's more sizeable retraining problem lies elsewhere. the nation's most sizeable retraining challenge is the constant reskilling of existing employees. Employees dislocated by economic change and made redundant by new technologies are only the most obvious and dramatic evidence of a more subtle, incremental and pervasive process of economic and technological change that affects skill requirements for all employees. The dislocated and redundant employee is only the tip of the iceberg. By far the greater mass of change in skill

requirements is constantly underway in the workplace as those who remain on the job react to skill changes made necessary by economic and technological forces.

Skill changes impact primarily on the job because they are evolutionary. Economic and technological adaption exacts marginal changes among the bundle of tasks associated with individual jobs or occupations. These subtle shifts in job requirements are rarely noticed outside the workplace until they accumulate in sufficient quantitly to effect pre-employment occupational preparations or until over a number of years and even decades they evolve into an entirely new occupation or job description. The employer-based job training system is the key element in adapting the nations human resources to changing skill requirements. Even in periods of relatively rapid economic and technological change, competitive skill changes are evolutionary not revolutionary.

Incremental shifts in prices, products, technologies and competitive advantage effect marginal changes in employee skills. Moreover, the workplace is the most appropriate site for retraining. It is in the workplace where subtle shifts in products, prices and new technologies are translated into new skill requirements instantly and articulately through the calculus of market competition. The employer-based training and human resource development system is the most sensitive barometer for registering economic and technological impacts on job requirements. The employer-based training system is our first line of defense in the effort to adapt to economic and technological change and to maintain international competitive advantage.

PRODUCTIVITY, INTERNATIONAL ADVANTAGE AND TECHNOLOGY

Workplace training is also the key in promoting productivity, price stability and international competitive advantage. Productivity is driven by the working "team." Productivity results from the ability of working groups or "teams" to learn together in the workplace. Individualized learning outside the workplace contributes to employee productivity only to the extent it provides individuals with the necessary basic educational, occupational and social skills that make them ready for workplace learning in the context of the production process. It is the informal and formal learning in the workplace that drives team productivity and the effective integration of human and machine capital.

Productivity and thereby training are our most effective means for maintaining price stability. While reduced wage costs can hold prices down, there are limits to the effectiveness of downward wage pressures on prices. All out wage competition, for instance, would threaten the productivity of the working team, especially if experienced employees became less willing to pass on their skills to new employees or resist new technologies for fear of losing their jobs. In fact, it is rare for even the most extreme wage pressures to result in actual wage reductions. At best, employers are able to slow the rate of increase in wages to the rate of increase in productivity.

Team productivity and the formal and informal workplace training that leverages it are also the most powerful lever for maintaining the nation's competitive advantage. We cannot match sweat equity with the masses of low wage workers in the underdeveloped world. Americans cannot win the race to the lowest common wage. Foreign workers willing to work for as little as fifty cents per day will win the race for low wages and low skill jobs. Moreover, the surplus of low skilled adult labor will grow in the underdeveloped world. Between 1980 and the year 2000, population growth in the twenty to forty year old cohort will increase by 600 million people in the underdeveloped world as compared with 35 million in the developed world.

Nor will technology save us. Technology knows no cultural or national loyalties and is instantly transportable. In addition, evidence shows that human factors far outweigh other resources in their contribution to American productivity growth and increases in the national income since comparative data first became available in 1929. Moreover, "working smarter" or learning on the job shows up as the most significant among human contributions to productivity and national income since 1929. Finally, we should all remember that machines are ultimately human artifacts and that if they are to be utilized effectively they must be integrated into the working team at the job site.

ENTRY LEVEL JOB SKILLS

Workplace training also plays a clear and critical role in development of individual working skills. While elementary, secondary and post-secondary education institutions provide most basic academic and vocational skills, it is workplace training that provides most, if not all job specific skills. This is due in part to the nature of America's human development system. After graduation from secondary school, young adults tend to experiment with alternative education, training and work experiences until roughly age twenty-five when they begin to settle into a long term career pattern.

Secondary school job-specific training is relatively outdated and irrelevant by age twenty-five. The research literature tends to bear this out. Most secondary school graduates do not work in the labor market areas in which they went to high school. Most continued work in occupations in which they received job-specific training in secondary schools. As compared with those who did not receive job-specific training in secondary school, only those with training in clerical and construction occupations showed income gains from job-specific training in secondary school. Moreover, even those gains tend to wash out within five years of secondary school graduation. According to the Bureau of Labor Statistics, in 1983 only 5% of the nation's employees report they learned something they needed to know to do their current job in secondary vocational schools and only 4% said they learned something necessary to qualify for their current job in post-secondary vocational schools.

SKILL SHORTAGES

Workplace training is surprisingly important in developing basic job skills even among professional and speciality occupations. This fact has become ever more apparent over the years in the investigation of skill shortages that are often announced but rarely materialize in the workplace. Most skill shortage projections are based on headcounts of graduates of formal secondary and post-secondary occupational programs relative to projected industry hiring requirements in specific occupations and professions. Projections arrived at in this manner tend to ignore the role of the workplace training system in providing for job related skills. Employers tend to take the closest available approximation to the skill they want and train it into the skill they need. This is even true among the most highly skilled professions. In 1979, for instance, most new engineering jobs were not filled by new engineering graduates. In 1983 fully a third or 33 percent of those trained in professional or specialized occupations said they received some or all of the training necessary to qualify for their jobs through formal or informal training in the workplace. Among technicians who received training to qualify for their jobs, a remarkable 54 percent said they received some or all of their qualifying training from their employers in the workplace. In the remainder of occupational categories of the workforce, the proportion of employees who received some or all of their qualifying training for their jobs through workplace training was even higher than in 1983. Among employees in other than professional or technical occupations, 79 percent of those who needed training to get their jobs received some or all of that training in the workplace as compared with 40 percent who said they received some or all of their training from schools.

RETRAINING

As noted above, the employer's role in retraining is significant. The workplace is the most sensitive and immediate barometer of economic change. A full 70 percent of executives, administrators and managers said they received some or all of their retraining on the job as compared with 37 percent of executives and administrators who said they received some or all of their retraining at schools.[1] Among professionals and technicians, an equivalent proportion of employees said they got all or some of their retraining on the job or at schools. Of those who received retraining in the remaining occupational categories of the workforce, 76 percent said they received all or some of their retraining in the workplace and 23 percent said they received some or all of their retraining in schools.

The latter figures likely understate the amount of training leveraged through the workplace. Workplace training is informal, especially OJT, and of short duration. As a result it is least memorable and survey respondents are likely to understate the amount of training they receive that is directly related to their current job. In addition, the above figures only tell us where the training takes place. This understates the quantity of employer sponsored training that does not take place in the work setting but is initiated and paid for by employers. Employers always have a choice as to whether it is most efficient to make or buy the training they need. The incentive to buy rather than make training is especially strong for smaller employers who do not have sufficient employees to realize economies of scale necessary to set up their own in-house training staffs or programs. We estimate that 38% of formalized workplace training is paid for by employers but bought outside the workplace. As the above data would suggest, most of the outside training paid for by employers is professional, management, technical and sales training. Also, as the above data would suggest, 64% of the training paid for by employers but provided outside the workplace is provided by

[1] Since many trainees responded that some of their training comes from both employer and other institutions, there is overlap between employer provided and other training. Figures then, will not add to 100 percent. (Source: Bureau of Labor Statistics, 1984.)

schools. Another 14% is bought from the "training industry," 12% from professional or labor organizations and the rest from government, community organizations and private tutors.

SIZE AND SCOPE OF TRAINING

Overall spending for training by employers is sizeable. Employers may spend as much as $30 billion per annum on formal training alone and an estimated additional $180 billion per year on informal OJT. Total spending for formal and informal employer-based training adds to roughly $210 billion. This compares with an annual expenditure of $133 billion for public and private elementary and secondary education and roughly $95 billion for public and private higher education.

The most impressive aspect to employer-based training is its direct connection to opportunity and lifetime earnings for individuals. Econometric studies have consistently shown that only 15% of the variation in income among Americans can be accounted for by formal education. The remaining 85% is accounted for by learning in the workplace. Earnings are driven by the ability of working teams to learn together in the context of appropriate technology. It is this reality that accounts for the fact that earnings variation among people with the same education level consistently equals the earnings variation in the nation's population at large. In more concrete terms, this is why auto and steel workers were able to command salaries so much greater than other industrial workers with equal educational achievement and attainment for so long.

THE DISADVANTAGED/DISLOCATED

The importance of employer-based training is also evident in our experience with training for disadvantaged and dislocated workers. Our experience with the training of disadvantaged and dislocated workers has taught a simple and straightforward lesson: Training Does Not Create Jobs. Jobs Create Training. It is access to jobs with training and associated career ladders that provide lifetime opportunities and successful career transitions. Job-specific training outside the context of a specific job is folly. The function of all training outside the context of the job is to give individuals sufficient basic intellectual and occupational skills so that they are job ready or training ready. The evaluation data on public job training programs is clear on these points. Training closest to the job is most successful. Where jobs are unavailable at the end of the training period and training is not targeted on a specific job, training is no more successful and much more expensive than simple job search assistance.

The American Society for Training and Development agrees with Representative Nancy Johnson that the current and future status of employer-based training raises important issues: First, are we doing enough employer-based training? There is substantial evidence to suggest that we are underinvesting in workplace training. In theory, employers are likely to underinvest because they cannot own human capital, guarantee a future stream of investment returns or measure investment risks and potential gains effectively. In practice, surplus labor markets encourage employers to buy rather than make human capital and to pirate trained personnel away from competitors willing to invest in training.

Second, how does the current tax system and proposed changes affect employer-based training? A recent study by the Congressional Research Service concludes that "human capital is taxed at rates which are as great or perhaps even greater than those applied to other investments . . . It might therefore be socially desirable for the government to provide some type of subsidy to employers to provide training . . ." In order to shed further light on tax issues, ASTD had contracted a major tax study which will be made available to Congress by early fall.

Third, does the future portend a need for more or less employer-based training? All signs including those mentioned above suggest a growing emphasis on human resource development in the workplace. The pace of economic change seems unrelenting. Demographic changes and the absence of inflation suggest unemployment rates below six percent in the foreseeable future. Should labor markets tighten significantly, employers will have to make, rather than buy, a much larger share of their skilled employees. Moreover, should unemployment rates slip below six percent, employers will be drawing their entry level employees from among a population with high concentrations of persons with significant basic skill deficiencies requiring significant human development investments if they are to be made ready for training on the job.

The American Society for Training and Development welcomes Representatives Johnson, Clinger, and the House Wednesday Group's interest and applaud the foresight demonstrated in the introduction of H.R. 1219, the National Training Incentives Act. We will continue to work with Congress as the legislation develops.●

SOLVANG CITYHOOD

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LAGOMARSINO. Mr. Speaker, I rise to bring to the attention of my colleagues a significant event that will occur later this spring in my congressional district. On May 1, 1985, the residents of the town of Solvang will become California's 440th city, to be known thereafter as the city of Solvang.

On November 6, 1984, as many Members of this body were anxiously awaiting results of their own election, residents of the "Danish Capital of America" were voting overwhelmingly to incorporate and create a new city. When the votes were counted, 1,342 were in favor of cityhood, 591 opposed. That night, five residents of the community were elected to become the first City Council of Solvang. They are: Elaine Willi Campbell, Alan T. Larsen, Stewart F. Mee, Thomas G. Nielsen, and Leslie Les Wilkes.

Many citizens of the country received their first glimpse of Solvang earlier in the day when the Nation's media followed President and Mrs. Reagan to Solvang as they cast their ballots in the November general election. While the First Family does not live within the new city limits, they can see Solvang from their ranch in the Santa Ynez Mountains and vote at a Solvang polling place.

The new city government will replace the current Solvang Municipal Improvement District and the current directors, by popular vote, will move into the council. Additionally, it is the intent of the new city to appoint JoAnn Waring as city clerk-treasurer, James R. Christiansen as city attorney and Leo Mathiasen as city administrator. Tourism, as it has been in the past, will continue to be the primary industry of the new city with a population of 3,500.

To mark this occasion, residents have planned a major celebration marking cityhood on April 27, 1985. I know my colleagues join me in wishing the city of Solvang prosperity and good fortune in the years ahead.●

STOP SELLING SOUTH AFRICA THE TOOLS TO ENFORCE APARTHEID

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BERMAN. Mr. Speaker, yesterday the House Foreign Affairs Committee began its consideration of the Anti-Apartheid Act of 1985. This legislation will make clear the U.S. abhorrence for the South African Government's repressive apartheid policy.

As the author of the provisions in the bill banning sales of computers to the South African Government, I testified before the committee on the uses of U.S. computers in enforcing apartheid. I am inserting the complete text of my testimony.

The text follows:

TESTIMONY

Mr. Chairman, the legislation I have introduced would restrict United States exports to South Africa in three areas: ban all sales to South Africa's military and police, halt exports of computers and computer parts and software to the South African government and prohibit Munitions List sales to South Africa.

I am fortunate to serve on both the Africa Subcommittee and the International Economic Policy and Trade Subcommittee, which are meeting to jointly consider this legislation. Chairman Wolpe and Chairman Bonker have laid the foundation for a policy toward South Africa that will reflect this country's commitment to human rights and racial equality.

Under Chairman Wolpe's leadership, the Africa subcommittee has exercised thorough and persistent oversight over the administration's policy of "constructive engagement" with those who enforce apartheid in South Africa. The subcommittee has examined the relaxation of export controls that is a central feature of current policy. It has investigated and documented numerous sales that have strengthened the regime in Pretoria and supported apartheid, sales such as twenty five hundred shock batons to the South African police, computers useful

for nuclear weapons development to a government-sponsored research institute, and munitions list sales far in excess of combined sales for the previous thirty years.

We are deeply indebted to Chairman Wolpe for repeatedly pointing out the weaknesses and tragedy inherent in a policy of "constructive engagement" with the South African government. Your voice, Mr. Chairman, has been heard in South Africa. Blacks as well as whites know that when President Reagan calls the Pretoria regime a friend and ally, he is not speaking for all Americans. You have demonstrated that others in this government consider our true allies to be those South Africans who seek justice and freedom.

We also owe a great debt to Chairman Bonker. No one in this Congress is more committed to promotion of American exports. No one has worked more diligently or more creatively for legislative remedies to our growing trade imbalance. No one is more critical of economic sanctions when they serve only to hamper American exports, and do not further foreign policy goals. At the same time, Chairman Bonker has been a leader for a strong human rights policy, and for the use of non-violent measures to further the rights and freedom of people around the globe.

Chairman Bonker's support for restrictions on U.S. business with South Africa carries great weight with this committee and with the whole House. Because Chairman Bonker was willing to include sanctions against South Africa in the Export Administration Act, we were able to secure passage of broad trade and investment restrictions in the House last year and narrower measures in the Senate. Chairman Bonker consistently defended these sanctions, even though they complicated passage of legislation to which he devoted much of his time and effort, and which included wide-ranging reforms.

I am pleased that part of the legislation which I introduced at the beginning of this Congress—the ban on sales of computers and related equipment to the South African government—has been included in the legislation which Chairman Wolpe has introduced together with Congressman Gray, myself and others of our colleagues in the House, and with Senators Kennedy, Weicker and others in the Senate. I want to devote most of my testimony to that issue.

However, I want to briefly mention another part of the legislation I introduced which has already passed the House and is on its way to becoming law. That is the total ban on sales to South Africa's military and police. Such a ban was in effect from 1978 to 1982, and is restored for one year by the Export Administration Act passed by the House yesterday and soon to be passed by the Senate.

This action is an important first step in disassociating the United States from growing repression in South Africa. Over the past seven months, at least 250 people have been killed by police—most of them unarmed civilians engaged in non-violent protest, many of them children. American companies should not be making profits from the victims of apartheid. The United States must stop selling the South African government the instruments of repression.

The legislation passed by the House yesterday also restores earlier United States restrictions on computer sales to the South African government. The Export Administration Act restores the requirement, lifted in early 1982, that State Department review all computer sales above a certain level of technology to the South African government. This is a step in the right direction. Under current regulations, a wide range of computers can be sold to the South African government without any State Department review of their possible use in enforcing apartheid, including computers destined to the military and police and departments directly responsible for enforcement of apartheid.

However, that legislation, first introduced three years ago, does not go far enough. We can assure that U.S. computers are not used to enforce apartheid—we can send a significant signal to the bureaucrats and politicians who maintain racial domination—only if we ban all sales of computers and computer-related equipment to the South African government. I would like to outline a few reasons why a total ban is necessary.

USE OF COMPUTERS TO IMPLEMENT APARTHEID

Computers are central to the South African government's pervasive control over every aspect of existence for every black individual. From the age of sixteen, all blacks must carry passbooks indicating where they have permission to live and work and whether they are allowed to live with their families. The South African government maintains extensive records on all blacks—where they were born, their employment histories, family members, where they have lived—and this information is periodically checked against blacks' passbooks.

At the headquarters of the Black Sash—where volunteers try to help those caught up in pass law enforcement—one sees countless people, from the elderly to the very young, who are scheduled to be removed from their homes and separated from their families. The government's computers say they haven't permission to be where they are.

The South African government maintains thorough information on opponents of apartheid. It bugs and records their conversations. Its police and informers monitor their every movement. Computers help in the collection, retrieval and use of this information.

Yes, apartheid existed before the South African government began widespread use of computers. But at that time the government's controls over blacks provided the only employment for vast numbers of marginally educated Afrikaners. As the South African economy and population grew, political leaders became concerned that a growing white manpower shortage would inhibit the implementation of apartheid. Computers have helped to solve that problem.

Moreover, computers have enabled the South African government to strengthen its grip on the population and intensify apartheid enforcement over recent years. Pass law arrests doubled between 1980 and 1982. Political detentions have increased sharply in recent months. Armed with more thorough and more readily available information on black residents, the government has accelerated forced removals of whole communities from so-called "black spots"—areas where black families have lived for generations, but which the government has declared "white." Police have increased raids on camps where black families illegally attempt to live together, attacking women and children with tear gas and police dogs, demolishing their shacks in the middle of winter.

Those whose service is not needed by white South Africa—the elderly, the spouses, the children—are forced to live in barren, overcrowded African homelands. The white minority, seventeen percent of South Africa's population, has assigned itself eighty-seven percent of the land, including all industry and mining and most fertile land. Africans who are allowed to remain in "white areas" live under constant threat of being endorsed out, of losing all means to support their families. Three million blacks have been forcibly resettled in African homelands. Two million more are scheduled for resettlement.

CURRENT RESTRICTIONS INADEQUATE

The United States dominates the computer market in South Africa—supplying 70% of all computers sold. Figures are not readily available on computer sales to the government. IBM, the largest supplier of computers to South Africa, says that less than ⅛ of its sales go to the government. But this does not include sales to municipalities, public utilities and state-owned trading corporations.

Given the significant American share of the South African computer market and the importance of computers in implementing apartheid, current restrictions on computer sales to South Africa are woefully inadequate in three areas.

First, there are no restrictions at all on sales of many kinds of computers. A wide range of personal computers can be sold without a license to any South African government agency, including the military, police and departments directly responsible for enforcing apartheid.

Since the Reagan administration relaxed trade controls on South Africa, restrictions on computer sales have had a checkered history. At first, licensing requirements were lifted completely on sales of personal computers and related software to all branches of the South Arican government. Then, when trade controls on South Africa were tied to national security controls licensing requirements were reimposed on personal computers because their sale to the Eastern bloc was restricted. This year, with the lifting of licensing requirements on many personal computers to the Soviet Union and its allies, restrictions have again been removed from the sale of those computers to the South African government.

A computer's military usefulness to Eastern bloc countries has nothing to do with the usefulness to the South African government in enforcing apartheid. Personal computers of no strategic value to a superpower can still be very useful in keeping information on South African blacks. Small computers in local police departments, labor unions and Bantu Administration Boards in South Africa can be just as important in enforcing apartheid as are larger computers in central offices.

A second problem with current regulations on computer sales to the South African government is that most departments are exempt from all restrictions. Yet once a computer is sold to the South African government, there is no guarantee it will not be used to enforce apartheid. As IBM stated in its February, 1983 update on operations in South Africa, ". . . it would be misleading to suggest that any manufacturer can control how its products are used."

Thomas Conrad, in an article entitled "Computers programmed for Racism," documents the use of American computers by various agencies of the South African government in implementing Pretoria's "Total Strategy" of racial domination. A few examples from Conrad's article are:

For over ten years, Pretoria's Interior Department (not on the U.S. list of restricted agencies) has used IBM hardware to store details on seven million citizens whom the government classifies as "coloureds," Asians and whites. The data maintained includes identity numbers, "racial classifications," date of birth and so on.

At least four U.S. computers are at the disposal of the "Bantu Administration Boards," the fourteen regional bureaus that administer the permits and controls which govern the lives of blacks in South Africa. These computers were supplied by Burroughs, NCR and Mohawk Data Sciences.

South Africa's Department of Statistics uses a large IBM mainframe computer.

A number of American companies have supplied computers to the regional and local government bodies which legally enforce controls on blacks living in "white" areas.

An institution which trains police computer operators uses equipment from IBM and Data General.

Pretoria uses a central purchasing agent, the State Tender Board, to acquire many of its computers. It is next to impossible to determine where a U.S. product sold to this board will end up in the system.

We cannot fool ourselves any longer that we can find the "good" parts of the South African government and quarantine the "bad" sections. There is only one way to guarantee that U.S. computers are not used to enforce aparthied. There must be a ban on computer sales, and sales of related software and equipment, to all agencies of the South African government.

A third problem with current regulations on computer sales to the South African government is that even for agencies where licenses are required, those licenses are far too readily granted.

Regulations published in October, 1984 point out that licenses will generally be considered favorably:

For those personal computers still controlled for sale to the military and police "if the export would not contribute significantly to military or police functions;"

For computers of all kinds destined to departments directly responsible for implementing the government's controls over the black population if the computers "would not be used to enforce the South African policy of apartheid;" and

For parts and software for computers not subject to licensing requirements or for any computers whose sale has been approved.

Licensing officials at the Department of Commerce may have some problem in determining the "significance" of a computer sale to South African security forces or the ultimate use of a computer by a department charged with enforcing apartheid. An official at the Office of Export Administration told a researcher, "the Commerce Department has no criteria to determine how useful an item might be to the South African security forces. Such criteria," he said, "would be developed on an ad hoc basis."

It is also troublesome that the regulations assume that licenses should be granted for software once a computer has been approved, or if the computer requires no license. Numerous U.S. firms produce police software packages in the public domain. A published list of IBM products available in South Africa included a locally marketed software package called, "Law Enforcement System." One company has a special software package "designed in South Africa to meet local government requirements," according to an internal publication.

Under relaxed regulations on computer licensing for South Africa, the administration has approved a number of highly questionable sales. These include:

In May, 1982, the sale of a Control Data Cyber 170/750 was approved to the government-controlled research institute, the Council for Scientific and Industrial Research (CSIR). This sale was approved only after a delay of fourteen months because the Pentagon was worried that it would endanger highly sensitive U.S. cryptographic technology. The computer is useful for nuclear weapons development.

In September, 1982, a license was granted for a second powerful computer useful for nuclear weapons development for CSIR. It should be pointed out that CSIR researchers have designed military electronics systems, constructed fingerprint storage mechanisms, performed research and development in aeronautics and helped designed shells for explosives.

In October, 1981, a license was granted for a powerful computer—a Sperry Univac 1100—for the ARMSCOR subsidiary, Atlas Aircraft.

POLITICAL IMPORTANCE OF COMPUTER EMBARGO

An embargo on computer will send an important political signal to the enforces of apartheid.

This legislation not only would halt all new computer sales by South Africa's principal suppliers, but also would stop spare parts and servicing for existing American computers.

Such restricitons will hamper the enforcement of South Africa's extensive controls over the black population. They will inconvenience government workers throughout the South African bureaucracy, and will serve as a daily reminder thats the United States wants no part in enforcing apartheid.

United States actions are more important to Pretoria than many realize, particularly when they withdraw support from the forces of "law and order," as President Reagan likes to call them. South African officials see their troubles in East-West terms. They see themselves as the guardians of Western civilization on the African continent. They look to the United States as the leader of the West to ultimately rescue them from what they mistakenly believe to be a "communist onslaught." It is in fact the black majority's inevitable reaction againsts repression.

POSSIBLE COOPERATION BY OTHER SUPPLIERS

In closing, I would like to make a few comments on the argument that if the United States stops selling computers to the South African government, other suppliers will quickly and greedily fill the void.

The Kennedy-Gray bill, of which the computer provision is a part, calls for negotiations with other countries to secure their cooperation with U.S. sanctions. I believe that chances for securing international cooperation will be particularly great with the computer sanctions. This is true because the embargo relates directly to enforcement of apartheid, and because computers are exported by a relatively few countries that can control exports with comparative ease.

The United States unilaterally embargoed arms sales to South Africa before convincing other countries to go along. Now, according to the Commerce Department, the arms embargo is generally adhered to by other nations. A recent report in the Washington Post indicates that the embargo has been effective in denying South Africa equipment that it needs to modernize its forces, and in making the defense of apartheid far more costly. Countries far more dependent on trade with South Africa than the United States may never have accepted the arms embargo had we not taken the lead.

Even if other countries do not follow the United States' example, I believe this is one area where for moral reasons we should prohibit sales of equipment used directly in human rights violations. We took the lead in embargoing nerve gas sales to Iraq. Congress imposed a unilateral trade embargo against Idi Amin's Uganda. Similarly, we should ban sales to South African government agencies of the instruments of repression, including computers.●

NICARAGUA: THE HARD QUESTIONS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, the administration has unfortunately chosen to cast the debate over its Nicaragua policy in terms of extreme rhetoric, catch phrases, and slogans. This tends to drown out good, hardheaded analyses that try to look at the issues from the point of view of our national interest.

A good example of the latter is a column by David D. Newsom in the February 28 Christian Science Monitor. Mr. Newsom points out that we have yet to answer three basic questions with respect to Nicaragua.

First. What do we want in Nicaragua? We hear a lot of rhetoric about democracy, something to which we all aspire, but we have yet to elaborate a clear set of practical objectives that can be achieved with the means at hand.

Second. Who have we been supporting? We have yet to face the fact that Contra forces that we support are anything but the appropriate vehicle for bringing Nicaragua the democracy that we say we want for it.

Third. How will they succeed? Since the Contras do not have the capability to remove the Sandinistas and install whatever kind of government it is that we want in Managua, we must inevitably face the question, "How far do we go to ensure victory? More American aid? U.S. troops?"

As Mr. Newsom says, "These questions deserve attention. We have had national tragedies when we have turned away from the hard questions." I urge my colleagues to give careful consideration to this analysis.

[From the Christian Science Monitor, Feb. 28, 1985]

NICARAGUA: THE HARD QUESTIONS

(By David D. Newsom)

We are once again locked in a national ideological debate: this time it is over Nica-

ragua and the hard questions tend to be submerged in catch phrases and slogans.

Those favoring help to the contras speak of democracy and declare the Sandinistas to be a dangerous extension into Central America of the Soviet empire. Those opposed to American involvement with the anti-Sandinistas stress "nonintervention" and "diplomacy."

Both sides argue from analogies. Afghanistan is seen as the model for the "freedom fighters." Fears are raised of another Cuba. Opponents of aid to the contras suggest that we are resorting to "terrorism," that we are no different from the Soviets. The credibility of both sides is strained by extreme assertions.

The two sides seem to agree only that the Sandinista regime is inimical to US interests in the region. There the agreement stops. The debate becomes drowned in often exaggerated rhetoric while at least three significant questions remain unasked and unanswered.

1. What do we want in Nicaragua? The administration wants a different regime, one that is "democratic." Conditions laid down for improved relations with Nicaragua—that go to the heart of Sandinista power—would be difficult for any sovereign government to accept. The argument is that only through the acceptance of such conditions can the Nicaraguan threat to its neighbors be reduced.

Is it the nature and philosophy of the regime that represents the threat to us? Isn't it the possibility that a regime with close ties to Cuba and the USSR might become a site for Soviet military activities? Is that possibility not one that can be monitored and verified? A U.S. demand that such bases not be established would be understood and supported in the hemisphere to a greater degree than our efforts to overthrow a government. The possibility of containing, rather than attacking Nicaragua should at least be a part of the national debate.

2. Who have we been supporting? The forces opposing the Sandinista regime are made up of various individuals and points of view. The military leader in the field is a former colonel in General Somoza's National Guard. Political leaders include some from the center and others, like Arturo Cruz, who broke with the Sandinistas. Recent efforts in Miami to bring the factions of the opposition together failed. Edin Pastora, an early hero of the revolution, refuses to join with the others.

The administration speaks of the contras as democratic forces, yet there is little evidence that such forces have a sufficient respect for democratic principles to sort out their own house. We know little of the ultimate leadership, the ultimate policies of this diverse group. Is it enough at this time to say that any alternative to the Sandinistas is preferable and to hope for a restoration of the democratic process? Should not we, in our debate, ask a few more questions about the nature of our "friends" or be at least a little less certain regarding the democratic future?

3. How will they succeed? Supporters clearly expect the contras to emerge as the rulers. How? Will they create a popular uprising that will overthrow the government? There is little evidence now to suggest that will happen. Will they march to Managua and win a military victory? The odds against this are high. Will they so disrupt the economy and public life that the Sandinistas will sue for peace? The Sandinista staying power may be greater than that.

In the face of the growing Sandinista military power and mobilization, it is hard to foresee a military victory for the "democratic" forces. If aid to the anti-Sandinistas is approved by the Congress and the government in Managua does not change its policies, will the United States once more face the hardest of questions: How far do we go to ensure victory? More American aid? More advisers? U.S. troops?

These questions deserve attention. We have had national tragedies when we have turned away from the hard questions. The time has come to address these unpopular but essential questions.

David D. Newsom is associate dean and director of the Institute for the Study of Diplomacy at Georgetown University.●

HOMEOWNERSHIP OPPORTUNITY ACT OF 1985

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MITCHELL. Mr. Speaker, today, I am introducing the Homeownership Opportunity Act of 1985. The purpose of the legislation is to provide assistance to first-time, low-income home buyers. The bill would make available single family properties that are constructed or substantially rehabilitated with Federal funds and properties that are owned by the Department of Housing and Urban Development for purchase by low-income families.

The Buyers Home Survey, "Homeownership: Celebrating the American Dream," prepared by the U.S. League of Savings Institutions found that in 1983, the median income of $35,987, was required to qualify for a mortgage loan. Nearly 6 percent of the home buyers for that year had incomes of less than $15,000. Approximately 8 percent had incomes between $15,000 and $19,999. Homeownership affordability is an acute problem for low-income households. Indeed, most low-income households cannot qualify for mortgage financing. Moreover, when low-income familes buy their own homes, they pay a higher percentage of their income for housing than do families with higher incomes.

The Federal Government has not adequately addressed the problem of assisting low-income home buyers. There is one Federal Government homeownership program, section 235, which is intended to assist families with income below 95 percent of the median. However, this program will provide assistance to 5,400 units nationwide in fiscal year 1985. The section 312 program which was designed to stimulate homeownership opportunities for families unable to qualify for mortgage financing or to raise the required downpayment is operating on loan repayments rather than funds appropriated by Congress.

The Homeownership Opportunity Act recognizes the severity of the problem of homeownership affordability. The bill would make families whose incomes are below 50 percent of the median eligible for assistance to purchase homes. The eligible families would be first-time buyers. The bill would make available single family dwellings constructed or substantially rehabilitated by Federal assistance or HUD-owned properties for purchase by such families. The properties would have to meet HUD's standards for decent, safe, and sanitary housing.

The key component of the Homeownership Opportunity Act is the method by which assistance would be provided to low-income families. There would be an interest bearing loan secured by a first mortgage, on an amount not to exceed 30 percent of the original cost of construction or substantial rehabilitation or 30 percent of fair market value of the house, whichever is less. Since the purchase price could not exceed $55,000, the first mortgage would be on an amount of $16,500 or less. The interest would be based on the income of the family, pursuant to the section 235 homeownership program. Thus, the interest rate would be less than market mortgage interest rates.

In addition, there would be a noninterest bearing second mortgage equal to the difference between the purchase price and the amount of the first mortgage, The second mortgage would be repayable upon the sale of the house, if the family sells before the end of a 20-year period.

Of the 7,863 units of HUD held properties, approximately 90 percent of the units are FHA insured, while 10 percent are not insured. These units are section 312 rehabilitated properties, et cetera. This small universe of properties does not totally address the homeownership affordability issue. It is a step in the direction of expanding the dream of homeownership to families who want to own a home, but can not without some assistance.

SECTION BY SECTION ANALYSIS OF THE HOMEOWNERSHIP OPPORTUNITY ACT OF 1985

SECTION 1, the bill is entitled the Homeownership Opportunity Act of 1985.

SECTION 2, establishes the basis for the Homeownership Opportunity Act of 1985. The bill is based on the assumption that housing for ownership by low-income families is too expensive without some form of assistance. Therefore, the bill would provide loans to permit very low-income families to purchase single-family dwellings owned by the Department of Housing and Urban Development (HUD).

SECTION 3, grants authority to the Secretary of Housing and Urban Development to provide the assistance under the Act.

SECTION 4, sets forth the requirements for eligibility and makes a family whose income does not exceed 50 percent of the median eligible for assistance. The family must be first-time home buyers. The hous-

ing for purchase must be constructed or rehabilitated with some form of Federal assistance and owned by HUD. The housing would also have to meet HUD's minimum property standards for decent, safe and sanitary housing. The purchase price of the housing can not exceed $40,000, ($47,500 in any geographical area where the Secretary authorizes an increase in the basis of a finding that cost levels so require, except with respect to any family with five or more persons, the limits shall be $47,500 and $55,000 respectively).

SECTION 5, sets forth the kind of assistance and the method by which it would be provided to eligible families. The assistance would be provided in two ways. One, there would be an interest bearing loan secured by a first mortgage, on an amount not to exceed 30 percent of the original cost of construction or substantial rehabilitation or 30 percent of the fair market value of the house, whichever is less. The interest rate on the first mortgage could be as low as 4.5 percent for a 30 year mortgage as determined pursuant to the section 235 homeownership program. Second, there would be a non-interest bearing second mortgage equal to the difference between the purchase price and the amount of the first mortgage. This second mortgage would be repayable upon the sale of the house, if the family sells before the end of a twenty year period.

The downpayment would be 2 percent of the purchase price of the home, or $500, whichever amount is less.

SECTION 6, provides for distribution of the assistance pursuant to the 1974 Act. That is, the allocation of funds would be based on the existence of a housing assistance plan. In allocating assistance, the Secretary would have to consider the relative needs of different areas and communities as reflected in data as to population, poverty, housing overcrowding, housing vacancies, amount of substandard housing, etc.

SECTION 7, establishes the Homeownership Opportunity Fund. The "fund" would be a revolving fund containing funds appropriated, loan repayments, etc.

SECTIONS 8 and 9, provides for regulations and annual report requirements under the Act.

SECTION 10, provides definitions. The definition of "home" means any single family dwelling unit that was constructed or substantially rehabilitated with the use of Federal assistance and is owned by HUD.

The term "very low-income family" means a family whose income is not greater than 50 percent of the median income.●

MORAL OBLIGATIONS AND U.S. POLICY IN NICARAGUA

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. COURTER. Mr. Speaker, at this moment, few issues facing this House are as important as that of assistance to the Nicaraguan Resistance. For that reason, I ask that the prepared statement I delivered on April 17 to the Subcommittee on Western Hemisphere Affairs be included in today's RECORD.

MORAL OBLIGATIONS AND U.S. POLICY IN NICARAGUA

(Statement of Congressman Jim Courter before the Subcommittee on Western Hemisphere Affairs, April 17, 1985)

Whether or not we choose to bear it, we have a moral obligation in Nicaragua. This is the obligation to see that the promises of Nicaragua's 1979 revolution—for democracy, pluralism, civil rights and justice—are fulfilled. We took this obligation on ourselves in 1979 when we joined the nations of the OAS in delegitimizing the Somoza government and in granting recognition to the Sandinistas.

Our recognition of the Sandinistas was conditional. It depended on the fulfillment of promises they made in writing to the OAS. These promises have been broken, as we all know. For the United States to do nothing about this would now send two messages to the world. They are:

(1) The United States will allow its neighbors to be subverted by Communist revolutions, provided that these revolutions make good use of some of the appearances and slogans of democratic governments.

(2) We cared enough for the Nicaraguans in 1979 that we were willing to speed Somoza's fall from power, but we do not care enough to protect them from the greater tyranny of Communism today.

Of course no Member of Congress and no official of the United States Government wishes to send messages. Few of us doubt that we have a moral obligation to our neighbors in Nicaragua. But as certain as we are of the need to act, we are equally uncertain as to how we should act.

In my view, the first problem we must overcome is one of perception. We are troubled by many things that we see in Nicaragua. The Nicaraguan military, itself an arm of the Sandinista political party and not a truly national institution, has grown far beyond the size needed to meet any conceivable threat. In fact Nicaragua's Defense Minister announced a goal of putting 200,000 Nicaraguans under arms. This goal, which aims at building an army over 14 times the size of Somoza's National Guard at its peak strength, was announced in 1980, before any armed opposition had formed against the Sandinista government, and when United States aid was still pouring into Nicaragua. Soviet bloc advisers are in Nicaragua by the thousands. The Sandinistas have a particular affinity for the PLO—the PLO's representative in Managua is treated as an Ambassador. On the domestic side, the facts are no more encouraging. The Nicaraguan Jewish community is in exile. Subversion of labor unions has been authoritatively documented by the AFL-CIO. The Inter-American Commission on Human Rights and other groups have reported on unjust treatment of Miskito Indians. The press is either state-controlled or censored. The political opposition is harassed. The population as a whole is increasingly controlled by block organizations, secret police and Sandinista mass organizations. Soviet bloc advisers are at work in these areas too.

We have all seen this evidence, but many of us still miss the forest for the trees. Some of us believe that these are separate problems that can be attacked separately. But in fact, these are the many manifestations of one single phenomenon: Marxism-Leninism. If the Sandinistas were not Communists they would not need to control the domestic population, they would not have to militarize their society, and they would not have to play host to the thousands of Soviet bloc advisors that are on their soil. But they have made the choice to take the path of Marxism-Leninism, and they are following the appropriate policies.

Just as there is one single problem in Nicaragua—the problem of Communism—there is only one solution, and it is internal reconciliation. Some have tried to divide the issue, seeking a settlement that keeps Nicaragua from subverting or threatening its neighbors, and leaving the Sandinistas free to choose the domestic policy of their liking. But this is an impossible goal, for several reasons.

It is opposed to the ideology of the Sandinistas, which virtually guarantees that they would violate such a promise even if they agreed to sign it. It would not fulfill our obligation to work for the establishment of democracy in Nicaragua. And finally, it would not bring peace, because Sandinista repression is the very cause of the growing armed resistance in Nicaragua—a resistance that will not disappear until democratic hopes are fulfilled.

The issue, then, is indivisible. We must direct our policy toward the goal of removing the threat that Nicaraguan Communism poses to all the people of Central America, both inside and outside of Nicaragua.

A plan exists for the internal reconciliation that can bring to Nicaragua the rights and freedoms to which it aspired when it ousted the Somoza dictatorship. The plan was announced on March 3, 1985 in San Jose, Costa Rica, and it was remarkable in several respects. First, it was put forward by a broad coalition of Nicaraguan opposition figures which had not previously joined together, so it represented a union of the civil and military resistence. Second, it called for a cease-fire pending Church-sponsored negotiations on the conditions and processes that would be needed to bring democracy to Nicaragua. It is important to note that this plan is supported by many defectors from the Sandinista revolution, including Arturo Cruz, a former Sandinista Ambassador to Washington who only recently decided to align himself with the Contras. It was also supported in editorials in the *Washington Post* and the *New Republic*.

This peace plan, which was embodied in the San Jose Document of the Nicaraguan Resistance, is also the subject of a resolution I offered, H. Con. Res. 81, which has won the support of 64 Members of the House who have cosponsored it.

Now President Reagan has supported this peace plan by offering to suspend military aid to the Nicaraguan freedom fighters if the Sandinistas will nogotiate seriously with their domestic opposition. Some have argued that the President's proposal puts undue pressure on the Sandinistas, but recent history shows that the President's judgment is right. Even though democracy and internal reconciliation are fundamental goals of the Contadora process, the Sandinistas have shown no willingness to negotiate on this point which is central to achieving regional peace.

When you, Mr. Chairman, wrote with eleven of our colleagues to Daniel Ortega on June 2, 1983 urging him to negotiate a political solution to Nicaragua's crisis, your call was rejected.

When Nicaragua's Catholic Bishops issued a pastoral letter calling for this same dialogue on April 20, 1984, their letter was banned from publication, labelled a "criminal suggestion" by the Sandinistas and the call for negotiations was rejected.

And this year, the Nicaraguan Resistance's call for dialogue was categorically rejected by the Sandinista government.

These facts should make it clear that pressure is required to bring the Sandinistas into negotiations. If this call for dialog is not accepted, it should be clear to us that there is no hope for the Contadora talks to succeed. If the Sandinistas refuse to negotiate seriously with their own people over a part of the Contadora objectives, they most certainly will not negotiate seriously with foreign governments on all the Contadora objectives.

Therefore, Mr. Chairman, I hope that this Subcommittee will support the President's proposal for $14 million in aid to the Nicaraguan Resistance tied to the offer of negotiations. It constitutes a constructive step toward a solution to the civil war in Nicaragua which is consonant with our moral obligations and security interests.

But it is not the only step that can be taken, and it is clearly only an interim step pending the outcome of the proposed negotiations between the Sandinistas and the democratic Nicaraguan Resistance. Other forms of pressure can be brought to bear on Nicaragua, and they should be employed if Nicaragua's current policies continue. These measures can include higher levels of military aid to the freedom fighters, economic sanctions such as an end to U.S. imports of Nicaraguan products, withdrawal of diplomatic recognition, recognition of a government in exile, or action in the OAS to isolate Nicaragua or to plan collective sanctions that could be imposed under OAS auspices.

These types of measures will be necessary if the Sandinistas fail to enter talks aimed at internal political reconciliation. Positive incentives such as economic assistance have been tried before, and they failed to keep Nicaragua from its alignment with the Soviet bloc.

Mr. Chairman, this month marks the tenth anniversary of America's departure from Vietnam. We should use the Vietnam experience to learn the lesson that human rights and Western strategic interests are not served when America turns away from the long twilight struggle against tyranny in the Third World.

In Nicaragua, we are fortunate that no direct American military involvement is necessary, but the situation is pressing nonetheless. There is no area of greater strategic interest to the United States than the Caribbean basin. There is no greater moral interest in U.S. foreign policy than the protection of democracy.

In Nicaragua, the facts are simple. A good democratic revolution was stolen. Our neighbors fought and labored to overthrow a tyrant, and now they are faced with a far greater tyranny. They don't deserve this, and we need not abandon them as they struggle to escape it. President Reagan's plan may not be the perfect and definitive solution, but it is, like democracy itself, better than all the alternatives.

I urge this Committee's support of the President's plan.●

MARX'S HEIRS BELIE THE PACIFIST PROMISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FIELDS. Mr. Speaker, I bring to the attention of our colleagues in the Congress an editorial and an op-ed piece appearing in the Wall Street Journal on April 5.

Read separately, these two writings raise interesting and serious sets of questions. When read together, and compared, they raise an even more serious set of questions. James Payne, a professor of political science at Texas A&M University, writes, "* * * Oddly enough, the same groups that deplore arms races tend to favor, or are neutral about, efforts to implant Marxist dictatorships around the world." This is consistently accurate concerning the actions of "some groups" toward South Africa, South Korea, the Philippines, El Salvador, Taiwan, et cetera. The corollary seems to be that once the Marxist dictatorships are implanted, these same "groups" will move mountains to help maintain them; Cuba and Nicaragua serve as sterling examples.

Indeed, Mr. Speaker, there seems to be no end to the efforts of some in this body to provide a continuing flow of chapters to the Republican Study Committee's brilliant analysis, "What's the Matter with Democratic Foreign Policy?" I urge my colleagues to read and ponder these editorials, and consider them seriously as we vote on aid for the Contras and all other anti-Marxist forces in our world.

[From the Wall Street Journal, Apr. 5, 1985]

MESSAGE TO SOLARZ

We had hoped that efforts in the U.S. Congress to shield Nicaragua's communist government from its enemies were merely an aberration, an isolated lobbying victory for Washington's leftist fronts. Now we're not so sure. A new move is afoot in the House to give moral support to yet another group of communists, those seeking to overthrow the U.S.-aligned government of the Philippines.

At the behest of the subcommittee chaired by Rep. Stephen J. Solarz (D., N.Y.), the House Foreign Affairs Committee has voted to chop U.S. military aid to the Philippines. The timing couldn't be worse, just when the communist insurgency in the Philippines is becoming a serious threat. It is serious enough, in fact, that we have to ask Rep. Solarz and his allies if they really want to help soul mates of Nicaragua's Sandinistas come to power in yet another country.

Mr. Solarz argues that reduced aid will send a "message" to Philippine President Ferdinand Marcos, prodding him to make the political, economic and military reforms that are the only long-term solution to the insurgency. There will be a message all right, not only to Mr. Marcos but to all other U.S. allies. It will say that the U.S. is preparing to sell out yet another of its friends.

Certainly the Manila government could use some reforms, not unlike a lot of other governments around the world, including the one in Washington. After a brilliant political career, the 67-year-old Mr. Marcos is ill and seems out of touch with the Philippines' many problems. For one thing, U.S. and IMF economic aid should be conditioned on the opening up of Manila's government-controlled economy to more market competition.

But the unhappy truth is that the communists now have become a great enough threat that a strong military response is essential. The Communist New People's Army has grown dramatically in the past year. It now deploys up to 12,000 armed guerrillas (in a country of 52 million), operating in most provinces. Many rural neighborhoods and parts of one major city, Davao, are now run by the NPA. And these aren't just agrarian reformers: They kill people. Just last Sunday, NPA gunmen murdered officials in one rural town, then interrupted a Mass to warn everyone else. U.S. intelligence now estimates that without an effective military response, the NPA could be strong enough to take power within five years. This would be a disaster for Filipinos, but it would also be a disaster for U.S. interests in what has, since the Vietnam War, been a mostly stable, prospering Southeast Asia.

It's true that U.S. military aid has been abused in the past. It's also true that the Philippine military has often proved to be undisciplined and corrupt. But that has at least begun to change under Fidel Ramos, a West Point grad who has replaced a longtime Marcos crony as Philippine chief of staff. Further change is far more likely to result from sustained U.S. aid and quiet pressure rather than from public carping and penny-pinching messages.

The Philippines doesn't yet face the unhappy choice of communist revolution or continued authoritarianism. Moderate Filipinos in business, the Roman Catholic Church and politics have steadily pressured Mr. Marcos to open up the system; they've had some, though far from total, success. Their goal is a post-Marcos transition that follows the example of Spain after Francisco Franco. But democracy won't have any chance if the communists are able to terrorize and sabotage at will. If that happens, Manila's precedent might be Nicaragua after Anastasio Somoza, when the Sandinistas—the only organized opposition, just like the NPA—took over.

Tip O'Neill and the full House ought to think about that before they agree to Mr. Solarz's message.

MARX'S HEIRS BELIE THE PACIFIST PROMISE

(By James L. Payne)

When Lenin declared that under socialism "disarmament will be achieved," he was merely repeating what had been an article of faith on the left for generations. The West, the argument ran, wanted armies to carry out imperialism abroad and to suppress the working class at home. Once workers gained control of the government, they wouldn't want to suppress themselves, nor would they carry out aggression against other countries. Armies would therefore become unnecessary.

That was the theory. The reality turns out to be a tragic inversion of the Marxist promise. Far from being champions of disar-

mament, Marxist regimes are consistently more militaristic than other countries.

Until recently, it was difficult to document this pattern because Marxism was mainly confined to the Soviet Union and its Eastern European satellites, a restricted sample. Today, the number of countries adhering to Marxist-Leninism has grown to 34, spanning many different cultures and levels of development. Consequently, the effect of Marxism on military forces can now be assessed with confidence.

A nation's commitment to military power can best be measured by its "force ratio," the number of full-time regular military personnel per 1,000 population. These data are compiled yearly by the U.S. Arms Control and Disarmament Agency (as well as by the British Institute for Strategic Studies, whose figures are quite similar).

THE PATTERN HOLDS

Overall, the numbers show that Marxist regimes have armed forces over twice as large as those of non-Marxist countries. The 32 Marxist countries for which data are available have an average force ratio of 13.3; for the 109 non-Marxist regimes, the average is 6.1.

This general pattern is repeated in more specific comparisons. Marxist North Korea has a force ratio of 38, While non-Marxist South Korea's is 14.7; Marxist South Yemen's is 12.5, non-Marxist North Yemen's is 3.9; Marxist East Germany is at 14, non-Marxist West Germany has only a 7.8. The eight Marxist European countries have an average force ratio of 13.8; the 17 non-Marxist European countries have an average of 7.6. The pattern holds for the superpowers: The Soviet Union has a force ratio of 16.3; the U.S., 9.1.

The Marxist regimes continue to stand out as more militaristic if other conditions affecting force ratios are held constant. For example, poor countries tend to have lower force ratios than richer ones (which can afford relatively larger armies). For this reason, African countries have lower force ratios than, say, European countries. But within this group, the effect of Marxism is still noticeable. The nine Marxist African countries have an average force ratio of 5.9; the 31 non-Marxist African countries have an average of 2.1.

Another way to measure the effect of Marxism is to see what happens to the size of the armed forces after Marxists come to power. For the 10 countries where this type of comparison is possible, the average increase in the force ratio under Marxism has been 282 percent. Ethiopia is a poignant case of a recent transition to Marxist rule. In 1973, the last year of non-Marxist rule, the force ratio was 1.8; under Marxism it has increased 355 percent, to 8.2.

Explaining why Marxists are so keen on military forces turns out to be more difficult than one would at first suppose. The usual theories seem inadequate to explain the breadth of the pattern. For example, Marxist sympathizers say that Marxist regimes need large militry forces to defend themselves against "capitalist counterrevolution" by the U.S. and its allies. This would be said to explain the high force ratios of Cuba (23.5) and Nicaragua (27.8).

But even if one assumes that these countries are "threatened," their military forces are still abnormally large. Many countries threatened by the Soviet Union and its satellites have moderate force ratios, including Norway (9), West Germany (7.8) and Pakistan (5.2).

Another weakness of this theory is that Marxist countries not plausibly threatened by Western attack still have high force ratios. They include Mongolia (21.2), Albania (19.3), Romania (10.5), Yugoslavia (10.9), Bulgaria (19.7), an Laos (15.8).

A different argument contends that Marxist regimes have large armed forces because they plan to attack, or are attacking, their neighbors. This theory would apply quite broadly, as most Marxist countries have been aggressive. But not all. Marxist Mongolia, sandwiched between the Soviet Union and China, and thousands of miles from the nearest non-Marxist country, is necessarily nonaggressive on the world scene. Yet its force ratio is an extremely high 21.2. Three other Marxist countries that on account of their location and alignment have not been aggressive but that have elevated force ratios are Poland (11.9), Romania and Yugoslavia.

Another weakness in the aggressiveness theory is that it assumes that aggressive countries always have high force ratios, and this is by no means the case. The non-Marxist military dictatorship in Argentina was clearly the aggressor in the 1982 Falklands War (and almost went to war with Chile in a dispute over the Beagle Islands). Yet its force ratio was a mere 6, about one-quarter Cuba's. Guatemala, which has mobilized twice since 1972 to back up its territorial demands for neighboring Belize, has a force ratio of 2.3. An aggressive orientation, then will not entirely account for the endemic militarism of Marxist countries. Aggressive non-Marxist countries don't have such consistently high ratios.

Another hypothesis to explain the large armies of Marxist countries is that they need these forces to quell domestic dissent. This theory is easily rejected. Domestic repression is severe in Marxist countries, but the regular armed forces are seldom needed to carry it out. The police, secret police and party bureaucracy nip opposition in the bud, so violent dissent requiring military suppression is rare. It is in the non-Marxist regimes, where more freedom is allowed, that collective violence—unruly street demonstrations, terrorist gangs, guerrilla movements—is more common.

Even where such violence occurs, it appears to have little effect on the size of the regular armed forces in any case. Countries facing severe terrorist or guerrilla problems do not have unusually large armed forces. These include Colombia (2.6), the Philippines (3), Srik Lanka (1.2), and, of course, El Salvador (5.4).

South Africa is another interesting case. Many would suppose that that country would need a huge army to restrain the violent opposition of members of the black majority. As it happens, South Africa has a force of 2.3, less than one-tenth that of Cuba. South Africa is larger than Yugoslavia or North Korea, yet its 70,000 man armed forces are less than one-third Yugoslavia's force of 247,000 and less than one-tenth North Korea's force of 710,000.

If the usual explanations don't fit, why, then, do Marxist regimes pursue military might? Apparently, it is an expression of their basic character, not a response to a particular foreign or domestic policy aim. One almost has to suppose that if a Marxist regime came to power on Mars, with nothing to conquer and nothing to defend against, it would still have an army twice as large as that of a comparable non-Marxist country here on Earth. The ruling parties in Marxist regimes reach for military power to validate their ideological view of a world locked in perpetual struggle. They have, as Henry Kissinger put it, "a vested interest in tension."

EXAMPLES CLOSE TO HOME

This point is strangely ignored by those groups in the West that are such outspoken critics of military forces. Logically, pacifists should be consistent opponents of Marxism, since Marxism is the harbinger of militarism in the world today. But, oddly enough, the same groups that deplore arms races tend to favor, or are neutral about, efforts to implant Marxist dictatorships around the world.

Take the case of El Salvador. Most peace activists, both in the U.S. and in Europe, view a possible Marxist victory there with approval. But if the Marxists take control, the one thing we can be sure of is that the military forces of El Salvador will more than double. Examples close to home indicate the increase could be staggering. In Cuba, the transition to Marxism has seen a 12-fold increase in the size of the armed forces, from 19,000 under Batista to 230,000. The same 12-fold increase has taken place in Nicaragua, from 6,000 under Somoza to 75,000. These are numbers that the foes of militarism ought to ponder in evaluating U.S. policy toward Central America.●

PHASE OUT THE CONTRAS; LEAVE PEACE TO CONTADORA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, recently Mr. Robert Pastor, a professor at the University of Maryland and a former National Security Council official, published an article that I think my colleagues will find useful as we approach a vote on the question of U.S. support for the Contras in Nicaragua.

Mr. Pastor makes several good points in his article. He points out that "sympathy for the Sandinista has disappeared," but that nevertheless, "the strong sentiment in Congress is that the Contra Program is the wrong approach." He notes that "the Contra strategy is counterproductive" because "it will not dislodge the Sandinistas, and it will leave them more hostile to U.S. interests than before."

"By directly confronting a small, beleaguered country," Mr. Pastor points out, "the Reagan administration has made the Sandinistas look heroic and the United States foolish." Also, the administration's "support for the Contras has all but undermined the efforts of Latin Americans to reach a guaranteeable settlement."

Mr. Pastor, points us toward a solution: "The objective should be to phase out support for the Contras in a manner providing leverage for the Contadora countries to construct a peace that they are committed to making work." I hope my colleagues will carefully consider Mr. Pastor's ideas.

PHASE OUT SUPPORT OF CONTRAS; LEAVE PEACE TO CONTADORA

(By Robert Pastor)

President Reagan has left no doubt of his intention to continue supporting the contras, who seek to overthrow the Nicaraguan government. Can the president persuade Congress to support his program? Can it succeed?

Though sympathy for the Sandinistas has disappeared, the strong sentiment in Congress is that the contra program is the wrong approach. To win approval of the aid, Reagan would have to apply enormous pressure and use Neanderthal Red-baiting tactics, portraying his opponents as Communist dupes or dopes. Even then he would be unlikely to win. But he has other options.

It is estimated that Congress provided $80 million for the contras between 1981 and mid-1984, when it halted covert support. Since then the contras reportedly have received funds from private sources in the United States and from the governments of El Salvador, Honduras and Israel—which happen to be among the most dependent on U.S. aid in the world.

The contras are also said to benefit from food, weapons and equipment left behind by U.S. servicemen after maneuvers in Honduras. Contra leaders also have talked about floating bonds or tax-sheltered limited partnerships as additional ways to raise money in the United States.

Congress has shown little disposition thus far to investigate how these funding maneuvers square with international law, or Congress' own prohibition on aid, or the Neutrality Act, which prohibits private support for groups seeking to overthrow governments—the contras' stated aim. Nor does the Department of Justice seem interested in whether these various actions might set precedents that could be used at a future time by U.S.-based groups supporting leftist guerrillas.

David Durenberger, new chairman of the Senate Intelligence Committee, has suggested that the administration unite the various rebel groups and provide aid openly. But unity is proving elusive, and Congress is unlikely to approve overt aid, which would be tantamount to a declaration of war.

It is paradoxical, but apparently true, that the administration strategy so far has been both effective and counterproductive; effective in encouraging negotiating flexibility by the Sandinistas, but counterproductive in giving them a just cause to mobilize support for the revolution.

Yet the administration is uninterested in negotiations, as confirmed by its walkout in January. Many in the administration, including the president, believe that the Sandinistas could not be trusted to fulfill an agreement; therefore they see no point in negotiating, except to deflect criticism.

Thus the net assessment is that the contra strategy is counter-productive. It will not dislodge the Sandinistas, and it will leave them more hostile to U.S. interests than before.

The administration's objective is clearer now: to delegitimize the Sandinistas and encourage the remaining moderate leaders in Nicaragua to leave and transfer their legitimacy and support to the contras. The administration hopes that the middle eventually will disappear, along with international support for the Sandinistas, enabling the contras to either divide or conquer the revolutionary regime.

Contrary to Reagan's argument, support for the contras is not consistent with the charters of the Organization of American States or the United Nations. Both organizations have mechanisms for responding to intervention or subversion, but these have been ignored.

The United States and its Central American friends do not have to stop all the weapons flowing out of Nicaragua; all they need do is to produce evidence that the flow occurs. With such proof, Central America and the Contadora countries (Venezuela, Mexico, Colombia and Panama) could go to the OAS for collective action or sanctions.

This is the most effective source of leverage over the Nicaraguans, since they have no desire to replicate Cuba's isolation from the hemisphere; nor could the Sandinistas cope with collective OAS action.

By directly confronting a small, beleaguered country, the Reagan administration has made the Sandinistas look heroic and the United States foolish.

And by suggesting that the only security interests that matter in the region are those of the United States, the administration is arrogantly dismissing the United States' neighbors by suggesting that they do not know what is best for their own security interests—or, worse, that their interests are irrelevant. That is the fatal flaw in the administration's approach. Its support of the contras has all but undermined the efforts of Latin Americans to reach a guaranteeable settlement.

In time the Sandinistas may become as hideous as Reagan thinks they are. This is not inevitable, but the logic of U.S. policy and its interaction with the Sandinistas may make it so. At work is a self-fulfilling process whereby hard-liners in both the United States and Nicaragua repeatedly confirm one another's worst suspicions, the result is increasing belligerence and polarization and the destruction of a moderate alternative.

Eventually the Contadora countries will recede in frustration and resentment, perhaps rage. And the United States will face a choice of abandoning its security interests or giving the contras direct help to win. Unless one believes that the contras have the ability to overthrow the Sandinistas, covert support is not an alternative to military intervention; it is an avenue toward intervention.

The time to change direction is now. The president ought to listen to Congress and forge a genuine bipartisan approach. The objective should be to phase out support for the contras in a manner providing leverage for the Contadora countries to construct a peace that they are committed to making work. The U.S. choice may be between a negotiated settlement today and military intervention tomorrow.●

FREE ENTERPRISE WEEK CONTEST GRAND PRIZEWINNER

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MOORE. Mr. Speaker, 8 years ago I initiated free enterprise week in my congressional district as a broad educational effort on the mechanics and values of free enterprise. In each of the past 8 years Louisiana students have written essays on our State's commercial activities to be judged during free enterprise week. This year over 80 entries were received from nine parishes. I am pleased to announce to my colleagues that Brent James Hedges of Plaquemine, LA, has been chosen as the grand prizewinner of the 1985 essay contest. He is a student at Plaquemine Senior High School and chose to write his winning essay on the utilization of computer technology in petrochemical and hospital applications. I congratulate Brent Hedges on his achievement and invite my colleagues to read this essay which follows:

THE IMPACT OF THE COMPUTER ON BUSINESS IN LOUISIANA

To show the impact of the computer on business in Louisiana, let us examine the recent trends in Louisiana's petrochemcial and hospital industries.

"Louisiana's petrochemical industry has been slowed by the worldwide recession, and some people close to the industry predict it will never regain the vigor it once had." The preceding statement, taken from an article that appeared in the Baton Rouge *Morning Advocate* on January 23, 1983, paints a bleak picture for the future of the industry that provides the base for Louisiana's economy. The reason for such a pessimistic forecast is twofold—rising energy costs and increased foreign competition.

As Louisiana's chemical plant managers have attempted to absorb additional operations costs by developing new techniques to increase efficiency and productivity without jeopardizing their plants' abilities to compete with plants in foreign countries, the computer has become an effective weapon in their struggle to remain in business. In contrast to the petrochemical industry, in recent years Louisiana's hospital industry has been experiencing a period of prosperity, which is indicated by the expansion of existing hospitals and the construction of new medical facilities across the state. Once again the computer, with its many efficient applications, is a major contributor to this boom; for when they are asked to name the most beneficial investment that their hospitals have made, many hospital administrators feel that their computer system is priceless.(3) The computer, therefore, has had a tremendous impact on the petrochemical and hospital industries in Louisiana, an impact that affects the employment and health care of many citizens of Louisiana.

Before Louisiana's chemical plants can yield their products, oil companies must find and recover petroleum. Geologists and computer personnel have developed special computer programs that analyze collected data to determine the probable locations for petroleum deposits. Once the computer specifies a likely location, the computer programmer continues to input data to determine the best drilling site and best equipment to use. The computer then estimates the cost of recovering that particular petroleum deposit. After the drilling begins, management ensures the efficient use of the equipment by utilizing computers to monitor bit and mud temperature and pressure and other factors that are involved in the recovery process.

Once an oil company strikes petroleum, the oil is usually sent to a refinery to be processed or to a chemical plant to be used in the production of petrochemical products. Because both of these options require

many complex chemical reactions to occur at many different temperatures and pressures, many Louisiana plants have computer systems that control and monitor these processes. Plant personnel have installed special temperature and pressure gauges on pipes and in stacks that convert actual temperature and pressure to a digital form that computers can read. Consequently, the use of the computer in plants increases efficiency and productivity, but reduces the number of operations personnel.

Not only have computers had a tremendous impact upon the operations departments of Louisiana's chemical plants, but they also have had a significant impact upon their administrative departments. Computers now perform the manual accounting practices that are conducive to human error—journalizing, posting, computing payroll, taking inventory, etc. Using the computer in this manner results in greater efficiency, for computers allow plant employees in administrative departments to complete their work quickly and accurately. Similarly, owning a computer has proved to be a wise investment for those businesses that provide construction and maintenance services to Louisiana's chemical plants. With the slowing of the petrochemical industry in recent years come less expansion of existing chemical facilities and only a small amount of new plant construction. The companies that specialize in industrial construction and maintenance must be capable of competing for the fewer number of jobs that plants offer; therefore, many businesses have discovered that using computers for accounting, inventory, and scheduling purposes assures their ability to compete with their rivals.

Unlike the petrochemical industry, Louisiana's hospital industry has not had to weather the hardships experienced by so many of Louisiana's chemical plants in recent years. Expansion and new construction of hospitals have been occurring across the state as computers have entered into the world of medicine. Record keeping, diagnosis, and patient monitoring are three areas of medical care in which Louisiana hospitals have experimented with computers.(5)

In some large hospitals, computerized record keeping is more than just bookkeeping and bill preparation. It includes keeping track of bed assignments and printing at appropriate times what specific medicne and/or meals each patient must have.(5) In these ways an up-to-date total of hospital stay costs is always available for every patient. Furthermore, some doctors use computers for laboratory analysis. After a doctor obtains a blood or urine sample from a patient, he can send it to a laboratory where a computerized apparatus analyzes it and prints out the results on which the doctor can base his diagnosis. Some hospitals in Louisiana use computers to find volunteer blood donors. (5) By inputting the name, address, phone number, blood type, and a brief medical history for each volunteer donor into a computer, when an emergency arises and the patient needs a rare blood type, the computer can search its memory and print a list of all possible donors.

To those patients who require twenty-four-hour monitoring, computers are extremely important. Computerized observation of pulse rate, breathing, brain-wave activity, blood pressure, and other functions has become more common in many Louisiana hopsitals.(5) Patients are fitted with special converters that permit a computer to read and store information concerning certain bodily functions. If a discrepancy arises between a patient's vital signs reading and the proper levels with which the computer has been programmed, the computer sounds an alarm and nurses and/or doctors can immediately treat that patient. Consequently, these computer methods, without reducing the level of care, decrease the workload of nurses and their aides.

In summary, by considering the powerful impact of computers on Louisiana's ailing petrochemical industry and prospering hospital industry, one can gather that computers have allowed many chemical plants and companies that service these plants to remain in business and have been one of the factors for the recent improvements in the medical care industry. By no means are these the only industries in Louisiana that computers have affected, for computers have saved and increased the efficiency and productivity of many businesses in other industries as well. Since the petrochemical industry, however, is the base for Louisiana's economy and the hospital industry provides necessary health care services to so many Louisianians, computers have preserved one industry that employs thousands of workers and assisted another industry that saves thousands of lives each year—two industries that many Louisiana citizens depend upon for their livelihoods and their lives.

LEAH TAYLOR, HOOSIER VOD CHAMPION

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. COATS. Mr. Speaker, I would like to take this opportunity to commend Leah Taylor of New Haven, IN, on her selection as the Hoosier representative to the Veterans of Foreign Wars' "Voice of Democracy" contest.

The VFW and its over 2 million members nationwide sponsor this competition every year. Participating high school students prepare a short speech in order to better understand the concepts of freedom and democracy upon which our Nation was built, with national finalists receiving scholarships.

I laud the group, its membership nationwide, and especially the 300,000 students who took part in the contest for their involvement in this worthwhile project.

This year, participants spoke on the theme "My Pledge to America." I was impressed with Leah's remarks, for they focused largely on the often-neglected duties which we all have as Americans. Particularly insightful was her recognition of the place of parents in our society and the special role which they play in our development as a nation. We should all remember this perspective as we work to strengthen America's families.

I am proud to have Leah as one of my constituents and as the representative of the State of Indiana in the competition, and I am inserting a copy of her excellent speech in the RECORD to share with my colleagues.

MY PLEDGE TO AMERICA

(By Leah Taylor)

The hope of the desperate. The home of the determined. The Pilgrims and Revolutionists fought to live in it. The "Boat People" see it as their light at the end of a very dark tunnel. Because of the work, pain, and even deaths of our forefathers, I live in it: The United States of America, a free country, a nation that promises me life, liberty, and the pursuit of happiness. In return, I want to pledge my allegiance to it, my home and protector.

Allegiance. The dictionary informed me that allegiance is loyalty to one's country. I believe pledging my allegiance to America, goes even deeper than just being loyal. It involves supporting America, having pride in my heritage, and desiring this nation's well-being.

Support. I pledge my support and assistance to America. There are many ways to support one's country. Four of these, which I believe are the most important, are paying one's taxes, parenting and caring for one's children, caring about others and, individually, doing the best one can do, whether it be at work or in one's personal life.

Paying one's taxes is probably the most obvious means of supporting America, although not always the most enjoyable. But if we, as Americans, fail to pay our taxes, we would be destroying our government, including benefits such as schools, firefighters, officials to enforce the law, and a defense system to keep our freedom. Without those benefits America could quickly lose some of the freedom and tranquility that we enjoy more than any other nation. When it is my turn to pay taxes, even though I might dislike having to give away money, I know I would much rather have the American privileges I enjoy now than just my personal gain.

Another way to strengthen America is almost overlooked; the role of parents. Their job is the most important because the children for whom they care and whom they teach will be the new generation, and that generation will keep America strong. As my parents instilled in me pride and love of America, I will try to bring up my children in the same way and teach them to cherish God, America, and other people.

Loving others and helping them also helps our nation. Volunteers all over the country have helped other people in need. Foster

parents, charity organizers and sponsors, half-way houses, and responsible and considerate neighbors are only a few of the examples of love shown by Americans. The United States is not just the government or the land, but it is the people. So, I believe helping others is a major part of supporting America.

Anyone, whether he be a doctor, clerk or student, can strengthen America by doing his job to the best of his abilities. Hard working colonists were the ones who succeeded in starting America and hard work is still needed to keep America strong. It starts with the individual and that includes me, so I try to use the ability God gave me so that I benefit not only myself but this great country, too. If everyone is the best he can be, America is the strongest it can be.

Supporting America also means wanting the best for it. Since I believe all good things come from God, I pray for His blessing and protection. As our paper money states: "In God We Trust", I try to remember America every night in my prayers and I hope other Americans do the same.

Another part of fulfilling one's pledge of allegiance to America is to care about its well-being. Voting is one way of accomplishing this. Another way is to be concerned about the different social and political matters that could be detrimental or helpful to America. Even though I don't always understand these matters, I try, which is every American's duty.

The final and probably easiest way of showing one's allegiance to America is by being proud of it. I am proud of America. Therefore, I take care of it, appreciate its resources and love it. I believe my pride in this country is shown by my behavior and cooperation, so I try to obey the law and act with responsibility.

America is my past and present. God willing, it will also be my future. Because I love America, I pledge my support of it, my pride in it, and my desire for its well-being. I wouldn't want to live any place else. "God bless America, my home sweet home".●

MAINTAIN U.S. AFRICAN INVESTMENTS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LAGOMARSINO. Mr. Speaker, the following editorial from the Oxnard Press-Courier—Saturday, March 2, 1985—entitled, "Maintain U.S. African Investments," I believe accurately explains how economic disinvestment by the United States in South Africa is not going to assist us in reforming apartheid, nor is it supported by a large portion of that country's black majority population, and I am pleased to bring it to the attention of my colleagues.

[From the Press-Courier, Mar. 2, 1985]

MAINTAIN U.S. AFRICAN INVESTMENTS

A contingent of liberals in this country believe that punishing South Africa with economic sanctions is the best way to reform the white-minority government's egregious policy of racial discrimination. These punitive measures, however, are opposed by numerous South African blacks, including Chief Gatsha Buthelezi, the 56-year-old leader of the nation's 6-million-member Zulu tribe.

Chief Buthelezi urges American businessmen to continue to invest in his country, and he argues that economic sanctions would worsen the plight of millions of the country's blacks and "condemn a whole new generation to living in appalling slum conditions."

Although he doesn't speak for all blacks in South Africa, the chief nonetheless expresses the feelings of many of his countrymen who have jobs and enjoy an improved standard of living because of American investment.

At present, U.S. firms employ approximately 100,000 South Africans. Most of these firms, moreover, adhere to the Sullivan Principles, a voluntary code of corporate conduct for American companies in that country.

The Sullivan purpose is to channel corporate resources into activities designed to promote social and economic improvements for South Africa's non-white population. To date, American firms have spent more than $100 million in pursuit of the principles' goals, which include equal pay and fair-employment practices for all employees, training programs to prepare blacks, coloreds and Asians for administrative and technical positions and improved housing, transportation, schooling, recreation and health facilities for employees and their families.

By maintaining commercial ties with South Africa, the United States is able to exert a moderating influence. Recent proof of this is to be found in President P.W. Botha's willingness to give the country's black population basic political and property rights.

Disinvestment, however, would disrupt this evolutionary process and harden the determination of the South African government to continue excluding blacks from full citizenship.

Chief Buthelezi concludes as much when he calls for a toughening of the Sullivan Principles so that all U.S. firms would be obliged to treat black and white workers equally. His prudent advise surely is preferable to economic sanctions that would prevent American businesses from playing a positive role in South Africa, and, ultimately, punish the black population all the more.●

PUT CENTRAL AMERICA IN PERSPECTIVE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, the March 11 issue of Business Week magazine—hardly a radical publication—carried an editorial on Nicaragua that makes a lot of sense. The editorial states the issue succinctly in its first three sentences:

By declaring that his goal is to "remove" the "present structure" of the Sandinista regime, President Reagan has stripped the camouflage from U.S. support for the Contra guerrillas in Nicaragua. A vote to renew "covert" aid to the Contras, frozen by Congress last fall, would now amount to approval of a U.S. commitment to overthrow the Nicaraguan government. Congress properly is unlikely to vote such an approval.

As Washington Post writer Lou Cannon has recently written,

It is difficult to comprehend how anyone opposed to this aid, on strategic or moral grounds, could rationalize voting for it just because Reagan has renamed his request "the Central American peace plan."

I agree with that, and am confident that the House will once again vote against this aid, as it has four times before.

Business Week is absolutely right when it says, in its editorial, that there is a better way:

To get U.S. policy on Central America back on a sensible track, the Administration must regain a sense of proportion between U.S. goals and the means of achieving them. Nicaragua is a small, poor country that on its own cannot pose a threat to the U.S. nor even—if the U.S. works diligently to achieve a political settlement in the region—to its small, poor neighbors. * * * The U.S. can use its power and influence in the region more effectively by making a long-term commitment to peace and stability rather than simply supporting the Contras.

There is more wisdom in this brief editorial than there is in all the volumes of propaganda coming out of the White House. I hope my colleagues will give the editorial their careful attention.

[From Business Week, Mar. 11, 1985]

PUT CENTRAL AMERICA IN PERSPECTIVE

By declaring that his goal is to "remove" the "present structures" of the Sandinista regime. President Reagan has stripped the camouflage from U.S. support for the contra guerrillas in Nicaragua. A vote to renew "covert" aid to the contras, frozen by Congress last fall, would now amount to approval of a U.S. commitment to overthrow the Nicaraguan government. Congress properly is unlikely to vote such an approval. It certainly should reject open aid to the contras as equivalent to a declaration of war against Managua.

In the Administration's view, Nicaragua is a Soviet outpost. Secretary of State George P. Shultz asserts that the country is slipping "behind the Iron Curtain." He even suggests that it is covered by the Brezhnev Doctrine, which ties Eastern Europe to Big Brother in the Kremlin.

Such rhetoric lacks perspective. Obviously, the Soviet Union cannot send the Red Army to Central America, as it can to Eastern Europe, to erect an Iron Curtain around a satellite or enforce the Brezhnev Doctrine. Nor will Moscow risk another Cuban-style missile confrontation over Nicaragua.

To get U.S. Policy on Central America back on a sensible track, the Administration must regain a sense of proportion between U.S. goals and the means of achieving them. Nicaragua is a small, poor country that on its own cannot pose a threat to the U.S. nor even—if the U.S. works diligently to achieve a political settlement in the region—to its small, poor neighbors. The Sandinista leaders know that if Nicaragua acquired offense weapons, such as Soviet MiGs, Congress would support decisive U.S. action to neutralize them.

The U.S. can use its power and influence in the region more effectively by making a long-term commitment to peace and stabili-

ty rather than simply supporting the contras. Nicaraguan President Daniel Ortega's invitation to congressional leaders to visit Nicaragua offers the opportunity for a fresh start. But the U.S. should not take on the burden of serving as yanqui enforcer in Central America. Countries with a stake in the area are eager to play a role. The U.S. should enlist their help. Such an approach would be far more cost effective, politically and financially, than contra ventures—and far less divisive at home and in the hemisphere.●

GOOD SAMARITAN ASSISTANCE ACT

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SCHUMER. Mr. Speaker, on Sunday, June 22, 1980, James McDaniel and his wife arrived at the First Baptist Church in Daingerfield, TX, and sat near the back, as they usually did. The congregation was in the middle of the offertory song when a man burst in, screaming "This is war," and started firing into the crowd. Mrs. McDaniel and others in the crowd were struck. Her husband jumped out of his seat and wrestled the assailant out of the church into the street. The gunman continued to shoot, firing bullets into Mr. McDaniel. The gunman was subdued, Mr. McDaniel died on the steps of the church.

We have all heard the tales of victims who suffered at the hands of criminals while onlookers did nothing. But the brave acts of those who, like Mr. McDaniel, did do something have received little attention and little compensation. Today, I am introducing the Good Samaritan Assistance Act of 1985, which will provide matching grants to the States for programs that reward citizens who intervene in an attempt to prevent a crime or apprehend a criminal. The bill will encourage States to reward these deserving individuals and, at the same time, will educate the public that one can do something to help another who is being victimized.

These grants will not contribute a penny to the Federal deficit, because they will be financed by the trust fund set up under the Victims of Crime Assistance Act of 1984. The trust fund receives its moneys solely from fines imposed on criminals. This mechanism provides the perfect way to make criminals foot the bill for both those who seek to apprehend them and those they have victimized.

In addition, States will only receive 35-percent funding for the programs, so the chief financial responsibility will continue to rest with those who have the chief enforcement responsibility for most crimes. Forcing States to bear the lion's share of the cost of the reward programs will ensure that the programs are administered efficiently and that Federal money is not wasted.

In the past few years, we have seen a shift in public attention from criminals to crime fighters and crime victims. One result of the shift has been increased support for community self-help efforts to fight crime. These efforts have contributed to a 2-percent decline in the number of households affected by crimes of violence or theft. Nonetheless, in 1983, 37 million individuals were victims of serious crime. Obviously more remains to be done.

The Good Samaritan Assistance Act will further citizen crime-control efforts by promoting the recognition and reward of citizens who intervene to stop a crime. I urge my colleagues to join me in support of this effort to promote the spirit of mutual responsibility and thus make our neighborhoods more secure and more pleasant.

I ask unanimous consent that the text of the bill be printed in the RECORD.

H.R. 2130

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Good Samaritan Assistance Act of 1985".

SEC. 2. GOOD SAMARITAN REWARDS.

The Victims of Crime Act of 1984 is amended by inserting after section 1403 the following new section:

"GOOD SAMARITAN REWARDS

"SEC. 1403A. (a) ANNUAL GRANTS.—(1) Subject to the availability of money in the Fund, the Attorney General shall make an annual grant from any portion of the Fund, not used for grants under section 1403 or 1404, with respect to a particular fiscal year to an eligible good samaritan reward program of 35 percent of the amounts awarded during the preceding fiscal year, other than amounts awarded for property damage. If such program did not exist during the entire preceding fiscal year, such grant shall be in an amount equal to 35 percent of the amounts projected to be awarded during the current fiscal year. A grant under this section shall be used by such program only for rewards.

"(2) If the sums available in the Fund for grants under this section are insufficient to provide grants of 35 percent as provided in paragraph (1), the Attorney General shall make, from the sums available, a grant to each eligible good samaritan reward program so that each such program receives the same percentage of amounts awarded by such program during the preceding fiscal year, other than amounts awarded for property damage.

"(b) ELIGIBILITY.—A good samaritan reward program is an eligible good samaritan reward program for the purposes of this section if—

"(1) such program is operated by a State and offers rewards to good samaritans and survivors of good samaritans;

"(2) such State certifies that grants under this section will not be used to supplant State funds otherwise available to provide good samaritan rewards;

"(3) such program meets, with respect to rewards to good samaritans, the same requirements as are imposed under paragraphs (4) and (5) of section 1403(b) with respect to compensation to victims of crime; and

"(4) such program is not an entitlement program.

"(c) DEFINITIONS.—As used in this section—

"(1) the terms 'property damage', and 'State' have the meanings given those terms, respectively, in section 1403(d); and

"(2) the term 'good samaritan' means, to the extent provided under the eligible good samaritan reward program, an individual who acted voluntarily and nonnegligently—

"(A) to prevent the commission of a criminal offense, or to prevent what the individual reasonably believes is the commission of a criminal offense;

"(B) to apprehend a person who commits a criminal offense, or to apprehend a person who the individual reasonably believes is committing a criminal offense;

"(C) to preserve the public peace; or

"(D) to prevent a public disturbance;

but such term does not include any individual performing official police or military duty or any child determined by the eligible good samaritan reward program to be too young to understand the risks of such child's conduct.".

SEC. 3. CONFORMING AMENDMENT.

Section 1404(a)(1) of the Victims of Crime Act of 1984 is amended by inserting "or 1403A" after "1403".

SEC. 4. MODIFICATION OF FUND ALLOCATION.

Section 1402(d)(2) of Victims of Crime Act of 1984 is amended—

(1) by striking out "Fifty" and inserting "45" in lieu thereof;

(2) by striking out "fifty" and inserting "45" in lieu thereof; and

(3) by adding at the end the following new sentence: "10 percent of such total shall be available for grants under section 1403A."●

BAN ON CHEMICAL WEAPONS PRODUCTION

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. UDALL. Mr. Speaker, I am joining today with 49 other colleagues in the introduction of legislation to stop funding for the production of new binary nerve gas weapons. For the past 3 years this body has rejected the President's request for chemical weapons production by margins of nearly 100 votes or more. It is my hope and expectation that we will do so again this year.

There are, I believe, sound policy reasons for rejecting the President's request. First, there is no immediate need for new chemical weapons. The President's own bipartisan commission found that the existing stockpile is adequate until the mid-1990's, a conclusion also reached by Secretary Weinberger.

Second, there are continuing doubts about the reliability and survivability of the weapons used to deliver the binary chemical agents. The "Bigeye"

bomb would be highly vulnerable in actual combat conditions; unlike our existing rocketed launched weapons, the Bigeye must be delivered upwind of its target by an airplane.

Third, our allies are unwilling at this point to allow us to preposition new, binary nerve gas weapons in Europe. U.S. efforts to deploy such weapons, in fact, could lead to a major split in NATO.

Beyond these purely policy considerations, there are the budgetary ones. The administration wants to spend $174 million in fiscal year 1986 and $2.3 billion over the next 5 years for chemical weapons production. Coming at a time of $200 billion deficits, we can hardly afford such a request. I think we have other needs, including defense needs, that deserve a higher priority in this year's budget.

I urge my colleagues to cosponsor our initiative and to reject the President's budget request.●

NATIONAL LIBRARY WEEK

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 17, 1985

● Mr. LANTOS. Mr. Speaker, I am delighted today to join in the celebrations marking National Library Week and pay tribute to the libraries of this Nation. From the Library of Congress here in Washington right across the country the United States can rightfully boast of the finest public library system anywhere in the world.

In particular, I would like to commend the outstanding libraries in San Mateo County, CA. The hard work of their dedicated staffs has resulted in libraries of the very highest quality, not only in the books provided but also in their support services.

As a former professor, I am particularly aware of the importance of libraries. Education is dependent on the availability of information and the exchange of ideas. Students of all ages—in nursery school or law school—rely upon libraries for information on every conceivable subject.

As a society we have become increasingly dependent upon knowledge and the dissemination of knowledge. Civilization and culture, science and economic progress would be impossible without our outstanding libraries.

Libraries also provide endless hours of pleasure and entertainment. Books are one of the real sources of enjoyment and recreation. Few of us possess all the books we would like—but a library makes them readily available at little or no charge.

Tragically, our libraries are under threat. The administration has not allocated any funds in the fiscal year 1986 budget for either the Library Services and Construction Act or for the funding of college and research libraries. If such a policy continues, it could place in jeopardy one of the most basic resources, not only of our educational system, but of our Nation.

The library is freely available to all regardless of income, race, or sex. It provides a universal source of information. To cut library funding will inevitably deprive those in our society who are least able to turn elsewhere. Mr. Speaker, while there is no question that we must work to reduce the soaring Federal budget deficit, we must also take steps to insure that our libraries continue to have the support essential for their continued growth and existence.

While National Library Week is a time for us to celebrate an outstanding system, we should not be complacent. Now is also the time for us to act in order to preserve our magnificent library system.●

TRIBUTE TO COMMANDER AL MILLER

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LAGOMARSINO. Mr. Speaker, I appreciate this opportunity to extend recognition to one of my constituents on the occasion of his retirement from the Ventura County Sheriff's Department.

Commander Miller is retiring after 32 years with the sheriff's department. He began his career in law enforcement in 1953 after having served in the U.S. Army during World War II and the Korean War.

In 1955, after working for 2 years as a jailer, Commander Miller was appointed as a deputy sheriff and was assigned to the patrol division. Over the next 10 years he earned a promotion to the rank of sergeant in 1957 and lieutenant in 1963.

In 1966 Commander Miller was elevated to the rank of captain and was responsible for supervising the patrol division. In 1970, he was promoted to inspector and was reassigned to head the sheriff's criminal division. Two years later he was advanced to the rank of chief deputy.

In 1976, the sheriff's department reorganized and Commander Miller assumed his present rank. For the past 8 years he has been responsible for the sheriff's support services division where he oversees the sheriff's business office, records, psychological services, research and planning, emergency services, personnel and training bureaus.

Commander Miller's accomplishments are numerous but among the most recent is his involvement in the revitalization of the office of emergency services. This office is responsible for developing disaster response plans and for disseminating disaster preparedness information to the public.

Commander Miller was also a member of the California National Guard and was called into service in 1965 during the Watts riots. As a result of his involvement he was awarded the California National Guard's Medal of Merit and was also commended for his actions by the mayor of the city of Inglewood. He retired from the Guard in 1967 with the rank of major.

I extend to Al and his wife Joyce my very best wishes as well as the best wishes of this body and offer our hopes for a long, enjoyable, and productive retirement.●

THE CONTRAS ARE HARDLY FREEDOM FIGHTERS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, the March 25 issue of the New Yorker, in its "Talk of the Town" section, carried an excellent commentary on President Reagan's scandalous statement that the Nicaraguan Contras "are the moral equal of our Founding Fathers." All Americans should be shocked that our President would compare people who rape, pillage, torture, and murder with George Washington, Thomas Jefferson, and the other heroes of the American revolution. As the commentary points out, "History is real; analogies have weight; statements have consequences." The President's statement poisons not only the prospects for peace in Central America, but also our own national dialog and our very image of ourselves and of our heritage. I urge my colleagues to consider this commentary with great care.

[From the New Yorker]

THE TALK OF THE TOWN—NOTES AND COMMENT

Several commentators in recent years have been struck by the extraordinary convergence of talent, grace, genius, and wisdom in the current generation contesting for legitimacy in Poland. How is it possible, these observers wonder, for a single generation in a relatively small, relatively isolated country in the middle of Eastern Europe to have produced such a host of great-souled men and women—Leach Walesa, Adam Michnick, Jacek Kuron, Karol Modzelewski, Karol Wojtyla, Jerzy Pepieluszko, Anna Walentynowicz, Alina Pienkowska, Andrzej Wajda, Krzysztof Zanussi, Czeslaw Milosz, Andrzej Gwiazda, Zbigniew Bujak, and on and on? At something of a conceptual loss before this historical mystery, the commentators occasionally have recourse to analogy, and one that frequently recurs in their writings is to the remarkable generation that arose in the British colonies in North

America during the seventeen-sixties, seventies, and eighties. There historians have long been confronted with that wondrous fluke, the manna descending, the sudden, unexplainable upwelling of greatness—Benjamin Franklin, Thomas Jefferson, Samuel Adams, Thomas Paine, George Washington, John Adams, Alexander Hamilton, James Madison, and on and on, all acting at the same moment in the same place. It is a useful analogy, and an appropriate one: it does honor to both sides of the equation. On the Polish side, we Americans are afforded a sense of what history must have felt like as it was unfolding for our own Founding Fathers; of what it must have been like to wake up each morning faced with impossible odds and hopeless choices and yet somehow summon the resolve to act and the composure to act sagely; of what the declaration of independence must have felt like before it became the Declaration of Independence, when the spirit was building but had yet to find expression, when expression had yet to coalesce into inevitability. Through the analogy to our Founding Fathers, Poles, for their part, can draw a lesson concerning the future consequences of present acts—how a noble project honestly conceived and earnestly carried through becomes a source, a wellspring, refreshing and sustaining generation after generation to come. These corollaries suggest what is at stake in historical analogy, and the sense of care and responsibility with which we must exercise our propensity for it. Not only must the two sides of the equation be worthy of each other but we must be worthy of them.

A few weeks ago, President Reagan, as part of his current siege of Congress on behalf of his Administration's Central America policy, tried his hand at historical analogy. He declared that the Contras, the fighting forces currently attempting to undermine the Sandinista regime in Nicaragua, "are the moral equal of our Founding Fathers." The analogy is a strange one: our Founding Fathers accomplished a revolution, whereas the Contras are by definition contrarrevolucionarios — counterrevolutionaries. The revolution they so vigorously oppose is one that overthrew a tyrant, Anastasio Somoza, who made George III seem positively small-time. Of course, President Reagan claims that the Contras were initially supporters of that revolution who subsequently found themselves co-opted by their onetime Sandinista allies, but the historical record offers precious little to sustain that characterization. (The commander of the principal Contra force, the man who set about organizing it immediately after Somoza's downfall and still commands it, is Enrique Bermudez, who was Somoza's miliary attaché in Washington; one of the few Contra leaders who might truly fit Reagan's definition of a disenchanted onetime revolutionary, Edén Pastora, will have nothing to do with most of the other Contra military groups, precisely because so many of their leaders were former officers in Somoza's National Guard, and as a result of this hesitancy Pastora's group was being frozen out of most American covert funding even when Congress was allowing the practice.) And even if Reagan's version of a co-opted revolution were historically accurate the analogy that might be drawn would be to the French Revolution, or the Russian—certainly not the American.

The problem, however, isn't just that the Founding Father analogy is specious; it's also pernicious. Within days of the President's statement, two reports were issued evaluating the behavior of Contra forces in the field. Americas Watch released a comparative study, "Violations of the Laws of War by Both Sides in Nicaragua, 1981–1985," that documented the behavior of both the Contra and the Sandinista forces. The report was careful and precise in tone; if anything, it was understated. Its authors concluded that whereas the Sandinista forces had committed "major abuses," particularly against the Miskito Indians on Nicaragua's Atlantic coast, during the first few years after the Revolution, "the evidence that we have gathered shows a sharp decline in violations of the laws of war by the Nicaraguan government following 1982." By contrast, Americas Watch reported, "The contra forces have systematically violated the applicable laws of war throughout the conflict. They have attacked civilians indiscriminately; they have tortured and mutilated prisoners; they have murdered those placed hors de combat by their wounds; they have taken hostages; and they have committed outrages against personal dignity."

In the past, State Department and White House spokesmen confronted with charges like these have dismissed them as being based on idiosyncratic cases, or else on hearsay. Partly in response to that type of defense, lawyers affiliated with the Washington Office on Latin America and the International Human Rights Law Group two weeks ago released the results of a series of studies undertaken during the past six months. To begin with, one lawyer went down to Nicaragua and compiled evidence relating to twenty-eight incidents of Contra violence aimed at civilians—"reliable evidence of a kind that would be legally sufficient in a court of law," his report specified. That is to say, he took sworn affidavits, based almost exclusively on eyewitness testimony, from over a hundred and forty persons; he challenged the witnesses with questions designed to confirm their personal knowledge of the events related ("Did you actually see that?" "What color were their uniforms?"). This testimony was transcribed; the transcripts were read back to the witnesses; and the witnesses signified their approval by signing them with their full names, their place of residence, and, in most cases, the names of their parents. Wherever possible, corroboration was sought. WOLA and the I.H.R.L.G. subsequently sent two other lawyers down to verify the accuracy of the affidavits. Following the report's release, several independent journalists in Nicaragua further confirmed the reliability of several of the accounts. The affidavits make for chilling reading.

Item: Noel Benavides Herradora, a coffee-picker, telling of his abduction by the Contras from a farm near the Honduran border, along with a married couple, prominent church leaders, in December, 1982: "Mr. Felipe Barreda and his wife were already there. He was bleeding heavily. He was being beaten and had blood all over him. [His wife] was also being beaten. They tied them. I was walking ahead, he was tied behind me, and she was tied further behind. He could hardly walk. He kept slipping and falling. And every time he fell they struck him and threatened to get rid of him right there so that he would stop being a burden. Then he would kneel and ask to be allowed to pray to Our Father. But they just beat him, kicked him, slapped him in the face, and cursed him." The Barredas were later tortured and killed.

Item: Doroteo Tinoco Valdivia, testifying about a large Contra attack in April, 1984, on his farming cooperative, near Yali, Jinotega: "They had already destroyed all that was the cooperative: a coffee-drying machine, the two dormitories for the coffee cutters, the electricity generators, seven cows, the plant, the food warehouse. There was one boy about fifteen years old, who was retarded and suffered from epilepsy. We had left him in the bomb shelter. When we returned. . . we saw . . . that they had cut his throat, then they cut open his stomach and left his intestines hanging out on the ground like a string."

Item: Inocente Peralta, a lay pastor who went out looking for victims of another attack on a Jinotega cooperative: "We found one of them, Juan Perez, assassinated in the mountains. They had tied his hands behind his back. They hung him on a wire fence. They opened up his throat and took out his tongue. Another bayonet had gone in through his stomach and come out his back. Finally, they cut off his testicles. It was horrible to see."

Item: Orlando Wayland, a Miskito teacher who was kidnapped by the Contras in December, 1983, and force-marched into Honduras, where he was tortured along with eight others: "In the evening they tied me up in the water from seven p.m. until one a.m. The next day, at seven a.m., they began to make me collect garbage in the creek in my underwear, with the cold. I was in the creek for four hours. . . . Then they threw me on the anthill. Tied up, they put me chest down on the anthill. The [red] ants bit my body. I squirmed to try to get them off my body, but there were too many. I was on the anthill ten minutes each day. . . . They would beat me from head to heels. . . . They would give me an injection to calm me a little. Then they would beat me again."

Item: Myrna Cunningham, a Miskito Indian doctor, describing what happened to her and to a nurse following their kidnapping by the Contras, in December, 1981: "During those hours we were raped for the first time. While they were raping us, they were chanting slogans like 'Christ yesterday, Christ today, Christ tomorrow. . . .' And although we would cry or shout, they would hit us, and put a knife or a gun to our head. This went on for almost two hours."

And so forth, for over a hundred and forty affidavits.

No one is claiming that every Contra soldier has behaved in this manner, but both of these recent reports have documented a pattern of activity—countenance for which, in the case of the assassination of civilians, was, in fact, spelled out in the belatedly disowned C.I.A. instruction manual.

And this brings us back to the President's analogy. Jefferson? Washington? Madison? How are the Contras the moral equal of our Founding Fathers? History is real; analogies have weight; statements have consequences. In days to come, when we find ourselves thinking of those men, the framers of our democracy, might we now find ourselves free-associating to images of torture and indiscriminate murder? It's as if the President had carelessly dumped toxic waste in the very wellspring of our nation's heritage. Already the poison is leaching into the stream, irretrievably contaminating the very waters that we need to drink every day.●

THE PENTAGON AND TECHNOLOGY

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. COURTER. Mr. Speaker, below is an excellent editorial, the New York Times, April 5, on how the Pentagon sometimes does not pursue the most effective technology for the battlefield, and how to alleviate this pervasive problem. I bring it to my colleagues attention as we review this year's defense budget request:

THE PENTAGON'S MISUSE OF TECHNOLOGY

Bobbing about in the military budget now before Congress are many lemons, like the Sergeant York gun, which costs far too much and shoots far too poorly. Congress would do well to try correcting such specific blunders—and do much more to address a common flaw: the Pentagon's systematic misuse of technology.

The misuse is veiled by a paradox. The Pentagon crams its weapons with complex technology, yet its record of innovation is remarkably poor. Both tendencies flourish in the Army's effort to develop a robot reconnaissance plane. Israel has used such vehicles for years with striking success; the U.S. Army's version is still on the drawing board because its designers keep adding features.

Consider by contrast one of the Pentagon's best, and cheapest, weapons: the Sidewinder missile, with which Israel obliterated the Syrian Air Force and British pilots defeated more capable Argentine planes in the Falkland war. How could the same Pentagon bureaucracy design so effective a weapon? It didn't. The Sidewinder, as The Wall Street Journal has related, was developed covertly by a Navy engineer, Bill McLean, who perceived that the bureaucracy's proposed radar-guided missiles were too complex to work.

Why does the procurement bureaucracy work so poorly? Each service has its own. The Air Force's Systems Command employes 10,000 officers and 29,000 civilians. The Navy Material Command has 5,000 officers and 220,000 civilians. The Army's Matériel Development and Readiness Command is staffed by 11,000 Army personnel and 110,000 civilians. These agencies, vast as they are, produce astonishingly little. In the last 20 years the Army has produced a single tank, the M-1; the record of the Air Force Systems Command includes only three fighters, two bombers, a single air-to-air missile.

The procurement agencies don't even make anything: they merely set specifications for contractors. That's where the troubles begins. When a new plane gets designed the officers responsible for subsystems—electronics or engines or radar—each insist on applying the full scope of technical advances in their special field.

The outcome, as the defense analyst Edward Luttwak notes in his new book, "The Pentagon and the Art of War," is a "corruption of purpose" that makes each weapon very elaborate and very expensive. The final fruit of this system is the F-15 fighter, a plane with wonderful capabilities mostly unusable in combat, and so expensive that the Air Force last year could afford only 36.

There's a better way. Disband the procurement agencies and get the officers back to what they're trained for—war, not contracting. Let civilians acquire weapons, not by writing elaborate specifications but by setting up realistic tests of battlefield performance. And let them insure genuine competition among manufacturers' prototypes. That's how the Air Force's two most effective planes, the F-16 fighter and A-10 attack plane, were acquired, largely in defiance of the bureaucracy.

Then insist on honest, independent tests of weapons going into production, and insure integrity by barring the civilians from revolving-door employment with the contractors.

The ability to get new technology into battlefield weapons quickly ought to be a critical military advantage for the United States. Of all the Pentagon's excesses, Congress should find its stifling of effective technology the least forgivable.●

PRESIDENT REAGAN TO PRESENT VOLUNTEER ACTION AWARD TO MORRIS PESIN

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GUARINI. Mr. Speaker, on Monday, April 22, 1985, at a luncheon in the White House, an outstanding citizen of the 14th District, and indeed the entire State of New Jersey and our Nation, will receive an award from President Ronald Reagan.

Morris Pesin, of Jersey City, will receive his award for outstanding American volunteer achievement at a ceremony where only 15 individual groups and national organizations, plus 2 corporations, and 1 labor union, will be so honored.

Pesin is being honored because of his campaign since 1956 to clean up the Jersey City waterfront and to develop an area just a few hundred yards from the Statue of Liberty into a State park.

Before 1976 Jersey City's waterfront was in a decrepid condition full of debirs, garbage, and rotted beams from broken down piers. It was a shameful scene to witness because it is the closest land in the entire world to America's most beloved shrines, the Statue of Liberty and Ellis Island.

In 1976, Morris Pesin began a tripart program, first a cleanup, second, to develop the area into a park for hundreds of thousands of individuals to enjoy each year, and most important, to make the Statue of Liberty and Ellis Island accessible to New Jersey, without taking a long and costly trip to Battery Park in New York City for the ferryboat to the monuments.

To dramatize the importance of his campaign and to show the proximity of New Jersey's shore to Liberty Island, Morris Pesin, in 1958, led a canoe trip from Jersey City to the Statue of Liberty.

Mr. Pesin's long campaign to clean up the waterfront resulted in New Jersey's beautiful 800-acre Liberty State Park site, financed by State grants and contributions from the private sector.

Each year hundreds of thousands of individuals visit the park and feel the love and comfort and warmth of our fair lady in the harbor, standing 305 feet tall.

Determined to keep it a people's park Morris Pesin makes almost daily visits to the facility seeking to make a good thing better. Each year he encourages more than 80 different ethnic groups to have summer festivals at the park.

New Jersey area and music groups visit the facilities which also have been used for school graduation exercises.

In 1980, ferry service was initiated from Jersey City to Ellis Island, providing a convenient, low-cost, accessible facility with no cost parking, which is deeply appreciated by visitors from all over the country, especially the elderly and handicapped.

Because of his tremendous community leadership, energy, unflinching patriotism, and pride, Morris was appointed by President Reagan as one of the members of the Statue of Liberty-Ellis Island Centennial Commission, headed by Lee A. Iacocca.

Pesin was appointed by New Jersey Gov. Thomas H. Kean to the New Jersey Statue of Liberty Celebration Commission.

A former city councilman for Jersey City, Pesin now serves as a full time nonsalaried director of the Jersey City Cultural Arts Committee and the City Spirit Program.

Morris is an energetic and successful fundraiser for the Statue of Liberty and Ellis Island Restoration Program and has traveled to more than 45 cities and towns in New York and New Jersey, speaking and thanking the school children for their generosity.

Last week he represented the Statue of Liberty Restoration Committee at ceremonies held on Liberty Island, where Chad Colley, national commander of the Disabled American Veterans [DAV] presented William F. May, chairman of the Statue of Liberty-Ellis Island Centennial Commission, a check for $1 million which will be used toward the renovations needed to make the national shrines barrier free for the elderly and handicapped.

This Presidential Volunteer Action Award has earned the plaudits of President Reagan, who has said, "I am particularly proud of Americans who donated their personal time to improving the quality of life in our community, our States, and our Nation."

In addition to Morris Pesin, the following will also be honored on April 22:

Sun City Prides—organization—Sun City, Phoenix, Arizona;

Rev. Hezekiah David Stewart—individual—College Station: Little Rock, AR;

Kelsey Caplinger—individual—Little Rock, AR;

The 1984 Olympic Volunteers—organization—Los Angeles, CA;

Parents Anonymous—organization—Torrance: Los Angeles, CA;

Delmarva Power & Light—corporation—Wilmington: (Philadelphia) DE;

Amanda the Panda Volunteers—organization—Fort Lauderdale, FL;

Allstate Insurance—corporation—Northbrook: Chicago, IL;

Les Cory—individual—North Dartmouth, New Bedford, MA;

Henrietta Aladjem—individual—Watertown, Boston, MA;

Missouri Speleological Society—organization—Eldon: Jefferson City, MO;

Vernon Falkenhain—individual—Rolla, MO;

Greensboro Symphony Guild—organization—Greensboro; Winston-Salem, NC;

Concerned Black Men—organization—Philadelphia, PA;

Texas Youth Commission, Dallas House—organization—Dallas, TX;

National Court Appointed Special Advocates—organization—Seattle, WA;

Nineteen Unions Cooperating in Disaster Coastline Project—union—Washington, DC.

Morris Pesin has the support and encouragement of many friends and his family, which is comprised of his wife, Ethel, his son, Samuel, and his daughter, Judy Pesin Borriello.

Morris Pesin indeed, has been very active since his retirement. He perfectly symbolizes Oscar Wilde's quotation on "Contentment":

Contentment lies not in the enjoyment of ease—a life of luxury—but comes only to him that labors and overcomes—to him that performs the task in hand and reaps the satisfaction of work well done.

His life work indeed is personification of the full thrust of voluntarism and patriotism. He constantly says, "America is a tune which must be sung together."

A world traveler and a visitor to every continent, Morris Pesin's philosophy of life is best echoed in the following sonnet by John Burros:

I AM CONTENT

The longer I live the more my mind dwells upon the beauty and wonder of the world. . . .

I have loved the feel of the grass under my feet, and the sound of the running streams by my side. The hum of the wind in the tree-tops has always been good music to me, and the face of the fields has often comforted me more than the faces of men.

I am in love with this world; by my constitution I have nestled lovingly in it. It has been home. It has been my point of outlook into the universe. I have not bruised myself against it, nor tried to use it ignobly.

I have tilled its soil, I have gathered its harvests, I have waited upon its seasons, and always have I reaped what I have sown.

While I delved I did not lose sight of the sky overhead. While I gathered its bread and meat for my body, I did not neglect to gather its bread and meat for my soul.

I have climbed its mountains, roamed its forests, sailed its waters, crossed its deserts, felt the sting of its frosts, the oppression of its heats, the drench of its rains, the fury of its winds, and always have beauty and joy waited upon my goings and comings.

I am certain that all of my colleagues here in the House of Representatives wish to join me in a salute to Morris Pesin at noontime on April 22, when he will be at the White House receiving this prestigious and coveted Volunteer Action Award.●

HUNGER IN AMERICA

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FORD of Tennessee. Mr. Speaker, I would like to urge my colleagues to do everything within their power to eliminate hunger in America. Today I attended a news conference in the Capitol with a coalition of medical groups including Dr. Larry Brown and the Physican Task Force on Hunger. We agreed to work together by focusing public attention on hunger and enlisting support for H.R. 1856, the Comprehensive Nutrition Assistance Act of 1985.

Studies have shown that hunger in America is a national epidemic.

Hunger is not confined to one or two regions of the country, it is found in every city and State of our Nation. And in many cases the cause can be attributed to the failure of our Government to meet the needs of those less fortunate. Several studies have shown that as the Federal Government has reduced public assistance programs, the number of those who live in poverty increases. The victims of poverty, who in many cases, are children and the elderly, go hungry.

We know that the number of poor people in our country has increased by more than 6 million since President Reagan took office and there are more than 35 million citizens who live below the poverty line. I believe that Government has a responsibility to feed the hungry and if you share my belief, I am asking for your support of H.R. 1856, the Comprehensive Nutrition Act of 1985.

This legislation includes: (1) increased funding for school lunch and child nutrition programs; (2) expansion of Head Start and the child care food programs to serve Head Start children; (3) reauthorization of the Commodity Supplemental Food Program for the Elderly; (4) Funds-for temporary emergency food assistance for migrants and native Americans and (5) increases in the food stamp program.

While we know that our Government spends millions of dollars on food stamps, that aid has not kept up with the need that has been created in an economy where businesses are closing down, unemployment remains too high and our budget deficit is reaching unmanageable proportions.

The private sector has tried to meet the need. Hundreds of soup kitchens have been started, churches are caring for more families who need food and shelter, and social service agencies are seeing more hungry people than they ever have before; but the private sector cannot fill the gaps left by inadequate Federal involvement.

We in Congress have a difficult challenge before us. We have to balance the budget, reduce the deficit, provide for a strong defense and we must also feed the hungry.

The best way to feed the hungry is to remove the causes of poverty. So we must pass legislation that creates jobs. We must pass legislation that will better support our citizens during periods of temporary unemployment. We must pass legislation that will assist Americans to secure adequate housing. We must help families to educate their children. And we must provide access to adequate health care and child nutrition programs for all those in need.

On the issue of hunger, we need strong leadership. As the richest agricultural Nation in the world, our citizens deserve more. Government has a responsibility to help those less fortunate, and in this land of plenty, we should never allow any of our citizens to go hungry.●

ENTERPRISE ZONES

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DREIER of California. Mr. Speaker, my home State of California has traditionally been on the cutting edge of new ideas and technologies. That's one of the reasons that our State economy continues to grow and prosper.

Last year, the California Legislature passed enterprise zone legislation. While we are not the first to come up with the idea, I am confident that our progressive, farsighted State government, working with the California business community, will make these zones among the most successful.

The April edition of Western City, a publication of the California League of Cities, carries an article by Assem-

blyman Pat Nolan, the coauthor of the California enterprise zone bill. His discussion of enterprise zones in general, and the California model in particular, are required reading for this Congress.

After years of debate, we've been unable to pass enterprise zone legislation. Meanwhile, many States and municipalities have gone ahead and set up highly successful zones. California, for instance, is the 23d State to do so. I ask that Assemblyman Nolan's article be included in the RECORD, and recommend it to my colleagues.

ENTERPRISE ZONES: A TOOL FOR ECONOMIC RECOVERY

(By Pat Nolan)

Almost every major city in the United States, and for that matter the world, suffers from some form of urban decay. Often this decay seems to be an unstoppable cancer consuming scores of city blocks and impacting millions of people's lives. For years community leaders have been grappling with ways to address the serious problems of urban blight. The solutions from government were diverse: model cities, redevelopment agencies, and community development block grants, to name a few, all of which have proven to be more costly than planned and often unsuccessful in reversing urban decay.

Despite the billions of dollars spent on these programs, the 1970's and 80's saw our inner cities decline even faster than before. But the increase in needs came when the fiscal resources of our government were depleted. This forced liberals and conservatives alike to seek a solution that would rebuild our inner cities without further draining the public treasury. One idea that emerged resulted in the Enterprise Zone concept.

BURDENS REDUCED

An Enterprise Zone, stated simply, is a geographic area where government, taxes and regulatory burdens are reduced to stimulate development and encourage private investment. Recognizing direct government intervention has not been successful in ameliorating economically depressed areas, this program will lessen the role of government and unleash free enterprise in our cities.

Within these zones everything should be done to maximize economic freedom. Many of the problems experienced by depressed neighborhoods have been the results of bureaucratic red tape and other obstacles caused by government-sponsored programs that were created to revive these areas. The Enterprise Zone concept provides a novel solution: Taxation will be reduced and regulations cut to create a business climate that would encourage innovation, risk-taking and job creation.

Enterprise Zones are a relatively new idea in the world of city planning. Developed in Britain by a Conservative Member of Parliament and a Socialist professor of urban studies in 1979, the zone concept quickly crossed the Atlantic and was brought to the attention of Ronald Reagan and Jimmy Carter. Presidential candidates at the time, they both supported the zone concept, and, upon the election of Ronald Reagan, Congress began considering the establishment of a Federal Enterprise Zone Act. Congress has, to date, failed to do so, but individual states have been quicker to act.

On March 20, 1984, Governor Deukmejian signed into law the California Enterprise Zone Act, and California became the 23rd state in the nation to pass Enterprise Zone legislation.

LOCALLY TAILORED

The California Enterprise Zone program works as follows: The local governing body (City Council and/or County Board of Supervisors) designates by resolution an economically depressed area within its jurisdiction as a potential Enterprise Zone. The local governing body then determines the major reasons business development has been stifled within these zones. After making this determination, the government outlines the actions to be taken to mitigate the negative impact of these constraints on business growth. The result is an incentive package tailor-made to fit the needs of the local community and constructed to promote development of new and existing business. Since each potential zone's problems are different, cities' incentive packages are expected to vary accordingly.

Because the number of zones in California is limited to 10, local communities will be competing with each other. In designating Enterprise Zones, the California Department of Commerce shall select from the applicant pool the proposed Enterprise Zones which best fulfill the following criteria:

(1) Proposes the most effective and comprehensive regulatory, tax and program incentives to attract private sector investment to the proposed zone.

(2) Shows the most innovative approach in establishing incentives.

(3) (a) Meets the guidelines for the Federal Urban Development Action grant program, or (b) the area within the proposed zone has experienced plant closure within the past two years affecting more than 100 workers, or (c) the city or county has submitted material to the California Department of Commerce which shows the proposed geographic area meets the criteria of economic distress similar to those used in determining eligibility under the Urban Development Action Grant Program.

(4) Development of a draft Environmental Impact Report (EIR) to be completed at the time of final application and a final EIR to be completed prior to designation. Only those zones being seriously considered will be required to incur the full cost of an EIR.

(5) Fulfillment of all further requirements as established and presented in the official Enterprise Zone regulations of the California Department of Commerce.

Upon the designation of these 10 Enterprise Zones, existing and newly established businesses that have located in the zone areas will be able to qualify for state incentives. These incentives include:

State Tax Incentives: employer tax credits for wages paid to specified disadvantaged employees; investment income exclusion; net operating loss carryovers; employee wage credits.

Program Benefits for Employers: subsidized leasing involving government-owned properties; small business loan preferences; energy loan preferences; industrial development bonds; state contract preferences; training preferences offered by the California State Department of Education.

The major goal of these state incentives is to encourage local residents to develop and expand community-based businesses. In the past traditional redevelopment projects worked to improve the local community, but in the process, displaced the residents and businesses of the area to make room for more affluent people and new businesses. The Enterprise Zone Act, however, works to foster participation from within the zone community. This is accomplished by establishing Neighborhood Enterprise Association Corporations (NEAC). With their mandate for broad-based community involvement and their ability to lease surplus public lands, the Neighborhood Enterprise Association Corporations can focus attention on the quality of life of the local environment and encourage indigenous economic and social growth.

Growth is in many ways unpredictable. One doesn't know from just where it will come, in what industries or from what people. The best government can do is make sure it isn't getting in the way of the local community's creative abilities.

The key question that must be asked is how likely is the program to work? The answer to this lies in the source of economic growth in America.

The most widely cited research in this area comes from David L. Birch, Director of the Massachusetts Institute of Technology Program on Neighborhood and Regional Change. Using the Dun and Bradstreet data base, Dr. Birch found as many as 7 out of 10 new jobs come from businesses that have 20 or fewer employees and have been operating for less than five years. The remaining job growth comes from the lower end of the business size scale as employment in the Fortune 500 has declined substantially in the last decade.

The critics of the Enterprise Zone concept appear to be right about one thing. Enterprise Zones are not likely to work as plant relocation tools. Companies seeking new locations do not make their decisions on the basis of the incentives offered in the zone legislation. That's why it's so important for a city to keep in mind that with Enterprise Zones it must encourage entrepreneurship and remove impediments to the expansion of small- and medium-sized businesses. A recent study on state Enterprise Zones done by the Washington-based Sabre Foundation found that business relocation had played a trivial role in the success of zones. Start-ups and the expansion of existing businesses were the real source of growth. Virtually all of these were small- and mid-size companies.

A good example of an active Enterprise Zone is the one located in Norwalk, Connecticut, which has become something of a showcase. Norwalk has focused primarily on improving the business environment in the zone. A freeze was placed on property taxes, and the city streamlined regulations and the regulatory process for all businesses in the zone. The reforms were so popular they were extended to the rest of the city as well. The city then focused federal and state money on the zone and has organized block watches and neighborhood beautification drives.

The results of these changes show what Enterprise Zones can do to a once depressed area. In less than two years, the Norwalk Enterprise Zone project saw the start of 67 commercial/office/retail related projects, 11 industrial projects, 19 residential projects and one mixed-use project for a total of 98 projects and more than $24 million in new investments. This resulted in the creation of 415 jobs and the retention of a host of existing businesses (and jobs) that had planned to leave before the Norwalk Enterprise Zone was established. Most of the new jobs came from small businesses, employing an average of three or four people.

The Enterprise Zone concept is truly a novel method for addressing the needs of a complex city. The concept is working well in

states throughout the country. One must realize that Enterprise Zones are not a panacea for all urban problems. For instance, they do not directly address infrastructure problems. They are, however, a powerful tool which can be used to revitalize depressed areas. If combined with the existing resources of a city, Enterprise Zones can provide a healthy business climate for areas that have suffered from little or no business investment. That is indeed good news for our inner city population.●

STATEMENT OF THE INTER-AMERICAN DIALOGUE ON THE NICARAGUAN SITUATION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BARNES. Mr. Speaker, on April 4 the Inter-American Dialogue issued a statement on the situation in Nicaragua that I believe can help guide us as we consider President Reagan's request for $14 million for the Contras.

The Inter-American Dialogue is a private, nonpartisan group of prominent leaders from Latin America and the Caribbean, the United States, and Canada. It is cochaired by Ambassador Sol M. Linowitz of the United States and His Excellency Galo Plaza, former President of Ecuador.

I would like to ask my colleagues to pay special attention to the final recommendation of this distinguished group, which reads as follows:

Finally, it is imperative that the governments of Nicaragua and the United States pledge themselves not only to the principle but to the practice of non-intervention. The government of the United States should clearly renounce plans—overt or covert, direct or indirect—to renew support for the military and paramilitary activities of the Nicaraguan insurgents. The Nicaraguan government should clearly renounce all support for the military and paramilitary activities of the insurgents in El Salvador and elsewhere. There will be no peace in Central America so long as the hemispheric norm of non-intervention is flouted by any country.

I urge my colleagues to read the entire statement, which makes it clear why we must reject the President's proposal for renewed assistance for overthrowing the Nicaraguan Government.

CURRENT UNITED STATES-LATIN AMERICAN RELATIONS

The crisis of economic growth, debt, and trade remains the most important problem in Latin America today. Recent progress toward restructuring the external debt of several major countries is significant, but it should not obscure the fact that the region's fundamental economic problems are unresolved; indeed, they may be worsening.

The next session of the Inter-American Dialogue will consider proposals to deal with regional economic problems. It will examine the proper role of international financial institutions, of foreign investment, and of national policies—both of the Latin American countries and of the industrial countries, including the United States. The Dialogue will also take up other major issues, including narcotics, immigration and refugees, and arms control. We will continue our strong focus on how to strengthen democracy and help assure the protection of human rights throughout the Hemisphere.

We are compelled today to address the most urgent issue in the Americas: the dangerous tension between Nicaragua and the United States that threatens the region's security more than any situation in 20 years.

Only a few months ago, the diplomatic initiative of the four Contadora nations to fashion a settlement in Central America seemed promising. We welcomed the start of direct U.S.-Nicaraguan talks at Manzanillo, Nicaragua's positive response to the second Contadora draft treaties, and the Nicaraguan commitment to hold national elections in 1984.

Our hopes have dimmed in recent months. The Contadora process has run into serious obstacles. Nicaragua's regime and leading opposition parties could not agree on procedures to make the 1984 elections broadly representative. The United States has suspended the talks at Manzanillo and has stepped up pressures against Nicaragua. Recent public statements suggest that the U.S. government may be seeking capitulation by the Sandinistas. The possibility of a much more intense war in Nicaragua, involving the United States indirectly—and perhaps even directly—is real.

Even if such a war is avoided, the Nicaraguan crisis may poison U.S.-Latin American relations and undermine efforts to resolve other serious hemispheric problems. It has already weakened the Organization of American States and the Inter-American Development Bank, and prompted a challenge to the authority of the World Court. It has polarized the domestic politics of Costa Rica and Honduras. It has distracted attention, especially in the United States, from the fundamental Latin American economic crisis. Most important, in human terms, the fighting in Nicaragua has killed and wounded thousands, displaced tens of thousands from their homes, and set back the country's economy by a decade or more.

It is imperative that the leaders of the United States, Nicaragua, the other Central American countries, Cuba, and the Contadora nations work to forge peaceful solutions to the struggles in Central America.

Last Sunday's election in El Salvador shows the popular support for President Jose Napoleon Duarte's dramatic initiative to open a dialogue with the insurgent left at La Palma. Now President Duarte, strengthened by these elections, should move vigorously toward negotiation. In this effort, he requires the strong support of the United States and the other nations of the Hemisphere. These negotiations must be more than a tactic, for they are the only path to lasting peace in El Salvador.

With regard to Nicaragua, we believe that every effort must be made to achieve peace before a wider war becomes inevitable.

1. We call upon the governments of Nicaragua and the United States to resume their bilateral discussions.

2. We ask the government of Nicaragua to open the way toward national reconciliation by pursuing a dialogue with all significant parties who seek an end to the civil war and by providing the conditions necessary to hold free and fair elections under international supervision.

3. We ask the government of the United States to recognize, as did the Kissinger Commission, that an indigenous revolution in this Hemisphere can be compatible with U.S. national security and with hemispheric security, and to refrain from interfering in the internal affairs of Nicaragua. The United States and the other countries of the Hemisphere share a concern to prevent the expansion of a Soviet or Cuban military presence in the Americas.

4. We call upon the Contadora nations, meeting again next week, to persist in the difficult task of negotiation, and to recommit their best efforts toward designing inspection and verification provisions that can be monitored and enforced, taking into proper account the concerns of all parties. We call upon the governments of the United States and Nicaragua to commit themselves, in deed and not just in word, to active support for the Contadora process of mediation and for a negotiated regional settlement.

5. Finally, it is imperative that the governments of Nicaragua and the United States pledge themselves not only to the principle but to the practice of non-intervention. The government of the United States should clearly renounce plans—overt or covert, direct or indirect—to renew support for the military and paramilitary activities of the Nicaraguan insurgents. The Nicaraguan government should clearly renounce all support for the military and paramilitary activities of the insurgents in El Salvador and elsewhere. There will be no peace in Central America so long as the hemispheric norm of non-intervention is flouted by any country.●

NICARAGUA AND THE LOSERS OF THE WORLD

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. IRELAND. Mr. Speaker, five members of the House Permanent Select Committee on Intelligence recently visited Honduras, Costa Rica, and Nicaragua. The delegation had an opportunity to consult a broad and balanced cross section of the various political and social elements in these countries. The delegation's discussions focused on the impending congressional debate on President Reagan's peace proposal and the long term goals and policies of the United States toward that region.

On April 14 the delegation met in Managua with Nicaraguan Foreign Minister Miguel D'Escoto to exchange views on the differences between the United States and Nicaragua and on goals in Central America. Foreign Minister D'Escoto explained that this country was conducting a fragile experiment and that the U.S. policy toward Nicaragua is impeding the Sandinista National Liberation Front and Sandinista dreams for Nicaragua. Mr. D'Escoto went on to state that the Sandinista dream for "democracy in Nicaragua" was turning into "the impossible dream" due to U.S. intransigence. In response to Foreign Minister D'Escoto's statement, Congressman HENRY HYDE asked if the Foreign Min-

ister would permit him to share his thoughts with the Foreign Minister regarding U.S. intention toward Nicaragua. I think Congessman HYDE's statement is an accurate and eloquent reflection of the feelings and sentiments of the majority of Congress with regard to Nicaragua, and for that reason I wish to share with my colleagues the statement Congressman HYDE made to the Foreign Minister of Nicaragua just 5 days ago.

Congressman HYDE stated:

Foreign Minister D'Escoto, let me share with you one of my feelings. To respond to your statement on "the impossible dream," how you view little tiny Nicaragua as a David facing the huge Yankee Goliath, that you are struggling for your independence which is a very noble thing, and you don't want to be told what to do no matter how big anybody is and I can understand that. We had that in our history when Great Britain was the mother country and we were those thirteen struggling colonies.

But, I compare you to Cuba—your model really. I've been to Cuba and I think that's one of the great tragedies of our era, a beautiful country, beautiful warm people, a country that has for 26 years been in crushing poverty because the leader has this messianic view, which you share and your junta share of revolution without frontiers. Now Mr. Castro has 22,000 troops in Africa while his own people have to ration food, clothing and housing and live in a depressed, less than third world condition. The Cuban people could be living in a much better condition, with trade with the United States, tourism, and much friendlier relations. Instead they are oppressed and repressed and depressed because of this Marxist-Leninist dream that Castro has to spread revolution. Now you people tragically are going the same way, geared for conflict instead of development.

Now we had a Commission headed by a distinguished man named Kissinger, that had Robert Strauss on it, Henry Cisneros—a balanced Commission to look at this whole area. Now forget the past, let's look at today. This whole area needs development, it needs investment, it needs people to put money in with the hope they'll get their money back, that it will be protected and that development will occur. We see that hope in all the other countries, but Nicaragua has the dream of Mr. Castro, that you have to be revolutionary, that you have to gear your country up for war, for conflict.

Surely you should know this, because I, with Mr. Cheney, voted to give you $75 million and would give you three times that much to get democracy started down here. But instead what you want is your revolution. After defeating Somoza your revolution wasn't over. That was only the first phase. Now you had to go on expanding with more revolutionary fervor to your neighbors. We read, we know what will satisfy you. You're not trying to develop Nicaragua, you are messianic evangelists for Marxism-Leninism and that's the problem. It's the problem with Cuba and they are your model. You've got 8,000 Cubans here, you won't take our Peace Corps, but you'll have 8,000 Cubans and Bulgarians and North Koreans—they are the losers of the world. They can't feed themselves. Why is it that the model of socialism is your model? Why emulate Albania? It's just nonsense! We want to help you, we want to be friends with you, we want peace, we don't want our kids or your kids killed. We want peace! But, how do you have peace with a neighbor that wants to export philosophy that extinguishes freedom? Don't tell me that you're a little democracy. You're not a democracy, you have no freedom of press, you have no freedom of political association. It is sad that you are choosing a path that can only mean more suffering and privation for the country you profess to love.

I truly believe that Mr. HYDE's statement is an accurate reflection of the goals and aspirations of the United States toward all of Central America.

Upon leaving Nicaragua the delegation stated that, "the United States must continue to assist the countries and the region in reaching a just, lasting, and verifiable peace," and that "this peace must produce political and economic progress will full recognition of human rights and freedoms."

The President's program will do just that. The President asked that both sides lay down their arms and accept church mediated talks on internationally supervised elections and on an end to repression of church, press and individual rights. These are goals we all should agree upon, and these are goals we all should support. With anything less, we must resolve ourselves to accepting more Communist aggression and new Marxist states on our southern border.●

TECHNICAL CORRECTIONS TO THE RETIREMENT EQUITY ACT OF 1984

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. ROSTENKOWSKI. Mr. Speaker, the text of the legislation making technical corrections to the Retirement Equity Act of 1984, which I introduced today, together with my colleagues, Mr. DUNCAN, Mr. CLAY, and Mrs. ROUKEMA, follows:

H.R. 2110

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. TECHNICAL CORRECTIONS TO THE RETIREMENT EQUITY ACT OF 1984.

(a) AMENDMENTS RELATED TO SECTIONS 102 AND 202 OF THE ACT.—

(1) TREATMENT OF CLASS-YEAR PLANS.—

(A) AMENDMENT OF INTERNAL REVENUE CODE.—Paragraph (4) of section 411(d) (relating to class-year plans) is amended to read as follows:

"(4) CLASS-YEAR PLANS.—

"(A) IN GENERAL.—The requirements of subsection (a)(2) shall be treated as satisfied in the case of a class-year plan if such plan provides that 100 percent of each employee's right to or derived from the contributions of the employer on the employee's behalf with respect to any plan year are nonforfeitable not later than when such participant was performing services for the employer as of the close of each of 5 plan years (whether or not consecutive) after the plan year for which the contributions were made.

"(B) 5-YEAR BREAK IN SERVICE.—For purposes of subparagraph (A) if—

"(i) any contributions are made on behalf of a participant with respect to any plan year, and

"(ii) before such participant meets the requirements of subparagraph (A) such participant was not performing services for the employer as of the close of each of any 5 consecutive plan years after such plan year,

then the plan may provide that the participant forfeits any right to or derived from the contributions made with respect to such plan year.

"(C) CLASS-YEAR PLAN.—For purposes of this section, the term 'class-year plan' means a profit-sharing, stock bonus, or money purchase plan which provides for the separate nonforfeitability of employees' rights to or derived from the contributions for each plan year."

(B) AMENDMENT OF ERISA.—Paragraph (3) of section 203(c) of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"(3)(A) The requirements of subsection (a)(2) shall be treated as satisfied in the case of a class-year plan if such plan provides that 100 percent of each employee's right to or derived from the contributions of the employer on the employee's behalf with respect to any plan year are nonforfeitable not later than when such participant was performing services for the employer as of the close of each of 5 plan years (whether or not consecutive) after the plan year for which the contributions were made.

"(B) For purposes of subparagraph (A) if—

"(i) any contributions are made on behalf of a participant with respect to any plan year, and

"(ii) before such participant meets the requirements of subparagraph (A), such participant was not performing services for the employer as of the close of each of any 5 consecutive plan years after such plan year,

then the plan may provide that the participant forfeits any right to or derived from the contributions made with respect to such plan year.

"(C) For purposes of this part, the term 'class-year plan' means a profit-sharing, stock bonus, or money purchase plan which provides for the separate nonforfeitability of employees' rights to or derived from the contributions for each plan year."

(C) EFFECTIVE DATE.—The amendments made by this paragraph shall apply to contributions made for plan years beginning after the date of the enactment of this Act; except that, in the case of a plan described in section 302(b) of the Retirement Equity Act of 1984, such amendments shall not apply to any plan year to which the amendments made by such Act do not apply by reason of such section 302(b).

(2) COORDINATION WITH LUMP SUM TREATMENT.—Subsection (e) of section 402 (relating to tax on lump sum distributions) is amended by adding at the end thereof the following new paragraph:

"(6) TREATMENT OF POTENTIAL FUTURE VESTING.—

"(A) IN GENERAL.—For purposes of determining whether any distribution which becomes payable to the recipient on account of the employee's separation for service is a lump sum distribution, the balance to the credit of the employee shall be determined without regard to any increase in vesting which may occur if the employee is re-employed by the employer.

"(B) RECAPTURE IN CERTAIN CASES.—If—

"(i) an amount is treated as a lump sum distribution by reason of subparagraph (A),

"(ii) the employee makes an election under paragraph (4)(B) with respect to such distribution;

"(iii) the employee is subsequently re-employed by the employer; and

"(iv) as a result of services performed after being so re-employed, there is an increase in the employee's vesting for benefits accrued before the separation referred to in subparagraph (A),

under regulations prescribed by the Secretary, the tax imposed by this chapter for the taxable year (in which the increase in vesting first occurs) shall be increased by the reduction in tax which resulted from the election referred to in clause (ii) (and such election shall not be taken into account for purposes of determining whether the employee may make another election under paragraph (4)(B)).

"(C) VESTING.—For purposes of this paragraph the term 'vesting' means the portion of the accrued benefits derived from employer contributions to which the participant has a nonforfeitable right."

(3) TREATMENT OF WITHDRAWAL OF MANDATORY CONTRIBUTIONS.—

(A) AMENDMENT OF INTERNAL REVENUE CODE.—Clause (ii) of section 411(a)(3)(D) (relating to withdrawal of mandatory contributions) is amended by striking out "any one-year break in service" and inserting in lieu thereof "a period of 5 consecutive 1-year breaks in service."

(B) AMENDMENT OF ERISA.—Clause (ii) of section 203(a)(3)(D) of the Employee Retirement Income Security Act of 1974 is amended by striking out "any 1-year break in service" and inserting in lieu thereof "a period of 5 consecutive 1-year breaks in service".

(4) PARTICIPATION REQUIREMENTS UNDER SIMPLIFIED EMPLOYEE PENSIONS.—Subparagraph (A) of section 408(k)(2) (relating to participation requirements) is amended by striking out "age 25" and inserting in lieu thereof "age 21".

(b) AMENDMENTS RELATED TO SECTIONS 103 AND 203 OF THE ACT.—

(1) CLARIFICATION OF QUALIFIED PRERETIREMENT SURVIVOR ANNUITY IN CASE OF TERMINATED VESTED PARTICIPANT.—

(A) AMENDMENT OF INTERNAL REVENUE CODE.—Paragraph (1) of section 417(c) (defining qualified preretirement survivor annuity) is amended by adding at the end thereof the following new sentence: "In the case of an individual who separated from service before the date of such individual's death, subparagrapfh (A)(ii)(I) shall not apply."

(B) AMENDMENT OF ERISA.—Paragraph (1) of section 205(e) of the Employee Retirement Income Security Act of 1974 (defining qualified preretirement survivor annuity) is amended by adding at the end thereof the following new sentence: "In the case of an individual who separated from service before the date of such individual's death, subparagraph (A)(ii)(I) shall not apply."

(2) CLARIFICATION OF TRANSFEREE PLAN RULES.—

(A) AMENDMENTS OF INTERNAL REVENUE CODE.—

(i) Subclause (III) of section 401(a)(11)(B)(iii) (relating to plans to which requirements of joint and survivor annuity and preretirement survivor annuity apply) is amended by striking out "indirect transferee" and inserting in lieu thereof "indirect transferee (in a transfer after December 31, 1984)".

(ii) Subparagraph (B) of section 401(a)(11) is amended by adding at the end thereof the following new sentence: "Clause (iii)(III) shall apply only with respect to the transferred assets if the plan separately accounts for assets and any income thereform."

(B) AMENDMENTS OF ERISA.—

(i) Clause (iii) of section 205(b)(1)(C) of the Employee Retirement Income Security Act of 1974 is amended by striking out "a transferee" and inserting in lieu thereof "a direct or indirect transferee (in a transfer after December 31, 1984)".

(ii) Paragraph (1) of section 205(b) of such Act is amended by adding at the end thereof the following new sentence: "Clause (iii) of subparagraph (C) shall apply only with respect to the transferred assets if the plan separately accounts for assets and any income therefrom."

(3) CLARIFICATION OF COORDINATION BETWEEN QUALIFIED JOINT AND SURVIVOR ANNUITY AND QUALIFIED PRERETIREMENT SURVIVOR ANNUITY.—

(A) AMENDMENT OF INTERNAL REVENUE CODE.—Clause (i) of section 401(a)(11)(A) is amended by striking out "who retires under the plan" and inserting in lieu thereof "who does not die before the annuity starting date".

(B) AMENDMENT OF ERISA.—Paragraph (1) of section 205(a) of the Employee Retirement Income Security Act of 1974 is amended by striking out "who retires under the plan" and inserting in lieu thereof "who does not die before the annuity starting date".

(4) REQUIREMENT OF SPOUSAL CONSENT FOR USING PLAN ASSETS AS SECURITY FOR LOANS.—

(A) AMENDMENTS OF INTERNAL REVENUE CODE.—

(i) Paragraph (1) of section 417(a) is amended by striking out "and" at the end of subparagraph (A), by striking out the period at the end of subparagraph (B) and inserting in lieu thereof ", and", and by adding at the end thereof the following new subparagraph:

"(C) the plan provides that no portion of any participant's accrued benefit may be used as security for any loan unless the spouse of the participant (if any) consents in writing to such use."

(ii) Subsection (f) of section 417 is amended by redesignating paragraph (5) as paragraph (6) and by inserting after paragraph (4) the following new paragraph:

"(5) DISTRIBUTIONS BY REASON OF SECURITY INTERESTS.—If the use of any participant's accrued benefit as security for a loan meets the requirements of subsection (a)(1)(C), nothing in this section shall prevent any distribution required by reason of a failure to comply with the terms of such loan."

(B) AMENDMENT OF ERISA.—

(i) Paragraph (1) of section 205(c) of the Employee Retirement Income Security Act of 1974 is amended by striking out "and" at the end of subparagraph (A), by striking out the period at the end of subparagraph (B) and inserting in lieu thereof ", and", and by adding at the end thereof the following new subparagraph:

"(C) the plan provides that no portion of any participant's accrued benefit may be used as security for any loan unless the spouse of the participant (if any) consents in writing to such use."

"(ii) Section 205 of such Act is amended by redesignating subsection (j) as subsection (k) and by inserting after subsection (i) the following new subsection:

"(j) If the use of any participant's accrued benefit as security for a loan meets the requirements of subsection (c)(1)(C), nothing in this section shall prevent any distribution required by reason of a failure to comply with the terms of such loan."

"(C) EFFECTIVE DATES.—

"(i) The amendments made by this paragraph shall apply with respect to loans made after April 18, 1985.

"(ii) In the case of any loan which was made on or before April 18, 1985, and which is secured by a portion of the participant's accrued benefit, nothing in the amendments made by sections 103 and 203 of the Retirement Equity Act of 1984 shall prevent any distribution required by reason of a failure to comply with the terms of such loan.

"(iii) For purposes of this subparagraph, any loan which is revised, extended, renewed or renegotiated after April 18, 1985, shall be treated as made after April 18, 1985.

(5) CLARIFICATION OF NOTICE REQUIREMENT FOR INDIVIDUALS HIRED AFTER AGE 35.—

(A) AMENDMENT OF ENTERNAL REVENUE CODE.—Paragraph (B) of sesction 417(a)(3) (relating to plan to provide written explanations) is amended by striking out "in which the participant attains age 35" and inserting in lieu thereof "in which the participant attains age 35, or, if later, within a reasonable period after the participant is hired,".

(B) AMENDMENT OF ERISA.—Subparagraph (B) of section 205(c)(3) of the Employee Retirement Income Security Act of 1974 is amended by striking out "in which the participant attains age 35" and inserting in lieu thereof "in which the participant attains age 35, or if later, within a reasonable period after the participant is hired,".

(6) SPOUSAL CONSENT FOR CHANGES IN DESIGNATIONS.—

(A) AMENDMENT OF INTERNAL REVEUNE CODE.—Subparagraph (A) of section 417(a)(2) (relating to requirement that spouse consent to election) is amended to read as follows:

(A)(i) the spouse of the participant consents in writing to such election, (ii) such election designates a beneficiary which may not be changed without spousal consent (or the consent of the spouse permits designations of beneficiaries by the participant without any requirement of further consent by the spouse), and (iii) the spouse's consent acknowledges the effect of such election and is witnessed by a plan representative or a notary public, or".

(B) AMENDMENT OF ERISA.—Subparagraph (A) of section 205(c)(2) of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"(A)(i) the spouse of the participant consents in writing to such election, (ii) such election designates a beneficiary which may not be changed without spousal consent (or the consent of the spouse permits designations of beneficiaries by the participants without any requirement of further consent by the spouse), and (iii) the spouse's consent acknowledges the effect of such election and is witnessed by a plan representative or a notary public, or".

(C) EFFECTIVE DATE.—The amendments made by this paragraph shall apply to elec-

tions made after the date of the enactment of this Act.

(7) CLERICAL AMENDMENTS.—

(A) Paragraph (1) of section 417(a) is amended by striking out "section 401(a)(ii)" and inserting in lieu thereof "section 401(a)(11)".

(B) Paragraph (1) of section 417(c) is amended by striking out "survivor annuity or the life of" in the matter preceding subparagraph (A) and inserting in lieu thereof "survivor annuity for the life of".

(C) Subparagraph (B) of section 415(b)(2) is amended by striking out "as defined in section 401(a)(11)(G)(iii)" and inserting in lieu thereof "as defined in section 417".

(c) AMENDMENTS RELATED TO SECTIONS 104 AND 204 OF THE ACT.—

(1) TREATMENT OF QUALIFIED DOMESTIC RELATIONS ORDERS FOR INDIVIDUALS OTHER THAN SPOUSE OR FORMER SPOUSE.—Paragraph (9) of section 402(a) (relating to alternate payee under qualified domestic relations ordered treated as distributee) is amended by striking out "the alternate payee shall be treated" and inserting in lieu thereof "any alternate payee who is the spouse or former spouse of the participant shall be treated".

(2) PROCEDURES FOR PERIOD DURING WHICH DETERMINATION BEING MADE.—

(A) AMENDMENTS OF THE INTERNAL REVENUE CODE.—

(i) Subparagraph (B) of section 414(p)(7) (relating to payment to alternate payee if ordered determined to be qualified domestic relations) is amended—

(I) by striking out "18 months" and inserting in lieu thereof "the 18-month period described in subparagraph (E)", and

(II) by striking out "plus any interest" and inserting in lieu thereof "including any interest".

(ii) Subparagraph (C) of section 414(p)(7) is amended—

(I) by striking out "18 months" and inserting in lieu thereof "the 18-month period described in subparagraph (E)", and

(II) by striking out "plus any interest" and inserting in lieu thereof "including any interest".

(iii) Subparagraph (D) of section 414(p)(7) is amended by striking out "the 18-month period" and inserting in lieu thereof "the 18-month period described in subparagraph (E)".

(iv) Paragraph (7) of section 414(p) is amended by adding at the end thereof the following new subparagraph:

"(E) DETERMINATION OF 18-MONTH PERIOD.—For purposes of this paragraph, the 18-month period described in this subparagraph is the 18-month period beginning with the date on which the first payment would be required to be made under the domestic relations order."

(B) AMENDMENTS OF ERISA.—

(i) Clause (ii) of section 206(d)(3)(H) of the Employee Retirement Income Security Act of 1974 is amended—

(I) by striking out "18 months" and inserting in lieu thereof "the 18-month period described in clause (v)", and

(II) by striking out "plus any interest" and inserting in lieu thereof "including any interest".

(ii) Clause (iii) of section 206(d)(3)(H) of such Act is amended—

(I) by striking out "18 months" and inserting in lieu thereof "the 18-month period described in clause (v)", and

(II) by striking out "plus any interest" and inserting in lieu thereof "including any interest".

(iii) Clause (iv) of section 206(d)(3)(H) of such Act is amended by striking out "the 18-month period" and inserting in lieu thereof "the 18-month period described in clause (v)".

(iv) Subparagraph (H) of section 206(d)(3) of such Act is amended by adding at the end there of the following new clause:

(v) For purposes of this subparagraph, the 18-month period described in the clause is the 18-month period beginning with the date on which the first payment would be required to be made under the domestic relations order."

(3) COORDINATION WITH QUALIFIED PLAN REQUIREMENTS.—Section 401 is amended by redesignating the subsection relating to cross references as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) COORDINATION WITH QUALIFIED DOMESTIC RELATIONS ORDERS.—The Secretary shall prescribe such regulations as may be necessary to coordinate the requirements of sections 401(a)(13)(B) and 414(p) (and the regulations issued by the Secretary of Labor thereunder) with the other provisions of this chapter."

(4) CLERICAL AMENDMENTS.—

(A) AMENDMENTS OF INTERNAL REVENUE CODE.—

(i) Subparagraph (F) of section 402(a)(6) is amended by striking out "paragraph (5)(A)" and inserting in lieu thereof "paragraph (5)".

(ii) Clause (i) of section 414(p)(1)(B) is amended by striking out "to a spouse," and inserting in lieu thereof "to a spouse, former spouse,".

(iii) Clause (i) of section 414(p)(6)(A) is amended by striking out "any other alternate payee" and inserting in lieu thereof "each alternate payee".

(iv) Subparagraph (B) of section 414(p)(5) is amended by striking out "the surviving spouse" and inserting in lieu thereof "the surviving former spouse".

(v) Subsection (p) of section 414 is amended by striking out the last sentence of paragraph (5), by redesignating paragraph (9) as paragraph (10), and by inserting after paragraph (8) the following new paragraph:

"(9) WAIVER OF CERTAIN DISTRIBUTION REQUIREMENTS.—

"(A) IN GENERAL.—With respect to the requirements of subsection (a) or (k) of section 401 which prohibit payment of benefits before termination of employment, a plan shall not be treated as failing to meet such requirements solely by reason of payments to an alternate payee pursuant to a qualified domestic relations order.

"(B) WAIVER APPLIES ONLY IF PRESENT VALUE OF PAYMENTS DOES NOT EXCEED $3,500.—Subparagraph (A) shall not apply with respect to payments to an alternate payee pursuant to a qualified domestic relations order if the present value of the payments to such payee pursuant to such order exceed $3,500.

"(C) PRESENT VALUE.—For purposes of subparagraph (B), the present value shall be determined—

"(i) as of the date of the first payment to the alternate payee pursuant to such order, and

"(ii) by using an interest rate not greater than the interest rate which would be used (as of the date of such first payment) by the Pension Benefit Guaranty Corporation for purposes of determining the present value of a lump sum distribution on plan termination."

(B) AMENDMENTS OF ERISA.—

(i) Clause (ii) of section 206(d)(3)(F) of the Employee Retirement Income Security Act of 1974 is amended by striking out "the former spouse" an inserting in lieu thereof "the surviving former spouse".

(ii) Subclause (I) of section 206(d)(3)(G)(i) of such Act is amended by striking out "any other alternate payee" and inserting in lieu thereof "each alternate payee".

(d) AMENDMENTS RELATED TO SECTION 207 OF THE ACT.—

(1) Paragraph (1) of section 402(f) (relating to written explanation to recipients of distribution eligible for rollover treatment) is amended by striking out "qualified rollover distribution" and inserting in lieu thereof "eligible rollover distribution".

(2) Paragraph (2) of section 402(f) is amended to read as follows:

"(2) DEFINITIONS.—for purposes of this subsection—

"(A) ELIGIBLE ROLLOVER DISTRIBUTION.—The term 'eligible rollover distribution' means any distribution any portion of which may be excluded from gross income under subsection (a)(5) of this section or subsection (a)(4) of section 403 if transferred to an eligible retirement plan in accordance with the requirements of such subsection.

"(B) ELIGIBLE RETIREMENT PLAN.—The term 'eligible retirement plan' has the meaning given such term by subsection (a)(5)(E)(iv)."

(e) AMENDMENT RELATED TO SECTION 301 OF THE ACT.—Paragraph (1) of section 204(g) of the Employee Retirement Income Security Act of 1974 is amended by striking out "section 302(c)(8)" and inserting in lieu thereof "section 302(c)(8) or 4281".

(f) AMENDMENTS RELATED TO SECTION 303 OF THE ACT.—

(1) Subsection (c) of section 303 of the Retirement Equity Act of 1984 (relating to transitional rule for requirement of joint and survivor annuity and preretirement survivor annuity) is amended by adding at the end thereof the following new paragraph:

"(4) ELIMINATION OF DOUBLE DEATH BENEFITS.—

"(A) IN GENERAL.—In the case of a participant described in paragraph (2), the amount of any death benefit (other than a qualified joint and survivor annuity or a qualified preretirement survivor annuity) payable to any beneficiary shall be reduced by the amount payable to the surviving spouse of such participant by reason of paragraph (2).

"(B) SPOUSE MAY WAIVE PROVISIONS OF PARAGRAPH (2).—In the case of any participant described in paragraph (2), the surviving spouse of such participant may waive the provisions of paragraph (2). Such waiver shall be made on or before the close of the first plan year to which the amendments made by this Act apply. Such a waiver shall not be treated as a transfer of property for purposes of chapter 12 of the Internal Revenue Code of 1954 and shall not be treated as an assignment or alienation for purposes of section 401(a)(13) of the Internal Revenue Code of 1954 or section 206(d) of the Employee Retirement Income Security Act of 1974."

(2) Subparagraph (A) of section 303(e)(2) of the Retirement Equity Act of 1984 (relating to treatment of certain participants who perform services on or after January 1, 1976) is amended by striking out "in the first plan year" and inserting in lieu thereof "in any plan year".

SEC. 3. EFFECTIVE DATE.

Except as otherwise provided in section 2 of this Act, any amendment made by section 2 of this Act shall take take effect as if included in the provision of the Retirement

Equity Act of 1984 to which such amendment relates.●

COMPARABLE WORTH

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SHUMWAY. Mr. Speaker, I am distressed over the shortsightedness of comparable worth advocates who have sought to foist their opinions of the wage gap on the American public by insisting upon a study—based on comparable worth—of sex discrimination in the Federal work force. These proponents' well intentioned but faulty arguments strain the meaning of equality, and they mistakenly seek to make changes in the earnings gap numbers without treating the underlying causes of wage disparity. Enactment of comparable worth might well eliminate the wage gap, but it would just as certainly eliminate the mechanism which provides the only just and fair evaluation of worth: the free market system.

The foundation of the comparable worth theory is built upon two faulty presumptions: (1) the only explanation of the wage gap is sex discrimination, and (2) each job has a measurable economic worth which can be logically and objectively determined. With regard to the first misunderstanding, it is a fact that, according to the Bureau of Labor Statistics, women have earned only between 61 and 67 percent as much as men during the past 5 years. Nearly half of all women workers are clustered into 20 of the Bureau's 440 occupations. But unmentioned by proponents of comparable worth is the fact that, despite modern changes allowing greater opportunities for women to participate in the workforce, the habits and tendencies of women as a group with respect to employment are significantly different from men.

For example, women still obtain fewer advanced degrees than men and tend to acquire them in fields with less earnings potential; women work an average of 35.7 hours a week, compared to 44 for men; they are 11 times more likely to leave the work force before retirement than men; and they are more willing to trade off higher pay for other perceived benefits, that is, greater flexibility for entry and exit from the work force, and sedentary indoor work. Interestingly, the wage gap is virtually eliminated when wages of males and females with equivalent education, seniority, hours on the job, and other factors unrelated to discrimination are compared, a fact that may be attributed to a combination of the free market system and the laws which prohibit women from being paid different salaries than men simply because of their sex. Thus, sex discrimination may be considered one factor of wage disparity, but it is by no means the only factor.

Additionally, there is no inherent economic worth to a job. Worth is an elusive concept which constantly changes because of competition, consumer preferences, individual merit or experience, new technology, or other market forces. Simply put, different jobs, such as electronic engineers and nurses, truckdrivers and secretaries, are not equal; they may or may not be of equal worth to the public, but such decisions cannot be made by either individuals or the Government because of their inherent subjectiveness. Comparable worth advocates would have us believe that the only solution to wage disparity is to establish a Government-controlled regulatory agency which would determine the worth of jobs, but in actuality the mechanism for making such decisions is already in place. The free market system, if left unhampered, has been and will continue to be the most reliable, fair, and objective means of determining the worth of all jobs.

It is indeed tragic to realize that even today—over 20 years since enactment of equal pay legislation—there continue to be instances in which women—and also blacks, Hispanics, the handicapped, and the elderly—are discriminated against. However, these proven instances of discrimination should not lead us to assume that our present laws have failed; certainly, we should avoid any temptation to change statistics which reflect disparity without treating their underlying causes. Unfortunately, this is the approach which is being pursued of advocates of comparable worth.

Thus, rather than demanding enactment of comparable worth legislation, which would only change the numbers of the wage gap, I urge my colleagues to join with me to instead ensure equal opportunity for women by promoting equal pay for equal work, remedying proven instances of wage discrimination, ensuring that existing rights under existing law are understood, and continuing to remove artificial barriers which keep women out of certain professions.●

THE HEMISPHERE'S BEST HOPE IS IN CONTADORA, NOT CONTRAS

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DELLUMS. Mr. Speaker, as we direct our attention to the administration's request for funding of the "Reaganistas" or "Contras," it is important to take a hard look at the ramifications of such an act.

It is time that Congress finally realize that militarism and adventurism cannot resolve the issues that give rise to war. This is not a naive idealistic assertion, but a calculated view of fitting solutions to problems. Funding mercenaries to destabilize or overthrow the Sandinista Government will not bring a peace to Central America, it will continue the war in Central America.

The domestic and international consequences of a continued policy of violence are enormous. Moreover, the administration in its all-consuming zeal to counter what it considers a monolithic Communist threat, offers a policy which, ironically, comes to increasingly resemble the behavior of the Soviet Union.

In the opinion section of the Sunday, March 10 edition of the Los Angeles Times, the noted author, Carlos Fuentes, details the counterproductive nature of this course of action. I commend it to my colleagues. The op-ed piece follows:

THE HEMISPHERE'S BEST HOPE IS IN CONTADORA, NOT CONTRA

(By Carlos Fuentes)

The option in Central America is diplomacy or war. The four Contadora nations—Colombia, Mexico, Panama and Venezuela—have worked patiently to create legal instruments and to maintain a forum for discussion. Their option, supported by the majority of the Latin American nations and by Spain, Portugal and the European Economic Community, is the option for political solutions and diplomatic imagination.

The United States does not seem to have a clear option. It would like to unseat the Sandinistas in Managua, but it's unsure whether this should be done by erosion or by intervention. It arms and directs bands of mercenary *contras* against the Nicaraguan government from bases in Honduras, but accuses Nicaragua of menacing its neighbors. It has practiced state terrorism through CIA-written booklets, mined harbors in Nicarauga, promoted the murder of citizens and the destruction of crops and schools, but will not face the consequences of its actions in the World Court at The Hague—the same court the United States accepts readily when the issue is Iranian terrorism. It refuses the court's jurisdiction, saying that the Security Council and Contadora are the appropriate forums to hear Nicaragua's case. But, simultaneously, it will not admit that same case in the Security Council and it boycotts the effectiveness of Contadora.

Moreover, the United States has violated its own Neutrality Acts and the House-passed Boland Amendment of 1983 (which cut off all secret U.S. military aid to the anti-Sandinistas) by arming the *contras* and directing their actions to the overthrow of a foreign government. The United States does not achieve its ends: It admits that *contras* cannot topple the Sandinistas but it declares it will not invade. It therefore espouses frustration as a policy, and frustration is then disguised by dangerous rhetoric.

President Ronald Reagan calls the *contras* "freedom fighters." This provokes fits of laughter in Latin America. A "freedom fighter" is one who fights for the independence of his country against the dependence induced on it by the major regional power.

The Afghans and the Poles who struggle against Soviet domination of their countries are freedom fighters. But if Alexander Dubcek had triumphed in Czechoslovakia in 1968 and Moscow had then sent mercenary *contras* to overthrow the "Prague Spring," would these be called "freedom fighters?" No, they would be stooges of Moscow, just as the *contras* are stooges of Washington.

The military command of the *contras* is headed by Col. Enrique Adolfo Bermudez, who entered Gen. Anastasio Somaza's National Guard in 1952 and served the ousted dictator without a squeak for 25 years. His chief deputies include several other Somaza lieutenants.

Washington's problem with the Sandinistas is historic: This is the first Nicaraguan government that acts independently of the United States. Reagan may ignore the history of Nicaragua; the Nicaraguans can't afford to: Perhaps no other nation in this hemisphere—not Mexico, not Cuba—has been so consistently abused by the United States, from the usurpation of the country by the American adventurer William Walker in 1855 to the overthrow of President Jose Santos Zelaya by the Taft Administration in 1909, to the occupation by the Marines from 1913 to 1933, to the signing of the Bryan-Chamorro Treaty in 1916 that turned Nicaragua into an American protectorate, to the murder of Cesar Augusto Sandino and the installation of the Somoza dynasty, a dictatorship nurtured and protected by Washington for more than 40 years.

Even Secretary of State George P. Shultz, who knows better, has had to put on his war bonnet. He says that this hemisphere will not tolerate an extension of the Brezhnev Doctrine that, in the aftermath of the invasion of Czechoslovakia in 1968, declared that any country that once enters the Soviet sphere, never leaves it.

Yet, in effect, what the Reagan Administration has been practicing is what George W. Ball, the former under secretary of state and U.N. representative, calls "the reverse Brezhnev Doctrine": A country in the United States sphere of influence can never leave it. The behavior of the United States thus comes to resemble the behavior of the Soviet Union more and more: The superpower is alone unto itself.

But the United States is *not* the Soviet Union: It is a highly developed and democratic society and it cannot behave like the Soviets without finally paying a high price in domestic, if not in international, terms.

The latest escalation against Nicaragua has cost the United States many friends abroad. But it will also lose many supporters inside the United States: The hot-plate rhetoric of Reagan promises more than it can deliver, creates expectations followed by frustrations and derails domestic programs that the people of the United States are truly concerned about. Is there no other way to act? In Latin America, we believe there is.

The Contadora nations have given the United States the political option it does not have; their initiative for peace and cooperation in Central America is the product of two years of serious negotiations between all five Central American countries. Their agreement offers the nations in the region, including the United States, all the security guarantees they wish for. But Washington, which prides itself in knowing when every toilet is flushed in Managua, did not calculate that the Sandinista government would offer to sign the Contadora pact. When it did, then Contadora became worthless. After concessions made by Nicaragua to the Contadora nations, the Contadora process seems to have revived. But it is currently a lame process, with the Reagan Administration paying lip service but working to sabotage it with the hypocrisy of an international Uriah Heep.

Yet it is an illusion to believe that the disappearance of space for political dialogue will solve any problems in Central America.

The *contras* cannot overthrow the Nicaraguan government. That can only be achieved through direct intervention by U.S. armed forces, and that would plunge the United States into a ferocious civil war that would then certainly overflow into Honduras, Costa Rica, even Guatemala.

And throughout Latin America, an invasion of Nicaragua could be the detonator the explosive continent is awaiting. Yet another gringo invasion would be an intolerable humiliation, a moral and political trigger to ignite issues of inflation, unemployment, debt, fragile democracies and disillusioned middle classes. Latin America is waiting for a reason to blow up. It has many negative reasons for doing so. Reagan could give it the positive reason: self defense against the United States on a scale, and with consequences, that no one in Washington seems capable of imagining.

Latin America is ready to find its unity under the banner of nationalist affirmation against the United States. The Contadora process would then become a continental process, an affirmation of our will to be ourselves, negotiate by ourselves and find Latin American solutions to Latin American problems. It would end by effectively excluding the United States from many Latin American positions, opening Latin America up to greater Japanese, Western European and Soviet Bloc relationships, in effect furthering policies for a multipolar world and weakening both the United States and the Soviet Union.

The events of the past few weeks could become the Sarajevo of a Central American war or they could signal the urgency of stopping an irrational snowballing of bellicose acts. This is the last chance to negotiate seriously, through Contadora, which has always been the best chance for the United States.

The Contadora nations are not Marxist-Leninist states, nor are they manipulated by the Soviet Union. They are proved friends of the United States. Their initiative is the product of the political will of Presidents Miguel de la Madrid of Mexico, Nicloas Ardito Barletta of Panama, Belisario Betancur of Columbia and Jaime Lusinchi of Venezuela. President Reagan can still prove his good will by meeting urgently with all four of them and reviving diplomacy before war, irreparably, takes over.

There are no perfect bargains in diplomacy. But the costliest thing the Reagan Administration can do in Central America is to wage war. Its best bargain is to give something up—its Central American raj—and gain the friendship, nonalignment, economic partnership and political respect of five nearby nations.

The rest of the content has now understood that as it moves towards greater independence and self-determination, it will probably have to face mercenaries disguised as "freedom fighters," "our brothers" and the mortal equivalents of Simon Bolivar. Ronald Reagan has done the United States the greatest disservice in Latin America by reminding everyone where the danger comes from. We will not cry "uncle."●

PRESIDENTIAL VISIT TO BITBURG WRONG

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. WYDEN. Mr. Speaker, I rise today to introduce a resolution urging President Reagan to cancel his planned trip to the Bitburg military cemetery—and avoid anguish such a trip would cause thousands of American veterans, their families, and Jews everywhere.

For the highest ranking official in the United States to lay a wreath at a cemetery where SS officers and other high-level Nazi personnel are buried is unthinkable.

We are not talking here about a simple difference of opinion that we can not cancel with a handshake, an exchange of pleasantries, and a few diplomatic niceties.

We are talking about a military regime that heaped upon humanity some of the worst atrocities of all time. A regime that herded men, women and children into gas chambers without a second thought—and used other human beings for experiments that are beyond unthinkable. A regime that issued death warrants for no greater cause than that an individual embraced a different religion, a different way of life or a different philosophy. A regime that inflicted wounds that no amount of time will—or should—heal.

I heard just moments ago of a World War II veteran who has returned his hard-earned medals to the President to protest Mr. Reagan's decision to visit the Bitburg cemetery. I'm certain that many Americans share his sentiments—and believe that this visit diminishes the sacrifice of those courageous Americans whose lives were taken from them. It also makes light of those who left their youth on the battlefields of Germany and Eastern Europe in the fight to preserve freedom of religion, freedom of speech, and freedom of thought.

As William Safire wrote in the New York Times today, the events of the past few weeks are guaranteed to revivify the nightmares of Nazi terror. I cannot believe that the President wants these horrifying memories reignited, and I urge him to act now to ensure they are not.

My resolution is a simple one. It expresses the sense of the House that, given the atrocities committed by the Nazis in World War II and the inappropriateness of the President of the United States memorializing the participants in these acts, the President should cancel his planned visit to the military cemetery at Bitburg.

I urge my colleagues to join me in sending this message to the President, and I urge him to act upon it immediately.

Following is the full text of the resolution:

H. RES. 135

Whereas the Nazi party, and in particular members of the SS, committed atrocities against humanity during World War II;

Whereas it would be inappropriate for the President of the United States to memorialize the participants in such atrocities; and

Whereas the military cemetery at Bitburg, Federal Republic of Germany, contains the graves of Nazi and SS soldiers for World War II who fought against and took the lives of thousands of American and Allied troops; Now, therefore, be it.

Resolved by the House of Representatives, That it is the sense of the House that the President should not visit the military cemetery at Bitburg, Federal Republic of Germany, during his upcoming trip to Germany.●

ARMENIA, HISTORY AND GUILT

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FRANK. Mr. Speaker, I am proud to be a cosponsor of House Joint Resolution 192, commemorating "Man's Inhumanity to Man," introduced by my colleague, Mr. COELHO of California. The Boston Globe today published an editorial which very lucidly explains the rationale behind this resolution. I urge my colleagues to read this article, and to cosponsor this resolution if they have not already done so.

The editorial follows:

[From the Boston Globe, Apr. 18, 1985]

ARMENIA, HISTORY AND GUILT

President Reagan shocked many Americans with his explanation of why he thought he should not visit Dachau during his trip to Germany in May. The President said the German people have "a guilt feeling that's been imposed upon them, and I just think it's unnecessary." He intimated that Americans are wrong to expect German guilt for the Holocaust; that the Germans themselves feel no guilt; or that there was never anything for anyone to be guilty of.

The President displayed a similar confusion about history and morality earlier this month, before the visit of Turkey's prime minister. The White House released the text of a statement Reagan made to a Turkish interviewer in which he dissociated his Administration from a unanimous congressional resolution commemorating April 24th, the 70th anniversary of the Armenian genocide, as a National Day of Remembrance of Man's Inhumanity to Man.

The Turkish slaughter of 1,500,000 Armenians from 1915 to 1918 was a ghastly crime against humanity, the great precedent for 20th-century genocide. "Who still talks nowadays of the extermination of the Armenians?" was the rhetorical question Hitler posed to his top commanders on Aug. 22, 1939, as they prepared for the invasion of Poland.

This week, in response to public dismay, Reagan changed his mind and decided to make a symbolic visit to a concentration camp site. Generosity requires that Americans assume their President merely became confused and misspoke when he made his strange remarks about the imposition of guilt.

In his remarks to the Turkish interviewer, Reagan said: "I sympathize with all those who suffered during the tragic events of 1915. I also profoundly regret that Turks and Armenians have so far not been able to resolve their differences." This was a way of saying he would not contradict Turkey's official denial that the Armenian genocide even took place. He then said that he opposed the congressional resolution because it "might inadvertently encourage or reward terrorist attacks on Turks and Turkish-Americans" and because it "could harm relations with an important ally.

The world can only deplore the insane acts of a few Armenian terrorists. They harm the just cause of the Armenian people. Nevertheless, Reagan violates logic when he pretends that the existence of Armenian terrorists constitutes a reason for rejecting the resolution.

Testifying against the resolution in February, Defense Secretary Caspar Weinberger asserted that "such resolutions are counterproductive in that they serve to encourage Armenian terrorists." Like the President, Weinberger revealed his true motive when he said. "This resolution would embarrass the United States and strain relations with this critical ally (Turkey)."

For reasons of State, Weinberger and Reagan have distorted history and offended the victims of genocide. The American people owe an apology to Armenians for the callousness of American officials.●

RESTORE FUNDING TO THE CONTRAS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RITTER. Mr. Speaker, I would like to call attention to an excellent article written by Georgie Anne Geyer dealing with the issue of restoring funding to the Contras. As we debate this important issue in the Congress, I believe her words and ideas merit special attention.

I include the text of her article here:

RESTORE FUDING TO THE CONTRAS

(By Georgie Anne Geyer)

WASHINGTON.—Should the United States continue to support the "contras" fighting the Marxist Sandinista government of Nicaragua? The answer is "yes," for many reasons.

First of all, the $14 million sum that President Reagan is asking from a recalcitrant Congress is a paltry one. Its significance to the 20,000 contra fighters is substantial, but its significance elsewhere is crucial: It says that the United States is not going to make a pattern of backing groups spasmodically and then leaving them self-righteously in the lurch.

But there is another element here. Just who was it anyway who gave the initial approval for the funding of the contras four years ago? Well, it was the very same Congress—and if its members really believed that those Nicaraguans were going out to fight and die to interdict arms to El Salvador, as the administration liked guilefully to say, well, then we ought to consider whether people that naive can run a country like ours.

No, it ill behooves Congress—now that, because the situation is not 100 percent pure, it finds itself uncomfortable with what it did four years ago—in effect to double-cross the men it put out there to fight and die. Once that decision was made, there should have been no room for endless second-guessing.

Second, it is simply no longer true—as many of a liberal bent are claiming—that today's "contras" are ruled by the wholly discredited and hated former Somocista National Guard. Ex-members of the national guard represent a minority of the fighting contras.

Moreover, from all the reports I get from Nicaragua from various sources, discontent with the Sandinistas is growing by leaps and bounds. Approximately 500 men join the contras every week.

Moreover, the pressure of the contras is working. There is no question that their pressure has caused what bending we begin to see in the Sandinistas, whether the very limited elections of last fall or the remaining religious freedom.

Very well, but what about the Sandinistas? We know they are not really behind the "totalitarian" curtain that the president loves to describe. They are a new kind of leftist, but basically quite traditional, Latin socialist caudillo; men within the Latin style who just don't want to give up power but who operate under the accoutrements of modern socialist rhetoric.

Why does President Reagan then compare the contras to the American founding fathers? That's a good question, too. It would be so much better to describe them accurately, because these wild exaggerations only turn off many honorable people who think that if the president is wrong on this, he is wrong on everything.

But, as reformist Salvadoran President Jose Napoleon Duarte, the splendid Christian Democrat, has said: Without the contras, his own rapidly developing attempts at democratic reform (or, perhaps better said, democratic revolution) in El Salvador would be threatened by the Sandinistas' intervention with and arming of Salvadoran marxist guerrillas. This is of the greatest significance—this, and the ideological and subversive threat the Sandinistas openly hold to democracies such as Costa Rica and Honduras.●

WE MUST ACT WHEN WE SEE THE START OF EVIL

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SOLARZ. Mr. Speaker, today in the rotunda of the Capitol, we observed the national civic commemoration of the 40th anniversary of the liberation of the death camps by the U.S. Army, and the remembrance of those who died in the Holocaust.

One of the speakers at that most moving event was the senior Senator

from Rhode Island, the Honorable CLAIBORNE PELL, with whom I have been privileged to serve as a member of the National Holocaust Memorial Council.

It was particularly fitting that Senator PELL was asked to address this commemoration of the victims of the Nazi Holocaust, since his family was among the handful of Americans who publicly and persistently spoke up in opposition to the persecution and destruction of the Jews of Europe.

Herbert Pell, the Senator's father, served as the U.S. delegate to the International War Crimes Commission, where he played a prominent role in the effort to bring to justice those responsible for the death of 6 million Jews, and other atrocities of the Nazi regime.

Senator PELL has continued his family's proud tradition of advocacy and support for human rights and democracy. He is a significant and persistent advocate of the rights of the oppressed and a champion of human rights. His distinguished career in the Senate has advanced the understanding and appreciation of human rights as a keystone of American foreign policy.

Mr. Speaker, I ask that the moving comments of Senator PELL be reprinted in today's CONGRESSIONAL RECORD.

Why are we memorializing the most massive and darkest example of man's inhumanity to man? Why?

The reason is to seek to prevent such inhumanity occurring again—and to be alert to the need to snuff out those same dreadful instincts that turned human beings like you and me into beasts.

Let us remember, too, Dante's words so oft quoted by our murdered colleague, Bob Kennedy, "He who sees, stands by and does nothing, as evil is performed, is just as guilty as he who performs it."

Here we must remember how we stood by as millions of Jews and Gentiles and gypsies were murdered.

Examples?

We returned the passenger vessel *St. Louis*, with its load of 900 Jews back to Bremen and the concentration camps of Europe.

We declined to change our immigration laws on jot.

Even then, we declined to take in most of those unfortunate human beings who were clamoring at our consulates for visas. In fact in 1944, only 9 percent of our visa allotment was even used.

And, as reads our War Department telegram presently exhibited at Vad Yashem, we even refused to bomb the rail line between Kosice and Presov over which the Nazi victims were transported to Auschwitz.

We did all too little 40 years ago. What can we do now?

One thing we in the Senate can do is to ratify the Genocide Convention—and this I look forward to our soon doing in as unhampered a form as possible. And here I have a personal interest, too, as its ratification would have given much satisfaction to my father, Herbert Pell, who was the American Representatives to the United Nations War Crimes Commission and who played such a role in having genocide considered a war crime by our government just 40 years ago this spring.

More important, let us remember that the seeds of evil are always present, but their growth can be halted by ceremonies of remembrance like this and by other activities, actions and advice of the Holocaust Commission—and by all of us not standing by when we see the start of evil.●

H.R. 1082 ESTABLISHES EXISTING CONGRESSIONAL MONITORING OF INTELLIGENCE FUNDING AS PERMANENT LAW

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. STUMP. Mr. Speaker, to conduct intelligence activities effectively, the executive branch needs flexibility in funding such activities. To exercise wisely the power to grant or withhold scarce taxpayer dollars for intelligence activities, the Congress needs complete, timely, and accurate information on the use of funds for such activites.

For the past 4 years, the Congress and the President have agreed on a statutory provision, renewed annually, which accommodates both the executive's need for flexibility in conducting intelligence activities and the legislature's need for information in monitoring use of Government funds for intelligence activities. The agreed-upon provision has appeared in statute each year since 1981, with a few changes dictated by experience, as section 103 of the annual Intelligence Authorization Act.

The provision has proved to be workable, and the time has come to make it permanent law. Section 102 of H.R. 1082, the Omnibus Intelligence and Security Improvements Act, amends the National Security Act of 1947 to place in permanent law the provision which the Congress has renewed annually as section 103 of the Intelligence Authorization Act. Section 102 of H.R. 1082 provides:

"SEC. 102. (a) Title V of the National Security Act of 1947 is amended by adding at the end thereof the following:

"CONGRESSIONAL NOTIFICATION OF EXPENDITURES IN EXCESS OF PROGRAM AUTHORIZATIONS

"SEC. 502. During any fiscal year, funds may not be made available for any intelligence or intelligence-related activity unless such funds have been specifically authorized for such activity, or, in the case of funds appropriated for a different activity, unless the Director of Central Intelligence or the Secretary of Defense has notified the appropriate committees of Congress of the intent to make such funds available for such activity, exceept that, in no case may reprogramming or transfer authority be used by the Director of Central Intelligence or the Secrertary of Defense unless for higher priority intelligence or intelligence-related activities based on unforeseen requirements, than those for which funds were originally authorized, and in no case where the intelligence or intelligence-related activity for which funds were requested has been denied by Congress.".

"(b) The table of contents of the National Security Act of 1947 is amended by adding after the entry for section 501 the following:

"SEC. 502. Congressional notification of expenditures in excess of program authorizations.".

Section 102 of H.R. 1082, like its annually enacted predecessor provisions, requires, as a precondition to making funds available for an intelligence activity, either specific advance congressional authorization by statute to make the funds available for the activity or prior notification to the intelligence committees of Congress of the intent to make the funds available for the activity. The requirement for either specific authorization or prior notification ensures that Congress has the information it needs to exercise wisely its power of the purse. The provision also accommodates the executive branch's need for flexibility in intelligence funding so that it can take advantage of unforeseen, fleeting opportunities to collect important intelligence or favorably influence events.

This standard provision for specific authorization or prior notification was designed and continues to function as a policy-neutral provision. The provision does not authorize or prohibit any specific kinds of intelligence activities. The provision simply ensures that Congress has the information it needs to exercise its fiscal powers and to verify that its fiscal decisions are followed. Placing the provisions in permanent law rather than the annually enacted Intelligence Authorization Act would ensure that the Congress receives the funding information it needs in all circumstances, even during the funding hiatus that may occur at the beginning of a fiscal year when the previous year's Intelligence Authorization Act authorization/notification provision has expired.

Enactment of section 102 of H.R. 1082 will assist in establishing a permanent, stable, and effective working relationship between the executive and legislative branches in the funding of intelligence activities.●

REAGAN'S AWKWARD CONTRADICTION

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DELLUMS. Mr. Speaker, in the contradictory foreign policies of the Reagan administration toward the nations of Nicaragua and South Africa, there exists an embarrassing situation which is nothing short of sheer hypocrisy.

Mr. Dan Gray, a constituent of mine from Oakland, has called my attention to an excellent column by Ms. Brenda Payton which appeared in the Oakland Tribune recently. I agree with Mr. Gray that it is worth sharing with my colleagues.

REAGAN'S AWKWARD CONTRADICTION

(By Brenda Payton)

The only thing wrong with Ronald Reagan's foreign policy is that he's got the wrong country with the right policy. Maybe someone slipped the Nicaragua position papers in the South Africa folder, and vice versa.

Because if he applied his hard line on Nicaragua to South Africa, and extended the quiet diplomacy afforded South Africa to Nicaragua, his policy would make sense.

Accepting the Reagan administration rhetoric that the Nicaraguan government is retreating from its promise of democratic freedoms (which I don't), wouldn't the support and guidance of the U.S. government be more effective than attempts to overthrow the Sandinista government? Attempts that only create an at-war mentality that tightens rather than loosens restrictions.

Conversely, how can "constructive engagement" be effective in moving the South African government, which gets a perverse pleasure from thumbing its nose at the basic universal standards of human decency? Just last week police fired on a crowd of unarmed demonstrators, killing 18, and then arrested 13 black activists, charging them with treason— a crime punishable by death.

Those questions are only logical, however, if the stated interests of the Reagan administration—to support change to benefit the majorities in both countries—are the real interests.

Rather, we have a declaration of war against a country struggling to harvest its coffee crop, and the coddling of a government where unarmed demonstrators are routinely killed and dissidents are arrested, tortured and imprisoned.

It makes for some awkward contradictions.

On one hand, in Reagan's most recent and strongest blast at Nicaragua, he says his goal is to remove the Sandinista government in the sense it is "a Communist, totalitarian state, and it is not a government chosen by the people . . ."

The extent of the people's support of the Sandinistas is a matter of debate. The Reagan administration conveniently dismisses the November elections, but the Sandinistas won 67 percent of the vote and opposition parties won almost one-third of the National Assembly.

The Sandinistas' popularity may be a point of discussion, but there is no debate in South Africa. The uncontested fact there is that 73 percent of the citizens—the black majority—does not have the right to vote. While the Reagan administration called the Nicaragua elections a "Soviet-style sham," the sham of the recent South African elections, which for the first time included Indians and "Coloreds" but still excluded black citizens, was heralded as progress.

In Reagan's words, the Sandinistas don't have a "decent leg to stand on." What could be more indecent than the disenfranchisement, by race, of nearly three-quarters of a population?

But South Africa, according to Reagan's rhetoric, is a sovereign state whose policies can only be changed by influence, not dictate. Is Nicaragua any less sovereign? Or is that a consideration only given to friendly governments?

The Reagan administration says it opposes economic sanctions against South Africa, including the withdrawal of U.S. investments, because they would only worsen the situation for the country's black population. According to that argument, U.S. companies should remain in South Africa as a force for change. Have they accomplished significant change to date? And only about 36 percent of the employees of U.S. companies are black. If U.S. companies withdrew in protest of apartheid, the white rather than the black population would suffer most, making apartheid more costly to those whom it currently benefits.

On the other hand, Reagan does not share the same concern about worsening the conditions for the Nicaraguan people, a people, he says we have a historic duty to liberate. The U.S. economic sanctions aganst Nicaragua, support of the contras and the resulting military conflict have greatly undermined the Nicaraguan economy. Earlier this month the government was forced to devalue the currency as a result.

Or maybe Nicaraguans hurt less than black South Africans.

In Reaganspeak, the contras fighting the Sandinistas are freedom fighters, but the black South African activists who are imprisoned and tortured are truly unsung heroes. The recent arrest of 13 activists was only regretful to the Reagan administration, which remains silent about the murder of 18 unarmed demonstrators.

Last week Secretary of State George Shultz said, "We have a moral duty to help people trying to bring about the freedom of their country." Is that a fact? Or only a convenience?●

COAL SLURRY PIPELINES PROMOTE COMPETITION

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. UDALL. Mr. Speaker, the House is now considering the sale of Conrail to the Norfolk Southern Railroad. This merger would be the most recent in a trend that has created a small number of very profitable rail giants. The five largest railroads, the Burlington Northern, CSX, Santa Fe/Southern Pacific, the Union Pacific, and the Norfolk Southern, are all products of recent mergers or have recently acquired major new transportation subsidiaries.

One important issue inadequately addressed in the wake of these mergers and acquisitions is the effect of the reduced number of railroads on consumers, particularly those who use coal-generated electricity. Recently, Dr. Mark Cooper, of the Consumer Federation of America, estimated that high rail rates for coal haulage add $1.3 billion to consumer's electric bills.

If railroad deregulation is to be effective, the market must provide regulation through competition. Coal slurry pipelines provide the most efficient, environmentally sound, and cost-effective competition for rail coal haulage. Unfortunately, the major railroads have uniformly refused to grant rights-of-way to this only true competitor and have opposed legislation that would create the power of eminent domain for coal pipelines. To better allow competition to regulate the railroad industry, our support for major mergers and acquisitions should be conditioned on the enactment of such legislation.

I am submitting for the record an article from the Thursday, April 11, Washington Post which details the mammoth size of the railroad industry. I hope that an increase in competition for the railroads, such as coal slurry pipelines could provide, will ease the pressure on consumers caused by recent mergers.

[From the Washington Post, Apr. 11, 1985]

NORFOLK-SOUTHERN RIDING FAST TRACK: CONRAIL PURCHASE IS PART OF NATIONAL SCHEME

(By Nell Henderson)

There may be many opponents to the proposed link-up of Norfolk Southern and Conrail, but all sides agree that Norfolk Southern is one of the strongest and most successful in the industry.

If approved by Congress, Norfolk Southern's purchase of the government-owned Consolidated Rail Corp. will create the country's largest railroad company, a giant with combined revenues of almost $7 billion and more than 30,000 miles of track serving 25 states, Washington, D.C. and Canada.

The merger would leave the country with five major railroads, two of which would dominate the territory east of the Mississippi—Norfolk Southern and CSX Corp. CSX is currently larger than Norfolk Southern but the Conrail merger would tip the scales in the other direction.

Norfolk Southern's Chairman and Chief Executive Robert O. Claytor says the merger would strengthen both Conrail and Norfolk Southern by putting them in a better position to compete with trucking, which he sees as the major competition to railroads.

The acquisition also would be another step in Norfolk Southern's planned evolution into a national transportation company, capable of moving freight over rail, highways and water, or moving information over fiber optic cables.

Transportation Secretary Elizabeth Dole has recommended that Congress approve Norfolk Southern's proposal to pay $1.2 billion for the Government's 85 percent share of Conrail. The Norfolk-based company would pay another $375 million for the 15 percent owned by Conrail's employees.

The proposal has divided the railroad industry, shippers and labor. Opponents fear the combination will hurt competition, leading to higher shipping rates and higher prices for commodities such as coal, grain, chemicals, auto parts and paper products. Supporters believe the merger will create a more efficient system that can lower transportation rates and ease pressure on commodity prices.

Concerned parties also disagree over the alternatives to a merger. Some opponents to the sale believe Conrail could stand alone as a private company. Others believe Norfolk

Southern offers the most secure future for Conrail, which was created in 1976 out of the remains of several collapsed Northeastern railroads and which today suffers a declining traffic base.

Opponents include CSX, the Grand Trunk Western Railroad Co., Conrail management, the Pennsylvania Coal Mining Association, A.T. Massey Coal Co. Inc. and the Brotherhood of Railway & Airline Clerks, which represents 8,000 of Conrail's 25,000 employes.

Supporters of Norfolk Southern's bid include independent railroads such as the Pittsburgh & Lake Erie Railroad and Guilford Transportation Industries, which both have agreed to buy lines and trackage rights divested by the merged company. Others include Ford Motor Co., General Motors Corp., B.F. Goodrich Co. and the South Carolina State Port Authority. The United Transportation Union, representing 8,900 Conrail employes, opposes a public offering and has said it would continue discussions with Norfolk Southern.

Norfolk Southern is itself the product of 1982 merger between the Norfolk and Western Railway and the Southern Railway. Through combining operations, cutting costs, agressive marketing and focusing on high traffic density, the Norfolk-based company has produced the best balance sheet in the business, said Graeme Anne Lidgerwood, an analyst with Kidder, Peabody & Co.

With earnings of $482 million on revenue of $3.52 billion in 1984, and more than $1 billion in cash, Norfolk Southern is more profitable than its rival CSX.

Based in Richmond and competing over similar territory, CSX has 9,000 more route miles and reported 1984 revenues of $7.9 billion—more than double Norfolk Southern's revenues. Yet CSX made a smaller profit, $465 million.

Lidgerwood attributes this partly to Norfolk Southern's efforts to generate large amounts of traffic over existing lines, in contrast to CSX's practice of adding lines with low traffic density. Additionally, Norfolk Southern works hard to attract new business to locate along its lines, markets its services agressively and "is superbly managed," she said.

More important from the Department of Transporation's point of view is Norfolk Southern's cash flow. Sitting on more than $1 billion in cash, the company would have little trouble buying Conrail, making capital improvements and supporting it through a recession, analysts say.

Transportation Secretary Dole has made it clear that she wants to sell Conrail to a company strong enough to see it through bad times, so the government won't have to rescue it again. "The Norfolk Southern is a very fine railroad corporation, with excellent management, the highest standards for maintenance in the industry, a very profitable company," Dole said after accepting the company's bid.

She also called Norfolk's bid "a bird in the hand" compared to the uncertain success of spinning off an independent Conrail through a public offering.

The United States Railway Association staff said last week that Conrail could survive future economic downturns on its own, even if it pays full industry wages and state taxes. Conrail's employes currently earn 12 percent less than the industry norm and the railroad is currently exempt from state taxes.

Norfolk Southern does not agree. It's projections show Conrail will last through the next four years, but will be in a "negative cash position" by the early 1990s, Claytor said. "I suspect that if we don't get it now, [Conrail] will be available in another 10 years at a much reduced price," Claytor said. "We would rather pay more now."

Norfolk Southern could use Conrail now because it fits into its strategy of becoming a national transportation company. Claytor said the future growth of railroads depends on the ability to recapture the business taken by trucking.

Conrail would give Norfolk Southern the long hauls necessary to make a profit on piggyback transport, moving goods loaded on trucks which themselves are carried on railway flat-cars.

Without Conrail, Norfolk Southern can put a piggyback truck on a flat-car in Atlanta and carry it to the end of the line at the Potomac Yard here. From there, the truck may drive to Philadelphia or New York or Baltimore because Conrail could not make money on such a short haul, Claytor said. With Conrail, a truck could be carried profitably from Atlanta to New York on the rail line, he said.

"We want to get this traffic off the 14th Street Bridge and onto the railroad," Clator said. "This means more business for Conrail, and in the long run will make Conrail more profitable . . . while making piggy-back more profitable for Norfolk Southern."

Norfolk Southern has also agreed to acquire North American Van Lines, the nation's fifth largest trucking company, for $315 million, and expects to receive government approval May 1.

The company's investments include a 17.6 percent share of Piedmont Aviation and 3 percent of the Santa Fe Southern Pacific Corp. It also has a letter of intent with Santa Fe to build an 8,000-mile fiber optics network linking 53 cities coast to coast.

Norfolk Southern plans to get into the barge business, but is concentrating now on the van lines and Conrail, Claytor said.

Last year CSX acquired the nation's largest barge company, American Commercial Barge Lines Co.

Claytor said Norfolk Southern believes a variety of transportation modes are needed to compete with trucks, particularly in the important markets of the Northeast.

Currently, both Norfolk Southern and CSX are shut out of the Northeast because Conrail holds a virtual monopoly over rail freight in New York, New Jersey and Pennsylvania.

CSX would not like to see its rival gain that monopoly. CSX Chairman and Chief Executive Hays T. Watkins told a Senate committee the proposed merger "violates every principle of good transportation policy and destroys the competitive framework which is key to the future health of our railroad system."

Mathematically, if Norfolk Southern and Conrail were combined, their profits would be bigger but their revenues would still be smaller than CSX. According to Norfolk Southern, CSX is 43 percent larger in terms of car loadings, while a merged Norfolk Southern-Conrail would be less than 20 percent larger than CSX.●

A BILL TO REAUTHORIZE AND AMEND THE COASTAL ZONE MANAGEMENT ACT OF 1972

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SHUMWAY. Mr. Speaker, today I am introducing a bill to reauthorize and amend the Coastal Zone Management Act [CZMA]. This law was enacted in 1972 as a means of inducing coastal States to develop and implement coastal management programs designed to promote the development of, and protection for, the States' various coastal zones. In doing so, the CZMA would help accomplish needed national, State, and local objectives.

To a large degree, this program has achieved a great deal of its original intent. Twenty-eight of the 35 coastal States and territories under U.S. jurisdiction have developed and implemented federally-approved coastal zone management programs. The Oceanography Subcommittee of the House Merchant Marine and Fisheries Committee has had 2 days of hearings in this Congress on the overall effectiveness of the program and its need for reauthorization, and much evidence was brought forward which, in my mind, indicates that the "inducement-phase" of Federal involvement within coastal management has, in fact, been accomplished; it is, therefore, time to seriously phase-down the Federal financial role in coastal zone management.

Historically, the Federal Government has provided 80 percent of the funding for the development, implementation, and operation of coastal zone management programs for coastal States. However, to maintain this 80-percent Federal share now that the national program is largely in place and operating smoothly, would not be reflective of the largely local or regional nature of the program's benefits. While I believe there is a remaining need for the Federal Government to play some role in coastal zone management over the next 5 years, clearly this need is decreasing as the coastal State programs continue to operate, improve in their coastal management abilities, and continue to become even more regional in nature.

The legislation I am introducing today reflects this need for a Federal phase-down in coastal management financing by reducing the Federal share from 80 percent to 20 percent over 4 years. As well, it reduces the reauthorization levels to reflect this phase-down over the same 4-year period. This gradual reduction will allow coastal States the time needed to plan for the reduction so that they can

make other funding arrangements for their coastal management programs. These Federal funding authorizations and percentages would also ensure that the overall program continues on at its present-day level.

Additionally, this legislation addresses one of the more controversial questions which has arisen through implemenation of, and judicial challenge to, the Coastal Zone Management Act. Last year, the Supreme Court upheld the Federal Government in the case of California versus Watt, saying that oil and gas leasing did not fall under the consistency provision included in section 307(c)(1) of the act.

This decision has stirred much controversy among coastal States who feel their authority to ensure that Federal activities are conducted in a manner which is consistent to the "maximum extent practicable" with their coastal management programs has been undermined. In an effort to settle the question of how the Supreme Court decision affects other federally conducted or supported activities, my bill sets up a consultative process between Federal agencies and coastal States to discuss any concerns that coastal States may have regarding whether a proposed Federal activity is consistent "to the maximum extent practicable" with their federally-approved coastal management program. Moreover, coastal States then have an opportunity to make recommendations with regard to the proposed Federal activity, and recommendations must be accepted by the Federal agency unless the Federal agency determines that the Federal activity is already "consistent to the maximum extent practicable" with the coastal management program, or that acceptance of their recommendation would not be in the national interest.

If the recommendation is not accepted by the Federal agency, that agency is required to advise the coastal State, in writing, why they did not accept the recommendation. This consultative process is intended to help coastal States have substantive imput into Federal activities in instances where proposed Federal activities affect their coastal zones. At the same time, however, it is consistent with section 308(3)(B)(III)(1) of the act which says that nothing in the CZMA shall be construed "to diminish either Federal or State jurisdiction." In other words, although the Federal agency and coastal States should work together in all "practicable" instances of mutual concern, Federal agencies, nevertheless, must be given final authority in decisionmaking regarding Federal activities on Federal lands.

In summary, Mr. Speaker, this bill reauthorizes a program which the Federal Government has set up for the States so that they may help themselves, and in so doing help promote the national interest. In light of the fact that the Federal Government has, in initiating this network of coastal programs, borne the substantive burden of financing these State programs, this legislation also phases-down that Federal role so that coastal States can correspondingly and appropriately pick up their fair share of program costs. It is important, however, to note that it does so in an orderly, gradual, process so that States can assume this large funding role over a period of time.●

H.R. 2099

HON. THOMAS J. RIDGE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RIDGE. Mr. Speaker, yesterday I introduced H.R. 2099, the Automatic Teller Machine Competitive Equity Act of 1985. This legislation is designed to restore the principles embodied in the McFadden Act as applied to ATM systems. It is offered in an attempt to reestablish the applicability of the McFadden Act, which governs the branching of national banks, to automatic teller machines and other electronic devices at which banking functions are being performed.

The McFadden Act, enacted in 1927, sought to establish competitive equality between State and national banks by allowing national banks to branch to the same extent as State banks. A balance was struck between concerns over preventing the concentration of banking resources and the need to ensure the competitiveness of national banks. For the purposes of the National Bank Act, the McFadden Act defines a branch as a place of business "at which deposits are received, or checks paid, or money lent." (12 U.S.C. Sec. 36(f).) The question of whether a particular facility is a branch of a national bank under the McFadden Act is answered solely by the application of this functional test.

Once a particular facility has been determined to be a branch, location is determined by State law under section 36(c) of the act. That section both precludes interstate branching and estalishes competitive equality by allowing national banks to "establish and operate" branches at locations "authorized to State banks by the statute law of the State in question * * * subject to the restrictions as to location imposed by the law of the State on State banks." These provisions have been consistently held to require that the Comptroller must follow State law in approving branches of national banks, including limitations as to banking functions which may be performed at branches. For example, under the McFadden Act, an armored car service has been held to be a branch under the functional definition of the act, making it illegal under Florida law which prohibited banks from having more than one place of business.

The question of whether an ATM, then called a customer bank communication terminal or CBCT, was a branch first arose about a decade ago. In 1976, the U.S. Court of Appeals for the District of Columbia Circuit held that CBCT's are branches within the meaning of the McFadden Act if "deposits are received, checks paid or money lent" at such machines and that the McFadden Act was intended to include virtually all off-premises banking operations. Therein, the court recognized that the reservation of the control of branching to the State was done in order to allow States to safeguard against large concentrations of power. The critical holding in that case was that, "Under the Federal statutory scheme CBCT's are 'branches' within section 36(f)'s Federal definition; therefore, for Federal purposes the State law applicable to CBCT's is a part of the 'branch' banking law of the State, which is incorporated into the National Bank Act by section 36(c)."

However, the U.S. Court of Appeals for the Second Circuit was recently called upon to apply the principles embodied in the McFadden Act to shared ATM networks. That court held that "* * * a national bank's usage of a shared ATM which it does not own or rent, does not constitute the establishment and operation of a branch under sections 36 (c) and (f) of the McFadden Act."

By giving deference to the arbitrary distinction between ATM's "owned or rented" by national banks and those simply "used" by national banks for banking transactions, the court ignored both the prohibition on interstate branching and the deference to State law which are fundamental to the McFadden Act. In so doing, the court upheld a regulation of the Comptroller of the Currency and ignored the earlier court decision that State law applicable to electronic banking devices "is a part of the 'branch' banking law of the State," made applicable to national banks by the McFadden Act. Although the court gave great deference to the interpretive regulation of the Comptroller, it noted that "Should Congress find itself in disagreement with the Comptroller's regulation, which we accept as a legitimate interpretation of the governing statutes, legislative solution is available."

A legislative solution is indeed available. I feel strongly that we must act to restore the principles of the McFadden Act in regard to ATMs. My reasons are as follows:

One, State control of structure as a safeguard against undue concentration of economic power is an important element of our banking system. The dual banking system is unique among world banking systems in that it ensures a great number of institutions of diverse sizes and types. The system also guarantees access to capital in all geographic areas and in all sectors of the economy.

Two, there is a strong public interest in a system of bank supervision which balances the short-term enhancement of competition and the long-term avoidance of anticompetitive tendencies in national credit markets. Maintaining this balance is especially critical in the ATM area since establishment of systems is expensive and susceptible to domination by large institutions, whether as system operators, as franchise operators, or as preferred users on shared systems.

Three, a situation of competitive inequality has been created, in which national banks, through shared ATM's, may offer full banking services on a nationwide basis without regard for the pertinent State laws, including restrictions on the interstate taking of deposits. Rather than restoring competitive equality, as it seems to have intended, the circuit court merely shifted the competitive advantage to national banks. Competitive equality is best maintained by saving the shared ATM systems, but making all of the players subject to the same rules.

Four, the issues involved in the decision are certain to be litigated further, both on appeal to the Supreme Court and on a remanded issue of whether corporations which nominally own an ATM are conducting an illegal banking business on behalf of bank participants in the system. No matter what the final outcome of litigation, the public will be a net loser either short term or long term. No one would allege that the complete dismemberment of our current, extensive share ATM systems is in the public interest, although this could be the result if it is decided that shared ATM's are branches for all purposes. On the other hand, if the recent circuit court decision is left intact, an entire body of State law is preempted and the congressional concern over concentration of economic resources, which underlies the decentralization of control over structure, will be undercut. Only Congress can restrike the balance between these valid, yet competing, public interests. The reinterpretation and reapplication of existing policies established by Congress is a role most properly reserved to Congress.

Five, States, unable to control national bank participation in shared systems, will be forced to limit corporate participation through State statutes designed to prevent deposit-taking as an agent for a bank. States can of course, regulate commerce firms from engaging in a banking business. The valid State interest in controlling the mixing of banking and commerce parallels that of the Federal Government. In fact, the circuit court in the Marine case remanded for resolution by a State court the issue of whether the supermarket which owned the ATM in question was illegally conducting a banking business for resolution by a State court under State law. Unless Congress acts at this juncture, it is conceivable that States, unable to control banking activities through the McFadden Act, will seek to prohibit corporations that are not banks from taking deposits or performing other banking functions through ATM's on their own behalf or as an agent for a bank or bank holding company.

It is for all the above reasons that I introduced H.R. 2099 which would reestablish the principles embodied in the McFadden Act, yet do so in such a way as to permit existing ATM networks to continue to operate. I feel that it is important for Congress, not the courts, to strike the new balance and apply the public interest tests to emerging technologies such as ATM's. Briefly, the bill:

One, amends the McFadden Act to allow for national banks to branch on an interstate basis when the exporting State expressly authorizes out-of-State banks to establish interstate branches within its borders;

Two, restores the principle that State ATM laws are part of the branch banking laws of a State, made applicable to national banks by the McFadden Act;

Three, provides that shared ATM networks do not count toward capitalization of a bank; and

Four, provides a waiver procedure for the OCC to bypass the branch approval process for shared ATM networks.

H.R. 2099 is, in essence, a compromise measure, splitting the difference between competing constituencies and competing public interests. I would appreciate the support of each and every member of the House interested in expanding services for the banking consumer.

H.R. 2099

A bill to restore competitive equity between national and State banks regarding shared automatic teller machine networks

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE

This Act may be cited as the "Automatic Teller Machine Competitive Equity Act of 1985".

SEC. 2. INTERSTATE BRANCHING.

The first sentence of section 5155(c) of the Revised Statutes (12 U.S.C. 36(c)) is amended—

(1) by striking out "and" before "(2)"; and

(2) by inserting before the period at the end thereof the following: "; and (3) within any other State if—

"(A) the statute laws of the State in which the association is located expressly authorize State banks to establish such branches; and

"(B) the statute laws of the State in which the association is seeking to establish such interstate branches expressly authorizes State banks located in the State in which the association is located to establish such interstate branches, subject to restrictions regarding location of branches that such State may impose on such out-of-State banks. In determining whether or to what extent to permit the establishment or operation of a branch by a bank the principal place of business of which is in another State, a State may allow such branching—

"(i) without restriction; or

"(ii) on the basis of—

"(I) the location of the States involved;

"(II) laws providing for reciprocal treatment of banks located in its State; or

"(III) other similar conditions or restrictions".

SEC. 3. STATE BRANCHING LAWS.

Section 5155(c) of the Revised Statutes (12 U.S.C. 36(c)) is amended by adding at the end thereof the following new sentences: "For purposes of this section, State laws applicable to automated teller machines, customer bank communication terminals, point-of-sale terminals, and cash dispensing machines are a part of the branch banking laws of the State and are applicable to national banking associations. In any case in which a State does not have a State law described in the preceding sentence, regulations, rulings, and interpretations which are issued by a State banking regulatory authority in such State and which are applicable to automated teller machines, customer bank communication terminals, point-of-sale terminals, and cash dispensing machines shall be deemed to be a part of the branch banking laws of the State and are applicable to national banking associations.".

SEC. 4. AGGREGATE CAPITAL REQUIREMENTS.

Section 5155(d) of the Revised Statutes (12 U.S.C. 36(d)) is amended by adding at the end thereof the following new sentence: "For purposes of determining the aggregate capital required by this subsection, automated teller machines, customer bank communication terminals, point-of-sale terminals, and cash dispensing machines shall not be considered branches of a national banking association if they are not owned or rented by the national banking association.".

SEC. 5. BRANCH APPROVAL.

Section 5155(e) of the Revised Statutes (12 U.S.C. 36(e)) is amended by adding at the end thereof the following new sentence: "The Comptroller of the Currency may, by regulation, waive the approval requirement of this subsection with regard to automated teller machines, customer bank communication terminals, point-of-sale terminals, and cash dispensing machines which are not owned or rented by a national banking association.".

SECTION-BY-SECTION ANALYSIS

Section 1

Section 1 contains the short title of the bill, the "Automatic Teller Machine Competitive Equity Act of 1985."

Section 2

Section 2 would remove the absolute prohibition on interstate branching by national banks and give them parity with state banks in this regard. Under this provision, both interstate placement of ATM or brick and mortar branches and participation in interstate ATM networks would be permitted for national banks if state banks were allowed to do so under pertinent state laws.

Under Section 2 you have an exporting state, "the state in which the association is located", and a receiving or importing state, "the state in which the association is seeking to establish such interstate branches". Two things must happen before interstate branching may occur:

(1) the exporting state must expressly authorize its banks to establish interstate branches, and

(2) the receiving state must expressly authorize out-of-state banks to establish interstate branches within its borders.

The receiving or importing state may reject interstate branching, it may permit such branching without restriction or it may make its statutory permission conditional.

Section 2 is a necessary part of the bill, since the absolute prohibition on interstate branching of national banks, as applied to ATMs under the relevant case law, would otherwise preclude their participation in interstate ATM networks. While the subject matter of the section is somewhat broader than mere ATM branches, it does nothing more than extend to national banks parity with state bank branching under state law. The practical effect is minimal, since only Massachusetts, Utah and Kentucky currently permit reciprocal interstate branching.

Section 3

Section 3 clarifies the status of ATM branches under the McFadden Act. It provides for the application of state laws to ATMs which perform banking functions irrespective of who owns them. By looking primarily to the functional definition of a branch (1) it ensures that the form of the agreements for system sharing will not be elevated to a position of greater importance than the substance of what is being done, (2) it prevents circumvention of the federal restriction on branch banking and (3) it reestablishes the applicability of the body of state laws regarding electronic banking.

The Supreme Court enunciated the principle that state law applicable to electronic banking devices is a part of the branch banking laws of the state, which is incorporated into the National Bank Act by the McFadden Act. That principle was undercut by a recent U.S. Court of Appeals decision which held that ". . . a national bank's usage of a shared ATM which it does not own or rent, does not constitute the establishment and operation of a branch under Section 36(c) and (f) of the McFadden Act." By giving deference to the arbitrary distinction between ATMs "owned or rented" by national banks and those simply "used" by national banks for banking transactions, the Court ignored both the prohibition on interstate branching and the deference to state law which are fundamental to the McFadden Act. Unless this misapplication of federal law is rectified, full banking services may be offered by anyone, acting as an agent for a bank, on a nationwide basis without regard for the pertinent federal and state laws.

Section 3 reestablishes the principle enunciated by the Supreme Court and prevents its circumvention by the elevation of form over substance. It restores as the primary consideration the banking transactions which are being performed rather than the technical ownership of terminals. And, it does so in a way which permits existing interstate ATM networks to continue to operate.

Section 4

Section 4 would provide for the exclusion of ATMs not owned or rented by a bank from the determination of aggregate capital for that bank.

Section 5

Section 5 would give the OCC the authority to waive the branch approval process for ATMs which are not owned or rented by a bank.

SUMMARY OF IBANYS *v.* MARINE MIDLAND—U.S. COURT OF APPEALS FOR THE SECOND CIRCUIT, DECIDED FEBRUARY 27, 1985

Facts: Customers of Marine Midland Bank, N.A. (Marine) were using an automated teller machine owned by Wegmans Food Markets (Wegmans) to make deposits and cash withdrawals, to obtain cash advances against credit cards, transfer funds between accounts, pay bills and obtain account balance information. Under their agreement, Wegmans services the ATM and Marine operates the "switch" (central computer processing facilities) as a part of the HarMoney shared ATM network. Marine is assessed fees on a transaction basis. The agreement between Marine and Wegmans was entered into in reliance on a regulation of the Comptroller which provided that an ATM was a branch only if it was "owned or rented" by a national bank.

Decision below: U.S. District Court for the Western District of New York enjoined Marine Midland Bank from using an ATM owned and operated by Wegmans Food Markets. 583 F Supp. 1042 (1984). The district court held that Marine's use of the ATM constituted unauthorized branch banking under the McFadden Act.

Main issue: Whether the shared ATM in the Wegmans store is a branch established and operated by Marine.

Held: ". . . a national bank's usage of a shared ATM which it does not own or rent, does not constitute the establishment and operation of a branch under Sections 36(c) and (f) of the McFadden Act." Subissue: Whether Wegmans is conducting a banking business without the requisite state authorization.

Held: ". . . the application of New York Banking Law to Wegmans' provision and maintenance of an ATM should be left to the courts of the state. Accordingly, the judgment below for Wegmans on the pendent claim is vacated, and the district court is instructed to dismiss that claim without prejudice."

Rationale: The question of whether a particular facility is a branch established and operated by a national bank under the McFadden Act is a question of federal law.

The Court sought to construe the meaning of the phrase "establish and operate" a "branch" under the McFadden Act. Since the Congress in 1927 could not have foreseen current developments in banking practices, a rigid application of the language of 1927 would lead to "anamalous results." Therefore the Court looked to legislative intent and "the views of the executive agency charged with the Act's enforcement."

The Court found that the governing principle behind the McFadden Act was competitive equality between state and national banks. On balance, the Court found that if shared ATM usage were deemed the "establishment" of a "branch" for purposes of federal law, national banks would be prohibited from interstate participation in shared networks which, in turn, would "limit the ability of national banks to compete in the use of major technological developments in this industry, contrary to Congressional purpose." (NOTE: The court seems to treat the prohibition on interstate branching as something to the overcome rather than as an integral part of the McFadden Act, evidencing Congressional intent contrary to the outcome of this case.)

Turning to the determinations of the OCC, the Court noted that the view of the administrative agency charged with enforcement is ordinarily entitled to "considerable respect." This is especially true where regulated parties have acted in reliance on the agency's ruling and would be harmed by a reversal, as in this case. The Court found that the OCC interpretation appears to serve the purposes of the McFadden Act. (NOTE: Again, this finding appears correct only if you ignore evidence of Congressional intent to prohibit interstate banking.) Therefore, deference was accorded to the OCC determination that an ATM that is not "owned or rented" by a national bank is not a branch under the McFadden Act.

The Court did make note of the arbitrariness of the OCC distinction. It stated, "Whether an ATM is 'owned' or 'rented' or simply 'used' by a bank may be more a matter of how agreements are structured than a reliable determinant of whether or not the ATM constitutes a 'branch'. However, the Court found that the Comptroller's definition of 'branch' in its 1982 regulation 'is a reasonable construction of the McFadden Act'."

The Court then spoke to the need for Congressional action:

". . . Given the technological promise of interstate electronic banking and the substantial steps already taken toward achieving it, if the momentum already developed should be stopped, it should be done by Congress, and not by this court, particularly when the barrier we are asked to impose would be based upon definitions framed over 50 years ago."

"Should Congress find itself in disagreement with the Comptroller's Regulation, which we accept as a legitimate interpretation of the governing statute, a legislative solution is available."●

STAR WARS IS NOT A LAUGHING MATTER

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. KASTENMEIER. Mr. Speaker, I wish to call to the attention of my colleagues and editorial comment from Harrison Brown, editor-in-chief of the Bulletin of the Atomic Scientists on the President's star wars program. Mr. Brown's comments appeared in the Bulletin's May 1985 issue.

Mr. Brown fears, as do many, that the President's star wars proposal will result in the Soviets launching an energetic effort to develop offsetting sys-

tems to overpower or evade the deployment of a defensive system which holds out the possibility of blunting an incoming missile attack. With such an inevitable Soviet reaction, we will find ourselves in a situation similar to that which existed with the deployment of a destabilizing and costly ABM system in the late 1960's and 1970's.

STAR WARS ONCE FUNNY, NOW FRIGHTENING

(By Harrison Brown)

More than two years have passed since President Reagan introduced his Strategic Defense Initiative, popularly known as "Star Wars," which was conceived as a massive research and development effort to achieve an extremely effective defense against strategic missiles. Indeed, he visualized the development of a system so perfect that guided missiles with nuclear warheads either could no longer be exploded or would explode well above the earth's atmosphere, where they would do no harm. Once this marvelous situation was achieved, nuclear weapons would be obsolete and our fears of nuclear annihilation would end.

When I realized that the president was deadly serious about this project, I laughed, and I am quite certain that my laughter blended with that of thousands of other scientists and engineers. The goal was probably not attainable, but even if it were, both the time scale and the cost would be enormous. Furthermore, every new defense breeds a new offense, which in turn makes the design of a perfect defensive system virtually impossible. We would soon find ourselves in the middle of a new kind of arms race, the dimensions of which could be unprecedented.

When we couple such thoughts with the fact that no competent technical person really knows what this ultimate defensive system might look like, how much it might cost, how much research and development might be required, or how much time might be needed, the president's proposal increasingly appeared to be a hallucination. It seemed to many of us that few persons in government would take the dream seriously. Congressional funding on a substantial scale seemed dubious.

Now it seems quite possible, however, that those of us who laughed when the Star Wars concept was first suggested should be crying. This is not because there has been any major technological breakthrough or any major change in concept. Rather, the Star Wars idea is rapidly becoming extremely popular, particularly among people who do not understand the scientific and technological realities of the situation. With increasing frequency we hear statements of approval of the concept from government officials, both in this country and abroad. We read approving articles and editorials in newspapers.

Clearly the concept has aroused in most of us the deepseated desire to return to the good old days when nuclear weapons did not exist. Since nuclear weapons are unlikely to be eliminated by negotiation in the foreseeable future, increasing numbers of people are looking to Star Wars defense systems as a means of returning to a world which, although it existed once, can never exist again. As we have done so often in the past, we are dreaming of things that cannot be, and the transition to the real world is painful.

At the moment little exists in the Star Wars program except some limited research and development activities costing $1.3 billion this year, and scheduled to rise to $3.7 billion in fiscal 1986. But I suspect that what we are seeing is the tip of the iceberg. The scientific-military-industrial community has sniffed the air, has smelled the billions of dollars which are potentially available, and has started to plan programs and write project proposals. The Pentagon has announced a major speed-up of tests of aiming and tracking devices for defensive weapons such as lasers. The experiments will involve at least two shuttle flights per year.

How could official Washington or the general public possibly object to the rapid escalation of a program which has the major objective of eliminating nuclear weapons from the earth? Of course it would be terribly expensive, but wouldn't a nuclear-free world be worth it?

At present many national and world leaders hesitate to express their approval of the deployment of a full-fledged Star Wars system once the final blueprints are in hand. But virtually all agree that a vigorous research program is essential if we are to learn what is possible. Unfortunately, however, this area of endeavor vastly transcends the laboratory and the pilot plant. Research would eventually require experiments on a huge scale, not far removed from full-scale deployment of the system.

In the meantime, how might we expect the Soviet Union to react? Already it has expressed considerable unhappiness that we are seriously considering embarking upon a full-scale Star Wars program. Soviet scientists have probably told the Kremlin pretty much what our scientists have told the White House about the chances for success. One thing the Soviet Union does not need now is another massive, expensive, complicated research and development program. Under the circumstances it seems highly unlikely that the Soviet Union would initiate such a program on its own. But if the United States plunges into it at full speed, the Soviet Union will have no choice, no matter how crazy the entire scheme might appear. If the Soviet leaders behave rationally, I suspect that they will do everything possible to dissuade us from embarking upon a massive Star Wars program.

What a difference a year makes! One year ago who would have thought that an idea which makes no technological sense would be so warmly received by both officialdom and the general public? In this sense it is somewhat reminiscent of the concept of perpetual motion, which has always had its fans in the nontechnological world. But unlike perpetual motion, the Star Wars concept carries with it unprecedented dangers. This frightens me.●

THE SANDINISTA BETRAYAL

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FIELDS. Mr. Speaker, soon this body will be asked to vote upon the question of assistance for the freedom fighters in Nicaragua. Much will be said for and against the question. However, the single most important point is represented by this observation by William McGurn and the factual points which follow.

"The revolution is always betrayed in the end."

THE SANDINISTA BETRAYAL

Today, the Sandinistas rule Nicaragua with an iron fist. Listed below are the promises they made in 1979 and how those promises were broken and ignored.

DEMOCRACY

Last year, under pressure from Western nations, the Sandinistas held a mock election—the only election ever held. Nicaragua's Comandante Bayardo Arce virtually admitted in May 1984 that the upcoming election was a sham.

Speaking in what he thought was a private, off-the-record meeting with one of the Marxist-Leninist parties "competing" with the Sandinistas he called the upcoming elections a "nuisance" that should be used "to demonstrate that . . . the Nicaraguan people are for Marxism-Leninism."

During the election, Nicaraguan voters were intimidated by local bands of Sandinista thugs who told them how to vote. Despite that, one out of every three voters dared to cast a ballot against the Sandinistas.

POLITICAL PLURALISM

The Sandinistas promised to allow political parties and let them operate freely. But they imposed a single political party—the Sandinista Front of National Liberation (FSLN).

They abolished all independent political organizations that appeared to pose any threat to them. And political dissidents were—and continue to be—intimidated, forced into submission, exiled, jailed or killed.

LIBERTY, JUSTICE

The Sandinistas promised liberty and justice to the Nicaraguans. They delivered—

A police state modeled after Cuba and the Soviet Union;

A judiciary filled with Sandinista revolutionaries who have been "rewarded" for their service;

All kinds of special tribunals under direct control of the junta;

"Neighborhood committees"—modeled by the Sandinistas' own admission after Cuba's infamous committees—to spy on neighbors and serve as "the eyes and ears of the revolution"; and

Bands of peasants in local communities, armed by the Sandinistas and unleashed from time to time to intimidate dissenting voices into submission. Commander Daniel Ortega calls them "divine mobs."

HUMAN RIGHTS

The Sandinistas promised full observance of human rights. But they have racked up the worst human rights record of any Latin American country, including Cuba.

Immediately after the revolution, the Sandinistas began wholescale massacres of political criminals, the forcible relocation of thousands of Miskito Indians, expulsion of Jews from the country and countless other atrocities.

When the Nicaraguan Human Rights Commission began denouncing some of the violations, the Sandinistas immediately padlocked the human rights office, confiscated its documents, unleashed mobs against its former employees and dragged some of them off to jail.

LABOR UNIONS

The Sandinistas promised free labor organizations. Instead, they are constructing a

socialist state based upon a single, Sandinista "labor union."

They have not yet abolished all independent unions, but they have worked to render them powerless. Strikes have been outlawed. Union leaders cannot hold meetings, collect dues, organize without government interference or ask for more pay (despite high Nicaraguan inflation).

FREEDOM OF SPEECH, PRESS

The Sandinistas promised freedom of speech and press. But they have effectively silenced all dissenting voices.

Today, they own all Nicaraguan TV stations, eight of ten radio stations, and two of three newspapers. The few independent news media labor under strict, permanent censorship.

In the last three years, the Sandinistas have prevented publication of the independent *La Prensa* at least 40 times. The editor, Pedro Joaquin Chamorro, found the censorship so tight he left the country in December 1984.

FREEDOM OF RELIGION

The Sandinistas promised freedom of religion. Instead, they expelled foreign missionaries and—to compete with the Catholic church—set up a "popular church" subservient to the government.

On his 1984 visit to Nicaragua, Pope John Paul II was heckled and jeered at by Sandinista zealots during an open-air mass.

"Divine mobs," organized by the Sandinistas, harass Catholic priests who do not openly preach Marxist doctrine. They have also seized at least 20 Protestant churches in the Nicaraguan capital of Managua and destroyed church propery to end supposed criticism of government policies.

Harassment of Jews is so great that virtually all have fled the country. In 1979, in an early signal of their anti-semitism, the Sandinistas fire-bombed the only synagogue in Managua. Jewish synagogues have since been confiscated by the government.

NON-ALIGNMENT

The Sandinistas promised a nonaligned foreign policy. But they have delivered Nicaragua into Soviet and Cuban hands.

The red banners bearing a hammer and sickle at their victory celebration in July 1979 spoke louder than words. Hatred of the United States is written into the Sandinista national anthem—"We fight against the Yankees, enemies of mankind"—and their national seal shows a Sandinista beheading a U.S. Marine.●

AISHEL AVRAHAM

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SOLARZ. Mr. Speaker, I would like to call your attention to Aishel Avraham, a nursing home in the Williamsburg section of Brooklyn. A model example of care for the elderly in this country, Aishel Avraham shows us that it is possible to meet the needs of the aged in a humane and caring way. In a society that looks mostly to the young and to the new, the aged are often tragically ignored and pushed to the side. At Aishel Avraham, though, this tragedy has not occurred as the staff there instills in the residents a sense of dignity and respect they so richly deserve.

The large number of volunteers who consistently contribute their time to Aishel Avraham testifies to both its excellence and its uniqueness; 350 members of the Brooklyn community regularly help the residents in a variety of ways. From high school students to rabbis, the volunteers feed those patients who cannot serve themselves, write letters for those whose eye and hand coordination have failed them, assist in baking projects, or, simply, listen to the concerns of the residents.

Andor Weiss, the executive director of Aishel Avraham, is committed to serving the needs of the patients in the fullest way. It is my hope that the dedication demonstrated by him and all those at Aishel Avraham will inspire others so that the elderly in this country receive the finest care. As Franklin Delano Roosevelt once said:

The test of our society is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little.

The spirit of Roosevelt's words is certainly alive at Aishel Avraham.

A recent article in the New York Times recognized the fine work at Aishel Avraham and I commend it to the attention of by colleagues:

A NURSING HOME GETS READY FOR PURIM

(By Ari L. Goldman)

Like the warmer weather and the chirping birds, the smell of hamantaschen baking in the oven has always meant the coming of spring for Sophie Segal. For 60 years, Mrs. Segal kneaded the dough and fashioned the three-corner pastries eaten on the Jewish festival of Purim, which comes with the changing season.

About a year ago, because of failing health and the death of her daughter, Mrs. Segal had to move from her Lower East Side apartment to a nursing home in the Williamsburg section of Brooklyn. But she did not stop baking hamantaschen.

There were mounds of dough, rolling pins and pots of prune butter along a table at the Aishel Avraham nursing home this week. A thin layer of white flour seemed to cover everything, including Mrs. Segal and a dozen other residents who were busy at work.

"Aren't they beautiful?" Mrs. Segal said as she held up a pan of meticulously arranged triangles of prune-filled dough ready for the oven. "It's Purim."

CONTINUITY WITH THE FUTURE

Purim, a one-day holiday that begins at sundown tonight, celebrates the foiling of a plot to destroy the Jews in ancient Persia.

Purim is celebrated on the 14th day of Adar, the sixth month of the lunar Jewish calendar. As with all Jewish holidays, the date of Purim varies in the Gregorian calendar, which is based on movements of the sun.

At Aishel Avraham, the holiday is a link to a more recent past and provides continuity with the future.

"What we try to do here is show that life didn't stop," said Andor Weiss, executive director of the nursing home.

Aishel Avraham is in a modern five-story building at the corner of Heyward Street and Bedford Avenue. But the synagogue on the first floor is much like the Hasidic study halls of prewar Europe. Frail men with long white beards are bent over large volumes of the Talmud. A red velvet curtain hangs over the ark that holds the Torah scroll.

AN EARLY RISER

David Tichobolsky, a man in his 70's who needs a wheelchair to get around, is always the first in synagogue each morning.

"The Almighty, blessed be He, said: 'Since the destruction of the holy temple, I dwell at the door of every synagogue. Who will be the first to come to greet me?'" Mr. Tichobolsky said.

Mr. Tichobolsky answers the question by being at the synagogue each day at 5 A.M., more than two hours before morning prayers begin.

Getting up in the early hours is nothing new for him. For 30 years, he was the gabbai, or sexton, of a synagogue in Queens. "I trained my successor and then I moved here," Mr. Tichobolsky said with a smile. "Here, we can keep all the traditions."

The Williamsburg section, still a Hasidic and ultra-Orthodox stronghold despite declines in the area's Jewish population, has adopted the Aishel Avraham nursing home as its own.

350 VOLUNTEERS HELP OUT

More than 350 volunteers from the community help out on a regular basis. There are as many volunteers, in fact, as the total of residents—200—and staff members—150.

Dozens of volunteers, from high school girls to elderly rabbis, arrive before each meal to spoon-feed those patients who cannot serve themselves. Others read or write letters for those whose eyes or hand coordination have failed them. There are also those who come to give a class, assist in a baking project or simply listen.

"Sometimes," Mr. Weiss said, "the greatest mitzvah is in the listening."●

A SUPPLY-SIDE APPROACH TO NUCLEAR WASTE REPOSITORIES

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SKEEN. Mr. Speaker, the Nuclear Waste Policy Act of 1982 [NWPA] was signed into law on January 7, 1983. Its purpose was to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes. Its goal is to have the first repository operational by 1998.

Today, it is no secret that many believe this goal cannot possibly be met. While I supported the NWPA, the law is exceedingly complex and there are still many impediments to implementing the program. In addition, the process itself will cost tens of billions of dollars and, even if it does succeed, will take many years to accomplish. Recently, a research paper was brought to my attention which pro-

poses a method for getting there in 7 years while saving billions of dollars. The paper is a summary of a more extensive research effort by Mr. Larry Harmon of the Industrial College of the Armed Forces. I commend Mr. Harmon's paper to all of my colleagues:

A SUPPLY-SIDE APPROACH TO NUCLEAR WASTE REPOSITORIES

BACKGROUND

The debate over radioactive waste disposal continues in spite of recent legislation establishing a program to develop a deep geologic repository for high-level waste from civilian nuclear power plants. Over 12 percent of the electricity generated in the United States is produced in nuclear power plants. However, these plants have produced over 9,000 metric tons of spent fuel (high-level waste). By the year 2000, this figure will be about 50,000 metric tons. The problem of disposing of this waste is thought by many to be the Achilles heel of nuclear power. It is currently a major rallying point for those who oppose nuclear power.

Although extreme public concern and anxiety exist about radioactive waste disposal there is broad technical consensus that the task can be accomplished safely. In 1957 the National Academy of Sciences recommended that these wastes be disposed of in deep geologic rock formations with salt being a particularly good formation. Extensive research, environmental analysis, and other studies support the concept of geologic disposal. The Nuclear Regulatory Commission (NRC) has ruled that geologic disposal of radioactive waste is indeed feasible and achievable.

The Department of Energy (DOE) is now constructing a limited use repository (Waste Isolation Pilot Plant—WIPP) in a deep salt formation in southeast New Mexico. Beginning in 1988 DOE plans to actually dispose of certain wastes from nuclear weapons production.

Congress agreed that waste disposal was a serious problem and in 1982 passed the Nuclear Waste Policy Act. The Act provides a framework for the Department of Energy to construct a repository for the disposal of high-level waste from civilian nuclear power plants by 1988. Specifically, the Act provides:

Schedules, decision points, and other considerations for siting, licensing, and constructing repositories,

Arrangements for State, Indian Tribes, public, and special interest group participation in the total process,

Mechanisms for funding the program by establishing a fee on nuclear generated electricity, and

Federal agency responsibilities.

Although the Nuclear Waste Policy Act provides a detailed road map for establishing a repository, many believe that the Federal Government is not likely to succeed in doing so. Even if it does succeed, it will do so at great cost and certainly long after the 1998 date required by the Act. The approach, however, is an old and tired one of throwing money and a new bureaucracy at a tough problem. The cost will be tens of billions of dollars which must be paid by the users of nuclear generated electricity.

There are serious impediments which can slow down or even stop repository construction. The complexity of the Act itself will surely create significant problems. Any nuclear issue is an institutional and political nightmare—radioactive waste disposal is no exception. The NWPA has something for everybody. Politicians, environmentalists, antinuclear groups, and the public will all have their day in court. Perhaps the most serious problem is the media role in shaping negative public sentiment. In view of the high-cost, significant schedule risk, and built-in insurmountable problems, this paper proposes an alternative approach. A supply-side or entrepreneurial approach in the private (non-Federal) sector could work more efficiently, cost less, and result in an operational repository in 7 years.

REPOSITORY COST CONSIDERATIONS

The Department of Energy estimates that by the year 2002 it will spend about $6.5 billion on development and evaluation—no construction. Depending on the rock medium selected, construction costs could exceed $2 billion. Operating costs are estimated at $150 million a year. There is no provision in these figures for schedule slips or interim storage if a repository is not open by 1998. By DOE's own admission, these estimates are preliminary. Neither the Government nor the nuclear industry has a demonstrated ability to control cost.

Given the magnitude and uncertainty of these estimates, the extreme unlikelihood of meeting schedules, and the inability of Government agencies to control cost growth, utilities and ratepayers should be looking for better solutions. The cost and schedule for building the Waste Isolation Pilot Plant (in bedded salt) stand in sharp contrast to NWPA program direction. In this project located in southwest New Mexico, the Department of Energy has demonstrated a very high degree of cost and schedule discipline. WIPP is significantly below cost and ahead of schedule. Current WIPP costs estimates are identified in DOE's 1986 Congressional Budget Request:

	Million
Construction Cost	$459
R&D, Evaluation, etc	234
Total	693

Yearly operating costs are estimated at $22 million in 1983 dollars. Admittedly, WIPP is an unlicensed facility and is not designed for high-level waste disposal. But, it is safe and there has been intensive technical review by the State of New Mexico, the National Academy of Sciences, and others.

DOE has established the Nuclear Waste Fund required by Section 302 of the NWPA. The Act requires that the producers (and therefore the users) of nuclear power pay for the cost of waste disposal. The initial fee of 1 mill per kilowatthour (kWh) for all nuclear-generated electricity was set by the Act. This fee is subject to annual review and revision as program funding requirements become better defined. In addition, a one-time charge was assessed for all spent fuel in storage at nuclear power plants. The kilowatthour fee is currently generating about $30 million a month. The spent fuel charge revenue will be about $2 billion. Timing of the one-time payment will be negotiated with the utilities. Seventy utilities, reactor operators, and fuel vendors have now signed waste disposal contracts with DOE and have started paying into the Nuclear Waste Fund.

The kWh fee is a masterpiece of funding strategy. A charge of one tenth of 1 cent for a kWh of electric power produced by a nuclear powerplant is a miniscule charge. It is hardly felt by the ratepayer. Yet, it can, by slight manipulation, produce hundreds of millions of dollars in revenue, and still hardly be felt. It is a small charge on an incredibly large number of units. This increase in revenue could be used to develop incentives for a State and locality to cooperatively host a repository.

DOE's Electric Power Monthly reports price and consumption of electricity in 40 selected U.S. cities. To illustrate the impact of slight changes in the waste disposal fee, a comparison is made in Table 1.

TABLE I.—THE EFFECT OF WASTE DISPOSAL FEE ON THE PRICE OF ELECTRICITY

City	Price of electricity (Cents per kilowatt hour	Waste disposal fee as percent of price of electricity		
		1 mill	2 mills	3 mills
Seattle (low)	2.03	4.93	9.85	14.78
Baltimore (median)	8.09	1.24	2.47	3.71
New York (high)	17.32	.58	1.15	1.73

The low rate in Seattle (Bonneville Power) is shown only for reference since most nuclear power is distributed in areas where rates cluster around the median. As shown above, even if the waste disposal fee were tripled (3 mills per kWh), it would be only about 4% of the cost of power for most users.

DOE's Energy Information Administration has projected the future growth and use of nuclear power. This data (Table II) is the basis for projecting yearly waste disposal fees which could be available:

TABLE II.—FUNDS AVAILABLE FROM WASTE DISPOSAL FEES

Year	Nuclear power (terawatt hours)	Disposal fees (millions)		
		1 mill	2 mills	3 mills
1983 (actual)	294	$294	$588	$882
1985	385	385	770	1,155
1990	581	581	1,162	1,743
1995	643	643	1,286	1,929

The point to be made in all this discussion is that an efficient repository developer has virtually unlimited resources available. These resources can be translated into staggering economic benefits to the State and locality willing to accept a radioactive waste repository.

A SUPPLY SIDE ALTERNATIVE

The purpose of proposing a supply-side approach to constructing the Nation's first commercial repository is simply to suggest that a free market approach could accomplish what brute force and politics may not. "Supply-side" is an attempt to capitalize on the current popularity of the term and reflect the private enterprise preference of the Reagan Administration.

The supply-side economists say that the way to economic growth is to cut taxes and Government spending—let the market work freely. Lower taxes should result in savings and investment, thereby improving output and productivity. With the proper incentives, the free market is better able (than the Government) to provide more supplies at lower prices. Output the productivity will go up with a decrease in inflation.

An important point to be made in this paper is that there can be significant free market (supply-side) benefits to be accrued by a State [1] and the specific locality where a

[1] It should be remembered that the NWPA gives Indian tribes the same right. as States in siting a

repository is constructed. A cooperative (nonadversarial) approach by Federal, State, and local Governments along with the nuclear power industry can solve this waste disposal problem much more efficiently. Such a cooperative effort is possible only by a creative approach and focusing on the supply-side incentives. It is widely perceived that NWPA is the Long-Term Employment Act (like WPA) for environmentalists, waste managers, and lawyers. It is time to short circuit the bureaucratic system.

INCENTIVES

The primary incentive to hosting a repository is MONEY. If a deep geological repository were constructed for disposing of old automobile batteries, it would be a new industry welcomed with open arms. The nuclear nature of the repository, however, creates a new set of public perceptions which are not in tune with scientific reality. In fact, a facility for disposing of old car batteries might even be more hazardous than a nuclear waste repository in the long term. Money (jobs, commerce, etc.) creates the ability to move perceptions and attitudes more into line with reality.

NWPA allows DOE (absent a legislative veto) to collect whatever is required to cover the cost of disposal, and utilities must pay it. The current fee is one mill per kWh. Why not two mills? Why not three mills? From a free enterprise point of view, the money now being collected is being inefficiently spent on fighting the tidal wave of opposition and addressing every technical question imaginable. To make matters worse, there are now three tidal waves—Texas, Nevada, and Washington. Many would argue that a fourth tidal wave is the network of environmental and antinuclear interests dedicated to destroying nuclear power.

Wouldn't it be more efficient to optimize the incentives and work the problem cooperatively with a single state? Why not make an honest, fair, open, and negotiated deal? The packaging of that deal would provide the supply-side incentives to building a repository in a cooperative and efficient environment. A State could impose a highly profitable user fee which should not be looked on with cynicism. A high fee, say 3 mills, is simply a realistic charge for taking a hazardous and politically unpopular commodity for disposal. Those who accept it should indeed receive special consideration.

A second incentive is an assured significant expansion of the State and local economic infrastructure. As with any new industrial facility, local demand is created for supplies, services, and skilled labor. Permanent jobs created by a repository will have a multiplier effect in creating new demand. The potential for spinoff business and increased municipal support systems is enormous.

Perhaps an even more important incentive, would be a State's enhanced ability to demand concessions, special considerations, and further development of its economic infrastructure. These concessions and considerations should not be limited to the State-Federal deal. They should include the nuclear industry as well. In fact, the nuclear industry is in an excellent position to be truly creative and innovative without Government interference. Architect-engineers, constructors, plant operators, and equipment vendors could make their own deal with a repository host. Their participation with the host State in developing new commerce and industry may be an even more credible incentive than the State-Federal deal. Again, the responsibilities are only limited by the vision and imagination of those negotiating the deal.

Significant new ancillary facilities and industries would be created by a working repository. New shipping casks, rail cars, and trailers are needed. The host could demand that they be locally manufactured. In fact, the host could demand that most goods and services be locally purchased or manufactured.

Additional facilities may be needed for spent fuel packaging or disassembly and repackaging. These facilities should certainly be located near a repository. With increased State and local acceptance of nuclear technology, development of other nuclear-related industries could follow. Demand is then created for more skilled labor and the technical schools and university programs to train them. One suggestion has been for the Government to establish a "world class" R&D center for radioactive waste management in the host State.

Along with statewide acceptance of nuclear technology could come a fuel reprocessing plant and possibly nuclear power plants. these are multibillion dollar projects. Communities could also demand that Government nuclear R&D facilities be part of the incentive package.

A final recommendation is that DOE should consider offering the state with the first repository locality a major nonnuclear project. One example is the proposed Superconducting Super Collider (SSC). SSC is a 200 trillion electron-volt colliding beam accelerator recommended by DOE's Independent High Energy Physics Advisory Panel. The project is estimated to cost $3-5 billion and take nearly 10 years to complete.

The SSC will be 50 times more powerful than existing machines. The accelerator ring is expected to be 100 miles in circumference. Many areas of the country with good repository sites also have land ideally suited for the construction of SSC. Hosting the SSC would make a State the world center of high energy-physics research. The economic and technical spinoff possibilities defy the imagination.

The SSC is an excellent example of how States and localities vie for new nonnuclear industry. February 15, 1985, headlines in the Los Angeles times stated "California Gears up to Vie for $3-Billion Atom smashers Site." The state has provided $500,000 for the University of California to finance the process.[a] This is one project that is "OK-in-my back yard"—not so with waste repositories. Why not link the two?

An argument could even be made for using fees collected by the repository State to fund or partially fund SSC. After all, SSC is a research tool for nuclear physics. A State, by partially funding SSC from user fees, would be a partner in its development. Right now there is no certainty of full funding of the SSC by the Federal Government. With a private sector participant, the project is significantly more viable.

A SUPPLY-SIDE PROPOSAL

As a theoretical construct, a plausible repository program is proposed. This proposal is suggested by recent DOE experience on the WIPP project and a belief that a free-market approach will be significantly more efficient. As a point of departure, a supply-side program is envisioned which would have the following features:

A 1-year effort to develop the strategy, quantify and promote the incentives, solicit proposals, and get a state to accept.

Two years for site characterization and development.

Four years to construct a repository.

Cost twice as much as WIPP (or $1,386 billion).

Cost $44 million per year to operate (twice as much as WIPP).

Save tens of Billions of Dollars in the process.

The host state and locality would be free to negotiate the deal including the degree of Federal participation (NRC, DOE, etc.). However, NRC participation could be beneficial to the State in terms of independent safety assurance. DOE has much experience in designing, constructing, and operating nulcear facilities which could be helpful to a State. The U.S. Army Corps of Engineers could manage construction as they did for WIPP. A State could also establish consulting or business enterprises to accomplish their objectives entirely in the private sector.

The Congress, DOE, and the nuclear industry should apply some new conceptual thinking to the problem. NWPA is the old solution of throwing money and a new bureaucracy at a tough problem. We are a nation of innovators and entrepreneurs—it is time to put our Yankee ingenuity to work.

A state willing to be bold enough to exploit the situation would only have to say "Stop the music (NWPA)—we are ready to do the job quickly and efficiently—here is our proposal."

Safe permanent disposal of nuclear waste is technically achievable. The evidence is overwhelming. There are, however, significant institutional and political impediments to achieving timely results, and the cost of overcoming these impediments to nuclear power users is enormous. It may even be impossible to achieve success in time to avoid serious impacts on the nuclear power industry.

A supply-side approach could short circuit the massive forces moving against the NWPA-designed program. The potential economic benefits to a State and locality hosting a repository stagger the imagination. It also staggers the imagination to think that a man set foot on the moon in a program spanning less than a decade. Yet, a spent fuel rod cannot be buried in a 200-million year old salt or granite formation, in 20 years, right on this planet.

The problem is left to the creative thinker to design a program to accomplish the objectve and ensure that the economic benefits are most advantageous to all concerned. An imaginative undertaking could get an alternative to NWPA going within a year. A cooperative relationship among the parties with a genuine sense of urgency is not beyond the realm of possibility. A program to open repository doors in 7 short years should delight the utilities, forever silence the antinuclear forces, and solve a problem of pressing national urgency. Solutions to tough problems are available "outside the box" if we are only bold and creative enough to look for them.●

nuclear waste repository. An Indian tribe could locate a repository within its tribal boundaries and reap the same benefits as any State.

HUMANITARIAN AID?

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. OWENS. Mr. Speaker, The Reagan administration's request for $14 million in "humanitarian aid" for the Nicaraguan Contra rebels is vague and misleading. It appears to leave room for negotiation and resolution of the political differences between the Sandinistas and the Contra forces, but the language is so unclear that allows the administration to decide that the money can be spent on Contra arms and ammunition. Approval of the money which the administration has requested means a continuation of our military intervention in a sovereign state's domestic politics.

In Nicaragua's 1984 general election, 75 percent of the eligible voters actually voted, while the United States 51.4 percent eligible Americans voted in our Presidential election. Of those that voted in Nicaragua, Daniel Ortega captured 63 percent of the votes, compared with 59 percent for Ronald Reagan in the United States. To put it in another way, Daniel Ortega won the support of 47.25 percent of the eligible voters in Nicaragua. The popular support which the Sandinista government has demands our recognition even if we do not necessarily agree with all of the policies.

The presumption that the United States should be able to determine the political and social destiny of Nicaragua suggests a philosophical debate which mankind had been struggling with for the past 2,500 years. In The Peloponnesian Wars, the Greek historian Thucydides tells of an encounter between the defenseless people of the island of Melos and the mighty Greeks of Athens. The Athenians offer the Melians an ultimatum, they can either swear loyalty to Athens or they will be killed. The Melians argue that they, like the citizens of Athens, should be allowed the democratic right of choosing their own political allies and their own political future without coercion. The Athenian generals refused to grant political choice to the Melians. They contended that their superior military strength gave them control over the fate of other nations. The Melians insisted on the right to choose their own destinies, and they sacrificed their lives.

Like the people of Melos thousands of years ago, the Nicaraguan people are being faced with a difficult challenge. They react to the increasing pressure of the United States to topple their elected government by diverting resources from much needed economic development to defense. The CIA's mining of their harbor, the continuing American military exercises in the region, and this administration's strong support of the Contra rebels has made this necessary. The Nicaraguans fear an invasion by the United States and that fear is grounded on our actions over the last 4 years.

The United States has clear military superiority over Nicaragua. Nicaragua can bow to that superiority or vow to make its use as difficult and costly as possible. Nicaragua has made the second choice—a choice which is generally accepted as self-defense by our neighbors to the south and our European allies.

The United States has long taken the moral high ground in defense of fledgling nations. The Nicaraguan situation presents us with the opportunity to support the democratic elements there as the country moves away from the years of the Somosa dictatorship, a dictatorship which was supported by the United States.

The first step that must be taken is the ending of aid to the Contras and the cessation of military activity on Nicaragua's northern border and coastal areas. Health, education, and agricultural support personnel will help to revitalize the area and resettle those who have fled or been moved from the combat zone while ensuring that the United States will not be a party to combat activity there. Last, but not least, there must be a regional agreement on amnesty and resettlement for those currently serving with the Contras. This issue can be resolved as part of the Contradora process.

I will not support funding for the Contras. I urge my colleagues to consider the possibilities for peace and democracy in Nicaragua and to vote against military aid to the Contras. It does not matter what euphemism is in vogue to camouflage that aid. It remains the exercise of power and military might over a small neighbor.●

SALUTE TO CADETS OF CIVIL AIR PATROL

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RAHALL. Mr. Speaker, recently, I had the honor of addressing a luncheon of the cadets of the Civil Air Patrol, of which I am commander of the Congressional Squadron. I would like to congratulate them on their hard work and dedication on behalf of the Civil Air Patrol and bring to the attention of my colleagues their efforts. I would like at this point to enter into the RECORD remarks which I made on that occasion to honor these fine young Americans:

REMARKS OF HON. NICK J. RAHALL II

I would like to take this opportunity to welcome you to Capitol Hill. I understand that the Bronx had the outstanding cadet drill team a few years ago, congratulations on winning again.

I hope that you are enjoying your trip to Washington and the sights of our nation's Capitol.

As the Commander of Congressional Squadron, I understand the commitment you have made to CAP, and the time and effort that you have put into the cadet program. The cadet program is designed to inspire our country's youth to become leaders and dynamic American citizens through an interest in flying. You are the future leaders of your communities and state. CAP is important not only to you, but to this country. Last year, CAP search and rescue sorties saved 182 lives. In the last five years alone, CAP has logged over 83,000 hours in the air—mostly in our own aircraft, responding to over 6,184 emergency missions. There is no other organization that can do the job that CAP does, day after day. You are part of the program, that tradition, and you are what this organization is really all about.

You take part in a number of programmed and special activities. From these you develop the knowledge, skills, and attitudes needed to understand that total impact of air and space operations on society. You learn discipline by studying leadership and by learning military drill and courtesies. You become and remain physically fit through a special physical training program. As you progress through the ranks and awards, you learn responsibility. CAP cadets usually excel in life because they have the drive and ambition to not ask how difficult the mission is, but to jump in and make whatever it is a success.

As CAP cadets, you are very important to the Air Force. There is an "esprit de corps" within CAP, that brings us together. The contributions you are making to general aviation by your participation in Civil Air Patrol is valuable. You are important, and here in the heart of our nation's Capital, I want to challenge you to work hard and be whatever you want to be. President John F. Kennedy once said, "Don't ask what your country can do for you, ask what you can do for your country." You have already begin to answer that challenge.

The motto of Civil Air Patrol is "Semper Vigilans." May you be—"Always Vigilant"—forever.

Thank you.●

OFFSHORE DRILLING ALONG THE NORTHERN CALIFORNIA COAST MUST BE PROHIBITED

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LANTOS. Mr. Speaker, while James Watt may be gone, his evil policies linger on. The latest proposed regulations on offshore drilling from the Department of Interior will continue the environmentally disastrous policies that were introduced during his unfortunate tenure as Secretary of the Interior.

Today in hearings before the Interior Subcommittee of the House Appropriations Committee, I urged the continuation of the moratorium on off-

shore drilling along the northern California coast. In view of the proposed Interior program, we have no alternative if we are to save these magnificent and unique coastal areas from irreversible damage.

STATEMENT OF CONGRESSMAN TOM LANTOS ON OUTER CONTINENTAL SHELF LEASING AND OFFSHORE DRILLING BEFORE THE INTERIOR SUBCOMMITTEE OF THE HOUSE APPROPRIATIONS COMMITTEE

Mr. Chairman, I am delighted to have this opportunity to testify before you on an issue of critical importance to the peopl of California—and of particular interest to ie people of San Mateo County whom I represent.

The development of leasing proposals for offshore drilling has reached a crucial juncture. This committee has recognized the importance of this matter during the past four years, and I wish to express thanks to you personally, Mr. Chairman, for your interest and your concern.

I must once again seek your help. We have now been presented with new draft regulations from the Department of Interior issued by Secretary Hodel. I had hoped that our new Secretary of the Interior would show greater understanding for the concerns of California. Unfortunately, the recently released proposals are a severe disappointment. Again this Administration has displayed a remarkable lack of sensitity in its offshore leasing program. The new leadership at Interior is not departing from the policies pursued by former Secretary James Watt, under whose leadership we were subjected to massive acceleration of leasing—in clear violation of Congressional intent.

Secretary Hodel's claim that this draft program "reflects Interior's desire to resolve environmental and other conflicts early in the leasing process through consultation with the states and other affected parties" is not accurate. Despite the frequently expressed concern of the California Congressional delegaton, House members from California were never consulted about these proposals in a meaningful way, and we are confronted now by a program which fails to meet our basic requirements. The Interior Department program does make provision to exclude environmentally sensitive areas, but there is no assurance that these areas will actually be excluded. In fact, areas formerly placed off limits by this very committee are once again included in the leasing proposals, and these tracts could be available for lease as early as 1987 or 1989.

I cannot accept Secretary Hodel's claim that the rate of development of our offshore resources has been effectively slowed. Although the proposals apparently cut the number of lease sales from one sale every two years to one sale every three years, the regulations provide flexibility for the Secretary to accelerate sales in areas of "higher value and/or higher interest." There is little doubt that Secretary Watt's intentions have been preserved.

Area-wide lease sales—a policy first introduced by Secretary Watt—mean that vast tracts of the Outer Continental Shelf are up for sale with little or no regard for their resource potential. This policy was designed to open up as many off-shore areas as possible. Consequently, there is not adequate opportunity for proper assessment of the environmental and economic impacts of leasing specific tracts. Many coastal states, including California, have called for an end to this system, and a return to the "tract nomination" process previously followed. Congress has already recognized the inadequacies of area-wide leasing through its enactment of the moratoria.

It is very clear, Mr. Chairman, that we have no alternative but to call for extension of the Congressionally-imposed moratoria on certain environmentally sensitive areas, including the Northern California Coast.

The incomparable Northern California coastline is unique, both in its spectacular geography as well as its environmental interest. If Secretary Hodel has any doubt, let me repeat the offer which I and a number of my colleagues have already made: We welcome the opportunity to show him—and any member of this committee—the superb California coastline to demonstrate how it would be affected by offshore drilling.

The magnificent San Mateo County coast, which is near tracts available for lease, would be particularly susceptible to damage from oil spillage. The rocky inner tidal zone and the estuaries make it virtually impossible for oil to escape once washed towards the coast. In addition, the coast waters provide habitat for many sensitive marine species for whom any oil leakage would be disastrous. It is critical that leasing not be permitted in this region.

Offshore drilling would also prove disastrous to California's $16 billion tourist and fishing industries. Not only would the visual pollution of offshore oil platforms be a major deterrent to visitors, but there would be extensive onshore dislocation. Even during the exploratory stage, permanent service bases would have to be established, which would include expanded docks, warehouses, open storage areas, facilities for servicing derrick barges and tugs, and helipads. These developments would transform and degrade the Northern California coastline.

In addition to the evident environmental hazards of the Interior Department's leasing program, as a professional economist, I find the area-wide leasing program to be economically unsound. Lease sales under this program have invariably yielded smaller average bids per tract because oil and gas companies do not have to compete for a limited number of tracts with defined resource potential. Frequently, they are leased to single bidders at bargain basement prices. The program is designed for the benefit of big oil companies, with little or no regard for the public interest.

Mr. Chairman, there is no economic justification for launching headlong into this massive offshore program. Domestic energy demand is slackening, and even the oil industry has only qualified enthusiasm for the extensive Interior Department program. Of the 265 million acres offered since the areawide leasing process first went into effect, industry has only leased 13 million acres. In the case of the North Atlantic lease sale held last year, not a single industry bid was filed for any of the tracts offered. The lack of interest forced the Department of the Interior to cancel or postpone indefinitely five areawide sales.

In short, Mr. Chairman, the proposed leasing program does not have adequate environmental guarantees. In Northern California, the program is threatening an area of unparalleled natural beauty. Furthermore, the Interior Department proposal is highly questionable in economic terms. We must not permit these regulations irreversibly to affect these unique coastal areas.

I urge you to extend the Outer Continental Shelf leasing moratoria.●

IS AMERICAN COAL BEING UNDERMINED?

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GAYDOS. Mr. Speaker, over the years, I have watched one domestic industry after another fall prey to foreign competition in the world of international trade. They have been squeezed out of traditional markets, at home and abroad, by the aggressive, and sometimes unscrupulous, tactics of foreign producers.

As a result, trade deficits, unheard of in our country just 15 short years ago, have become commonplace. Last year, as you know, we sustained a record wash of red ink totaling $123 billion and already some experts predict this highwater mark will be surpassed in 1985.

As yet, the domestic coal industry has not been a contributor to these deficits but some of the telltale signs that marked the decline of other industries are becoming visible in the coalfields. The threat to this industry's competitiveness can be traced to several factors, some of them beyond the control of the industry itself.

The overvalued dollar, for example, poses a threat to every segment of American industry trying to sell overseas. It makes U.S. products more expensive, including coal. A recent study suggests the inflated dollar is responsible for as much as 45 percent of the Nation's trade deficit.

At the same time, the trade tactics of certain nations work to their advantage in selling their goods here. If a foreign coal producer is subsidized, directly or indirectly by his government, his coal can be sold cheaper in the United States than the domestic variety.

Neither are foreign producers subject to the same rigid standards of safety and environmental controls with which our coal producers must contend. That translates into additional cost benefits enjoyed by the foreign producer.

It is because of these, and other factors, that the U.S. coal industry finds itself being challenged both at home and abroad.

Internationally, it sees competition coming from Australia, Canada, Poland, South Africa, Colombia, and China in the export market. Domestically, our coal industry's markets are being eyed by Poland, South Africa, Colombia, and Canada. A private study reported that more than 90 utility powerplants along our Atlantic and gulf coasts have the potential to import coal.

And records show our coal exports have fallen dramatically since posting

a record high shipment of 113 million tons in 1981. In the years from 1982 through 1984, exports totaled 106, 77, and 80 million tons respectively. This year, it is estimated coal exports will slip even further—to 73 million tons.

Meanwhile, back at the domestic mine, foreign coal producers reportedly are beginning to cast covetous eyes at the lucrative American market. It is true imported coal poses no real threat to domestic producers at this time. Shipments here, I understand, amount to something like 1.3 million tons per year.

But, Mr. Speaker, I remember all too well the complacent attitude past Congresses and past administrations took regarding the importation of steel and automobiles. They, too, were just a dribble at the start but they soon grew to a torrent and knocked those two industrial giants into a tailspin from which they have not yet—and may never—fully recover.

Foreign steel has made a habit of grabbing 26 percent of the domestic market and foreign autos already dominate the small car market here. The recent decision by the administration to let Japan decide whether to increase her car exports here does not bode well for the domestic auto industry, particularly if the price of gasoline begins to climb upwards.

And the domestic coal industry has not yet recovered from the economic recession. Unemployment in the coalfields still ranks at 16.5 percent, far above the national rate.

That grim picture is reflected in my 20th Congressional District of Pennsylvania, which includes two counties: Allegheny and Westmoreland. During the period from 1980 to 1984 (1984 figures being only preliminary), production in bituminous deep and strip mines in Allegheny County fell from 3,249,214 tons to 1,072,651. Employment echoed the slump, dropping from 1,689 miners in 1980 to just 369 in 1984.

The same situation held true in Westmoreland County mines. Production there plummeted from 1,814,028 tons in 1980 to just 545,664 tons in 1984 while employment slid from 814 to 170.

Mr. Speaker, the decline of American leadership in auto, steel, and other industries can be traced, I believe, to the unwillingness of past Congresses and past administrations to face the reality that we have been in a trade war. We have not only allowed foreign competitors to target certain industries for economic invasion—we have actually encouraged them. We have gone so far as to let the foreign competitor write the rules in our trade dealings with them.

That is history. But unless this Congress and this administration—or their immediate successors—learn from the mistakes of the past, history may well repeat itself, this time in coal.●

NICARAGUA—ANOTHER VIEW

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. KASTENMEIER. Mr. Speaker, as we approach debate on the President's proposal to release $14 million in military aid to the Nicaraguan Contra forces, I would like to call to the attention of my colleagues a report issued by two constituents and friends, Arthur and Susan Lloyd of Madison, WI, on their recent journey to Nicaragua. Their observations on what is happening in Nicaragua differs considerably from the pronouncements issued by the administration.

The report by Art and Sue Lloyd which appeared in the April 12, 1985, edition of the Madison, WI, Capital Times, follows:

PERSONAL VISIT TO NICARAGUA BRINGS EYE-OPENING

(By Arthur and Susan Lloyd)

With a small group from the Episcopal Diocese of Milwaukee, we recently visited Nicaragua for the consecration of the first native Nicaraguan bishop of the Episcopal Church. What we found and what we read from a variety of sources bears little resemblance to what we hear from Washington.

Nicaragua is described as "a brutal, totalitarian, communist regime," as another Cuba under the control of the Soviet Union. What we found was an impoverished country, suffering terribly from the continued war against the counter-revolutionaries, but with some notable achievements and, given the wartime conditions, relatively free.

U.S. citizens need no visa to enter the country and, with the exception of war zones, can travel freely. Among the variety of people with whom we talked were both supporters and opponents of their government and its policies.

Yet despite criticisms, the majority of Nicaraguans seem clearly to support and appreciate the many programs in education, health, land reform and political participation that they enjoy in a Nicaragua free from the hated Somoza dictatorship.

Washington describes the Sandinistas as brutal and the Contras as "freedom fighters." Although there have been abuses, freely admitted, in relation to the Miskito Indians, and we heard of abuses in relation to military conscription, we see a double standard being applied to Nicaragua.

On the one hand, Nicaragua should be compared both to the previous Somoza dictatorship, a truly brutal regime, and also to other Central American countries, such as El Salvador; Nicaragua's human rights situation compares very favorably with the latter, as reported by independent human rights organizations such as Americas Watch. Further, Americans should also remember that wartime conditions breed abuses; our government interned thousands of U.S. citizens of Japanese ancestry during World War II, confiscating property as well.

Described as "freedom fighters," the contra behave like the brutal National Guard of Somoza, of which many are former members. We were told and read of many accounts of the incredible damage done by the contras, including the kidnapping and murder of religious leaders, health workers and teachers, women and children.

While we were in Managua, the newspapers reported on more than 100 contras who, in response to a government amnesty, turned themselves in. A Canadian journalist whom we met had the opportunity with other journalists to interview these men in Esteli, all of whom shared the same general story: They were campesinos who had been kidnapped, taken to Honduras, trained and then forced to fight against their own people. Many young Miskito men have been similarly victimized, threatened with death if they did not join the contras.

All the evidence we see indicates that the Sandinistas are still committed to the three fundamental principles of their revolution: a mixed economy, a pluralistic political system, and non-alignment. We found many examples of private enterprise, including coffee farms, most of which are in private hands. One farm we saw is owned by a U.S. citizen.

In the Nicaraguan elections of this past November, seven political parties ran candidates for president and vice president as well as for the National Asssembly. Although not required by law to vote, 75 percent of the registered voters cast ballots and the Sandinistas received 63 percent of the vote. (The electoral system, modeled after Western European systems, provides for all parties to be represented in the National assembly, unlike our system in which it is very difficult for third-party candidates to be elected.)

As to non-alignment, Nicaragua has sought aid from the U.S., Latin America, Western Europe and the Soviet bloc. Although we trade with Nicaragua, the U.S. currently provides no aid and has blocked aid from international banks. Because of this, aid from the Eastern bloc has increased from 15 to 30 percent.

U.S. policy has the effect of driving Nicaragua towards greater dependence on the Eastern bloc—the very thing we say we deplore. We met no Nicaraguans who want that.

It is clear to us that the great majority of Nicaraguans participated in what they call "the insurrection" against Somoza, benefit from the health and educational programs for the poor, and support the revolution as their own. As people who have had our own revolution, we should respect their right to a government of their own making and choosing.

We urge all readers to contact congressional representatives and voice absolute opposition to any aid to the contras. It is appalling that our tax dollars should support the killing and terrorization of innocent Nicaraguans.

Readers should also urge our representatives to support the Contadora Peace process—a process that would, with U.S. support, guarantee mutual acceptance of each other's integrity by the Central American nations, the removal of all foreign military personnel, and negotiations to reduce military forces in the region.

The road to peace in Central America requires political support for broad-based democratic governments and processes and economic assistance, not more war.●

TRIBUTE TO MR. AND MRS. JOHN H. FOREHAND

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. ORTIZ. Mr. Speaker, on Sunday afternoon, April 21, a very loving couple will celebrate their 50th wedding anniversary at 121 Catalina Circle in Portland, TX.

Mr. and Mrs. John H. Forehand will be honored at this reception. Although Portland is located across the Corpus Christi Bay from my district, I have become well acquainted with this couple through my friendship with their son, John Forehand III. I would like to take this opportunity to congratulate the Forehands on their first 50 years together, and offer my best wishes for their future.

Their long life together is truly an inspiration to the people of our Nation. They were married on April 21, 1935 in Rockport, TX and have been blessed with three children. In addition to their son John, they have two daughters; Myrna Loyce Koubeck of Rockport, TX and Mary Pearl Havelka of Portland, TX. Their children have in turn blessed Mr. and Mrs. Forehand with nine grandchildren and six great-grandchildren.

I extend my congratulations to Mr. and Mrs. John H. Forehand on this special occasion. May their dedication and togetherness last another 50 years. I wish them the best of health and good fortune in the future.●

H.R. 201

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SILJANDER. Mr. Speaker, I would like to call my colleagues' attention to a bill I introduced on January 3, 1985, the Agriculture Export Trade Equity Act of 1985 (H.R. 201). It is my hope that the concepts contained in this bill can be incorporated into the export title of the farm bill.

The current farm crisis has caused the United States to reexamine its policy toward our Nation's farms. We have two choices: We can either reduce the supply of farm goods by allowing the collapse of thousands of farmers and creating disincentives for production, or we can expand the market for our agricultural products, keeping most farmers in business while reducing the domestic supply and raising commodity prices. One way to expand our markets is through increased exports.

American farmers, however, are facing an uphill battle in their attempt to sell their products abroad. European export subsidies and the strong dollar are drying up many foreign markets. This is not only hurting the balance of trade, but it is also costing thousands of American workers their jobs. Agricultural goods account for 20 percent of American exports each year. Yet American traders face a number of significant trade barriers on the world market and often lose out when bidding against foreign competitors.

Every U.S. sale lost to foreign subsidies hurts the American economy. As the OMB and the CBO has stated, every $1 billion lost in exports puts 25,000 Americans out of work. If this is true, then the current $15 billion trade balance deficit means a loss of 350,000 jobs. The European Community has been a particularly sharp thorn in the side of American exporters. Through the use of aggressive export promotion and subsidies, it deprives the United States of up to 5 billion dollars' worth of exports each year.

I participated in the annual meeting of the European Parliament in January 1984 and asked members of the Common Market to drop their trade barriers against U.S. exports. Upon my return to Washington, I introduced the Agriculture Export Trade Equity Act (H.R. 201), designed to promote American agricultural exports. If approved by Congress, this bill will: Enable American farmers to compete with nations which subsidize their farmers, save thousands of jobs, help nations experiencing food shortages to feed their hungry, and reduce Federal spending by cutting the cost of storing agricultural commodities.

The Agriculture Export Trade Equity Act of 1985 specifically instructs the Secretary of Agriculture to: Target only those commodities and products that have been adversely affected by foreign export subsidies, for example: wheat, feed, grains, upland cotton, rice, milk, and their products, and any other agricultural commodities or products acquired by the Commodity Credit Corporation [CCC]; authorized an export Payment-In-Kind [PIK] Program that would allow American producers to match the deals offered by their foreign competition; provide for the shipment of 100,000 tons of dairy products in fiscal years 1985 and 1986; encourage the use of processed and protein-fortified agricultural, value-added products in Public Law 480; and use barter as a means of reducing the agricultural surplus.

BENEFIT TO THE U.S. ECONOMY—THE BAKER'S DOZEN

The bill includes an Export Payment-In-Kind [EPIK] Program that would allow American producers to match the deals offered by their competitors by offering buyers a sort of "baker's dozen." The EPIK Program would use CCC surplus to offset foreign subsidies.

For example, if a competitor was selling wheat below the world market price, the CCC would add quantities of its inventories to each American sale, so that even though the foreign unit price was lower, the bonus provided by the CCC would make the net U.S. price the same.

The proposed EPIK Program calls on the Secretary of Agriculture to: Consider all potential foreign buyers, but give priority to those who have traditionally purchased U.S. commodities, ensure that the program does not hurt those American commodities already being sold abroad, and prevent buyers from reselling their commodities to other countries.

BENEFIT TO THE TAXPAYER

H.R. 201 contains no additional cost to the taxpayer. In fact, this bill would actually save money by decreasing the surplus, thus reducing storage costs. Surplus crops are collected by the Government to serve as a backup in the event of a national shortage. But there has been no national food shortage and as a result the size of the surplus continues to grow. The CCC currently stores the excess at considerable cost to the taxpayer, coming up with a bill of $382 million in 1983.

The bill also requires the Secretary of Agriculture to export no less than 100,000 metric tons of dairy products during each of the next 2 fiscal years. Because dairy goods are the most perishable and expensive commodities to store, the savings would be substantial.

BENEFIT TO NATIONS EXPERIENCING FOOD SHORTAGES

While the United States spends billions of dollars storing its surplus, millions of people in underdeveloped nations are starving. And the American people have been looking for a way to get their excess to those in need.

H.R. 201 would help by requiring the President to consider both the short-term needs of Third World nations and the long-term needs of the American farmer. The nutritional value of food shipped to developing nations will be carefully considered, and the use of processed and protein-fortified foods will be encouraged. An increase in the use of such value-added products would not only increase nutritional benefits to the Third World, but also provide even more jobs for Americans.

BARTER PROVISION

In 1950, the United States began to barter with other nations. This time-honored swapping of goods was successful for 23 years until it was abandoned in the early 1970's because of the strength of the foreign export market. Since then barter has been used sparingly, with the latest example being an exchange of American

dairy goods for Jamaican bauxite in 1982. Although barter currently accounts for between $200 and $800 billion worldwide or 10 to 40 percent of the world trade, the United States has been content to let other nations reap the benefits.

H.R. 201 would tap into this huge market by encouraging the Secretary of Agriculture to make greater use of the barter system. A barter program would reduce the CCC surplus, allow the United States to cut the trade deficit and at the same time obtain certain strategic materials not readily available in this country. H.R. 201 would encourage the United States to trade wheat for cobalt, grain for tin or corn for manganese. These critical materials could then be placed in reserve to be used in the event of a worldwide shortage.

Under a cash system, nations selling strategic materials to the United States often use the proceeds to buy agricultural goods from America's competitors. This could not happen under barter. American dollars would be kept in American hands.

CONCLUSION

H.R. 201 will help American farmers overcome the substantial trade barriers they face in overseas markets through the Export Payment-In-Kind Program. American tax dollars will be saved by reducing storage costs, and a major step will be taken to end world hunger.

The Agricultural Export Trade Equity Act will strengthen the domestic economy by increasing U.S. agricultural sales and preserving the family farm. I ask my colleagues to consider the incorporation of these concepts into the farm bill.●

PRESIDENT REAGAN'S UPCOMING TRIP

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FORD of Tennessee. Mr. Speaker, I would like to commend President Reagan for his recent decision to include a visit to a concentration camp on his upcoming trip to West Germany. However, I am not sure that he or his advance team fully understands why so many Americans are upset over this issue. I truly believe that those individuals within the President's advance team must be made totally aware of their insensitivity in this matter.

One of the major reasons for this visit to Germany at the present time was to commemorate the 40th anniversary of the ending of World War II. I find it incomprehensible that such an occasion could have been marked without a visit to a concentration camp. What took place at Dachau, Auschwitz, and similar camps was not simply a crime perpetrated against the Jewish people, but a crime taken against all humanity. To visit Germany on this occasion without such a visit is to ignore the millions of human lives that were lost there. The Holocaust was all too real; to simply pass it off as a 40-year-old aberration means that we, as a civilized society, are bound to repeat the mistakes of the past.

Compounding this error, the President was, and still is scheduled to visit the German cemetery at Bitburg, where approximately 30 members of Hitler's brutal S.S. are buried among the other German war dead. I am aware that most of Germany's war cemeteries have S.S. members scattered among its dead. Yet again, it is difficult to believe that the White House could not come up with an alternate means of commemorating the many years of strong ties with West Germany. Lest we forget, it was the S.S. who killed American POW's with their hands tied. It was also the S.S. who were responsible for the operation of the concentration camps. Adding insult to injury, the White House has decided not to honor the memory of Americans who perished in the liberation of Germany.

Mr. Speaker, the trade of a concentration camp for a cemetery does not make up for the blunders of the President's advance team. Although I applaud the President for this first chance in schedule, more needs to be done. The President of the United States should take time out to honor American war dead. In the future, the White House advance team must be aware of more than just the public relations value of an upcoming trip. Mr. Speaker, I would certainly hope that the White house doesn't think that much ado is being made about nothing. We, as a Nation, owe it to the memory of every man, woman, and child that perished during the war years that the horrors of what took place in Germany, Poland, and other sections of Europe never again be forgotten.●

A BAN ON PRODUCTION OF NEW LETHAL BINARY CHEMICAL WEAPONS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. PORTER. Mr. Speaker, I am including in the RECORD a joint statement by myself and Chairman DANTE B. FASCELL, a Democrat from Florida, proposing a ban on production of new lethal binary chemical weapons.

We are announcing a bipartisan effort to stop the funding of new binary chemical weapons. Thirty three Democrats and 15 Republicans are joining us in introducing today a bill to prohibit the production of these new lethal chemical weapons.

This bill will make a cut in the proposed military spending for fiscal year 1986 of almost $200 million and, over the next 5 years, stopping binary weapons production will subtract $2.3 billion from our mushrooming national debt of nearly $2 trillion. We do not want to plunge our country further into debt. When a weapons program is not needed to enhance our country's national security, such as the binary weapons program, it is our responsibility to speak out and act to preclude its development.

For 3 straight years the House of Representatives has voted to oppose resumption of nerve gas weapon production by our country. The House has voted against new binary weapon production for sound foreign policy, arms control, defense, and cost reasons. Binary weapons are costly. Technically and operationally they are unproven and questionable. They cannot be based in Europe. And, let's face it, they are repugnant to our friends and allies, as well as to many of us. They also pose severe proliferation risks. Last year the vote was 247 to 179 with 53 Republicans joining the Democratic majority in opposing nerve gas production. This year the case against resuming production is as clear and as persuasive as in the past. The foreign policy, defense, and cost arguments are as compelling as before:

Cost: The administration wants to spend $174 million on binary weapons and related military construction this year and $2.3 billion over the next 5 years. The binary weapons program request has almost doubled this year—presumably to compensate for the production funds we cut from last year's budget. Some estimates which include calculations of likely cost overruns place the 5-year figure at between $6 and $12 billion.

Stockpile: Our current stockpile of chemical nerve agent artillery shells is adequate and it is a credible deterrent. Secretary of Defense Caspar Weinberger told the Congress:

> For procurement of new artillery shells, the need is not one of redressing a clear lack of military capability. The U.S. possesses a stockpile of chemical nerve agent artillery shells * * * (whose) quantity is in the range of sufficiency and actually is higher than the planned acquisition quantity of the binary projectile.

Bigeye bomb and binary artillery shells: Doubts remain about these weapons and problems continue to plague their development. Congress has not been shown convincing evidence that the Bigeye bomb and the binary artillery shell offer substantial technical and operational advantages over existing weapons. On the con-

trary, there may be serious disadvantages to these weapons which place our troops and pilots at greater risk. In saying no to the production of new binary chemical weapons, funding of research and development would continue as it has continued for almost 20 years.

Pre-positioning in Europe: NATO governments have not agreed to accept these new binary nerve gas weapons to be pre-positioned on their soil. This fact reduces the potential credibility of these weapons as both a deterrent and as a real retalitory capability for our troops in Europe. Congress should not even consider funding production of these weapons until there are agreements by NATO governments to accept them.

Negotiations: There are no bilateral negotiations with the Soviet Union on chemical weapons. President Reagan ended those negotiations in 1981. Those negotiations must be reopened. The multilateral negotiations in Geneva on chemical weapons are working to resolve over 100 differences which exist between the United States and Soviet initiatives presented there. International pressure is definitely on the Soviet Union. Ending our 16-year moratorium and producing new chemical weapons will take that pressure off the Soviets, cause NATO alliance problems, raise questions about U.S. credibility and sincerity in negotiations, and increase the danger of chemical weapons proliferation.

Proliferation: U.S. production of new deadly chemical weapons now after a 16-year moratorium would undermine a variety of constraints which have inhibited the proliferation and use of chemical weapons. There are technical features of the new binary weapons which indicate that production of these weapons is likely to increase the tremendous risks of chemical weapons proliferation. Binary weapons are unwittingly more conducive to proliferation and terrorist use than existing types of chemical weapons.

Good defense is a good deterrent: We want our troops protected against chemical attack and we have provided adequate funds to improve our defensive chemical warfare program and protect our troops. A significant defensive chemical capability is ultimately the best deterrent against chemical use because of the limited military utility of chemical weapons. The emphasis should be on improving our defenses not on developing a new offensive chemical capability.

For these reasons and others we are introducing this bill to prohibit the production of lethal chemical weapons. There has been much talk about cutting military spending. Talk won't cut that spending but this bipartisan action will. We can cut hundreds of millions of dollars now and billions of dollars in the out years while maintaining a strong defense and an enlightened foreign policy.●

CARING FOR OUR CHILDREN

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. McKERNAN. Mr. Speaker, today the gentleman from New York, my colleague on the SCoCYF, Representative FISH, and I are introducing legislation to provide States with an incentive to establish, monitor, and enforce child care standards necessary to protect the safety and well-being of our Nation's children.

The September 1984 Select Committee on Children, Youth, and Families report, "Families and Child Care: Improving the Options," noted that families placing their children in out-of-home care were "unanimous in their desire to find safe, Nurturing and developmentally appropriate care for their children. The necessary rapid expansion of child care opportunities and their diversity means that we must do everything possible to assure the adequacy of child care settings, the report said. The report essentially highlighted the lack of national and comprehensive child care standards. Currently, child care providers may be either licensed by the individual State or totally unlicensed; certain States require child care providers to be registered, while others allow them to operate undocumented.

While some States are already addressing the issue of child care standards, with so many of our children in out-of-home care, and given the mounting reports of abuse in child care, I am deeply concerned that steps be taken to ensure the safety and well-being of our young children in child care.

Today, more than half of America's children have both parents in the work force. Another one in five grows up in a one-parent family. The number of children in these one-parent families is expected to increase by an astounding 48 percent over the next decade. Clearly, we must respond to this changing trend in our society, while allowing individual States to develop their own plans and address their own needs.

The legislation which Representative FISH and I are introducing today is an attempt to address this need for national child care standards. Our bill would require States receiving funds under title XX of the Social Security Act, and using any of these funds for child care, to establish, monitor, and enforce child care standards under broad guidelines spelled out in the bill.

Under our legislation, States would, according to their particular needs, specify health, safety, and nutritional requirements for children, protect against abuse and neglect, require parental involvement, offer training and technical assistance, mandate criminal conviction checks of providers, require facility inspections and allow sanctions for noncompliance with standards, and provide information and referral services.

Caring for our children is a great responsibility, and we must do everything we can to ensure their protection, their health, and the adequacy of child care settings. I urge my colleagues to join Representative FISH and me in supporting this measure.●

WYOMING VALLEY BOXERS HONORED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. KANJORSKI. Mr. Speaker, it is my pleasure to bring to your attention an event of considerable importance to sports fans in the Wyoming Valley. The Wyoming Valley Boxing Hall of Fame will hold a banquet on April 19 to honor three men who have made enormous contributions to boxing. All three will be inducted into the Hall of Fame, so I would like to give a little background on the achievements of each.

Neil Miller distinguished himself as a Diamond Belt champion in 1939, then began a successful professional career that spanned more than 15 years. As a boxer, he fought and defeated many of the ring's top-ranked lightweight, welterweight, and middleweight fighters. Miller is now 76 years old, and lives in Wilkes-Barre.

Bill Speary passed away in 1967 at the age of 49, but he left behind a legacy of greatness in the ring. Speary held 15 titles as an amateur, winning national and international championships in two weight categories. From 1937 through 1939, he won three AAU championships as a flyweight and a bantamweight. As a professional, he fought four world champions while they still held their crowns. Speary is widely regarded as Luzerne County's finest boxer ever.

Jim McCarthy passed away this spring at the age of 74. McCarthy was the dean of area sportscasters, having devoted 55 years of his life to sports broadcasting. He was tireless in his work on behalf of area boxing, for which he worked as a ring announcer and promoter. He truly loved this sport, and his loss will be felt by all of us.

Mr. Speaker, I will be attending the banquet this week at which these three men will be honored. I know I speak for all sports enthusiasts in the

region in offering my congratulations to the Wyoming Valley Boxing Hall of Fame for their work in honoring these great athletes.●

OHIO'S URANIUM ENRICHMENT EFFORTS

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. McEWEN. Mr. Speaker, I am today inserting for the benefit of the Members of the House of Representatives, my testimony before the House Appropriations Subcommittee on Energy and Water Development on funding for the Portsmouth Gas Centrifuge Enrichment Plant. I do so in the hope that Members will join me in supporting the Department of Energy's full request for the continued operation of this vitally important project.

The statement follows:

STATEMENT OF CONGRESSMAN BOB MCEWEN BEFORE THE HOUSE APPROPRIATIONS SUBCOMMITTEE ON ENERGY AND WATER DEVELOPMENT, APRIL 3, 1985

Mr. Chairman and members of the subcommittee, I appreciate the opportunity to appear before you today to discuss the Department of Energy's fiscal year 1986 budget request for the Uranium Enrichment Program. In particular, I would like to address my remarks to the funding requests for further development of the advanced gas centrifuge technology [AGC] and continued construction and operation of the Portsmouth Gas Centrifuge Enrichment Plant [GCEP].

Mr. Chairman, the strategic and economic importance of our Nation's Uranium Enrichment Program cannot be over-emphasized. The U.S. share of the uranium enrichment market is less than a third of what it was just ten years ago. This reflects not only the ongoing technological efforts of the European consortium, but our own hesitation and indecision in the past as well. We should learn from history.

I urge this subcommittee and this Congress to avoid the kinds of whimsical policy changes that marked this program during most of the 1970's. These actions aided and abetted the formation of a uranium enrichment capability in Europe, which is not a direct threat to tens and thousands of U.S. jobs.

If actions are not taken to reverse present trends, the prognosis for the U.S. uranium enrichment industry is guarded. The question before us today and in this Congress is: How can the United States recapture our prior market dominance?

I believe the answer is clear: An improved technology which is responsive to the market and a firm commitment by the Congress and the administration to go forward with needed research and development. The fiscal year 1986 budget request for uranium enrichment proposed by the Department of Energy reflects that commitment. It will permit work on improved technologies to move ahead while maintaining the considerable advantage of our new gas centrifuge plant.

Let me take this opportunity to emphasize how successful the GCEP operation has been. It is an innovative technology which has proven to be far more efficient than the gaseous diffusion process or even our wildest expectations. Although it is still in the process of being completed, the project is on schedule and under budget; the centrifuge machines are being manufactured by U.S. industry and thousands of U.S. firms have committed their financial and human resources to the success of GCEP.

The Department of Energy has already expended vast resources to develop the GCEP technology. I believe that we cannot afford to write off the investments thus far expended on this program—the livelihood of thousands of employees depends on this vital project. If our objective is to minimize U.S. enrichment costs over the remainder of the century in order to become more competitive in the world market, we cannot afford to discard the progress already made and the excellent potential that an improved uranium enrichment technology offers.

Let me take a minute to say something about the men and women who live and work in southern Ohio. The commitment, dedication and support of America's enrichment program by the workers in the seven-county area is unsurpassed. They take pride in the work they do and are not afraid to stand up and let it be known that they back this effort. Over the past quarter century, southern Ohio has been the demonstrated leader in our Nation's enriched fuels effort. The Ohio workers are dedicated, efficient and responsible. Our communities are supportive. And our State and local leaders are cooperative. I believe all this counts for something and should be considered in any of our decisions.

Mr. Chairman, I strongly support this subcommittee's and the Department of Energy's commitment to reestablish the U.S. reliability of enriched uranium at a cost that world markets can support, which will be borne by the users and not by taxpayers. The indiscretions of the past have placed the entire uranium enrichment program at risk. I have every confidence that with the continued leadership and personal involvement of this subcommittee, the mistakes of the past will not be repeated.

Finally, words cannot sufficiently communicate the appreciation I have for the members of this subcommittee who have taken such a personal interest in the success of this program and therefore have assisted not only our Nation's efforts toward energy independence but the workers of one of our Nation's most economically depressed areas. It is clear that whichever technology our Nation pursues in the years ahead, this subcommittee and the department of energy would obviously be prudent to continue to have America's most dedicated, resourceful, and efficient workers involved in the advanced uranium enrichment endeavor.

Thank you.●

ILLICIT DRUG TRAFFICKING

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SHAW. Mr. Speaker, illicit drug trafficking from countries throughout our world into south Florida remains a critical threat to our youth and the very moral fiber of our country.

Increased law enforcement efforts through help from Customs, the Coast Guard, and the military have helped. Unfortunately, we are still fighting an up-hill battle.

Our U.S. Coast Guard and the U.S. attorney's office prosecutors have been further frustrated in fighting the drug traffic by recent Federal court decisions allowing defendants to go free on technical defenses.

One such defense tactic successfully used by foreign traffickers argues that the United States does not have jurisdiction in international waters to arrest or seize foreign drug ships despite the fact that our Coast Guard has received authority from the flag country for such arrests.

My bill would close that loophole by more clearly defining what kind of authority or arrangement we must have from a foreign country to obtain jurisdiction over drug traffickers in international waters.

We must no longer allow technical impediments as this to obstruct our U.S. attorney's efforts to convict these criminals after we've made proper arrests and seizures and are prepared to carry the burden of prosecution.

The congressional intent of the law I am amending was to allow our country to interdict criminals on the high seas. We must not allow these laws to be diluted, now, when we most need them.●

SOIL CONSERVATION ACT OF 1985

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. JONES of Tennessee. Mr. Speaker, today I am introducing the Soil Conservation Act of 1985, which is very similar to a bill passed overwhelmingly by the House last year but was opposed by the administration and the Senate and died in conference committee.

While this bill is being introduced independently, I plan to ask the Subcommittee on Conservation, Credit, and Rural Development to include the text of this bill in the 1985 farm bill which is being developed in the House Agriculture Committee.

This bill has two primary elements, both of which address land which is highly erodible in nature. First, the so-called sodbuster part of the bill would discourage the breakout or sodbusting of highly erodible land if that land has not been in crop production within the last 10 years. The bill would deny farm program benefits such as price supports and loans to the farmer on his entire planting of the commodity planted on such highly erodible land.

Second, the conservation reserve is designed to assist in the transition of the same type of highly erodible land which is now in crop production into less-intensive uses such as timber, hay, or grass production. Long-term contracts between the Secretary of Agriculture and owners or operators of highly erodible cropland would provide rental payments, technical assistance, and cost sharing to establish conservation practices to owner or operators as an incentive to put such highly erodible land in more conserving uses.

I believe strongly that this is a much needed piece of legislation and encourage each of you to support it.●

GRADUATED TAX RATES FOR SMALL BUSINESSES

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. CAMPBELL. Mr. Speaker, I am pleased to join with Mr. RANGEL, my distinguished colleague from New York, in introducing this resolution expressing the sense of the Congress that the corporate income tax rates should remain graduated.

As proposed last November by then Secretary Regan in the Treasury Department's tax reform plan as well as in certain recent tax reform proposals the current graduated corporate tax rates for small businesses would be repealed. Repeal of these provisions of our Tax Code would cause substantial increases in the effective tax rates and thereby reduce essential capital available for continued operation and growth for many small businesses.

One recent report which makes a strong case for our position on this issue has been recently prepared by Arthur Andersen & Co. The report, which was requested by the National Association of Wholesale-Distributors [NAW], provided an analysis of the impact of the Treasury proposal on smaller wholesaler-distributors based on actual tax returns. Arthur Andersen analyzed some 50 sets of income tax returns which were forwarded directly to them by members of NAW. The firms targeted were those whose sales volume suggested a pre-tax earnings level such that the graduated rate structure presently in place meaningfully impacted their effective tax rate.

It should be noted that the overwhelming majority of wholesaler-distributor corporations have less than $5 million in annual net receipts. A typical $5 million wholesaler-distributor has before-tax-profits of 3 percent, or $150,000. The effective tax rate on this amount of earnings is about 33 percent under current law. Firms with pre-tax earnings less than $150,000 currently have effective tax rates lower than 33 percent.

The Arthur Andersen analysis had two principal conclusions:

First, the Treasury Department's tax reform provisions propose a very negligible change (less than 1 percent) in the respondents' taxable income . . . that is to say the proposed changes, with the exception of the rate proposal, have a neutral impact on taxable income, when taken together.

Second, the proposed flat 33 percent rate dramatically increases the tax obligation, and thus the effective tax rate of the firms in the sample. Indeed, the effective tax rate of the firms in the sample would rise by an astonishing 60 percent, i.e., from 21 percent under current law, to 33 percent under the Treasury proposal.

This analysis underscores the fundamental importance of retaining a graduated approach as you move to reduce the maximum corporate rate. It makes a strong and compelling case for continuation of a graduated rate for smaller concerns.

I urge my colleagues to support us on this issue which is so important to our Nation's small business community.●

MARIA FANTANAROSA TO BE HONORED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. KANJORSKI. Mr. Speaker, I would like to bring to your attention the achievements of a local woman who has already earned the recognition of her friends and neighbors as an outstanding athlete. Maria Fantanarosa is to be recognized by her State history-breaking basketball feats.

Ms. Fantanarosa scored 3,608 points, breaking the record held by professional basketball great, Tom McMillin. McMillin currently plays for the Washington Bullets of the National Basketball Association.

On April 28, Kulpmoni residents, local organizations, fraternal groups, and auxiliaries will meet to honor Maria for her achievement. Thomas Cherneski will serve as chairman of the testimonial committee, and George Murin, chairman of the West End Fire Company directors, will cochair the event.

Other individuals involved include Joseph Warner, superintendent of Mount Carmel Area Schools, Mary Lou Edmonson, Carmen Avellino, and Albert Pupo. Peter Krehel, Kulpmont president judge of Northumberland County will serve as master of ceremonies for the event.

Mr. Speaker, I am proud of the achievements of Maria Fantanarosa, and I am pleased to call her to your attention.●

SUMMARY OF 1984 TAX RETURN DATA

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DOWNEY of New York. Mr. Speaker, as in the past, I am providing a summary of my 1984 tax return. And may I say again that while I strongly believe in the strictest standard of privacy for private taxpayer filing data, I feel that Federal elected officials, as trustees of the public's interest, should be open about their financial situations. For this reason I am making the following data available as part of the public record.

Salary—U.S. House of Representatives	$72,367
Interest income	56
State and local income tax refunds	496
Rental loss	−1,089
Business income—honorariums (net of expenses)	21,700
Total income	93,530
Less:	
Nonreimbursed employee business expenses	−3,275
Payments to IRA	−2,250
Payments to Keogh retirement plan	−2,832
Adjusted gross income	85,173
Itemized deductions:	
Taxes	8,604
Interest expense	1,930
Contributions	380
Miscellaneous deductions	1,802
Total itemized deductions	12,716
Less:	
Zero bracket amount	−3,400
Excess itemized deductions	9,316
Tax table income	75,857
Less: Personal exemptions	−4,000
1984 taxable income	71,857
Federal income tax	20,135
New York State income tax	6,821
California income tax	61
Illinois income tax	13
New Jersey income tax	37
	●

IN RELIEF OF THE JUNIOR ACHIEVEMENT OF SACRAMENTO, INC.

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MATSUI. Mr. Speaker, the Junior Achievement has long been recognized as an outstanding organization dedicated toward the education of our youth. Teenagers, through the first-hand experience of operating their own business, gain practical knowledge

in such areas as business basics, economic management and applied management. Such training provides our youth with important skills to assist them in embarking on future careers.

The Junior Achievement of Sacramento, Inc., was established to provide teenagers with practical experience in how American business operates. The program, funded through charitable donations and supervised by adult volunteers from the business community, has greatly enriched the educational experience of our youth. Indeed, the Sacramento program has been recognized for its outstanding achievements and contributions to my community.

As a nonprofit, volunteer organization, the Junior Achievement of Sacramento, Inc., qualifies as an organization exempt from taxation. The Junior Achievement of Sacramento, Inc., established and maintained this status with the Internal Revenue Service since its inception. Unfortunately, due to an inadvertent error by a volunteer to the organization, the exempt status of this nonprofit organization has been jeopardized.

Today, Mr. Speaker, I rise to introduce legislation on behalf of this commendable organization seeking resolution of this matter. This bill provides that services performed after June 30, 1977, and before January 1, 1984, in the employ of Junior Achievement of Sacramento, Inc., shall not be treated as employment for the purposes of charter 21 of the Internal Revenue Code of 1951 and title II of the Social Security Act. Furthermore, services shall not be treated as performed after June 30, 1977, to the extent that remuneration for such services is paid after such date. I believe that Junior Achievement of Sacramento, Inc., deserves this extraordinary relief granted by this legislation based upon the following factual information.

The secretary to the volunteer treasurer of this organization inadvertently filed a form 941 for the quarters ending December 31, 1975, March 31, 1976, and June 30, 1976, and erroneously withheld and remitted FICA taxes with those returns. Upon discovery of these filings, the organization immediately filed form 941C requesting a refund of the taxes paid. The request for the refund was denied in January of 1977. After that denial, the organization continued to correspond with the Internal Revenue Service regarding the matter, and, upon the advise of their attorney, filed form 941 and paid FICA taxes for two quarters in 1977 under protest. the Service then refunded the taxes paid for the quarter ended December 31, 1975. The organization immediately wrote to the Service stating that apparently their claim for a refund had been reconsidered and granted. Accordingly, the organization filed form 941 and 941C for the quarter ended December 31, 1977, and applied for and received a refund of the taxes paid in the earlier quarters of 1977.

Consequently, the Junior Achievement had every reason to believe that the Service had recognized the organization's exempt status and that the refund for the quarters ended March 31, 1976, and June 30, 1976, would soon be forthcoming. In addition, the FICA taxes originally withheld from the employee in 1976 and 1977 were refunded to the employee. Subsequent to that time, the organization did not withhold any FICA taxes from its employees and filed its quarterly payroll tax returns as an exempt organization. Unfortunately, however, the Service has continued to demand repayment of these taxes.

It is apparent from the chronology of events that upon the discovery of the error in filing taxes, the organization made every attempt to clarify the situation and make amends with the Service. Indeed, the refund of the taxes paid for the quarter ending December 31, 1975, and the quarters in 1977, would indicate that the Service recognized the error and granted the organization's request for a refund due to their exempt status. Furthermore, the organization has continued to file its quarterly payroll tax returns as an exempt organization and has not withheld any FICA taxes from its employees since 1977; yet the Service refuses to recognize the previous error and still demands repayment.

To persist in collecting these taxes is not only unjustifiable but inequitable. To allow a nonprofit organization such as the Junior Achievement to suffer this burden is inexcusable. In addition, it would seriously impair the organization's ability to continue within the community. Therefore, I urge my colleagues to support this legislation and I respectfully request that the committee grant the immediate consideration of this urgent matter in order that this inequity may be resolved in the near future.●

HONORING LOYAL EMPLOYEES OF THE NORWALK-LA MIRADA UNIFIED SCHOOL DISTRICT

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. TORRES. Mr. Speaker, I want to call to the attention of my colleagues the outstanding work of several employees of the Norwalk-La Mirada Unified School District.

On May 23, 1985, the Norwalk-La Mirada Unified School District will be honoring employees for 30 and 35 years of service to the students of the school district. These people will be honored for their outstanding commitment and dedication to education. These people are to be commended for their contribution to the needs of the students in their district. I am honored to rise on the floor of the U.S. House of Representatives today and recognize them along with their peers, their school district, and their community.

I believe very strongly about the education and the welfare of our young. It takes very special people to educate and see to the needs of students. I am proud that these fine people have chosen to serve in my community for 30 and 35 years. These employees deserve our recognition and gratitude in reaffirming our Nation's commitment to education.

These people being recognized today work for one of the finest school districts in the State of California. The Norwalk-La Mirada Unified School District is an outstanding example of a district working hard and reaching a high level of excellence in education.

Mr. Speaker, I ask my colleagues in the House to join me in giving our best wishes and thanks to the following people for adding so much to education.

Les Billinger, La Mirada High School, principal; Shirley J. Carlisle, Moffit Elementary School, teacher; Evan H. McKinney, John Glenn High School, teacher; Gloria G. Ampolilla, Glazier Elementary School, teacher; Charles R. Austin, Waite Elementary School, assistance principal; Dominic D. DiCiolla, purchasing department, assistant director; Shirley J. Foerster, Foster Road Elementary School, teacher; Thomas K. Hada, Moffitt Elementary School, teacher; William A. Hall, grounds department, foreman; Betty M. Hatton, Edmondson Elementary School, teacher; Eldon D. Hunter, transportation department, director; George A. Keplinger, Gardenhill Elementary School, principal; Claude J. Oyler, transportation department, bus driver; Sybil G. Shaw, La Pluma Elementary School, teacher; Ronald J. Ternquist, Norwalk High School, counselor; Gilbert Ulibarri, Norwalk High School, assistant principal; Benny G. Vanderwall, warehouse, manager; Margaret M. Winters, substitute teacher.●

A SHAMEFUL VISIT

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MANTON. Mr. Speaker, President Reagan recently announced that he plans to visit a German military cemetery during his upcoming trip to West Germany. The cemetery which is located at Bitburg, contains the graves

of Nazi soldiers and members of Hitler's SS squad.

The White House claims the President's action would serve as an opportunity to demonstrate 40 years of peace in Europe. While this peace is justly celebrated, we must never forget the reasons World War II was fought or the horrors of the Nazi regime.

West Germany is a strong and important ally of our Nation. We must work to make certain that alliance grows stronger in the future. That is the key reason the President is making this trip.

However, to place a wreath at a Nazi cemetery does nothing to further the cause of our alliance. Instead, that act ignores the atrocities committed by the Nazi regime against the victims of the Holocaust, American soldiers and all those who fought to preserve freedom.

Mr. Speaker, more than 400,000 Americans were killed in World War II and more than 6 million Jews were murdered by one of the most evil regimes mankind has known. Although the President has made a belated decision to attend a memorial service at a Nazi concentration camp, his decision to remember the Holocaust is no justification for honoring war criminals, particularly since the President does not plan to visit an American military cemetery during his visit.

Mr. Speaker, the President made a series of decisions which deeply offend the Jewish people, American war veterans and every person who understands the horrors committed by the Nazis. I call upon the President not to lay a wreath at the Bitburg Cemetery. We do not commemorate peace or build upon our alliance by honoring those who were responsible for crimes against humanity.●

TRIBUTE TO SARAH FABER

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mrs. ROUKEMA. Mr. Speaker, today we pay tribute to Sarah Faber, a young woman whose ability, determination, and willpower provides inspiration to her generation and ours.

Sarah is a senior student-athlete at Midland Park High School in Bergen County, NJ. Although she has participated with distinction in the varsity soccer, track and field, and softball programs, her star quality has been displayed most impressively on the basketball court. During the last three seasons, Sarah has scored over 1,100 points, making her just the second person in Midland Park High's girls' basketball program to top 1,000 points for a career.

What distinguishes her accomplishments from those of so many other student-athletes across New Jersey? Simply put, Sarah has excelled while competing, not only against other athletes, but against a significant handicap. Sarah Faber is deaf.

Today, Sarah is preparing for another challenging athletic event. Her excellence has earned her a position on the U.S. team to the 15th World Games for the Deaf, to be held this summer in Los Angeles. Fifty-two young women entered competition for the 12 slots on the team. Sarah, at 17 years of age, was the youngest candidate named to the team.

In one sense, this event will present the most significant athletic challenge Sarah has ever faced. In all, 2,500 athletes will participate in the world games. She will be competing with athletes from 41 nations with their accompanying ranges of talents, styles of play, and levels of experience. There is no doubt. Sarah's skills and discipline will be put to the test.

Just as certainly, though, Sarah's upcoming experience in Los Angeles is a tribute to her depth of character, her devotion to excellence, and to her persistence in overcoming great odds. She refused to allow her handicap to prevent her full and active participation in the world around her.

In these ways, Sarah Faber has earned our respect and our admiration. As she prepares for her competition at the 15th World Games for the Deaf, she also has the best wishes of the State of New Jersey and the gratitude of the Nation she will represent so well.●

ACID RAIN

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. BOLAND. Mr. Speaker, this week is "Acid Rain Awareness Week" in the State of Massachusetts. The Governor's office, in conjunction with several environmental groups have organized activities throughout the State which highlight the effects acid rain has on our environment.

For the people of New England, developing a program to deal with the problem of acid rain is the highest environmental priority. Survey after survey has indicated that New England are concerned about the effects of acid rain on their lakes and streams; their farmland and forests, and that they want something done about it. About 20 percent of New England's acid rain problem is home grown, the remaining 80 percent, chiefly airborne emissions of sulfur dioxide and nitrogen oxide, is involuntarily imported. Given those statistics, New Englanders have every right to complain about the lack of progress on the Federal level in the creation of a control program.

The Reagan administration's proposal on acid rain begins and ends with research. It is premised on a belief that there is not enough information about the causes of acid rain to warrent a program to control its sources. The studies that I have read conclude that acid rain is taking its toll on our environment. Acid rain is leaching vital nutrients out of forest soils while releasing toxic metals from the ground. Buildings and monuments are being eroded, and public health may be endangered. I agree that studies should continue, and that our actions should be based on studies, but I also believe that we know enough now to begin an abatement program.

Members of the New England delegation have wrestled with the problem of devising a legislative response to acid rain for many years. We recognize that to deal with acid rain, you must reduce the emission of nitrogen oxide and sulfur dioxide which are its source. Emissions reduction efforts are costly and we can not reasonably expect those costs to be wholly borne by the regions in which the biggest polluters are located. The bill that we have introduced this year, H.R. 1030, requires a reduction of 12 million tons of sulfur dioxide emissions and 4 million tons of nitrogen oxide emissions, making it the most stringent acid rain clean up bill to be put before Congress. More than half those reductions would be produced by requiring the 50 highest emitting power plants to install scrubbers. However, the bill provides for a cost-sharing program designed to help defray the substantial cost of emission reduction through a modest fee on generated electricity. This approach has as its chief advantage the fact that it encourages a national program of acid rain control; all regions would in some way benefit and the costs would be manageable for each.

The risks associated with further delay in developing an acid rain control program are simply unacceptable. I would like to commend Governor Dukakis, and the sponsors of the Massachusetts "Acid Rain Awareness Week" for continuing to call attention to this major environmental problem. Let me take this opportunity to reassure the citizens of Massachusetts that their delegation in the House will remain committed to working with those from other regions of the country to narrow the differences which have so far hindered the development of an emissions reduction program, and to work for the passage of the New England acid rain bill.●

MINIMUM STANDARDS FOR PARENTAL AND DISABILITY LEAVE

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DELLUMS. Mr. Speaker, current Federal law requires that pregnancy-related disability be treated no differently than any other short-term disability. There is, however, no Federal statute requiring employers to provide leave for workers who are temporarily disabled. My distinguished colleague from Colorado, Representative SCHROEDER, has introduced a bill, H.R. 2020, which would guarantee job security to workers who must leave their employement due to temporary disability or who choose to leave for a period of time after the birth or adoption of a child. I wholeheartedly support this proposal.

The absence of a Federal law requirring employers to provide leave to these employees is reflective of an outdated view of the work force. The numbers of women in the work force has grown considerably and continues to grow. A great number of these woman will become pregnant during the time they are in the work force. Most of them will return to their jobs soon after their children are born. Many of these working women are the primary or sole wage earners in their homes. The lack of job security these women feel has forced many to choose between their jobs and their families. Requiring employers to grant leave to workers with new born or newly adopted children, in the same manner, that they would be required to provide temporary disability leave, would eliminate the need to make this choice.

While some employers do allow a woman some sort of maternity leave, fewer have such a provision for fathers of new born or newly adopted children. The proposed measure is sex-neutral, based on two assumptions: that, first men have the same rights and responsbilities as parents and therefore should have the same opportunity to spend time with their children, while at the same time, second pregnancy should be treated no differently than any other temporary disability. By allowing only women parental leave, we deny men an important opportunity as parents. A situation is also created in which women may be discriminated against. Until 1978, pregnancy was treated as a "unique" condition, not subject to usual disability leave policies. Pregnant workers were not protected by same standards as another worker on leave. We are striving for equality with this bill.

I urge my colleagues to support this measure. By guaranteeing job security to those who must leave a job temporarily or who choose to leave for a period of time to care for a child, we will allow people, both women and men, to be both effective parents and effective workers and we will eliminate the built-in discrimination that comes from labeling pregnancy a "unique" condition.●

PARTNERS OR PATSIES?

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GAYDOS. Mr. Speaker, I sometimes wonder at the logic used by our Government in its dealings in international trade.

For example, a few months ago the administration brushed aside the use of mandated quotas on imported steel from Japan, and other nations, opting instead for voluntary restraints imposed by the foreign producers.

And, last month the administration backed off the question of controlling the shipment of Japanese cars to the United States for sale. Its decision on this issue, so critical to domestic auto makers, was to let Japan decide how many cars to ship us.

The upshot of these negotiations has been Japan will reduce her steel shipments from 6.9 percent to 5.8 percent but will increase her auto shipment from 1.8 million units to 2.3 million units. I suspect some of the reduced steel shipments will find their way here in the form of Hondas, Datsuns, Toyotas or what have you.

And, Japan, who enjoys a $40 billion trade surplus with us and who stands to reap another $5 billion in additional car sales here, still is dragging its heels on opening up its markets to U.S. goods.

Apparently, Mr. Speaker, we still have not learned the difference between being a partner in a trade deal and the patsy of one.●

TRIBUTE TO PAUL J. FRANZ, JR.

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RITTER. Mr. Speaker, it is a great honor for me to call attention to a constituent and friend, Paul J. Franz, Jr., on the occasion of his being presented with the "L-in-Life Award" by the Lehigh Club of New York.

Paul was named vice president for development at Lehigh University in 1962. Prior to that, he had been assistant to the president, in charge of development, since 1949. He joined the administrative staff as assistant to the director of admission following graduation from the university in 1944 with a B.S. degree in business administration. He was appointed assistant to the treasurer in 1948, and earned his M.A. from Lehigh in 1955.

As vice president, Paul directs public and community relations, publications, and fundraising and long-range development for the university. Annual fund campaigns under his administration have been nationally cited for excellence by the United States Steel Foundation and the American Alumni Council. In 1970, he was cited by Murts & Lundy, Inc., for distinguished service to Lehigh, community service and other philanthropic endeavors, and writing and teaching in development.

He directed the Centennial Campaign which topped its $22 million goal for Lehigh's educational program several years ago, and he is currently directing the $75 million New Century Fund, which to date has raised $105 million. Under his leadership, Lehigh, over the past 35 years, has received approximately $200 million including approximately $100 million in the past decade.

In 1957, Paul received the Alfred Noble Robinson Award. This award is given annually to a member of the Lehigh staff "not over 35 years of age voted as giving outstanding performance in the service of the university."

And in 1976, he was chosen for the Hillman Award, one of the highest honors the university can bestow on a Lehigh faculty or staff member. The award is given to the person "who has done the most toward advancing the interests of the university."

Lehigh conferred the honorary doctor of laws degree on him at its Founder's Day ceremony in 1980.

Paul has served as national director of development programs for the American Alumni Council [AAC]. He also served on the board of directors of the AAC and as chairman of its educational fundraising committee. He has written articles that have appeared in the American Alumni Council News, Yearbook, and Alma Mater, and he was a contributor to "How-to of Educational Fund Raising" and the "Handbook of College and University Administration."

He has served on conference faculties for both the AAC and American College Public Relations Association, which have now merged into a single organization, the Council for Advancement and Support of Education [CASE].

A member of Delta Tau Delta national social fraternity, Franz is a member of several honorary societies, including Phi Beta Kappa, Pi Delta Epsilon, Phi Alpha Theta, and Deta Gamma Sigma.

Paul and his wife, Jean, reside on Church Street in Bethlehem. They have two children, Holly and Peter, and four grandchildren.

In 1972 he served as general chairman of the United Way for the Greater Bethlehem area. Currently, he is a member of the board of trustees of St. Luke's Hospital and is on the board of directors at Blue Cross of the Lehigh Valley. He also is a board member of the Lehigh Valley Conservancy and a past director of the Cornell University Laboratory of Ornithology.●

INTRODUCTION OF TITLE XX AMENDMENT

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FISH. Mr. Speaker, we have been hearing and reading about the horrors of child abuse. We agree that it is a national concern. Much of it occurs in the day care setting which is supposed to provide a comforting and enjoyable environment for children while their parents are working and unable to attend to their needs. Day care facilities have now become an integral part of the environmental and educational world of millions of young American children. With the vast number of children being provided day care, it is important that their safety and well-being be assured. This should be the responsibility of the several States but today this responsibility is unevenly carried out. States vary widely in their child care requirements, the kinds of child care they regulate, and in the procedures and structures of their enforcement systems.

Today I am introducing legislation to amend title XX of the Social Security Act. As a condition of financial assistance under title XX, States, through a designated authority, must adopt and provide for monitoring and enforcement of standards for child care. The purpose of this bill is to ensure that Federal funds subsidize only those child care facilities which are governed by standards, monitored for compliance with standards, and for which sanctions are available and imposed for violations of standards.

This bill would not require States to satisfy Federal standards, but would give States the flexibility to design their own standards to meet their needs. However, the Federal Government would be assured that standards have been adopted in particular areas—as outlined in the legislation—and that their compliance would be monitored and enforced. A State must adopt and enforce standards as a condition of its eligibility for any payments under this title to assist in the provision of child care services in the fiscal year in which such services are provided.

Mr. Speaker, this legislation is an attempt to effectively address the prevention of child abuse in a day care facility.●

TAKING THE DRAMA OUT OF HUMAN RIGHTS

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FEIGHAN. Mr. Speaker, last month two prominent American playwrights, Arthur Miller and Harold Pinter, spent 5 days in Turkey talking with writers, former prisoners, and politicians about the state of human rights in that country. Their conclusion, made public at a press conference that was banned in the Turkish press, was that "gross violations of the human spirit through physical torture is a present fact in Turkey."

These authors, both vice presidents of the PEN Club which promotes human rights for other artists, cited evidence of torture in Turkey that has been documented by other human rights groups such as Amnesty International. Their comments were censored in the press because they came so close to the recent visit of Prime Minister Ozal to Washington. Their concerns, however, were echoed by many Members of Congress when Mr. Ozal met with us last week.

I encourage my colleagues to read the press reports of Messrs. Pinter and Miller's trip to Turkey, and ask that the story which appeared in the Washington Post of March 24 be included in the RECORD at this point.

[From the Washington Post, Mar. 24, 1985]

TURKEY CENSORS BLAST ON RIGHTS BY 2 AUTHORS—MILLER, PINTER SAY TORTURE A FACT IN TURKEY

(By Mustafa Gursel)

ISTANBUL, March 23—Playwrights Arthur Miller and Harold Pinter were censored from the pages of the Turkish press today after having given a press conference here in which they were strongly critical of the human rights record of this NATO ally.

The two vice presidents of the International PEN Club, a worldwide organization that promotes the human rights of artists and writers, came to Turkey last Sunday on a fact-finding mission. During their five-day stay, they spoke with more than 100 Turkish intellectuals, with former prison inmates, politicians and diplomats. As the playwrights put it, "the International PEN is concerned with the dignity of its members throughout the world."

At a press conference wrapping up their visit here Friday, Miller said, "It is almost impossible to discuss certain questions in the press here," as if to foreshadow the ban on their press conference that was handed down by the local martial law government several hours later. The two authors left Turkey before learning of the censorship.

Pinter, a Briton, said that they both were convinced that there is systematic torture in Turkey. He said, "From the information we have received since we have been in Turkey, which we regard as authentic, we believe that gross violations of the human spirit through physical torture is a present fact in Turkey. Our conclusion is that torture, despite the protestations and denials, is in fact widespread and systematic in military prisons and police stations in Turkey." He concluded by stating that he and Miller "naturally find this a deplorable state of affairs."

Miller said, "Only the pure at heart need no lawyers," quoting the judge in his play "The Crucible." He drew a parallel between 17th century witch hunts in Salem, Mass., and present-day Turkey.

Miller explained, "At a certain time in history the court permitted what was called 'spectral evidence,' which meant that it was not necessary . . . to prove that an accused person had committed an action. It was only necessary to prove that he had thought of it." Miller said that in Turkey "today people are brought into prisons on the basis of what they are alleged to be thinking."

Pinter, sitting on a platform where years ago his play "The Dumbwaiter" had been staged, praised the Turkish people for their dignity.

He said, "I would like to observe that both Mr. Miller and myself were deeply moved and impressed by the intelligence, the grace and the dignity of so many of the people we have met in Turkey, those who have suffered so much and continue to do so."

Although general elections were held in 1983 in Turkey and there is a democratically elected civilian government, many of the cases that were instigated by the military when it came to power on Sept. 12, 1980, continue to be prosecuted, and people remain in jail because of their beliefs and ideas.

TURKEY CENSORS AUTHORS' CHARGES ON TORTURE

After the military president, Gen. Kenan Evren, came to power following a period of political violence and general instability, tight restrictions were instituted over the press, universities and trade unions. Intellectuals, who periodically have been politically influenced through Turkey's turbulent history, were tried for criticizing human rights abuses and calling for an amnesty for political prisoners. Such criticism is a crime under the current constitution of Turkey.

The martial law command was able to ban the comments made at the press conference from appearing in the Turkish press because there is still martial law in a number of Turkish cities, including Istanbul.

The liberal government of Prime Minister Turgut Ozal has been very careful in its relationship with the military, and he has been taking his time in lifting martial law entirely.

However, the government was embarrassed by the remarks of Miller and Pinter, especially since they were made a few days before the visit of Ozal to Washington to meet with President Reagan. The issue of human rights in Turkey has been on the agenda of the European Parliament and in European capitals since the 1980 coup.

The authors said they will prepare a report based on their talks here during the next few days and will submit it to the International PEN Club and Amnesty Inter-

national. Pinter said the organization intends to present the report to the British Foreign Office and to the State Department.

U.S. Ambassador Robert Strausz-Hupe also was upset by the authors' comments. At an official reception in Ankara, Strausz-Hupe raised his voice at one point and told Pinter, "Sir, don't forget that you are a guest in my house." The argument started when Miller said, "There is either democracy or none of it."●

A TRIBUTE TO FATHER EDWARD M. FLANNERY

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LIPINSKI. Mr. Speaker, it is with great pride that I rise today to call attention to Father Edward M. Flannery who will be celebrating the 50th anniversary of his priesthood on April 27, 1985.

Father Flannery has had a long and distinguished career. He was ordained on April 27, 1935, at St. Mary of the Lake Seminary in Mundelin, IL. His first Mass was celebrated at St. Clement's Church which he attended as a child. In August 1942, Father Flannery entered the military service as a chaplain in the U.S. Army. While stationed in the Philippines during World War II, he was wounded and awarded the Purple Heart. Father Flannery retired from the Army with the rank of major.

In 1949, Father Flannery was asked to serve as national chaplain for the Military Order of the Purple Heart, a position he still holds. He is also past national chaplain of the Disabled American Veterans.

One of Father Flannery's greatest challenges came in 1959, when he was chosen to start a new parish on the southwest side of Chicago. He named the parish St. Rene, after a North American martyr. Under his leadership and guidance, St. Rene became a very active parish in the community. Father Flannery retired from St. Rene in 1979. He now lives in Hinsdale, IL, and is very active and popular as a visiting priest in the neighboring parishes.

I join with the residents of the Fifth Congressional District in paying tribute to Father Flannery on the occasion of his 50th anniversary and thank him for his outstanding community work in our behalf.●

A TRIBUTE TO DANNY THOMAS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RAHALL. Mr. Speaker, yesterday, I had the pleasure to attend a ceremony at the White House which made me especially proud to be an American. I was present when President Reagan presented on behalf of the U.S. Congress a gold medal to Danny Thomas for his humanitarian efforts and outstanding work as an American.

The medal was authorized by this Congress in legislation I introduced which was passed by the House and Senate and signed by the President in November 1983. I am especially proud to be associated with this institution which has seen fit to join with so many other distinguished institutions in recognizing Danny for the work he has done with St. Jude Childrens Research Hospital in Memphis, TN.

When Danny Thomas was a struggling young comedian, he prayed to St. Jude, the patron saint of the hopeless, vowing to erect a shrine in the saint's honor should he become a success in show business. When Danny became a household name through such shows as "Make Room For Daddy," he never forgot his vow to St. Jude. He began a one-man campaign to raise funds for a hospital which he decided would be the only fitting shrine to his patron saint.

St. Jude's Hospital opened its doors in 1962, providing care for children stricken with diseases such as cancer and leukemia. This institution has achieved a remarkable 53 percent cure rate for those children afflicted with leukemia. St. Jude's is completely nonsectarian, interracial, and completely free of charge. Even the cost of travel and motel accommodations for out of town patients and their families is covered by the hospital.

And the care and love given at St. Jude's is second to none. This reflects the character and dedication of its benefactor, Danny Thomas.

I would like to insert into the RECORD an article which appeared in this morning's Washington Post by Donnie Radcliffe which elaborates on how his friends feel about the man honored by this country yesterday.

[From the Washington Post, Apr. 17, 1985]

THOMAS GETS THE GOLD

(By Donnie Radcliffe)

Marlo Thomas said St. Jude had been in their lives so long that she and the other Thomas kids thought he was their uncle.

"Somebody said to me today, 'Do you pray to St. Jude, too?' I said no, I just tell Daddy and he does it. He has a direct line," the television star told an audience saluting comedian Danny Thomas last night.

The tribute climaxed a day in which President Reagan bestowed a Congressional Gold Medal on the 71-year-old entertainer for his "humanitarian efforts" in founding St. Jude Children's Research Hospital in Memphis, Tenn., 23 years ago.

"I was going to hug him," said Danny Thomas, "then I decided just to touch his face."

St. Jude, named for the patron saint of the hopeless, is one of 20 cancer centers receiving federal funds for research. Thomas said he didn't have to put in a plug for the hospital when he was with Reagan and Vice President Bush yesterday.

"They know what we're doing. They never cut us back. We get what we want," Thomas said of the $9 million that St. Jude receives in competitive grants. This year the research center's budget is expected to be more than $50 million.

Dr. Joseph Simone, St. Jude's director, told the dinner crowd of 300 at Knights of Columbus Hall in Arlington that when the hospital opened in 1962 no more than 1 percent of the children suffering from leukemia ever survived. Today, 50 percent of them live.

"The most exciting research area is that we're closing in on what the genetic reason is that cancer becomes cancer," Simone said before dinner.

Washington attorney Richard Shadyac came up with the idea of a congressional medal for Thomas. George Washington received the first such medal. Rep. Nick J. Rahall II (D-W.Va.) introduced legislation two years ago that made Thomas the 116th recipient.

The wheels of government grinding as they do, the White House notified Shadyac and others about 10 days ago that the presentation ceremony would be on the president's April 16 schedule. The combined efforts of something called ALSAC took over. By last night the ALSACers who stand for Aiding Leukemia Stricken American Children joined forces with the ALSACers who stand for American Lebanese Syrian Associated Charities.

In practice, if not in fact, they are one and the same. And they beamed paternally when their hero of the day stood before them to take their accolades.

"I knew when the president put [the medal] around my neck that he was putting it around the necks of every one," Thomas said.●

ST. ANNE'S CATHOLIC COMMUNITY CHURCH IN WARREN, MI

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. HERTEL of Michgan. Mr. Speaker, this month marks the 40th anniversary of St. Anne's Catholic Community Church in Warren, MI, and therefore, I would like to take a few minutes to give special recognition to this distinctive parish. St. Anne's is a parish defined by its dedicated clergy, teachers, and administrators as well as caring and hard-working parishioners. Over the years, this distinguished congregation has worked endlessly to develop and institute many religious based activities, such as a Sunday preschool and religious education courses for public school students. In addition, it sponsors some 42 community activities, including senior citizen and adult education programs.

Four decades of building and expansion make St. Anne's what it is today—one of the largest and most prestigious parishes in Macomb County.

At its first Mass, celebrated on Easter Sunday, 1945, St. Anne's and its 20 members were a parish just beginning to develop. Mass was celebrated in the Warren Public High School gym.

The following year, St. Anne's purchased its first actual church building, the Warren Village Barn. The parish celebrated its first Mass in its new surroundings on Easter Sunday, 1946.

In 1953, construction began on a new church. This building served as temporary church, auditorium, and gymnasium until 1964 when St. Anne's Church as we know it today was built.

In the early days, St. Anne's parish comprised an area of 20 square miles stretching from 12 to 16 Mile Roads and from Dequindre to Schoenherr. Parishioners traveled many miles over this sparsely populated area to worship at St. Anne's. Due to the rapid and enormous growth of the cities of Warren and Sterling Heights, several new Catholic parishes have recently been founded in this same area. St. Anne's, however, still remains a large and active community.

In the 40-year history, three pastors have guided St. Anne's parish. The founding pastor, Rev. Frank Walsh, served from 1945-70. From its very beginning he was responsible for St. Anne's incredible progress in the community. Rev. Fabian Slominski accepted pastoral responsibilities in 1970 and energetically led this parish until 1983. Rev. Stanley Wyczawski became pastor in 1983 and continues to inspire and assist members in St. Anne's community today.

To the 1,000 schoolchildren, the 3,000 families, and the many friends of St. Anne's, I want to extend my very special praise and congratulations from the U.S. Congress on this happy occasion.●

TESTIMONY OF EDUCATION DEPARTMENT AIDE CRITICIZED

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SKELTON. Mr. Speaker, yesterday, Eileen Marie Gardner, an Education Department Special Assistant of this administration, testified before a congressional committee that Federal aid for the handicapped has been misguided and falsely based and that we should consider how much the handicapped can profit from education. Once again the true nature of this administration's opaque policies has come to the surface. We have seen them turn their backs on farmers, small businessmen, the elderly poor, students, veterans, and now handicapped children. Their display of coldheartedness is elitist and, frankly, shameful.

America is the land of opportunity and this demonstration of opportunity and the right to an education for a selected group of our society cannot and will not be tolerated by this Congress as we represent all Americans in this great body of Government.●

MARLOW BOYER

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. LOWRY of Washington. Mr. Speaker, I was saddened to read in today's Post about the death of Marlow Boyer on April 13. He was only 25, and he had been fighting against cancer. Although Marlow was very young, his work and life touched many people including myself.

A few years ago, Marlow Boyer was the official photographer for a group of people from Seattle who went to the Soviet Union. They visited Leningrad, Moscow, and Tashkent, which is Seattle's sister city. On the streets of Tashkent they handed out copies of a letter of greeting, a call for peace, from the people of Seattle. Marlow took his photograhic record of the trip and turned it into an audiovisual show called People to People, City to City. It is a moving appeal to people everywhere to understand each other and to learn to live together. A couple of years ago, along with our former colleague Joel Pritchard, I arranged to have it shown in the Capitol. I found it to be very sincere and touching. It has been shown on many other occasions, and I know that it has affected many other people in the same way.

I extend my deepest sympathies to Marlow's family and friends at this time. I want them to know that he succeeded in communicating an important and beautiful message to a lot of people, many of whom never knew him personally. That is something for his family and friends to be proud of.●

COMBINED JEWISH PHILANTHROPIES CELEBRATES 90TH YEAR OF PHILANTHROPY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FRANK. Mr. Speaker, on April 25, 1985, the Combined Jewish Philanthropies [CJP] of Greater Boston will proudly commemorate its 90th anniversary of service to the public. CJP is a pioneer in charitable social service in the Nation and is often looked to as a model of the useful and productive role that charitable agencies in this country can play.

Founded in 1895, CJP has had a long and active role in the building of support services in Boston, nationally, and overseas. The 30,000 Boston area people who participate in CJP activities contribute to a wide range of high quality programs and services that help people of all ages and backgrounds.

CJP assists in the funding of Jewish Family and Children's Services, the Jewish Community Housing for the Elderly, and the Bureau of Jewish Education, to name but a few of their worthwhile projects. These and other extensive philanthropic initiatives, as well as the many complementary programs that CJP has initiated in an effort to further social, cultural, and religious interest within the community, have demonstrated an invaluable and continuing commitment to improving the quality of life.

I wish to call to the attention of the Members the remarkable work of the Combined Jewish Philanthropies for the past 90 years and wish them continue success in the future.●

THE 21ST ANNIVERSARY OF SCORE [SERVICE CORPS OF RETIRED EXECUTIVES]

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FEIGHAN. Mr. Speaker, 1985 marks the 21st anniversary of the Service Corps of Retired Executives [SCORE], a volunteer organization of retired businessmen and women who freely give of their time and experience to counsel beginning and enterprising businesses. This year, more than 12,000 SCORE volunteers belong to over 400 chapters in every State, plus the District of Columbia, Puerto Rico, Guam, and the Virgin Islands. Their efforts have contributed to more than 1,200,000 small businesses since SCORE's inception in 1964.

SCORE first began free management counseling in Boston during the early 1960's. The idea soon spread to other areas, and the Small Business Administration took steps to utilize SCORE as a small business management assistance resource.

In 1969, the Active Corps of Executives [ACE] was established by SBA to supplement SCORE counseling by utilizing the talents of volunteers not yet retired from their business careers. In 1982, ACE was merged with SCORE into a single organization, with ACE members accounting for about one-fourth of SCORE's membership.

Mr. Speaker, SCORE members are dedicated to their program of offering free counseling to small businesses throughout America. SCORE members often donate 20 or more hours

per week to guiding a business through the intracacies of basic accounting principles, or teaching basic management rules, and effective personnel policies. SCORE's greatest effect on clients is one-on-one counseling, which is ordinarily the most costly form of management assistance. It is not unusual for a SCORE volunteer to spend 40 hours a week on a specific case, guiding the small business around such pitfalls as inventory obsolescence, top-heavy personnel costs, failure to take into account tax consequences, and the selection of an unprofitable location for a business.

SCORE counselers also conduct prebusiness workshops and seminars, helping small businesses to understand the problems of ownership and management. These workshops provide a wealth of experience in sales, advertising, financial control and purchasing, teaching a beginning or struggling businessperson the basics of effective management.

The Small Business Administration, which sponsors the SCORE program, affirms the country's debt to these men and women who selflessly contribute their time, their wisdom, and their experience to this very important organization.

It is most appropriate, Mr. Speaker, that we commend the many volunteers who make the SCORE program work so well as they mark the 21st anniversary of SCORE's dedication to the Nation's small businesses.●

A TRIBUTE TO JACK HOLCOMB

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. YATRON. Mr. Speaker, I rise today to ask my colleagues to join me in paying tribute to Mr. Jack Holcomb, a very special citizen of Reading, PA. On May 1, 1985, the many friends and admirers of Jack Holcomb will gather together to help celebrate the 52d year of his birth and the 29th year of the presence of his appealing voice on radio station WEEU. From his start in October 1956, as disc jockey and sportscaster, through the days of the "Birdwatching Society," "Bird Talk," and "Rangers on Record," to his current very popular and lively "Feedback" program, Jack has been one of Berks County's most popular radio personalities.

Jack Kirkland Holcomb was born on May 1, 1943. After graduating from Canton Central High School in New York in June 1951, he attended Ithaca College. While studying speech and drama, Jack worked as a photographer's assistant and for Sykes Dairy. After graduating from college in June 1956, he accepted a job with WEEU in Reading, PA. His first assignment for the station was disc jockeying and sportscasting. An avid and life-long birdwatcher, Jack began a syndicated program called the Birdwatching Society in August 1965. A mechanical bird named "Hokie" joined Jack on the air in "Bird Talk" and helped make the show another success. After celebrating the music of Shortie Long during evenings of "Rangers on Record," Jack began the talk show "Feedback." Now, from 10 a.m. to 2 p.m. each weekday, Jack hosts lively discussions with his many listeners on every topic and timely public issue. Jack has brought his love of nature, his deep respect for creatures great and small, his love of life and infinite curiosity about all its aspects, and his concern for good health, fitness, and human kindness to the airwaves of Berks and surrounding counties and into the hearts and minds of his many appreciative listeners.

I am proud of my friendship with Jack and I know that when all of his friends gather to surprise him for his birthday on May 1, 1985, they will have done so out of their fondness and respect for a man whose voice and noble spirit have spoken to them in countless ways for nearly three decades. I commend Jack and wish him a wonderful birthday and many happy returns.●

PRESIDENT REAGAN'S TRIP TO GERMANY

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. WOLPE. Mr. Speaker, I can hardly convey the full measure of my shock and incredulity at the lack of sensitivity reflected in President Reagan's planning for his upcoming trip to Germany.

I was personally troubled by his decision not to include a trip to a concentration camp on his itinerary. This seems the very least that should be done to honor the memory of the millions who lost their lives in the horror of the Holocaust. That Mr. Reagan sought to justify this decision on the grounds that, "Very few alive (in Germany) remember even the war * * *" was not only inaccurate, but was utterly offensive.

Then, compounding the insult, the President announced his decision to participate in a wreath-laying ceremony at a German military cemetery which contains the graves of members of the very Nazi SS troops that were directly responsible for thousands of American deaths and participated directly in the slaughter of millions of Jews.

I know that voices have been raised throughout this country and in Israel protesting President Reagan's plan to visit the Bitburg cemetery. I hope the President will listen to these voices and will reverse the decision he has made. That is the least that he can do.●

WHO RUNS THE CONTRAS?

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. KOSTMAYER. Mr. Speaker, one of the key questions concerning our policy toward Nicaragua is: Who runs the Contras? President Reagan has described the Contras as freedom fighters and as our brothers. I assume that before the President said this he looked very carefully at who these people are. Yesterday at a hearing of the Subcommittee on Western Hemisphere Affairs, the administration's top Latin America expert was asked to share this information with the Congress and the American people. To our amazement and despite the fact that he had been told that subcommittee would request this information, the Assistant Secretary of State for Inter-American Affairs was either unwilling or unable to provide this information. The questions asked were simple: How many officers of the Samoza National Guard or security forces now serve with the largest Contra group, the FDN? How many members of the FDN general staff were officers of the Somoza government? How many of the commanders of the FDN's regional task forces were officers of Somoza?

It is not unreasonable for the Congress to know the answers to these questions. This is particularly the case as information from a variety of sources indicates that virtually the entire FDN military leadership consists of former members of the Somoza security forces. The subcommittee is trying to determine the accuracy of information provided by the Government of Nicaragua and from recent press reports. If the information we have is in error, we ought to be told. If the information is correct, we have the right to know who the Contras are.

For the benefit of my colleagues, I am submitting information and articles assembled by the subcommittee on the Contra leadership. If the administration has different information, we invite it to come forward with it.

GENERAL STAFF OF THE NICARAGUAN DEMOCRATIC FORCE (FDN)

LARGEST CONTRA FORCE

Captain Hugo Villagra Gutierrez; Lieutenant Antonio Edgard Flores; Major Emilio Echaverria Mejia, Captain Juan Alcibiades Espinal Cuadra; Captain Mario Ramon Morales; Lieutenant Armando Lopez Ibarguen;

Lieutenant Jose Fransisco Ruiz Castellanos; and Lieutenant Walter Calderon Lopez.

Capt. Hugo Villagra Gutierrez: He is the Commander of the Basic Infantry Training School (EEBI) of the FDN in Honduras. His nom de guerre is Visaje Gongora. He entered Somoza's National Guard in 1964 with the rank of 2nd Lieutenant. He received military intelligence training and other courses in four stages in the U.S. He also took courses in counter-insurgency in Fort Gulick, Panama Canal Zone. He was promoted to captain in 1979 and received the merit medal award from the EEBI.

Lt. Edgard Flores: He is the Chief of Intelligence of the FDN. His nom de guerre is Abel. He entered the National Guard in 1964 as a 2nd Lieutenant. He took the counter-insurgency course at Fort Gulick. He was the Commander of the Northern Zone for the National Guard during the last days of the Somoza dictatorship. He obtained asylum in the Colombian Embassy on July 18, 1979.

Maj. Emilio Echaverria Mejia: He has been the Chief of Operations of the FDN since 1982. Before that he was FDN Chief of Staff. His nom de guerre is Fierro. He entered the National Guard in 1961. He took counter-insurgency courses in the Canal and a special commando course in Argentina. In 1975 he was leader of patrol squads in Granada, Guasaule, Leon, Chinandega, Esteli and Matagalpa. He was promoted to Major in 1977 and in 1979 he became a special assistant to Anastasio Somoza.

Capt. Juan Alcibiades Espinal Cuadra: He is Chief of Logistics of the FDN. His nom de guerre is Rudo. He entered the National Guard in 1960. He took basic courses of infantry, counter-insurgency, military police, and advanced courses in commando training and infantry during a period of 10 years at Fort Gulick. He was promoted to 1st Lieutenant in 1972 and to Captain in 1976. He was the Commander of Camoapa and in 1981 he joined the contras in the Gulf of Fonseca.

Capt. Mario Ramon Morales: He is the Chief of Personnel of the FDN. He entered the National Guard in 1952 and became a Captain in 1978. He took a course in military investigation units in 1965. He also received special training in the U.S. in parachuting, artillery and infantry. His other courses included special training in counter-insurgency. He was wounded during fighting in Penas Blancas on the southern front and turned over to the Costa Rican authorities after the Triumph of the Revolution.

Lt. Armando Lopez Ibarguen: He has commanded several attacks inside Nicaragua, including different targets in Leon and Chinandega. He also has charge of harassing with mortars and small arms fire frontier posts in Cinco Pinos from inside Honduras. He is one of those responsible for the attack on San Francisco del Norte in July 1982 where 14 peasants were killed. In January 1983 he was transported by helicopter to the Zone of Bocay in Jinotega Norte. His noms de guerre are: El Viejo, Policia, and 26. He entered the National Guard in 1957. He became a Lieutenant and took courses in aviation mechanics and logistics management at Fort Gulick. In 1967 he was assigned to the combat battalion "General Somoza" in the North. He was directly responsible for the assassination of peasants in Suskawas and El Cerro Ulimes in 1976.

Lt. Jose Francisco Ruiz Castellanos: Since the latter part of 1982 he has been the Chief of Task Force operations of the FDN. He entered Nicaragua on January 25, 1983 in the vicinity of Jinotega and was responsible for the attack on San Jose de las Mulas where 17 boys of the Sandista Youth Movement were killed. He graduated from the Nicaraguan Military Academy in 1975 as a 2nd Lieutenant and was assigned to the EEBI. He took a basic infantry course in Panama. He was promoted to 1st Lieutenant in 1979 and was the second in command of an operations base and commander of a company in a zone bordering Nueva Segovia.

Lt. Walter Calderon Lopez: He has been a member of the General Staff since 1982. He commands a task force of 250 contras. He entered Nicaragua on January 25, 1983 in the Rio Coco Zone, Jinotega, with the mission of facilitating the entrance of 300 other contras into Zelaya Norte by constructing a landing field in La Ceiba and by diversionary attacks throughout the Zone. He graduated from the Military Academy in 1975 and became a member of the National Guard in July of that year as a 2nd Lieutenant. He took three courses in Panana: Officer Training, Combat Patrol and Officer Discipline. From 1976 to 1977 he was in charge of patrols in the mountains. He undertook special missions in the south in 1978 and in 1979 was promoted to 1st Lieutenant and assigned to the "General Somoza" Combat Battalion. His nom de guerre is Todo.

The other members of the General Staff are: Justiano Rafael Perez Salas, former EEBI staff member. Steadman Fagoth, former Somoza State Security Agent. Ricardo Lau, former National Guard member. Francisco Rivera, former National Guard member.

[From the New York Times, Mar. 24, 1985]

OFFICERS OF THE OLD NATIONAL GUARD REMAIN A FACTOR IN THE REBEL FORCES: SOME CONTRA LEADERS ARE THEIR OWN WORST ENEMIES

(By James LeMoyne)

TEGUCIGALPA, HONDURAS.—Less than a year after the Sandinistas seized power in Nicaragua in 1979, 60 exiled officers of the defeated National Guard met in Guatemala. With little hope of success, some of them recall, they vowed to drive out the Sandinistas.

Today, more than 12,000 guerrillas are involved in the battle. Most of them march under the banner of the Nicaraguan Democratic Force, which has received most of the $80 million reportedly provided to insurgents by the Central Intelligence Agency. While their foot soldiers are mainly peasants angered by Sandinista policies, almost all the top commanders are former National Guard officers. Their influence and unclear political aims have become issues in the Congressional debate on continuing aid. Last week, vigorously supporting the guerrillas' struggle, President Reagan asserted that Congress must decide whether the United States would keep "trying to help people who had a Communist tyranny imposed on them by force, deception and fraud."

Originally trained by American Marines, the National Guard defended the ruling Somoza family for more than 40 years. By 1979 and the Sandinista-led revolution, many Nicaraguans identified the Guard with corruption and brutality. Now, as rebel leaders, some former guardsmen have proved capable. Others, however, have been accused of crimes including murder and stealing from the C.I.A. A rival guerrilla leader, Edén Pastora, refuses to join forces because, he says, the National Guardsmen could not win popular support at home.

Their supreme military commander, Col. Enrique Bermudez, was the Somoza Government's last military attaché in Washington where, a former associate says, he cemented ties with the C.I.A. At his base on the Honduran-Nicaraguan border, new recruits drill awkwardly in ill-fitting boots. Colonel Bermudez said in an interview that he was fighting the "Sandinocommunist system," to create a pluralistic democracy. But rebel fighters appear to receive little political instruction and say their only goal is to destroy the Sandinistas in a war that Colonel Bermudez depicts as part of the struggle between Moscow and Washington. Critics argue that the National Guard officers' experience in defending the Somozas casts doubt on their commitments now. These officers, Colonel Bermudez replies, make up only 1 percent of the rebel army and have been unfairly stigmatized. "I don't think you can judge all by the sins of the few," he said.

Their numbers may be small, but their influence appears to be great. Under Colonel Bermudez, the heads of logistics, intelligence, training, operations, special forces and most of the largest combat units are Guard veterans. Many company commanders are former National Guard enlisted men. And two influential rebel civilian officials, Enrique and Aristides Sanchez, were large landowners who backed the Somozas.

After a rebel command shakeup in 1983, several former Guard officers departed under a cloud. Honduran military officials say they suspect Col. Ricardo Lau, until recently the head of rebel counterintelligence, of involvement in the disappearance or killing of at least 18 Hondurans and 80 Salvadoran leftists since 1981. According to Edgar Chamorro Coronel, who was dismissed as a civilian director of the Nicaragua Democratic Force five months ago for publicly criticizing the rebels, other commanders threatened to kill Colonel Lau at a meeting in December 1983.

The C.I.A. station chief was called in to mediate, Mr. Chamorro said. Mr. Lau could not be reached for comment. The C.I.A. has declined to comment on reports of its operations in Central America. Mr. Bermudez said he had heard many charges against Mr. Lau, once a close aide, but had seen no evidence to support them. Last week, Col. Roberto Sativáñez, a former director of intelligence in El Salvador, said he had seen documents indicating that Colonel Lau had "received payment of $120,000 for arranging" the assassination in 1980 of El Salvador's Archbishop, Oscar Arnulfo Romero. Colonel Santivanez was dismissed as Salvadoran consul in New Orleans; some members of Congress and other Americans raised about $35,000 for his expenses.

The rebel chief of staff, Emilio Echaverry, retired last year. He was accused of stealing large amounts of C.I.A. money, according to Mr. Chamorro and Capt. Armando Lopez, head of logistics. C.I.A. agents seeking the missing money forced several rebels to take lie detector tests, Mr. Chamorro said. A former National Guard sergeant who became a top combat commander, using the nom de guerre "Suicide," was executed in 1983 along with two other Guard alumni. Mr. Bermudez said they had "mistreated civilians." Another rebel official said they had been accused of robbery, rape and murder.

Worried about the guardsmen's reputation, the C.I.A. appointed a new seven-member National Directorate in late 1982, primarily to meet journalists and Congressmen, according to Mr. Chamorro and an-

other senior rebel official. Colonel Bermudez and his aides continued to run the military, Mr. Chamorro added. "We used the Argentines, the C.I.A. and the Guard," he said. "How do you create a democratic army out of that?" Other rebel officials reply that National Guard officers have the same right to fight as any other Nicaraguan exile and that their military experience is needed. However, a Western official said that at first, the former officers relied unsuccessfully on conventional military tactics, which they had learned as cadets. Now, threatened with the loss of American assistance, the Guard officers face the challenge of waging guerrilla war, which requires broad popular support. On present evidence, it is not clear if they can make the transition.

[From the Washington Post, Dec. 17, 1984]

AID MAY DEPEND ON PAST TIES

(By Edward Cody)

In Spanish, the word *contra* is shorthand for "counterrevolutionary," and when the small band of escaping and self-exiled Nicaraguan soldiers and businessmen began their struggle to overthrow Nicaragua's ruling Sandinistas more than five years ago, that was what the Sandinistas called them.

Partisans of Nicaraguan dictator Anastasio Somoza, they had been opposed to the Sandinista National Liberation Front as soon as it launched a civil war in late 1978. After the leftist Sandinistas won in July 1979, ousted Somoza and established their new "revolutionary" government, it was only a matter of days before the "counterrevolutionaries" launched their first operations.

Enormous changes have taken place since that early band began attacking the Sandinistas and their Cuban advisers. Thousands of initially prorevolution Nicaraguans now are disenchanted with Sandinista rule and have become rebel recruits. With funds, guidance and sustained impetus from the Reagan administration, the anti-Sandinista rebels have become a guerrilla army to be reckoned with.

Yet as the shooting war has grown, it has been matched, battle for battle, by a propaganda war over whether these guerrillas are being led by the same old pro-Somoza contras—as the Sandinistas maintain—or are, as President Reagan has described them, a force of anti-Marxist "freedom fighters."

Both the rebel leaders and the vast majority of their foot soldiers are not pro-Somoza but are former "revolutionaries" themselves, the administration and rebel leaders have said. Continued rebel efforts to stop the Sandinistas from exporting their revolution and to pressure them to become more democratic, they have maintained, are vital not only to Nicaragua, but ultimately to American freedom itself.

It is on this distinction, along with a feeling among some congressmen that the United States should not be funding a "secret war" against a sovereign nation nor supporting a guerrilla army no matter what it is called, that the future of U.S. funding for the rebels partly depends.

During the past three years, since Reagan first authorized money and support for the guerrillas, the not-so-secret war against the Sandinistas has taken its toll on the organization charged with supervising it—the Central Intelligence Agency. A number of U.S. intelligence veterans of the anti-Sandinista operation say they believe that it has gone on too long, too publicly, too cheaply and with too little direction or results.

[From the Washington Post, December 1984]

SHADOW OF SOMOZA HAUNTS REBELS' IMAGE

But continuing difficulties in the war, for both the CIA and the rebels, according to U.S. intelligence and rebel sources, have been matched by problems in propaganda and what might be called for "organizational" war to define and lead the anti-Sandinista army.

With Congress reluctant to renew U.S. funding for the rebel cause, and with the administration trying to decide what to do if Congress refuses, the guerrillas in Nicaragua and their leaders in Honduras and the United States appear to have reached a crucial moment in their struggle.

Insurgent leaders insist that they can carry on the fight with funds from other sources, as they have since CIA financing dried up on congressional orders last June. But with the fortunes required to run a guerrilla war, particularly against improved Sandinista armaments, the outcome in Washington is likely to have a decisive effect on the thousands of Nicaraguans who have put their lives and livelihoods on the line against what they regard as the intolerable regime in Managua.

BIRTH OF AN ARMY

Although roving bands of former Somoza soldiers began their war against the Sandinistas soon after the dictator's ouster in 1979, the organization of the rebels into a real guerrilla army with real possibilities did not begin until the onset of U.S. funding in later 1981.

Since that time, although the structure of political leadership has shifted both here and in Honduras, the anti-Sandinista movement has retained a consistent military commander, Enrique Bermudez. With his ranks grown sharply in part because of $80 million in U.S. funds during the past three years, the determined former officer of Somoza's National Guard in charge and the youths who have made roadside ambushes their way of life appear to have little reason to abandon their commitment on considerations defined in Washington.

According to rebel leaders and witnesses, most of the rebel combatants are young peasants and small landowners bothered by zealots dispatched by Sandinista rulers in Managua to reform the conservative backlands of coffee plantations and tobacco farms. Many also come from families that included soldiers in the National Guard, which they say constitutes a stain in the eyes of Sandinista authorities and many other Nicaraguans who consider the guard a symbol of Somoza's oppression.

Rebel officials say the combatants are led by about 10 regional commanders, each in charge of several "task forces, including one named after Jeane J. Kirkpatrick, U.S. ambassador to the United Nations. Except for a leader known in the movement only as "Tigrillo," who fought on the side of the Sandinistas before their victory in 1979, the most prominent commanders gained military experience as soldiers or officers in the National Guard, rebel sources say.

For some, this was supplemented by training in Argentina in 1981, before CIA advisers took a direct hand in running the rebellion, according to Edgar Chamorro, an insurgent leader expelled from the organization last month in a dispute with his colleagues.

The composition of rebel forces has been an important public relations point from the beginning. While they acknowledge the rebels' peasant following in private, Sandinista officials speaking publicly in Managua depict the insurgency as an enterprise of National Guard and Somoza revanchists directed by CIA advisers carrying out orders from Reagan to topple the government.

To counter this, rebel leaders insist that only 2 percent of guerrilla ranks are filled by former National Guard troops and stress that they could not remain in the country without support from the people. In addition, they seek to conceal the key role played by former National Guard officers in the top military command operating in Honduras with cooperation from the Honduran military.

REBEL REORGANIZATION

It was partly this concern that prompted CIA advisers in late 1982 to organize a new overall leadership for the main insurgent group, the Nicaraguan Democratic Force, FDN by its Spanish initials, according to Chamorro and several other rebel activists who say they were interviewed as likely prospects by CIA agents here and in Washington. Chamorro, who trained to become a Jesuit priest, joined them as part of what he describes as a "repackaging" of the rebel movement for the U.S. Congress and public, eliminating leaders tied to Somoza from public view.

Until the reorganization announced in December 1982, the FDN leadership comprised Jose Francisco "Chicano" Cardenal, a Managua contractor, who had served in the Sandinista Council of State until he abandoned the revolution and settled in Miami;

Marromno Mendoiaza, a former union organizer also disenchanted with the revolution. Aristides Sanchez, a landowner connected to Somoza socially before 1979 and to Somoza followers who fled to Miami afterward, and seven former National Guard officers: Bermudes, Emilio Echavery, Edgard Hermandez, Ricardo Lau, Manuel Casceres, Francisco "El Gato" Rivera and Juan Gomez.

Bermudez, who was military attache in Washington under Somoza Hernandez, had served along with Sanchez on the governing junta of the 15th of September Legion. This small group of former military men, with Bermudez as their leader, launched early sabotage raids against the Sandinista government. It merged with other small groups, including political alliances in Miami, to form the FDN, with Cardenal as a visible leader and Bermudez remaining as operational leader working with Argentine advisers in Honduras.

The decision of Argentine and CIA advisers to work with Bermundez meant the death of other efforts to organize a large insurgent force. Pedro Ortega, a Spanish-born owner of a match factory under Somoza, dropped out after spending what he said was a million-dollar personal fortune to send guerrillas along Nicaragua's Caribbean coast. Edmundo Chamorro, another early leader who sought Argentine support, was passed over.

The focus of attention and money on Cardenal and Bermudez set a pattern that has continued and intensified as the insurgency has grown from 500 men based in Honduras in 1981 to what their leaders now maintain are more than 12,000, most of them in Nicaragua. While Cardenal dealt with governments, including the Reagan administration, Bermudez worked quietly and directly with foreign advisers and supplies to run the actual guerrilla war.

As military attache in Washington and commander of Somoza's contingent within the Organization of American States forces during the U.S.-led invasion of the Dominican Republic in 1965, Bermudez had the opportunity to make key acquaintances in the U.S. military and intelligence establishments. Echaverry, his main aide, had attended military courses in Argentina along with Gen. Gustavo Alvarez, then head of the Honduran military, who along with Argentine and U.S. officials made Honduras a haven for the insurgents.

Significantly, Bermudez was the only FDN leader to remain in the "repackaged" FDN national Directorate of December 1982. Although politically attractive as an anti-Somoza activist and former official under the Sandinistas, Cardenal was dropped at the insistence of Argentine advisers who were directing the insurgents in Honduras, according to FDN officials.

The dispute revolved around Cardenal's efforts to act as leader, with Argentine officers insisting on retaining control of the insurgency, Edgar Chamorro recalled. Col. Osvaldo Ribeiro, a commander of the Argentine advisers group, personally handed out funds to rebel leaders and went so far as to give Cardenal personal expense money in humiliatingly small weekly amounts, he added.

At that time, CIA advisers were playing a secondary role in Honduras and were rarely seen there before guerrilla ranks began to grow in 1983, Chamorro said. Ribeiro traveled occasionally to Washington and Miami, but U.S. officials were the main contacts in the United States, he declared.

With Bermudez and Chamorro on the new FDN leadership panel were Lucia Cardenal, widow of a slain and highly respected business leader; Marco Zeledon, a Managua business organizer who once served in the U.S. Army; Indalecio Rodriguez, a university rector who was among the original members of the Sandinista National Liberation Front, and Alfonso Callejas, a minister and vice president under Somoza. Adolfo Calero, a silver-haired businessman who once managed Nicaragua's Coca-Cola plant, joined the group later and emerged with the title of commander in chief as rebel forces grew through 1983.

NEW LEADERS OPPOSED SOMOZA

Except for Bermudez and Callejas, the new leaders all had been active in the struggle against Somoza. Calero was jailed by the National Guard for organizing business opposition to the government, and Zeledon played a key role in fomenting a crucial anti-Somoza national strike. Their pasts, along with similar anti-Somoza activities by Chamorro and Rodriguez, were underlined in appeals for U.S. and Nicaraguan public support.

Immediately under Bermudez on his military staff, however, were some of the same National Guard officers who had helped start the insurgency. They included Echaverry, still working closely with his classmate Alvarez; Lau, in charge of counterintelligence; Gomez, in charge of the rebel "air force" Caceres, and Hernandez.

In addition, according to Chamorro, top officers included Justiciano Perez, who before 1979 was second in command under Somoza's son at the Base infantry Training School, and Hugo Vagra, who was named "operations theater commander" but was dismissed in a command shake-up late last year Sanchez, who is related to Calero by marriage became National Directorate Secretary and one of Calero's closest aides.

Bermudez, Lau and Perez particularly have been cited by followers of Eden Pastora as reasons for his refusal to join forces with the FDN—on the ground that it remains under control of National Guard officers, against whom Pastora fought during the Sandinista revolution.

After fighting last year in collaboration with Alfonso Robelo in the Costa Rican-based Revolutionary Democratic Alliance, ARDE, Pastora has gone his own way since the summer because of Robelo's decision to join with the main FDN. Without funds for ARDE military efforts, now commanded by Fernando "El Negro" Chamorro, Robelo has decided to concentrate on political activities, Calero reports. Pastora, also without financing since the CIA cutoff last summer, has gone his own way with several thousand mostly inactive guerrillas along the Nicaraguan-Costa Rican border.

In an effort to attract the politically popular Pastora last spring. Calero's FDN leadership announced that it had trimmed National Guard officers from the top command. Lau and Perez in particular were said to have left the rebel organization.

Other insurgent officials say, however, that Perez remains active as a military aide to Steadman Fagoth, leader of Miskito Indian forces allied with the FDN, and Lau also is still on hand in Honduras working as before to prevent Sandinista attacks or infiltrations.●

A TRIBUTE TO COL. ROBERT L. McLEAN

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GREEN. Mr. Speaker, as the Member of the House privileged to represent New York City's 15th District, I feel proud to be able to recognize the contributions of one of its residents, a man who epitomizes the concept of the citizen soldier, Col. Robert L. McLean.

Colonel Mclean has served his City, State and country for over three decades, both in the military and as a civilian participant. In 1952 Robert McLean became a second lieutenant as a student in the ordnance school. From there he went on to the ordnance guided missile school, and finally became a test officer, systems test division, White Sands Missile Range. In 1955, as a first lieutenant, he was assistant project engineer for the Corporal, Dart, Lacrosse, and redstone missiles ordnance mission at White Sands Missile Range. In 1959, having left active duty, 1st Lieutenant McLean was promoted to captain and became research and development coordinator, office, chief of ordnance. By 1979 this dedicated man has become a colonel. He had held many important posts including being chief of staff, 77th Infantry Division, and project officer, Darcom Readiness Study. Since 1981, as a reservist, Colonel McLean has been commander of the 77th Infantry Division and deputy director, material testing directorate, Aberdeen Proving Ground.

The numerous well-deserved docorations that have been awarded to this man include the Meritorious Service Medal, the Army Commendation Medal, and the National Defense Service Medal.

As if his military life did not keep hims busy enough, Colonel McLean also found the time and the energy to achieve a B.S. in engineering from Princeton University and a M.B.A. from New York University. Since 1968 he has been a vice president of the New York firm of Tucker Anthony & R.L. Day, Inc.

Mr. Speaker, I know my colleagues in the House will want to join me in paying tribute to this impressive man. His achievements both in the military and in civilian life are outstanding, and his life could serve as an example to us all. I am proud to acknowledge this real life American hero.●

A.M. "BUD" D'ALESSANDRO HONORED

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. TORRICELLI. Mr. Speaker, I am honored to call to the attention of Congress, the recognition being extended to A.M. "Bud" D'Alessandro of Franklin Lakes, NJ, at a dinner on his behalf on April 26, 1985. The dinner is being held to celebrate two milestones in Mr. D'Alessandro's life: the promotion to executive vice president of Alexander & Alexander, Inc. and to chief executive officer of the Human Resource Management Group, as well as the occasion of his 55th birthday on April 28, 1985.

Bud D'Alessandro has had a remarkable career which has led to his present promotion. He has most recently served as senior vice president, eastern division manager, and a member of the board of directors of Alexander & Alexander, Inc. Prior to joining Alexander & Alexander, he was president of A.M. D'Alessandro & Co., Inc.

His experience in the compensation and benefits consulting field spans almost 30 years. He has been and is a member of various committees in the field including a Special Task Force for the Presidential Commission on Pension Policy.

His education includes a masters degree in business administration, law school, and completion of all course work toward a doctorate in industrial relations.

In addition to his fine business career, Mr. D'Alessandro has devoted his tireless efforts to numerous church, school, community, and politi-

cal activities. He is currently chairman of the board of trustees of Bergen Community College in New Jersey, a member of the advisory council of St. John's University in New York, and serves on the board of directors of a local bank.

A dedicated family man, Bud and his wife, Rosemarie, will be celebrating their 30th wedding anniversary on April 30, 1985. They have five children, Stephen, Paul, Gregory, Karen, and Michael. The entire family proudly shares in the honor being bestowed upon him.

Bud D'Alessandro has been described as a rare individual who, no matter how busy he is, always seems to have time to help friends and strangers alike. He has truly earned the tribute being paid to him.●

JAMES McBRAYER SELLERS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SKELTON. Mr. Speaker, on May 4 in my home town of Lexington, MO, at Wentworth Military Academy, there will be a 90th birthday celebration for Col. J.M. Sellers, and I take this opportunity to inform my colleagues of this truly outstanding Missourian and American.

James McBrayer Sellers was born June 20, 1895 on the campus of Wentworth in Lexington. After graduating high school from Wentworth in 1912, Colonel Sellers attended the University of Chicago, receiving his bachelor of arts degree—Phi Beta Kappa—in 1917.

Commissioned as a second lieutenant in the U.S. Marine Corps in 1917, he served as a company commander with the 6th Marines, American Expeditionary Force in France. Colonel Sellers valor decorations include the Distinguished Service Cross, Navy Cross, Silver Star, Purple Heart, and the French Croix-de-Guerre. After being released from active duty in 1921, Colonel Sellers remained in the USMC Reserve until he retired in 1945.

From 1922 until today he has occupied various academic and leadership positions at Wentworth: Commandant 1922-28, executive officer 1928-33, superintendent 1933-60, and president of the academy 1938 through the present. Throughout this entire time, he has guided and inspired thousands of graduates to successful military and civilian careers. Additionally, Colonel Sellers is continuing to teach a class in Latin each day.

Colonel Sellers married the former Rebekah Evans, of Independence, MO, in 1924. The couple has three children: Stephen W., James McBrayer Jr., and Fred Evans. Along with his many activities associated with Wentworth, Colonel Sellers is also a past president of the Association of Military Colleges and Schools, past grand master of the Grand Masonic Lodge of Missouri, past grand commander of the Grand Commandery of Missouri, and an elder of the Presbyterian Church in Lexington.

Mr. Speaker and my colleagues, James McBrayer Sellers is a true American hero in every sense of the word. It is a privilege for me to take this time to honor these many achievments. It is with even greater pride, however, that I may call this great man my friend.●

ALEXANDRIA'S OUTSTANDING DISABILITY PROGRAM

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. PARRIS. Mr. Speaker, I would like to call the attention of this Chamber to an honor that has been bestowed upon the city of Alexandria, which I am pleased to represent. Today, Presidential Press Secretary James Brady announced that Alexandria is one of 12 communities in the United States to receive a citation for outstanding programs benefitting the disabled.

The $1,000 award was presented to the Alexandria Commission on Disabled Persons by Brady, chairman of the nationwide competition sponsored by the National Organization on Disability and by the Westinghouse Electric Corp.

The commission works with the private, nonprofit National Organization on Disability to improve the lives of the 35 million Americans with physical or mental disabilities.

Alexandria has been cited for its development of a specialized public transportation service for people who, because of their disabilities, cannot use regular buses.

In Alexandria, thanks to this innovative program funded mostly by the city's general fund, taxicabs and wheel-chair accessible vans now serve handicapped people. The fare paid by the disabled is $1 a ride, with the balance being paid by the city. The city pays full taxi meter fare and $15 per van ride, less the $1.

Alexandria has contracted with a private taxi company, which has placed two special wheel-chair accessible vans into service.

During the 5 full months this program has been in existence, more than 1,100 disabled people have made use of the service, and ridership is increasing each month as more and more people are becoming aware of the program. When it started in November, only 15 riders used the service. In December, the ridership climbed to 124. In January it nearly doubled to 232 and in February 314 people used the service. Last month, the number climbed to 423.

This indeed is an example of a caring solution to a problem. I commend the city of Alexandria.●

H.R. 691: CLEANING UP THE CHICKEN COOP

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. FRENZEL. Mr. Speaker, I am an original cosponsor of our colleague LYNN MARTIN'S bill to bring Congress and the Federal judiciary under title VII of the 1964 Civil Rights Act, and I want to take a minute to explain why.

About one-fourth of our colleagues have voluntarily pledged not to discriminate in employment by signing the House Fair Employment Practices Agreement. I think that's a worthy thing to do, and I'm glad to be among their number. But how well does this pledge address the issue of fair employment practices in the House? Only those who choose to sign the agreement are bound by it. Only employees who work for someone who's signed that agreement can complain to the House Fair Employment Practices Committee. And all they have is a grievance procedure, no right to compensation if discrimination has occurred. Employees also have no legal rights under the House Rules which say staff should be hired and paid in a nondiscriminatory fashion.

Rules and voluntary agreements are not enough. There's a better system which Congress invented years ago: The law. Only an enforceable law provides a substantial bar to discrimination in the present and the future. Of course, Congress recognized this fact when it passed a series of laws prohibiting other employers from discriminating. But we excluded ourselves from those laws, and reserved the right to discriminate on Capitol Hill.

This injustice should be rectified now. I believe LYNN MARTIN'S bill provides the best means to do so. It is a carefully designed proposal which accommodates the special situation of Congress as an employer. I recommend H.R. 691 in the strongest terms, and urge its support.●

STATEN ISLAND HONORS AMERICA BY RAISING MEMORIAL FLAG

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MOLINARI. Mr. Speaker, on Saturday, May 25, 1985, a huge American flag—30 feet in length and 20 feet in height—will be raised over the community of Staten Island, NY. This flag will be dedicated at a special ceremony at the Staten Island Mall on that day. This flag is the product of an effort by the community to demonstrate its patriotism and to honor the many Americans who came to this country from other lands and who dedicated their lives to the service of the United States.

The dream for the flag was born when several Staten Island veterans decided that they wanted to pay tribute to our country, our veterans, and to the many millions of people who came to our shores to make America great. Their idea was to raise a huge American flag in the center court of Staten Island Mall. It was their desire to fly the flag from this center location on Staten Island so that it would be seen by many thousands of Islanders every day.

After the initial idea was born, the Staten Island Memorial Flag Committee was formed to bring this dream to reality. With Rev. Victor Panzella, Jr., as the committee chairman, the committee set about raising the necessary funds for the project. The community has responded with generosity as witnessed by the donations that came in from civic organization, community groups, local merchants, and private citizens.

Mr. Chairman, on May 25, 1985, a dream of the Staten Island community will be realized with the raising of this very special flag. It is my privilege today to share the pride of my community with my colleagues in the House.●

PERSONAL EXPLANATION

HON. JOHN E. GROTBERG

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GROTBERG. Mr. Speaker, I was not present and voting yesterday when the House considered H.R. 1210, the National Science Foundation authorization for fiscal years 1986 and 1987. Had I been present, I would have voted "aye" on the so-called Walker amendment, as amended, to freeze spending at fiscal year 1985 levels.●

GRADUATED CORPORATE TAX RATE SYSTEM

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. RANGEL. Mr. Speaker, today, I am submitting a resolution expressing the sense of Congress that retention of the graduated corporate tax rate system is essential to the continued viability of the small business community and the Nation's economy.

Last November, then-Secretary of Treasury Regan released the Department's Report on Fundamental Tax Simplification and Reform. This report, which proposed a much needed broad-based income tax with lower marginal tax rates for individuals and corporations and which simplifies the Internal Revenue Code, as well as other proposals introduced this Congress, are comprehensive efforts which should be examined closely. Tax reform and simplification efforts are vitally needed because of the complexities and inequities presently inherent in the U.S. Tax Code.

However, while the Treasury proposal and several other pending bills would assist many businesses, these proposals would have a devastating effect on the Nation's smaller companies, because they call for the elimination of the graduated corporate tax rates.

For the Nation's small businesses, the elimination of the graduated corporate tax rates would dramatically increase their effective tax rates and reduce essential capital available for continued operation and growth. In general, small businesses with less than $150,000 of taxable income would face substantial increases in tax liability with the elimination of the graduated corporate tax tates.

The following chart compares the changes in corporate tax liability under the Treasury Department proposal with current tax law.

CHANGES IN CORPORATE TAX LIABILITY UNDER THE TREASURY PROPOSAL [1]

	Tax under current law	Tax under Treasury proposal	Net tax increase (decrease)	Percentage change
Taxable income:				
$10,000	$1,500	$3,300	$1,800	120
$25,000	3,750	8,250	4,500	120
$40,000	6,450	13,200	6,750	105
$50,000	8,250	16,500	8,250	100
$65,000	12,750	21,450	8,700	68
$75,000	15,750	24,750	9,000	57
$100,000	25,750	33,000	7,250	28
$125,000	37,250	41,250	4,000	11
$150,000	48,750	49,500	750	2
$200,000	71,750	66,000	(5,750)	(8)

[1] This table assumes, for purposes of illustration, that a corporation's taxable income would not be increased or decreased by the Treasury proposal.

For a small firm with taxable income of $50,000 or less, repealing the graduated corporated tax rates would result in at least a 100-percent increase in taxes. Significant but less severe tax increases would result when a firm's taxable income ranges from $50,000 to $150,000.

For the reasons when I introduced the Tax Equity and Simplification Act, H.R. 1040, which is a modification of the Department of Treasury tax reform proposal, I included a progressive tax rate for small businesses. This rate will be equal to 15 percent for the first $50,000 of taxable income, 25 percent of taxable income between $50,000 and $100,000, and 33 percent thereafter. The value of the reduced rates, designed to provide relief for small businesses, would be phased out between $100,000 and $200,000. This would leave small businesses in essentially the same situation that they currently enjoy.

Small businesses account for about 40 percent of the gross national product and two-thirds of all new employment. This entrepreneurial spirit needs to be encouraged, not stifled by Federal tax policies which run counter to the interests of the Nation's small business. If the graduated tax is repealed, thereby forcing many small businesses to pay higher taxes, it will have a serious detrimental effect, not only on the small business, but also on the economic growth of the nation as a whole.

Congressmen CARROLL CAMPBELL and PARREN MITCHELL have joined me as original cosponsors of this concurrent resolution. It is our understanding that the Senate will be introducing a similar resolution today.

I strongly urge all my colleagues to join us in this important effort to assist the Nation's small business.●

A TRIBUTE TO THE SOUTH JERSEY CHINESE COMMUNITY CENTER YOUTH COUNCIL

HON. H. JAMES SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SAXTON. Mr. Speaker, I would like to take this opportunity to recognize and honor the South Jersey Chinese Community Center Youth Council of Delran, NJ. The South Jersey Chinese Community Center Youth Council serves to help its members develop and strengthen leadership abilities, cultural and educational awareness, service to the community, and fellowship among the 32 members.

This outstanding organization was established on March 28, 1981, by Mr. and Mrs. Allen Chan, Mr. and Mrs. Edward Lim, and Mrs. Joyce Kuo. Each of these individuals has worked extremely hard to properly implement the goals of their organization.

Mr. Speaker, the South Jersey Chinese Community Center Youth Council has been active in the community since its inception in 1981. A noteable example of this involvement is a history project, performed by the South Jersey Chinese Community Center Youth Council, which examined the lifestyles of the first Chinese residents of the Delran, NJ area. Mrs. Shirley Chan was awarded a $500 grant from the State of New Jersey to initiate this project, and utilized the information they uncovered as a historical foundation for this organization.

I am honored to have the South Jersey Chinese Community Center Youth Council in my district, and am extremely pleased to acknowledge their contributions to the cultural growth of southern New Jersey.●

FIFTY YEARS OF SERVICE

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Ms. OAKAR. Mr. Speaker, Sunday, April 21, 1985, marks the anniversary of 50 years of service to Greater Cleveland by Sister Mary Thecla Mathews, OSU, and nine other Ursuline Sisters of Cleveland, OH.

Seldom do these sisters receive the recognition they deserve for their special and unrelenting dedication to the education and development of the students and families they serve. We who have experienced first hand the devoted care and passion for excellence of Ursuline education know the great gift that they have given to our society since the earliest days of the frontier settlements on this continent.

On the occasion of her jubilee we honor Sister Mary Thecla for her 50 years of service in 11 elementary schools—among them, St. Charles, Christ the King, St. William, and St. Francis de Sales, where she is teaching at present—and two high schools, Beaumont Schools for Girls and Lake Catholic High School. I congratulate Sister Mary Thecla on this occasion, as well as her nine other Ursuline companions who collectively represent 500 years of dedication and service to the people of Greater Cleveland: Sr. Angela Merici, Sr. Marie O'Hearn, Sr. Ligouri, Sr. Anne Marie Kocab, Sr. Jane Frances, Sr. Frances Patrick, Sr. Mary Vincent, Sr. Mary Jude, and Sr. M. Scholastica.●

A TRIBUTE TO JOSEPH (SOCKS) HOLDEN

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. YATRON. Mr. Speaker, on May 4, 1985, the St. Clair Lions Club will be holding a testimonial awards dinner in honor of Joseph "Socks" Holden.

Joseph Holden, a former catcher for the Phillies, is presently a major league scout. Baseball and those who play it and work for it hold a special place in the hearts of many Americans. We owe a debt of gratitude to individuals like Joe Holden, who participate in the sport throughout their lives. We owe Joe Holden another debt of gratitude for his years of public service and commitment to his community. He was Schuylkill County commissioner and throughout his life has played a major part in his community. He is well known throughout the county, and well respected for his outstanding contributions. I would like to ask my colleagues to join me in saluting his life's work and in wishing him continued future success. I am indeed grateful that I had this opportunity to bring some of Joseph Holden's accomplishments to your attention.●

TRIBUTE TO PI KAPPA ALPHA FRATERNITY

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. CONTE. Mr. Speaker, let me take this opportunity to recognize the hard work and dedication of a group of my constitutents, the brothers of the Pi Kappa Alpha Fraternity, Theta Mu Chapter, located at the University of Massachusetts—Amherst. These dedicated young men will be sponsoring their sixth annual 24-hour dance marathon to benefit the Multiple Sclerosis Society on April 19 and 20, 1985.

Over the past 5 years, these young men have raised over $60,000 through these marathons. Their continued efforts on behalf of those who are less fortunate are certainly commendable. Through their dedication many young adults might not have to suffer the disabling effects of this crippling disease.

Their continued enthusiasm and determination to fight this battle against multiple sclerosis, is truly an outstanding credit to their organization, and certainly is a benefit to those of us in Massachusetts who are committed to work for a cure to this disease.

As the first recipient of the "Congressman of the Year Award," from the National Multiple Sclerosis Society, I know first hand the benefits derived from the time, energy, and hard work these young men devote themselves to year after year. Their donations are the life-blood of multiple sclerosis research and treatment throughout Massachusetts.

Multiple sclerosis is one of the major disabling diseases of young adults, and is extremely prevalent here in Massachusetts with an estimated 6,000 families living with the illness. The funds raised by the brothers of Pi Kappa Alpha and other organizations, finance efforts to find a cause and cure for multiple sclerosis through the national society's programs.

I congratulate and encourage the young men of Pi Kappa Alpha on their continued efforts on behalf of multiple sclerosis, and wish them the best of luck in attempting to reach their goal of $20,000 with over 40 couples dancing in the marathon, for a truly deserving cause.●

A TRIBUTE TO THE SAFER FOUNDATION OF CHICAGO

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. ROSTENKOWSKI. Mr. Speaker, I wish to pay tribute to the Safer Foundation of Chicago, and to call to the attention of my colleagues the outstanding work this organization has done in serving nearly 50,000 offenders over the last 15 years.

The Safer Foundation, by providing comprehensive education and counseling to former offenders, offers them a "road back" to society. With offices in Illinois and Iowa, the Foundation serves approximately 6,000 men and women each year, offering job placement, literacy training, employment, and substance abuse counseling.

Last year, the foundation assisted over 2,400 in finding employment and several hundred in obtaining GED's or in returning to school. Nearly all of those served were young black men with incomes below the poverty level; over half had not graduated from high school and an overwhelming majority had been arrested more than twice. Without the practical assistance offered by the Safer Foundation, the social and economic obstacles facing these former offenders upon their release from prison would be all but insurmountable.

By developing a creative partnership between the public and private sectors, the foundation has developed effective methods of involving the community in the rehabilitation effort, while striving to make our city a safer place to live.

Today, April 18, marks 15 years that the Safer Foundation has served Illi-

nois, and it is with gratitude and pride that I commend Safer's outstanding work in our State.●

THE NBS AUTHORIZATION BILL: A CASE STUDY FOR FREEZING R&D

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mrs. LLOYD. Mr. Speaker, I was unable to be present and vote on the bill, H.R. 1617, because of health reasons. If I had been on the House floor, I would have given the following statement in opposition to the Walker amendment to reduce the National Bureau of Standards Authorization:

Mr. Chairman, the Science and Technology Committee position on this bill through the committee substitute is fiscally and programmatically responsible. The House has expressed its will to freeze R&D spending, as we have seen by the votes on both the NASA bill and the amendment offered by Mr. Fuqua to the NSF bill. If we accept the Walker amendment on the NBS bill, we will be telling the American people that there is no logic or sound basis to the House approach to cuts in domestic spending. The floor rationale for reducing the NASA and NSF bills was that the President's request was too high because it exceeded what were healthy appropriations levels for fiscal year 1985. At the same time, as in the case of NSF, the House agreed that the Science and Technology Committee program recommendations should provide policy direction to the Foundation at the lower budget level.

Now we are confronted with a very difficult situation in that the NBS bill is at the fiscal year 1985 level and $4 million over the fiscal year 1986 request. Yet those who would appeal to a "fiscal lynch mob" mentality are now saying that fiscal year 1986 is the lower number so let's take that level. This isn't rational, it doesn't make for good R&D policy, and the Committee must oppose it if there is going to be any consistent direction from this body on spending across the R&D agencies. The House has saved $475 million from the fiscal year 1986 request on the NASA and NSF bills but the relatively small amount involved here ($5.2 million) masks a major policy issue. This body has stated its goal of "freeze" levels on these domestic programs and I hope there will be an exception for defense to at least accommodate inflation. I support the committee substitute on this NBS bill because it is behaving in the best sense of an authorizing committee, while the supporters of the Walker amendment would have us practice fiscal anarchy. I urge adoption of the S&T Committee substitute as evidence that the House is approaching the deficit with reason and good sense.●

PUBLIC CHARITY TAX PENALTY REFORM ACT OF 1985

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SCHUMER. Mr. Speaker, today I am introducing a bill that will insure that volunteer trustees, directors, and officers of public charities shall not be penalized under the tax laws. Currently, section 6672 insures that a business pays all Federal income, FICA and FUTA taxes required to be withheld from its employees. For most businesses the IRS regulations make the chairman, president, treasurer, or other officers the persons responsible for any willful nonpayment of taxes.

The IRS, however, is applying the same penalties for nonprofit organizations. This is wrong since it means that officers of nonprofit organizations, such as hospitals, schools, and various community self-help organizations, are penalized for the nonpayment of taxes. The penalty is levied against these trustees despite the fact that they are serving the charity on a purely volunteer basis and frequently have no knowledge of the spending and management decisions of the charity's full time, paid, professional staff.

This bill exempts any person that serves as a trustee, director, or officer of a nonprofit organization on a volunteer and part-time basis without compensation from the penalties that are levied against business executives who are responsible for any willful nonpayment of taxes.

I urge my colleagues to support this bill as the only way to see that community minded individuals are not penalized for volunteering their time and energy to nonprofit organizations.●

BILL KIZER—MR. HEALTH—1985

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. DAUB. Mr. Speaker, annually, the Combined Health Agencies Drive—known as CHAD—of Omaha, NE, honors an individual of outstanding achievement as Health Citizen of the Year.

This year's recipient is William Kizer, founder of the Wellness Council of the Midlands which promotes health programs in businesses in the Omaha region.

Since its founding 4 years ago, the Wellness Council has expanded to 100 member companies with a total of 75,000 employees. Recently, Mr. Kizer has met with business leaders in several cities to promote programs on health in the workplace.

In addition to his efforts with the Wellness Council, Mr. Kizer is chairman and chief executive officer of Central States of Omaha Co. He is also director of the Health Insurance Association of America and chairman of its health education subcommittee.

His unlimited enthusiasm and energies also extend to his positions as director of the Creighton-Nebraska University Health Foundation and as chairman of the Hospital and Health Affairs Committee of Creighton University, and as director of the American National Bank of Omaha. William Kizer is a gentleman who has earned the respect of our community for his expertise in the health field and for his selfless dedication to others. His selection as Health Citizen of the Year is a prestigious and well-earned recognition of his outstanding work.●

COMMENDING CALIFORNIA UNIVERSITY OF PENNSYLVANIA'S MON VALLEY RENAISSANCE PROGRAM

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. MURPHY. Mr. Speaker, I join with my western Pennsylvania congressional colleagues to recognize, endorse and support the initiatives of the Mon Valley Renaissance Program developed by California University of Pennsylvania.

As an integral part of my 22d Congressional District, California University of Pennsylvania has sought to accomplish economic revitalization by broadening the economic base of the Monongahela River Valley through diversification of businesses.

The Mon Valley Renaissance Program provides direct services to small businesses in the areas of procurement and entrepreneurial assistance, while receiving full cooperation from other county and governmental agencies. It is through these type of programs and cooperative efforts that we hope to restore economic vitality to the Monongahela Valley.

Traditionally, my congressional district has been almost exclusively dependent upon the coal and steel industries. I commend the work of the university in the area of economic redevelopment of the Monongahela Valley.●

READING CORPS OF THE SALVATION ARMY CELEBRATES 100 YEARS OF SERVICE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. YATRON. Mr. Speaker, on May 4, the Reading Corps of the Salvation Army will be celebrating 100 years of service to Reading and Berks County, PA. A communitywide celebration will take place on Sunday afternoon. It is indeed my privilege to bring this occasion to the attention of my colleagues and to ask them to join me in congratulating Maj. and Mrs. Robert A. Baker, commanding officers, and all the members of the Reading Corps on their centennial.

For 100 years the name Salvation Army in Reading and Berks County has been synonymous with hard work; spiritual and moral regeneration; and religious and charitable works. This outstanding organization has helped all those who have come in need. The devotion and strength exhibited by its soldiers stands as a model for all of us to emulate.

It is particularly significant that this year, its 100th year, that the Reading Corps of the Salvation Army announced an overall increase in services provided; 12,710 persons were served by their Christmas is Sharing Program in 1984, an increase of 3,410 over the number served in 1983. Toys and clothing were provided for 10,111 children, 3,076 more than in 1983; 769 baskets and food orders were distributed, up 134; and 1,705 people were provided garments and shoes, an increase of 668.

I am proud to take this moment to pay special tribute to this organization for their selfless devotion to God, to their community and for bestowing on the world immesureable goodness. Their goal has always been to render service to others and to make this world a better place in which to live; and because of them it is.

It is indeed my pleasure to make these achievements known to the House of Representatives.●

DAVID SMICK ON POPULISM AND TAX REFORM

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. COURTER. Mr. Speaker, recently one of Washington's most astute political observers, David Smick, wrote an analysis for the New York Times on the politics of tax reform. I urge my colleagues to consider these important views and resist the arguments against a growth-oriented tax reform that the special interest lobbyists are advancing.

The article follows:

POPULISM AND TAX REFORM

(By David M. Smick)

WASHINGTON.—Supply siders come in two varieties—the corporate or elitist sort, who see the present tax code as just fine, and the populists, who rightly see tax fairness, simplicity and lower rates as the central domestic issue of the 1980's.

As the debate over tax reform reheats, the elitists are warning that the bias of tax reform toward individuals and against corporations is anti-supply side and will produce less savings, less investment and an inevitable catastrophe after enactment. Corporate supply siders mistakenly believe that individuals merely consume while corporations alone create economic growth. For them, "capital" precedes "labor"—that is, capital is the driving force in the economy, with the rate of capital formation a near-perfect barometer of prosperity.

Corporate supply siders find little value in lower corporate or individual tax rates, particularly if they come at the expense of accelerated depreciation and the investment tax credit, loopholes that are designed to enrich the present capital structure.

Populist supply siders don't believe capital is unimportant. Their point is that without labor, capital would cease to exist. They believe individuals are essential in the process of economic expansion. Ultimately, in their view, individuals are the economy's producers, savers, investors and innovative risk-takers, as well as consumers. Populists aren't surprised that the Fortune 500 companies have created no net new jobs in the last 15 years. Nor that almost all new jobs are created by young, minuscule firms launched mostly with private savings.

For populists, economic growth begins with ideas that are commercialized in a dynamic process that the economist Joseph Schumpeter described as the "creative destruction of capital." This is growth from the bottom up, in which individuals strike out on their own with a good idea, turn it into a successful company and eventually topple established businesses. Thus, the Xerox process drove out the mimeograph, and so on. And this is precisely why populist supply siders support tax reform. Their concern, above all, is to lower individual rates of taxation (which apply to 85 percent of businesses), including the rate on capital gains, to encourage creative destruction.

Unlike corporate supply siders, populists would give up some corporate loopholes, as long as corporate rates were lowered to provide greater incentives to growth. In economists' terms, they distinguish between the "incidence" of taxation (the rate of taxation on future income) and its burden (the total taxes paid by corporations in the present). They would even join forces with neo-liberals, who also value the individual's contribution to economic growth.

Lest this seem all too abstract, consider the record for both types of taxation. Over the past five years, Britain, Ireland and Sweden, which have virtually eliminated corporate taxes while keeping individual rates high, have had miserable growth rates of less than 1 percent annually. Japan, with its high corporate rates and relatively low rates for most individuals, has enjoyed strong economic growth.

Before the summer is out, President Reagan will have to choose between populist and elitist views of Federal taxation. Those corporate apologists who today assure one another that "tax reform isn't going anywhere" should not underestimate the President's instincts. I predict he will go populist, as he has in the past.

I recall a meeting in early 1980, when Mr. Reagan was setting strategies for his upcoming campaign. At one point, somebody expressed concern that John B. Connally, the former Governor of Texas, and another presidential candidate, was gaining support among corporate chief executive officers, with all the prestige and financial support that that entails, Mr. Reagan said that didn't bother him at all, "Let him have the Fortune 500," he said, "I want our campaign to stand for Main Street, not Wall Street. I want us to stand for the worker, the shopkeeper, the entrepreneur and the small-businessman.

In the end, Ronald Reagan's tax reform will present Congress with a political referendum on special interests. Who really should control tax policy? The Gucci-clad crowd in Washington or the Florsheim folks back home? This question will split the ranks of both parties, along lines less ideological than generational.

This is why the Treasury's tax plan, despite its considerable problems, was a political master stroke. If the plan had drawn immediate cheers from the United States Chamber of Congress, it would have been dead on arrival in Congress.

Instead, it captured the attention of younger Democrats who, because of Republican losses in the House in 1982, are vital to a successful coalition in favor of reform. Sure, the plan needs some changes—the capital-gains rate should be lowered and the depreciation schedule should be exchanged for some form of "expensing," a far simpler and fairer method of encouraging investment. But insiders at the Treasury Department are predicting that the bipartisan coalition—whose leaders will negotiate the final, compromise plan with the Treasury—could sweep the House with more than 300 votes.

My only fear is that the White House might play retail politics. Tax reform involves wholesale politics—mass communication, going over the heads of Congress to the grassroots. Single-shot, "retail" dealmaking with the tax-writing committees would be suicidal, producing a compromise perhaps worse than the present system. Tax reform will prevail if average people know precisely the national cause at stake. To wit: unleash the Great Communicator.

Good economics is good politics, and vice-versa. All the Administration needs is to hang tough. The people will take care of the rest. ●

STEELHEAD DECOMMERCIALIZATION BILL

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. SWIFT. Mr. Speaker, I am today introducing the "Steelhead Trout Protection Act," which proposes that States be able to enforce bans against commercial steelhead fishing within their jurisdictions. This legislation is important because it would re-

store steelhead fish to the status of "game fish" rather than "commercial" for the first time in over 10 years. It would correct inequities that were created by the Federal court Boldt decision in 1974. It would implement the will of the people of the State of Washington, as expressed by a majority vote last November in favor of Initiative 456.

Steelhead trout has traditionally been considered a game fish. In 1974, however, the rug was pulled out from under the sports fishermen when the Federal Government initiated a lawsuit which resulted in a U.S. district court ruling that treaties entered into between the U.S. Government and various Indian tribes entitled those tribes to more than half of the steelhead trout harvest. The court ruling permitted tribal fishermen to use gillnets, a commercial fishing technique, and to sell steelhead commercially.

I have believed for a long time that this Federal court decision, which was in response to a federally initiated lawsuit, intend to guarantee Indians their treaty rights, resulted in other inequities to non-Indian fishermen. I object to the non-Indian fishermen of the Pacific Northwest being forced alone to shoulder the burden for a Federal treaty entered into in the name of all American citizens. Furthermore, I believe that by allowing tribal fishermen to use gillnets, the Federal court is damaging the future prospects for a healthy steelhead fishery. It is for these reasons that, in the 97th Congress, I cosponsored legislation that was similar to the bill I am introducing today.

Our legislative effort was not successful in the 97th Congress, and it has dim prospects in this Congress as well as supporters of Initiative 456 have acknowledged. However, because I believe that steelhead decommercialization would improve conservation efforts and be more equitable, I am reintroducing the bill today in response to the expressed will of the people of Washington State, who passed the initiative. Senator SLADE GORTON is introducing a companion measure today in the other body.

One reason that the 97th Congress did not act on the decommercialization issue was because of a concern that it would abrogate Indian treaties. I do not believe that the bill that was proposed then, nor the bill I am introducing today, results in such an abrogation. It specifically provides a means for the U.S. Claims Court to consider whether the legislation results in a taking of Indian treaty rights, and authorizes compensation if there is a taking, thereby preventing any treaty abrogation.

Mr. Speaker, I hope that all of my colleagues in this body will consider this legislation, which I believe could finally correct inequities created by a Federal court decision more than 10 years ago.●

OLDER HISPANICS MORE LIKELY TO BE POOR

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 18, 1985

● Mr. GARCIA. Mr. Speaker, I would like to bring to the attention of my colleagues a recent publication by the National Image Inc. Newsletter outlining the unfortunate plight of the Hispanic elderly in this country. It points out the poverty has had an especially adverse affect on the Hispanic community. According to the U.S. Bureau of Census, older Hispanics continue to be about twice as likely to be poor as older Anglos.

Poverty levels for aged Hispanics in 1983 stand out as the fourth highest since poverty statistics were first tabulated. Thirty-eight percent of Hispanics 65 or older either lived in poverty or so close to it that they really could not appreciate the difference. One hundred and forty-nine thousand of the Hispanic population 65 or older earned below $4,775. An additional 16,000 were considered marginally poor, earning incomes no more than 25 percent above the poverty line.

It is only too obvious that this frightening trend is on an upswing. Statistics show that the number of poor and marginally poor older Hispanics in 1983 is 20,000 above the level in 1982, at which time 159,000 Hispanics were poor and 66,000 were considered marginally poor.

It is urgent that this great democratic Nation address itself to this tragedy by taking upon itself the task of improving the quality of life for all aged Americans. I urge my colleagues to support efforts to help alleviate the misery which is a day-to-day reality in the lives of so many.

OLDER HISPANICS TWICE AS LIKELY TO BE POOR AS AGED ANGLOS, CENSUS REPORTS

Older Hispanics continue to be about twice as likely to be poor as aged Anglos, the U.S. Bureau of the Census reports. In 1983, 23.1% of all Hispanics 65 years or older were poor, compared to 12.0% of older Anglos.

Poverty actually declined slightly for aged Hispanics, from 159,000 in 1982 to 149,000 in 1983. However, the 1983 poverty level is the fourth highest since poverty statistics were first tabulated for older Hispanics. An individual 65 or older was considered poor in 1983 if his or her annual income was below $4,775. The poverty threshold for an elderly couple was $6,023.

Additionally, another 96,000 aged Hispanics were considered marginally poor. Their incomes were barely above the poverty line, but not by more than 25%. In sum, last year 245,000 elderly Hispanics—about two of every five Hispanics 65 years or older (38.0%)—either lived in povety or so close to it that they really could not appreciate the difference.

The number of poor and marginally poor older Hispanics is actually 20,000 above the level in 1982 (225,000). At that time 159,000 aged Hispanics were poor, and 66,000 were near poor.

Poverty rates for Hispanic males and females are essentially equally equal. According to the Census Bureau, 23.7% of all Hispanic females 65 or older were poor in 1983, compared to 22.3% of aged Hispanic males. Ordinarily, the poverty rate differential for other races and nationalities is significantly higher for females than males. For example, the poverty rate for Anglo females 65 or older is 14.7%, in contrast to 8.2% for aged Anglo males. The net effect is that deprivation is equally high for older Hispanic males and females.

"America is a great nation, but we still have a long way to go to improve the quality of life for aged Hispanics and other older Americans", said Carmela Lacayo, Executive Director of the National Association for the Hispanic Elderly.—ANPPM Legislative Bulletin, Oct. 1984.●
